In the Old Test. a state of supernatural ecstasy is evidently denoted by the "deep sleep" which fell upon Adam during the creation of Eve (Gen. ii, 21), and during which, as appears from the narrative, he was made aware of the transaction, and of the purport of the attendant circumstances (ver. 21-24). See MARRIAGE. A similar state occurs again in the "deep sleep" which fell upon Abraham (xv, 12), during which the bondage of his descendants in Egypt was revealed to him. Possibly all the accounts recorded in that chapter occurred in "vision" (ver. 1-12), which ultimately deepened into the trance (ver. 12-21). Comp. ver. 5, 12, where he is said to have seen the stars, though the sun had not gone down. The apparent objection that Abraham was "brought forth abroad" to see the stars is only of the same nature with others explained in the art. TEMPTATION OF CHRIST. Balaam, as if overcome by the constraining power of a spirit mightier than his own, "sees the vision of God, falling, but with opened eyes" (Numb. xxiv, 4). The incident of the ass speaking to him, etc., is also understood by many learned Jews and Christians to have occurred in a vision (Bp. Law, *ut sup.*). To the same mode of divine communication must be referred the magnificent description in Job iv, 13-21. Saul, when the wild chant of the prophets stirred the old depths of feeling, himself also "prophesied" and "fell down" (most, if not all, of his kingly clothing being thrown off in the ecstasy of the moment) "all that day and all that night" (1 Sam. xix, 24). Something there was in Jeremiah that made men say of him that he was as one that "is mad and maketh himself a prophet" (Jer. xxix, 26). In Ezekiel the phenomena appear in more wonderful and awful forms. He sits motionless for seven days in the stupor of astonishment, till the word of the Lord comes to him (Ezek. iii, 15). The "hand of the Lord" falls on him, and he too sees the "visions of God" and hears the voice of the Almighty, is "lifted up between the earth and heaven," and passes from the river of Chebar to the Lord's house in Jerusalem (viii, 3). As other elements and forms of the prophetic word were revived in "the apostles and prophets" of the New Test., so also was this. More distinctly even than in the Old Test., it becomes the medium through which men rise to see clearly what before was dim and doubtful, in which the mingled hopes and fears and perplexities of the waking state are dissipated at once. Though different in form, it belongs to the same class of phenomena as the "gift of tongues," and is connected with "visions and revelations of the Lord." In some cases, indeed, it is the chosen channel for such revelations. To the "trance" of Peter in the city, where all outward circumstances tended to bring the thought of

an expansion of the divine kingdom more distinctly before him than it had ever been brought before, we owe the indelible truth stamped upon the heart of Christendom, that God is "no respecter of persons," that we may not call any man "common or unclean" (Acts x, xi). To the "trance" of Paul, when his work for his own people seemed utterly fruitless, we owe the mission which was the starting-point of the history of the Universal Church, the command which bade him "depart . . . far hence unto the Gentiles" (xxii, 17-21). Wisely, for the most part, did that apostle draw a veil over these more mysterious experiences. He would not sacrifice to them, as others have often sacrificed, the higher life of activity, love, prudence. He could not explain them to himself. "In the body or out of the body," he could not tell, but the outer world of perception had passed away, and he had passed in spirit into "paradise," into "the third heaven," and had heard "unspeakable words" (2 Cor. xii, 1-4). Those trances too, we may believe, were not without their share in fashioning his character and life, though no special truth came distinctly out of them. United as they then were, but as they have seldom been since, with clear perceptions of the truth of God, with love wonderful in its depth and tenderness, with energy unresting, and subtle tact almost passing into "guile," they made him what he was, the leader of the apostolic band, emphatically the "master-builder" of the Church of God (comp. Jowett, *Fragment on the Character of St. Paul*).

Persons receiving this divine influence often fell to the earth under its influence, as in ordinary catalepsy (Gen. xvii, 3, etc.; 1 Sam. xix, 24, Heb. or margin; Ezek. i, 28; Dan. viii, 18; x, 15, 16; Rev. i, 10, 17). It is important, however, to observe that in all these cases the visions beheld are also related; hence such cases are distinguished from a mere *deliquium animi*. We find likewise in the case of Peter that "he fell into a trance" (or rather a "trance fell upon him," *ἐπίπεσεν ἐπ' αὐτὸν ἔκστασις*), during which he "saw a vision," which is therefore distinguished from the trance (Acts x, 10, comp. Paul's trance, xxii, 17; 2 Cor. xii, 2, etc.). The reality of the vision is established by the correspondence of the *event*. The nearest approach we can make to such a state is that in which our mind is so occupied in the contemplation of an object as to lose entirely the consciousness of the body—a state in which the highest order of ideas, whether belonging to the judgment or imagination, is undoubtedly attained. Hence we can readily conceive that such a state might be supernaturally induced for the higher purpose of revelation, etc. The *alleged* phenomena of the mesmeric trance and clairvoyance, if they serve no higher purpose, may assist our conceptions of it.—Kitto; Smith. See VISION.

Trani, a name common to some Jewish authors, of whom we mention the following:

1. ISAAIAH DA, so called after his native place Trani, a seaport town of Naples, and, by way of abbreviation, *Rid*=רִיד, from the initials רִישׁוֹת דִּי אֲנִי, i. e. *R. Isuah da Trani*, flourished about A.D. 1232-70. He may be regarded as the founder of the school of Talmudical and traditional exegesis in Italy. He wrote not only numerous annotations on the Talmud, and theological decisions (פְּסָקִים) connected with traditional law, but also *scholia* (שְׁכוּלָה) to the Bible, which are as follows: נְסוּחֵי הַחֻשׁ, *Scholia on the Pentateuch* (Leghorn, 1792):—קְצוֹר פְּרוֹשׁ הַרִישֵׁת, *Annotations on Joshua*, published, with a Latin translation by J. A. Steinmetz, under the title *Essai Comment. in Josuam quem in Codice MS. Bibl. Senat. Lips. Descriptum et Versione ac Notis Illustratum*, Præs. J. G. Abicht *Eruditum Examinis subject* (Lips. 1712):—*Annotations on Judges and 1 Samuel*, printed in the Rabbinical Bibles (q. v.). Besides these published commentaries, the following annotations of Trani are in MS.: a commentary on Ezra, Cod. Opp.; a commentary on the Five Me-

gilloth and Daniel, in the Angelica at Rome; commentaries on the minor prophets, Psalms, and Job, to be found in MS. in several European libraries. See Fürst, *Bibl. Jud.* iii, 438 sq.; De' Rossi, *Dizionario Storico* (Germ. transl.), p. 318 sq.; Steinschneider, *Catalogus Libr. Hebr. in Bibl. Bodl.* col. 1389-92; Kitto, *Cyclop.* s. v.; Grätz, *Gesch. d. Juden* (Leips. 1873), vii, 175; Jost, *Gesch. d. Judenth.* u. s. *Sekten*, iii, 33; Zuntz, *Zur Gesch. u. Literatur*, p. 58.

2. MOSES DA was born at Salonica in 1505. When a boy he went to Adrianople, and was educated in the house of his uncle. In the year 1521 he went to Safet to continue his studies, and four years later he received ordination, and in 1535 went to Jerusalem, where he died in 1585. His success in teaching was so great that he was styled "The Light of Israel," "The Sinaite of Mount Sinai and the Uprooter of Mountains," because he solved the difficulties in the law. He wrote, *בְּרֵית מֹשֶׁה*, on Jewish rites, ceremonies, prayers, morals, etc. (Venice, 1576):—*סֵפֶר קִרְיַת סַפֵּר*, a body of Jewish laws, in which he distinguishes between the laws written by Moses, those which were transmitted by tradition, and those only founded on the decisions of the doctors:—a collection of decisions in 3 parts, and other works of minor import. See Fürst, *Bibl. Jud.* iii, 441 sq.; De' Rossi, *Dizionario Storico* (Germ. transl.), p. 319 sq.; Basnage, *Histoire des Juifs* (Taylor's transl.), p. 703; Adams, *Hist. of the Jews*, ii, 14; Jost, *Gesch. d. Judenth.* u. s. *Sekten*, iii, 129; Zuntz, *Zur Gesch. u. Literatur*, p. 229, 230. (B. P.)

Transanimation, the transfer of souls from one body to another=TRANSMIGRATION (q. v.).

Transcendent, or Transcendental (from *transcendere*, to go beyond), words employed by various schoolmen, particularly Duns Scotus, to describe the conceptions that, by their universality, rise above or transcend the ten Aristotelian categories. Thus, according to Scotus, *Ens*, or Being, because it is predicable of substance and accident alike, of God as well as of the world, is raised above these by including or comprehending them. Again, the predicates assumed by Scotus to belong to *Ens*, or simple existence, viz. the One, the True, the Good—*Unum, Verum, Bonum*—are styled transcendent because applicable to *Ens* before the *descent* is made to the ten classes of real existence. According to Kant, transcendental applies to the conditions of our knowledge which transcend experience, which are *a priori*, and not derived from sensitive reflection. Between the hitherto convertible terms transcendental and transcendent Kant drew a distinction of considerable importance in understanding his own system. By the word *transcendental* he designates the various forms, categories, or ideas assumed to be native elements of human thought; implying that, although they are not products of experience, they are manifested only in experience: such as space and time, causality, etc. The word *transcendent* Kant reserves for those among the transcendental or *a priori* elements that altogether transcend experience. They may seem to be given in experience, but they are not really given. Such are the "Ideas of the Pure Reason," God, an immaterial soul, etc. Transcendental elements, when legitimately applied to experience, as causality and relation, are called *immanent*. See *Chambers's Encyclop.* s. v.; Fleming and Krauth, *Vocab. of Phil. Science*, s. v.

Transcendentalism, a name given to some forms of recent German philosophy. Fichte taught a subjective idealism, Schelling an objective idealism, and Hegel an absolute idealism—regarding thought and being as identical. Nature is God coming into self-consciousness, for he is ever striving after self-realization: "In order to philosophize aright, we must lose our own personality in God, who is chiefly revealed in the acts of the human mind. In the infinite developments of divinity, and the infinite progress towards self-conscious-

ness, the greatest success is reached in the exertions of human reason. In men's minds, therefore, is the highest manifestation of God. God recognises himself best in human reason, which is a consciousness of God. And it is by human reason that the world (hitherto without thought, and so without existence, mere negation) comes into consciousness; thus God is revealed in the world. After arriving at an ideal God, we learn that philosophy and religion draw us away from our little selves, so that our separate consciousness is dissolved in that of God. Philosophy is religion; and 'true religion frees man from all that is low, and from himself, from clinging to I-hood (*Ichheit*) and subjectivity, and helps him to life in God as the truth, and thereby to true life.' In this ablation of personal identity, we must not claim property even in our own thoughts. Hegel teaches that it is God who thinks in us; nay, that it is precisely that which thinks in us which is God. The pure and primal substance manifests itself as the subject; and 'true knowledge of the absolute is the absolute itself.' There is but a step to take and we arrive at the tenet that the universe and God are one. The Hegelians attempt to distinguish this from the doctrine of Spinoza, but their distinctions are inappreciable; their scheme is pantheism. And as God is revealed by all the phenomena of the world's history, he is partly revealed by moral action, and consequently by sin, no less than by holiness. Sin is, therefore, a part of the necessary evolution of the divine principle; or, rather, in any sense which can affect the conscience, there is no evil in sin—there is no sin. It was reserved for Hegel to abandon all the scruples of six thousand years, and publish the discovery—certainly the most wonderful in the history of human research—that something and nothing are the same! In declaring it he almost apologizes, for he says that this proposition appears so paradoxical that it may readily be supposed that it is not seriously maintained. Yet he is far from being ambiguous. Something and nothing are the same. The absolute of which so much is vaunted is nothing. But the conclusion, which is, perhaps, already anticipated by the reader's mind, and which leaves us incapacitated for comment, is this—we shudder while we record it—that after the exhaustive abstraction is carried to infinity in search of God, we arrive at nothing. God himself is nothing!" (*Princeton Essays*).

These systems of philosophy in Germany, "that nation of thinkers and critics," have, each in its turn, influenced the science of Biblical philology; and whether it be the moralism of Kant, or the idealism of Fichte, or the deeper transcendentalism of Hegel, it makes Scripture speak its own dogmas, and consecrates the apostles the coryphæi of its system. When Strauss wrote his *Leben Jesu*, Germany was thrilled by the publication—all classes of her divines and philosophers, historians and scholars. When, as in this work of Strauss, all historical reality is denied to the gospels, and they are declared to be composed, not of facts, but ideas, and are affirmed to describe, not a personal God or a historical Christ, but a cluster of notions intensely prevalent in Judæa; and when it is argued that the names and events occurring in the evangelical narrations are but symbols of inward emotions, and the blasphemies of pantheism are reasoned for from the union of deity and humanity in Jesus, as shadowing forth the identity of the forms vulgarly named Creator and creature, it is easily seen that the author uses the philosophy of Hegel as the great organ of perverting and desecrating the records of the evangelists, especially of polluting the finer and more experimental portions of the work of the beloved disciple. Weisse, the producer of a similar mixture of boldness and impiety, declares it impossible for any one to understand his theology unless he have mastered his philosophy. No one can comprehend the systems of Daub, Schwartz, or Schleiermacher till he has mastered the philosophy which Schelling propounded in his early and adventurous youth. "A

life beyond the grave," says Strauss, "is the last foe which speculative criticism has to encounter, and, if it can, to extirpate." So, to find a place for such theories, this author commenced a series of wild and unjustifiable attacks on the gospels—finding discrepancies where there are none, creating exaggerations where the narrative is easy and simple, denying the possibility of miracles, and involving the whole narrative in confusion and mystery, in order to destroy its historical character, and render its interpretation possible only on the supposition of its being a useless and disconnected mythology. Whatever sophistry and perverted logic could supply, whatever perplexity a shrewd and malicious criticism could suggest, whatever reasoning a clever and fascinating philosophy could produce, were used to create and garnish the new hypothesis. The whole system is a sad memorial of the proud and unhallowed wisdom of this world, impugning the revelation already given, delighting in every high thing that exalts itself against the knowledge of God, and exulting in withdrawing every thought from the obedience of Christ. Well might Eschenmayer speak of the "Ischariotism" of Hegelianism. While it kissed, it betrayed, and at length proceeded to the trial and condemnation of its victim (*Old and New*, Aug. 1870, p. 186).—Eadie, *Eccles. Cyclop.* s. v. See DEISM; PANTHEISM, RATIONALISM.

Transelementation (*trans* and *elementum*), a term used to signify the change of the elements in one body into those of another.

Transfiguration. The Greek word *μετεμορφώσθη*, well rendered "was transfigured," signifies a *change of form or appearance* (Matt. xvii, 2; Mark ix, 2), and is so explained in Luke ix, 29, "the fashion of his countenance was altered." This is one of the most wonderful incidents in the life of our Saviour upon earth, and one so instructive that we can never exhaust its lessons. The apostle Peter, towards the close of his life, in running his mind over the proofs of Christ's majesty, found none so conclusive and irrefragable as the scenes when he and others were with his Master in the holy mount (2 Pet. i, 18) as eye-witnesses that he received from God the Father honor and glory, when there came such a voice to him from the excellent glory, "This is my beloved Son, in whom I am well pleased." The apostle John likewise refers to the convincing power of the "glory" exhibited on that occasion (John i, 14). If we divide Christ's public life into three periods—the first of miracles, to prove his divine mission; the second of parables, to inculcate virtue; and the third of suffering, first clearly revealed and then endured, to atone for sin—the transfiguration may be viewed as his baptism or initiation into the third and last. He went up the Mount of Transfiguration on the eighth day after he had bidden every one who would come after him take up his cross, declaring that his kingdom was not of this world, that he must suffer many things, and be killed, etc.

The Mount of Transfiguration is traditionally thought to have been Mount Tabor; but as this height is fifty miles from Casarea Philippi, where Jesus last taught, it has of late been supposed to have been a mountain much less distant, namely, Mount Hermon. As there was an interval, however, of a week between this and the preceding occurrence, we may naturally conclude that a part of this time was occupied in the journey. See TABOR. The only persons thought worthy to ascend this mount of vision were Peter, James, and John, three being a competent number of witnesses, or they being more faithful and beloved than any others. Whatever the reason was, these three disciples appear on more than one other occasion as an elect triumvirate—as at the raising of Jairus's daughter, and during our Lord's agony in the garden. The disciples, in all probability, ascended the mountain anticipating nothing more than that Jesus, as at other times (Luke vi, 12), would continue all night in prayer to God. When the curtains of night closed around them, they were so worn

out by their labors as to sink down in sleep, till startled from their slumbers by the glory of the Lord shining round about them; for, as Jesus prayed, the fashion of his countenance was altered, "and his face did shine as the sun, and his raiment was white as the light. And behold there talked with him two men, which were Moses and Elias, who appeared in glory, and spake of his decease, which he should accomplish at Jerusalem." Peter's words, "Master, it is good for us to be here," are a natural expression of rapture; and his proposal to build three tabernacles indicated his desire both to keep his Lord from going down to Jerusalem to die there, and to prolong the blessedness of beholding with open face the glory of God. Such is at least a plausible interpretation of his language, while "he wist not what to say." It is worthy of remark that Peter had no thought of tents for himself and his companions, his only desire being that the beatific vision might endure forever. While he yet spake, behold, a bright cloud overshadowed them—not a black cloud such as that which rested on Mount Sinai, but a cloud glistening as the Shechinah when the glory of the Lord filled the tabernacle, or as the cloud that filled the house of the Lord when the priests were come out of the holy place. "And behold a voice out of the cloud"—that is, out of the long-established symbol of Jehovah's presence—"which said, This is my beloved son, in whom I am well pleased: hear ye him. And when the disciples heard it, they fell on their face, and were sore afraid"—like Daniel and all others who have felt themselves entranced by revelations of God. "And Jesus came and touched them, and said, Arise, and be not afraid!"—showing such gentleness as proved him to be fitly named the Lamb of God. How long the glorification of our Saviour continued it were vain to inquire; but it appears from the narrative of Luke that he did not lead down his disciples till the day following that on which they had ascended the height. As they descended, he bade his disciples keep what they had seen a secret till after his resurrection, doubtless because the whole vision, to those who had not seen it, would have been a rock of offence, appearing as an idle tale. He also opened their eyes to see that Elias whom they looked for in the future was to be sought in the past, even in John the Baptist, who was clothed with his spirit and power.

The final causes of the transfiguration, although in part wrapped up in mystery, appear to be in part plain. Among its intended lessons may be the following: First, to teach that, in spite of the calumnies which the Pharisees had heaped on Jesus, the old and new dispensations are in harmony with each other. To this end the author and the restorer of the old dispensation talk with the founder of the new, as if his scheme, even the most repulsive feature of it, was contemplated by theirs, as the reality of which they had promulgated only types and shadows. Secondly, to teach that the new dispensation was superior to the old. Moses and Elias appear as inferior to Jesus, not merely since their faces did not, so far as we know, shine like the sun, but chiefly because the voice from the excellent glory commanded to hear *him* in preference to them. Thirdly, to gird up the energies of Jesus for the great agony which was so soon to excruciate him; as in Gethsemane itself an angel appeared unto him strengthening him; as the Holy Ghost descended upon him in the likeness of a dove before his temptation in the wilderness; and as, when the devil left him, angels came and ministered unto him. Fourthly, to comfort the hearts of the disciples, who, being destined to see their Master, whom they had left all to follow, nailed to a cross, to be themselves persecuted, and to suffer the want of all things, were in danger of despair. But, by being eye-witnesses of his majesty, they became convinced that his humiliation, even though he descended into the place of the dead, was voluntary and could not continue long. Gazing at the glorified body of their Master, they beheld not only a proof, but an express and lively image, of his resur-

rection, ascension, and exaltation above the heavens. As in a prophetic vision, they beheld him seated upon clouds, and seen by every eye as the Judge of the quick and the dead, or enthroned in heaven amid the host of his redeemed. Henceforth they ceased not questioning one another what the rising from the dead should mean. Fifthly, to teach that virtue will not allow supine contemplation, but demands the exercise and exertion of our several powers. To some this lesson may seem a refinement, but it is ingeniously deduced by Schleiermacher from the fact that, while Peter yet spake in his ecstasy, the vision in which he longed to wear out his life vanished away: as if the aim were to teach us that when we have ascended the mount of vision on the cherub-wings of contemplation, even if we burn to dwell there in a perpetual sweetness, yet we must shun all monastic seclusion that we may mingle among men and do them good; even as the great Exemplar would not let his chosen repose in rapturous musings, and had scarcely come down from the mountain of his glory before he recommenced his works of usefulness.

The transfiguration is so fine a subject for the painter that we are not surprised to learn that it employed Raphael's best hours, and that his portraiture of it is confessedly the highest of all efforts of pictorial genius. The original work, still unfaded, though more than three centuries have passed over it, hangs in the Vatican. A copy of it in mosaic on a colossal scale, and which might pass with most men for the original, fills the head of the left aisle in St. Peter's at Rome. The design is as simple as the artless narrative of the evangelists. In the centre, and in raiment white as the light, is he, the fashion of whose countenance was altered. On either hand, and floating on the air, appear in glory Moses and Elias. Beneath, the disciples, overshadowed by a bright cloud, their hands shielding their dazzled eyes, are fallen on their faces, sore afraid of the voice proceeding out of the cloud, but catching glimpses of Jesus transfigured before them.—Kitto.

For monographs on the transfiguration, see Volbeding, *Index Programmaticum*, p. 47; Hase, *Leben Jesu*, p. 161; Bagot, *On the Transfiguration* (Lond. 1840); Anon., *Tabor's Teachings* (ibid. 1867, 1868); also the (Am.) *Free-will Baptist Quarterly*, Jan. 1858. See *JESUS CHRIST*.

Transfiguration- (or **Jesus-**) **day** was kept in the Western Church in the time of St. Leo, and in the Greek Church about A.D. 700. By a bull of Calixtus III. 1456 (or 1457), it was ordered to be generally observed, in memory of the victory of Hunniades and the Hungarian army over Mohammed and the Turks. In the English calendar it stands on Aug. 6. In France, after consecration, the chalice was filled with new wine, or, as at Tours, received some of the juice of the ripe grapes; and the clusters are blessed in Germany and the East on this day.—Blunt, *Dict. of Theol. s. v.*; Walcott, *Sac. Archeol. s. v.*

Transitorium, a term for a short anthem, or respond, in the rite of Milan, chanted after the communion of the priest.—Lee, *Gloss. of Liturg. Terms*, s. v.

Translation, BIBLICAL. See VERSIONS.

TRANSLATION, in *ecclesiastical usage*, is the removal of a bishop from the charge of one diocese to that of another. After such removal, the bishop, in all his attestations, dates from the year of his translation (*anno translationis nostræ*), not from that of his consecration (*anno consecrationis nostræ*). In the early Church a bishop could not translate himself to another see without the consent and approbation of a provincial council. Some, indeed, thought it absolutely unlawful for a bishop to forsake his first see and betake himself to any other, because they looked upon his consecration to be a sort of marriage to his church, and therefore looked upon his removal to another see as spiritual adultery.

Transmigration (a *passing over*), in the theological acceptance of the term, means the supposed translation of the soul after death into another substance or body than that which it occupied before. The basis of this belief being the assumption that the human soul does not perish together with the body, it can belong only to those nations which believe in the immortality of the soul. But in proportion as such an idea is crude or developed, as it is founded merely on a vague fear of death, and a craving for material life, or on ethical grounds, and a supposed causal connection between this and a future life, the belief in transmigration assumes various forms. The notion, dating back to a remote antiquity, and being spread all over the world, seems to be anthropologically innate, and to be the first form in which the idea of immortality occurred to man.

1. *India*.—It was in India, where the problems of metaphysics and ethics as connected with ontology and the destiny of the soul were elaborated to the last degree on a theistic basis, that metempsychosis was most ingeniously and extensively developed. The Hindûs believed that human souls emanated from the Supreme Being, which, as it were, in a state of bewilderment or forgetfulness allowed them to become separate existences and to be born on earth. The soul thus severed from the real source of its life is bound to return to it, or to become merged again into that divine substance with which it was originally one. But having become contaminated with

Raphael's Representation of the Transfiguration.

sin, it must strive to free itself from guilt and become fit for its heavenly career. Religion teaches that this is done by the observance of religious rites and a life in conformity with the precepts of the sacred books; philosophy, that the soul will be reunited with Brahman, if it understands the true nature of the divine essence whence it comes. So long, therefore, as the soul has not attained this condition of purity, it must be born again after the dissolution of the body to which it was allied; and the degree of its impurity at one of these various deaths determines the existence which it will assume in a subsequent life. So closely was the account of a soul's misdeeds kept that it might pass thousands of years, or *kulpas* (æons), in one or other of the heavens, as a reward for good deeds or self-inflicted suffering, and yet be obliged to return to earth or hell to expiate as an animal, man, or demon certain sins. To us the details of the soul's migration, as described in the religious works of the Hindûs, are only interesting as they afford a kind of standard by which the moral merit or demerit of human actions was measured in India (see *Manu, Code of Laws*, bk. xii.). A more general doctrine of the transmigration of souls is based by Hindû philosophers on the assumption of the three cosmic qualities of *sattwa*, i. e. purity or goodness; *rajas*, i. e. troubledness or passion; and *tamas*, i. e. darkness or sin, with which the human soul may become endued. On this basis Manu and other writers built an elaborate theory of the various births to which the soul may be subject. Manu teaches that "souls endued with the quality of *sattwa* attain the condition of deities; those having the quality of *rajas*, the condition of men; and those having the quality of *tamas*, the condition of beasts." The Buddhist belief in transmigration is derived from that of the Brahmanic Hindûs, and agrees with it in principle, though it differs from it in the imaginary detail in which it was worked out. To enlarge here on this difference is not necessary, and yet it will not be superfluous to point out one great difference which separates the notions of one class of Buddhists from those of the rest, as well as from those of the Brahmanic Hindûs. While other Hindûs believe that the same soul appears at the several births, the Southern Buddhists teach that the succession of existences is a succession of souls; that when the body dies the soul is "extinguished," and nothing remains but the good and bad acts performed in life; the result of these acts becomes the seed of a new life, which soul is the necessary product of the soul of the former life. This dogma is illustrated by various similes, e. g. "One lamp is kindled at another; the light of the former is not identical with that of the latter, but, nevertheless, without this the other light could not have originated."

2. *Egypt*.—According to the doctrine of the old Egyptians, the human race originated after the pure gods and spirits had left the earth; and this they did because the demons, who inhabited the earth, had revolted against them, and tainted it with guilt. In order that the demons might purify themselves, the gods created human bodies, so that in them they might expiate their guilt. These earthly bodies, united to the demons, are the human race, and human life is merely intended as a means of purifying the soul. All the precepts regulating the course of life are laid down by the Egyptians for this end, and the judgment after death in the palace of Osiris decides whether it has been attained or not. If it has not, then the soul must return to the earth, to renew its expiations, either in a human body, in the body of an animal, or in a plant. Matter was believed to be a substantial reality; and the material form that was once united with spirit in the one being of man was believed to maintain that connection so long as the material form remained. Hence the Egyptian practice of embalming the dead, to arrest the passage of the soul into other forms.

3. *Persia*.—The transmigration of souls was also a

tenet of the Persian religion before the time of Zoroaster, and was derived, with the language of Avesta, from Indian sources. Pherecydes of Syros, who lived before the age of Zoroaster, taught the doctrine, and Pythagoras received it in Babylon from the Magi (q. v.).

4. *In Greece*, the doctrine of transmigration did not become the belief of the people, but was confined to the mysteries and tenets of philosophers, who probably received it from Egypt or India. According to some, Thales was the first Greek philosopher who propounded it; according to others, Pherecydes, the teacher of Pythagoras. It was subsequently greatly developed by Pythagoras and Plato. The Greek mysteries were, in fact, not only a school in which metempsychosis was taught, but an indispensable grade or lodge through which all of the aspirants must pass before they could be purified and go on to higher stages of existence. In the system of Plato transmigration had a remedial function, and the soul could attain to divinity only by a varied probation of ten thousand years. The Epicureans denied it, but it appears to have been generally inculcated as one of the deepest doctrines of the mysteries. The Neo-Platonists, who believed in magic, assumed the doctrine of metempsychosis as a natural inheritance.

5. *Among the Jews* the doctrine of transmigration—the *Gilgul Neshamoth*—was taught in the mystical system of the Cabala (q. v.). "All the souls," says the *Zohar*, or Book of Light, "are subject to the trials of transmigration; and men do not know which are the ways of the Most High in their regard. They do not know how many transformations and mysterious trials they must undergo; how many souls and spirits come to this world without returning to the palace of the divine king. . . . The souls must re-enter the absolute substance whence they have emerged. But to accomplish this end they must develop all the perfections, the germ of which is planted in them; and if they have not fulfilled this condition during one life, they must commence another, a third, and so forth, until they have acquired the condition which fits them for reunion with God. On the ground of this doctrine it was held, for instance, that the soul of Adam migrated to David, and will come into the Messiah; that the soul of Japheth is the same as that of Simeon, and the soul of Terah migrated into Job. Modern Cabalists—for instance, Isaac Loria—have imagined that divine grace sometimes assists a soul in its career of expiation by allowing it to occupy the same body together with another soul, when both are to supplement each other, like the blind and the lame. Sometimes only one of these souls requires the supplement of virtue, which it obtains from the other soul, better provided than its partner. The latter soul then becomes, as it were, the mother of the other soul, and bears it under her heart as a pregnant woman. Hence the name of gestation or impregnation is given to this strange association of two souls.

6. *Of the Druids*, it is told by classical writers that they believed in the immortality of the soul, and in its migration after a certain period subsequent to death. Little is known of the manner in which they imagined such migrations to take place; but, to judge from their religious system, there can be no doubt that they looked upon transmigration as a means of purifying the soul and preparing it for eternal life.

7. *Norse*.—A very poetical form of belief in transmigration is found in Germanic mythology, according to which the soul, before entering its divine abode, assumes certain forms or animates certain objects, in which it lives for a short period—as a tree, a rose, a vine, a butterfly, a pigeon, etc.

8. *Among the early Christians*, Jerome relates, the doctrine of transmigration was taught as a traditional and esoteric one, which was only communicated to a select few. Gnostics and Manichæans welcomed it, and the more speculative or mystical of the Church fathers found in it a ready explanation of the fall of man and

the doctrine of evil spirits. This considerable step towards reconciling the existence of suffering with that of a merciful God was distinctly set forth by Porphyry and Origen, and passed, in all probability, with all the strange heresies of "Illumination," through such institutions as the Cairene House of Sight and the Knights Templars, into the wild doctrines of the obscure sects of the Middle Ages in Europe. The Taborites, an extreme branch of the Hussites, are said to have accepted the doctrine.

One great philosopher, at least, of modern times, G. E. Lessing, accounted for human progress by a species of transmigration. He argues that the soul is a simple being capable of infinite conceptions, which are obtained in an infinite succession of time. The order and measure of the acquisition of these conceptions are the senses. These, at present, are five; but there is no evidence that they have always been the same. Nature, never taking a leap, must have gone through all the lower stages before it arrived at that which it occupies now. . . . And since nature contains many substances and powers which are not accessible to those senses with which it is now endowed, it must be assumed that there will be future stages at which the soul will have as many senses as correspond with the powers of nature.

9. *Modern Savages*.—Probably the lowest forms of this belief are those found among some of the tribes of Africa and America, which hold that the soul, immediately after death, must look out for a new owner, entering, if need be, even the body of an animal. Some of the Africans assume that the soul will choose with predilection the body of a person of similar rank to that of its former owner, or a near relation of his. They therefore frequently bury their dead near the houses of their relatives in order to enable the souls of the former to occupy the newly-born children of the latter, and the princely souls to re-enter the princely family; and sometimes holes are dug in the grave to facilitate the soul's egress from it.

In North America some tribes slaughter their captives to feed with their blood such souls in suspense. The negro widows of Matamba are especially afraid of the souls of their husbands; for at the death of these they immediately throw themselves into the water to drown their husbands' souls, which otherwise, they imagine, would cling to them. The natives of Madagascar seem to have invented a kind of artificial transmigration; for in the hut where a man is about to die they make a hole in the roof in order to catch the outgoing soul and to breathe it into the body of another man at the point of death.

"Metempsychosis;" Ueberweg, *History of Philosophy* (see Index).

Transportation is a term used in Scotland for the removing or translation of a minister from one parish or congregation to another.

Transubstantiation (*change of substance*), a word applied to the alleged conversion or change of the substance of the bread and wine in the eucharist into the body and blood of Jesus Christ at the time the officiating priest utters the words of consecration.

1. *The Term*.—Probably the first to make use of the word *transubstantiatio* was Peter Damin (*Expositio Can. Miss.* cap. vii; *Mai, Script. Vet. Nor. Coll.* VI, ii, 215), A.D. 988-1072; though similar expressions, such as *transitio*, had previously been employed. Its use was, however, limited, and in the 12th century was becoming very rare. Its first appearance as a term accepted and recognised by the Church is in the first of the *Seventy Constitutions* presented to the fourth Council of Lateran

(1215) by Innocent III, and tacitly adopted by that council. The term thus adopted by the Western Church has its counterpart in the Eastern Church in the term *Metousiosis* (*Μετουσίωσις*), which was formally adopted, in the "Orthodox Confession of Faith of the Catholic and Apostolic Church of the East," in 1643; and in Art. xvii of the Council of Bethlehem, or of Jerusalem, in 1672.

The Church of England never adopted the word "transubstantiation" in any formal document; and at the same time that the Council of Trent was fixing it upon the Latin Church, the sacred synod of the English Church was declaring, in the 28th art. of Religion, "Panis et vini Transubstantiatio in Eucharistia ex sacris literis probari non potest, sed apertis Scripture verbis adversatur et multarum superstitionum dedit occasionem" (A.D. 1552). This part of Art. xxviii now stands in English in the following form: "Transubstantiation (or the change of the substance of bread and wine) in the supper of the Lord cannot be proved by Holy Writ, but is repugnant to the plain words of Scripture, overthroweth the nature of a sacrament, and hath given occasion to many superstitions" (A.D. 1571).

II. *The Doctrine*.—In the Confession of the Synod of the fourth Lateran Council, transubstantiation is thus defined: "There is only one universal Church, beyond which no man can in any way be saved. In which Jesus Christ is himself the priest and sacrifice, whose body and blood are really contained in the sacrament of the altar, under the form of bread and wine, being *transubstantiated*, the bread into the body and the wine into the blood, by divine power." By the institution of Corpus Christi Day by pope Urban IV in 1264 and pope Clement V in 1311 at the Synod of Vienne, the doctrine in question was expressed in a liturgical form and its popularity secured. Henceforth the sacrifice of the mass formed more than ever the centre of the Catholic ritual, and reflected new glory upon the priesthood.

The change effected by transubstantiation is declared to be so perfect and complete that, by connection and concomitance, the soul and divinity of Christ coexist with his flesh and blood under the species of bread and wine; and thus the elements, and every particle thereof, contain Christ whole and entire—divinity, humanity, soul, body, and blood, with all their component parts. Nothing remains of the bread and wine except the accidents. The whole God and man Christ Jesus is contained in the bread and wine, and in every particle of the bread, and every drop of the wine. The natural result of such a doctrine is the elevation of the Host for adoration, a practice unknown till the rise of transubstantiation.

It is claimed by the advocates of transubstantiation that it had the belief and approval of the early fathers of the Church. Bingham (*Christ. Antiq.* bk. xv, ch. v, § 4) asserts that "the ancient fathers have declared as plainly as words can make it that the change made in the elements of bread and wine by consecration is not such a change as destroys their nature and substance, but only alters their qualities, and elevates them to a spiritual use, as is done in many other consecrations, where the qualities of things are much altered without any real change of substance." We give some extracts from the authorities quoted by Bingham. Thus Gregory of Nyssa (*De Bapt. Christi.* iii, 369), "This altar before which we stand is but common stone in its nature . . . but after it is consecrated to the service of God, and has received a benediction, it is a holy table, an immaculate altar, not to be touched by any but the priests, and that with the greatest reverence. The bread also at first is but common bread, but when once it is sanctified by the holy mystery, it is made and called the body of Christ." Cyril of Jerusalem (*Catech. Myst.* iii, note 3), "Beware that you take not this ointment to be bare ointment; for as the bread in the eucharist, after the invocation of the Holy Spirit, is not mere bread, but the body of Christ, so this holy ointment, after invocation,

is not bare or common ointment, but it is the gift or grace of Christ and the Holy Spirit, who by his presence and divine nature makes it efficacious." Chrysostom, in his famous *Epistle to Cæsarius*, explaining the two natures of Christ—that he had both a human and a divine substance in reality—says, "As the bread, before it is sanctified, is called bread, but after the divine grace has sanctified it by the mediation of the priest it is no longer called bread, but dignified with the name of the body of the Lord, though the nature of bread remain in it, and they are not said to be two, but one body of the Son; so here, the divine nature residing or dwelling in the human body, they both together make one Son and one Person." When this passage was first produced by Peter Martyr, it was looked upon as so unanswerable that the Romish Church declared it to be a forgery, and it was stolen from the Lambeth Library during the reign of queen Mary. Theodoret plainly says that the bread and wine remain still in their own nature after consecration. Augustine, instructing the newly baptized respecting the sacrament, tells them that what they saw upon the altar was bread and the cup, as their own eyes could testify to them; but what their faith required to be instructed about was that the bread is the body of Christ, etc. Answering an objection, supposed to be urged, that Christ had taken his body to heaven, Augustine replies, "These things, my brethren, are therefore called sacraments, because in them one thing is seen and another is understood. That which is seen has a bodily appearance; that which is understood has a spiritual fruit." He also says that "this very bread and wine are the body and blood of Christ; consequently it could not be his natural body in the substance, but only sacramentally. The natural body of Christ is only in heaven, but the sacrament has the name of his body, because, though in outward, visible, and corporeal appearance it is only bread, yet it is attended with a spiritual fruit." Isidore, bishop of Seville (A.D. 630), speaking of the rites of the Church, says, "The bread, because it nourishes and strengthens our bodies, is therefore called the body of Christ; and the wine, because it creates blood in our flesh, is called the blood of Christ. Now, these two things are visible, but, being sanctified by the Holy Ghost, they become the sacrament of the Lord's body" (*De Eccles. Offic.* i, 18). From the time of Paschasius this doctrine had been the subject of angry contention, and one of its bitterest opponents was the able scholastic writer Duns Scotus, whose opinions were maintained in the 11th century by Berengarius and his numerous followers.

III. *Arguments.*—The doctrine of transubstantiation is defended by a literal interpretation of the words spoken by our Lord at the last supper, "This is my body," "This is my blood." From these words it is argued that there is the real bodily presence of Christ's body, which is accounted for by the miracle of a change of substance of the bread and wine. In answer, it is urged,

1. The accounts which the Romanists give of this supposed miracle are at variance with their own statement of it. In such a case, for instance, as that of the miracle of Moses' rod, every one would say "the rod was changed into a serpent" (all the attributes of this last being present), not *vice versa*; so that by Romanists' own account it is Christ's body and blood that are changed into bread and wine.

Wherever a miracle was wrought in the Old or New Test., as in the instance above alluded to, or in the turning of the water into wine at Cana, such change was obvious to the senses: the appeal, in fact, for the reality of the miracle is to the senses; while, therefore, we might admit that if a Romish priest were to assert that he had converted our Saviour's body into bread and wine, he was safe as far as the senses go, we should hold, *per contra*, that if he professed to have turned bread and wine into the body and blood of Christ, that body and blood ought to be clear to the senses. We had

bread and wine *before* the consecration; we have, as to *sense*, bread and wine *after*. In the whole history of miracles, nothing of this sort has ever been known; nor can we, under such circumstances, admit that the alleged change has taken place. Suppose Aaron's rod to have remained still with all the attributes of a rod, could Pharaoh and his court believe it to be now a serpent?

2. The late origin of the doctrine of transubstantiation has been alleged as one reason for its rejection, and it is certainly a point worthy of considerable notice. If, however, it had been as early as the superstitious veneration for relics and images, it would have been but an ancient error.

3. It must be evident to every one who is not blinded by ignorance and prejudice that our Lord's words, "This is my body," are more figurative expressions; and that they were no more likely to be designed to be received literally than the declarations made by our Lord that he was a "vine," a "lamb," a "door," a "way," a "light."

4. Besides, such a transubstantiation is so opposite to the testimony of our senses as completely to undermine the whole proof of all the miracles by which God has confirmed revelation. According to such a transubstantiation, the same body is alive and dead at once, and may be in a million of different places whole and entire at the same instant of time; accidents remain without a substance, and substance without accidents; and a part of Christ's body is equal to the whole. It is also contrary to the end of the sacrament, which is to represent and commemorate Christ, not to believe that he is corporeally present (1 Cor. ix, 24, 25).

5. The practical evil of this and of consubstantiation (q. v.) is that it leads to the paying divine adoration to a bit of bread, and the still more noxious superstition of thinking that Christ's body can be received and act like a medicine on one who is "not considering the Lord's body," as, e. g., an infant, or a man in a state of insensibility.

Trap (מִקְשָׁה, *mokesh*, Josh. xxiii, 13, a snare, as elsewhere rendered; מַלְקָדֶת, *malqadeth*, Job xlviii, 10, a noose; מַשְׁחֶלֶת, *masheleth*, Jer. v, 26, a destroyer, as elsewhere; and so *Siqa*, Rom. xi, 9, lit. the chase). See HUNTING.

Trapp, John, a Puritan divine, was born in 1601, and educated at Christ Church, Oxford. He was schoolmaster at Stratford-on-Avon and vicar of Weston-on-Avon from 1624 until his death, in 1669. He wrote, *God's Love-Tokens* (Lond. 1637, 4to);—*Theologia Theologiae* (1641, 8vo);—*Commentaries on the Scriptures*, viz.: *St. John the Evangelist* (1646, 4to); *All the Epistles and the Revelation of St. John* (1647, 4to; 2d ed. 1649, 4to); *All the New Testament* (1647, 2 vols. 4to; new ed. 1663, imp. 8vo); *Pentateuch* (1650, 4to; 2d ed. 1654, 4to); *Joshua to 2d Chronicles*; *Proverbs, Ecclesiastes, and Songs of Solomon* (1650, 4to); *The Twelve Minor Prophets* (1654, fol.); *Ezra, Nehemiah, Esther, Job, and the Psalms* (1656, fol.; 2d ed. 1657, fol.); *Proverbs to Daniel* (1656, fol.)—all published together in 1662 (5 vols. fol.). See Allibone, *Dict. of Brit. and Amer. Authors*, s. v.

Trapp, Joseph, D.D., an English divine, was born at Cherrington, Gloucestershire, in November, 1679. Educated at first by his father, he was afterwards placed under the care of the master of New College, Oxford,

and in 1695 entered Wadham College in the same city. He was chosen a fellow of his college in 1704, and first professor of poetry in 1708. In 1709-10 he acted as manager for Dr. Sacheverell on his memorable trial, and in 1711 was appointed chaplain to Sir Constantine Phipps, lord chancellor of Ireland. In 1720 he was presented to the rectory of Dauntzey, Wiltshire, which he resigned in 1721 for the vicarage of the united parishes of Christ Church, Newgate Street, and St. Leonard's, Foster Lane, London. He received his degree of D.D. from Oxford in February, 1727. He was, in 1733, preferred to the rectory of Harlington, Middlesex, by lord Bolingbroke, whose chaplain he had previously been. In 1734 he was elected one of the joint lecturers of St. Martin's-in-the-Fields. He died at Harlington, Nov. 22, 1747. Mr. Trapp was a hard student, and published numerous works, viz., *Prolectiones Poeticæ*, etc. (Oxon. 1711-19, 3 vols. 8vo), being his Latin lectures as professor of poetry:—*A Preservative*, etc., in several discourses (collected in 1722, 2 vols. sm. 8vo):—*The Æneid of Virgil Translated into Blank Verse* (1718, 2 vols. 4to):—*Explanatory Notes on the Four Gospels*, etc. (1747-48, 2 vols. 8vo; Oxford, 1775, 8vo; 1805, 8vo):—besides poems, sermons, theological tracts, etc. See Chalmers, *Biog. Dict.* s. v.; Allibone, *Dict. of Brit. and Amer. Authors*, s. v.

Trappists, the members of a monastic order in the Church of Rome which is characterized by the extreme austerity of its rule. It had its origin in the Cistercian abbey of La Trappe in Normandy during the abbacy of Rancé (q. v.). This prelate had been grossly addicted to sensual pleasures, and had also evinced considerable fondness for scholarly pursuits; but his conscience became awakened, and he was transformed into an intense ascetic. He renounced all the benefices he possessed except that of La Trappe; and when he had repaired the buildings of that abbey, he undertook the restoration of its ancient discipline. He introduced a number of strict Benedictines, and became a monk himself and regular abbot. In 1675 he caused the members of the order to renew their vows, and imposed on them the additional obligation to preserve unchanged all his arrangements and rules.

This immutable rule obliges the Trappists to sleep on a bed of straw, with pillow also of straw, placed on a board and covered with a blanket. They must rise at two o'clock in the morning. Eleven hours of their day are devoted to prayers and masses, the remaining hours to hard labor performed in strict silence. Scientific pursuits are forbidden. The Trappist's thoughts are to be directed only to repentance and death. His only speech, apart from hymns and prayers, is the responsive greeting "Memento mori." He maintains a constant fast in the plainness and frugality of his food, which is served upon a bare table. After supper and subsequent religious meditations and exercises, he labors for a time upon the grave he is to occupy after death, and then retires to rest—at eight o'clock in summer and at seven in winter. The order contains lay-brothers, professors, and *frères donnés*, i. e. temporary associates. Its garb consists of a long robe with wide sleeves of coarse grayish-white wool; a black woollen cowl with two strips a foot wide which reach down to the knee; a broad girdle of black leather, from which are suspended a rosary and a knife, symbols of devotion and toil; and wooden shoes. In the choir a dark-brown mantle with sleeves and a cowl of like color, are worn. The lay-brothers wear gray habits.

Rancé's immoderate austerity occasioned the death of a number of monks, and brought upon him the censure of many critics. His aversion to literary employ-

Trappist Monk and Nun.

ments was also condemned, among others by Mabillon in the *Traité des Études Monastiques* (1691). The order did not spread beyond its original limits until after the founder's death (Oct. 12, 1700), and has never become very strong in its numbers. A female branch was instituted at Cloet, France, in 1705, by princess Louise de Condé. The revolution expelled the Trappists from France, but they established themselves in Valsainte, Freiburg, Switzerland, where a monastery founded by Augustine l'Estrange (1791) was made an abbey by Pius VI, and Augustine placed at its head. Again assailed by the French and compelled to flee, the Trappists found a temporary home in Poland. They were everywhere disliked, however, and found no settled home until after the restoration of the Bourbons in 1817, when they recovered their original abbey of La Trappe. Other stations were established, among them a female convent near London. In 1834 a papal decretal consolidated the Trappists into a *Congrégation des Religieux Cisterciens de N. D. de la Trappe*. They possess settlements in Algiers and North America, but are chiefly found in France. See the *Allgem. Darmst. Kirchenzeitung*, 1831, p. 1424; 1832, p. 90, 119; 1833, p. 1464; 1835, p. 1087; Châteaubriand, *Vie de Rancé* (Par. 1844); Ritsert, *Orden d. Trappisten* (Darmst. 1833).

In 1851 Muard founded an order of Trappist preachers in the bishopric of Sens, who established themselves in a convent near Avallon. They observe the Trappist rule and wear the habit of the order, but by dispensation are allowed to break the vow of silence and serve the Church by preaching. See *Der Katholik*, Sept. 1851, p. 239 sq.; Herzog, *Real-Encyklop.* s. v.; Hélyot, *Ordres Religieux*, s. v.

Trask, JOHN, a Sabbatarian Puritan, was a native of Somersetshire, and, after being a schoolmaster until he was thirty-four years of age, became a preacher in London about 1617. He was at first refused ordination by the bishop of Bath and Wells, but "afterwards got orders and began to vent his opinions." He enjoined severe asceticism upon his followers, inducing them to fast three days at a time, alleging that the third day's fast would bring them to the condition of justified saints, according to the promise "after two days he will revive us; in the third day he will raise us up, and we shall live in his sight" (Hos. vi, 1). Among other precepts

strictly enforced by Trask was that of doing everything by the law of Scripture, having been converted to this view by the arguments of Hamlet Jackson. Trask prescribed to his followers ceremonial customs respecting dress and domestic life; required Jewish strictness in the observance of Sunday; and eventually adopted Saturday as the Sabbath. On April 1, 1634, the commissioners for ecclesiastical causes ordered the prosecution of all separatists, novelists, and sectaries, among whom the Traskists were named. Trask was brought before the Star-chamber, where his Judaizing opinions and practices were refuted by bishop Andrewes, and he was put in the pillory. He is said to have afterwards repented his errors, but became an Antinomian before his death, the date of which is not given. His followers began to be called Seventh-day men about the year 1700. The published works of Trask are, *Sermon on Mark xvi*, 16 (Lond. 1615, 8vo);—*Treatise of Liberty from Judaism* (1620, 4to);—*Power of Preaching* (1623, 8vo);—*The True Gospel, etc., from the Reproach of a New Gospel* (1636, sm. 12mo). See Paget, *Heresiography* (1662, p. 161, 184); Baker, *Chronicle*; Fuller, *Church History of Great Britain*; Brook, *Puritans*; Chamberlain, *Present State of England for 1702*, p. 258.—Blunt, *Dict. of Sects*, s. v.; Allibone, *Dict. of Brit. and Amer. Authors*, s. v.

Traskites. See TRASK, JOHN.

Trauthson, the name of an ancient Tyrolese family which furnished two representatives to the episcopal office in the Church of Rome. The former of these was twenty-first bishop of Vienna, and died in 1702. The latter, JOHANN JOSEPH, Count Trauthson and Falkenstein, was born in 1704 at Vienna, in which city he studied (and possibly at Rome and Sienna), became canon and provost, and in 1751 was made prince-archbishop of Vienna. He issued a pastoral letter in which he urged his clergy to prefer the presentation of necessary truths to that of merely useful truths in their sermons, and remonstrated against the excessive zeal expended in the preaching of the merits of saints, while but little attention was given to the preaching of the merits of Christ. He also condemned the introduction of odd or laughable elements into the preaching. This circular occasioned great excitement, and called forth a number of apologetical and polemical tracts, which are enumerated in *Acta Hist. Eccl.* xviii, 1008 sq.; Heinsius, *Kirchenhist.* iv, 329 sq.; and Henke, *Kirchengesch.* v, 292 sq. Many Protestants suspected that the archbishop had understated the tenets of his Church in order to win over uninformed Protestants, and many Romanists charged him with having begun the betrayal of the Church. Both, however, were mistaken. Trauthson was influenced by the "enlightenment" of his time, but was none the less a zealous supporter of the Church of Rome. His letter was, however, productive of no special results. Maria Theresa appointed him chief director of studies in the University of Vienna and director of the Theresianum, and pope Benedict XIV made him cardinal in 1756. He persuaded the curia to reduce the number of festivals in his diocese. He died March 10, 1757. His pastoral letter has been translated into many languages. See Von Einem, *Vers. einer rollst. Kirchengesch.* d. 18. Jahrh. (Leips. 1782 sq.), i, 554, 590; Schröckh, *Kirchengesch.* vii, 309–313; *Leben d. Cardinäle d. 18. Jahrh.* iii, 260.—Herzog, *Real-Encyklop.* s. v.

Travelling (prop. some form of אָרָח, *arách*, especially אֲרָח, *oréach*, a traveller; fem. אֲרָחָה, *orecháh*, a "travelling company" [Gen. xxxvii, 25; Isa. xxi, 13], i. e. *caravan*) in the East is still much more cumbersome than with us, since it is almost exclusively undertaken solely on errands of business, and rarely for purposes of pleasure. Its laboriousness is partly occasioned by the sandy and desert nature of the country, which often requires way-marks to be set up for guidance (Arrian, *Exped. Alex.* v, 26); partly by the bad and neglected

roads (comp. Philo, *Opp.* ii, 578), especially in winter [see ROAD]; partly by the general absence of proper hotels [see INN]; and partly by the bands of robbers who infest the country in general (comp. 2 Cor. xi, 26). See ROBBER. Commerce (q. v.) is carried on by means of caravans (q. v.), which carry all necessities with them, and are often so large as to seem like a considerable army (see Wellsted, *Reisen*, p. 227). Part of the company is always armed, and constitutes the van and rear guard (see Olivier, *Voyage*, vi, 329 sq.). In the desert a local guide is usually employed (comp. Numb. x, 31), and a beacon-fire as a standard by night (see, generally, Jahn, *Archäol.* i, ii, 17 sq.). Single travellers in the interior of the well-inhabited country, or in Palestine proper, usually ride upon asses (1 Sam. xxv, 20, 42; 2 Sam. xvii, 23; 1 Kings ii, 40; 2 Chron. xxviii, 15; comp. Luke x, 34); tourists, however, and sheiks, upon horses; and in some instances wagons were anciently used as vehicles (1 Kings xii, 18; 2 Kings xix, 21; Acts viii, 28) in certain parts of the country. Most persons went on foot (comp. John iv, 6) and carried their most essential supplies with them (Judg. xix, 18 sq., i. e. *πίρα*, Matt. x, 10), likewise a tent (q. v.) under which to encamp if in a solitary region (Dionys. Hal. viii, 3). Gloves are mentioned in the Mishna (*Chelim*. xvi. 6) as travelling apparatus. The Jews journeyed to the great festivals in caravans (Luke ii, 42, 41) with song and rejoicing. Single travellers usually found a ready hospitality (except among the Samaritans towards Jews), and eventually clans (q. v.) were established along the highways, especially for non-Israelites (see Reissegger, *Reisen*, iii, 62 sq.). Travellers of distinction were often welcomed with torchlights and great ceremony (2 Mace. iv, 22), and for princes the roads were frequently repaired (Psa. lxxviii, 5; Isa. xl, 3; Diol. Sic. ii, 13; Arrian, *Alex.* iv, 30; Josephus, *J. War.* iii, 6, 2). Also on departing they were dismissed with an honorary procession (*προστίμειν*, Acts xxi, 5; *deducere*, Cicero, *Cat. Maj.* xviii) and many ceremonious attentions (Acts xv, 3; Rom. xv, 24; 1 Cor. xvi, 16; 3 John 6). Samaria was avoided as a route by the Jews. The Galileans, in visiting the festivals at Jerusalem, usually went along the Jordan or through Perea (Luke xvii, 11; John iv, 4; Josephus, *Ant.* xx, 6, 1). See SAMARITAN. Journeying on the Sabbath was forbidden in postexilic times (see Josephus, *Ant.* xiii, 8, 4).—Winer. See SABBATH-DAY'S JOURNEY. On account of the heat travel was sometimes pursued by night. (See generally, Hackett, *Illustr. of Script.* p. 12–16.) See JOURNEY.

Travis, GEORGE, an English clergyman, was a native of Royton, Lancashire, and was educated at St. John's College, Oxford. He became vicar of Eastham and rector of Hendley, Cheshire; prebendary of Chester in 1783; and archdeacon of Chester in 1786. He died Feb. 24, 1797. He published, *Letters to Edward Gibbon*, etc., in defence of 1 John 5, 7 (Chester, 1784, 4to; corrected and enlarged, 1794, 8vo). See Allibone, *Dict. of Brit. and Amer. Authors*, s. v.

Treasure (prop. אֲצָרָה, *to hoard*, *θησαυρός*), in Scripture signifies anything collected together in stores, e. g. a treasure of corn, of wine, of oil; treasures of gold, silver, brass; treasures of coined money. Snow, winds, hail, rain, waters, are in the treasures of God (Psa. cxxxv, 7; Jer. li, 16). We read also of a treasure of good works, treasures of iniquity, to lay up treasures in heaven, to bring forth good or evil out of the treasures of the heart. Joseph told his brethren, when they found their money returned in their sacks, that God had given them treasures (Gen. xliii, 23). The kings of Judah had keepers of their treasures, both in city and country (1 Chron. xxvii, 25; 2 Chron. xxxii, 27, etc.), and the places where these magazines were laid up were called treasure-cities. Pharaoh compelled the Hebrews to build him treasure-cities, or magazines (Exod. i, 11). The word treasures is often used to express anything in great abundance, "In Jesus Christ

are hidden all the treasures of wisdom and knowledge" (Col. ii, 3). The wise man says that wisdom contains in its treasures understanding, the knowledge of religion, etc. Paul (Rom. ii, 5) speaks of heaping up a treasure of wrath against the day of wrath; and the prophet Amos says (iii, 10) they treasure up iniquity, they lay up iniquity as it were in a storehouse, which will bring them a thousand calamities. The treasures of impiety or iniquity (Prov. x, 2) express ill-gotten riches. The treasures of iniquity, says the wise man, will eventually bring no profit; and, in the same sense, Christ calls the riches of iniquity mammon of unrighteousness, an estate wickedly acquired (Luke xvi, 9). Gospel faith is the treasure of the just; but Paul says, "We have this treasure in earthen vessels" (2 Cor. iv, 7). Isaiah says of a good man, "The fear of the Lord is his treasure" (xxxiii, 6).—Calmet. On the Scripture allusions to "hid treasures" see Thomson, *Land and Book*, i, 195 sq.; Freeman, *Hand-book of Bible Manners*, p. 350 sq. See STORE.

Treasurer (technically Heb. and Chald. גִּזְבָּר, *gizbār*, Ezra i, 8; vii, 21; Chald. also גִּזְבָּר, *gizbār*, Dan. iii, 2, 3; imp. סֹכֵן, *sokēn*, Isa. xxii, 15, an *associate*, i. e. the king's intimate friend), an important officer in all Oriental courts. See KING. In Dan. iii, 2, 3, the Chald. אַדְרַגְזָר, *adragzār* (Sept. *ῥεαννορ*, A. V. "judge"), occurs among the titles of Babylonian royal officers, and has (perhaps from the resemblance of the word to the Greek *γῶνα*) been thought by some to mean the officers of the Turkish court and government, now called *defterdars*, who have the charge of the receipts and disbursements of the public treasury. Gesenius and others conceive that the word means *chief-judges* (from מִגְדָּר, *migdār*, and דָּרַךְ, *darakh*, *deciders*); but Dr. Lee seems to prefer seeking its meaning in the Persian *adur*, fire, and *gozar*, passing; and hence concludes that the *adragazerin* were probably officers of state who presided over the ordeals by fire, and other matters connected with the government of Babylon. See JUDGE.

TREASURER, ECCLESIASTICAL, the keeper of the treasures, e. g. the muniments, sacred vessels, relics, and valuables of a church, cathedral, or religious house. He was known by different names: *sacrist*, from having charge of the sacristy; *cellarer*, as providing the eucharistic elements and canonical bread and wine; *matricular*, as keeper of the inventory; *constre* in France and Germany; *custos* and *cineliarch* in Italy; and in the Greek *scenophylax*. The *custos* had charge of all the contents of the Church, but at length became superintendent of deputies, discharging his personal duties, and at last took the title of treasurer, as having charge of the relics and valuables of the Church. He is the Old-English *cyrcward* and mediæval perpetual *sacristan*, and now represented by the humbler *sexton*. Every necessary for the Church and divine service was furnished by him. The old title of *custos* descended below the 13th century to his church-service.

In order the treasurer usually succeeded the chancellor, and had a stall appointed to himself. His dignity was founded at York in the 11th century; at Chichester, Lichfield, Wells, Hereford, St. Paul's, in the 12th; and at St. David's and Llandaff in the 13th. It has been commonly preserved and exercised since the Reformation, both in English colleges and cathedrals, but has fallen into disuse at York, Lincoln, and Lichfield, and at Exeter, Llandaff, and Amiens is held by the bishop.

The monastic treasurer, or *bursar*, received all the rents, was auditor of all the officers' accounts, paymaster of wages, and of the works done in the abbey.—Lee, *Gloss. of Liturg. Terms*, s. v.; Walcott, *Sac. Archaeol.*, s. v.

Treasury (usually אֹסָר, *otsār*, a *collection*, often rendered "treasure;" sometimes Heb. גִּזְזִים, *gizzim* [Esth. iii, 9; iv, 1], or Chald. גִּזְזִין, *gizzin* [Ezra v,

17; vi, 1; vii, 20, "treasure-house"], a store or deposit). See also אֲסֻרִּים. In 1 Chron. xxviii, 11, the treasury of the Temple is called גִּזְזֵי, *ganzāk*; and means substantially the same as the *κορβανὰς* of Matt. xxvii, 6, namely, the hoard of money contributed towards the expenses of that edifice. The same thing, or perhaps rather the place where the contribution-boxes for this purpose were kept, is designated in the New Test. as the *γαζοφυλάκιον* (Mark xii, 41; Luke xxi, 1; John viii, 20), and so likewise Josephus (*Ant.* xix, 6, 1; *War.* v, 5, 2), after the Sept. (Neh. x, 37; xiii, 4, 5, 8; Esth. iii, 9). According to the rabbins this treasury was in the court of the women, where stood thirteen chests called *trumpets* from their form or funnel-shaped mouth, into which the Jews cast their offerings (comp. Exod. xxx, 13 sq.). See TEMPLE.

Treat, SAMUEL, a Congregational minister, was born at Milford, Conn., in 1647 (or 1648), and graduated at Harvard College in 1669. He was ordained and settled at Eastham, Plymouth Colony, in 1672. Soon after his settlement he studied the Indian language, and devoted to the Indians in his neighborhood much of his time and attention. Through his labors many of the savages were brought into a state of civilization and order, and not a few of them were converted to the Christian faith. In 1693 he wrote a letter to Increase Mather, in which he states that there were within the limits of Eastham five hundred adult Indians, to whom he had for many years imparted the Gospel in their own language. He had under him four Indian teachers, who read in separate villages on every Sabbath, excepting every fourth, when he himself preached the sermons which he wrote for them. He procured schoolmasters, and persuaded the Indians to choose from among themselves six magistrates, who held regular courts. In 1700 he began to serve the new settlement of Truro, and performed parochial duties until a church was established. After having passed near half a century in the most benevolent exertions as a minister of the Gospel, he died, March 18, 1717. He published the *Confession of Faith* in the Nauset Indian language, and an *Election Sermon* (1713). See Sprague, *Annals of Amer. Pulpit*, i, 183.

Treaty. See ALLIANCE.

Trecānum, an anthem sung after the communion, before the 6th century, in honor of the Holy Trinity; called by this name in Gaul. Some think it was the Apostles' Creed. In the Greek Church there is a confession of the Holy Trinity sung after the *Hagia Hagios*. The latter form is mentioned by Cyril of Jerusalem, Basil, and the Mozarabic and Gallican liturgies. —Walcott, *Sac. Archaeol.*, s. v.

Tredischi, NICHOLAS, an eminent ecclesiastic, was a native of Sicily, born towards the close of the 14th century, and became one of the most celebrated canonists of his time. He was present at the Council of Basle, in which he took a prominent part, and was made a cardinal by Felix V in 1440.

Tree, prop. עֵץ, *êts* (*êrêpon*), which also signifies *wood* (*ξύλον*); in Jer. vi, 6, the fem. עֵצָה, *êtsáh*, is used. Besides this generic term, there also occur peculiar words of a more distinct signification, e. g. אֶשְׁלָח, *êshel* (1 Sam. xxii, 6; xxxi, 13; "grove" [q. v.] in Gen. xxi, 33), which is thought to denote the *tamarisk* or else the *terebinth*; אֶלֶךְ, *elêk* (Isa. lxi, 3; Ezek. xxxi, 14); Chald. אֶלְאִן, *êlân* (Dan. iv, 10 sq.), prob. the *oak* (q. v.); עֵץ הָאֱדָר, *êts hadâr* ("goodly tree," Lev. xxiii, 40); עֵץ אֲבֹת, *êts abôth* ("thick tree," ver. 40; Neh. viii, 15), and עֵץ צֶלֶל, *êtsêl* ("shady tree," Job xl, 21, 22), which designate rather vigorous trees in general than specific varieties. See TABERNACLES, FESTIVAL OF. For a list of all the kinds of trees (including shrubs, plants, fruits, etc.) mentioned in the Bible, see BOTANY. See Taylor, *Trees of Scripture* (Lond. 1842).

Ancient Assyrians cutting down Palms of a Besieged City.

In Eastern countries trees are not only graceful ornaments in the landscape, but essential to the comfort and support of the inhabitants. The Hebrews were forbidden to destroy the fruit-trees of their enemies in time of war, "for the tree of the field is man's life" (Deut. xx, 19, 20). Trees of any kind are not now very abundant in Palestine. Some trees are found, by an examination of the internal zones, to attain to a very long age. There are some in existence which are stated to have attained a longevity of three thousand years, and for some of them a still higher antiquity is claimed. Individual trees in Palestine are often notable for historical and sacred associations (Thomson, *Land and Book*, ii, 151). See ALLON-BACHUTH; MEONENIM.

TREE OF LIFE, etc. Whatever may have been the frame and texture of Adam's body while in Eden, it is certain that, being "of the earth, it was earthy," and was thus liable to disease and exposed to decay; just as his soul, at the same time, was liable to the greater evil of temptation by being exposed to the power of the tempter. Hence, while "every tree of the garden was given for food," the tree of life, in the midst of the garden, was provided by Infinite Wisdom as the appointed antidote of disease or decay of the body; while, at the same time, the enjoyment of spiritual life, or the indwelling of the spirit of God, and the right of access to the tree of life, thus securing immortality, were conditioned on our first parents not eating the forbidden fruit of the tree of knowledge (Gen. ii, 9-17). The various references to the "tree of life" evidently consider it to have been the divinely appointed medium for securing the immortality of our first parents (Prov. iii, 18; xi, 30; Ezek. xlvii, 12; Rev. ii, 7; xxii, 2, 14). See REINECCIUS, *De Arbore Vitæ* (Weissenf, 1722). See LIFE.

The tree of the knowledge of good and evil, of which they were forbidden to eat under penalty of excommunication from the tree of life, and consequent death, which also occupied a conspicuous place in the garden, was the divinely appointed test of good and evil, the means whereby God would try and prove the faithfulness and obedience of our first parents. It was the test of moral good and evil, i.e. of holiness and sin, and of consequent happiness or misery (Gen. iii, 1-24). When, through the instigation of the tempter, the first human pair disregarded the command of their Creator and partook of the fruit of the prohibited tree, they lost the indwelling of the spirit of God, and forfeited the right of access to the tree of life. On that day the sentence of death was awarded to the guilty pair. They were now dead in the eye of the divine law, and the same condemnation passed upon the whole race of man. By partaking of the forbidden tree, they obtained an experimental sense of the distinction between good and evil. Hence their expulsion from Eden and removal from the tree of life was an act of mercy as well as of justice;

for, had they been allowed to retain the use of the tree of life, it would, in their condition, have sustained them in an immortality of guilt and misery. See MÜLLER, *De Arbore Boni et Mali, et Arb. Vitæ* (Lips. 1755); *Journ. of Sac. Lit.*, Oct. 1862; Jan. and Oct. 1864. See EDEX.

Tregelles, SAMUEL PRIDEAUX, LL.D., an eminent English Biblical scholar, was born at Falmouth, Jan. 30, 1813. After receiving

an education at the Falmouth Classical School, he was employed in the iron-works at Neath Abbey, Glamorganshire, 1828-34, and became, in 1836, a private tutor in Falmouth. Devoting himself to the study of the Scriptures, he visited the Continent several times for the purpose of collating the principal uncial MSS. At Rome he was permitted to see the Vatican MS., but not to copy it. He received his degree of LL.D. from St. Andrew's University in 1850, and in 1863 received an annual pension of one hundred pounds. Of Quaker parentage, he became associated with the Plymouth Brethren, was an active philanthropist, and was appointed a member of the company on the revision of the A. V. of the Old Test. Dr. Tregelles died at Plymouth, April 24, 1875. He published, *Englismen's Greek Concordance to the New Test.* (1839, imp. 8vo; 2d ed. 1844, imp. 8vo; *Index* to, 1845, imp. 8vo); — *Englismen's Hebrew and Chaldee Concordance to the Old Test.* (1843, 2 vols. imp. 8vo); — *Book of Revelation in Greek*, etc. (1844, 8vo); — *Gesenius's Hebrew and Chaldee Lexicon to the Old-Test. Scriptures*, etc. (1847, 4to; last ed. 1857, 4to); — *Remarks on the Prophetic Visions of the Book of Daniel* (1847, 8vo); 4th ed. with notes, and *Defence of the Authenticity of the Book of Daniel*, also published separately, 1852, 8vo); — *Book of Revelation, Translated from the Ancient Greek Text* (1848, 12mo; 1858, 12mo); — *Prospectus of a Critical Edition of the Greek New Test.*, etc. (Plymouth, 1848, 12mo); — *On the Original Language of St. Matthew's Gospel* (Lond. 1850, 8vo); — *The Jansenists: their Rise*, etc. (1851, 8vo); — *Lecture on the Historic Evidence of the Authorship, etc., of the Books of the New Test.* (1852, small 8vo); — *Heads of Hebrew Grammar* (1852, 8vo); — *An Account of the Printed Text of the Greek New Test.*, etc. (1854, 8vo); — *The Greek New Test. Edited from Ancient Authorities*, etc. (1857-72); this last is considered his most important work; — *Codex Bezae Cantabrigie* (1861, small fol.); — *Canon Muratorianus*, earliest catalogue of books of the New Test. (Camb. and Lond. 1868, 4to). For full description of works, see Allibone, *Dict. of Brit. and Amer. Authors*, s.v.

Trelawney, Sir Harry, an English baronet, was born in 1756, and was educated at Christ Church College, Oxford. He was in succession a preacher among the Methodists, then served a Presbyterian congregation at West Loo, Cornwall, and afterwards sided to the Rational Dissenters. Returning to the Church of England, he obtained a rectory in the west of England, and was made prebendary of Exeter in 1789. According to Allibone, he died a Roman Catholic, at Laverno, Italy, in 1834. He published a sermon on 1 Cor. iii, 9, *Ministers Laborers together with God* (Lond. 1778, 4to). See *Lond. Gent. Mag.* 1834, i, 652; Allibone, *Dict. of Brit. and Amer. Authors*, s.v.; Darling, *Cyclop. Bibliog.* s.v.

Trelawney, Sir Jonathan, an English baronet and prelate, born in 1648, was ordained bishop of Bristol in 1685, translated to Exeter in 1689, and to Winchester in 1707. He was one of the seven bishops committed to the Tower in the reign of James II. His death occurred in 1721. He published a sermon on Josh. xxiii, 8, 9, *Thanksgiving for Victory* (Lond. 1702, 4to); — *Caution against False Doctrine* (1704, 12mo). See *Lond. Gent. Mag.* 1827, ii, 409; *State Trials* (Howell's ed.), xii, 182, 187; Allibone, *Dict. of Brit. and Amer. Authors*, s. v.; Darling, *Cyclop. Bibliog.* s. v.

Tremellius, EMIANUEL, a learned Protestant divine, was born at Ferrara in 1510. By birth a Jew, he was educated in the Jewish faith; but he was converted to Christianity by the teaching, it is said, of cardinal Pole and M. A. Flaminio. Through the influence of Peter Martyr he soon after joined the Reformation party, and became an active propagator of their views. Having left Italy, he visited Germany and England, where he lived in intimacy with archbishops Crammer and Parker, and for some time supported himself by teaching Hebrew at Cambridge. On the death of Edward VI he returned to Germany, where he remained teaching Hebrew at Hornbach and Heidelberg. He was next invited to occupy the Hebrew chair at Sedan, where he died in 1580. His works are: *Rudimenta Ling. Heb.* (Wittenb., 1541); *הַנִּיךְ בְּהִירֵי יְהוָה*, *Initiatio Electorum Domini*, a catechism in Hebrew (Par. 1551, 1552; Strasb. 1554; Leyd. 1591); — *Gram. Chald. et Syr.*, prefixed to *Interpretatio Syr. N. T. Hebraicis Typis Descripta* (Par. 1569); — *Biblia Sacra, sive Libb. Canon. Latini recens ex Heb. Fucti* (Francof. 1579; Lond. 1580). See Fürst, *Bibl. Jud.* iii, 443; Kitto, *Cyclop.* s. v.; Stein-schneider, *Bibliogr. Handbuch*, p. 140; Kalkar, *Israel und die Kirche*, p. 73 sq.; Wolf, *Bibl. Hebr.* i, iii, 4, No. 1797; Butters, *Emmanuel Tremellius* (Zweibrücken, 1859); Delitzsch, *Saat auf Hoffnung* (Erlangen, 1865), iv, 28 sq.; Da Costa, *Israel and the Gentiles*, p. 469 sq.; Adams, *History of the Jews*, ii, 71. (B. P.)

Trench (prop. תֵּנָח, *teñah*, 1 Kings xviii, 32, 33, 38, a channel, or "conduit," as elsewhere), a kind of ditch cut into the earth for the purpose of receiving and draining the water from adjacent parts. Something of this kind was the trench cut by the prophet Elijah to contain the water which he ordered to be poured on his sacrifice (ver. 32), and which, when filled to the brim with water, was entirely exhausted, evaporated, by the fire of the Lord which consumed the sacrifice. See ELIJAH.

Trench (תֵּנָח, *teñah*, 2 Sam. xx, 15, a wall, rampart, or bulwark, as elsewhere rendered; מַגָּל, *magál*, 1 Sam. xxvi, 5, 7; or מַגָּלָה, *magáláh*, xvii, 20, a wagon-wall, hence a defence formed by the vehicles of an army; χάραξ, Luke xix, 43, a mound [Lat. *vallum*] for blockading a besieged city, formed of the earth thrown out of a moat and stuck with sharp sticks or palisades) is also a military term, and denotes one description of the approaches to a fortified town. They were anciently used to surround a town, to enclose the besieged, and to secure the besiegers against attacks from them. Trenches could not be cut in a rock; and it is probable that, when our Lord says of Jerusalem (Luke xix, 43), "Thy enemies shall cast a trench about thee," meaning, "they shall raise a wall of enclosure," he foretold what the Jews would barely credit from the nature of the case; perhaps what they considered as impossible: yet the providence of God has so ordered it that we have evidence to this fact in Josephus, who says that Titus exhorting his soldiers, they surrounded Jerusalem with a wall in the space of three days, although the general opinion had pronounced it impossible. This circumvallation prevented any escape from the city, and deterred from all attempts at relief by succors going into it. See SIEGE.

Trendelenburg, Friedrich Adolf, a German

philosopher, was born at Eutin, near Lubeck, Nov. 30, 1802; and was educated at the gymnasium of his native town, and at the universities of Kiel, Leipsic, and Berlin. From 1826 to 1833 he was private tutor in the family of postmaster-general Von Nagler, and in the latter year was appointed professor extraordinary of philosophy at Berlin. This position was exchanged, in 1837, for that of professor in ordinary. He was elected a member of the Berlin academy in 1846, and was its secretary in the "historico-philosophical" section from 1847 until his death, Jan. 24, 1872. "On that very day the journals announced his decoration by the king as a knight of the Order of Merit, for his eminence in science and art." "The foundation of Trendelenburg's doctrine is essentially Platonic and Aristotelian." He terms his philosophy the "organic view" of the world; and according to it each lower stage in existence is the basis of the higher stages, and necessarily involved in the higher. The soul is the self-realizing idea of man. God is the unconditioned, not directly demonstrable, but implied, with logical necessity, in the whole fabric of the universe and of human thought. Among Trendelenburg's works are, *Elementa Logices Aristotelicæ* (Berlin, 1837; 6th ed. 1868); — *Logische Untersuchungen* (ibid. 1840; 3d ed. 1870); — *Erläuterungen zu den Elementen der aristotelischen Logik* (2d ed. 1861); — *Naturrecht auf dem Grunde der Ethik* (2d ed. 1868). See Bonitz, *Zur Erinnerung an F. A. Trendelenburg* (Berlin, 1872); Bratuschek, *Adolf Trendelenburg* (ibid. 1873); Prantl, *Gedächtnissrede auf F. A. Trendelenburg* (Munich, 1873); Ueberweg, *Hist. of Modern Phil.* (see Index).

Trendelenburg, Johann Georg, a German professor of ancient languages, was born Feb. 22, 1757. For a number of years he was professor of languages at the academic gymnasium in Dantzic, where he died March 11, 1825. He published, *Primi Libri Maccabæorum Græci, Textus cum Versione Syriaca Collatio Instituta* (reprinted in Eichhorn's *Repertorium*, xv, 59); — *Chrestomathia Flaviania, sive Loci Illustres ex Flavio Josepho Delecti et Animadversionibus Illustrati* (Lips. 1789); — *Chrestomathia Hexaploris* (ibid. 1794); — *Commentatio in Verba Notissima Davidis 2 Sam. xxiii, 1-7* (Gott. 1779); — *Die ersten Anfangsgründe der hebr. Sprache* (Dantzic, 1784). See Fürst, *Bibl. Jud.* iii, 443; Wiener, *Handbuch der theol. Literatur*, ii, 807. (B. P.)

Trent, THE COUNCIL OF (*Concilium Tridentinum*), was held in Trent, a city of Tyrol, Austria, on the left bank of the Adige. It has a cathedral built entirely of marble in the Byzantine style. In the Church of St. Maria Maggiore are the portraits of the members of the council, which was held in this building. This council was first convoked June 2, 1536, by pope Paul III, to be held at Mantua, May 23, 1537. Subsequently, the duke of Mantua having refused to permit the assembling of the council in that city, the pope prorogued the meeting to November, without naming any place. Afterwards, by another bull, he prorogued it till May, 1538, and named Vicenza as the place of assembly; nominating in the meantime certain cardinals and prelates to look into the question of reform, who, in consequence, drew up a long report upon the subject, in which they divide the abuses needing correction into two heads:

1. Those concerning the Church in general.
2. Those peculiar to the Church of Rome.

When the time arrived, however, not a single bishop appeared at Vicenza; whereupon the pope again prorogued the council to Easter, 1539, and subsequently forbade its assembling until he should signify his pleasure upon the subject. At last, at the end of three years, in the year 1542, after much dispute between the pope, the emperor, and the other princes in the Roman communion as to the place in which the council should be holden, the pope's proposition that it should take place at Trent was agreed to; whereupon the bull was published, May 22, convoking the council to Trent on Nov. 1 in that year. Subsequently he named, as his legates

in the council, cardinal John del Monte, bishop of Pal-
estrina; the cardinal-priest of Sainte-Croix, Marcellus
Cervinus; and the cardinal-deacon Reginald Pole. How-
ever, difficulties arose, which caused the opening of the
council to be further delayed, and the first meeting was
not held until December, 1545. The great importance
of this council in the history of the Reformation, and in
Roman Catholic doctrine since, justifies an unusually
full treatment of it here.

Session I (Dec. 13, 1545).—When the council was
opened there were present the three legates, four arch-
bishops, and twenty-two bishops, in their pontifical vest-
ments. Mass was said by the cardinal del Monte, and
a sermon preached by the bishop of Bitonte; after which
the bull given Nov. 19, 1544, and that of February, 1545,
were read, and cardinal del Monte explained the ob-
jects which were proposed in assembling the council,
viz. the extirpation of heresy, the re-establishment of
ecclesiastical discipline, the reformation of morals, and
the restoration of peace and unity.

On Dec. 18 and 22 congregations were held, in which
some discussion arose about the care and order to be ob-
served by prelates in their life and behavior during the
council.

On Jan. 5 another congress was held, in which car-
dinal del Monte proposed that the order to be observed in
conducting the business of the council should be the
same with that at the last Council of Lateran, where
the examination of the different matters had been in-
trusted to different bishops, who for that purpose had
been divided into three classes; and when the decrees
relating to any matter had been drawn up, they were
submitted to the consideration of a general congrega-
tion; so that all was done without any disputing and
discussion in the sessions. A dispute arose in this con-
gregation about the style to be given to the council in
the decrees. The pope had decreed that they should
run in this form, "The Holy (Ecumenical and General
Council of Trent, the Legates of the Apostolic See pre-
siding;" but the Gallican bishops, and many of the Span-
iards and Italians, insisted that the words "representing
the Universal Church" should be added. This, however,
the legates refused, remembering that such had been
the form used in the councils of Constance and Basle,
and fearing lest, if this addition were made, the rest of
the form of Constance and Basle might follow, viz.,
"which derives its power immediately from Jesus Christ,
and to which every person, of whatever dignity, not ex-
cepting the pope, is bound to yield obedience."

Session II (Jan. 7, 1546).—At this session forty-three
prelates were present. A bull was read prohibiting the
protectors of absent prelates to vote; also another, exhort-
ing all the faithful then in Trent to live in the fear of
God, and to fast and pray. The learned were exhorted
to give their attention to the question how the rising
heresies could be best extinguished. The question about
the style of the council was again raised.

In the following congregation, Jan. 13, the same ques-
tion was again debated. Nothing was settled in this
matter, and they then proceeded to deliberate upon
which of the three subjects proposed to be discussed in
the council (viz. the extirpation of heresy, the reforma-
tion of discipline, and the restoration of peace) should
be first handled. Three prelates were appointed to ex-
amine the procurator papers and excuses of absent
bishops.

In the next congregation the deliberations on the
subject to be first proposed in the council were resumed.
Some wished that the question of reform should be first
opened; others, on the contrary, maintained that ques-
tions relating to the faith demanded immediate notice.
A third party, among whom was Thomas Campeggio,
bishop of Feltri, asserted that the two questions of doc-
trine and reformation were inseparable, and must be
treated of together. This latter opinion ultimately pre-
vailed, but at the moment the sense of the assembly was
so divided that no decision was arrived at.

In the congregation held Jan. 22, the party in favor
of entering at once upon the subject of reform was much
increased, but the three legates continued their opposi-
tion to their scheme. Subsequently, however, they pro-
posed that they should always take into consideration
together one subject relating to the faith and one re-
lating to reform, bearing one upon the other.

On the 24th a curious dispute arose about the proper
seal for the use of the council. Some desired that a
new seal should be made; but the legates succeeded in
having the seal of the first legate attached to the synod-
al letters.

Session III (Feb. 4, 1546).—In this session nothing
was done except to recite the Creed, word for word.

In a congress held Feb. 22, the legates proposed that
the council should enter upon the subject of the Holy
Scriptures; and four doctrinal articles were presented,
extracted by the theologians from the writings of Luther
upon the subject of Holy Scripture, which they af-
firmed to be contrary to the orthodox faith.

1. That all the articles of the Christian faith necessary
to be believed are contained in Holy Scripture; and that
it is sacrilege to hold the oral traditions of the Church to
be of equal authority with the Old and New Test.

2. That only such books as the Jews acknowledged
ought to be received into the canon of the Old Test.; and
that the Epistle to the Hebrews, the Epistle of James, the
Second Epistle of Peter, the Second and Third Epistles of
John, the Epistle of Jude, and the Apocalypse should be
erased from the canon of the New Test.

4. That Holy Scripture is easy to be understood, and
clear, and that no gloss or commentary is needed, but only
the Spirit of Jesus Christ.

The first two articles were debated in the four follow-
ing congregations. As to the first article, the congrega-
tion came to the decision that the Christian faith is
contained partly in Holy Scripture and partly in the
traditions of the Church. Upon the second article much
discussion arose. All agreed in receiving all the books
read in the Roman Church, including the Apocryphal
books, alleging the authority of the catalogues drawn
up in the councils of Laodicea and Carthage, and those
under Innocent I and Gelasius I; but there were four
opinions as to the method to be observed in drawing up
the catalogue. One party wished to divide the books
into two classes—one containing those which have al-
ways been received without dispute, the other contain-
ing those which had been doubted. The second party
desired a threefold division: 1. Containing the un-
doubted books; 2. Those which had been at one time
suspected, but since received; 3. Those which had never
been recognised as seven of the Apocryphal books, and
some chapters in Daniel and Esther. The third party
wished that no distinction should be made; and the
fourth that all the books contained in the Latin Vulgate
should be declared to be canonical and inspired.

The discussion was resumed on March 8, but not de-
cided: the members, however, unanimously agreed that
the traditions of the Church are equal in authority to
Holy Scripture.

In the following congregation it was decided that the
catalogue of the books of Holy Scripture should be
drawn up without any of the proposed distinctions, and
that they should be declared to be all of equal author-
ity.

The authority of the Latin Vulgate (declared in the
third article to be full of errors) came under considera-
tion in subsequent congregations, and it was almost
unanimously declared to be authentic. With regard to
the fourth article, it was agreed that in interpreting
Scripture men must be guided by the voice of the fa-
thers and of the Church.

Session IV (April 8, 1546).—Between sixty and sev-
enty prelates attended this session. Two decrees were
read: 1. Upon the canon of Scripture, which declares
that the holy council receives all the books of the Old
and New Test. as well as all the traditions of the Church
respecting faith and morals, as having proceeded from
the lips of Jesus Christ himself, or as having been dic-

tated by the Holy Spirit and preserved in the Catholic Church by a continued succession; and that it looks upon both the written and unwritten Word with equal respect. After this the decree enumerates the books received as canonical by the Church of Rome, and as they are found in the Vulgate, and anathematizes all who refuse to acknowledge them as such. The second decree declares the authenticity of the Vulgate, forbids all private interpretation of it, and orders that no copies be printed or circulated without authority, under penalty of fine and anathema.

In another congregation the abuses relating to lecturers on Holy Scripture and preachers were discussed; also those arising from the non-residence of bishops. After this the question of original sin came under consideration, and nine articles taken from the Lutheran books were drawn up and offered for examination, upon which some discussion took place. Ultimately, however, a decree was drawn up upon the subject, divided into five canons.

1. Treats of the personal sin of Adam.
2. Of the transmission of that sin to his posterity.
3. Of its remedy, i. e. holy baptism.
4. Of infant baptism.
5. Of the concupiscence which still remains in those who have been baptized.

A great dispute arose between the Franciscans and Dominicans concerning the immaculate conception of the Blessed Virgin. The Franciscans insisted that she should be specially declared to be free from the taint of original sin; the Dominicans, on the other hand, maintained that, although the Church had tolerated the opinion concerning the immaculate conception, it was sufficiently clear that the Virgin was not exempt from the common infection of our nature. A decree of reformation, in two chapters, was also read.

Session V (June 17, 1546).—In this session the decree concerning original sin was passed, containing the five canons mentioned above, enforced by anathemas. Afterwards the fathers declared that it was not their intention to include the Virgin in this decree, and that upon this subject the constitutions of pope Sixtus IV were to be followed, thus leaving the immaculate conception an open question.

In a congregation held June 18, they proceeded to consider the questions relating to grace and good works. Also the subject of residence of bishops and pastors was discussed. The cardinal del Monte and some of the fathers attributed the heresies and disturbances which had arisen to the non-residence of bishops, while many of the bishops maintained that they were to be attributed to the multitudes of friars and other privileged persons whom the pope permitted to wander about and preach in spite of the bishops, who, in consequence, could do no good even if they were in residence.

In the congregation held June 30, twenty-five articles, professedly drawn up from the Lutheran writings on the subject of justification, were proposed for examination. Some of these articles seem well to have merited the judgment passed upon them; thus, among others,

5. Declares that repentance for *past* sin is altogether unnecessary if a man lead a new life.
7. The fear of hell is a sin, and makes the sinner worse.
8. Contrition arising from meditation upon, and sorrow for, past sin makes a man a great sinner.
11. Faith alone is required; the only sin is unbelief; other things are neither commanded nor forbidden.
12. He who has faith is free from the precepts of the law, and has no need of works in order to be saved; nothing that a believer can do is so sinful that it can either excuse or condemn him.
13. No sin separates from God's grace but want of faith.
14. Faith and works are contrary to one another; to teach the latter is to destroy the former, etc.

At this time the three ambassadors of the king of France arrived—viz. Dursé, Lignéres, and Pierre Danetz. The last mentioned delivered a long discourse, in the course of which he entreated the council to suffer no attack to be made upon the privileges of the kingdom and Church of France.

In a congregation held Aug. 20, the subject of justification was again warmly discussed, as well as the doctrine of Luther concerning free-will and predestination. Upon this latter subject nothing worthy of censure was found in the writings of Luther or in the Confession of Augsburg; but eight articles were drawn up for examination from the writings of the Zwinglians. Upon some of these there was much difference of opinion. By the advice of the bishop of Sinagaglia, the canons drawn up embodying the decrees of the council were divided into two sets—one set, which they called the *decrees of doctrine*, contained the Catholic faith upon the subjects decided; the others, called *canons*, stated, condemned, and anathematized the doctrines contrary to that faith. These decrees were mainly composed by cardinal Sainte-Croix, who bestowed infinite pains upon them; at least one hundred congregations were held upon the subject. Afterwards they returned to the consideration of the reform of the Church, and to the question about episcopal residence. Most of the theologians present, especially the Dominicans, maintained that residence was a matter not merely canonically binding, but of divine injunction. The Spaniards held the same opinion. The legates, seeing that the discussion tended to bring the papal authority and power into question, endeavored to put a stop to it.

Session VI (Jan. 13, 1547).—In this session the decree concerning doctrine was read; it contained sixteen chapters and thirty-three canons against heretics.

These chapters declare that sinners are brought into a state to receive justification when excited and helped by grace, and, believing the word of God, they freely turn to God, believing all that he has revealed and promised, especially that the sinner is justified by the grace of God, given to him through the redemption of Jesus Christ; and when, acknowledging their sinfulness and filled with a salutary fear of God's justice, yet trusting to his mercy, they conceive hope and confidence that God will be favorable to them for the sake of Jesus Christ, and thereupon begin to love him as the only source of all righteousness, and to turn from their sins through the hatred which they have conceived against them, i. e. through that repentance which all must feel before baptism; in short, when they resolve to be baptized, to lead a new life, and to follow the commandments of God.

After this the decree explains the nature and effects of justification, saying that it does not consist merely in the remission of sin, but also in sanctification and inward renewal. That the *final* cause of justification is the glory of God and of Jesus Christ and eternal life; the *efficient* cause is God himself, who, of his mercy, freely washes and sanctifies by the seal and unction of the Holy Spirit, who is the pledge of our inheritance; the *meritorious* cause is our Lord Jesus Christ, his beloved and only Son; the *instrumental* cause is the sacrament of baptism, without which no one can be justified; and, finally, the *formal* cause is the righteousness of God given to each, not that righteousness by which he is righteous in himself, but that by which he makes us righteous; i. e. with which being endued by him, we become renewed in our hearts, and are not merely accounted righteous, but are made really so by receiving, as it were, righteousness in ourselves, each according to the measure given to us at the will of the Holy Spirit and in proportion to the proper disposition and co-operation of each. Thus the sinner, by means of this ineffable grace, becomes truly righteous, a friend of God, and an heir of everlasting life; and it is the Holy Spirit who works this marvellous change in him by forming holy habits in his heart—habits of faith, hope, and charity—which unite him closely to Jesus Christ and make of him a lively member of his body; but no man, although justified, is to imagine himself exempt from the observation of God's commandments. No man may dare, under pain of anathema, to utter such a rash notion as that it is impossible for a man, even after justification, to keep God's commandments; since God commands nothing impossible, but with the commandment he desires us to do all that we can, and to seek for aid and grace to enable us to fulfil that which in our natural strength we cannot do.

The decree further teaches upon this subject that no man may presume upon the mysterious subject of predestination so as to assure himself of being among the number of the elect and predestinated to eternal life, as if, having been justified, it were impossible to commit sin again; or, at least, as if, falling into sin after justification, he must of necessity be raised again; that, without a special revelation from God, it is impossible to know who are those whom he has chosen. It also teaches the same of perseverance, concerning which it declares that he who perseveres to the end shall be saved; that no one in

this life can promise himself an absolute assurance of perseverance, although all ought to put entire confidence in God's assistance, who will finish and complete the good work which he has begun in us by working in us to will and to do, if we do not of ourselves fail of his grace.

Further, they who by sin have fallen from grace given, and justification, may be justified again when God awakens them; and this is done by means of the sacrament of *penance*, in which, through the merits of Jesus Christ, they may recover the grace which they have lost; and this is the proper method of recovery for those who have fallen. It was for the benefit of those who fall into sin after baptism that our Lord Jesus Christ instituted the sacrament of penance, saying, "Receive ye the Holy Ghost; whosoever sins ye remit, they are remitted unto them; and whosoever sins ye retain, they are retained." Hence it follows that the repentance of a Christian fallen into sin after baptism is to be clearly distinguished from the repentance required at holy baptism; for it not alone requires him to cease from sin, and to view his vileness with horror—i. e. to have an humble and contrite heart—but it also implies the sacramental confession of his sin, at least in will, and the absolution of the priest, together with such satisfaction as he can make by means of fasting, alms-giving, prayer, etc. Not that anything that he can do can help towards obtaining the remission of the *eternal* punishment due to sin, which is remitted together with the sin by the sacrament of penance (or by the desire to receive that sacrament where it cannot be had), but such satisfaction is necessary to attain remission of the *temporal* penalties attached to sin, which are not always remitted in the case of those who, ungrateful to God for the blessing which they have received, have grieved the Holy Spirit and profaned the temple of God.

This grace of justification may be lost, not only through the sin of infidelity, by which faith itself is lost, but also by every kind of mortal sin, even though faith be not lost.

These chapters were accompanied by thirty-three canons, which anathematize those who hold the opinions specified in them contrary to the tenor of the doctrine contained in the chapters.

Besides this decree, another was published in this session, relating to the Reformation, containing five chapters upon the subject of residence.

It renews the ancient canons against non-resident prelates, and declares that every prelate, whatever be his dignity, being absent for six months together from his diocese, without just and sufficient cause, shall be deprived of the fourth part of his revenue; and that if he remain away during the rest of the year, he shall lose another fourth; that if his absence be prolonged beyond this, the metropolitan shall be obliged, under pain of being interdicted from entering the church, to present him to the pope, who shall either punish him or give his church to a more worthy shepherd; that if it be the metropolitan himself who is in fault, the oldest of his suffragans shall be obliged to present him.

The decree then goes on to treat of the reform of ecclesiastics, both secular and regular; of the visitation of chapters by the ordinary; and declares that bishops may not perform any episcopal function whatever out of their own dioceses without the consent of the bishop of the place.

Before the seventh session a congregation was held, in which it was agreed to treat in the next place of the sacraments; and thirty-six articles, taken from the Lutheran books, were proposed for examination, after which thirty canons on the subject were drawn up—viz. thirteen on the sacraments in general, fourteen on baptism, and three on confirmation. They relate to their number, their necessity, excellence, the manner in which they confer grace, which they declared to be *ex opere operato*, i. e. that the sacraments confer grace upon all those recipients who do not, by mortal sin, offer a bar to its reception; e. g. grace is conferred by baptism upon infants, although they bring with them no pious affections. They also drew up a decree declaring that the sacraments ought always to be administered gratuitously.

After this the question of reformation was discussed; among other things, it was debated whether a plurality of benefices requiring residence is forbidden by the divine law.

Session VII (March 3, 1547).—In this session the thirty canons above noted relating to the sacraments were read, together with the accompanying anathemas. Among the thirteen on the sacraments in general were the following:

1. Anathematizes those who maintain that the seven sacraments were not all instituted by Jesus Christ.
3. Anathematizes those who maintain that any one sacrament is of more worth than another.

 8. Anathematizes those who deny that the sacraments confer grace *ex opere operato*, i. e. by their own proper virtue.
 9. Anathematizes those who deny that baptism, orders, and confirmation imprint an ineffaceable character.
 10. Anathematizes those who maintain that all Christians, male and female, may preach God's word and administer the sacraments.
 11. Anathematizes those who deny that the intention of the minister to do what the Church does is necessary to the effectual administration of the sacraments.
 12. Anathematizes those who maintain that the sin of the minister invalidates the sacrament.
 13. Anathematizes those who maintain that the minister may change the prescribed form.

Among the fourteen canons on baptism:

2. Anathematizes those who assert that real and natural water is not necessary in baptism.
3. Anathematizes those who maintain that the Church of Rome does not teach the true doctrine on the subject of baptism.
4. Anathematizes those who deny the validity of baptism conferred by heretics, in the name of the blessed Trinity, and with the intention to do what the Church does.
5. Anathematizes those who maintain that baptism is not necessary to salvation.
6. Anathematizes those who maintain that the baptized need only believe, and not keep the law of God.
10. Anathematizes those who maintain that sin after baptism is remitted by faith.
11. Anathematizes those who maintain that apostates from the faith should be again baptized.
12. Anathematizes those who maintain that no one ought to be baptized until he is of the age at which our Lord was baptized, or at the point of death.
13. Anathematizes those who deny that baptized infants are not to be reckoned among the faithful.
14. Anathematizes those who maintain that persons baptized in infancy should, when they come of age, be asked whether they are willing to ratify the promise made in their name.

Secondly, the decree of reformation, containing fifteen chapters, relative to the election of bishops, pluralities, etc., was passed.

In a congregation which followed, the question of transferring the council to some other place was discussed, a report having been circulated that a contagious disease had broken out in Trent.

Session VIII (March 11, 1547).—In this session a decree was read transferring the council to Bologna, which was approved by about two thirds of the assembly; the rest, who were mostly Spaniards or other subjects of the emperor, strongly opposed the translation. The emperor complained much of the transfer of the council, and ordered the prelates who had opposed it to remain at Trent, which they did.

Session IX (April 24, 1547).—In the first session held at Bologna, the legates and thirty-four bishops were present. A decree was read postponing all business to the next session, to be held on June 2 ensuing, in order to give time for the prelates to arrive.

Session X (June 2, 1547).—At this session, however, there were but six archbishops, thirty-six bishops, one abbot, and two generals of orders present: the rest continuing to sit at Trent. It was deemed advisable to prorogue the session to Sept. 15 ensuing; but the quarrel between the pope and the emperor having now assumed a more serious aspect, the council remained suspended for four years in spite of the solicitations made by the German bishops to the pope that the sessions of the council might continue.

In 1549, Paul III died, and the cardinal del Monte having been elected in his place, under the name of Julius III, he issued a bull, dated March 14, 1551, directing the re-establishment of the Council of Trent, and naming as his legates, Marcellus Crescentio, cardinal; Sebastian Pighino, archbishop of Siponto; and Aloysius Lipomanes, bishop of Verona.

Session XI (May 1, 1551).—The next session was held at Trent, when cardinal Crescentio caused a decree to be read to the effect that the council was reopened,

and that the next session should be held on Sept. 1 following.

Session XII (Sept. 1, 1551).—In this session, an exhortation was read in the name of the presidents of the council, in which the power and authority of oecumenical councils were extolled; then followed a decree declaring that the subject of the eucharist should be treated of in the next session. Afterwards, the earl of Montfort, ambassador from the emperor, demanded to be admitted to the council, which was agreed to. James Amyot, the ambassador of Henry II of France, presented a letter from his master, which, after some opposition, was read; it explained why no French bishop had been permitted to attend the council. Afterwards, Amyot, on the part of Henry, made a formal protest against the Council of Trent, in which he complained of the conduct of Julius III.

In the congregation following, the question of the eucharist was treated of, and ten articles selected from the doctrine of Zwingli and Luther were proposed for examination.

1. That the body and blood of Christ are present in the eucharist only in a figure, not really.
2. That the Lord's body is eaten, not sacramentally, but only spiritually and by faith.
3. That no transubstantiation takes place in the eucharist, but a hypostatic union of the human nature of Christ with the bread and wine.
4. That the eucharist was instituted for the remission of sins only.
5. That Jesus Christ in the eucharist is not to be adored, and that to do so is to commit idolatry.
6. That the holy sacrament ought not to be kept; and that no person may communicate alone.
7. That the body of Christ is not in the fragments which remain after communion; but it is so present only during the time of receiving, and not afterwards.
8. That it is sin to refuse to the faithful the communion in both kinds.
9. That under one species is not contained the same as under both.
10. That faith alone is required in order to communicate; that confession ought to be voluntary, and that communion at Easter is not necessary.

In another congregation the question of reform was discussed, the subject of episcopal jurisdiction was brought forward, and a regulation drawn up concerning appeals. No appeal from the judgment of the bishop and his officials was allowed, except in criminal cases, without consulting with civil judgments; and even in criminal cases it was not permitted to appeal from interlocutory sentences until a definitive sentence had been passed. The ancient right of the bishops to give sentence in the provincial synods was not, however, restored. The power was left to the pope of judging by means of commissioners delegated *in partibus*.

Session XIII (Oct. 11, 1551).—The decree concerning the eucharist was read Sept. 13, and was contained in eight chapters.

1. Declares that after the consecration of the bread and wine, our Lord Jesus Christ, very God and very Man, is verily, really, and substantially contained under the species of these sensible objects; that it is a sin to endeavor to put a metaphorical sense upon the words in which our Lord instituted the holy sacrament; that the Church has always believed the actual body and the actual blood, together with his soul and his divinity, to be present under the species of bread and wine after consecration.
3. That each kind contains the same as they both together do, for Jesus Christ is entire under the species of bread, and under the smallest particle of that species, as also under the species of wine, and under the smallest portion of it.
4. That in the consecration of the bread and wine there is made a conversion and change of the whole substance of the bread into the substance of our Lord's body, and a change of the whole substance of the wine into that of his blood, which change has been fitly and properly termed "transubstantiation."
5. That the worship of Latria is rightly rendered by the faithful to the holy sacrament of the altar.
8. That there are three modes of communicating:—(1) sacramentally, as in the case of sinners; (2) spiritually, as they do who receive only in will and by faith; (3) both sacramentally and spiritually, as they do who actually receive, and with faith and proper dispositions.

To this decree there were added eleven canons, anathematizing those who held certain heretical doctrines on the subject of the holy eucharist, and especially those contained in the ten articles proposed for examination in the congregation held Sept. 2.

Thus, can. 1 condemns the opinion contained in the first of those articles; can. 2, that contained in art. 3; can. 3, that contained in art. 9; can. 4, that contained in art. 7; can. 5, that contained in art. 4; can. 6, that contained in art. 5; can. 7, that contained in art. 6; can. 8, that contained in art. 2; can. 9, that contained in art. 10; can. 10 condemns those who deny that the priest may communicate alone; and can. 11 condemns those who maintain that faith alone, without confession, is a sufficient preparation for the communion.

Afterwards, a decree of reformation, containing eight chapters, was read; the subject of it was the jurisdiction of bishops.

In a congregation held after this session, twelve articles on the subjects of penance and extreme unction were examined, taken from the writings of Luther and his disciples. In a subsequent congregation the decrees and canons upon the subject were brought forward, together with a decree in fifteen chapters on reform.

Session XIV (Nov. 25, 1551).—In this session the decree upon penance, in nine chapters, was read.

1. States that our Lord chiefly instituted the sacrament of penance when he breathed upon his disciples, saying, "Receive ye the Holy Ghost," etc.; and the council condemns those who refuse to acknowledge that by these words our Lord communicated to his apostles and to their successors the power of remitting or retaining sins after baptism.
2. That in this sacrament the priest exercises the function of judge.
3. That the form of the sacrament, in which its force and virtue resides, is contained in the words of the absolution pronounced by the priest, "Ego te absolvo," etc.; that the penitential acts are contrition, confession, and satisfaction, which are, as it were, the matter of the sacrament.
4. The council defines contrition to be an inward sorrow for, and hatred of, the sin committed, accompanied by a firm resolution to cease from it in future. With respect to imperfect contrition, called attrition, arising merely from the shame and disgracefulness of sin, or from the fear of punishment, the council declares that if it be accompanied by a hope of forgiveness, and excludes the desire to commit sin, it is a gift of God and a motion of the Holy Spirit; and that, far from rendering a man a hypocrite and a greater sinner, it disposes him (*disponit*) to obtain the grace of God in the sacrament of penance.
5. The decree then goes on to establish the necessity of confessing every mortal sin which, by diligent self-examination, can be brought to remembrance. With regard to venial sins, it states that it is not absolutely necessary to confess them, and that they may be expiated in many other ways.
6. As to the minister of this sacrament, it declares that the power of binding and loosing is, by Christ's appointment, in the priest only; that this power consists not merely in *declaring* the remission of sins, but in the judicial act by which they are remitted.
7. As to the reserved cases, it declares it to be important to the maintenance of good discipline that certain atrocious crimes should not be absolved by every priest, but be reserved for the first order.
9. That we can make satisfaction to God by self-imposed inflictions, and by those which the priest prescribes, as well as by bearing patiently and with a penitential spirit the temporal sorrows and afflictions which God sends to us.

In conformity with this decree, fifteen canons were published, condemning those who maintained the opposite doctrines. After this, the decree upon the subject of extreme unction, in three chapters, was read.

It stated that this unction was appointed by our Lord Jesus Christ as a true sacrament of the New Test.; that it is plainly recommended to the faithful by James, and that the use of it is insinuated by Mark. That the matter of the sacrament is the oil consecrated by the bishop, and that its form consists in the words pronounced when the unction is applied; that its effect is to wipe out the remains of sin, and to reassure and comfort the soul of the sick person by exciting within him a full confidence in God's mercy, and sometimes to restore the health of the body, when such renewed health can advantage the salvation of the soul. That bishops alone may administer this sacrament. That this sacrament ought to be given to those who are in danger of death; but that if they recover, they may receive it again.

The council then agreed upon four canons on the subject, with anathemas.

1. Anathematizes those who teach that extreme unction is not a true sacrament instituted by Jesus Christ.
2. Anathematizes those who teach that it does not confer grace, nor remit sin, nor comfort the sick.
3. Anathematizes those who teach that the Roman rite may be set at naught without sin.
4. Anathematizes those who teach that the *πρεσβύτεροι*, of whom James speaks, are old persons, and not priests.

After this the question of reform came before them, and fourteen chapters upon the subject of episcopal jurisdiction were published.

1. Forbids the granting of dispensations and permissions by the court of Rome to the prejudice of the bishop's authority.
2. Forbids bishops in *partibus infidelium*, upon the strength of their privileges, to ordain any one under any pretext without the express permission of, or letter dismission from, the ordinary.
3. Gives bishops power to suspend clerks ordained without proper examination or without their license.
4. Orders that all secular clerks whatever, and all regulars living out of their monasteries, shall be always, and in all cases, subject to the correction of the bishop in whose diocese they are, notwithstanding any privileges, exemption, etc., whatsoever.
5. Relates to the conservators.
6. Orders all clerks, under pain of suspension and deprivation, to wear the habit suited to their order, and forbids them the use of short garments and green and red stockings.
7. Enacts that a clerk guilty of voluntary homicide shall be deprived of all ecclesiastical orders, benefices, etc.
8. Checks the interference of prelates in the dioceses of others.
9. Forbids the perpetual union of two churches situated in different dioceses.
10. Directs that benefices belonging to the regulars shall be given to regulars only.
11. Directs that no one shall be admitted to the religious life who will not promise to abide in the convent in subjection to the superior.
12. Declares that the right of patronage can be given only to those who have built a new church or chapel, or who endow one already built.
13. Forbids all patrons to make their presentation to any one but to the bishop, otherwise the presentation to be void.

In a congregation held Dec. 23 the sacrament of orders was considered, and twelve articles taken from the Lutheran writings were produced for examination. Subsequently eight canons were drawn up condemning as heretics those who maintained the following propositions: 1. That orders is not a true sacrament. 2. That the priesthood is the only order. 3. That there ought to be no hierarchy. 4. That the consent of the people is necessary to the validity of orders. 5. That there is no visible priesthood. 6. That unction is unnecessary. 7. That this sacrament does not confer the Holy Spirit. 8. That bishops are not by divine appointment nor superior to priests.

Session XI (Jan. 25, 1552).—In this session a decree was read to the effect that the decrees upon the subject of the sacrifice of the mass and the sacrament of orders, which were to have been read in this session, would be deferred until March 19 under the pretence that the Protestants, to whom a new safe-conduct had been granted, might be able to attend.

In the following congregation the subject of marriage was treated of, and thirty-three articles thereon were submitted for examination.

The disputes which arose between the ambassadors of the emperor and the legates of the pope produced another cessation of the council. The Spanish bishops and those of the kingdoms of Naples and Sicily, as well as all who were subjects of the emperor, wished to continue the council; but those, on the other hand, who were in the interests of the court of Rome did all they could to prevent its continuance, and were not sorry when the report of a war between the emperor and Maurice, elector of Saxony, caused most of the bishops to leave Trent. In the meantime some Protestant theologians arrived, and urged the ambassadors of the emperor to obtain from the fathers of the council an an-

swer to certain propositions, and to induce them to engage in a conference with them; both of which, however, the legates, upon various pretexts, eluded.

Session XVI (May 28, 1552).—The chief part of the prelates having then departed, the pope's bull declaring the council to be suspended was read in this session. This suspension lasted for nearly ten years; but on Nov. 29, 1560, a bull was published by Pius IV (who succeeded to the papacy upon the death of Julius III, in 1555) for the reassembling of the council at Trent on the following Easter-day; but from various causes the reopening of the council did not take place until the year 1562.

Session XVII (Jan. 18, 1562).—One hundred and twelve bishops and several theologians were present. The bull of convocation and a decree for the continuation of the council were read; the words "proponentibus legatis" inserted in it passed in spite of the opposition of four Spanish bishops, who represented that the clause, being a novelty, ought not to be admitted, and that it was, moreover, injurious to the authority of ecumenical councils.

In a congregation held Jan. 27 the legates proposed the examination of the books of heretics and the answers to them composed by Catholic authors, and requested the fathers to take into their consideration the construction of a catalogue of prohibited works.

Session XVIII (Feb. 26, 1562).—In this session the pope's brief was read, who left to the council the care of drawing up a list of prohibited books. After this a decree upon the subject of the books to be prohibited was read, inviting all persons interested in the question to come to the council, and promising them a hearing.

In congregations held on March 2, 3, and 4, they deliberated about granting a safe-conduct to the Protestants, and a decree upon the subject was drawn up.

On March 11 a general congregation was held, in which twelve articles of reform were proposed for examination, which gave rise to great dispute and were discussed in subsequent congregations.

Session XIX (May 14, 1562).—In this session nothing whatever passed requiring notice, and the publication of the decrees was postponed to the following session. Immediately after this session the French ambassadors arrived, and their instructions were curious, and to the following effect:

That the decisions which had taken place should not be reserved for the pope's approval, but that the pope should be compelled to submit to the decision of the council. That they should begin with the reform of the Church in its head and in its members, as had been promised at the Council of Constance, and in that of Basle, but never completed. That annates should be abolished; that all archbishops and bishops should be obliged to residence; that the council should make arrangements with respect to dispensations, so as to remove the necessity of sending to Rome. That the sixth canon of Chalcedon should be observed, which prohibits bishops to ordain priests without appointing them to some specific charges, so as to prevent the increase of useless ministers, etc.

On May 26 a congregation was held to receive the ambassador of France. The Sieur de Pibrac, in the name of the king his master, in a long discourse, exhorted the prelates to labor at the work of reformation, promising that the king would, if needful, support and defend them in the enjoyment of their liberty.

Session XX (June 4, 1562).—In this session the promoter of the council replied to the discourse delivered by Pibrac in the last congregation; after which a decree was read proroguing the session to July 16.

In the following congregation five articles upon the subject of the holy eucharist were proposed for examination.

1. Whether the faithful are, by God's command, obliged to receive in both kinds?
2. Whether Jesus Christ is received entire under one species as under both?
3. Whether the reason which induced the Church to

give the communion to the laity under one kind only still obliged her not to grant the cup to any one?

4. Upon what conditions the cup should be permitted to any persons, supposing it to be advisable to grant it?

5. Whether the communion is necessary to children under years of discretion?

The question about the obligation of residence was also again mooted; but the cardinal of Mantua objected to its discussion as entirely alien from the subject before them, promising, at the same time, that it should be discussed at a fitting season.

In subsequent congregations held from the 9th to the 23d of June the subject of the five articles was discussed.

In a congregation held July 14 the decree in four chapters on the communion was examined.

Session XXI (July 16, 1562).—The four chapters on doctrine were read, in which the council declared:

That neither laymen nor ecclesiastics (not consecrating) are bound by any divine precept to receive the sacrament of the eucharist in both kinds; that the sufficiency of communion in one kind cannot be doubted without injury to faith. Further, that the Church has always possessed the power of establishing and changing in the dispensation of the sacraments (without, however, interfering with essentials) according as she has judged to be most conducive to the honor due to the holy sacrament, and to the good of the recipients, taking into account the diversities of place and conjuncture; that, although Jesus Christ instituted and gave to his apostles the sacrament under two kinds, it is necessary to believe that under either kind Jesus Christ is received whole and entire; and that no diminution is experienced in any of the graces conveyed by the sacrament. Lastly, that children not arrived at years of discretion are not obliged to receive the eucharist.

Four canons in conformity with this doctrine were then read:

1. Against those who maintain that all the faithful are under obligation to receive in both kinds.

2. Against those who maintain that the Church has not sufficient grounds for refusing the cup to the laity.

3. Against those who deny that our Lord is received entire under each species.

4. Against those who maintain that the eucharist is necessary to children before they come to the exercise of their reason.

Subsequently nine chapters on reform were read, having regard to the duties of bishops, education of clerks, etc.

A few days after this session the Italian bishops received a letter from the pope, in which he declared that he was far from wishing to hinder the discussion of the question concerning the nature of the obligation to residence; that he desired the council to enjoy entire freedom, and that every one should speak according as his conscience directed him; at the same time, however, he wrote to his nuncio, Visconti, bidding him take secure measures for stifling the discussion, and for sending it to the holy see for decision.

In the congregations held after the twenty-first session, the question was concerning the sacrifice of the mass; and all the theologians agreed unanimously that the mass ought to be regarded as a true sacrifice under the new covenant, in which Jesus Christ is offered under the sacramental species. One of their arguments was this, that Jesus Christ was priest after the order of Melchizedek; the latter offered bread and wine; and that, consequently, the priesthood of Jesus Christ includes a sacrifice of bread and wine.

In a congregation held about Aug. 18, the archbishop of Prague presented a letter from the emperor, in which he made earnest entreaties that the cup might be conceded to the laity. This delicate subject was reserved for special consideration in a subsequent congregation.

The decree on the subject of the sacrifice of the mass being now completed, the members began next to consider the subject of communion in both kinds. Three opinions principally prevailed among the prelates: 1. To refuse the cup entirely; 2. To grant it upon certain conditions to be approved of by the council; 3. To leave the settlement of the matter to the pope. The Spanish and Venetian bishops supported the first opinion.

Among those who were inclined to grant the cup were cardinal Madrucci, the bishop of Modena, and Gaspard Capal, bishop of Leira. But among the strongest advocates for granting the petition was the bishop of the Five Churches, who implored the prelates to have compassion on the churches, and to pay some regard to the pressing entreaties of the emperor. On the other hand, the patriarchs of Aquileia and Venice, and the Latin patriarch of Jerusalem, were in favor of refusing; the latter maintained that by giving way to them the people would be rather confirmed in the error of supposing that the body only of our Lord is contained under the species of bread, and the blood only under that of wine; that if they gave way now, other nations would require the same, and they would go further, and would next require the abolition of images, as being an occasion of idolatry to the people. Other bishops, supporting this opinion, reminded the assembly that the Church had been led to forbid the use of the cup from a fear lest the consecrated wine should be spilled or turn sour, and that the former accident could hardly be prevented when the holy sacrament was carried long distances and by bad paths. The archbishop of Rossano, the bishops of Cava, Almeria, Imola, and Rieti, with Richard, abbot of Preval, at Genoa, were also among those who spoke in favor of absolutely refusing the cup. On the eve of the twenty-second session a decree passed by which it was left to the pope to act as he thought best in the matter, the numbers being ninety-eight for the decree and thirty-eight against it. The discussion lasted altogether from Aug. 15 to Sept. 16.

Session XXII (Sept. 17, 1562).—One hundred and eighty prelates, with the ambassadors and legates, were present at this session. The doctrinal decree touching the sacrifice of the mass, in nine chapters, was published. It was to the following effect:

1. Although our Lord once offered himself to God the Father by dying upon the altar of his cross, in order to obtain thereby eternal redemption for us, nevertheless, since his priesthood did not cease at his death, in order that he might leave with his Church a visible sacrifice (such as the nature of man requires), by means of which the bloody sacrifice of the cross might be represented at the last supper, on the same night that he was betrayed, in the execution of his office as a priest forever after the order of Melchizedek, he offered his body and blood to the Father under the species of bread and wine, and gave the same to his apostles; and by these words, "This do in remembrance of me," he commanded them and their successors to offer the like sacrifice, as the Catholic Church has always believed and taught.

2. As the same Jesus Christ who once offered himself upon the cross with the shedding of his blood is contained and immolated without the effusion of blood in the holy sacrifice of the mass, this latter sacrifice is truly propitiatory, and that by it we obtain mercy and forgiveness; since it is the same Jesus Christ who was offered upon the cross who is still offered by the ministry of his priests, the only difference being in the manner of offering. And the mass may be offered, not only for the sins and wants of the faithful who are alive, but also for those who, being dead, are not yet made pure.

3. Although the Church sometimes celebrates masses in honor and in memory of the saints, the sacrifice is still offered to God alone, for she only implores their protection.

4. The Church for many ages past has established the sacred canon of the mass, which is pure and free from every error, and contains nothing which is not consistent with holiness and piety, being in truth composed from our Lord's words, the traditions of the apostles, and the pious institutions of the holy popes.

5. The Church, in order the better to set forth the majesty of so great a sacrifice, has established certain customs—such as saying some things at mass in a low voice, others aloud; and has introduced certain ceremonies—as the benediction, lights, incense, ornaments, etc., after the tradition of the apostles.

6. Although it is to be desired that at every mass all the faithful should communicate, not only spiritually, but also sacramentally, nevertheless the council does not condemn private masses in which the priest only communicates, but, on the contrary, approves and authorizes them, for they are celebrated by the proper minister in behalf of himself and the faithful.

7. The Church has ordained that the priest shall mix water with the wine, because there is reason to believe that our blessed Lord did so, and because both blood and water issued from his side; which sacred mystery, by the use of this mixture, is remembered.

8. Although the mass contains much to edify the people, the fathers did not judge it right that it should be celebrated in the vulgar tongue, and the Roman Church has preserved the use; nevertheless, the clergy should at times, and especially on festivals, explain to the people some part of what they have read to them.

9. Anathematizes, in nine canons, all those who deny the affirmative of twelve of the thirteen articles proposed in the congregation following the twenty-first session, viz. the 1st, 3d, 13th, and 4th, 2d, 10th, 7th, 11th, 5th, 8th, 9th, and 6th (which see).

Then followed a decree concerning what should be observed or avoided in the celebration of mass:

Bishops were ordered to forbid and abolish everything which had been introduced through avarice, irreverence, or superstition, such as pecuniary agreements for the first masses, and forced exactions made under the name of alms; vagabond and unknown priests were forbidden to celebrate, also those who were notorious evil livers; no masses were to be said in private houses; all music of an impure and lascivious character was forbidden in churches, and all worldly conversation, profane actions, walking about, etc. Priests were forbidden to say mass out of the prescribed hours, and otherwise than Church form prescribed. It was also ordered to warn the people to come to church on Sundays and holidays at least.

In the third place, the decree of reformation was read, containing eleven chapters:

1. Orders that all the decrees of the popes and the councils relating to the life, morals, and acquirements of the clergy should be in future observed, under the original and even greater penalties.

2. Enacts that bishoprics shall be given only to those persons who possess the qualifications required by the canons, and who have been at least six months in holy orders.

3. Permits bishops to appropriate the third part of the revenue of the prebends in any cathedral or collegiate church for daily distributions.

4. Declares that no one under the rank of subdeacon shall have any voice in the chapter; that all the members shall perform their proper offices.

5. Enacts that dispensations *extra curiam* (i. e. granted anywhere out of the court of Rome) shall be addressed to the ordinary, and shall have no effect until he shall have testified that they have not been obtained surreptitiously.

6. Treats of the care to be observed in proving wills.

7. Orders that legates, nuncios, patriarchs, and other superior judges shall observe the constitution of Innocent IV beginning "*Romana*," whether in receiving appeals or granting prohibitions.

8. Orders that bishops, as the delegates of the holy see, shall be the executors of all pious gifts, whether by will or otherwise; that to them it appertains to visit hospitals and other similar communities, except those under the immediate protection of the king.

9. Directs that those to whom the care of any sacred fabric is intrusted, whether laymen or clerks, shall be held bound to give account of their administration yearly to the ordinary, unless the original foundation require them to account to any other.

10. Declares that bishops may examine notaries, and forbid them the exercise of their office in ecclesiastical matters.

11. Enacts penalties against those who usurp or keep possession of the property of the Church, and pronounces anathemas against them.

With respect to the concession of the cup to the laity, the council declared, by another decree, that it judged it convenient to leave the decision to the pope, who would act in the matter according as his wisdom should direct him.

In a congregation certain articles relating to the reformation of morals were discussed, and the theologians were instructed to examine eight articles on the subject of the *sacrament of Orders*. This occupied many congregations, in one of which a large number of the prelates, chiefly Spaniards, demanded that there should be added to the seventh canon, concerning the institution of bishops, a clause declaring the episcopate to be of divine right. An attempt was made to stifle the discussion, but John Fonseca, a Spanish theologian, among others, entered boldly upon the subject, declaring that it was not, and could not be, forbidden to speak upon the matter. He maintained that bishops were instituted by Jesus Christ, and thus by divine right, and not merely by a right conferred by the pope. The discussion of this question proved highly disagreeable at Rome, and

the legates received instructions on no account to permit it to be brought to a decision. However, in subsequent congregations the dispute was renewed with warmth; in the congregation of Oct. 13, the archbishop of Granada insisted upon the recognition of the institution of bishops, and their superiority to priests, *jure divino*. The same view was taken in the following congregation by the archbishop of Braga and the bishop of Segovia; and no less than fifty-three prelates, out of one hundred and thirty-one present, voted in favor of the recognition of the divine institution and jurisdiction of bishops. According to Fra Paolo, the number amounted to fifty-nine. The dispute was, however, by no means ended. On the 20th the Jesuit Lainez, at the instigation of the legates, delivered a powerful speech in opposition to the view taken by the Spanish bishops, denying altogether that the institution and jurisdiction of bishops were of divine right. However, powerful as was his speech, he was answered by the bishop of Paris so effectually that the legates, to their great discomposure, saw the views of the Spanish prelates gain ground. The latter then declared formally that unless their demands were granted, and the order and jurisdiction of bishops declared in the canon to be *jure divino*, they would thenceforth absent themselves from all the congregations and sessions.

In the meantime the cardinal of Lorraine arrived at Trent with several French prelates, and was received with honor. In a congregation held Nov. 23, he read the letter of the king of France to the council, in which he strongly urged them to labor sincerely to bring about a sound reformation of abuses, and to restore its pristine glory to the Catholic Church by bringing back all Christian people to one religion. After the letter was finished the cardinal delivered a speech, strongly urging the necessity of proceeding speedily with the work of reformation, in which he was followed by Du Ferrier, the king's ambassador, who spoke his mind freely.

All this time so little progress had been made with the canons and decrees that when Nov. 26, the day fixed for holding the twenty-third session, arrived, it was found necessary to prorogue it. After this, in the following congregations, the subject of the divine right of bishops was again discussed, when the French bishops declared in favor of the views held by the Spaniards.

At the beginning of the year 1563 the French ambassadors presented their articles of reformation under thirty-two heads. Their principal demands were as follows:

6. That no person should be appointed bishop unless he were of advanced age, and of good character and capacity.

7. That no curates should be nominated unless they were of good character and abilities.

9. That bishops, either personally or by deputy, should preach on every Sunday and festivals, besides Lent and Advent.

10. That all curates should do the same when they had a sufficient audience.

12. That incapable bishops, abbots, and curates should resign their benefices, or appoint coadjutors.

14. That all pluralities whatever should be abolished, without any consideration of compatibility or incompatibility.

16. That steps should be taken to provide every beneficed clerk with a revenue sufficient to maintain two curates and to exercise hospitality.

17. That the gospel should be explained to the people at mass, and that after mass the priest should pray with the people in the vulgar tongue.

18. That the ancient decretals of pope Leo and Gelasius on communion in both kinds should be re-established.

19. That the efficacy of the sacraments should also be explained to the people before their administration.

20. That benefices should be conferred by bishops within six months; after which time they should devolve to the immediate superior, and so gradually to the pope.

21. That they should abolish, as contrary to the canons, all expectatives, regressions (returning to a benefice which has been once resigned), resignations, etc.

23. That simple priories should be renounced to the cure of souls, originally intended by the foundation, which had been separated from them, and assigned to perpetual vicars with miserable pittance.

27. That bishops should take in hand no matter of importance without the advice of their chapters; and that canons should be compelled to continual residence.

31. That no sentence of excommunication should be passed until three monitions had been issued, and then only for grievous faults. That bishops should be desired to give benefices rather to those who drew back from receiving than to such as sought for them.

32. That diocesan synods should be assembled at least once a year, provincial synods every three years, and general councils every ten years.

The pope, in order to elude the difficulty in which he was placed by the demand of the Spanish and French bishops that the divine right of bishops should be inserted in the seventh chapter, sent a form for the approval of the council, in which it was declared that "bishops held the principal place in the Church, but in dependence upon the pope." This, however, did not meet with approval, and, after a long contest, it was agreed to state it thus, that "they held the principal place in the Church *under the pope*," instead of in dependence upon him. However, a still warmer contest arose upon the chapter in which it was said that the pope had authority to feed and govern the Universal Church. This the Gallican and Spanish bishops would by no means consent to, alleging that the Church is the first tribunal under Christ. Accordingly, they insisted that the words *universus ecclesias*, "all churches," should be substituted for *Universam Ecclesiam*. The Gallicans even more strenuously denied that "the pope possessed all the authority of Jesus Christ," notwithstanding all the limitations and explanations which were added to it.

On Feb. 5 the legates proposed for consideration eight articles on the subject of marriage, extracted from so-called heretical books:

1. That marriage is not a sacrament instituted by God.
2. That parents may annul marriages contracted by their children clandestinely.
3. That a man may marry again during the life of his first wife, divorced on account of fornication.
4. That polygamy is allowed to Christians, and that to forbid marriages at certain seasons is a heathen superstition.
5. That marriage is to be preferred to the state of virginity.
6. That priests in the Western Church may marry, notwithstanding their vow.
7. That the degrees of consanguinity and affinity laid down in Lev. xviii are to be observed, and no others.
8. That the cohabitation of causes relating to marriages belongs to the secular princes.

These articles were discussed in several congregations. The sixth article came under consideration March 4; all agreed in condemning it as heretical, but they were divided upon the grounds of their opinion. The question was afterwards discussed whether it was advisable, under the circumstances of the times, to remove the restriction laid upon the clergy not to marry; this was in consequence of a demand to that effect made by the duke of Bavaria. Strong opposition was made to this demand, and many blamed the legates for permitting the discussion, and maintained that if this license were granted the whole ecclesiastical hierarchy would fall to pieces, and the pope be reduced to the simple condition of bishop of Rome, since the clergy, having their affections set upon their families and country, would be inevitably detached from that close dependence upon the holy see in which its present strength mainly consists.

In the meantime, the cardinal of Mantua had died, and the pope despatched two new legates to the council, cardinal Morone and cardinal Navagier. The French continued their importunities on the subject of reformation, and were as constantly put off upon one pretext or another by the legates, and thus much time was wasted.

In a congregation held May 10, a letter from the queen of Scots was read, in which she expressed her sorrow that she had not one Catholic prelate in her dominions whom she could send to the council, and declared her determination, should she ever attain to the crown of England, to do all in her power to bring that

kingdom, as well as Scotland, back to the Roman obedience.

All this time the contests about the institution and jurisdiction of bishops, and the divine obligation of residence, continued; and at last, in order to accommodate matters, and bring things to an end, it was resolved to omit altogether all notice of the institution of bishops and of the authority of the pope, and to erase from the decree concerning residence whatever was obnoxious to either party. They then fell to work upon the decree concerning the reformation of abuses.

Session XXXIII (July 15, 1563).—At this session 208 prelates, besides the legates and other ecclesiastics, were present, with the ambassadors of France, Spain, Portugal, etc. The sermon was preached by the bishop of Paris, who seems to have contrived in it to give offence to all parties. After the sermon, the bulls authorizing Morone and Navagier to act as legates for the pope were read, together with the letters of the king of Poland, the duke of Savoy, and the queen of Scotland. Lastly, the decrees and canons drawn up during the past congregation were brought before the council. The decree upon the sacrament of orders, in four chapters, was read, and eight canons on the sacrament of orders were published, which anathematized,

1. Those who deny a visible priesthood in the Church.
2. Those who maintain that the priesthood is the only order.
3. Those who deny that ordination is a true sacrament.
4. Those who deny that the Holy Spirit is conferred by ordination.
5. Those who deny that the unction given at ordination is necessary.
6. Those who deny that there is a hierarchy composed of bishops, priests, and ministers in the Catholic Church.
7. Those who deny the superiority of bishops to priests, or that they alone can perform certain functions which priests cannot, and those who maintain that orders conferred without the consent of the people are void.
8. Those who deny that bishops called by the authority of the pope (*qui auctoritate Romani pontificis assumuntur*) are true and lawful bishops.

After this the decree of reformation was read, containing eighteen chapters, on the residence of bishops, and on other ecclesiastical affairs.

In the following congregations the decrees concerning marriage were discussed, and it was unanimously agreed that the law of celibacy should be continued binding upon the clergy.

Moreover, twenty articles of reformation, which the legates proposed, were examined; and during the discussion letters were received from the king of France, in which he declared his disappointment at the meagre measure of ecclesiastical reform proposed in these articles, and his extreme dissatisfaction at the chapter interfering with the rights of princes. Shortly after, nine of the French bishops returned home, so that fourteen only remained.

On Sept. 22 a congregation was held, in which the ambassador Du Ferrier spoke so warmly of the utter insufficiency of the articles of reform which the legates had proposed, and of their conduct altogether, that the congregation broke up suddenly in some confusion.

To fill up the time intervening before the twenty-fourth session, the subjects of indulgences, purgatory, and the worship of saints and images were introduced for discussion, in order that decrees on these matters might be prepared for presentation in the twenty-fifth session.

Session XXXIV (Nov. 11, 1563).—In this session the decree of doctrine and the canons relating to the sacrament of marriage were read.

After establishing the indissolubility of the marriage tie by Holy Scripture, it adds that Jesus Christ, by his passion, merited the grace necessary to confirm and sanctify the union betwixt man and wife. That the apostle means us to understand this when he says, "Husbands, love your wives, as Jesus Christ loved the Church;" and, shortly after, "This sacrament is great: I speak of Jesus Christ and the Church." Marriage, under the Gospel, is declared to be a more excellent state than that of marriage under the former dispensation, on account of the grace conferred by it, and that, accordingly, the holy fa-

thers, councils, and universal tradition rightly teach us to reckon marriage among the sacraments of the new law.

There are twelve canons, with anathemas, upon the subject.

1. Anathematizes those who maintain that marriage is not a true sacrament.
2. Anathematizes those who maintain that polygamy is permitted to Christians.
3. Anathematizes those who maintain that marriage is unlawful only within the degrees specified in Leviticus.
4. Anathematizes those who deny that the Church has power to add to the impediments to marriage.
5. Anathematizes those who maintain that the marriage tie is broken by heresy, ill-conduct, or voluntary absence on either side.
6. Anathematizes those who deny that a marriage contracted, but not consummated, is annulled by either of the parties taking the religious vows.
7. Anathematizes those who maintain that the Church errs in holding that the marriage tie is not broken by adultery.
8. Anathematizes those who maintain that the Church errs in separating married persons for a time in particular cases.
9. Anathematizes those who maintain that men in holy orders, or persons who have taken the religious vow, may marry.
10. Anathematizes those who maintain that the married state is preferable to that of virginity.
11. Anathematizes those who maintain that it is superstitious to forbid marriages at certain seasons.
12. Anathematizes those who maintain that the cognation of matrimonial causes does not belong to the ecclesiastical authorities.

After this a decree of reformation was published relating to the same sacrament, containing ten chapters.

1. Forbids clandestine marriages; orders curates to publish the names of the parties about to contract marriage on three consecutive festivals in church during the solemn mass; orders that two or three witnesses be present at the marriage, and declares all marriages to be null which are not solemnized in the presence of the clergyman of the parish, or of some other priest, having his permission or that of the ordinary.
2. Treats of the impediments to marriage, which were in some respects relaxed, i. e. the impediments to marriage between a godparent and godchild and the parents of the godchild was removed; also that between the person administering baptism and the person baptized, or his or her parents.
- 3 and 4. Also refer to the relaxation of the impediments.
5. Those who wilfully contract marriage within the prohibited degrees are sentenced to be separated without any hope of obtaining a dispensation.
6. No marriage to be allowed between a ravisher and the woman ravished while she remains in his power; if, however, when at liberty, she consents, they may be married—the ravisher, and all aiding and abetting, to be nevertheless excommunicated.
7. Care to be used in permitting wanderers to receive the sacrament of marriage.
8. Fornicators, whether married or single, to be excommunicated, unless they will put away their mistresses after three monitions. The women, after three monitions, to be driven out of the diocese unless they obey.
9. Forbids all masters, magistrates, etc., under anathema, to compel those under their control to marry against their own inclinations.
10. Confirms the ancient prohibitions to celebrate marriages between Advent and Epiphany, and between Ash-Wednesday and the octave of Easter.

After this a decree, containing twenty-one articles, upon the reform of the clergy was read, setting forth the duty of bishops to visit their dioceses; to preach in person or by deputy; relating to dispensations, sacraments, visitations, pluralities, etc.

Session XXV and last (Dec. 3 and 4, 1563).—At this session the decrees concerning purgatory, the invocation of saints, and the worship of images and relics were read.

1. *Of Purgatory.*—Declares that the Catholic Church, following Holy Scripture and tradition, has always taught, and still teaches, that there is a purgatory, and that the souls which are detained there are assisted by the suffrages of the faithful and by the sacrifice of the mass. Orders all bishops to teach, and to cause to be taught, the true doctrine on this subject.

2. *Of the Invocation of Saints.*—Orders bishops and others concerned in the teaching of the people to instruct them concerning the invocation of saints, the honor due to their relics, and the lawful use of images, according to

the doctrine of the Church, the consent of the fathers, and the decrees of the councils; to teach them that the saints offer up prayers for men, and that it is useful to invoke them, and to have recourse to their prayers and help. It further condemns those who maintain that the saints in rest ought not to be invoked, that they do not pray for men, that it is idolatry to invoke them, that it is contrary to Holy Scripture, etc., and that their relics and their tombs ought not to be venerated.

On the subject of images, the council teaches that those of our Lord, the Blessed Virgin, and of the saints are to be placed in churches; that they ought to receive due veneration, not because they have any divinity or virtue in them, but because honor is thus reflected upon those whom they represent. By means of these representations the people are instructed in the mysteries of the faith, and, by thus seeing the good deeds of the saints, are led to bless God, and endeavor themselves to do likewise.

The council then proceeds to anathematize all who hold or teach any contrary doctrine.

Lastly, in order to remedy abuses, it declares that if in any scriptural painting the Divinity is represented under any figure, the people should be warned that it is not intended that the Divinity can be seen by mortal eyes; further, that all things tending to superstition in the invocation of saints, the worship of their relics, and the right use of images should be done away with; that care should be taken not to profane the festivals of the saints, etc.; that no new miracles or relics should be admitted without the bishop's consent, and that any other abuses should be rectified by the bishop and provincial council.

These decrees were followed by one of reformation, consisting of twenty-two chapters, which relate to the regular clergy. After this another decree, in twenty-one chapters, on general reformation, was read.

A decree was also published upon the subject of indulgences to this effect, that the Church, having received from Jesus Christ the power to grant indulgences, and having, through all ages, used that power, the council declares that their use shall be retained as being very salutary to Christian persons and approved by the holy councils. It then anathematizes all who maintain that indulgences are useless, or that the Church has no power to grant them. At the same time, it desires that the ancient custom of the Church be adhered to, and that they be granted with care and moderation, forbidding all trafficking in them.

Further, the council exhorted all pastors to recommend to the observance of all the faithful whatever had been ordered by the Church of Rome, established in this or in any one of the oecumenical councils, and to impress upon them especially the due observance of the fasts and festivals of the Church.

The list of books to be proscribed was referred to the pope, as also were the catechism, missal, and breviaries.

Then the secretary, standing up in the midst of the assembly, demanded of the fathers whether they were of opinion that the council should be concluded, and that the legates should request the pope's confirmation of the decrees, etc. The answer in the affirmative was unanimous with the exception of three. The cardinal-president Morone then dissolved the assembly amid loud acclamations.

In a congregation held on the following Sunday, the fathers affixed their signatures to the number of two hundred and fifty-five—viz. four legates, two cardinals, three patriarchs, twenty-five archbishops, one hundred and sixty-eight bishops, thirty-nine proctors, seven abbots, and several generals of orders.

The acts of the council were confirmed by a bull bearing date Jan. 6, 1564. The Venetians were the first to receive the Tridentine decrees. The kings of France, Spain, Portugal, and Poland also received them in part; and they were published and received in Flanders, in the kingdom of Naples and Sicily, in part of Germany, in Hungary, Austria, Dalmatia, and some part

of South America, also among the Maronites. The Churches of England, Ireland, Scotland, Russia, Greece, Syria, Egypt, etc., reject the authority of this council.

In France the Council of Trent is received generally as to doctrine, but not altogether as to discipline. Various regulations which were deemed incompatible with the usages of the kingdom, the liberties of the Gallican Church, the concordat, and the just authority of the king, were rejected (see Mansi, *Concil.* xiv, 725; Landon, *Manual of Councils*. s. v.).

Literature.—The history of the Council of Trent was written chiefly by two able and learned Catholics.—Fra Paolo Sarpi, of Venice, an almost semi-Protestant monk, *Istoria del Concilio Tridentino* (Lond. 1619; translations in French and German; Engl. transl. by Brent, *ibid.* 1676), in opposition to the papal court, and (against him) cardinal Sforza Pallavicino, *Istoria del Concilio di Trento* (Rome, 1656–57, 2 vols. fol.).

The canons and decrees of the council were first published by Paul Manutius (Rome, 1564), and often since in different languages. The best Latin edition is by Le Plat (1779), and by Schulte and Richter (Leips. 1853); and the best English edition is by Rev. J. Waterworth, with a *History of the Council* (Lond. 1848). The *Catechism*, an authorized summary of the faith drawn up by order of the council, appeared at Rome in 1566. The original acts and debates of the council, as prepared by its general secretary, bishop Angelo Massarelli (6 vols. large fol.), were deposited in the Vatican Library, and remained there unpublished for more than three hundred years, until they were brought to light, though only in part, by Aug. Theiner, in *Acta Genuina SS. Ecum. Concilii Tridentini nunc primum integre edita* (Lips. 1874, 2 vols.). The most complete collection of the official documents and private reports bearing upon the council is that of Le Plat, *Momms. ad Histor. Conc. Trident.* (Lovan. 1781–87, 7 vols.). New materials were brought to light by Mendham (1834 and 1846) from the MS. history by cardinal Paleotto; by Sickel, *Actenstücke aus österreichischen Archiven* (Vienna, 1872); and by Dr. Dollinger, *Ungedruckte Berichte und Tagebücher zur Geschichte des Conc. von Trident* (Nördlingen, 1876, 2 pts.). Among Protestant historians of the Council of Trent are Salig (1741–45, 3 vols.); Danz (1846); Buckley (Lond. 1852); and Binghamer (Paris, 1854; Engl. transl. N. Y. 1855). On the Tridentine standards see Schaff, *History of the Creeds of Christendom* (1876), i. 90 sq. See, in general, also Cunningham, *Hist. Theol.* (see Index); Hagenbach, *Hist. of Doctrines* (see Index); Mosheim, *Eccles. Hist.* vol. iii (Index). In particular see *The Council of Trent and its Proceedings* (Presb. Board of Publication, Phila. 1835, 18mo); Pallavicino, *Hist. du Conc. de Trente* (Montrouge, 1844, 3 vols. 8vo); Dupin, *Hist. du Conc. de Trente* (Brussels, 1721, 2 vols. 4to); Salig, *Vollst. Hist. des Tr. Conc.* (Halle, 1741, 3 vols. 4to); Courayer, *Hist. de la Reception du Conc. de Trente* (Amst. 1756). See COUNCILS.

Trental, an office for the dead in the Latin Church, consisting of thirty masses on thirty consecutive days.

Trepalum, a name given to the rack used for examining witnesses by torture. According to canon 33, Council of Tarragona, presbyters and deacons were forbidden to stand at the Trepalum while persons were tortured. See Bingham, *Christ. Antiq.* bk. xviii, ch. v, § 34.

Trespas (עֲוֹן, *guilt*; παράπτωμα) is an offence committed, a hurt, or wrong done to a neighbor; and partakes of the nature of an error or slip rather than of deliberate or gross sin. Under the law, the delinquent who had trespassed was of course bound to make satisfaction; but an offering or oblation was allowed him to reconcile himself to the Divine Governor (Lev. v, 6, 15). Our Saviour teaches us that whoever does not forgive the trespasses of a fellow-man against himself is not to expect that his Father in heaven will forgive his trespasses (Matt. vi, 14, 15).

Trespass-offering (עֹלָה, *ashām*, once [Lev. vi, 5] fem. עֹלָה, which properly denotes the act of trespass, as elsewhere). This sacrifice was offered for individuals only, and chiefly for such transgressions as were not punishable by the laws of the State (vii, 19). The victim sacrificed was different on different occasions. 1. A trespass-offering was brought when a person did not inform of a crime committed by another (v, 1); when a person had touched any unclean object, and had omitted the sacrifice of purification (ver. 2, 5); when a person had, through forgetfulness, neglected to fulfil his rash vow. In each of these cases the offering was a ewe or a she-goat; or, if the sacrificer were poor, it might consist of doves or fine flour, without oil and incense (ver. 4–13). 2. When a person had, through mistake, applied to a common purpose anything which had been consecrated to a holy use (ver. 10, 16; xxii, 14), or had in any way violated an engagement, or denied stolen property, or concealed any lost thing which he had found. In these cases the offering was a ram, and the restoration of the alienated property, with one fifth of the value; in the former case to the priest, in the latter to the owner or his heirs (vi, 2–7). 3. When any person had, through ignorance, done something forbidden, the victim was a ram (v, 17, 18). 4. When a man had a criminal connection with a betrothed female slave (xix, 20–22), or had, in later times, contracted an idolatrous marriage, the victim was a ram (Ezra x, 19). So also a Nazarite who had contracted defilement by touching a dead body (Numb. vi, 9–12), and a leper who had been healed, were to bring a lamb for a trespass-offering (Lev. xiv, 12, 24). In this offering the victim was slain on the north side of the altar, the blood sprinkled round it, and the pieces of fat burned upon it. See SIX-OFFERING.

Among the Hebrews trespass-offerings, like all other expiatory sacrifices, were symbolical representations of the great work, for the effecting of which the Messiah was promised to fallen man (Psa. xl, 6, 8; Heb. viii, 3; ix, 14, 26, 28; x, 5, 10). As it was the design of the Mosaic law to remind the Hebrews that they were guilty of sin and liable to death, so every sacrifice was a memorial of this mournful truth, as well as a type of the work of our Redeemer. When a Hebrew had committed a trespass against the divine law, providing the transgression was such as admitted an expiation, he had to offer the requisite sacrifices before he could be restored to his civil privileges. With this a mere worldly-minded Hebrew was content; but, as no mere animal sacrifice could make atonement for sin, to the sincere believer the sacrifice was only the symbol and type of something spiritual. It reminded him that his sins had not only excluded him from the divine favor, but that he deserved death and subsequent agony; it directed him to the need of a sacrifice for sin ere God would forgive his transgression; and it assured him that, just as by sacrifice he had been restored to his civil and political rights, so by faith in the great sacrifice for sin on the part of the lamb of God might he be restored to the divine favor, and to a place in that spiritual kingdom of which the Hebrew nation was the type. See PROPITIATORY SACRIFICES.

Treuenfels, ABRAHAM, a Jewish rabbi and doctor of philosophy of Germany, was born at Detmold in the year 1818. After visiting the gymnasium of that place, he went, in 1837, to Hanover, where he studied under Dr. Adler (now chief rabbi of England). In 1839 he pursued a course of studies at the Bonn University, and completed his Rabbinical education at Frankfurt. In 1844 he was appointed rabbi at Weilburg, in Nassau, and in 1860 he was called to Stettin, where he died, Jan. 30, 1879. He published, *בְּרֵאשִׁית זֵנוּת, oder die kleine Genesis griechisch und deutsch, und mit Anmerkungen, in der Literaturblatt des Orientes*, 1846, No. 129:—*Über*

den *Bibelcanon des Flavius Josephus* (1849). But his literary activity was chiefly displayed in the *Israelitische Wochenschrift*, which he published in connection with Dr. M. Rahmer. (B. P.)

Treves, COUNCILS OF (*Concilium Treverense*), take their name from Treves, a town of Rhenish Prussia, in which they were held. The town is situated on the right bank of the Moselle, and had in 1871 a population of 21,442. It is a decayed place, noted for its ultramontanist. The cathedral contains many relics—the principal one being the Holy Coat of Treves—and Roman remains. It has a priestly seminary, a gymnasium, a library of 100,000 volumes, a museum full of valuable antiquities—including the famous *Coder Aureus*, or MS. of the Gospel in gold letters, presented to the Abbey of St. Maximin by Ada, sister of Charlemagne.

I. The First Council was held in 948. The legate Marinus, the archbishop of Treves, and several bishops here excommunicated Hugo, count of Paris, and two pretended bishops, made by Hugo, the pseudo-archbishop of Rheims. See Mansi, *Concil.* ix, 632. See INGELHEIM.

II. The Second Council was held in 1518 by John, count of Isenbourg, archbishop of Treves, who presided. Ten chapters, and a decree against the concubinary clergy, were published. See Mansi, *Concil.* xiv, 606.

III. The Third Council was held by John, archbishop of Treves, in 1549. Twenty canons were published.

1. Forbids to believe, hold, or teach any other than the Roman doctrine.

2, 3, 4. Of preachers.

6. Orders that the hours be duly said by clerks, and that those who cannot attend at the time in the choir shall say them privately.

9. Of the celebration of the mass.

10. Provides for lessening the number of festivals, and gives a list of those which shall in any case be retained.

11, 12. Of the religions and their houses.

15. Of schools.

17, 18. Of the immunity of churches.

19. Of the life and deportment of the clergy.

20. Provides that the heads of monasteries and colleges, and others of the clergy, shall be supplied with a copy of these canons.

See Mansi, xiv, 705.—Landon, *Manual of Councils*, s. v.

Treves, HOLY COAT OF. See HOLY COAT OF TREVES.

Trevett, BASSETT, D.D., a clergyman of the Protestant Episcopal Church, was a native of New York. He was ordained in 1841, became professor of languages in St. James's College, Maryland, in 1843, and occupied the same position in St. John's College, Annapolis, Md., being elected thereto in 1855. Subsequently he became rector of St. James's Church, North Salem, N. J., a position which he held at the time of his death, March 8, 1865. See *Amer. Quar. Church Rev.* July, 1865, p. 321.

Trial, a term used in Scripture only in the sense of *testing* (usually some form of תִּבְּחָה, *dokekh* or *dokekhon*; but once תִּבְּחָה, Job ix, 23, elsewhere "temptation" [q. v.]; and so πείρα, Heb. xi, 36; πύρωσις, "fiery trial," 1 Pet. iv, 12, lit. *burning*, as elsewhere rendered), to denote painful circumstances into which persons are brought by divine Providence with a view to illustrate the perfections of God, bring to light the real character of those who are thus tried, and by the influence of temporal suffering, which shows the transitory nature and uncertain tenure of all earthly advantages, to promote their eternal and spiritual interests. See TEMPT.

TRIAL, CHURCH. See EXCOMMUNICATION.

TRIAL, FORENSIC (denoted in Heb. by דָּוָר, *to hold a court*, while מִשְׁפָּט is the *sentence* rendered by the judge, whether favorable or adverse, both terms being usually rendered "judgment" in the A. V.; Gr. κρίσις). Originally the head of the family was the umpire among the Hebrews, with the power of life and death (comp. Deut. i, 16). Later the elders (q. v.) succeeded to a similar authority. According to the Mosaic law, there

were to be judges in all the cities, whose duty it was to exercise judicial authority over the surrounding neighborhood. Weighty causes were submitted to the supreme ruler. Originally trials were everywhere summary. Moses, in his laws, did not establish any more formal or complicated method of procedure. He was, nevertheless, anxious that strict justice should be administered, and therefore frequently inculcated the idea that God was a witness (Exod. xx, 21; xxiii, 1-9; Lev. xix, 15; Deut. xxiv, 14, 15). In ancient times, the forum or place of trial was in the *gates* of cities (Gen. xxiii, 10; Deut. xxi, 19). In the trial the accuser and the accused appeared before the judge or judges (xxv, 1), and both the implicated parties stood up. The witnesses were sworn, and in capital cases also the parties concerned (1 Sam. xiv, 37-40; Matt. xxvi, 63). In order to establish the accusations, two witnesses were necessary, and, including the accuser, *three*. The witnesses were examined separately, but the accused person had the liberty to be present when they gave their testimony (Numb. xxxv, 30; Deut. xvii, 1-15; Mark xxvi, 59). The sentence was pronounced soon after the completion of the examination, and the criminal, without any delay, even if the offence was a capital one, was taken to the place of punishment (Josh. vii, 22; 1 Sam. xxii, 8; 1 Kings ii, 23). See L'Empereur, *De Legibus Hebræorum Forensibus* (Lugd. 1637); Ziegler, *De Juribus Iudæorum* (Vitæb. 1684). See JUDGE.

The following remarks respecting certain special instances of judicial proceedings in the New Test. are taken from Smith's *Dict. of the Bible*:

1. The trial of our Lord before Pilate was, in a legal sense, a trial for the offence *læse majestatis*—one which, under the Julian law, following out that of the twelve tables (*Digest*, iv, 1, 3), would be punishable with death (Luke xxiii, 2, 38; John xix, 12, 15). See JESUS CHRIST.

2. The trials of the apostles, of Stephen, and of Paul before the high-priest were conducted according to Jewish rules (Acts iv; v, 27; vi, 12; xxii, 30; xxiii, 1). See STEPHEN.

3. The trial, if it may be so called, of Paul and Silas at Philippi was held before the *duumviri*, or, as they are called, *στρατηγοί*, prætors, on the charge of innovation in religion—a crime punishable with banishment or death (Acts xvi, 19, 22). See SERGEANT.

4. The interrupted trial of Paul before the proconsul Gallio was an attempt made by the Jews to establish a charge of the same kind (Acts xviii, 12-17, see Conybeare and Howson, i, 492-496).

5. The trials of Paul at Casarea (Acts xxiv, xxv, xxvi) were conducted according to Roman rules of judicature, of which the procurators Felix and Festus were the recognised administrators. (1.) In the first of these, before Felix, we observe (*a*) the employment by the plaintiffs of a Roman advocate to plead in Latin [see ORATOR]; (*b*) the postponement (*ampliatio*) of the trial after Paul's reply (see Smith, *Dict. of Class. Antig.* s. v. "Judex"); (*c*) the free custody in which the accused was kept, pending the decision of the judge (Acts xxiv, 23-26). (2.) The second formal trial, before Festus, was probably conducted in the same manner as the former one before Felix (xxv, 7, 8), but it presents two new features: (*a*) the appeal, *appellatio* or *provocatio*, to Cæsar by Paul as a Roman citizen. The right of appeal *ad populum*, or to the tribunes, became, under the empire, transferred to the emperor, and, as a citizen, Paul availed himself of the right to which he was entitled, even in the case of a provincial governor. The effect of the appeal was to remove the case at once to the jurisdiction of the emperor (see Conybeare and Howson, ii, 360; Smith, *ut sup.* s. v. "Appellatio;" *Digest*, xlix, 1, 4). (*b*) The conference of the procurator with "the council" (Acts xxv, 12). This council is usually explained to have consisted of the assessors, who sat on the bench with the prætor as consilarii (Sueton. *Tib.* 33; Grotius,

On Acts xxi; Conybeare and Howson, ii, 358, 361). But, besides the absence of any previous mention of any assessors (see below), the mode of expression *συνελεύσεις μετὰ τοῦ συμβουλίου* seems to admit the explanation of conference with the deputies from the Sanhedrim (τὸ συμβ.) Paul's appeal would probably be in the Latin language, and would require explanation on the part of the judge to the deputation of accusers before he carried into effect the inevitable result of the appeal, viz. the dismissal of the case so far as they were concerned. See *PART.*

6. We have, lastly, the mention (Acts xix, 38) of a judicial assembly which held its session at Ephesus, in which occur the terms *ἀγοραῖοι* (i. e. *ἡμέτεροι ἀγορεύται* and *ἀνθύπατοι*. The former denotes the assembly, then sitting, of provincial citizens forming the conventus, out of which the proconsul, *ἀνθύπατος*, selected "judices" to sit as his assessors. The *ἀνθύπατοι* would thus be the judicial tribunal composed of the proconsul and his assessors. In the former case, at Caesarea, it is difficult to imagine that there could be any conventus and any provincial assessors. There the only class of men qualified for such a function would be the Roman officials attached to the procurator; but in Proconsular Asia such assemblies are well known to have existed (Smith, *Dict. of Class. Antig.* s. v. "Provincia").

Early Christian practice discouraged resort to heathen tribunals in civil matters (1 Cor. vi, 1). See *PENITENTMENT*.

Trial Sermon. See *TRIALS*.

Trials, the name given in ecclesiastical diction to those discourses delivered before the presbytery by students who have finished their course, and are seeking to be licensed to preach. These discourses are a sermon, a lecture, a homily, an exegesis or exercise with additions, and a thesis. There are also examinations on systematic theology and practical piety, on Church history, and on the Greek and Hebrew Scriptures.

Triangle Controversy, *THE*, was a dispute occasioned by *The Triangle*, a book by Samuel Whelpley (1816) against limited atonement, inability, and immediate imputation. The controversy led to the trial of Albert Barnes and of Lyman Beecher for alleged heresy, and finally to the disruption of the Presbyterian Church in 1837. See Hagenbach, *Hist. of Doct.* ii, 442.

Tribe (בְּרִיָּה and מִטְבֵּה, both originally meaning a rod or branch: *φελή*) is the name of the great groups of families into which the Israelitish nation, like other Oriental races, was divided. The modern Arabs, the Bedawin, and the Berbers, and also the Moors on the northern shores of Africa, are still divided into tribes. The clans in Scotland are also analogous to the tribes of the ancient Israelites. The division of a nation into tribes differs from a division into castes, since one is a division merely according to descent, and the other superadds a necessity of similar occupations being prevalent among persons connected by consanguinity. There occurs, however, among the Israelites a caste also, namely, that of the Levites. In Gen. xlix the tribes are enumerated according to their progenitors; viz. 1, Reuben, the first-born; 2, Simeon, and 3, Levi, instruments of cruelty; 4, Judah, whom his brethren shall praise; 5, Zebulun, dwelling at the haven of the sea; 6, Issachar, the strong; 7, Dan, the judge; 8, Gad, whom a troop shall overcome, but who shall vanquish at last; 9, Asher, whose bread shall be fat; 10, Naphtali, giving goodly words; 11, Joseph, the fruitful bough; 12, Benjamin, the wolf; all these were originally the twelve tribes of Israel (see Allin, *Prophecies of the Twelve Tribes* [Lond, 1855]). In this enumeration it is remarkable that the subsequent division of the tribe of Joseph into the two branches of Ephraim and Manasseh is not yet alluded to. After this later division of the very numerous tribe of Joseph into the two branches of Ephraim and Manasseh had taken place, there were, strictly speaking, thirteen tribes. It was, however, usual to view them as

comprehended under the number twelve, which was the more natural, since one of them, namely, the caste of the Levites, did not live within such exclusive geographical limits as were assigned to the others after they exchanged their nomadic migrations for settled habitations, but dwelt in towns scattered through all the other twelve tribes. It is also remarkable that the Ishmaelites, as well as the Israelites, were divided into twelve tribes; and that the Persians also, according to Xenophon (*Cyropædia*, i, 2, 4 sq.), were similarly divided. Among other nations also occur ethnological and geographical divisions, according to the number twelve. From this we infer that the number twelve was held in so much favor that, when possible, doubtful cases were adapted to it. An analogous case we find even at a later period, when the spiritual progenitors of the Christian *ἐκκλησία*, or the apostles, who were, after the death of Judas, the election of Matthias, and the vocation of Paul, really thirteen in number, were, nevertheless, habitually viewed as twelve; so that wherever, during the Middle Ages, any division was made with reference to the apostles, the number twelve, and not thirteen, was adopted, whether applied to the halls of theological libraries, or to the great barrels of costly wines in the cellar of the civic authorities at Bremen. Concerning the arrangement of these tribes on their march through the wilderness, in their encampments around the ark, and in their occupation of the land of Canaan, see the cognate articles, such as *EXODE*; *ENCAMPMENT*; *GENEALOGIES*; *LEVITES*; *WANDERING*; and the names of the several tribes. We confine ourselves here to two points.

1. *The "Lost Tribes."*—This has been an inexhaustible source of theologicohistorical charlatanism, on which there have been written so many volumes that it would be difficult to condense the contradictory opinions advanced in them within the limits of a moderate article. Suffice it to say that there is scarcely any human race so abject, forlorn, and dwindling, located anywhere between the Chinese and the American Indians, who have not been stated to be the ten tribes which disappeared from history during and after the Babylonian captivity. If the books written on the ten tribes contained much truth, it would be difficult to say where they are not.

The truth, however, of the matter seems rather to be as follows. After the division of the Israelites under Jeroboam and Rehoboam into the two kingdoms of Judah and Israel, the believers in whom the feelings of ancient theocratic legitimacy and nationality predominated, and especially the priests and Levites, who were connected by many ties with the sanctuary at Jerusalem, had a tendency to migrate towards the visible centre of their devotions; while those members of the tribes of Judah and Benjamin who had an individual hankering after the foreign fashions adopted in Samaria, and the whole kingdom of Israel, had a tendency externally to unite themselves to a state of things corresponding with their individuality. After the political fall of both kingdoms, when all the principal families connected with the possession of the soil had been compelled to emigrate, most Israelites who had previously little feeling for theocratic nationality gradually amalgamated by marriages and other connections with the nations by which they were surrounded; while the former inhabitants of the kingdom of Judah felt their nationality revived by the very deprivation of public worship which they suffered in foreign lands. Many of the pious members of those tribes which had formerly constituted the kingdom of Israel undoubtedly joined the returning colonies which proceeded, by permission of the Persian monarchs, to the land of their fathers. However, these former members of the other tribes formed so decidedly a minority among the members of the tribe of Judah that henceforth all believers and worshippers of Jehovah were called יְהוּדִים, *Ἰουδαῖοι*, *Judaî*, Jews. Thus it came

to pass that the best, although smaller, portion of the ten tribes amalgamated with the Jews, some of whom preserved their genealogies till after the destruction of Jerusalem; while the larger proportion of the ten tribes amalgamated with the Gentiles of Central Asia, to whom they probably imparted some of their notions and customs, which again were, in a state more or less pure, propagated to distant regions by the great national migrations proceeding from Central Asia. We are glad to find that this, our historical conviction, has also been adopted by the most learned among the Jews themselves (see Jost, *Allgemeine Geschichte des israelitischen Volkes* [Berlin, 1832], i, 407 sq., 416 sq.).—Kitto, *See CAPTIVITY*.

II. *Boundary-lines of the Tribes Identified*.—This topic has usually been abandoned by commentators as hopeless. Keil (*Comment. on Josh.*) is really the only one who has seriously grappled with its difficulties, some of which even he is compelled to pronounce insoluble. See each tribe in its alphabetical place.

1. *Reuben*.—On the south, being the southern boundary of the trans-Jordanic tribes, beginning at the mouth of the river Arnon (Wady el-Möjeb) on the Dead Sea; thence along the Arnon to Aroer (Arair) (Josh. xiii, 16); thence along the south-eastern boundary of the trans-Jordanic tribes (which extended as far as the "plain" or tableland stretching eastward from Jordan [xli, 1], being that containing Medeba and Dibon [xiii, 9]) (north-easterly along the Wady Enkheileh to Lejäm); thence along the eastern boundary of the trans-Jordanic tribes (east of the ruins of El-Herrî); then with an inclination west of north so as to exclude Jazer (ver. 25) (Seir), also Rabbath-ammon (2 Sam. xi, 1) (to a point below Jebelha which was excluded, probably being the Jogbehah of the Gadites, Numb. xxxii, 35); thence entirely south of Gilead (Josh. xiii, 25) (directly west, down the wadies Naur and Hesban), excluding Beth-haran (Beit-haran) (ver. 27) and Atroth-shophan (near Merjakkeh) (Numb. xxxii, 35), but including Heshbon (Hesban), Elealeh (El-'Al), Bamoth (comp. xxi, 19, 20) (probably Jebel Hameh), and Nebo (now discovered in Jebel Neba) (xxxii, 37; Josh. xiii, 17); thence southerly along the Jordan to the place of beginning (ver. 23).

2. *Gad*.—On the south, following the northern line of Reuben from the Jordan to the eastern boundary of the trans-Jordanic tribes (at Jebelha); thence north by east along the eastern boundary of the trans-Jordanic tribes (around the northern brow of Jebel Zerka) (to a point opposite Jerash (Gerasa) between Jebel Zerka and Jebel Kafkaka); thence in a north-westerly direction across the region of Gilead (Josh. xiii, 25, 31), passing near Mahanaim (ver. 26, 30) (Mabneh), to the southern extremity of the sea of Cinnereth (sea of Galilee) (ver. 27), with the Jordan for the western boundary.

3. *Manasse East*.—On the south, following the northern line of Gad to its intersection with the eastern boundary of the trans-Jordanic tribes (at the opening of the valley between Jebel Zerka and Jebel Kafkaka, with the plain lying east of the latter); thence north-easterly along the boundary of the trans-Jordanic tribes (in a direct line across the last-named plain, over the northern end of Jebel es-Zumle, and partly across the plain of the Hauran), and again along the same boundary with a northerly and north-westerly curve through the plain of Bashan (Josh. xiii, 30) (i. e. the Hauran), so as to include Edrei (which may be Draa or Dera) (ver. 31), and so on north-westerly to the vicinity of Mount Hermon (ver. 11) (i. e. Jebel es-Sheikh, where the northern line probably followed the present boundaries of the Arab clans along the top of the Hermon range to its junction with Wady el-Teim at Hasbeyah); where it joined the northern boundary of the cis-Jordanic tribes at the "entrance into Hamath" (Numb. xxxiv, 8); thence southerly along the sources of the Jordan (down Nahr el-Banias and its brook), through the Lake of Merom, the upper Jordan, and the sea of Galilee, to the place of beginning (ver. 10-12).

4. *Judah*.—On the south, the southerly boundary of Canaan, beginning on the border of Edom, at the southern bay of the Dead Sea, southward (along the Ghor) past the ascent of Acrabbim, near the desert of Zin (the Wady el-Jeib or the Arabah), to the vicinity of Kadesh-barnea (Ain-weibeh or Ain-hasb) (Josh. xv, 1-3; Numb. xxxiv, 2-4); thence westward to Hebron, along the southern boundary of Canaan (perhaps through Wady Fikreh) (where we may assign a location) to Adar of Hazar-addar; thence westerly around (perhaps by wadies Maderah and Marreh) to Karkaa (perhaps in this latter), then still westerly to Azmon (possibly in the vicinity south of the ancient Elusa); thence north-westerly (perhaps by Wady en-Abiya) to "the river of Egypt" (or El-Arish), and so on to the Mediterranean, which formed the western boundary of Palestine (Josh. xv, 3, 4, 12; Numb. xxxiv, 4, 6). See

Quar. Statement of "Pal. Explor. Fund," p. 63 sq.; April, 1874, p. 68, 82; July, 1874, p. 190.

On the north, beginning at the northern bay of the Dead Sea (which formed the eastern boundary), where the Jordan empties into it (see this whole line in Josh. xv, 5-12, and inversely in xvii, 14-20); obliquely across the plain of the Jordan to Beth-hoglah (Ain-hajla), thence to Beth-arabah (at first included, but afterwards excluded) (thence situated probably at the present Kurs Hajla); thence to the stone of Bohan (apparently very near the last place, and on the eminences in the side of Wady Dabus); thence (westerly) in the direction of Debir (which must therefore be placed on the west side of Wady Dabus [near its head], which last the boundary crossed, as expressed by coming) from the valley of Achor, thence northward towards Gilgal or Gelloth (which is explained as being in front of the ascent to Adummim (apparently lying on the hills skirting the Jordan just west of Gilgal, to which the access would be by the valley on the south side of Jebel el-Fasea; Adummim [probably at ed-Dum es-Sumreh] being further described as lying on the south side of the "river," probably Wady Kelt); thence to the waters of En-shemesh (probably the "fountain of the apostles," on the road between Bethany and Jericho); thence (across the Mount of Olives by way of Bethany) to En-rogel (the well of Job near Jerusalem); thence around the valley of Hinnom (but at a later date across Mount Moriah, which David purchased, and north of Jebus, which he conquered, and thus acquired both for Judah), through the valley of Gihon to the hill at its north-western end, bounding the plain or valley of Rephaim west of the city; thence along the ridge of this elevated plain or "hill" to the fountain of Nephtoah (probably 'Ain Yalo in Wady el-Werd, which last it probably followed after crossing the "giants' plain;" for it must have bent considerably to the south, since it passed near Rachel's sepulchre, now Kubbet Rahil, between Jerusalem and Bethlehem [cf Sam. x, 2]); thence in the direction of Mount Ephron (lying considerably northward of this vicinity, although among its "cities" may properly have been reckoned Kirjath-jearim; this line being probably carried through Wady Bittir, then by Wady Safaf, due north) to Kirjath-jearim (otherwise Baalah or Kirjath-baal) (now Kuryet el-Enab); thence west (across the intervening valley occupied by the Beni-nelik in the direction of Yalo) to the ridge of Seir (perhaps indicated by the modern Saris); thence (south-westerly along this mountain) to a more southern spur called Mount Jearim (just across Wady Ghûrah), where is located Kesla, the representative of Chesalon (or Chesulloth); thence (still keeping south-westerly along the same range of hills, between Zanoah [Zanna], and Zorah [Sûra], the last of which was afterwards assigned to Dan, with several other cities on this part of the boundary [Josh. xiv, 41 sq.]) to En-shemesh (or Ir-shemesh) (now Ain-shems); thence (a little south of Wady Sarur) near Timnath (Tîbneh) and Ekron ('Akir) (the last three towns being finally reckoned as belonging to Dan), and so on to the Mediterranean, passing successively Shicron (perhaps Beit-sit), next Mount Baalah (possibly Tell Hermes), and finally Jabneh (elsewhere Jabneh [now Yebnah] (but eventually deserting the Nahr Rubin a little beyond its junction with Wady Marribah, and running thence south-west so as to include Gederah [Gheterah], but exclude Jabneh and Bene-berak [Burka], reaching the sea by Wady Sumt).

Of Judah only are there any distinct and regular subdivisions given (for Keil's arrangement of the towns of Simeon in four groups according to Josh. xv, 21-32 (*Comment.* ad loc.) is not justified by the parallel passage Josh. xix, 2-8, nor by the analogy of enumeration in the case of the other subdivisions of Judah [xv, 53-62] and Benjamin [xvii, 21-25], nor with the Masoretic punctuation ["and" being omitted only between different designations of the same locality], nor, finally, with the actual juxtaposition of the sites). The southernmost section (stretching apparently entirely across from the Dead Sea to the Mediterranean) constituted the territory of Simeon, including (as appears from a comparison of Josh. xv, 21-32 with xix, 1-8) twenty-nine (strictly twenty-six) cities (namely, Kabzeel, Eder, Jagur, Kina, Dimonah, Adadah, Kedesh [Kadesh-barnea], Hazor, the twofold town Ithnan-Ziph [Zephath] with its neighboring ruins, Hormah [? Hazar-addar], Telem, Sheva or Sheba [Hazar-shual], Moladah, Heshton [Azmon], Beth-pater, Beer-sheba, the twin-towns Bealoth or Balah [Ramath-nekeb] and Biz-jothjah-baaloh or Baalath-beer [Lehi], Iim, Azem, Eltolah, Chesil or Berhal, Ziklag, Madmannah, or Beth-madaboth, Sansannah or Hazar-susah, Lebaoth or Beth-lebaoth, Shilhim or Sharuhim, and the double town Ain-rimmon or En-rimmon), besides three villages dependent upon two of these (namely, Hazor-hadattah and Kerioth-bezron or Hazor-amun [belonging to Hazor proper], and Hazar-gaddah [to Hazar-shual]), and in addition two of the towns in the plain (namely, Ether and Ashan), with others doubtless not here enumerated. The plain district or "valley" was again subdivided into four sections—the first comprising (originally) fourteen towns (Gederah and Gederothaim being the same), situated in the north-western corner of the tribe; the second comprising sixteen towns, situated immediately south of this, in the western part of the tribe;

the third comprising nine towns (two of which, as above, were afterwards set off to Simeon, doubtless lying on the southern boundary between the tribes), situated east of the last group and south of the preceding, in the middle of the tribe, east of the road leading from Eleutheropolis to Jerusalem; the fourth comprising the five principal Philistine towns, situated on the extreme west of the tribe along the Mediterranean coast (Ekron being really in Dan, and Gath-mizpeh in the "valley"). The highland district, or "mountains," was likewise subdivided into five groups—the first containing eleven chief towns, situated along the border of Simeon in the middle; the second containing nine chief cities, situated immediately north of the foregoing in the southern part of the tribe around Hebron; the third containing ten metropolitan towns, situated immediately east of the two preceding; the fourth embracing six principal cities, situated immediately north of the last two groups, as far as Jerusalem, on the northern boundary; and the fifth containing only two metropolitan towns, situated in the northern medial angle between the last-named group and the valley district. The remaining districts embraced the desert tract or "wilderness" along the Dead Sea, and included six chief towns (Beth-arabah being in Benjamin). The remarkable addition in the Septuagint (at ver. 59) of eleven cities (namely, Tekoa, Bethlehem, Phagor, Etam, Kulon, Tatam, Saris, Karem, Gallim, Bether, and Mennuchah), probably real localities (see each in its place), is perhaps entitled to a place in the genuine text, and would indicate a group between the third and fourth above, reaching to Jerusalem (Kulon, Saris, and Gallim being in Benjamin).

5. *Simeon*.—This tribe had a portion set off from the above bounded territory of Judah (Josh. xix, 1-8), embracing some seventeen or twenty cities (according as we make several in the list identical or different), of which only two or three have been located with any degree of definiteness, namely, Beer-sheba (probably Bir-es-Saba), Moladah (perhaps el-Mil), and Hormah (or Zephath, possibly represented by the pass es-Sufa); this much only is evident, that they all lay on the extreme south of Judah, and we shall therefore probably be not far from correct if we draw the dividing line between Judah and Simeon west by north from the Dead Sea at Massada, up Wady Sebbek, thence across in the same direction from Ehdelt, just south of Arad (Tell Arad) and Jattir (Attir), to the junction of Wady Khameilifeh with Wady Khulil; thence still in the same direction up the former of these wadies to the summit of the mounts of Judah; thence west by south (along Wady Sheriah) to the Mediterranean, a short distance south of Gaza (Ghuzzeh).

6. *Benjamin*.—On the north, following the boundary of Ephraim (Josh. xvi, 1-3, 6, 7; xviii, 11-13), beginning at the Jordan opposite Jericho (probably at the mouth of Wady Nuwaimeh); thence (across the plain of the Jordan along this wady) to the northward of Jericho (ver. 12) (so as to include Zemaraim [es-Sumrah], ver. 22); thence northward (ver. 12) by the water east (i. e. north-east) of Jericho (xvi, 1) (perhaps Ras el-Ain, which discharges its water in that direction) through the mountains (xviii, 12) desert (xvi, 1) of Beth-aven (Beni-salim) (xviii, 12), that extends from Jericho to the hilly region of Beth-el (xvi, 1)—a description that appears to apply as well as any to the plain north-west of Jebel Kirantal (Mt. Quarantania), the northern part of which the line would partly traverse, so as to include (xviii, 23, 24) Ophrah (perhaps el-Tayibeh) and Ophni (probably Jifna) (probably up Wady el-Aneih) as it ascended Wady Habis, passing Naarah (xvi, 7, Naarah-Naaron) on the way, which lay east of Beth-el (1 Chron. vii, 25) (perhaps at el-Nejenieh); from Bethel (now Beitin) (which, being included in Benjamin, the expression "to the side of Luz southward" [Josh. xviii, 13] must be interpreted as indicating that the line ran between Bethel on the south and the ancient site of Luz a little to the north, the two spots being distinguished in Josh. xvi, 2, although occupying the same vicinity) the line passed (directly south-west along the Nablus road, west of Bireh [Beeroh], passing Archi (situated perhaps at the ruined Keir-mus-r) (xvi, 2) to Atoath (called also Atoath-adar or Atoath-addar), in a lower spot near the hill on the south side of Beth-horon the lower (xviii, 13), yet with some interval to the east of this last place (xvi, 3), and at the southern extremity of this part of the line between Ephraim and Benjamin (that faced the east), not far from Beth-horon the upper (ver. 5), and west of Naarah on that part of the same line near the Jordan (i. e. facing the south) (ver. 7); indications that all point to some site (for but one place of the same name seems to be designated, since these descriptions [ver. 5, 6 last clause, 7] are all of parts of the same southern boundary of Ephraim (the first two clauses of ver. 6, and the whole of ver. 8, however, refer to the northern border, as Keil, in his *Comment.*, admits, although he confesses himself unable to clear up the difficulties of the passage), reckoned first [ver. 5, 6 last clause] westward to Beth-horon, and thence back again [ver. 7] more minutely over the same line and eastward (the Jordan) directly east of Beth-horon (doubtless the A'ara, whose ruins are still found at this point, a little north of the road from Jaffa to Jerusalem; and in that case we must locate "the hill south of Beth-horon the nether" among the eminences opposite Beit Ur el-Tahta, on the

south side of Wady Suleiman, through which this road runs); from Atoath the line ran south-westerly along the Wady Suleiman, so as to include Chephirah (xviii, 26) (probably Keffir, near this road), opposite the hill above described (ver. 14, where the expression rendered "compassed the corner of the sea" appears to signify [as some copies of the Sept. translate] a bend from a seaward [i. e. westerly] direction), and again south-easterly to Kirjath-jearim (thus forming the western side), where it joined the boundary of Judah, which it followed back to the Jordan, and so up to the point of beginning.

The towns of this tribe enumerated in Josh. xviii, 21-28 appear to be classed under two general sections—the twelve in ver. 21-24 lying north and east of Jerusalem, while the fourteen others occupy the more southern and western portion of the territory. At least one of these cities, Kirjath-jearim, was really (eventually) within the limits of the adjoining tribe, Judah (Judg. xviii, 12).

7. *Dan*.—This tribe was bounded by the Mediterranean on the west, and by the tribes of Judah on the south, Benjamin on the east, and Ephraim on the north. (The Danites also conquered from the Canaanites Leshem or Laish, in the extreme northern part of Palestine, within the bounds of Manasseh east, and retained it under the name of Dan.) The only portion unidentified is the northern boundary, which will be considered under Ephraim.

8. *Ephraim*.—The Mediterranean was the western and the Jordan the eastern boundary. The southern boundary has been already defined from the Jordan westward as far as Atoath; from this point it passed westward (to the Jaffa road), in the vicinity of Japhleti (perhaps situated at Beit-Uia; but this word should probably be rendered "the Japhletites," i. e. family of Japhlet, a descendant of Asher (1 Chron. vii, 32, 33), although it is difficult to explain their existence in this location), to Beth-horon the nether (Josh. xvi, 3); thence more northerly (i. e. in a general north-westerly direction) to the Mediterranean (probably along the Jaffa road to Wady Badrus, and thence north on the western brow of the hills to Wady el-Aneih, which it may naturally have followed westward to the sea; for it excluded Baalath [Balat], Jehud [Yehudieh], and Japho [Joppa], xix, 44, 45, but included Beth-horon and Gezer [Abn-churbeh], xxi, 21, 22, passing on the way Gezer (xvi, 3) west of Beth-el (1 Chron. vii, 28) (the other passages where it is mentioned do not help to fix the locality more definitely; lately thought to have been found in Tell Jazer). The remainder of the description of the southern boundary (Josh. xvi, 5, last clause of 6, and whole of 7) is the same as that of Benjamin on the north.

The northern boundary (the account in Josh. xvi, 7, with the exception of the first name, must be transposed so as to connect immediately with the description of the south border in ver. 5), beginning at the Jordan (probably at the mouth of Wady Fm-ah), passed westward (up this wady, otherwise called Wady Mudairah, or Burshek) to Taanath-shiloh (ver. 6) (probably the present Ain-Farfa); thence north-westerly to Tappuah (xvii, 7) (probably the Belad el-Taffue [or Atuf] mentioned by some travellers east of Shechem); thence northerly to Michmethah (xvi, 6; xvii, 7) (apparently at the intersection of the line with Wady Tabas); thence, with a north-westerly curve, to Asher (ibid.) (probably represented by the modern Yasir); thence the line is only given in general terms as extending to the river Kanah on the Mediterranean (xvi, 8; xvii, 9) (no doubt the present Nahr-Falaik, which is the principal marshy stream in that region).

9. *Manasseh West*.—The boundaries of this tribe are given with great indistinctness, and must be in part collected from the contiguous portions of Ephraim, Asher, and Issachar, from which certain towns were set off in addition to its proper territory (Josh. xvii, 11). From the Mediterranean, the northern boundary, beginning at Carmel (for Dor, below Carmel, is included [ibid.; xix, 26]), and following the edge of the mountain (probably along the Kishon [Nahr-el-Mukattah]) south-easterly (as far as Jokneam [Tell-el-Kamon]), and thence keeping the mountain more closely so as to throw the plain of Esdraelon entirely within Issachar (Gen. xlix, 15), so as to include (Josh. xvii, 11) Megiddo (Lejjin), Taanach (Ta'anuk), but so as to exclude (xix, 21) En-gannim (Jenin); thence (with a sharp curve) due north (on the west brow of Mts. Gilboa and Little Hermon), so as to include En-dor (Endur) (xvii, 11), but not Jezreel (Zerin), nor Chesulloth (Iksal), nor Shinnem (Solam) (xix, 18), nor Tabor (ver. 21); thence (with another sharp curve) south-east (probably down Wady Os-keh), so as to include Beth-shean (Beisan) (xvii, 11), to the Jordan, which formed the eastern boundary.

10. *Issachar*.—This tribe was hemmed in on the south by Manasseh West, on the west by Asher, and on the north by Zebulun, leaving only the Jordan as a natural boundary on the east (Josh. xix, 22).

11. *Zebulun*.—In Jacob's dying blessing (Gen. xlix, 13), the territory of this tribe is prophetically described as being suitable for maritime purposes, and as extending along a sea as far as Sidon, which must be explained as meaning that it reached Phenicia, through which latter seafaring people a communication was kept up through the river Kishon and the harbor at Carmel. In Josh. xix, 10-15, the boundaries are definitely laid down thus: Be-

ginning at a place called Sarid, which is nowhere else mentioned in Scripture, but which is here described as situated eastward from the Mediterranean, with high country intervening, one or two stations distant from the river before Jokneam (doubtless the Kishon), also as situated west of Chisloth-tabor, and beyond (i. e. south of) Daberath and Japhia, and finally on the southern boundary (for the northern line is subsequently described); all which details point to some spot about midway on the northern side of the plain of Esdraelon (probably the ruins on the "Mount of Precipitation," near el-Mezraah, on the north-west); thence westward ("towards the sea"), passing Maralah (perhaps at Mujeidil) and Dabbaseth (perhaps the present Jebatā), to the Kishon opposite Jokneam (probably Tell el-Kurnūn); then returning to Sarid, and passing northerly in the general direction of Chisloth-tabor (Iksail) and Daberath (Debūrieh) (leaving these in Issachar), so as on the way to include Japhia (Yafa) (situated on higher ground); thence (northward) facing the east to Gittah-hepher (or Gaib-hepher, 2 Kings xiv, 25) (at el-Meshad) (included within Zebulun) and Ittah-kazin (perhaps the modern Keft Kenna); finally (as regards the southern line) extending (due north) in the direction of Rimmon (that pertains to Neah ("Rimmon-methoar to Neah")) (the former answering doubtless to Rimanah and the latter possibly to Nimrin, the names apparently being associated as adjacent) (and excluding both these, as will appear presently), so as to meet the line of Naphtali in Aznoth-tabor (apparently Kurn Hattin) (Josh. xix, 34). After this the description applies to the northern boundary (for the expression "compasseth it [Rimmon] on the north side" cannot mean that the southern border passed to the north of Rimmon, as this place belonged to Zebulun [1 Chron. vi, 77, which likewise includes Tabor, i. e. apparently Hattin, in the same tribe]), which does not appear to have extended to the Sea of Galilee (since the northern border of Issachar terminated at the Jordan [Josh. xix, 22], and the border of Naphtali, as it included various towns on the southern end of the shore [ver. 35; Matt. iv, 13], as well as Aznoth-tabor [Josh. xix, 34], must have passed up to this last point not far from the Wady Besūn), turning (with a north-westerly sweep) so as to exclude (ibid.) Ilukkok (Yakūk), and, passing (apparently west) along Wady Selameh, so as to include Han-nethon (perhaps Deir Hannah), and running (south-west) to the valley of Jiphthah-el (probably marked by the modern Jefat), where it met the border of Asher (ver. 27).

In the enumeration of the border and interior towns of this tribe (Josh. xix, 10-15), twelve metropolitan cities only are counted, six others (Maralah, Jokneam, Chisloth-tabor, Daberath, Ittah-kazin, and Jiphthah-el) being situated outside the boundary line.

12. *Asher*.—The description of the boundary (Josh. xix, 24-30) begins with a general statement of several towns—Heikath (perhaps Ukreth), Hali (perhaps Alia), Beten (perhaps el-Baueh), Achshaph (probably Kesaf), Alammelech (probably some place on the Wady el-Melek), Amad (perhaps Shefa-amari), and Mishal (probably Misilil)—as lying near the border, which, crossing Carmel, reached to Shihor-libnath (perhaps Wady Milbeh), just above Dor (see xvii, 11), leaving in Naphtali the city of Heleph (probably Beilif); then returning eastward the same line, passing Beth-adon (probably Hajel) and the city of Zebulun (now Alidin) as far as Jiphthah-el, pursued this last valley northward past Beth-enek and Neiel, leaving Cabul (Kabul) on the north, and, including several cities generally described (Iebzon [i. e. Abdon], Rehob, Hammon, and Kanah), ran east of north (doubtless so as to strike the Litany), and then was continued as the northern boundary about opposite Sidon, where (without including the Phœnician sea-coast) it turned south-westerly (as the western border) past Tyre as far as Achzib (Zib).

In the recapitulation of the cities of this tribe (Josh. xix, 25-30), twenty-two metropolitan towns only are reckoned, three others (Jiphthah-el, Sidon, and Tyre) being outside the border, and two other names (Carmel and Shihor-libnath) not being towns.

13. *Naphtali* was bounded by Issachar, Zebulun, and Asher on the south and west, and extended as far as Mount Hermon on the north, and eastward by the sea of Galilee, the Jordan, sea of Merom, and the Damascus road, extending to Judah-upon-Jordan (Tell Naby Sidhuda), and including Beth-hemesh (Medjel es-Sheinas) (Josh. xix, 22). The northerly limits of this tribe are stated in the general boundaries of Palestine (q. v.), laid down in Num. xxxiv, 7-11, as follows: A line from the Mediterranean Sea crossing the mountain-range (Lebanon, or its offshoot Hermon), and intersecting the "entrance to Hamath" (Coele-Syria or the valley of the Leontes) apparently at Zedad (perhaps the present Jedaych); thence to Ziphron (probably another place in the same valley [possibly Kankah]), and so by way of Hazar-euan (perhaps Hasheya) to the edge of the Hamran. From Hazar-euan, the northern boundary bent southward (so as to form in part the eastern boundary), so as to follow substantially the eastern arm of the upper Jordan, taking in successively Shepham (perhaps Caesarea-Philippi; comp. Baal-gad in Josh. xi, 17) and Riblah (not the Riblah of Hamah, but a much more southerly place), east of Aiu

(perhaps the spring of Tell el-Kady), and so on down to the sea of Galilee. The account in Ezek. xlvii, 14-17 (which is evidently a copy of that in Numbers) contains the following additional names: Iethlon, Berothah, Sih-rain, and Hazar-haticon, which (at least the middle two), from their association with Hamath, appear (in this vague enumeration) to have been situated beyond the bounds of the Oriental Promised Land altogether.

In the sum of the cities enumerated in connection with this tribe, nineteen metropolitan towns only are included, five of the names (Allon-zaanaim, Adam-nekeb, Ziddin-zer, Hammath-rakkath, and Migdal-el-Horeb) being double, and two others (Aznoth-tabor and Judah-upon-Jordan) lying outside the border. See PALESTINE.

Tribōlos. See THORNS.

Tribulation (τῆς θλίψεως, both literally signifying *pressure* or *straits*) expresses in the A. V. much the same as *trouble* or *trial*, importing afflictive dispensations to which a person is subjected either by way of punishment (see Judg. x, 14, Matt. xxiv, 21, 29, Rom. ii, 9, 2 Thess. i, 6) or by way of trial (see John xvi, 33; Rom. v, 3; 2 Thess. i, 4).

Tribur (*Concilium Triburense*), COUNCILS OF. Tribur was a royal residence near Mayence, where several Church councils were held.

1. The first council was held in 895. Twenty-two bishops were present, including Hatho, archbishop of Mayence; Herman, archbishop of Cologne, and Ratbode, archbishop of Treves. King Arnulphus also attended, with many of the chief lords of his kingdom. Fifty-eight canons were published.

3. Declares that, with the king's consent, it is ordered that all his nobles shall seize those who refuse to perform the penance due to their offences, and bring them before the bishop.

4. Regulates the manner of disposing of the pecuniary mulct inflicted for wounding a priest: if the latter survived, the whole belonged to him; if he died, it was to be divided into three parts, one for his church, one for his bishop, and one for his relations.

5. Imposes five years' penance for killing a priest, during which time the penitent might not eat meat nor drink wine, except on Sundays and festivals. At the end of the five years he might be admitted into the Church, but not to communion, until the expiration of other five years, during which he was to fast three days in the week.

10. Renews the canon of the Council of Carthage which enacts that a bishop shall not be deposed by fewer than twelve bishops; a priest by fewer than six; nor a deacon by fewer than three.

12. Restricts the solemn celebration of baptism to Easter and Whitsunide.

13. Orders the division of tithe into four portions: 1, for the bishop; 2, for the clerk; 3, for the poor; and, 4, for the fabric.

15. Orders that the dead be buried, if possible, at the cathedral church; if not, at the church belonging to a monastery, in order that they might benefit by the prayers of the monks; otherwise in the church to which they pay tithe.

16. Proves from Scripture that no fee may be taken for burials.

17. Forbids to bury laymen within the church.

18. Forbids chalices and patens of wood.

19. Orders that water be mixed with the wine in the chalice, but that there be twice as much wine as water.

30. Orders all due respect to the sec of Rome, and enacts penalties against those who cause the death of Christians by enchantments.

See Mansi, *Concil.* ix, 438.

II. The second council convened in October, 1076. The pope's legates, with several German lords and some bishops, assembled in council, debated concerning the deposition of the emperor Henry IV, in consequence of which he passed into Italy, and, after the most humiliating concessions, obtained absolution from the pope, Jan. 25, 1077. See Mansi, *Concil.* x, 355.—Landon, *Manual of Councils*, s. v.

Tribute (prop. δῶν, φόρος), an impost which one prince or state agrees, or is compelled, to pay to another, as the purchase of peace or in token of dependence. In the Scriptures we find three forms of this requirement. See TAX.

I. *Native*.—The Hebrews acknowledged no other sovereign than God; and in Exod. xxx, 12, 15, we find they were required to pay tribute unto the Lord, to give an offering of half a shekel to "make an atonement for

their souls." The native kings and judges of the Hebrews did not exact tribute. Solomon, indeed, at the beginning of his reign, levied tribute from the Canaanites and others who remained in the land and were not of Israel, and compelled them to hard servitude (1 Kings ix, 21-23; 2 Chron. viii, 9); but the children of Israel were exempted from that impost, and employed in the more honorable departments and offices of his kingdom. Towards the end of his reign, however, he appears to have imposed tribute upon the Jews also, and to have compelled them to work upon the public buildings (1 Kings v, 13, 14; ix, 15; xi, 27). This had the effect of gradually alienating their minds, and of producing that discontent which afterwards resulted in open revolt under Jeroboam, son of Nebat. "Thy father made our yoke grievous," said the Israelites to Rehoboam; "now, therefore, make thou the grievous service of thy father and his heavy yoke which he put upon us lighter, and we will serve thee" (xii, 4). See **ASSESSMENT**.

II. *Forcign*.—The Israelites were at various times subjected to heavy taxes and tributes by their conquerors. After Judaea was reduced to a Roman province, a new poll of the people and an estimate of their substance were taken, by command of Augustus, in order that he might more correctly regulate the tribute to be exacted (Josephus. *Ant.* xvii, 15). This was a capitation-tax levied at so much a head, and imposed upon all males from fourteen, and all females from twelve, up to sixty-five years of age (Ulpian. *Digest. de Censib.* lib. iii; Fischer. *De Numism. Census*). See **TAXING**.

The Assyrian Tartan, or Chief of Tribute. See **RAHSARIS**.

To oppose the levying of this tribute, Judas the Gaulonite raised an insurrection of the Jews, asserting that it was not lawful to pay tribute to a foreigner, that it was a token of servitude, and that the Jews were not allowed to acknowledge any for their master who did not worship the Lord. They boasted of being a free nation, and of never having been in bondage to any man (John viii, 33). These sentiments were extensively promulgated, but all their efforts were of no avail in restraining or mitigating the exactions of their conquerors. See **JUDAS**.

The Pharisees, who sought to entangle Jesus in his talk, sent unto him demanding whether it was lawful to give tribute unto Caesar or not; but, knowing their wicked designs, he replied, "Why tempt ye me, ye hypocrites?" "Render unto Caesar the things which are Caesar's, and unto God the things that are God's." See **PENNY**.

The apostles Peter and Paul severally recommended submission to the ruling powers, and inculcated the duty of paying tribute, "tribute to whom tribute is due" (Rom. xiii, 1-8; 1 Pet. ii, 13).—**KITTO**.

III. *The Temple Tax*.—The payment of the half-shekel (= half stater = two drachmae) was (as has been said above), though resting on an ancient precedent (Exod. xxx, 13), yet, in its character as a fixed annual rate, of late origin. It was proclaimed, according to Rabbinic rules, on the 1st of Adar, began to be collected on the 15th, and was due, at latest, on the 1st of Nisan (Mishna. *Shekalim*, i, 7; Surenhusius, p. 260, 261). It was applied to defray the general expenses of the Temple, the morning and evening sacrifice, the incense, wood, showbread, the red heifers, the scape-goat, etc. (Mishna. *Shekal*, loc. cit.; in Lightfoot, *Hor. Heb.* on Matt.

xxii, 24). After the destruction of the Temple it was sequestered by Vespasian and his successors, and transferred to the Temple of the Capitoline Jupiter (Josephus. *War*, vii, 6, 6). See **TEMPLE**.

The explanation thus given of the "tribute" of Matt. xvii, 24 is, beyond all doubt, the true one. To suppose, with Chrysostom, Augustine, Maldonatus, and others, that it was the same as the tribute (*κῆνος*) paid to the Roman emperor (Matt. xxii, 17) is at variance with the distinct statements of Josephus and the Mishna, and takes away the whole significance of our Lord's words. It may be questioned, however, whether the full significance of those words is adequately brought out in the popular interpretation of them. As explained by most commentators, they are simply an assertion by our Lord of his divine Sonship, an implied rebuke of Peter for forgetting the truth which he had so recently confessed (comp. Wordsworth, Alford, and others): "Then are the children (*vioi*) free;" Thou hast owned me as the Son of the Living God, the Son of the Great King, of the Lord of the Temple, in whose honor men pay the Temple-tribute; why, forgetting this, dost thou so hastily make answer as if I were an alien and a stranger?—Smith. This explanation, however, hardly does justice to the tenor of the language. Our Lord had not been present at the preceding Passover, and had therefore failed to pay the tax at the regular time and place. Hence he was waited upon in Galilee for that purpose, with some apprehension, perhaps, on the part of the collectors, that he might excuse himself for some reason, or at least neglect to pay. In his reply he asserts his just claim to exemption, not as an alien, but precisely because he was a member of the theocratic family in the highest sense. He was exempt on the broad constitutional ground that a king's son belongs to the royal household for whom tribute is collected, and not by whom it is rendered. Inasmuch as the tax was for the Temple service, Jesus, who was the son of the Lord of the Temple, could not be required to contribute to that expense. Peter is coupled in the payment, but not in the exemption; at least, not on the same ground precisely, but, if at all, on the general principle of association with the royal family. See **TRIBUTE-MONEY**.

Tribute-money (*δίδραχμον*), the Temple-tax levied upon all Jews (Matt. xvii, 24), and likewise (*κῆνος*) the money collected by the Romans in payment of the taxes imposed upon the Jews (xxii, 19). The piece shown to our Saviour at his own request (in the latter passage) was a Roman coin, bearing the image of one of the Caesars, and must have been at that time current in Judaea, and received in payment of the tribute, in common with other descriptions of money. There is no reason to suppose that the tribute was collected exclusively in Roman coins, or that the tribute-money was a description of coin different from that which was in general circulation. See **PENNY**.

As regards the half-shekel of silver paid to the Lord by every male of the children of Israel as a ransom for his soul (Exod. xxx, 13, 15), colonel Leake says "that it had nothing in common with the tribute paid by the Jews to the Roman emperor. The tribute was a denarius, in the English version a penny (Matt. xxii, 17; Luke xx, 24); the duty to the Temple was a didrachmon, two of which made a stater. It appears, then, that the half-shekel of ransom had in the time of our Saviour been converted into the payment of a didrachmon to the Temple, and two of their didrachma formed a stater of the Jewish currency." He then suggests that the stater was evidently the extant "Shekel Israel," which was a tetradrachm of the Ptolemaic scale, though generally below the standard weight, like most of the extant specimens of the Ptolemies; and that the didrachmon paid to the Temple was therefore of the same monetary scale. "Thus," says he, "the duty to the Temple was converted from the half of an Attic to the whole of a Ptolemaic didrachmon, and the tax was nominally raised in the proportion of about 105 to 65;

but probably the value of silver had fallen as much in the two preceding centuries. It was natural that the Jews should have revived the old name shekel, and applied it to their stater, and equally so that they should have adopted the scale of the neighboring opulent and powerful kingdom, the money of which they must have long been in the habit of employing" (Appendix, *Nismata Hellenica*, p. 2, 3). See DIDRACHM.

Tricerium (τρίκρητον), a three-branched taper, so arranged that the wicks of each, though distinct, blend into one flame. With this the Oriental bishops sign the book of the gospels during certain services of the Greek Church.—Lee, *Gloss. of Liturg. Terms*, s. v.

Trichotomy (*threefold division*) is the theory according to which man is divided into three parts—*body, soul, and spirit*. This is thought by many to be the apostolic classification of our nature (1 Thess. v. 23). Generally soul and body are opposed; but spirit, so contrasted, is the highest portion of our nature, allying it to God, and on which his Spirit works. Soul (in the German sense) is the lower portion, the region of appetite, instinct, and of much besides which we have in common with the lower creation. This idea throws light on many passages of Scripture. The body mediates between the soul and the external world, the soul between the spirit and body, and the spirit between both and God. This view of human nature would have prevailed, had it not been so keenly opposed by Tertullian, and so slighted even by Augustine, and had not Apollinaris adopted it to illustrate his erroneous view of our Lord's nature. He denied spirit, in this human sense, to Christ, but held that its place was occupied by the Divine Spirit. It was held by Luther, as it still is by the more evangelical part of the Lutheran Church. The Reformers, however, did not consider spirit and soul as different substances, but only as different attributes or operations of the same spiritual essence. See SOUL; SPIRIT.

Tridentine (*of or belonging to Trent*). The term is applied to the celebrated council of the 16th century, and to that part of the Church Universal which accepts the decrees and canons of the Council of Trent (q. v.).

Tridentine Profession of FAITH, or the *Creed of Pius IV*, is a summary of the doctrines of the Council of Trent, suggested by that council, prepared by a college of cardinals under the supervision of pope Pius IV, and issued by him, Nov. 13, 1564. It consists of twelve articles, including the Nicene Creed (q. v.), and is put in the form of an individual profession and solemn oath. It is required of all Roman Catholic priests, and public teachers in seminaries, colleges, and universities. It is also used for Protestant converts to the Roman Catholic Church, and hence called the "profession of converts." The 10th article reads, "I acknowledge the holy Catholic Apostolic Roman Church as the mother and mistress of all churches; and I promise and swear true obedience to the bishop of Rome as the successor of St. Peter, prince of the apostles, and as the vicar of Jesus Christ." See Latin text in the two papal bulls of Nov. 13 and Dec. 9, 1564, and in Denzinger's *Enchiridion*, p. 292-294; also a history of this creed by Mohrnik, *Urkundliche Geschichte der Professio Fidei Tridentine* (Greifswald, 1822). See TRENT, COUNCIL OF.

Triennial Visitation, a visitation which is held once in three years. In England it is the custom to hold episcopal visitations at such intervals.

Triers, ECCLESIASTICAL. A parliamentary ordinance was passed in 1654 appointing thirty-eight commissioners to the office of *triers*: they were chosen by Cromwell, and sat at Whitehall. They were mostly independents, though some Presbyterians were joined with them. They were appointed to try all ministers that came for institution and induction, and without their approval none were admitted. The opinion of Baxter is that they were of essential service to the Church. He says they saved many congregations from ignorant, un-

godly, and intemperate teachers—men who designed nothing more in the ministry than to repeat a sermon as readers say their prayers, and to patch up a few good words together to talk the people asleep on Sunday, and all the rest of the week go with them to the ale-house, and harden them in their sin; and that sort of ministers who either preached against a holy life, or preached as men that were not acquainted with it. They had power to eject scandalous, ignorant, and insufficient ministers and schoolmasters.—Farrar, *Eccles. Dict.* s. v.

Trigland, JACOB, a Dutch theologian, was born at Haarlem, May 8, 1652, and died at Leyden, Sept. 22, 1705. His writings are, *Dissert. Theologicæ-philologica, Continens Defensionem Integritatis Codicis Sacri adversus Nuperas in eum Censuras* (Leyden, 1703);—*Diatriba de Secta Karæorum* (ibid. eod.; Germ. transl. by Fürst. in *Literaturbl. des Orients*, 1843, c. 12, 23, 39, 763, 776, 794, 827);—*Dissertationes Theologicæ et Philologicæ. Sylloge, ut et Orationum Acad.* (Delft, 1728);—*Trium Scriptorum Illustr. de Tribus Judæorum Sectis Synagoga in quo N. Serarii* (Mayence, 1604); *Drusii* (Franeker, 1603-5); *Jos. Scaligeri* (ibid. 1605) *Opuscula, quæ eo Pertinent*, etc. (ibid. 1703);—*Disput. II de Origine Sacrificiorum* (Leyden, 1692);—*De Josepho Patriarcha in Sacri Bori Hieroglyph. ab Egyptiis Adorato* (ibid. 1703). See Fürst, *Bibl. Jud.* iii. 447; Winer, *Handb. der theol. Literatur*, i, 29, 139, 442, 515, 823. (B. P.)

Triglaw, in Slavonic mythology, was the supreme god of the Servians, Wends, Poles, partly also of the Rügen islanders, Pomeranians, Prussians, and Lithuanians. He was, as his name indicates, triple-headed, and therefore represented the Slavonic trinity. The priests proclaimed Triglaw as the unseen supreme sovereign of heaven, earth, and the infernal regions. He was represented veiled, in the greatest temple at Stettin, as a celebrated man with three heads. A large army of priests served him, and taught that he, being long-suffering and kind-hearted, veiled his face so as not to see the evil deeds of men, and seldom made his appearance on earth, but taught his priests his will and commands, and by means of his holy black steed he distributed oracles, etc. This steed governed by its hoofs the whole population, and no one would have dared to do anything to which it did not give favorable signs. His temple, made of huge wooden posts covered with cloths, contained the largest part of all the spoils of war. Vast riches were heaped up here, and the superstitious dread of the people was a surer protection than marble or granite, perhaps, would have been. The destructive campaigns of Henry the Lion were the means of destroying all these temples, and closed to the world the inspection of the idols of their gods.—Vollmer, *Wörterb. d. Mythol.* s. v.

Trim, COUNCIL OF. Trim is the county town of Meath, situated on the river Boyne, about twenty-seven miles north-west of Dublin. It contains a national school, besides other public institutions; a handsome Roman Catholic chapel; the remains of Trim Castle; and the Yellow Tower, a part of St. Mary's Abbey, rebuilt by the De Laeys in the 13th century.

The council was held on the Sunday after St. Matthew's Day (1291). Nicholas M'Motissa, archbishop of Armagh, presided. The four archbishops, all the suffragan bishops, all the cathedral chapters, by their deputies, and the other orders and degrees of the clergy, unanimously agreed in this synod to maintain and defend each other in all courts, and before all judges, ecclesiastical or secular, against all lay encroachments upon, and violations of, their rights, liberties, or customs; and, further, amply to indemnify those of their messengers, executors of their orders, etc., who might receive loss or damage in the performance of their duty. Other articles of agreement were drawn up, pledging them to mutual co-operation in enforcing sentences of excommunication, etc. See Mant, *Hist. of the Irish Church*, p. 17.—London, *Manual of Councils*, s. v.

Trimmer, SARAH, a zealous promoter of religious education in England, was born at Ipswich, Jan. 6, 1741. She was carefully educated, and while a resident of London passed her time in the society of Dr. Johnson, Dr. Gregory Sharpe, and other eminent persons in the literary world. In her reading she was directed by her father. Becoming a mother of a large family of children, her current of thought was turned to education. Having experienced great success in the plan of educating her own family, she naturally wished to extend that blessing to others, and this first induced her to become an author. She strenuously opposed the current of French and German infidelity and a lax education independent of the history and truths of revelation. She was also an early promoter and supporter of Sunday-schools. She died Dec. 15, 1810. Of her works, we refer to the last London edition: *Abridgment of the New Test.* (1852, 18mo);—*Abridgment of the Old Test.* (1850, 12mo);—*Help to the Unlearned in the Study of the Holy Scriptures* (1805, 8vo; 2d ed. 1850, 2 vols. 12mo);—*New and Comprehensive Lessons on the New Test.* (1849, 18mo);—*New and Comprehensive Lessons on the Old Test.* (1849, 18mo);—*Prayers and Meditations* (1812, 12mo; 2d ed. 1860);—*Sacred History* (1782–85, 6 vols. 12mo; 1841–49, 2 vols. 12mo);—*Scripture Catechism* (1851, 2 vols. 12mo);—*The Economy of Charity* (1786; revised 1801);—and many other works on history, education, etc. See Chalmers, *Biog. Dict.* s. v.; Allibone, *Dict. of Brit. and Amer. Authors*, s. v.

Trimnell, CHARLES, bishop of Norwich and Winchester, was born at Ripton-Abbots, England, Dec. 27, 1663. He graduated with honor at Winchester College, and in 1688 was appointed preacher at Rolls. In 1691 he was installed prebendary of Norwich, in 1694 presented by the earl of Sunderland to the rectory of Bodington, and in 1698 installed archdeacon of Norfolk. About this time he was made chaplain in ordinary to queen Anne. Having no parochial duty in 1705, he for some time took charge of St. Giles's parish, Norwich; and in October, 1706, was instituted to St. James's, Westminster. In January, 1707, Mr. Trimnell was elected bishop of Norwich, and in August, 1721, he was transferred to the bishopric of Winchester. He died Aug. 15, 1723. He had a very serious turn of mind, and performed the duty of every station with the greatest exactness. His public life was characterized by great moderation and firmness of spirit. "He was a lover of peace and order both from judgment and inclination; and, being a sincere friend to the Church of England, he constantly avowed those principles of toleration and indulgence which make that Church the glory of the Reformation." Bishop Trimnell published fifteen single *Sermons, Letters, Charges*, etc. (1697–1715). See Chalmers, *Biog. Dict.* s. v.

Trine Baptism. A mode of administering the sacrament, which was so universal in the primitive Church that some entertain no doubt of its being derived from apostolic tradition. The person baptized was thrice immersed, or water was thrice poured on him, in the name of the three persons of the Godhead. The reason of trine baptism was manifest: the three immersions showed the distinction of the three divine Persons, although the baptism was only *one*, in the name of the undivided Godhead—"one baptism for the remission of sins." Thus in baptism the unity of the Divine Nature and the distinction of the three Persons are clearly implied and set forth. The first who departed from this usage was Eunomius the Arian. Trine baptism was according to the fiftieth apostolical canon, the bishop or presbyter who baptized with one immersion being ordered to be deposed. In the 6th and 7th centuries one immersion in baptism was substituted by some in Spain for the ordinary rule of the Church, the Council of Toledo (A.D. 633, canon 6) allowing single immersion in Spain, to avoid schism; but this innovation lasted for only a short period, the early usage being restored, and

remaining the rule of the Western Church. Single immersion has never been authorized by the Eastern Church. See Blunt, *Dict. of Doct. and Hist. Theol.* s. v.; Landon, *Manual of Councils*, p. 582.

Trine-God Controversy. In the churches over which Hincmar (q. v.), archbishop of Rheims, presided, he forbade the singing of the last words of a very ancient hymn—*Te trina Deitas, unaque poscimus* ("Of thee, trine Deity, yet one, we ask")—on the ground that this phraseology subverted the simplicity of the Divine Nature, and implied the existence of *three Gods*. The Benedictine monks would not obey this mandate of Hincmar; and one of their number, Ratramnus, wrote in defence of a *trine Deity*. Godeschalcus, hearing of this dissension while in prison, sent forth a paper, in which he defended the cause of his fellow-monks. For this he was accused by Hincmar of Trithemism, and was confuted in a book written expressly for that purpose. But this controversy soon subsided; and, in spite of Hincmar's efforts, the words retained their place in the hymn. See Mosheim, *Ch. Hist.* bk. v, ch. ii, p. 94.

Trinitarian Brothers, or ORDER OF THE MOST HOLY TRINITY, for the Redemption of Captives, was founded by St. John of Matha, who was born at Faucon, Provence, in 1154. When he first celebrated divine service, after his ordination, he beheld a vision of an angel in white, having a cross of red and blue on his breast, and his hands, crossed over each other, rested on the heads of two slaves who knelt on each side of him. He, with another holy man, Felix de Valois, arranged the institution of a new order for the redemption of slaves. They went to Rome, and received the approval of Innocent III in 1198. They assumed the white habit, having on the breast a Greek cross of red and blue. They returned to France, and received from Gaucher de Châtillon lands in the province of Valois. The pope also gave them at Rome the church and convent of S. Maria della Navicella, on the Monte Celio. Honorius III confirmed their rule, and in 1267 Clement IV approved of a change in their rules permitting them to purchase meat and own horses. They had at one time two hundred and fifty convents in France, three in Spain, forty-three in England, fifty-two in Ireland, besides others in Portugal, Italy, Saxony, Hungary, and Bohemia. In 1594 the Barefooted branch of this order was begun by Jean Baptiste de la Conception in the convent of Valde, Spain. He was granted a bull by Clement VIII in 1598

Spanish Trinitarian Monk.

to establish a reform in his order and lead them back to the ancient practice. The founders of the Trinitarians placed themselves under the protection of St. Radegunda, queen of Clothaire V of France, who afterwards took the religious habit and founded a monastery at Poitiers. See Jameson, *Leg. of Monastic Orders*, p. 217 sq.; Migne, *Diet. des Ordres Relig.* s. v.

Trinitarian Sisters. This order was founded at Valence in 1615, and constituted a convent in 1696. They received letters patent from Louis in 1712, and were registered in Parliament in January, 1728. They established two hospitals, which were in 1802 devoted to the care of aged men and women. They have been quite flourishing since 1837. See Migne, *Diet. des Ordres Relig.* s. v.

Trinitarian Nun.

Trinitarians. A general name for all Christians who hold the doctrine of the divine Trinity (q. v.).

Trinity. The doctrine of the Trinity in the godhead includes the three following particulars, viz. (a) There is only one God, one divine nature; (b) but in this divine nature there is the distinction of Father, Son, and Holy Ghost, as three (subjects or persons); and (c) these three have equally, and in common with one another, the nature and perfection of supreme divinity. It was the custom in former times for theologians to blend their own speculations and those of others with the statement of the Bible doctrine. It is customary now to exhibit first the simple doctrine of the Bible, and afterwards, in a separate part, the speculations of the learned respecting it.

I. *The Biblical Doctrine.*—It has always been allowed that the doctrine of the Trinity was not fully revealed before the time of Christ, and is clearly taught only in the New Test. Yet, while it is true (1) that if the New Test. did not exist we could not derive the doctrine of the Trinity from the Old Test. alone, it is equally true (2) that by the manner of God's revelation of himself in the Old Test. the way was prepared for the more full disclosure of his nature that was afterwards made. But (3) respecting the intimate connection of these persons, or respecting other distinctions which belong to the doctrine of the Trinity, there is nothing said in the Old Test. While in each particular text allusion is made to a trinity or plurality in God, yet these texts are so many in number and so various in kind that they impress one with the opinion that such a plurality in God

is indicated in the Old Test., though it is not fully developed or clearly defined.

(1.) The texts of the *Old Test.* may be arranged in the following classes:

1. Those giving the names of God in the plural form, and thus seeming to indicate a plurality of his nature, of which אֱלֹהִים, אֱלֹהִים, אֱלֹהִים are cited as examples; but as these may be only the *pluralis majestatis* of the Oriental languages, they afford no certain proof.

2. Texts in which God speaks of himself in the plural. The plural in many of these cases can be accounted for from the use of the plural nouns אֱלֹהִים, אֱלֹהִים, etc. Philo thinks (*De Opif. Mundi*, p. 17) that in the expression "Let us make man" (Gen. i, 26), God addresses the angels. It is not uncommon in Hebrew for kings to speak of themselves in the plural (1 Kings xii, 9; 2 Chron. x, 9; Ezra iv, 18). In Isa. vi, 8 God asks, who will go for us (לָנוּ), where the plural form may be explained either as the *pluralis majestatis*, or as denoting an assembly for consultation.

3. Texts in which יְהוָה (Jehovah) is distinguished from אֱלֹהִים (Elohim). These texts do not, however, furnish any decisive proof; for in the simplicity of ancient style the noun is often repeated instead of using the pronoun; and so, from *Jehovah* may mean from *himself*, etc. Further, the name אֱלֹהִים (Elohim) is sometimes given to earthly kings, and does not, therefore, necessarily prove that the person to whom it is given must be of the divine nature.

4. Texts in which express mention is made of the *Son of God* and of the *Holy Spirit*.

(a.) *Of the Son of God.*—The principal text of this class is Psal. ii, 7, "Thou art my son; this day have I begotten thee;" comp. Psal. lxxii, 1; lxxxix, 27. This Psalm was understood by the Jews and by the writers of the New Test. to relate to the Messiah. But the name *Son of God* was not unfrequently given to kings; it is not, therefore, *nomen essentie*, but *dignitatis Messianice*. The passage would then mean, "Thou art the king (Messiah) of my appointment; this day have I declared thee such." In this psalm, therefore, the Messiah is rather exhibited as king, divinely appointed ruler and head of the Church, than as belonging to the divine nature.

(b.) *Of the Holy Spirit.*—There are many texts of this class, but none from which, taken by themselves, the personality of the Holy Spirit can be proved. In these texts the term *Holy Spirit* may mean (1) the divine nature in general; (2) particular divine attributes, as omnipotence, knowledge, or omniscience; (3) the divine agency, which is its more common meaning. Isa. xlviii, 16, "And now Jehovah (the Father) and his Spirit (Holy Ghost) hath sent me" (the Messiah), is supposed to teach the whole doctrine of the Trinity. But the expression "and his Spirit" is used by the prophets to mean the *direct, immediate command* of God. To say, then, the Lord and his Spirit hath sent me is the same as to say, the Lord hath sent me by a direct, immediate command.

5. Texts in which *three* persons are expressly mentioned, or in which there is a clear reference to the number *three* (Numb. vi, 24; Psal. xxxiii, 6; Isa. vi, 3). But the repetition of the word *Jehovah* in the one text is not an undeniable proof of the Trinity; and in the other, the *word of his mouth* means nothing more than his *command*; and in the last text the threefold repetition of the word *holy* may have been by three choirs, all uniting in the last words, "The whole earth is full of thy glory."

Thus it appears that none of the passages cited from the Old Test. in proof of the Trinity are conclusive when taken by themselves; but, as was before stated, when they are all taken together, they convey the impression that at least a plurality in the godhead was obviously indicated in the Jewish Scriptures.

(II.) Since we do not find in the Old Test. clear or decided proof upon this subject, we must now turn to the *New Test.* The texts relating to the doctrine of the Trinity may be divided into two classes—those in which the Father, Son, and Holy Spirit are mentioned in connection, and those in which these three subjects are mentioned separately, and in which their nature and mutual relation are more particularly described.

1. The first class of texts, taken by itself, proves only that there are the three subjects named, and that there is a difference between them; that the Father in certain respects differs from the Son, etc.; but it does not prove, by itself, that all the three belong necessarily to the divine nature, and possess equal divine honor. In proof of this, the second class of texts must be adduced. The following texts are placed in this class:

Matt. xviii. 18-20. This text, however, taken by itself, would not prove decisively either the *personality* of the three subjects mentioned, or their *equality* or *divinity*. For (a) the subject into which one is baptized is not necessarily a *person*, but may be a *doctrine* or *religion*. (b) The person in whom one is baptized is not necessarily God, as 1 Cor. i. 13, "Were ye baptized in the name of Paul?" (c) The connection of these three subjects does not prove their *personality* or *equality*. We gather one thing from the text, viz. that Christ considered the doctrine respecting Father, Son, and Holy Ghost as a fundamental doctrine of his religion, because he requires all his followers to be bound to a profession of it when admitted by baptism into the Church.

1 Pet. i. 2: "Elect according to the foreknowledge of God the Father, through sanctification of the Spirit, unto obedience and sprinkling of the blood of Jesus Christ." From what is here said of the Holy Spirit, it does not necessarily follow that he is a personal subject; nor, from the predicates here ascribed to Christ, that he is necessarily divine. This passage, therefore, taken by itself, is insufficient.

2 Cor. xiii. 14, "The grace of the Lord Jesus Christ, and the love of God, and the communion of the Holy Ghost, be with you all." Here we might infer, from the parallelism of the third member of the passage with the two former, the *personality* of the Holy Spirit; but we could not justly infer that they possessed *equal authority*, or the same nature.

John xiv. 26 offers three different personal subjects, viz. the Comforter, the Father, and Christ; but it is not sufficiently proven from this passage that these three subjects have equal divine honor, and belong to one divine nature.

Matt. iii. 16, 17 has been considered a very strong proof-text for the whole doctrine of the Trinity. But though three personal subjects are mentioned, viz. the voice of the Father, the symbol of the Holy Spirit, and Christ, yet nothing is here said respecting their nature.

1 John v. 7, 8 are generally admitted to be spurious; and, even if allowed to be genuine, they do not determine the nature and essential connection of the three subjects mentioned.

2. We now turn to the second class of texts, viz. those in which the Father, Son, and Holy Ghost are separately mentioned, and in which their nature and mutual relation are taught. These texts prove (a) that the Son and Holy Spirit, according to the doctrine of the New Test., are divine, or belong to the one divine nature; and (b) that the three subjects are personal and equal.

(1.) *The Deity of the Father.*—When the term *Father* is applied to God, it often designates the whole godhead, or the whole divine nature; as Θεός ὁ Πατήρ. 1 Cor. viii. 4-6; John xvii. 1-3. He is often called Θεός καὶ Πατήρ, i. e. Θεός ὁ Πατήρ, or Θεός ὅς ἐστι Πατήρ, as Gal. i. 4. All the arguments, therefore, which prove the existence of God prove also the deity of the Father.

(2.) *The Deity of Christ.*—To prove the deity of Christ we present three classes of texts.

(a.) The following are the principal texts in which divine names are given to Christ:

John i. 1, 2. Christ is here called ὁ Λόγος (the Word), which signified among the Jews and other ancient people, when applied to God, *everything by which God reveals himself to men*, and makes known to them his will. Hence those who made known the divine will to men were called by the Hellenists λόγοι. It was probably on this account that John declared Jesus to be the Logos which existed ἐν ἀρχῇ; that the Logos was with God, and the Logos was God. In this passage the principal proof does not lie in the word Λόγος, nor even in the word Θεός, which in a larger sense is often applied to kings and earthly rulers; but to what is predicated of the Λόγος, viz. that he existed from eternity with God, that the world was made by him, etc.

John xx. 28. Here Thomas, convinced at last that Christ was actually risen from the dead, thus addresses him, "My Lord and my God." This must not be considered an exclamation of surprise or wonder, as some have understood it; for it is preceded by the phrase εἶπεν αὐτῷ, "he said this to him." Thomas probably remembered what Jesus had often said respecting his superhuman origin (v. 8, 10, 17), and he now saw it all confirmed by his resurrection from the dead.

Phil. ii. 6, "Who, being in the form of God, thought it not robbery to be equal with God." There it is said of Christ that he is ἴσα Θεῷ. Deo aequalis; not ὅμοιος Θεῷ, ἑνότητος, ὁμοεικελος, similis Deo—terms applied by Homer to kings and heroes. The term ἴσος Θεῷ, on the contrary, is never applied to a finite or created being. Hence the Jews (John v. 18) considered it as blasphemy in Christ to make himself ἴσον Θεῷ.

John x. 28-30, "I and my Father are one." These words are not to be understood to denote so much an equality of nature as unanimity of feeling and purpose. Still the passage is quite remarkable; because Christ professes to do his work in common with his Father; and that is more than any man, prophet, or even angel is ever said in the Bible to do. That being one with God, therefore, which Jesus here asserts for himself is something peculiar, which belongs to him only as he is a being of a higher nature.

Tit. ii. 13, "We expect the glorious appearance," etc. In this passage, since τοῦ is omitted before σωτήρος, both μέγαν Θεόν and σωτήρα must be construed in apposition with ἡσού Χριστόν. Moreover, ἐπιφάνεια is the word by which the solemn coming of Christ is appropriately designated.

In some of the texts in which Christ is called the *Son of God*, the name is used in three different senses — [1.] Messiah or king, a title very commonly given to the Messiah by the Jews (see Matt. xxvi. 63; Luke ix. 20; Matt. xxvii. 40; Luke xxiii. 35; see also Mark xiii. 32; 1 Cor. xv. 28); [2.] the higher nature of Christ (John v. 17 sq.; x. 30, 33; xx. 31; Rom. i. 3, 4); [3.] he is also called the Son of God (Luke i. 35), to designate the immediate power of God in the miraculous production of his human nature.

(b) Texts in which divine attributes and works are ascribed to Christ. It is not necessary to find texts to prove that all the divine attributes are ascribed to Christ. These attributes cannot be separated; and if one of them is ascribed to Christ in the Bible, the conclusion is inevitable that he must possess all the rest. The following attributes and works are distinctly ascribed to Christ in the Scriptures:

[i.] *Eternity* (John i. 1; viii. 58; xvii. 5; Col. i. 17), [ii.] *Creation and preservation of the world* (John i. 1-3, 10; Col. i. 16; Heb. i. 10 [where Psa. cii. 26 is quoted and applied to Christ]; ii. 10).

[iii.] *Omnipotence* is ascribed to Christ (Phil. iii. 21); *omniscience* (Matt. xi. 27). He is described as the *searcher of hearts*, etc. (1 Cor. iv. 5).

(c.) Texts in which divine honor is required for Christ. The following are the principal texts of this class: John, v. 23, "All men should honor the Son, even

as they honor the Father;" Acts i, 24; vii, 59; 2 Cor. xii, 8, where Christ is approached in prayer; and those in which the apostles refer to Christ the texts of the Old Test. that speak of the honor and worship of God, e. g. Heb. i, 6 from Psa. xevii, 7; also Rom. xiv, 11 from Isa. xlv, 3; Phil. ii, 10; 2 Cor. v, 8-11; 2 Tim. iv, 17, 18.

(3.) The third point in the discussion of this doctrine is the personality and divinity of the Holy Spirit; for a full discussion of which see HOLY GHOST.

II. *History of the Doctrine.*—Respecting the manner in which the Father, the Son, and the Holy Ghost make one God, the Scripture teaches nothing, since the subject is of such a nature as not to admit of its being explained to us. It is therefore to be expected that theologians should differ widely in their opinions respecting it, and that in their attempts to illustrate it they should have pursued various methods.

1. *As Held by the Primitive Christians.*—For the first age the Scripture is sufficient evidence of the Christians' practice. For, not to insist upon the precept of honoring the Son as they honored the Father; or the form of baptism, in which they were commanded to join the Father, Son, and Holy Ghost in one act of worship; or the injunction to believe in the Son as they believed in the Father, let reference be made only to their example and practice. Stephen, the protomartyr, when he was sealing his confession with his blood, prayed to Christ, "Lord Jesus, receive my spirit," and "Lord, lay not this sin to their charge" (Acts vii, 59, 60). Paul asserts that he baptized only in the name of Christ (1 Cor. i, 13). Notice also his constant use of the name of Christ in invocation. There is the well-known fact that the early believers were known as those who called on the name of Christ (Acts ix, 14, 21; 1 Cor. i, 2; 2 Tim. ii, 22).

2. *As Held in the 2d and 3d Centuries.*—Towards the end of the 1st century, and during the 2d, many learned men came over both from Judaism and paganism to Christianity. These brought with them into the Christian schools of theology their Platonic ideas and phraseology, and they especially borrowed from the philosophical writings of Philo. As was very natural, they confined themselves, in their philosophizing respecting the Trinity, principally to the *Logos*; connecting the same ideas with the name *λόγος* as had been done before by Philo and other Platonists. Differing on several smaller points, they agreed perfectly in the following general views, viz.: the *Logos* existed before the creation of the world; he was begotten, however, by God, and sent forth from him. By this *Logos* the Neo-Platonists understood the infinite *understanding* of God, belonging from eternity to his nature as a *power*, but that, agreeably to the divine will, it began to exist out of the divine nature. It is therefore different from God, and yet, as begotten of him, is entirely divine. By means of this *Logos* they supposed that God at first created, and now preserves and governs, the universe. Their views respecting the Holy Spirit are far less clearly expressed, though most of them considered him a *substance* emanating from the Father and the Son, to whom, on this account, divinity must be ascribed. These philosophical Christians asserted rather the *divineness* of the Son and Spirit, and their divine origin, than their equal *deity* with the Father. Justin Martyr expressly declares that the Son is in God what the understanding (*νοῦς*) is in man, and that the Holy Spirit is that divine power to act and execute which Plato calls *ἀνερή*. With this representation Theophilus of Antioch, Clemens of Alexandria, and Origen substantially agree. According to Tertullian, the persons of the Trinity are *gradus, formæ, species unius Dei*. Thus we find that the belief in the subordination of the Son to the Father, for which Arianism is the later name, was commonly received by most of those fathers of the 2d and 3d centuries who assented, in general, to the philosophy of Plato. Another class of learned, phi-

losophizing Christians substituted another theory on the subject of the Trinity, which, however, was none the less formed rather from their philosophical ideas than from the instructions of the Bible. Among the writers of this class was Praxeas, of the 2d century, who contended that the Father, Son, and Spirit were not distinguished from each other as individual subjects; but that God was called *Father*, so far as he was creator and governor of the world; *Son* (*Αἰὼς*), so far as he had endowed the man Jesus with extraordinary powers, etc. He, in accordance with this view, denied any *higher, pre-existing* nature in Christ; and with him agreed Artemon, Noctus, and Beryllus of Bostra. Sabellius regarded the terms Father, Son, and Holy Spirit as merely describing different divine *works*, and various modes of divine *revelation*.

In the following table the writers of the first three centuries on the subject of the Trinity are ranged according to their opinions:

CATHOLIC.	MONARCHIANS.
Justin Martyr.	<i>Unitarians.</i>
Theophilus of Antioch.	Theodotus.
Athenagoras.	Artemon.
Irenæus.	Paul of Samosata.
Clemens Alexandrinus.	
Tertullian.	<i>Patristians.</i>
Origen.	
Dionysius Alexandrinus.	Praxeas.
Cyprian.	Noetus.
Novatian.	Beryllus of Bostra.
Dionysius Romans.	Sabellius.

Among the terms introduced in the discussion of the doctrine of the Trinity during this period the following are the most common, viz. (1.) *Τρίταις*, introduced by Theophilus of Antioch in the 2d century, and often used by Origen in the 3d century. Tertullian translated it into Latin by the word *trinitas*, of which the English word is an exact rendering. (2.) *ὁθσία, ὑπόστασις*. These terms were not sufficiently distinguished from each other by the Greek fathers of the 2d and 3d centuries, and were often used by them as entirely synonymous. By the word *ὑπόστασις*, the older Greek fathers understood only a really existing subject, in opposition to a nonentity, or to a merely ideal existence; in which sense they also not unfrequently used the word *ὁθσία*. (3.) *Persona*. This word was first employed by Tertullian, and by it he means *an individual*, a single being, distinguished from others by certain peculiar qualities, attributes, and relations; and so he calls Pater, Filius, Spiritus Sanctus, *tres persone* (three persons), at the same time that he ascribes to them *unitas substantiæ* (unity of substance), because they belong to the divine nature (*ὁθσία*) existing from eternity.

We call attention to the following as shedding light upon the *practice* of the Church during this period. Pliny, a judge under Trajan, in the beginning of the 2d century took the confessions of some accused Christians, and says, "They declared that they were used to meet on a certain day before it was light, and, among other parts of their worship, sing a hymn to Christ as their God." Polycarp (*Ep. ad Philip.* n. 12) joins God the Father and the Son together in his prayers for grace and benediction upon men. Justin Martyr answering, in his *Second Apology*, the charge of atheism brought against them by the heathen, answers, "That they worshipped and adored still the God of righteousness and his Son, as also the Holy Spirit of prophecy." Athenagoras answers the charge of atheism after the same manner. Similar testimony is afforded by the writings of Lucian the heathen, Theophilus of Antioch, Clemens Alexandrinus, Origen, Novatian, and others, illustrating the practice of the Church in paying divine honors to the Son and Holy Spirit.

3. *The Trinity as Held in the 4th Century.*—It had already been settled, by many councils held during the 3d century, and in the symbols which they had adopted in opposition to Sabellius and Paul of Samosata, that

the Father must be regarded as *really* distinguished from the Son, and the Holy Spirit as distinguished from both. The relation, however, of the three persons of the Trinity, and the question in what the distinction between them properly consists, not having been discussed, these subjects were left undetermined by the decisions of councils and symbols. Different opinions prevailed, and learned men were left to express themselves according to their convictions.

Origen and his followers maintained, against the Sabellians, that there were in God *τρῆς ὑποστάσεις* (three persons), but *μία οὐσία* (one substance) common to the three. Few had as yet taught the entire *equality* of these three persons, but had allowed, in accordance with their Platonic principles, that the Son, though belonging to the divine nature, was yet subordinate to the Father. In the beginning of the 4th century, Alexander of Alexandria, and Athanasius, his successor, attempted to unite the hypotheses of Origen and Sabellius, thinking that the truth lay between the two extremes. Athanasius stated the personal distinction of the Father and the Son to be that the former was *without beginning and unbegotten*, while the latter was *eternally begotten by the Father*, and equally eternal with the Father and the Spirit.

Arius, about 320, disputed the doctrine taught by Alexander, viz. *ἐν τριάδι πᾶσα εἶναι*, and so favored the Sabellian theory. As the controversy proceeded, Arius declared, in opposition to Sabellius, that there were not only three persons in God, but that these were unequal in glory (*δόξα ἰσὺς ἕκαστος*); that the Father alone was supreme God (*ἀγένητος*), and God in a higher sense than the Son; that the Son derived his divinity from the Father before the creation of the world, and that he owed his existence to the divine will; and that the Holy Spirit was likewise divine in a sense inferior to that in which the Father is so. In opposition to all the Arian, and various other theories, Athanasius and his followers zealously contended. They succeeded, at a general council at Nice in 325, in having a symbol adopted which was designed to be thenceforward the only standard of orthodoxy. This symbol was confirmed by the council held at Constantinople in 381, under Theodosius the Great. The distinctions established at Nice and Constantinople were often re-enacted at various succeeding councils. Many urged, in opposition, that *tritheism* (q. v.) was the inevitable consequence of the admission of these distinctions, but they, nevertheless, remained in force. The council adopted the word *ὁμοούσιος* (consubstantiality), explaining themselves thus: The Son was not created, but eternally generated from the nature of the Father, and is therefore in all respects equal to him, and no more different, as to nature, from God than a human son is from his father, and so cannot be separated from the Father. All that they meant to teach by the use of this word was that the Father, Son, and Holy Spirit had the divine nature and divine perfections so in common that one did not possess more and another less; without asserting, however, that there were three Gods: in short, that in the Godhead there were *tres distincti, unitate essentie conjuncti*. See CREED, NICENE.

The characteristics by which the persons of the Trinity may be distinguished from each other under this view belong to two classes.

(1.) *Internal* ("characteres interni"). These are distinctive signs arising from the internal relation of the three persons in the Godhead to each other, and indicating the mode of the divine existence. The following distinctions are derived from the names Father, Son, and Spirit, and from some other Bible phraseology: (a.) The Father *generates* the Son, and *emits* the Holy Spirit, *generat Filium, spirat Spiritum Sanctum*; and possesses, therefore, as his personal attributes, *generatio activa* and *spiratio activa*. (b.) The Son is *generated* by the Father—*Filius est generari non generare*. The Son, therefore, possesses as his personal attributes *filia-*

tio, generatio passiva; and also, as he is supposed to emit the Spirit in conjunction with the Father, *spiratio activa*. (c.) The Holy Spirit neither generates nor is generated, but proceeds from the Father and the Son—*Spiritus Sanctus est, nec generare nec generari, sed procedere*. In regard to the Holy Spirit, there was nothing decided, during the first three centuries, by ecclesiastical authority respecting his nature, the characteristics of his person, or his relation to the Father and the Son. Nor was anything more definite, with regard to his nature and his relation to the other persons of the Trinity, than what has already been stated, established by the council at Nice, or even by that at Constantinople. To believe in the Holy Ghost—*τὸ ἅγιον Πνεῦμα καὶ ὕψιστον προσκυνούμενον*, and *ἐκ τοῦ Πατρὸς ἐκπορευόμενον*—was all that was required in the symbol there adopted. But there were many, especially in the Latin Church, who maintained that the Holy Spirit did not proceed from the Father only, but also from the Son. They appealed to John xvi, 13, and to the texts where the Holy Spirit is called the *Spirit of Christ*, e. g. Rom. viii, 9. To this doctrine the Greeks were, for the most part, opposed, because they did not find that the New Test. ever expressly declared that the Spirit proceeded from the Son. It prevailed, however, more and more in the Latin Church; and when in the 5th and 6th centuries the Arians urged it as an argument against the equality of Christ with the Father, that the Holy Spirit proceeded from the Father only, and not from the Son, the Catholic churches began to hold more decidedly that the Holy Spirit proceeded from both, and insert the adjunct *Filioque* after *Patre* in the *Symbolum Nicæno-Constantinopolitannum*.

(2.) *External* ("characteres externi"). These are characteristics of the persons of the Trinity arising from the *works* of the Deity relating to objects extrinsic to itself, and called *opera externa, sive ad extra*. They are twofold: (a.) *Opera Dei æconomica*, those institutions which God has founded for the salvation of the human race. The Father sent his Son to redeem men (John iii, 16, 17), and gives or sends the Holy Spirit (xiv, 26). The Son is sent from the Father, etc., and sends the Holy Spirit from the Father (xv, 26). The Holy Spirit formed the human nature of Christ (Luke i, 35) and anointed it (Acts x, 38), i. e. endowed it with gifts; and is sent into the hearts of men, and carries them forward towards moral perfection. (b.) *Opera Dei attributiva*, such divine works as are common to the three persons, but which are frequently ascribed to one of the three. To the Father are ascribed the decree to create the world, the actual creation, and the preservation of it. To the Son, also, the creation, preservation, and government of the world are ascribed; also the raising of the dead and judgment. To the Holy Spirit are ascribed the immediate revelation of the divine will to the prophets, the continuation of the great work of salvation commenced by Christ, and the communication and application to men of the means of grace.

4. *History of the Doctrine since the Reformation.*—Nearly all the writers upon the subject of the Trinity since the Reformation belong to some one of the general classes already mentioned. We present several theories.

(1.) Some have attempted to illustrate and explain this doctrine by philosophy; and not a few have gone so far as to think they could prove the Trinity *a priori*, and that reason alone furnishes sufficient arguments for its truth. Others, again, looked to reason for nothing more than an illustration of this factor of the divine existence. In the latter class may be placed Philip Melancthon, who, in his *Locis Theologicis*, thus explained the Trinity: "God from his infinite understanding produces thought, which is the image of himself. To this thought he imparted *personal* existence, which, bearing the impress of the Father, is his likeness and resemblance, and hence called by John λόγος. This illustration of the Trinity was received without offence or suspicion, until

the heresy which lurks beneath it was detected and exposed by Flacius. The latest attempt to explain the Trinity in this manner may be found in the *Berliner Monatsschrift*, Sept. 1790, § 280, in an article written by Schwab of Stuttgart, who refers to the accidents of space, viz. length, breadth, and thickness, as an illustration of the Trinity. Among those who supposed that the Trinity could be mathematically proved were Bartholomew Keckerman, in his *Systema Theologicum*; Peter Poiret, and Daries, who published an essay *In qua Pluralitas Personarum in Deitate, . . . Methodo Mathematicorum, Demonstratur* (Leovardiae, 1735, 8vo).

(2.) Others have expressed themselves so boldly on the subject of the Trinity that they have seemed to approximate towards *tritheism*; in which class we may mention Matthew Gribaldus of Padua, in the 16th century, who maintained that the divine nature consisted of three equally eternal spirits, between whom, however, he admitted a distinction in respect to rank and perfections.

(3.) Some modern writers have inclined to adopt the Sabellian theory, among whom were Servetus (q. v.), Grotius, *Silvæ Sacrae*; Stephen Nye, *Doctrine of the Trinity* (Lond. 1701). In this class we place the hypothesis of Le Clerc, that the Father, Son, and Holy Spirit designate the different modifications of the divine understanding, and the plans which God forms. This is the error into which Weigel and Jacob Böhm fell. Many of the modern German theologians have so explained the Trinity as to lose the idea of three divine persons, for which they have substituted either three distinct powers or attributes (as Meier, Seiler, Claudius, and Töllner), or a threefold agency in God—three eternal actions distinct from each other (as S. G. Schlegel, Kant, Tieftrunk, Daub, Schelling, De Wette, and Fessler).

(4.) The *Arian* theory has also found advocates among Protestant theologians, especially those of the 18th century (e. g. Whiston, Harwood, and Wettstein); but the system which has met with the most approbation is that more refined subordinationism taught by Samuel Clarke, *Scripture Doctrine of the Trinity* (Lond. 1712).

(5.) The *Socinians* or *Phoebians*. The founders of this sect were Lælius Socinus and his nephew Faustus Socinus (q. v.), who brought over considerable numbers to their doctrine in Poland and Transylvania.

(6.) A new theory on the Trinity was proposed by Dr. Ursperger, *Kurzegefasstes System seines Vortrags von Gottes Dreyeinigkeit* (Augsburg, 1777, 8vo). He endeavored to unite the three theories—the Arian, Sabellian, and Nicene—by making a distinction between *trinitas essentialis*, the internal threefold distinction necessarily belonging to the divine nature, and *trinitas economica*, the three persons revealed to us in the work of redemption.

It is proper to say that "the conclusion is obvious that, while we are taught by the Scriptures to believe in three equal subjects in the Godhead, who are described as persons, we are still unable to determine in what manner or in what sense these three have the divine nature so in common that there is only one God" (Knapp, *Christ. Theology*, § 34-44). See PERSON.

III. *Practical Value of the Christian Doctrine of the Trinity*.—The idea of a triune being—Father, Son, and Holy Ghost—is not by any means to be considered as separate from that of the nature and attributes of God. This apparent tritheism can be considered as the conclusion of true deism, and as a safeguard in the most momentous questions. Polytheism, pantheism, and dualism have been to some extent employed to vivify and prove the truth of religion; but we would present the practical advantages of the doctrine of the Trinity in quite a different manner: not as serving merely to prove another proposition without being also true in itself, but as aiding us in arriving at the knowledge of God's nature with an efficacy which is essentially inherent to its objective and permanent recognition. God may be considered either as not true or lofty enough, or not good

and holy enough, or not essentially active enough; these may be considered the possible faults of a given system of deism. So long, then, as it distinguishes only between God and the world, and not between God himself, it retains always a tendency either to return to pantheism or to deny the existence of an absolute being. An absolute safeguard against atheism, polytheism, pantheism, or dualism cannot be found except in the doctrine of the Trinity; for the distinction existing between the Divine Being and the world is better made and observed as an absolute one by those who worship the triune God than by those who do not. Those monotheistic systems which were the most strenuously opposed to the idea of a Trinity, such as Judaism and Mohammedanism, have, by reason of their dryness and emptiness, led to the grossest pantheism.

From the doctrine that the Word, who was God, became flesh, follows the necessity of considering God as personally united with sinless humanity, but at the same time, also, the necessity of drawing a clear distinction between the divine essence and mere human nature. Faith in the everlasting holy love, which is God, can only be rendered theoretically and practically perfect by the knowledge of the perfect, eternal object of the self-consciousness and love of God; i. e. by the thought of the love of God for his only begotten Son. Finally, the idea of the fulness of God's creative and imparting nature can only be preserved from diminishing by the Trinitarian doctrine of a Holy Ghost. Whatever difficulties may result from the Christian idea of different divine persons, when brought into connection with the personality of the divine essence, the apparent contradiction is yet susceptible of a solution; even when we do not consider that the Primitive Church did not, for a long time, recognise these three persons but as only *ἰδιότητες, ὑποστάσεις*, etc.

The Latin Church alone has, since Augustine, sanctioned the expression *personæ* in the *Symbolum Quicunque*. Augustine himself said, yet, "Tres personæ, si ita dicende sunt." Some consider the Trinity as essential to constitute the perfect personality, and employ the metaphysics of consciousness as an analogical proof thereof (see Schneider, *Cölestin, drei geistliche Gespräche ü. d. Personen d. Gottheit* [1834], i). Others refuse to recognise the real personality of God in any but one of the so-called hypostases; namely, in the Logos, the Son. Such is Swedenborg. Others still hold peculiar opinions. At any rate, we are obliged, according to the clear sense of Scripture, to seek not only the Trias in the subjectivity of the representation, nor exclusively in the economy of revelation, but also recognise that immediate faith does here contain within itself the germ of endless speculation; not only because every theological system of antiquity, from the time when, as reflecting gnosis, it rose above the myths, shows certain higher theological ideas (in the sense in which Nietzsche has presented it in a historical and critical manner in his *Theol. Stud.* ch. i), nor merely because the Christian theologians of all times have made a certain rational understanding of this mystery possible and found it necessary. It is even essentially necessary for the Biblical theologian to recognise in the notion of the Logos—who is with God and is God, the precreative image of God, the inmost spirit of God who knew God—the elements of essential, immanent Trinity. For those only retain the trace of Biblical theogony who, in all attempts at explaining it, keep in view the notion of the self-knowledge and self-love of God, or of the distinction between the self-concealing and self-revealing God. Twisten has latterly greatly perfected the philosophy of the doctrine of the Trinity, both in its history and in its essence; first by placing the Trinity *κατὰ τὸν ἀποκαλύψεως τρόπον*, as subordinate to the analogical and philosophical interpretation; but then, again, *κατὰ τὸν ὑπάρξεως*, and shows the connection between both interpretations. In the first case, he seeks a mediation between the *ens absolute* and the finite world which yet reveals the infi-

nite, and this he finds in the primordial, creative thought of God. But revelation cannot take place except towards discerning beings, and finite beings cannot know God save through God. This argument presents the three notions of God, Logos, and Spirit, yet forming still but one godhead. Such as God reveals himself, such, however, he is. This leads us to another consideration, viz. that the *ego*, in order to possess a real, living personality, must not only become dually contradistinguished within itself, but also, by a third process, reflectively act on itself as a third subject, and be conscious of itself as being a perfect image of self. This manner of treating this mystery, by analogy, is neither accidental nor gratuitous, since, according to Scripture, human nature is also analogous to the divine. Tertullian and Augustine had themselves established their theories already on this basis.

IV. *Literature*.—This is immensely copious. We can here refer only to a few leading authorities. See Baur, *Hist. of Doctrines*; Burris, *The Trinity* (Chicago, 1874); Cunningham, *Hist. Theology*, i, 267; Lamson, *Origin of Trinity*; Lessing, *Das Christenthum und die Vernunft* (Berlin, 1784, 8vo); Marheinecke, *Grundlehren der christl. Dogm.* p. 129, 370 (ibid. 1819); Mattison, *The Trinity and Modern Arianism* (18mo); Morus, *Commentary*; Mosheim, *Leben Servet's* (Helmst. 1748, 8vo); Meier, *Historical Development of the Trinity*; Neander, ii, 2, 891; Sailer, *Theorie des Weisen* (Spottes, 1781, 8vo); Walch, *Historia Controversie Græcorum Latinorumque de Processione Spiritus Sancti* (Jenæ, 1751, 8vo); Ziegler, *Geschichteentwicklung des Dogma vom heiligen Geist*. For further literature see *Biblioth. Sac.* (1844-73), index to vol. i-xxx; Dantz, *Wörterbuch der theol. Literatur*, s. v. "Trinität"; Darling, *Cyclop. Bibliog.* col. 268, 1446, 1719-1722; Poole, *Index to Period. Lit.* s. v. "Trinity."

TRINITY, HEATHEN NOTIONS OF. In examining the various heathen philosophies and mythologies, we find clear evidence of a belief in a certain sort of trinity, and yet something very different from the Trinity of the Bible.

In the Egyptian mythology, the powers of the Supreme Being as the producer, the producing, and the produced were symbolized by deities who were respectively father, mother, and child of each other. Every Egyptian town had its local triad, but the most famous was the great Theban triad of Amen-ra, Mant, and Khousu. Sometimes the king himself, as a god, made the third member of the triad. These combinations of divine properties must not be confounded with the dogma of a trinity either of creator, preserver, and destroyer, as in Hindû mythology, or of Creator, Redeemer, and Sanctifier of the Christian faith. The Babylonian mythology offers a trinity, each member of the triad having his own wife or consort. At the head of this trinity stands Anu, representing abstract divinity. He appears as an original principle; the primeval chaos, the god of time, and the world—incarnate matter issuing from the fundamental principle of all things. A companion deity with Anu is Hea, god of the sea and of Hades. He is lord of generation and of all human beings; he animated matter and rendered it fertile, and inspired the universe with life. The third member of this triad was Bel (Eli, Eum, Kaptu), the demiurgus and ruler of the organized universe. There were also second and third trinities descending from the first, but becoming more and more defined in character, and assuming a decidedly sidereal aspect.

The system of Plato may be thus stated: God first produced the ideal world, i. e. his infinite understanding conceived of the existence of the world, and formed the plan of creation. The *real* world was then formed after this *ideal* world as its model; and this was done by uniting the soul of the world with matter, by which the world became an animated, sensitive, rational creature—guided, pervaded, and held together by this rational soul. The three principles of Plato were (*a*) the Su-

preme God, whom he calls *Πατήρ*; (*b*) the divine understanding, which he calls *νοῦς, λόγος, σωτήρ, σοφία*; and (*c*) the soul of the world. These views are developed in his *Timæus*, etc. The Neo-Platonists eagerly embraced these ideas of Plato, and during the 2d and 3d centuries seemed to labor to outdo one another in explaining, defending, and more fully developing them. They not only widely differ from Plato, but often disagree among themselves in their mode of thinking and in their phraseology.

While the Jews who resided in Palestine were satisfied with their Phariseo-Rabbinic theology, and looked for their Messiah as a religious reformer, this was not the case with those residing elsewhere, who had been educated under the influence of the Grecian philosophy. These abandoned the expectation of a future Messiah, or regarded his kingdom as entirely of a moral nature. Among them the theory of the *λόγος* is found as early as the 1st century. The *λόγος* they regarded as existing before the Creation, and as the instrument through whom God made all things. See Knapp, *Christ. Theol.* p. 145 sq.; Lenormant, *Chald. Magic*, ch. ix; Smith, *Chald. Account of Genesis*; Tholuck, *Die speculative Trinitätslehre der neuern Orientalen* (Berlin, 1826, 8vo).

TRINITY, FRATERNITY OF THE, a religious society instituted at Rome by Philip Neri in 1548. They had charge of the pilgrims who were constantly coming to Rome from all parts of the world. Pope Paul IV gave them the Church of St. Benedict, near which they built a large hospital, and in which there was also a college of twelve priests for the instruction of pilgrims.—Eadie, *Eccles. Cyclop.* s. v.

TRINITY SUNDAY, the octave day of the feast of Pentecost. The introduction of this day into the calendar is of comparatively recent date, it being established by pope Benedict XI, A.D. 1305. It is probable that the zeal of many Christians against the use of images in the 8th and 9th centuries may have been the first cause of the appointment of a distinct day for meditating upon the nature of the Holy Trinity in unity, or the one true God, as distinguished from all idols. The reason for its late introduction is that in the creed of the Church, and in its psalms, hymns, and doxologies, great prominence was given to this doctrine, and it was thought that there was no need to set apart a particular day for that which was done every day.

Triphysites (from *τρεῖς*, three, and *φύσεις*, natures), those divines who, at the fourteenth and fifteenth councils of Toledo, A.D. 684, 688, carried their opposition to the Monophysites and Monothelites to such an extreme that they declared a belief not only in Christ's distinct divine and human natures, but also in a third nature resulting from the union of the two.—Blunt, *Dict. of Sects*, s. v.

Triplet, a window of three lights. Many such occur in the First Pointed style, the centre light being usually longer or more elevated than the two side lights.

Trip'olis (*ἡ Τρίπολις*), the Greek name of a city of great commercial importance, which served at one time as a point of federal union for Aradus, Sidon, and Tyre (hence the name the *threefold city*), which each had here its special quarter. What its Phœnician name was is unknown; but it seems not impossible that it was *Kadytis*, and that this was really the place captured by Necho, of which Herodotus speaks (ii, 159; iii, 5). Kadytis is the Greek form of the Syrian *Kedutha*, "the holy," a name of which a relic still seems to survive in the Nahr-Kadish, a river that runs through *Tarabulus*, the modern representative of Tripolis. All ancient federations had for their place of meeting some spot consecrated to a common deity, and just to the south of Tripolis was a promontory which went by the name of *Θεοῦ πρόσωπον*.

It was at Tripolis that, in the year B.C. 351, the plan was concocted for the simultaneous revolt of the Phœnician cities and the Persian dependencies in Cyprus against the Persian king Ochus. Although aided by a league with Neectanebus, king of Egypt, this attempt failed, and in the sequel a great part of Sidon was burned and the chief citizens destroyed. Perhaps the importance of Tripolis was increased by this misfortune of its neighbor, for soon after, when Alexander invaded Asia, it appears as a port of the first order. After the battle of Issus, some of the Greek officers in Darins's service retreated thither, and not only found ships enough to carry themselves and eight thousand soldiers away, but a number over and above, which they burned in order to preclude the victor from an immediate pursuit of them (Arrian, ii, 13). The destruction of Tyre by Alexander, like that of Sidon by Ochus, would naturally tend rather to increase than diminish the importance of Tripolis as a commercial port. When Demetrius Soter, the son of Seleucus, succeeded in wresting Syria from the young son of Antiochus (B.C. 161), he landed there and made the place the base of his operations. It is this circumstance to which allusion is made in the only passage in which Tripolis is mentioned in the Bible (2 Mace. xiv, 1). The prosperity of the city, so far as appears, continued down to the middle of the 6th century of the Christian era. Dionysius Periegetes applies to it the epithet *λαττοειν* in the 3d century. In the *Peutinger Table* (which probably was compiled in the reign of the emperor Theodosius), it appears on the great road along the coast of Phœnicia, and at Orthosia (the next station to it northwards) the roads which led respectively into Mesopotamia and Cilicia branched off from one another. The possession of a good harbor in so important a point for land traffic doubtless combined with the richness of the neighboring mountains in determining the original choice of the site, which seems to have been a factory for the purposes of trade established by the three great Phœnician cities. Each of these held a portion of Tripolis surrounded by a fortified wall, like the Western nations at the Chinese ports; but in A.D. 543 it was laid in ruins by the terrible earthquake which happened in the month of July of that year, and overthrew Tyre, Sidon, Berytus, and Byblus as well. On this occasion the appearance of the coast was much altered. A large portion of the promontory Theuprosopon (which in the Christian times had its name, from motives of piety, changed to Lithoprosopon) fell into the sea, and, by the natural breakwater it constituted, created a new port, able to contain a considerable number of large vessels. The ancient Tripolis was finally destroyed by the sultan El-Mansûr in A.D. 1289, and the modern Tarabalûs is situated a couple of miles distant to the east, and is no longer a port. El-Myna, which is perhaps on the site of the ancient Tripolis, is a small fishing village. Tarabalûs contains a population of fifteen or sixteen thousand inhabitants, and is the centre of one of the four pashalies of Syria. It exports silk, tobacco, galls, and oil, grown in the lower parts of the mountain at the foot of which it stands, and performs, on a smaller scale, the part which was formerly taken by Tripolis as the entrepôt for the productions of a most fertile region (Diod. Sic. xvi, 41; Strabo, xvi, 2; Vossius *ad Melam*, i, 12; Theophanes, *Chronographia*, sub anno 6043).—Smith. For the modern place, see Pococke, ii, 146 sq.; Maudrell, p. 26; Berekharit, p. 163 sq.; Porter, *Handbook*, p. 542; Bideker, *Palestine*, p. 509 sq. (where a map is given). See PHŒNICIA.

Coins of Tripolis.

Triptych, a picture with two folding-doors, set over altars. The centre panel usually contains the chief subject. In the illustration (from the pencil of Mr. A. Welby Pugin) the triptych is a kind of cupboard with folding-doors, containing a throned figure of the Virgin Mary crowned, and holding her divine child in her lap. A figure of Peter on one side and of Paul on the other are painted on the inner panels of the doors.—Lee, *Gloss, of Liturg. Terms*, s. v.

Triptych.

Triquetral (*three-cornered*), a censer used by bishop Andrewes, in which the clerk put incense at the reading of the first lesson.

Trisacramentarians, a controversial name given to those reformers who maintained that there are three sacraments necessary to salvation, viz. baptism, the Lord's supper, and absolution. This opinion was held by some Lutherans at Leipsic, and was authoritatively set forth as a doctrine of the Church of England in the *Institution of a Christian Man* (1562).—Blunt, *Dict. of Sects*, s. v.

Trisagion (*τρίσάγιον*, *thrice holy*) was so called because of the thrice repeating "Holy, holy, holy, Lord

God of hosts," in imitation of the seraphim in the vision of Isaiah. The original of this hymn was "Holy, holy, holy, Lord God of hosts! heaven and earth are full of thy glory, who art blessed forever. Amen." Thus it is in the *Constitutions*, and frequently in Chrysostom. Afterwards the Church added some words to it, and sang it in this form: "Ἅγιος ὁ Θεός, ἅγιος ἰσχυρός, ἅγιος ἀθάνατος, ἐλέησον ἡμᾶς" ("Holy God, holy Mighty, holy Immortal, have mercy upon us"). The hymn is attributed to the patriarch Proclus, in the 4th century. Theodosius the younger ordered it to be sung in the liturgy, after his vision of a child chanting it during an earthquake at Constantinople. Later still, by Anastasius the emperor, or by Peter Enaphens, bishop of Antioch, the following words were added: ὁ σταυρωθεὶς ἐπὶ ἡμῶν ("that was crucified for us"). This was done to oppose the heresy of the Theopaschites (q. v.), which was, in effect, to say that the whole Trinity suffered, because this hymn was commonly applied to the whole Trinity. To avoid this inconvenience, Calandio, bishop of Antioch, in the time of Zeno the emperor, made another addition to it of the words "Christ our King," reading it thus: "Holy God, holy Mighty, holy Immortal, Christ our King, that wast crucified for us, have mercy on us." These additions occasioned much confusion in the Eastern Church, while the Constantinopolitans and Western Church stiffly rejected them. It was chiefly sung in the middle of the communion service, though sometimes it was used on other occasions. After the preface this hymn was always sung, and, according to Cyril of Jerusalem, Chrysostom, and the second Council of Vaison, also at all masses, matin lenten, or of the dead.—Bingham, *Christ. Antiq.* bk. xiv, ch. ii, § 3.

Trisantia, a mediæval term for (1) a cloister, or (2) a place of retreat for religious persons where meditations are made.—Lee, *Gloss. of Liturg. Terms*, s. v.

Triscilidæ, a sect of Sabellian heretics mentioned by Philaster (*Her.* c. xciii), Augustine (*Her.* c. lxxiv), and Prædestinatus (*Her.* c. lxxiv) as maintaining the opinion that the divine nature is composed of three parts, one of which is named the Father, the second part the Son, and the third the Holy Ghost; and that the union of these three parts constitutes the Trinity. Philaster, in condemning this heresy, uses expressions very similar to some in the Athanasian hymn, "Ergo est vera persona Patris quæ misit Filium, et est vera persona quæ advenit de Patre, et est vera persona Spiritus quæ a Filio-et Patre missa est."—Blunt, *Dict. of Sects*, s. v.

Tritheim (Lat. *Tritheimius*), JOHANN, a German historian and theologian, was born at Tritenheim, near Treves, Feb. 1, 1462, being the only son of John of Heidenberg and Elizabeth of Longway. His early education was conducted in a desultory manner, but in 1482 he entered the Benedictine abbey at Spanheim, where the next year he was elected abbot, and administered its affairs with great zeal. In 1506 he exchanged this position for a similar one in the abbey of Würzburg, where he remained till his death, Dec. 27, 1516. His many learned writings are enumerated in Hoefler, *Nour. Biog. Générale*, s. v. The principal ones are, *De Scriptoribus Ecclesiasticis* (1492);—*Polygraphia* (1518);—*Stenographia* (1531).

Tritheists, a sect which appeared in the 6th century, and which taught that the Father, Son, and Spirit were three coequal, distinct Beings, united by one common will and purpose. This sect was divided into the Philoponists and Cononites, according to the names of their respective leaders, who agreed in the doctrine of the three Persons in the Godhead, but differed in some opinions concerning the resurrection of the body. Having made this change in the doctrine of the Trinity, they made another change answerable to it in the form of baptism—baptizing in the name of three unoriginated principles, as three Sons, three Paracletes. As a consequence of asserting three unbegotten principles, they

made three Fathers, three Sons, and three Holy Ghosts, which was a Trinity of trinities.

Cyril of Jerusalem (*Catech.* c. xvi) attributes the origin of Tritheism in its broadest form to Marcion, and Hilary (*De Synod.* xxii, 56) associates it with the heresy of Photinus. The Tritheists of the 6th century did not hold the opinion in its broad form, and would have shrunk from any such statement as that there are three Gods. The Tritheism of the 6th century was revived by Roscelin in the 11th, and his Nominalistic opinion that the name God is the abstract idea of a genus containing the three Persons called Father, Son, and Holy Ghost was opposed by Anselm (*De Fide Trinitat.* etc.), and was condemned by the Council of Soissons, A.D. 1092. In 1691 the heresy was revived by Dr. Sherlock (*A Vindication of the Doctrine of the Holy and Ever-blessed Trinity*). In a sermon delivered before the University of Oxford (1695), the preacher maintained the theory of Dr. Sherlock that "there are three infinite distinct minds and substances in the Trinity," and that "the three Persons in the Trinity are three distinct infinite minds or spirits, and three individual substances." These propositions were condemned by the authorities of the university. The speculation of Hutchinson in the last century was very similar in its logical consequences to that of the older Tritheists. See Bingham, *Christ. Antiq.* bk. xi, ch. iii, § 4; Blunt, *Dict. of Sects*, s. v.

Triumph (usually תִּצְחָה or תִּצְחָה, *ṣiphaḥaiw*). Almost all ancient nations celebrated success in war by a triumph, which generally included a gorgeous procession, a display of captives and spoils, and a solemn thanksgiving and sacrifice to the gods. Among the Egyptians, the triumph of a king returning from war was a grand solemnity celebrated with all the pomp which the wealth of the nation could command (Wil-

Triumphal Procession of Rameses III.

kinson, *Anc. Egypt.* i, 277 sq.). The Assyrian sculptures abound with similar representations. See SENNACHERIB.

The Hebrews, under the direction of inspired prophets, celebrated their victories by triumphal processions, the women and children dancing, accompanying their steps with various musical instruments (see Judg. xi, 34-37), and singing hymns of triumph to Jehovah, the living and true God. The song of Moses at the Red Sea, which was sung by Miriam to the spirited sound of the timbrel (Exod. xv, 1-21), and that of Deborah on the overthrow of Barak (Judg. v, 1-31), are majestic examples of the triumphal hymns of the ancient Hebrews. Triumphal songs were uttered for the living (1 Sam. xviii, 6-8; 2 Chron. xx, 21-28) and elegies for the dead (2 Sam. i, 17-27; 2 Chron. xxxv, 25). The conquerors were intoxicated with joy, and the shout of victory resounded from mountain to mountain (Isa. xlii, 11; lii, 7-8; lxxii, 1-4; Jer. i, 2; Ezek. vii, 7; Nah. i, 15). Monuments in honor of victory were erected, and the arms of the enemy were hung up as trophies in the temples (1 Sam. xxi, 9; xxxi, 10; 2 Sam. viii, 13; 2 Kings xi, 10). Indignities to prisoners formed a lead-

Ancient Assyrian King in Procession after Victories.

ing feature of triumphs among ancient nations generally; and among the Assyrians and Babylonians atrocities were frequently practiced, such as maiming, blinding [see EYE], and killing, especially in the case of rebel princes. See CARRIVE. To put one's foot upon the

Assyrian King Placing the Foot on the Neck of an Enemy.

respect, we find Joshua ordering the five kings of the Canaanites, who had taken refuge in a cave, to be brought out that his captains might come one after another and put their foot on the necks of the prostrate princes (Josh. x, 24). Literally this usage does not ap-

processions became very common under the successors of Alexander the Great, particularly the Seleucide of Syria and the Ptolemies of Egypt, who are generally believed to have been the inventors of the *toga palmata*, or robe adorned with representations of palm-trees interwoven into its fabric. It is clearly to the Græco-Syrian form of triumph that the apostle John alludes in the Apocalypse, when he describes those who had overcome by the blood of the lamb standing "before the throne, clothed with robes, and palms in their hands" (Rev. vii, 9).

Next to the Egyptians, the Romans were chief among ancient nations in attributing importance to a triumph, and exerting themselves to bestow a gorgeous brilliancy upon the triumphal procession. The highest honor which could be bestowed on a citizen or magistrate was the triumph or solemn procession in which a victorious general passed from the gate of the city to the Capitol. He set out from the Campus Martius, and proceeded along the Via Triumphalis, and from thence through the most public places of the city. The streets were strewn with flowers, and the altars smoked with incense. First went a numerous band of music, singing and playing triumphal songs; next were led the oxen to be sacrificed, having their horns gilt and their heads adorned with fillets and garlands; then followed the spoils taken from the enemy, carried in open wagons, or on a species of bier called *feretrum*, around which were displayed the golden crowns sent by allied and tributary states. The titles of the vanquished nations were inscribed on wooden frames; and images or representations of the conquered countries and cities were exhibited. The captive leaders followed in chains, with their

Roman Triumph.

children and attendants; after the captives came the lictors, having their fasces wreathed with laurel, followed by a great company of musicians and dancers, dressed like satyrs, and wearing crowns of gold; in the midst of whom was a pantomime, clothed in a female garb, whose business it was with his looks and gestures to insult the vanquished. A long train of persons followed, carrying perfumes; after whom came the general, dressed in purple, embroidered with gold, wearing a crown of laurel on his head, holding a branch of laurel in his right hand, and in his left an ivory sceptre with an eagle on the top, his face painted with vermillion, and a golden ball hanging from his neck on his breast. He stood upright in a gilded chariot adorned with ivory, drawn by four white horses, attended by his relations and a great crowd of citizens, all clothed in white. It was creditable to Roman morality that a public slave accompanied the conqueror in his chariot, to remind him of the vicissitudes of fortune, and to present to him, in the midst of all his glory, the remembrance of the varied changes and chances of mortality. The conqueror's children sometimes accompanied him, and sometimes rode in a second chariot, escorted by the lieutenants and military tribunes who had served in the war. The consuls, senators, and other magistrates followed the general's chariot on foot; and the whole procession was closed by the victorious army, drawn up in order, crowned with laurel, decorated with the gifts which they had received for their valor, and singing their own and their general's praises. See Smith, *Dict. of Class. Antiq.* s. v. See TRIVS (*Emperor*).

Paul makes frequent allusions to such triumphal processions (Col. ii, 15, Eph. iv, 8), with which he compares the triumphs of Christ's followers in spreading abroad, in every place, the perfume of the gospel of salvation (2 Cor. ii, 14-16). Our Saviour's triumphal entry into Jerusalem (Matt. xxi, 1-9) was a token of his royal character (see the monographs in Hase, *Leben Jesu*, p. 181).

Triumphus, AUGUSTINUS, an Augustinian hermit-monk who was a native of Ancona, attended the University of Paris for a time, and was present at the Council of Lyons in 1274. He also sojourned at Venice while engaged in the publication of several small books in honor of the Virgin, and at Naples, where he became the favorite of kings Charles and Robert, and where he died in 1328, at the age of eighty-five years. A number of published and unpublished works from his pen are yet extant. We note one *On the Ecclesiastical Power*, addressed to pope John XXI (Angsburg, 1473):—*A Commentary on the Lord's Prayer*:—*Comments on the Ave Maria and the Magnificat* (Rome, 1590, 1592, 1603):—*A Millelogium* from the works of Augustine, unfinished by Triumphus, but completed by the Augustinian Bartholomew of Urbino (Lyons, 1555). Of unpublished writings we mention, *Four Books on the Sentences*:—*On the Holy Ghost*, a polemic against the Greeks:—*On the Spiritual Hymn*:—*On the Entrance into the Land of Promise*:—*On the Knowledge and Faculties of the Soul*:—*Theorems respecting the Resurrection of the Dead*:—*Expositions of Ezekiel and all New-Test. Books*:—*Discourses of the Lord*:—*On the Saints*:—*On the Morality of St. Gregory*. See Pamphilus, *Chron. Erenit.* s. August. p. 46; Cave, *Script. Eccl. Hist. Lit.* (Gen. 1720).—Herzog, *Real-Encyclop.* s. v.

Trivet, NICHOLAS, an English Dominican monk, was born at Norfolk about 1258. He was educated at Oxford and Paris, and became prior of English houses of his order. He died in 1328. He was the author of *Annales Sex Regum Anglie, cum Continuatione ut et A. Murimuthensis Chronicon*, etc. (Oxon. 1719-22, 2 vols. 8vo). He left many MSS. on various subjects of philosophy and theology, as well as a *Commentary on Seneca's Tragedies*, etc. See Chalmers, *Biog. Dict.* s. v.; Allibone, *Dict. of Brit. and Amer. Authors*, s. v.

Trivulzi, the name of several cardinals of Italian extraction, but of French association in the diplomatic

movements of their age. See Hoefer, *Nour. Biog. Générale*, s. v.

1. AGOSTINO was the nephew of Antonio (1); became deacon in 1517, archbishop of Reggio in 1520, and successively bishop of Bobbio (1519-21), Toulon (1524), Asti (1528), Bayeux (1529), and Brugnato (1535); and died at Rome, March 30, 1548.

2. ANTONIO (1) was born at Milan in January, 1457, and after various diplomatic services was made bishop of Coma in 1487, and cardinal in 1501. He died at Rome, March 18, 1508.

3. ANTONIO (2), nephew of the following, was made successor of his uncle Agostino as bishop of Toulon in 1528, and cardinal in 1557. He died June 26, 1559.

4. SCARAMICCIO, a learned lawyer, was made professor of canon law at Pavia in 1491, and in 1499 counsellor of Louis XII. He became cardinal in 1517, bishop of Coma in 1508, and afterwards of Piacenza (1522-26). He died at the monastery of Maguzzano, near Verona, Aug. 9, 1527.

Tro'as (Τρωάς). The city from which Paul first sailed, in consequence of a divine intimation, to carry the Gospel from Asia to Europe (Acts xvi, 8, 11)—where he rested for a short time on the northward road from Ephesus (during the next missionary journey), in the expectation of meeting Titus (2 Cor. ii, 12, 13); where, on the return southwards (during the same missionary journey), he met those who had preceded him from Philippi (Acts xxi, 5, 6), and remained a week, the close of which (before the journey to Assos) was marked by the raising of Eutychus from the dead during the protracted midnight discourse; and where, after an interval of many years, the apostle left (during a journey the details of which are unknown) a cloak and some books and parchments in the house of Carpus (2 Tim. iv, 13)—deserves the careful attention of the student of the New Test., and is memorable as a relic of the famous city of Troy.

The full name of the city was *Alexandria Troas* (Livy, xxxv, 42), and sometimes it was called simply *Alexandria*, as by Pliny (*Hist. Nat.* v, 33) and Strabo (xiii, 593), sometimes simply *Troas* (as in the New Test. and the *Ant. Hin.* See Wesseling, p. 334). The former part of the name indicates the period at which it was founded. It was first built by Antigonus, under the name of *Antigonia Troas*, and peopled with the inhabitants of some neighboring cities. Afterwards it was embellished by Lysimachus, and named *Alexandria Troas*. Its situation was on the coast of Mysia, opposite the south-east extremity of the island of Tenedos. The name *Troad* strictly belongs to the whole district around Troy.

Under the Romans it was one of the most important towns of the province of Asia. It was the chief point of arrival and departure for those who went by sea between Macedonia and the western Asiatic districts; and it was connected by good roads with other places on the coast and in the interior. For the latter see the map in Leake's *Asia Minor*, and in Lewin's *St. Paul*, ii, 81.

Coins of Troas.

Ruins of the Gymnasium at Troas.

The former cannot be better illustrated than by Paul's two voyages between Troas and Philippi (Acts xvi, 11, 12; xx, 6), one of which was accomplished in two days, the other in five. At this time Alexandria Troas was a *colonia* with the *Jus Italicum*. This strong Roman connection can be read on its coins. The Romans had a peculiar feeling connected with the place, in consequence of the legend of their origin from Troy. Suetonius tells us that Julius Caesar had a plan of making Troas the seat of empire (*Cæs.* 79). It may perhaps be inferred from the words of Horace (*Carm.* iii, 3, 57) that Augustus had some such dreams. Even the modern name *Eski-Stambul* or *Eski-Istanbul* ("Old Constantinople") seems to commemorate the thought which was once in Constantine's mind (*Zosim.* ii, 30; *Zonar.* xiii, 3), who, to use Gibbon's words, "before he gave a just preference to the situation of Byzantium, had conceived the design of erecting the seat of empire on this celebrated spot, from which the Romans derived their fabulous origin."

The ruins at *Eski-Stambul* are considerable. The most conspicuous, however, especially the remains of the aqueduct of Herodes Atticus, did not exist when Paul was there. The walls, which may represent the

extent of the city in the apostle's time, enclose a rectangular space, extending above a mile from east to west, and nearly a mile from north to south. The harbor (Conybeare and Howson, *St. Paul*, i, 283) is still distinctly traceable in a basin about 400 feet long and 200 broad.—Smith. Descriptions in greater or less detail are given by Pococke, Chandler, Hunt (in *Walpole's Memoirs*), Clarke, Prokesch, Richter (*Walfahrten*, p. 462), Olivier, Fellows, and the latter travellers mentioned in *Murray's Handbook for Turkey in Asia*, p. 153-159. The vicinity has recently become

noted for the discovery of what are presumed to be the ruins of ancient Troy at Hisarlik by Schliemann (*Troy and its Remains* [Lond. 1875]). See also Maclaren, *Plain of Troy* (Edinb. 1863); Meyer, *Gesch. von Troas* (Leips. 1877).
Trogyllium (*Τρογύλλιον*), the rocky extremity of the ridge of Mycale, which is called thus in the New Test. (Acts xx, 15) and by Ptolemy (v, 2), and *Trogilium* (*Τρογίλιον*) by Strabo (xiv, 636). It is directly opposite Samos (q. v.). The channel is extremely narrow. Strabo (*loc. cit.*) makes it about a mile broad, and this is confirmed by the Admiralty charts (1530 and 1555). Paul sailed through this channel on his way to Jerusalem at the close of his third missionary journey (Acts xx, 15). The navigation of this coast is intricate; and it can be gathered from ver. 6, with subsequent notices of the days spent on the voyage, that it was the time of dark moon. Thus the night was spent at Trogyllium. It is interesting to observe that a little to the east of the extreme point there is an anchorage which is still called *St. Paul's Port*.—Smith. Pliny refers to three small islands lying about Trogyllium, and names them Sandalion, Psilon, and Argennon (*Hist. Nat.* v, 37). The port where Paul anchored is generally considered to be that

Plan of the Remains of Troas.

Plan of Trogyllium and its Adjoining Islands.

sheltered by Sandalion; but the port now known as the Port of St. Paul is that protected by the island of Nero, the ancient Argemnon (Lewin, *St. Paul*, ii, 89). See PAUL.

Troil, Samuel, a Swedish prelate, was born May 22, 1706, at Saint Schedwi (Dalecarlia), being the son of a pastor. He studied philosophy at the University of Stockholm, and became successively grand almoner of the king (April 22, 1740), president of the consistory (Jan. 2, 1742), bishop of Westerås (April 23, 1751), and archbishop of Upsala (Nov. 8, 1757), where he died, Jan. 18, 1764. He was a learned and eloquent preacher, and left many funeral discourses, etc.

Troil, Uno, a Swedish prelate, son of the foregoing, was born at Stockholm, Feb. 24, 1746. After a brilliant course of study at Upsala, and extensive travels in Germany, France, and England, he became successively almoner of the regiment (1773), preacher in ordinary to the king (1775), bishop of Linköping (1784), president of the consistory of Stockholm and archbishop of Upsala (Aug. 30, 1787), where he died, July 27, 1803. He wrote several historical sketches, for which see Hoefer, *Nonre, Biog. Générale*, s. v.

Troki, ISAAC BEN-ABRAHAM, a Jewish scholar, who derived his name from his native place, Troki, a town in the Russian province of Wilna, was born in 1533. At the time in which our hero was born, Poland was not only the seat of Jewish learning, but also the scene of action of the different sects to which the Reformation gave rise. "In the earlier years of the religious Reformation of the 16th century, the scepticism which had prevailed so generally in Rome and the Italian states, chiefly among the higher clergy, and perhaps most intensely in the highest, tainted the Italian mind, and imparted a peculiar stamp of heterodoxy to the adherents of the Reformation in that country. The court of Rome had sagaciously put off the garb of pagan laxity which

it had worn so jauntily since the revival of letters. The Council of Trent, while reviewing every article of Roman theology, having stated in its canons the fundamental articles of Christian faith with a clearness that was indeed much needed, gave strict instructions to all the licensed preachers of their Church, and so enabled them to assume a new appearance of sound faith, at least in those particulars which would contrast not only with their former heterodoxy, now to be concealed, but with the open heterodoxy of certain fugitive Italian Protestants. These persons found congenial society among the Jews in Poland, who, while heroically adhering to the letter of the Mosaic law, had nevertheless not accepted the more fully unfolded verity of Christian revelation. Heretics they were in the eye of Rome, and the persecution that haunted them drove them at once into the arms of the Polish Karaites; for, like them, and even more than they, these protesters against Rome hated tradition and all human authority. Like the Karaites, they were staid Monotheists in the same narrow sense. They outran Arius in the race of unbelief. Their own Socino left his name to a sect just as Sadok had left his; and Socino, with his principal followers, chose Poland to be at once their asylum and their citadel. From that time it became the centre of Socinianism in Europe. In Poland the Jew and the Christian both enjoyed religious liberty, and for once the most orthodox of the Israelites and the least orthodox of the Christians could fraternize on *one* point, and on *only one*." One of those Jews was Isaac. He was brought up in the study of Talmudism as a branch of Jewish learning, and in the faith of the Karaites, cold withal, until quickened and elevated under the impulse of persecution. Young Isaac, to whom Hebrew was vernacular, was also liberally educated in the Latin and Polish languages. In these languages he read the chief controversial writings, as they were issued by their eminent authors, against the Church of Rome. He carefully studied the Catholic-Polish version of the Bible, made by Leonard from the Vulgate, which appeared in Cracow in 1561, and again in 1575 and 1577: the Calvinistic-Polish version, called the Radzivil Bible, and published in 1563; and the Socinian version, made also from the original texts, by the celebrated Simon Budny, which was published at Nieswicz, in Lithuania, in 1570; as well as the writings of Nicholas Paruta, Martin Chechowiz, and Simon Budny, the heads of Unitarianism in Poland. As all these sects, who differed from each other on almost every other point, agreed in their attack upon the Jews and their faith, the rabbi set to work on a confutation of Christianity. He read the New Test., in Budny's version, with the cool and orderly habit of a hard-working student. Every passage on which he could fix a doubt or hazard a denial was marked as it stands in the sacred book, and for the purpose of controversy. The entire stock of anti-Christian cavils with which educated Jews, at least, are familiar, combined with the objections of the Socinians, were brought to bear on the New Test. by direct attack on all the leading sentences in relation to the person, life, and ministry of Christ. The work, written in Hebrew, under the title of *Confirmation of the Faith*, **הוסיפה** **האמת**, and which has a world-wide celebrity, Isaac finished in 1593, when sixty years of age. The work is interesting for its quotations from some little-known Christian and polemical works in the Polish language, and because it has been made use of by critical writers upon the New Test. from Voltaire to Strauss; for the former at least acknowledges, in his *Mélanges*, iii, 344: "Il a rassemble toutes les difficultés que les incrédules ont produites depuis. . . . Enfin, incrédules les plus déterminés n'ont presque rien allégué qui ne soit dans ce rempart de la foi du rabbin Isaac." The book is divided into two parts—the first, which is devoted to an examination of the objections raised by Christians against

Judaism, and which is subdivided into fifty chapters, discusses very minutely the interpretation of the Messianic passages of the Old Test. and their application to Christ as the predicted Messiah; while the second part is taken up with a critical examination of the statements made in the sundry books of the New Test. Troki died in 1594. His work was first published by Wagenseil, with a Latin translation, in his collection of *The Fiery Darts of Satan* (*Tela Ignea Satanae*) (Altdorf, 1681), from a MS. obtained from an African Jew, which was imperfect. A reprint of this vitiated text without the Latin translation appeared in Amsterdam in 1717, and in Jerusalem in 1845. The best edition, however, is that edited by rabbi D. Deutsch, with a German translation (Sohran, 1865). Besides this German translation, there is another by M. Gelling (Hamb. 1631-33). It was translated into Spanish by Isaac Athia, and into Italian by M. Luzzatto. The work has also been refuted by Müller, *Confutatio Libri Chizuk Emmaa*, comprised in his *Judaismus ex Rabbinnorum Scriptis Detectus, etc., Refutatus* (ibid. 1644); by Gousset, *Ternio Controversarum adversus Judeos, Oppositus R. Isaac Chizuk Emmaa* (Dordrecht, 1688), which, however, was not satisfactory to the duke Louis of Orleans (d. 1752), who wrote another refutation; by Gebhard, *Centum Loca N. T. Vindicata adversus Chizuk Emmaa* (Greifswalde, 1699); Storr, *Evang. lische Glaubenskraft. Gegen das Werk Chizuk Emmaa* (Tüb. 1763); and by Kidder [Bp.], in his *Demonstration of the Messiah* (2d ed. Lond. 1726). See Wolf, *Bibl. Hebr.* iv, 639 sq.; Hoefel, *Nour. Biog. Générale*, xxvi. 10; Fürst, *Bibl. Jud.* ii, 138; iii, 448. De' Rossi, *Dizionario Storico* (Germ. transl.), p. 320 sq.; id. *Biblioth. Antichristiana*, p. 42 sq.; Kitto, *Cyclop.* s. v.; Steinschneider, *Catal. Libr. Hebr. in Bibl. Bodl.* col. 1974 sq., and his *Jewish Literature*, p. 212; Etheridge, *Introduct. to Hebr. Lit.* p. 444; Rule, *Hist. of the Karaite Jews*, p. 170 sq.; Basnage, *Hist. des Juifs* (Taylor's transl.), p. 772; Geiger, *Isaak Troki, ein Apologet des Judenth. am Ende des 16ten Jahrhunderts.* (Breslau, 1853; reprinted in his *Nachgelassene Schriften*, iii, 178, Berlin, 1876); id. *Proben jüdischer Vertheidigung gegen christliche Angriffe*, in Liebermann's *Kalender*, 1851; Grätz, *Gesch. d. Juden*, ix, 490 sq.; Becker, in *Saath auf Hoffnung* (Erlang. 1870), vii, 154 sq.; Fürst, in the same quarterly (ibid. 1871), viii, 224 sq. (B. P.)

Trolle, GUSTAVUS, a Swedish prelate, descended from a noble Danish family named *Erik*, was born near the close of the 15th century, and became archbishop of Upsala Oct. 30, 1514, but was besieged in his palace by an old family enemy; and, although reinforced by the interdict and troops of pope Leo X. he at length fell in battle on the island of Fionia, and died at Gottorp, near Sleswick, July 11, 1535. For the details of his stormy career see Hoefel, *Nour. Biog. Générale*, s. v.

Tromm (*Van der Trommen*, Lat. *Trommius*), ABRAHAM, a learned Protestant divine of Holland, was born at Groningen, Aug. 23, 1633, and studied the classics, philosophy, and theology in that university. He travelled through Germany, Switzerland, France, and England, and on his return was appointed curate at Haren. In 1671 he was invited to the pastorate of Groningen, and continued there until his death, May 29, 1719. John Martinus, of Dantzie, having begun a *Concordance of the Old Testament* in Flemish, Tromm completed it (Amsterd. 1685-92, 2 vols. fol.). He also published a *Greek Concordance of the Septuagint* (Utr. 1718, 2 vols. fol.), which has remained a standard work.

Tronchin, Louis, a Swiss divine, was born at Geneva, Dec. 4, 1629, and after studying theology there and at Saumur, he travelled abroad and then became preacher at Lyons in 1651. In 1661 he was made professor of theology in Geneva, where he died, Sept. 8, 1705. He was noted for his mildness during the Calvinistic controversy of his time.

Tronchin, Theodore, a learned Swiss divine, father of the preceding, was born at Geneva, April 17,

1582. He was well educated, visited foreign universities, and on his return to Geneva, in 1606, he gave such proof of his learning that he was chosen professor of the Hebrew language. He was made minister in 1608, and created rector of the university in 1610. In 1616 he was promoted to the professorship of divinity. He was sent from Geneva to the Council of Dort, where he displayed his great knowledge in divinity, and a moderation which was highly applauded. For several of his works see Hoefel, *Nour. Biog. Générale*, s. v.; Herzog, *Real-Encyclop.* s. v.

Troop is, in the A. V., especially employed as the rendering (sometimes "band," etc.) of גִּדּוּד, *gedid*, which means a marauding party, in the forays for which Palestine has always been notorious, especially beyond the Jordan (Gen. xlix. 19; 1 Sam. iii. 22; xxii. 30; xxx. 8; Job xix. 12; Ps. xviii. 29; Jer. xviii. 22; Hos. vi. 9; vii. 1; Mic. v. 1).

Tropæa (τρόπαια), the name of churches erected in honor of martyrs, or dedicated to them. The reason of the name is found in the reported appearance of the cross to Constantine, and in the labarum on which, according to Eusebius, were inscribed the words τοῦ σταυροῦ τρόπαιον.—Farrar, *Eccles. Dict.* s. v.

Tropes, or *sequence*, are verses sung before the holy Gospel in the mass. They are a kind of prose, written in a species of verse, though unfettered by any recognised law of metre. They were introduced at the close of the 9th century. Four only are found in the Roman missal. See SEQUENCE.

Trophimus (Τρόφιμος, *nutritious*) a Hellenistic Christian, who with others travelled with the apostle Paul in the course of his third missionary journey, and during part of the route which he took in returning from Macedonia towards Syria (Acts xx. 4). A. D. 54. From what we know concerning the collection which was going on at this time for the poor Christians in Judea, we are disposed to connect him with the business of that contribution. Both he and Tychicus accompanied Paul from Macedonia as far as Asia (ἄχρι τῆς Ἀσίας, *loc. cit.*), but Tychicus seems to have remained there, while Trophimus proceeded with the apostle to Jerusalem. There he was the innocent cause of the tumult in which Paul was apprehended, and from which the voyage to Rome ultimately resulted. Certain Jews from the district of Asia saw the two Christian missionaries together, and supposed that Paul had taken Trophimus into the Temple (xxi. 27-29). From this passage we learn two new facts, viz. that Trophimus was a Gentile, and that he was a native not simply of Asia, but of Ephesus. A considerable interval now elapses, during which we have no trace of either Tychicus or Trophimus; but in the last letter written by Paul, shortly before his martyrdom, from Rome, he mentions them both (Τυχικὸν ἀπέστειλα εἰς Ἐφεσον, 2 Tim. iv. 12; Τρόφιμον ἀπέλπιον ἐν Μιλήτῳ ἀσθενούντα, ver. 20). From the last of the phrases we gather simply that the apostle had no long time before been in the Levant, that Trophimus had been with him, and that he had been left in infirm health at Miletus. Of the further details we are ignorant; but this we may say here, that while there would be considerable difficulty in accommodating this passage to any part of the recorded narrative previous to the voyage to Rome, all difficulty vanishes on the supposition of two imprisonments, and a journey in the Levant between them. Trophimus was no doubt at Miletus on the occasion recorded in Acts xx. 15-38, but it is most certain that he was not left there. The theory also that he was left there on the voyage to Rome is preposterous; for the wind forced Paul's vessel to run direct from the south-west corner of Asia Minor to the east end of Crete (xxvii. 7). We may add that when Trophimus was left in sickness at Miletus, whenever that might be, he was within easy reach of his home friends at Ephesus, as we see from xx. 17.

Stanley thinks that Trophimus was one of the two brethren who, with Titus, conveyed the Second Epistle to the Corinthians (2 Cor. viii, 16-24). "Trophimus was, like Titus, one of the few Gentiles who accompanied the apostle; an Ephesian, and therefore likely to have been sent by the apostle from Ephesus with the first epistle, or to have accompanied him from Ephesus now; he was, as is implied of 'this brother,' whose praise was in all the churches, well known; so well known that the Jews of Asia [Minor?] at Jerusalem immediately recognised him; he was also especially connected with the apostle on this very mission of the collection for the poor in Judea. Thus far would appear from the description of him in Acts xxi, 29. From xx, 4 it also appears that he was with Paul on his return from this very visit to Corinth" (*Commentary on Corinthians*, 2d ed. p. 192).

The traditional story that Trophimus was one of the seventy disciples is evidently wrong; but that part of the legend which states that he was beleaguered by Nero's orders is possibly true (*Menol. Gr.* iii, 57).—Smith.

Tropici are those who explain away, by figurative interpretations, texts of Scripture which Catholic faith and tradition require to be otherwise interpreted. Athanasius (*Ad Scrap.* i, 2, 10, 21) gives the name Tropici to the *Pneumatomachi* (q. v.) in so marked a manner that it has narrowly escaped becoming a proper name of that sect. For example, they argued that in 1 Tim. v, 21 the name of the Holy Spirit would naturally follow the names of Father and Son, that the term "elect angels," tropically taken, includes the Holy Spirit, the inference being that the Holy Spirit is a created angel. The word Tropici has been used, again, by Catholic writers to describe those who err regarding the holy sacraments, and explain as mere figures the words of our Lord in John iii, 5; Matt. xvi, 26.—Blunt, *Dict. of Sects*, s. v.

Tropitæ (*τροπιταί*) were a sect of heretics who held that our Lord acquired a body of flesh by conversion of the substance of the godhead into the substance of flesh; an opinion which arose in the latter time of the Arian controversy among those who, maintaining the true divinity of the Son of God, and rightly desiring to maintain his sinlessness, were perplexed by the erroneous assumption that the human body, as such, is and cannot but be the seat of sin. To avoid the impiety of attributing a sinful body to our Lord, they devised the tenet that the body of Christ is consubstantial with his divinity, which passes into the somewhat more definite proposition that the substance of the Word is converted into the substance of flesh, and that the flesh being in the form of man is thus called human. This heresy was first dealt with by Athanasius (*Epistle to Epictetus*), A.D. 370. Apollinaris was at the head of those who denied the true incarnation of Christ, asserting the general proposition that the Son of God did not assume that which in man is the seat of sin; and varied applications of this proposition were made by his followers. A belief in the possibility of the conversion of the godhead into flesh almost necessarily presupposes the reception of the Cabalistic doctrine that all matter is an emanation from God. Athanasius remarks that Valentinus fancied the flesh to be a part of Deity, and so concluded that the passion was common to the whole Trinity. Fabricius remarks that the heresy is confuted by Tertullian. The Council of Chalcedon determined that the two natures in Christ are united ἀρρήτως.—Blunt, *Dict. of Sects*, s. v.

Tropological INTERPRETATION is where a moral signification is given to a passage. An illustration will explain this sense. In Dent. xxv, 4 we read, "Thou shalt not muzzle the ox when he treadeth out the corn." Paul (1 Cor. ix, 9) quotes this precept of the law, adding the comment, "Doth God take care for oxen? Or saith he it altogether for our sakes? For our sakes, no doubt, this is written."—Blunt, *Dict. of Doctrines*, s. v. See HERMENEUTICS.

Troick, PERLEY, a Baptist minister, was born at Williamstown, Vt., Sept. 11, 1813. He studied theology at Hamilton, graduating in the class of 1841, and became pastor of the church in East Lansing, N. Y., in 1842, where he remained until the fall of 1847, and then removed to Sheboygan Falls, Wis., and commenced his labors as a missionary. Here he remained nine years, until an overworked brain compelled him to leave the ministry for a time. When his health was in a measure restored, he returned to his work. His longest pastorate was at Ripon, Wis., where he remained for five years. His last days were spent with his former Church at Sheboygan. He died in the hospital for the insane, near Oshkosh, Aug. 11, 1877. See *New York Examiner and Chronicle*. (J. C. S.).

Trosle, COUNCIL OF (*Concilium Trosleianum*), was held in Trosle, a small village near Soissons, France. It assembled June 26, 909, Herivé, archbishop of Rheims, presiding. The decrees of this council are signed by twelve prelates, and are contained in fifteen chapters; they are in the form rather of long exhortations than of canons, showing the pitiable condition of the Church.

1. Orders due respect to the Church, to clerks, and to monks.
2. Relates to the reform of abuses in monastic institutions.
3. Anathematizes those who pillage the Church.
4. Anathematizes those who injure and persecute the clergy.
5. Is directed against those who refuse tithes.
6. Against rapine and robbery, and orders restitution.
7. Is directed against the violent abduction of women, and incest.
8. Forbids priests to have women in their houses.
9. Exhorts all Christians to charity, and to avoid luxury and excess.
10. Forbids perjury and oath-breaking.
11. Is directed against passionate and litigious persons.
12. Against liars and homicides.
13. Denounces those who plunder the property of bishops after their death.
14. Contains an exhortation to all the faithful to abstain from sin and to do their duty.

See Mansi, *Concil.* ix, 520.—Landon, *Manual of Councils*, s. v.

Trost, MARTIN, professor of Hebrew at Wittenberg, where he also died, April 8, 1636, was born at Hoxter in the year 1588. He published, *Grammatica Hebraica Universalis* (Halle, 1627, and often); excerpts from his grammar were published by Biddovius, Gezeilius, Mitternacht, and Mylius:—*Disputatio de Mutatione Punctorum Hebraeorum Generali* (Wittenberg, 1633):—*Norum Test. Syr. cum Versione Latina ex Diversis Editionibus Recentiss.* Accesserunt in fine notationes variantis lectionis collectae a M. Tr. (Göthen, 1621). See Fürst, *Bibl. Jud.* iii, 419; Winer, *Handbuch der theol. Literatur*, i, 55; ii, 808; Steinschneider, *Bibliog. Handbuch*, p. 441. (B. P.)

Troth (*truth*), a word occurring in the Prayer-book only in the marriage service, thus, "And thereto I plight thee my troth;" that is, "thereto I most solemnly pledge thee my truth and sincerity." Near the end of the same service the minister says that the persons now married have "pledged their troth each to other," i. e. have promised to be true and faithful to each other.—Stanton, *Dict. of the Church*, s. v.

Trough (𐤔𐤓𐤕. *shûketh*, from 𐤔𐤓𐤕. *to drink*), a vessel of wood or stone for watering animals (Gen. xxiv, 20; xxx, 38). See WELL. But in Exod. ii, 16 a different term (𐤔𐤓𐤕, *râhat*, from the idea of *flowing*; "gutter," Gen. xxx, 38, 41) is employed for the same thing. See also KNEADING-TROUGH.

Troyes, COUNCIL OF (*Concilium Tricassinum*), were held in Troyes, France, a city which has a splendid Gothic cathedral, founded in 1208; the Church of St. Urban; the Church of St. John, in which Henry V of England was married; the Church of Sainte-Madeleine, containing a stone rood-loft of great beauty; and a public library of 110,000 volumes.

I. Held Oct. 25, 867. About twenty bishops, from the kingdoms of Charles and Lothaire, were present, who wrote a long letter to pope Nicholas I, in which they gave the history of the affair of Ebbo, and of the priests whom he had ordained. They, moreover, besought the pope not to interfere with the rule laid down by his predecessor, and not to permit, in future, the deposition of any bishop without the intervention of the holy see. This was in accordance with the principles of the false decretals of the pope. See Mansi, *Concil.* viii, 868.

II. Held in 878, by pope John VIII, who presided over thirty bishops. The former had come into France to escape from the violence of Lambert, duke of Spoleto. In the first session, the pope exhorted the bishops to compassionate the injuries which the Roman Church had suffered from Lambert and his accomplices, and to excommunicate them. The prelates, however, declined to act until the arrival of their brethren. In the second session, John read an account of the ravages committed by Lambert, after which the council declared him to be worthy of death and anathema. The archbishop of Arles presented a petition against bishops and priests leaving one Church for another, and also against persons deserting their wives in order to marry other women. In the third session, the bishops declared their consent to the pope's propositions. Hincmar of Laon, whose eyes had been put out, presented a complaint against his uncle, and demanded to be judged according to the canons. Hincmar of Rheims required that the cause might be delayed, to give him time to reply to the complaint. Further, the sentence of condemnation passed against Formosus, formerly bishop of Porto, and Gregory, a nobleman, was read, anathematizing them without hope of absolution; as also were the canons forbidding the translation of bishops, viz. those of Sardica, Africa, and of pope Leo. Seven canons were published.

1. Orders that temporal lords shall show due respect to bishops, and that they shall not sit down in their presence without their permission.

7. Forbids to receive anonymous accusations against any person.

III. Held in 1104, by the legate Richard, bishop of Albano, whom Paschal II had sent into France to absolve king Philip. The council was very numerous, and among those present we find Ivo of Chartres. Hubert, bishop of Senlis, accused of simony, cleared himself by oath. The election of the abbot Godefroi, by the people of Amiens, to the bishopric of that town was approved, and, in spite of the abbot's resistance, he was compelled to consent to it. See Mansi, *Concil.* x, 738.

IV. Held in 1107, by pope Paschal II, who presided. The main object of this council was to excite the zeal of men for the Crusade, besides which sentence of excommunication was denounced against those who should violate the Truce of God. The freedom of elections of bishops was asserted and established, and the condemnation of investitures repeated. Several German bishops were on various accounts suspended. Mansi (*Concil.* x, 754) adds five canons to those usually attributed to this council.

1. Orders that any one receiving investiture at the hands of a layman shall be deposed, as well as the person ordaining or consecrating him.

V. Held Jan. 13, 1128, by the legate Matthew, bishop of Albano, assisted by the archbishops of Rheims and Sens, thirteen bishops, and by St. Bernard, St. Stephen, and other abbots. A rule was drawn up for the Order of the Templars, instituted in 1118, prepared by authority of the pope and of the patriarch of Jerusalem. In this council the white dress was given to the Templars. See Mansi, *Concil.* x, 922.—Landon, *Manual of Councils*, s. v.

Truber, PRIMUS, a notable personage in the Reformation in Germany, was consecrated to the priesthood by Peter Bononus, bishop of Trieste, and took charge

of the parish of Lack in 1527. In 1531 he became a canon of Laibach, where the new doctrine was already promulgated, and soon afterwards he took ground in opposition to the Church of Rome. He was assailed by the clergy and the government, but protected by the nobles until 1540. Bishop Bononus then called him to Trieste. In 1547 the bishop of Laibach, Urban Textor, procured an order for the apprehension of Truber, in consequence of which the latter was compelled to flee. He found a new parish at Rothenburg in the following year, and while there he entered into wedlock with a woman named Barbara. From 1553 to 1560 he was pastor at Kempten. As early as 1550, or, perhaps, earlier still, Truber had endeavored to minister to the needs of his countrymen by preparing translations in the Wendish dialect of an *Abecedarium* and a catechism, which were printed, with Latin letters, at Tübingen. The prosecution of his plans was made possible through Vergerius (q. v.), who induced duke Christopher of Württemberg to pay for the printing. In 1555 the Wendish *Gospel of St. Matthew* appeared in print, and in 1556 the other historical books of the New Test. Romans, both epistles to the Corinthians, and Galatians were published in 1561. After various vicissitudes, Truber obtained the parish of Urach, where the famous baron Hans Ungnad became his patron and enabled him to establish his own press for the printing of Slavic books. The types used were both Glagolitic and Cyrillic. See GLAGOLITIA. The accounts of the printing-office are still in existence, and show that many princes and towns contributed to its support. Its publications included Luther's catechisms, the *Augsburg Confession*, and the *Apology*, Melancthon's *Loci Communes*, the *Württemberg Church Discipline*, the *Beneficium Christi*, and spiritual hymns; but the enterprise was not remunerative, and was abandoned soon after the death of baron Ungnad in 1564. Truber passed the last twenty years of his life in charge of the parish of Doredingen, near Tübingen. Two days before he died he dictated to his amanuensis the closing sentences for his translation of Luther's *Hanspostille*. He died June 28, 1586, after a brief illness, and in the seventy-eighth year of his age. See Sillem, *Primus Truber, der Reformator Krains* (Erlang, 1861); Schurrer, *Slavischer Buchdruck in Württemberg* (Tüb. 1799); and particularly Herzog, *Real-Encyclop.* xxi, s. v., where a much more complete and somewhat divergent sketch of Truber's career is given.

Trublet, NICHOLAS C. J., a French abbé, of temporary fame, was born at St. Malo, in December, 1697. There are no memoirs of his education or early progress, but it appears that he was treasurer of the Church of Nantes, and afterwards archdeacon and canon of St. Malo. His irreproachable conduct and agreeable manners procured him very general esteem as a man, but as a writer he never ranked high in public opinion, and though ambitious of a seat in the French Academy, did not secure that honor until 1761. He died in March, 1770, at his native place. His principal works are, *Essais de Littérature et de Morale* (4 vols. 12mo);—*Pa-négyriques des Saints:—Mémoires pour servir à l'histoire de Messieurs de la Motte et de Fontenelle* (Amst. 1761). He was also a contributor to the *Journal des Savans* and *Journal Chrétien*. See Chalmers, *Biog. Dict.* s. v.; Hoefer, *Nouv. Biog. Générale*, s. v.

Truce of God, a scheme set on foot by the Church in the Middle Ages for the purpose of quelling the violence and preventing the frequency of private wars, occasioned by the fierce spirit of barbarism. It was first proposed at the Council of Charronx in 989, adopted by the Council of Orleans in 1016, and by the Council of Limoges in 1031. In France a general peace and cessation from hostilities took place A.D. 1032, and continued seven years, through the efforts of the bishop of Aquitaine. A resolution was formed that no man should, in time to come, attack or molest his adversaries during the season set apart for celebrating the

great festivals of the Church, or from the evening of Thursday in each week to the morning of Monday in the week ensuing, the intervening days being consecrated as particularly holy—Thursday as the day of our Lord's ascension; Friday as that of his Passion; Saturday, when he rested in the grave; and Sunday, the day of his resurrection. In 1034 it was opposed by the bishop of Cambrai. Later it was extended to nearly all the more important fasts, feasts, and holy seasons of the Church. England (1042) and Italy adopted the custom, which was further confirmed by the second and third Lateran councils (A.D. 1139, 1179). A change in the dispositions of men so sudden, and one which proposed a resolution so unexpected, was considered as miraculous, and the respite from hostilities which followed upon it was called the "Truce of God." This cessation from hostilities during three complete days every week allowed a considerable space for the passions of the antagonists to cool, and for the people to enjoy a respite from the calamities of war, and to take measures for their own security. The triumph of legal over feudal government eventually did away with the institution and the necessity for it. See French, *Medieval Church History*, p. 424 sq.

True, CHARLES K., D.D., an eminent Methodist Episcopal divine, was born in Portland, Me., Aug. 14, 1809. The family afterwards removed to Boston. He graduated at Harvard University in 1832, having been converted at the Eastham camp-meeting while connected with that college, and immediately commenced preaching in the vicinity, being among the first Methodist preachers at the opening of denominational services in Newton Upper Falls, established through the faithful endeavors of Marshall S. Rice. His early efforts awakened great attention. His personal appearance was attractive, his voice pleasant, his address graceful, and his discourses often very eloquent. He entered the New England Conference in 1833, was an agent of the New England Education Society in 1834, and became the first principal of the Amenia Seminary in 1835. He entered the New York Conference in 1836, and had a memorable experience, both in the conference and in his charge at Middletown, Conn., in the anti-slavery controversy, having early taken very pronounced grounds on the question. In 1838 he was transferred to the New England Conference, and stationed at Lynn. He remained, filling appointments with much acceptableness, in Boston and vicinity until 1849, when he was elected professor of intellectual and moral science in Wesleyan University. He became again a member of the New York Conference in 1860, but re-entered the New England Conference in 1866. From 1870 to 1873 he was a financial agent of the Wesleyan University, and was a member of the New York East Conference until his death, which occurred suddenly, June 20, 1878. During his last years he was connected with one or two of the charitable societies whose offices are in New York city, and supplied the pulpits of charges in the New York East Conference not far distant from his home. Dr. True wrote a text-book upon logic, and several interesting volumes of a historical character. He was a man of fine abilities, an original thinker, with marked repose of mind and manner, self-reliant, and with just enough eccentricity to give an original flavor to his opinions. He was a good preacher, at times powerful in discourse, and particularly effective in exhortation. See *Minutes of Annual Conferences*, 1879, p. 30 sq.

True Reformed Dutch Church is an organization which grew out of the secession of the Rev. Solomon Froeligh, D.D., in 1822. He was a professor of theology, a man of erudition, and pastor of the two congregations of Hackensack and Schralenburg, N. J., which he carried with him. His secession was the culmination of difficulties of long standing, in which he was subjected to censure for aggression upon a neigh-

boring Church. He refused to submit to the authorities of the Church. A number of disaffected ministers united with him, together with portions of their churches. The grounds alleged for their separation were that the Dutch Church had become erroneous in doctrine, lax in discipline, and corrupt in practice. The confusion, strife, and troubles produced by this conflict were long and bitter. The "True Reformed Dutch Church" retains the standards of the Church which it left, and declares that it alone keeps them in their purity. It holds no fellowship with any other denomination, refuses to co-operate with the benevolent religious institutions of the age, and is generally antinomian in sentiment and practice. The churches of this sect are less than twenty in number, small, feeble, and dwindling away with the survivors of the original strife. They are located in New Jersey and New York. For full accounts, reference is made to their pamphlet entitled *Reasons Assigned by a Number of Ministers, Elders, and Deacons for Declaring Themselves the True Reformed Dutch Church in the United States of America*. See also Corwin, *Manual of the Ref. Church in America*; Taylor, *Annals of Classis and Township of Bergen*, very full and accurate. (W. J. R. T.)

Trullo, COUNCIL OF, the name by which the sixth Council of CONSTANTINOPLE (q. v.) is called, from the circumstance of its having been held in the domed chapel of the palace.

Trumbull, Benjamin, D.D., a Congregational minister, was born in Hebron, Conn., Dec. 19, 1735, graduated at Yale College in 1759, and was ordained December, 1760, pastor at North Haven, where he remained until his death, Feb. 2, 1820. He published, *A Discourse Delivered at Freeman's Meeting* (1773);—*A Plea in Vindication of the Connecticut Title to the Contested Lands lying West of the Province of New York, Addressed to the Public* (1776);—*An Appeal to the Public respecting Divorce* (1785);—*An Address on Family Religion* (1807);—*Twelve Discourses on the Divine Origin of the Scriptures* (1810);—*A General History of the United States*, etc. (ed.);—*Two Pamphlets on the Unlawfulness of Marrying a Wife's Sister* (ed.);—*A Complete History of Connecticut* (2 vols. 1797, 1818);—and several occasional Sermons. See Sprague, *Annals of the Amer. Pulpit*, i. 584.

Trumbull, Robert, D.D., a distinguished Baptist minister and scholar, was born in Whiteburn, Lindlithgowshire, Scotland, Sept. 10, 1809. He was brought up as a Presbyterian. Having graduated at the Glasgow University, he attended the theological lectures of Drs. Chalmers and Dick in Edinburgh, having among his fellow-students Robert Pollok, the author of the *Course of Time*. While pursuing his theological studies, he changed his sentiments on the subject of Christian baptism, and connected himself with a Baptist Church. For a year and a half he preached in Westmanecotte, Worestershire, England. In 1833 he came to this country, and for two years was pastor of the Second Baptist Church in Danbury, Conn., when he was called to the pastorate of the First Baptist Church in Detroit, Mich., where he remained two years, and then became pastor of the South Baptist Church in Hartford, Conn. In all these churches his labors were greatly blessed. For two years he continued in Hartford, and then accepted a call in 1839 to what is now the Harvard Street Church in Boston, where his six years' (1839-45) ministry added greatly to the strength of the Church. In July, 1845, he returned to Hartford, to take the pastoral charge of the First Baptist Church in that city. His connection with that Church as its minister continued for twenty-four years. "Under his earnest and faithful ministry the Church enjoyed a succession of revivals and constant accessions, till it became in numbers, beneficence, and influence one of the strongest in the denomination." The unusually long pastorate of Dr. Trumbull closed in 1869. It was not his wish

again to become a permanent pastor. For more than two years he preached in New Haven, supplying the pulpit of a mission chapel in Dwight Street one year, and another year preaching in a chapel in the north-western part of the city. Dr. Trumbull was chosen in 1872 secretary of the Connecticut Baptist Convention. In this capacity he served for the remainder of his life, performing a work for the feeble Baptist churches in Connecticut the value of which cannot be overestimated. His memory is cherished with warm affection in the community and state which he so long blessed by his Christian ministry. For a little more than five years he devoted himself with great zeal to his work, and saw it abundantly successful. He died at Hartford, Nov. 20, 1877. Dr. Trumbull was a voluminous writer, considering the amount of ministerial work he performed during his life. Among his published writings were the following: *Olympia Morata* (1842);—*Five's Vital Christianity*—a translation (1846);—*Genius of Scotland* (1847);—*Pulpit Writers of France and Switzerland* (1848);—*Genius of Italy* (1849);—*Theophany, or the Manifestation of God in Christ* (1851);—*Five's Miscellanies* (1852);—*Life Pictures* (1857). He edited also sir William Hamilton's *Discussions on Philosophy, Literature, and University Reform*. He was the editor of the *Christian Review* for two years. See *Christian Secretary*, Nov. 28, 1877. (J. C. S.)

Trump (σάλπιγξ, 1 Cor. xv, 22; 1 Thess. iv, 16). See TRUMPET.

Trumpet is in the A.V. usually the rendering of one or the other of the two Hebrew words detailed below; but besides these it occasionally stands as the representative of the following: יוֹבֵל, *yobel*, Exod. xix, 13, the jubilee (q. v.) trumpet; תֹּקֵעַ, *takôa*, Ezek. vii, 14, prop. the blowing of the trumpet. See TRUMPETS, FEAST OF.

1. חֲטֹטְסֶרֶחַ, *chatsotserâh* (Sept. σάλπιγξ, Vulg. *tuba*), prob. an onomatopoetic word, like the Lat. *taratantara*, from the quivering reverberation of its sound, was the straight trumpet (Josephus, *Ant.* iii, 12, 6; Jerome, *ad Hos. v*, 8; Buxtorf, *Lex. s. v.*), and is the term used in Numb. x, 2, 8, 9, 10; xxxi, 6; 2 Kings xi, 14 ("trumpeter," in first occurrence); xii, 13; 1 Chron. xiii, 8; xv, 24, 28; xvi, 6, 42; 2 Chron. v, 12, 13; xiii, 12, 14; xv, 14; xx, 28; xxiii, 13; xxix, 26, 27, 28; Ezra iii, 10; Neh. xii, 35, 41; Psa. xcvi, 6; Hos. v, 8. There were originally two such, which the priests used on festive occasions (Numb. x, 2 sq.; comp. xxxi, 6; 2 Kings xii, 13). Later (in David's time) the instruments were of a richer character (1 Chron. xv, 24; xvi, 42; 2 Chron. v, 12 sq.; xxix, 20; for a conjecture as to their form, see Sommer, *Bibl. Abhandl.* i, 39 sq.). Similar ones were employed in the year of jubilee (2 Kings xi, 14), and for popular proclamations (Hos. v, 8); comp. Rosellini, *Monum.* II, iii, 32; Wilkinson, ii, 262. The form of this trumpet is indicated in the sculpture on the Arch of

Titus at Rome (see Reland, *Spolia Templi Hieros.* p. 184 sq.) and on coins (Fröhlich, *Anal. Syr.* proleg. p. 80, pl. 18, fig. 17 and 18), and it appears to have emitted a clear, shrill tone (comp. Foskel, i, 86), adapted to an *alarum* (שֹׁפָר). See MUSICAL INSTRUMENTS.

2. שֹׁפָר, *shophâr* (Sept. usually σάλπιγξ, Vulg. *buccina*), was the curved trumpet or horn (Lat. *lituus*) for signals; and is the word elsewhere rendered "trumpet" in the A.V. ("cornet," 1 Chron. xv, 28; 2 Chron. xv, 14; Psa. xcvi, 6; Hos. v, 8). It was sounded in the year of jubilee (Lev. xxv, 9); the Talmudic New-year's-day, Mishna, *Rosh hash-Shanah*, iii, 3), in battle (Job xxxix, 25 [28]; Jer. iv, 5; vi, 1), and by sentinels (Ezek. xxxiii, 6); and had a loud (Isa. lviii, 1) tone like a thunder-peal (Exod. xix, 16, 19). Some writers fail to distinguish this from the preceding kind of trumpet (Credner, *Joel*, p. 164 sq.; Hoffmann, in Warnekros, *Hebr. Alterth.* p. 598 sq.); both instruments are named in the same connection in 1 Chron. xv, 28; 2 Chron. xv, 14; Psa. xcvi, 6; Hos. v, 8 (see Zoega, *De Buccina* [Lips. 1712]). Jerome (on the passage last cited) clearly distinguishes the *shophâr*: "Buccina pastoralis est et cornu recurvo efficitur, inde et proprie Hebraice *sophâr*, Græce κρησινή appellatur." According to the Mishna (*ut sup.*), however, the *shophâr* was sometimes straight and at others crooked (see Doughty, *Analect.* i, 99 sq.). Curved horns (as of oxen or sheep) are still common in the synagogue under the same name (שֹׁפָרֹת); according to the Gemara (*Shabb.* xxxvi, 1), שֹׁפָרֹת originally denoted only the curved horn, and not until the downfall of the Jewish polity was it confounded with the תֹּקֵעַ. The second Temple contained thirteen boxes (in the court of the women), shaped like (straight) trumpets (shopharoth), for the deposition of alms (Mishna, *Shekul.* vi, 5). The horn with which the year of jubilee was ushered in is technically called (as above observed) תֹּקֵעַ, fully הַיֹּבֵל, or הַיֹּבֵל (Josh. vi, 4 sq.); and the force of breath required to sound it is denoted by the term שֹׁפָר, to draw out (see Winer's *Simonis Lex.* p. 394, 584; comp. Gräiser, *Kathol. Messe*, i, 107 sq.). See CORNET.

Various Forms of Trumpets.

1, 2, 3, 4. Ancient horns and curved trumpets; 5. Straight trumpet; 6. Pipe.

Ancient Egyptian Trumpets.

As above intimated, the Lord commanded Moses to make two trumpets of beaten silver, for the purpose of calling the people together when they were to decamp (Numb. x). They chiefly used these trumpets, however, to proclaim the beginning of the civil year, the beginning of the sabbatical year (Lev. xxiii, 24; Numb. xxix, 1), and the beginning of the jubilee (Lev. xxv, 9, 10). Josephus says (*Ant.* iii, 12, 6) that they were near a cubit long, and that their tube or pipe was of the thickness of a common flute. Their mouths were no wider than just admitted to blow into them, and their ends were like those of a modern trumpet. There were originally but two in the camp, though afterwards a

great number were made. In the time of Joshua there were seven (Josh. iii. 4), and at the dedication of the Temple of Solomon there were one hundred and twenty priests that sounded trumpets (2 Chron. v. 12). The following particulars concerning the use of trumpets in the Temple will be useful, and are collected chiefly from Lightfoot's *Temple Service*. The trumpets were sounded exclusively by the priests, who stood not in the Levitical choir, but apart, and opposite to the Levites, on the other side of the altar, both parties looking towards it—the priests on the west side and the Levites on the east. The trumpets did not join in the concert, but were sounded during certain regulated pauses in the vocal and instrumental music. "The manner of their blowing with their trumpets was first a long plain blast, then a blast with breakings and quaverings, and then a long plain blast again. . . . The priests did never blow but these three blasts went together. . . . The Jews do express these three several soundings that they made at one blowing by the words (translated) 'An alarm in the midst, and a plain note before and after it' which our Christian writers do most commonly express by *taratantara*, though that word seems to put the quavering sound before and after, and the plain in the midst, contrary to the Jewish description of it." See **NEW YEAR, FESTIVAL OF**.

In addition to the sacred trumpets of the Temple, whose use was restricted to the priests, even in war and in battle, there were others used by the Hebrew generals (Judg. iii. 27). Ehud sounded the trumpet to assemble Israel against the Moabites, whose king, Eglon, he had lately slain. Gideon took a trumpet in his hand, and gave each of his people one, when he assaulted the Midianites (vii. 2, 16). Joab sounded the trumpet as a signal of retreat to his soldiers, in the battle against Abner (2 Sam. ii. 28), in that against Absalom (xviii. 16), and in the pursuit of Sheba, son of Bichri (xx. 22). See **WAR**.

In Matt. vi. 2 we read, "When thou doest thine alms, do not sound a trumpet before thee, as the hypocrites do in the synagogues," and most expositors have regarded this as an expression derived by an easy metaphor from the practice of using the trumpet to proclaim whatever was about to be done, in order to call attention to it and make it extensively known. Others, however, refer it to the trumpet-shaped boxes in which the alms were deposited (see above), and which gave a ringing sound as the coin was dropped into them. See **TEMPLE**.

TRUMPETS, FEAST OF (חַג הַשּׁוּבָה, Numb. xxix. 1; Sept. ἡμέρα σμφαριᾶς; Vulg. *diebus clangoris et tubarum*; חַג הַשּׁוּבָה, Lev. xxiii. 24; μαρτυριον σαλπικων; *sabbatum memoriale clangentibus tubis*: in the Mishna, חַג הַשּׁוּבָה, "the beginning of the year"), the feast of the new moon, which fell on the first of Tisri. It differed from the ordinary festivals of the new moon in several important particulars. It was one of the seven days of Holy Convocation. See **FEAST**. Instead of the mere blowing of the trumpets of the Temple at the time of the offering of the sacrifices, it was "a day of blowing of trumpets." In addition to the daily sacrifices and the eleven victims offered on the first of every month [see **NEW MOON**], there were offered a young bullock, a ram, and seven lambs of the first year, with the accustomed meat-offerings, and a kid for a sin-offering (Numb. xxix. 1-6). The regular monthly offering was thus repeated, with the exception of one young bullock.

It is said that both kinds of trumpet were blown in the Temple on this day, the straight trumpet (חֲצֹצֶרֶת) and the cornet (שׁוּפָרָה or יָבֵב), and that elsewhere any one, even a child, might blow a cornet (Reland, iv. 7, 2; Carpzov, p. 425; *Rosh hash-Shan*, i. 2). When the festival fell upon a Sabbath, the trumpets were blown in the Temple, but not out of it (*Rosh hash-Shan*, iv. 1). See **JUBILEE**.

It has been conjectured that Psa. lxxxix. one of the songs of Asaph, was composed expressly for the Feast of Trumpets. The psalm is used in the service for that day by the modern Jews. As the third verse is rendered in the Sept., the Vulgate, and the A.V., this would seem highly probable—"Blow up the trumpet in the new moon, the time appointed, on our solemn feast day." But the best authorities understand the word translated *new moon* (חֹדֶשׁ) to mean *full moon*. Hence the psalm would more properly belong to the service for one of the festivals which take place at the full moon, the Passover, or the Feast of Tabernacles (Gesenius, *Thesaur. s.v.*; Rosenmüller and Hengstenberg on Psa. lxxxix.).

Various meanings have been assigned to the Feast of Trumpets. Maimonides considered that its purpose was to awaken the people from their spiritual slumber to prepare for the solemn humiliation of the Day of Atonement, which followed it within ten days. This may receive some countenance from Joel ii. 15, "Blow the trumpet (שׁוּפָרָה) in Zion, sanctify a fast, call a solemn assembly." Some have supposed that it was intended to introduce the seventh or sabbatical month of the year, which was especially holy because it was the seventh, and because it contained the Day of Atonement and the Feast of Tabernacles (Fagius, in *Lev. xxviii. 24*; Buxtorf, *Syn. Jud.* c. 24). Philo and some early Christian writers regarded it as a memorial of the giving of the law on Sinai (Philo, *Opp.* v. 46. ed. Tauch.; Basil, in Psa. lxxxix.; Theodoret, *Quæst. xxxii. in Lev.*). But there seems to be no sufficient reason to call in question the common opinion of Jews and Christians, that it was the festival of the New-year's-day of the civil year, the first of Tisri, the month which commenced the sabbatical year and the year of jubilee. If the New-moon Festival was taken as the consecration of a natural division of time, the month in which the earth yielded the last ripe produce of the season, and began again to foster seed for the supply of the future, might well be regarded as the first month of the year. The fact that Tisri was the great month for sowing might thus have easily suggested the thought of commemorating on this day the finished work of creation, when the sons of God shouted for joy (Job xxxviii. 7). The Feast of Trumpets thus came to be regarded as the anniversary of the birthday of the world (Mishna, *Rosh hash-Shan*, i. 1; Hupfeld, *De Fest. Heb.* ii. 13; Buxtorf, *Syn. Jud.* c. 24).

It was an odd fancy of the rabbins that on this day, every year, God judges all men, and that they pass before him as a flock of sheep pass before a shepherd (*Rosh hash-Shan*, i. 2).—Smith. See **NEW YEAR**.

Trust in God signifies confidence in or dependence upon him. This trust ought to be—1. Sincere and unreserved, not in idols, in men, in talents, riches, power, in ourselves part and in him part (Prov. iii. 5-6); 2. Universal—body, soul, circumstances (1 Pet. v. 7); 3. Perpetual (Isa. xxvi. 4); 4. With a lively expectation of his blessing (Mic. vii. 7). The encouragement we have to trust in him arises—1. From his liberality (Rom. viii. 32; Psa. lxxxix. 11); 2. His ability (James i. 17); 3. His relationship (Psa. ciii. 13); 4. His promise (Isa. xxxiii. 16); 5. His conduct in all ages to those who have trusted him (Gen. xlviii. 15, 16; Psa. xxxvii. 25). The happiness of those who trust in him is great, if we consider, 1. Their safety (cxxxv. 1); 2. Their courage (xxvii. 1); 3. Their peace (Isa. xxvi. 3); 4. Their character and fruitfulness (Psa. i. 3); 5. Their end (cxxxvii. 37; Job v. 26).—Buck, *Theol. Dict.* s. v. See **FAITH**.

Trust-deeds are forms of conveyances of real estate specifying some trust for which the property is held. At an early period of his history Wesley published a model deed for the settlement of chapels, to the effect that the trustees, for the time being, should permit Wesley himself, and such other persons as he might from time to time appoint, to have the free use of such

premises, to preach therein God's word. After his death, and that of Charles Wesley and William Grimshaw, the chapels were to be held in trust for the sole use of such persons as might be appointed at the yearly conference of the people called Methodists, provided that the said persons preached no other doctrines than those contained in Wesley's *Notes on the New Test.*, and in his four volumes of *Sermons*. This was followed, on Feb. 28, 1784, by the *Deed of Declaration*, explaining the words "yearly conference of the people called Methodists." This *Deed of Declaration* is recognised in the trusts-deeds of all the chapels built by the Wesleys. In the Methodist Episcopal Church it is directed that the following trust-clause shall be inserted in each deed: "In trust, that said premises shall be used, kept, maintained, and disposed of as a place of divine worship for the use of the ministry and membership of the Methodist Episcopal Church in the United States of America; subject to the discipline, usage, and ministerial appointments of said Church, as from time to time authorized and declared by the General Conference of said Church, and the Annual Conference within whose bounds the said premises are situate. In trust, that said premises shall be held, kept, and maintained as a place of residence for the use and occupancy of the preachers of the Methodist Episcopal Church in the United States of America who may, from time to time, be stationed in said place; subject to the usage and discipline of said Church, as from time to time authorized and declared by the General Conference of said Church, and by the Annual Conference within whose bounds said premises are situate."

Trustees are Church officers appointed for the purposes of holding the legal title to Church property, and of taking care thereof. In the different branches of Methodism there are some differences of provision, but in general principles they are the same. In the Methodist Episcopal Church the *Discipline* says, "Each board of trustees of our Church property shall consist of not less than three nor more than nine persons, each of whom shall be not less than twenty-one years of age, two thirds of whom shall be members of the Methodist Episcopal Church." Where the Church has not received a legal act of incorporation or charter, and where the law of the state does not specify any particular mode of election, "the trustees are elected annually by the Fourth Quarterly Conference . . . upon the nomination of the preacher in charge, or the presiding elder of the district. Where the state or territory directs the mode of election, that mode must be strictly observed; and where charters of incorporation are obtained, they specify the particular qualifications and time of election of these officers."

The trustees have the charge of all repairs to be made on Church property, and of all financial matters pertaining to its preservation; are directed by the *Discipline* to make an annual report to the Fourth Quarterly Conference of the amount and value of the property, expenditures and liabilities, etc.; and are held amenable to the Quarterly Conference for the manner in which they perform their duty. By the action of the General Conference of 1876 trustees are forbidden to "mortgage or encumber the real estate for the current expenses of the Church."

TRUSTEES, GENERAL BOARD OF. The General Conference of the Methodist Episcopal Church, in 1864, appointed a committee of seven to report a plan of trusteeship. The report of the committee was adopted, and is substantially the same as the section of the *Discipline* on that subject. The General Conference appointed a board whose headquarters should be at Cincinnati, and which was incorporated with the title of "the Board of Trustees of the General Conference of the Methodist Episcopal Church in the United States," and its charter was recorded July 11, 1865. According to the *Discipline*, "The duty of the board shall be to hold in trust, for the benefit of the Methodist Episcopal Church, any

and all donations, bequests, grants, and funds in trust, etc., that may be given or conveyed to said board, or to the Methodist Episcopal Church, as such, for any benevolent object, and to administer the said funds, and the proceeds of the same, in accordance with the direction of the donors," etc.

Truth, conformity to fact.

1. It has been distinguished by most *philosophical* writers, according as it respects being, knowledge, and speech, into

(1.) *Veritas entis*, or truth of the thing. The foundation of all truth is in truth of being—that truth by which a thing is what it is, by which it has its own nature and properties; and has not merely the appearance, but reality, of being. Philosophy is the knowledge of being; and if there were no real being—that is, if truth could not be predicated of things—there could be no knowledge.

(2.) *Veritas cognitionis*, or truth of knowledge. Truth, as predicated of knowledge, is the conformity of our knowledge with the reality of the object known; for, as knowledge is the knowledge of something, when a thing is known as it is that knowledge is formally true. To know that fire is hot is true knowledge. Objective truth is the conformity of the thing or object known with true knowledge.

(3.) *Veritas signi*, or truth of the sign. This consists in its adequateness or conformity to the thing signified. The truth and adequacy of signs belong to enunciation in logic.

2. *Scientific* truth consists in the conformity of thoughts to things; and *moral* truth lies in the correspondence of words with thoughts; while *logical* truth depends on the self-consistency of thoughts themselves.

3. Truth, in the strict *logical* sense, applies to propositions, and nothing else; and consists in the conformity of the declaration made to the actual state of the case. In its *etymological* sense, truth signifies that which the speaker *believes* to be the fact. In this sense it is opposed to a *lie*, and may be called *moral*. Truth is not unfrequently applied to arguments, when the proper expressions would be "correct," "conclusive," "valid." The use of truth in the sense of *reality* should be avoided. People speak of the *truth* or *falsity* of facts; whereas, properly speaking, they are either *real* or *fictional*. It is the *statement* that is true or false.

4. *Necessary* truths are such as are known independently of inductive proof; are those in which we not only learn that the proposition is true, but that it *must* be true; are those the opposite of which is inconceivable, contradictory, impossible. *Contingent* truths are those which, without doing violence to reason, we may conceive to be otherwise.

5. *Absolute* truth is the knowledge of God, the ground of all relative truth and being. All relative truth is partial because each relation presupposes something which is not relative. As to us relative truth is partial in another sense, because the relations known to us are affected by relations which we do not know, and therefore our knowledge even as relative knowledge is incomplete as a whole and in each of its parts. At the same time, relative knowledge is real knowledge; and if it were possible habitually to realize in consciousness that it is partial, it would be strictly true so far as it goes. See Blunt, *Diet. of Hist. Theol.* s. v.; Fleming, *Vocab. of Philos. Sciences*, s. v.

6. In Scripture language, eminently, God is truth; that is, in him is no fallacy, deception, perverseness, etc. Jesus Christ, being God, is also the truth, and is the true way to God, the true representative, image, character, of the Father. The Holy Spirit is the Spirit of truth, who communicates truth, who maintains the truth in believers, guides them in the truth, and who hates and punishes falsehood or lies, even to the death of the transgressor (Psa. xxxi, 5; John xiv, 6, 17; Acts v, 3, etc.).

Especially is truth a name given to the religion of

Jesus, in opposition to that of the Jew and that of the heathen. As contrasted with the Jewish system, it was the "truth" in the sense of "reality," as distinguished from the "emblems," symbols, representations, of that reality; from the "shadow of good things to come," contained in the Levitical law: in this sense it is that the apostle tells us "the law was given by Moses, but grace and truth came by Jesus Christ." As contrasted with paganism, Christianity was *truth* opposed to *falsehood*. The heathen mythology not only was not true, but was not even supposed as true: it not only deserved no faith, but it demanded none. Jesus inaugurated a new way of propagating a religion, by inviting converts not to conform to its institutions, but to "believe" and to let their actions be agreeable to truth: nothing, then, was more natural than that Christianity should receive names expressive of this grand peculiarity, *the truth* and *the faith*. See Whately, *Essays on Difficulties of St. Paul*, essay i.

Tryphæ'na (Τριφάνα, *luxurious*), a person mentioned in connection with Tryphosa (q. v.), the two being Christian women at Rome, who, among those that are enumerated in the conclusion of Paul's letter to that city, receive a special salutation, and on the special ground that they are engaged there in "laboring in the Lord" (Rom. xvi, 12). A.D. 55. They may have been sisters, but it is more likely that they were fellow-deaconesses, and among the predecessors of that large number of official women who ministered in the Church of Rome at a later period (Eusebius, *Hist. Eccl.* vi, 43); for it is to be observed that they are spoken of as at that time occupied in Christian service (τὰς κοπιῶσας), while the salutation to Persis, in the same verse, is connected with past service (ἣτις ἐκοπίασεν).

We know nothing more of these two sister-workers of the apostolic time; but the name of one of them occurs curiously, with other names familiar to us in Paul's epistles, in the Apocryphal *Acts of Paul and Thecla*. See THECLA LEGEND. There Tryphæna appears as a rich Christian widow of Antioch, who gives Thecla a refuge in her house, and sends money to Paul for the relief of the poor (see Jones, *On the Canon*, ii, 371, 380). It is impossible to discern any trace of probability in this part of the legend.

It is an interesting fact that the columbaria of "Cæsar's household" in the *Vigna Codini*, near the Porta S. Sebastiano, at Rome, contain the name Tryphæna, as well as other names mentioned in this chapter, Philologus and Julia (ver. 15), and also Amplias (ver. 8). See Wordsworth, *Tour in Italy* (1862), ii, 173.—Smith.

Trypho, an eminent man, who was seized as a Christian and imprisoned at Nice, about A.D. 50, in company with another, named Respicinus. They were soon after put to the rack, which they bore with admirable patience for three hours, and uttered the praises of the Almighty the whole time. They were then exposed naked to the severity of the open air, which benumbed all their limbs, as it was in the very depth of winter.—Fox, *Book of Martyrs*, s. v.

Try'phon (Τρίφων, a not unfrequent Greek name of the later age), a usurper of the Syrian throne. His proper name was *Diodotus* (Strabo, xvi, 2, 10; Appian, *Syr.* 68), and the surname Tryphon was given to him, or, according to Appian, adopted by him, after his accession to power (Livy, *Epit.* liii, iv). He was a native of Cariana, a fortified place in the district of Apamea, where he was brought up (Strabo, *loc. cit.*). In the time of Alexander Balas he was attached to the court (Appian, *loc. cit.*, εὐλογοῦ τῶν βασιλέων; Diodor. *Fr.* xxi, ap. Müller, *Hist. Gr. Fragm.* ii, 17, σπατηγός; 1 Macc. xi, 39, τῶν παρὰ Ἀλεξ.); but towards the close of his reign he seems to have joined in the conspiracy which was set on foot to transfer the crown of Syria to Ptolemy Philometor (ver. 13; Diodor. *loc. cit.*). After the death of Alexander Balas he took advantage of the unpopularity of Demetrius II to put forward the

claims of Antiochus VI, the young son of Alexander (1 Macc. xi, 39), B.C. 145. After a time he obtained the support of Jonathan, who had been alienated from Demetrius by his ingratitude, and the young king was crowned (B.C. 144). Tryphon, however, soon revealed his real designs on the kingdom, and, fearing the opposition of Jonathan, he gained possession of his person by treachery (xii, 39-50), and after a short time put him to death (xiii, 23). As the way now seemed clear, he murdered Antiochus, and seized the supreme power (ver. 31, 32), which he exercised, as far as he was able, with violence and rapacity (ver. 34). His tyranny again encouraged the hopes of Demetrius, who was engaged in preparing an expedition against him (B.C. 141), when he was taken prisoner (xiv, 1-3), and Tryphon retained the throne (Justin, xxxvi, 1; Diodor. *Leg.* xxxi), till Antiochus VII, the brother of Demetrius, drove him to Dora, from which he escaped to Orthosia, in Phœnicia (1 Macc. xv, 10-11; 37-39), B.C. 139. Not long afterwards, being hard pressed by Antiochus, he committed suicide, or, according to other accounts, was put to death by Antiochus (Strabo, xiv, 5, 2; Appian, *Syr.* 68. Ἀντιόχος—κτείνει . . . σὺν πόρῳ πολλῶ). Josephus (*Jud.* xiii, 7, 2) adds that he was killed at Apamea, the place which he made his headquarters (Strabo, xvi, 2, 10). The authority of Tryphon was evidently very partial, as appears from the growth of Jewish independence under Simon Macabæus, and Strabo describes him as one of the chief authors of Cilician piracy (xiv, 3, 2). His name occurs on the coins of Antiochus VI, and he also struck coins in his own name.—Smith. See ANTIOCHUS; DEMETRIUS.

Coin of Tryphon.

Trypho'sa (Τριφώσα, *luxurious*), a Christian female at Rome, addressed by Paul (Rom. xvi, 12). A.D. 55. See TRYPHLENA.

Tsab. See TORTOISE.

Tsabians (from טַבָּי, a host) were those who worshipped the heavenly hosts, that being one of the earliest forms in which idolatry appeared. This species of idolatry first prevailed in Chaldea, whence it spread over all the East, passed into Egypt, and thence found its way into Greece. The sun, moon, and each of the stars was believed to be a divine intelligence, who exercised a constant influence for good or evil upon the destinies of men.—Blunt, *Faiths of the World*, s. v. See SABIANS.

Tsabua. See HYENA.

Tsirūph (צִרְיָה), or *anagram*, is a Cabalistic rule according to which various words are formed through the change of any word into others by the transposition of the component letters. Thus צִרְיָה אֵשׁ, "in the beginning," has been anagramatized אֵשׁ צִרְיָה, "a covenant of fire," to accord with Deut. xxxiii. 2, "from his right hand went a fiery law for them." In a Cabalistic book entitled מִקְרָאֵי הַשָּׁמַיִם, upwards of seventy combinations of this single word are formed by R. Simeon ben-Jochai. The Cabalists say that because the Hebrew letters are spiritual, and simple figures, they can therefore be construed in different ways; but this can be done in any language. Thus Herbert anagramatized the Virgin *Mary into Army*, as seen in the following two lines:

"How well her name an *Army* doth present,
In whom the *Lord of hosts* did pitch his tent!"

Tsonkhapa, a Tibetan reformer and monk, was born A.D. 1355, in the district of Amdo. He strictly prohibited ordinary tricks and pretended miracles of charlatanism, and united and reconciled the dialectical and mystical schools of modern Buddhism. He also published most comprehensive works. His innovations were never universally acknowledged. His followers, however, called *Gelkpa*, or *Gaddarpa*, are the most numerous, and wear a yellow garb, the others having chosen red. See **TIBET**.

Tu'bal (Heb. *Tubal'*, תּוּבַל in Gen. x. 2; Ezek. xxxii. 26; xxxix. 1), of uncertain signification; Sept. *Θοῦβαλ*, except in Ezek. xxxix. 1, where Alex. *Θοῦβελ*; Vulg. *Thubal*, but in Isa. lxxi. 19, *Italia*). In the ancient ethnological tables of Genesis and 1 Chron. Tubal is reckoned with Javan and Meshech among the sons of Japheth (Gen. x. 2; 1 Chron. i. v.). B.C. post 2514. The three are again associated in the enumeration of the sources of the wealth of Tyre: Javan, Tubal, and Meshech brought slaves and copper vessels to the Phœnician markets (Ezek. xxvii. 13). Tubal and Javan (Isa. lxxvi. 19), Meshech and Tubal (Ezek. xxxii. 26; xxxviii. 2, 3; xxxix. 1), are nations of the north (xxxviii. 13; xxxix. 2). Josephus (*Ant.* i. 6, 1) identifies the descendants of Tubal with the Iberians, that is—not, as Jerome would understand it, Spaniards, but—the inhabitants of a tract of country between the Caspian and Euxine seas, which nearly corresponded to the modern Georgia. Knobel connects these Iberians of the East and West, and considers the *Tibareni* to have been a branch of this widely spread Turanian family, known to the Hebrews as Tubal (*Völkertafel d. Gen.* § 13). Bochart (*Phalæg.* iii. 12) makes the Moschi and Tibareni represent Meshech and Tubal. These two Colchian tribes are mentioned together in Herodotus on two occasions: first, as forming part of the nineteenth satrapy of the Persian empire (iii. 94), and again as being in the army of Xerxes under the command of Ariomardus the son of Darius (vii. 78). The Moschi and Tibareni, moreover, are "constantly associated, under the names of *Muski* and *Tuploi*, in the Assyrian inscriptions" (Sir H. Rawlinson, in Rawlinson's *Herod.* i. 535). The Tibareni are said by the scholiast on Apollonius Rhodius (ii. 1010) to have been a Scythian tribe, and they as well as the Moschi are probably to be referred to that Turanian people who in very early times spread themselves over the entire region between the Mediterranean and India, the Persian Gulf and the Caucasus (Rawlinson, *Herod.* i. 535). In the time of Sargon, according to the inscriptions, Ambris, the son of Khuliyā, was hereditary chief of Tu-

bal (the southern slopes of Taurus). He "had cultivated relations with the kings of Musak and Vararat (Meshech and Ararat, or the Moschi and Armenia), who were in revolt against Assyria, and thus drew upon himself the hostility of the great king (*ibid.* i. 162, note 3). In former times the Tibareni were probably more important; and the Moschi and Tibareni, Meshech and Tubal, may have been names by which powerful hordes of Scythians were known to the Hebrews. But in history we only hear of them as pushed to the farthest limits of their ancient settlements, and occupying merely a strip of coast along the Euxine. Their neighbors the Chaldeans were in the same condition. In the time of Herodotus the Moschi and Tibareni were even more closely connected than at a later period, for in Xenophon we find them separated by the Maerones and Mossynœci (*Anab.* v. 5, 1; Pliny, vi. 4, etc.). The limits of the territory of the Tibareni are extremely difficult to determine with any degree of accuracy. After a part of the ten thousand Greeks, on their retreat with Xenophon, had embarked at Cerasus (perhaps near the modern Kerasün Dere Sü), the rest marched along the coast, and soon came to the boundaries of the Mossynœci (*Anab.* v. 4, 2). They traversed the country occupied by this people in eight days, and then came to the Chalybes, and after them to the Tibareni. The eastern limit of the Tibareni was therefore about eighty or ninety miles along the coast west of Cerasus. Two days' march through Tibarene brought the Greeks to Cotyora (*ibid.* v. 5, 3), and they were altogether three days in passing through the country (Diod. Sic. xiv. 30). Now from Cape Jasonium to Boon, according to Arrian (*Peripl.* 16), the distance was 90 stadia, 90 more to Cotyora, and 60 from Cotyora to the river Melanthius, making in all a coast line of 240 stadia, or three days' march. Prof. Rawlinson (*Herod.* iv. 181) conjectures that the Tibareni occupied the coast between Cape Yasün (Jasonium) and the river Melanthius (Melet Irma); but if we follow Xenophon, we must place Boon as their western boundary, one day's march from Cotyora, and their eastern limit must be sought some ten miles east of the Melet Irma, perhaps not far from the modern Aptar, which is three and a half hours from that river. The anonymous author of the *Periplus of the Euxine* says (33) that the Tibareni formerly dwelt west of Cotyora as far as Polemonium, at the mouth of the Puleman chai, one and a half miles east of Fatsih.

In the time of Xenophon the Tibareni were an independent tribe (*Anab.* vii. 8, 25). Long before this they were subject to a number of petty chiefs, which was a principal element of their weakness, and rendered their subjugation by Assyria more easy. Dr. Hincks (quoted by Rawlinson, *Herod.* i. 380, note 1) has found as many as twenty-four kings of the *Tuploi* mentioned in the inscriptions. They are said by Apollonius Rhodius to have been rich in flocks (*Arg.* ii. 377). The traffic in slaves and vessels of copper with which the people of Tubal supplied the markets of Tyre (Ezek. xxvii. 13) still further connects them with the Tibareni. It is well known that the regions bordering on the Pontus Euxinus furnished the most beautiful slaves, and that the slave-traffic was an extensive branch of trade among the Cappadocians (Polyb. iv. 38, 4; Horace, *Ep.* i. 6, 39; Persius, *Sat.* vi. 77; Martial, *Ep.* vi. 77; x. 76, etc.). The copper of the Mossynœci, the neighbors of the Tibareni, was celebrated as being extremely bright and without any admixture of tin (Aristot. *De Mir. Auscult.* 62); and the Chalybes, who lived between these tribes, were long famous for their craft as metal-smiths. We must not forget, too, the copper-mines of Chalvar in Armenia (Hamilton, *Asia Min.* i. 173).

The Arabic version of Gen. x. 2 gives Chorasán and *China* for Meshech and Tubal; in Eusebius (see Bochart) they are Illyria and Thessaly. The Talmudists (*Yoma*, fol. 10, 2), according to Bochart, define Tubal as "the home of the *Uniaci* (אֲנִיָּאִי), whom he is in-

clined to identify with the Huns (*Phaleg*, iii, 12). They may, perhaps, take their name from Enoe, the modern Unich, a town on the south coast of the Black Sea, not far from Cape Yasin, and so in the immediate neighborhood of the Tibareni. In the Targum of R. Joseph on 1 Chron. (ed. Wilkins) תִּבְלִי is given as the equivalent of Tubal, and Wilkins renders it by Bithynia. But the reading in this passage, as well as in the Targums of Jerusalem and of Jonathan on Gen. x, is too doubtful to be followed as even a traditional authority.—Smith. See *ETHNOLOGY*.

Tu'bal-cain (Heb. תִּבְלִי קַיִן, *Tu'bal Ka'yin*, apparently of foreign etymology; Sept. ὁ Θουβέλ; Vulg. *Tubal cain*), the son of Lamech the Cainite by his wife Zillah (Gen. iv, 22). B.C. cir. 3700. He is called "a furbisher of every cutting instrument of copper and iron." The Jewish legend of later times associates him with his father's song, "Lamech was blind," says the story as told by Rashi, "and Tubal-cain was leading him; and he saw Cain, and he appeared to him like a wild beast, so he told his father to draw his bow, and he slew him. And when he knew that it was Cain his ancestor, he smote his hands together and struck his son between them. So he slew him, and his wives withdrew from him and he conciliates them." In this story Tubal-cain is the "young man" of the song. Rashi apparently considers the name of Tubal-cain as an appellative, for he makes him director of the works of Cain for making weapons of war, and connects "Tubal" with תַּבֵּל, *tabbél*, to season, and so to prepare skillfully. He appears, moreover, to have pointed it תֹּבֵל, *tobél*, which seems to have been the reading of the Sept. and Josephus. According to the writer last mentioned (*Ant.* i, 2, 2), Tubal-cain was distinguished for his prodigious strength and his success in war.

The derivation of the name is extremely obscure. Hasse (*Entdeckungen*, ii, 37, quoted by Knobel on Gen. iv, 22) identifies Tubal-cain with *Ulecan*; and Buttmann (*Mythol.* i, 164) not only compares these names, but adds to the comparison the *Τελχίδες* of Rhodes, the first workers in copper and iron (Strabo, xiv, 654), and Dwalinn, the demon smith of the Scandinavian mythology. Gesenius proposed to consider it a hybrid word, compounded of the Pers. *tupal*, iron slag, or *scoria*, and the Arab. *kain*, a smith; but this etymology is more than doubtful. The Scythian race *Tubal*, who were copper-smiths (Ezek. xxvii, 13), naturally suggest themselves in connection with Tubal-cain.—Smith.

Tubie'ni (*Touβῆννοι*; Alex. *Touβείνοι*; Vulg. *Tubienaei*). The "Jews called Tubieni" lived about Charax, 750 stadia from a strongly fortified city called Caspis (2 Macc. xii, 17). They were doubtless the same who are elsewhere mentioned as living in the towns of *Toubion* (A. V. "Tobie"), which again is probably the same with the *Tob* (q. v.) of the Old Test.—Smith.

Tübingen School, THE OLD. The origin of this school, which became so noteworthy a factor in the development of Protestant theology during the latter half of the 18th century, is associated chiefly with the personality and influence of G. C. Storr (q. v.), professor of theology in the University of Tübingen, and, at a later day, court-preacher at Stuttgart. This scholar gathered about him a number of pupils, whom he impressed with the broad culture and thorough and comprehensive learning as well as logical arrangement and extraordinary clearness of his lectures, and whom he captivated by his evident piety, dignified demeanor, and unvarying kindness. Storr's dominant elements of character, whether as a man or a scholar, were, however, wholly of the objective class. His piety was not the expression of profound religious feeling, but of rigidly earnest and conscientious principle; and as his heart lacked fervor, so his intellect was deficient in imagination and the true speculative quality. The age in which he lived was a period of unrest. The orthodox

of Brentius and Jakob Andreä was beginning to loosen its hold upon the times. J. W. Jäger, the learned chancellor (1702-20), had ventured upon the innovation of introducing a more attractive method in theology than that in vogue. Pfaff and Weismann also broke away from the polemical methods of orthodoxy, and sought to impart greater simplicity and life to theological instruction. In another direction, the so-called enlightenment or neology of the 18th century was gaining prominence and power, and was rejecting not merely the form, but the substance, of the orthodox teachings. Storr was not able to deny that the crisis which had come upon theology had its origin in very adequate causes; but he could not fully accept all its results, and therefore assumed a position midway between the contending parties, so as to be able to retain much of the substance of the old orthodox theology while adopting much of the methods of the new. He endeavored to base his teaching wholly on the Scriptures, and for that purpose brought together a mass of isolated passages to serve as the basis of his theology; but he had no conception of the organic unity of Scripture, of its living combination into separate principles, and of a consequent genetic unfolding of scriptural truths. Baur strikingly remarks that Storr recognised no canon, but only passages, of the Scriptures. His system was furthermore impaired by the Pelagianizing tendency of his mind, which led him to tone down the contrast between the fundamental doctrines of sin and grace, and to make grave concessions to neology with regard to the doctrines of the atonement and of the person of Christ. His great object was to render Christianity plausible to the destructive criticism of his time; and the endeavor to realize that object occasioned in his bearing a certain indecision and ambiguity of manner, so that his theology is made to seem forced and constrained. Great attention is given to the discussion of unimportant and particular ideas, while the thought of a connected and organic system of Christianity has no proper recognition in his works. This disposition to expend effort upon subordinate details is apparent in all his works, and especially in his criticism of Kant's *Religion innerhalb der Grenzen der reinen Vernunft*, and in the works he aimed against the "accommodation hypothesis" of Semler, Teller, and others. It was his misfortune to want the historical sense, and that attitude of impartiality towards doctrine which would have enabled him to discover the gradual development of scriptural truth. His system of Christian dogmatics and ethics aims to be simply a bringing-together and connecting of the results of exegesis; and this aim is realized by the mosaic-like collocation of isolated passages in such a manner as to justify the above criticism of Baur that Storr had no authoritative rule, but only a fragmentary view of Scripture. In this way he gave expression to the principle of the authority of Scripture upon which he professed to erect his entire system.

The school of Storr was, more particularly, composed of Johann Friedrich Flatt, Friedrich Gottlieb Stisskind, and Karl Christian Flatt, all of them pupils, successors, and in part colleagues of Storr in the theological faculty (for a more particular notice of these scholars, see the articles under their names). The older Flatt was an acute and learned man, exceedingly conscientious and careful, naturally cheerful, but infirm in body and greatly afflicted by repeated sorrows, in consequence of which he developed a measure of irritability and melancholy in his disposition. He left lectures on Christian ethics and on the Pauline epistles, which were published from notes by his pupils. Stisskind devoted his scientific activity chiefly to the elucidation of fundamental questions in doctrines and apologetics considered with reference to the philosophy current in his day. Against Kant and Fichte he discussed the office and the limitations of reason, and against Schelling he endeavored to secure the theistic basis of Christianity. His investigations in the line of doctrine were chiefly

concerned with the idea of the possibility of the forgiveness of sins, or, in other words, of the remission of penalty. He also discussed, in a fragmentary way, the theology of Schleiermacher (see Süßkind, *Vermischte Schriften*, 1831). His leading personal traits were great intellectual penetration and energy of the will, united with sternness of manner and the utmost conscientiousness of spirit. He was a master in logic, bold and confident in debate, the dialectician of his school. His ability was nevertheless impaired by the lack of speculative power and depth. The younger Flatt was rather a receptive than an independently creative character. His earliest work attempted to prove that the Kantian theory of atonement, according to which the forgiveness of sins is determined by, and consequent on, the measure of moral reformation, is not the only reasonable, but also the only allowable, view under the New Test. He was induced to retract the teachings of that book, and in time became wholly identified with the tendency of Storr and the elder Flatt.

The peculiarity of these theologians lay in the abstract theism beyond which they were not able to advance by reason of the want of true philosophical sense. They employed a pitiless logic to expose the gaps and weaknesses of transcendental speculation, but failed to attain to a living apprehension of their own theism; and, while they defended their theory of revelation with the utmost tenacity, they rendered that theory thoroughly intolerable to reason by numerous provisos, explanations, and modifications. This criticism applies to everything which is peculiar to their teaching, and indicates what is, more than any other feature, the characteristic of their school.

Affiliated to this school, though less closely than the men already named, was Ernst Gottlieb Bengel, professor of historical theology at Tübingen. This scholar passed beyond the ordinary favorable attitude of the school of Storr in his fondness for Socinian views, and was also a Kantianizing, rationalizing supranaturalist. So firmly was he intrenched in such views that he steadily refused to be influenced by any new tendency which the changing philosophy of a new era might bring to bear upon theological inquiry. He scarcely indicated that he knew of the existence of Schleiermacher, and prevented the appointment of Bockshammer—who had written an unusually able work on the freedom of the will—to the faculty as the successor of the elder Flatt, because of Bockshammer's departure from the old plan to which Bengel was committed. Other adherents of this school, as Steudel, Christian Friedrich Schmid, etc., remained more faithful to the Storrian ideas in some respects, but were, on the other hand, gradually led away from the traditional position of the Tübingen school through the influence of the theology of Schleiermacher. New men, new tendencies, new methods, have taken the place of the old, not only with respect to the external fact, but even as regards the results of what was at one time a noteworthy factor in the development of theological science. The Tübingen school has produced, upon the whole, effects much less important to such development than its prominence would seem to warrant.

See Herzog, *Real-Encyclop.* s. v., and the various names mentioned in this article in Herzog and this *Cyclopedia*. See also RATIONALISM.

TÜBINGEN SCHOOL, THE NEW. A very different era was inaugurated in the University of Tübingen on the appointment of F. C. Baur (q. v.) as professor of theology in 1826. He began to attack the objective positions of Christianity through the Pauline epistles, selecting some of these only as authentic, and pointing out alleged discrepancies between them and other parts of the New-Test. history. His theory, which is summed up in his work on the apostle Paul, is, in brief, that, taking the epistles to the Galatians, the Romans, and the Corinthians especially as guides, we find therein "exposed the fact that there were two parties in the early

Church, the Pauline and the Petrine. These struggled for supremacy, and the conflict was a long one. Peter was a thorough Jew, and his side predominated even after the death of the principal combatants. Judaism was the cradle of Christianity; and the latter was only an earnest, restless, reformatory branch of the former. But it was not an offshoot as yet, for Christianity was essentially Jewish all through its first historic period. The canonical writings of the New Test., which constitute the chief literature of the first two centuries, are the literary monument of Christianity while it was yet undeveloped and undetached from Judaism. These writings are the *mediating theology* of those distant days. The Petrine party was very strong until the middle of the 2d century, when it was obliged to yield to, or rather harmonize with, the Pauline. Many causes contributed to bring the two factions together. There was an absence of growth quite incompatible with their respective strength. Alone, they were almost unable to brave the storm of persecution. Finally, for the sake of security and propagation, they laid down their weapons and united under one banner. From this union came the subsequent growth of Christianity. The canonical works so much revered by the Church had been written in the interest of one or the other of these parties. Since the enmity has been destroyed, their literary productions must be considered in the light of history. The Church is therefore much mistaken in attaching importance to the Scriptures, for they were written for a timeserving end, and are quite unworthy of the interest which we attach to them."

It is obvious how destructive to the essential faith of Christians were these positions, and yet it is wonderful that they were broached with so much assurance, although based upon so trivial a comparison of circumstances. Nevertheless, a numerous circle of disciples clustered around Baur, and they enjoyed his leadership until his death, in 1860. But the writings of both the master and his school were quickly answered by the best theologians of Germany, such as Thiersch, Dörner, Leckler, Lange, Schaff, Bleek, Hase, Bunsen, and Tischendorf. Yet the effects of the insinuations, suspicions, and criticisms of Baur were for a long time a serious hindrance to the truth. The authors of the movement were disciples of the Hegelian philosophy. Their aim was to explain the origin of Christianity by natural causes alone. In this endeavor they but reproduced in a new and ingenious form the exploded infidelity of a former age. And the primitive doctrine of supranaturalism was again defended by an appeal, as of old and ever, to facts of the inspired records and the instinctive convictions of humanity. Yet some of its champions in this contest were themselves unconsciously infected more or less by the insinuating influences of the new scepticism, and were led to make concessions which later and sounder theologians have seen to be unnecessary and untenable.

Meanwhile, the attack upon the fundamental documents of Christianity was resumed in a still more virulent form by D. F. Strauss (q. v.), on his appointment to the theological faculty of Tübingen in 1832, and culminated in his famous *Leben Jesu*, which boldly impugns the historical truth of the Gospel itself. For the discussion of the controversy resulting, see MYTHICAL THEORY. A strong reaction has long since set in against these negative views, even in Tübingen itself, so that what has recently been known as "the Tübingen theology" is likely soon to be a thing of the past. See Hurst, *Hist. of Rationalism*, p. 280 sq.; Cook, *Monday Lectures*, ser. i.; Fisher, *Supernat. Origin of Christianity*, p. xxxv. See NEOLOGY.

TUCH, JOHANN CHRISTIAN FRIEDRICH, a Protestant divine of Germany, was born Dec. 17, 1806, at Quedlinburg. Having prepared himself for the university at the gymnasium in Nordhausen, he went in 1828 to Halle, where he attended the lectures of Gesenius. Here he also commenced his lectures on Oriental lan-

gnages and Old-Test. exegesis. In 1839 the Zurich University made him licentiate of theology, while the philosophical faculty of Halle appointed him extraordinary professor. In 1841 he was called to Leipzig, and was made ordinary professor in 1843, having shortly before been honored with the doctorate by the Tübingen faculty. In 1853 he was made third professor and canon of Zeitz, and died as first professor, April 12, 1867. His main work is his learned *Commentary on Genesis* (Halle, 1838; 2d ed. 1871). He also published *Commentationis de Lipsiensii Codice Pentateuchi Syri Mamm-scriptio Particula I* (Lips., 1819);—*Commentationes Geographice. Pars i. De Nino Urbe Animadversiones tres* (ibid. 1815);—*Reise des Sheikh Ibrahim el-Khijari el-Meduni durch einen Theil Palästinas* (ibid. 1850);—*Commentatio de Ματαθῶς ἐν Ἀρβήλοις, 1 Macc. ix, 2* (ibid. 1833);—*Die Himmelfahrt Jesu* (ibid. 1857);—*Questions de Flavii Josephi Libri Historici* (ibid. 1859);—*Questions de Flavii Josephi loco B. J. i. c. 8, 2* (ibid. 1860). See Fürst, *Bibl. Ind.* iii. 450; Zuehlke, *Bibl. Theol.* ii. 1352; *Theol. Universal-Lex.* s. v.; Hilgenfeld, *Zeitschrift*, 1871, pt. iii.; Diestel, *Gesch. d. alten Testaments in der christl. Kirche*, p. 613, 648, 730; *Literarischer Handweiser für das kathol. Deutschland*, 1867, p. 266. (B. 1.)

Tucher, CHRISTOPH KARL GOTTLIEB VON, a famous jurist of Germany, was born May 14, 1798, at Nuremberg. He studied jurisprudence at Erlangen, Heidelberg, and Berlin, and after having occupied prominent positions in his profession, he died at Berlin, Feb. 17, 1877. He is known as the author of the following hymnological works: *Schatz des evangelischen Kirchengesanges, der Melodie und Harmonie nach, aus den Quellen des 16. und 17. Jahrhunderts geschöpft*, etc. (Stutt. 1840);—*Schatz des evangelischen Kirchengesangs im 1. Jahrhundert der Reformation* (Leips. 1848, 2 vols.) (B. 1.)

Tucker, Abraham, a metaphysical writer, was born in London in 1705, and was educated at Bishop's Stortford School and Merton College, Oxford. He studied for a while at the Inner Temple, but was not admitted to the bar. He died in 1774. He published, *Free-will, Fore-knowledge, and Fate; a Fragment by Edward Search* (Lond. 1763, 8vo);—*Man in Quest of Himself, or a Defence of the Indivisibility of the Human Mind or Self*, etc., by Cuthbert Comment, Gent. (1763, 8vo). His great work, however, is *The Light of Nature Pursued*, by Edward Search (1768-78; Cambridge, Mass., 1831, 4 vols. 8vo, with later editions, and an abridgment by William Hazlitt, 1807, 8vo). See Allibone, *Dict. of Brit. and Amer. Authors*, s. v.

Tucker, Elijah W., a Congregational minister, was born at Dorchester, Mass., March 31, 1810. He was converted at the age of twenty, graduated at Brown University in 1838, and at Andover Theological Seminary in 1841, and labored at South New Market, N. H., in 1841 sq.; Chatham, Mass., in 1846 sq.; Essex, Conn., in 1852; Goshen, Conn., 1853-58; Preston, Conn., 1858-65; and Northfield, Conn., in 1865, until his death, Aug. 6, 1866. Mr. Tucker was a direct, earnest preacher, and a sympathetic, watchful pastor. Revivals resulted from his labors in almost every field. See *Cong. Quarterly*, 1867, p. 46.

Tucker, Elisha, D.D., a Baptist minister, was born at Rensselaerville, Albany County, N. Y., Dec. 24, 1794. His early education was limited. He began to preach in 1816, and was ordained pastor of the Baptist Church of Coventry, Chenango County, N. Y., Aug. 19, 1818. Here he continued with great success until Aug. 12, 1822, when he became pastor of the Church at Fredonia, N. Y. He was afterwards pastor of the First Baptist Church in Buffalo from September, 1831, until October, 1836; then of the Second Baptist Church of Rochester, N. Y., until May, 1841; and of the Oliver Street Baptist Church, New York city, until 1848. In 1851 his health became very much impaired, and he

began travelling in the hope of improving it, but died Dec. 29, 1853. He was the eldest of six brothers, five of whom entered the ministry. Dr. Tucker published a *Sermon Delivered at Fredonia at the Ordination of Mr. Jarvis Handy* (1826). See Sprague, *Annals of the Amer. Pulpit*, vi. 667.

Tucker, Josiah, D.D., a learned English divine, was born at Laughton, Carmarthenshire, in 1711. He was educated at St. John's College, Oxford, and in 1737 became curate of St. Stephen's Church, Bristol, and was subsequently appointed minor canon in the cathedral of that city. On the death of Mr. Cateott, he became rector of St. Stephen's, and in 1758 was created dean of Gloucester. Mr. Tucker was an able advocate of the great political questions of the day, and was bold and determined in the principles which he advocated. He died Nov. 4, 1799. He wrote, *The Elements of Commerce and Theory of Taxes* (Bristol, 1753, 4to);—*Six Sermons* (1772, 12mo);—four tracts, etc., on political and commercial subjects (Gloucester, 1774, 8vo);—besides *Treatises*, etc. See Chalmers, *Biog. Dict.* s. v.; Allibone, *Dict. of Brit. and Amer. Authors*, s. v.

Tucker, Levi, D.D., a Baptist minister, was born in Schoharie County, N. Y., July 6, 1804. He studied theology at the Hamilton Institution, graduated June 3, 1829, and on the 10th of the same month was ordained pastor of the church at Deposit, N. Y. In the summer of 1831 he accepted a call to settle at Blockley (now West Philadelphia), Pa., where he labored with great success, acting also for a while as agent of the Baptist Educational Society of that state, until the spring of 1836, when he removed to Cleveland, O. After remaining there seven years, he was for a while pastor of the Washington Street Baptist Church in Buffalo, and on Dec. 29, 1848, became pastor of the Bowdoin Place Church, Boston. His health having become greatly impaired, he resigned his charge in September, 1852, and took a journey to England, France, Italy, and Egypt, whence he returned in the early part of August, 1853, and died on the 23d of the same month. See Sprague, *Annals of the Amer. Pulpit*, vi. 786.

Tucker (or Tooker), William, D.D., a learned English divine of the 16th century, was born at Exeter. He was educated at New College, Oxford, and was admitted perpetual fellow in 1577. In 1585 he was promoted to the archdeaconry of Barnstable, in Devonshire. He was eventually made chaplain to queen Elizabeth. Dr. Tucker afterwards became prebendary of Salisbury, and took his degree of D.D. in 1594. He was made canon of the church at Exeter, and was installed dean of Lichfield, Feb. 21, 1604. He died at Salisbury, March 19, 1620. Dr. Tucker was esteemed an excellent Greek and Latin scholar. He was an able divine, a person of great gravity and piety, and well read in curious and critical authors. His publications are, *Charisma, sive Rabulum Sanitatum Gratia*, etc. (Lond. 1597, 4to), a historical defence of the power of royalty to cure the king's evil;—*Of the Fabric of the Church and Churchmen's Living* (ibid. 1604, 8vo);—*Singulare Certamen cum Martino Becano Jesuita* (ibid. 1611, 8vo), written in defence of James I against Becon and Bellarmine. See Chalmers, *Biog. Dict.* s. v.; Allibone, *Dict. of Brit. and Amer. Authors*, s. v.

Tuckerman, JOSEPH, D.D., a Unitarian minister, was born in Boston, Mass., Jan. 18, 1778, and graduated from Harvard College in 1798. After devoting himself to the study of theology, under Rev. Thomas Thacher of Dedham, he was ordained and installed as pastor in Chelsea, Nov. 4, 1801. While at Chelsea, his attention was drawn to the temptations and necessities of seafaring men, and in the winter of 1811-12 he founded the first society for the religious and moral improvement of seamen. In 1816 Mr. Tuckerman visited England in search of health, but soon returned without having experienced much apparent advantage from his tour. He resigned his charge at Chelsea in 1826,

preaching his farewell sermon on Nov. 4. He immediately entered upon his work as minister at large in Boston, devoting himself to the visitation of the poor and destitute for the remainder of his life. In 1833 he again went to Europe, returning in the following year. He died in Havana, whither he had gone for his health, April 20, 1840. He published a large number of *Sermons, Letters, Essays*, etc. (1800-38). See Sprague, *Annals of the Amer. Pulpit*, viii, 345.

Tuckney, ANTHONY, a learned Nonconformist divine of England, was born at Kirton, Lincolnshire, in September, 1599. He was matriculated at Emanuel College, Cambridge, at fourteen, received his degree of A.M. in 1620, and was chosen fellow of his college three years after. In 1627 he took his degree of B.D., and became assistant to the famous vicar John Cotton, upon whose departure he was chosen to the vicarage. When the assembly of divines met at Westminster, Mr. Tuckney was one of the two nominated for the county of Lincoln, and was appointed minister of St. Michael Querne's, Cheapside. In 1645 he was appointed master of Emanuel College, but did not entirely reside on this employment until 1648, when, being chosen vice-chancellor, he removed with his family to Cambridge, and took his degree of D.D. the year after. In 1653 he was chosen master of St. John's, and two years after regius professor of divinity. At the Restoration complaints were made by royalists against Mr. Tuckney, who resigned both positions June 22, 1661, receiving a pension of £100 per year. The rest of his life he spent in retirement, mostly in London. Although appointed commissioner at the Savoy Conference, he never attended it. In the time of the plague he lived at Colwich Hall, near Nottingham, where he was troubled and confined, but was discharged in a few months. Upon the passage of the Five-mile Act he removed to Oundle, and thence to Warmington, Northamptonshire. After the fire of London he removed to Stockerton, Leicestershire, and then to Tottenham, and in 1669-70 to Spitalyard, where he died in February, 1670. He wrote, *Sermon on Jer. viii*, 22 (Lond. 1643, 4to);—*Five Sermons* (1656, 12mo);—*Forty Sermons* (1676, 4to), published by his son:—*Letters*, etc. See Chalmers, *Biog. Diet.* s. v.; Allibone, *Diet. of Brit. and Amer. Authors*, s. v.

Tudehope, ARCHIBALD, a Presbyterian minister, was born at Paisley, Scotland, Aug. 19, 1801; graduated at the University of Glasgow in April, 1822; studied theology at the Divinity Hall of the Relief Synod in Paisley; was licensed by the Relief Presbytery of Glasgow in 1828, and ordained pastor of the Church in Annan, in Dumfriesshire, Scotland, Oct. 14, 1834. In 1838 he emigrated to the United States, and became pastor of the Ninth Presbyterian Church, Philadelphia, where he remained till 1849. He died Dec. 6, 1861. He was an instructive preacher, and his sermons to children were specially successful efforts. See Wilson, *Presb. Hist. Almanac*, 1863, p. 214.

Tudela, BENJAMIN (ben-Jonath) OF, the famous Jewish traveller of the 12th century, is known for his researches on the state of the various colonies of the Hebrew people, both in the East and in the West. From 1165 to 1173 he travelled in several countries in Europe, Asia, and Africa, and published his results in his *Massuth*, or *Itinerarium of Benjamin*. Among Christians the book has not been favorably received. In the first place, the whole of its complexion is Jewish—recording in every place of his arrival the census, condition, and leading names of his nation; scarcely ever noticing the objects which usually invite the attention of Gentile travellers, such as customs, climate, language, politics, history, etc. In the second place, he commits numerous errors in dates and names when he does refer to Gentile history; and, thirdly, the farther he advances from home, the more wonderful are his reports concerning the numbers and wealth of the Jews. These considerations have induced every one of his translators to believe that he

never quitted Spain, but made a compilation of all the travellers' tales he could gather respecting foreign lands. On the other hand, Gibbon (*Decline*, v, 348, Milman's ed.) remarks, "The errors and fictions of the Jewish rabbi are not sufficient grounds to deny the reality of his travels." In our days, however, deeper investigation has certified the reality of the voyage, and the actual truth of many of its details, which are, however, mixed up with much that is fabulous, and accompanied by many incredible tales. This curious book of travels was edited, with a Latin translation, by Arias Montanus at Antwerp in 1622, and by L'Empereur at Leyden in 1633; with an English translation it was published in Purchas's *Pilgrims* (Lond. 1625, ii, 1437); by Harris, in *Collection of Voyages and Travels* (ibid. 1744-48), i, 546-555; by Gerroux (ibid. 1784); by Pinkerton, in his *Collection of Voyages and Travels of the World* (ibid. 1801-44), vol. vii; and in Holm's *Early Travels in Palestine* (ibid. 1818, p. 63-126). The best edition is that of Asher, *The Itinerary of Rabbi Benjamin of Tudela* (translated, etc.; vol. i, bibliography and translation, Lond. and Berl. 1840; vol. ii, notes and essays, ibid. 1841). A French translation is given in Bergeron, *Collection de Voyages, faits principalement en Asie, dans les XII^e, XIII^e, XIV^e, et XV^e Siècles* (the Hague, 1735, 2 vols.); by Barratier (Amst. 1784, 2 vols.); another transl. appeared at Paris in 1830; a Dutch transl. by Bara (Amst. 1666); and a German transl. in Jewish characters by Arlich (Frank-on-the-M. 1711). See Fürst, *Bibl. Jud.* i, 117 sq.; De Rossi, *Dizionario Storico*, p. 321 sq. (Germ. transl.); Grätz, *Gesch. d. Juden*, vi, 214; Braunschweiger, *Gesch. d. Juden in d. roman. Staaten*, p. 154; Dessauer, *Gesch. d. Israeliten*, p. 289, 371-420; Jost, *Gesch. d. Juden, u. s. Sekten*, ii, 54; iii, 363; Basnage, *Histoire des Juifs*, p. 617 (Taylor's transl.); Da Costa, *Israel and the Gentiles*, p. 285 sq.; Lindo, *History of the Jews in Spain*, p. 67; Finn, *Sephardim*, p. 210 sq.; Etheridge, *Introduction to Hebrew Literature*, p. 259; Adams, *History of the Jews* (Boston, 1812), i, 238 sq. (B. P.)

Tudor, SALATHIEL, a Methodist Episcopal minister, was born in Bedford County, Pa., in 1789. Converted when a youth, he labored as a local preacher for eleven years, and was received on trial in the Pittsburgh Conference in 1827. In 1829 his health declined; in 1830 he was a supernummate, and he died Nov. 26 of the same year. As a preacher he was acceptable and useful. "His end was peaceful and glorious." See *Minutes of Annual Conferences*, 1832, p. 159.

Tudor Flower. See **TUDOR STYLE**.

Tudor Rose. A conventional representation of the rose, found in Third-pointed architectural work, both in wood and stone carvings, adopted in honor of the Tudors.

Tudor Style. This name is used by some writers on Gothic architecture, but they do not agree in the application of it. It is variously employed to designate the Perpendicular style throughout its continuance—the latter period of this style—and the mixed style which sprang up on the decline of Gothic architecture, usually called Elizabethan. The term is not very extensively used, and is most commonly understood to mean late Perpendicular work, and Henry VII's Chapel at Westminster is looked upon as the most perfect specimen in this style. The *Tudor Flower* is a flat flower, or leaf, placed upright on its stalk, much used in Perpendicular work, especially late in the style, in long suites as a

Tudor Style.

crest, or ornamental finishing, on cornices, etc. The examples differ considerably in detail, but the general effect does not vary much.—Parker, *Gloss. of Architect.* s. v.

Tueshimel ERDENE, in Lamaism, is the name for one of the seven sanctuaries which are placed upon the altars in front of the idol. It is a drawing, upon a gold background, representing an ambassador of the heavenly kingdom and also the god of the temple.

Tuet, ESPRIT CLAUDE, a French ascetic author, was born about 1745 and died about 1787, and was the writer of a number of religious tracts and sermons, for which see Hoefer, *Nouv. Biog. Générale*, s. v.

Tufa, a porous stone (called *travertine* when compact) found in calcareous streams, and used, from its lightness, in vaultings, as at Bredon and Canterbury.

Tuff-taffeta, a kind of inferior silk used in church-hangings.

Tuiscon, in German mythology, was an earth-born god, from whom all Germans are said to have sprung. He was highly esteemed by his son, man. The Druids sacrificed human beings to him. According to the accounts given by Cæsar, these sacrifices were made not only in Germany, but throughout the whole of Gaul. Some hold him to be a historic person, others a personified idea.

Tukkiyim. See PEACOCK.

Tukudh Version. This version is of a very recent date; and the translation of the four gospels and the epistles of John into that dialect was undertaken by the British and Foreign Bible Society, at the request of the Church Missionary Society, and was made in the year 1872 by the Rev. R. McDonald, who had been laboring among the people with much success. As to the dialect itself, it is spoken by a tribe of Indians on the river Yucon, on the confines of the Arctic region. Mr. McDonald, who has been laboring there for the last sixteen years, has reduced the language to writing, and in his translating efforts has had the assistance of a native Christian. The syllabic characters which were adopted in the Cree version were first tried, but the unusually large number of syllables in the language obliged the translator to fall back upon the Roman characters. The following, taken from the report of the British and Foreign Bible Society for the year 1873, will be of interest to the student: "The Tukudh tribe, which is often known by the name of *Loucheux*, from a peculiarity in the eyes of some of the natives, is small, not including more than about eight hundred, nearly the whole of whom are under Christian instruction. Their numbers, however, are on the increase, and it is not improbable that some neighboring tribes will become incorporated with them, and thus add considerably to the community. Like most of the North American Indian tribes, the Tukudh Indians have among themselves certain religious beliefs on which it is not impossible to build up the pure theology of the Bible. Their name *Tukudh* signifies 'haughty people.' When the geographical position of Mr. McDonald's station at Fort Macpherson is considered, it will not be wondered at that these people are living in primitive simplicity. The edition requested is to consist of five hundred copies, and some of the gospels it is proposed to bind separately. The expense of the work will be large and the readers few; but when a language has been reduced to written form, and Christian men capable of translating the Scriptures are available, the committee deem it a matter of clear duty to go forward in printing the Word of God, even though but a comparatively small population may be benefited by their labors." According to the report for 1879, about 810 copies altogether have been circulated among these people. (B. P.)

Tulchans, or Tulchan Bishops. A *tulchan* was the effigy of a calf, or rather it was a stuffed calf-skin, set up before a cow when she was milked, under the belief that the animal thereby yielded her milk more

freely. The custom has long been discontinued. Under the regent Morton, and after 1572, attempts were made to introduce bishops into the Presbyterian Church of Scotland. The men who consented to take the title had bound themselves, as the price of their elevation, to receive only a small part of the revenues, the rest going to Morton and his lordly colleagues. "The bishop had the title, but my lord had the milk." Such bishops were called *tulchans* by the people. The first tulchan was John Douglas, appointed to the see of St. Andrew's, Patrick Adamson, who afterwards himself became a tulchan, said in a sermon, "There be three kinds of bishops—my lord bishop, my lord's bishop, and the Lord's bishop. My lord bishop was in the papistry: my lord's bishop is now, when my lord gets the benefice, and the bishop serves for nothing but to make his title sure; and the Lord's bishop is the true minister of the gospel."—Eadie, *Eccles. Cyclopedia*, s. v.

Tulisso, in Prussian mythology, were priests of a lower order, belonging to none of the three higher classes of *Grivaites*, *Siggonies*, and *Wurkaites*. The care of the sick rested with them, whom they either prepared for death, or sought, with their scanty knowledge, to cure or to alleviate their sufferings. They resided among the populace in villages, and were therefore not esteemed very much.

Tulla INTOON and **HALTIORINX**. According to the Finnish creed, each man bore within him from his birth a divine spirit who was his inseparable companion for life. This spirit became more closely united to its subject in proportion as the latter tore himself away from earthly things to retire into the sanctuary of his soul. The magician, therefore, aspired to a transcendental ecstasy (*tulla intoon*), to a great state of excitement of the soul (*tulla haltiorinxi*), in which he became like the spirit dwelling in him and entirely identified with it. He used artificial means, e. g. intoxicating drugs, in order to attain to this state of excitement.—Lenormant, *Chaldean Magic*, p. 254.

Tulloch, JAMES, a Scotch Congregational minister, was the first Dissenter who settled in Scotland. He was tutored by Rev. Mr. Ewing of Glasgow, and sent out under the auspices of the Society for Propagating the Gospel at Home. Mr. Tulloch was settled over the Congregational Church at Bixter in 1808, and did much in establishing new churches and propagating the Gospel. He died Feb. 26, 1862. See (Lond.) *Cong. Year-book*, 1864, p. 247.

Tully, George, an English divine, was educated at Queen's College, Oxford, and died rector of Gateside in 1697. He was a zealous writer against popery, and was suspended for a sermon he preached and published in 1686. "He was the first clergyman who suffered in the reign of James II in defence of our religion against popish superstition and idolatry." He is best known as the author of *Discourse on the Government of the Thoughts* (1693-94, 8vo). See Allibone, *Dict. of Brit. and Amer. Authors*, s. v.; Hook, *Eccles. Biog.* s. v.

Tully, Thomas, a learned English divine, was born in the city of Carlisle July 22, 1620; he entered Queen's College, Oxford, in 1634, and obtained a fellowship. In 1642 he was created A.M., and became master of the grammar-school at Tetbury, in Gloucestershire. He afterwards returned to his college, and became a noted tutor and preacher there. He died Jan. 14, 1676.

Tulu, or Tuluva, is the ancient and proper dialect of the long narrow tract of land now called Canara, situated westward of Mysore, between the range of the Western Ghats and the ocean. Owing to the long subjection of Canara to Karnata princes, the Karnata or Canarese language is now chiefly spoken by the higher classes in the province, while the Tulu still continues the vernacular of the common people, especially in South Canara. In idiom and structure it closely resembles the Malayalam language, and it is written in the same char-

acters. In 1834 a missionary station was established by the German Missionary Society at Mangalore, the capital of Canara. In 1844 a translation of the New Test. was made, which was published in 1852. See *Bible of Every Land*, p. 144. (B. P.)

Tum. Among the Egyptians the sun was considered in each phase a different god, having its peculiar name, attributes, and worship. Thus the sun during its nocturnal existence was *Tum*; when it shone in the meridian, it was *Ra*; when it produced and nourished life, it was venerated as *Kheper*. Since, according to the Egyptians, the night precedes the day, Tum was considered to have been born before Ra, and to have issued alone from the abyss of chaos.—Lenormant, *Chaldean Magic*, p. 81 sq.

Tumanurong, in the mythology of the Marquesas, was a goddess who descended from heaven and was immediately made queen by the people, who were charmed by her beauty. She married the then ruling sovereign, and gave birth to a son, who was able to speak immediately after his birth.

Tumblers, a name given to the TUNKERS (q. v.) in ridicule of their peculiar motions while undergoing the rite of baptism by immersion.

Tundley, RALPH, an English Congregational minister, was born at Alton, Staffordshire, in 1795. He was converted under the influence of the Dissenters, became interested in Sunday-school work, and at the earnest solicitation of the Church at Alton he became their pastor and ministered to them until his death, Feb. 22, 1863. See (Lond.) *Cong. Year-book*, 1864, p. 247.

Tunic, or **Tunicle**, a term applied to several articles of clerical dress. (1.) A dress worn by the subdeacon, made originally of linen, reaching to the feet, and then of inferior silk, and narrower than the dalmatic of the deacon, with shorter and tighter sleeves, and devoid of the stripes or embroidery of that vestment. For some centuries, however, the assimilation has grown so complete as to render the slight difference between them almost imperceptible. Bishops wore both the tunic and dalmatic at pontifical mass. (2.) The *parra tunic*, or cotta, a linen habit reaching to the knees, used at all kinds of services by simple clerks and others; it differed from the rochet, in being fuller. Amalaricus speaks of a blue tunicle of jacinth color, or *subucula*, worn by the bishop (Rupert says under the chasuble) as emblematical of the seamless robe of Christ. (3.) A dress worn by monks.—Walcott, *Sac. Archæol.*, s. v. See COAT.

Tunicle-ball, a ball of crystal to which tassels were attached, hanging from the shoulders of mediæval dalmatics.

Tunicle-chest, a chest for holding the tunic and dalmatic, and differing in shape from those chests which contained the copes and chasubles of a sacristy.—Lee, *Gloss. of Liturg. Terms*, s. v.

Tunis, JEWISH MISSION AT. As early as the year 1833, the London Society for the Propagation of the Gospel among the Jews commenced missionary operations in Tunis. The first missionary to that place was the late Rev. Dr. F. C. Ewald, who arrived there June 30. He found a Jewish population from 30,000 to 40,000, all living in their own quarter. There was also a large number of Roman Catholics, who had their own church and convent, a Greek community with church and priest, and about fifty Protestants without the means of grace. Mr. Ewald at once commenced divine service, which was attended by almost every Protestant. The Jews being accessible in that place, opportunities were afforded to the missionary to preach unto them the word of God. The Bible in Hebrew was eagerly sought after and bought by them, and thus the work could be carried on. In 1855 Mr. Page, who succeeded Dr. Ewald, established a school there, which proved a great success. Owing, however, to the removal by cholera of Mr. Page from the scene of his labors, mis-

sionary operations had to be suspended for a time, to be resumed again in 1860 by the Rev. Mr. Fenner. In July, 1861, a school was opened for Jewish boys with six scholars, whose number had increased by the close of the year to ninety-nine, all Jewish youths from seven to eighteen years of age. In 1862 a girls' school was established through the benevolence of a Christian lady in the north of England. Since that time missionary operations have been carried on there regularly, and in spite of the efforts made by the Israelitish Alliance to counterbalance the work of the mission, there were 160 boys and 305 girls in attendance at the mission schools during the year 1878-79. Since 1862, 1600 girls and 960 boys have passed through the schools. The popularity of these schools may be best seen from the fact that a notice of the opening of the mission-schools after the summer vacation was put up in the principal synagogues of Tunis. In connection with the two day-schools, Sunday-schools have also been opened there of late, besides a night-school which seems very promising. Some years ago the society built a chapel, where the Protestant community of Tunis is now gathered regularly for divine service, and where the sacraments are administered. According to the last report for the year 1879, there were fourteen persons engaged at this station, viz. two ordained ministers, a colporteur and depository, a schoolmaster, four assistants, a schoolmistress and four assistants. (B. P.)

Tunkers (Germ. *tunken*, "to dip"), a sect of German-American Baptists, called by themselves *Brethren*. Their name is sometimes erroneously spelled *Dunkers*. The sect is said to have been founded by Alexander Mack at Schwarzenau, Westphalia, in 1708. Driven from Germany, some of them emigrated to America in 1719, and settled in Pennsylvania. They formed a settlement at Ephrata, Lancaster Co., under the directorship of Conrad Peysel. Here they built a town in the form of a triangle, the houses being three stories in height, and each of them a kind of monastery. They dressed much in the style of monks and nuns, men and women lived in different houses, and they used a vegetable diet, practicing considerable mortification. Although marriage was not forbidden, when couples married they were required to remove from Ephrata. They subsequently settled in Ohio, Indiana, Maryland, Virginia, and several other states. Their doctrines are similar to those of the Mennonites (q. v.), and in dress and manners they resemble the Friends. They use the kiss of charity, feet-washing, laying-on of hands, anointing the sick with oil; are opposed to war, and will not engage in lawsuits. They hold love-feasts, and an annual meeting about Whitsuntide, which is attended by their bishops, teachers, and representatives chosen by the congregations. Universal redemption, though not an article of faith, is commonly held by them. Some of them are strict sabbatarians, observing Saturday as their day of rest. They oppose statistics, which they believe to savor of pride, and, therefore, trustworthy statements as to their numbers cannot be given; they are supposed to number about 100,000. By reason of their quiet and peaceable lives they have retained a name which was given to them at first, that of "The Harmless People."

For the denomination there are now published four weekly papers—the *Primitive Christian*, the *Gospel Preacher*, the *Brethren at Work*, and the *Progressive Christian*. This last is published at Berlin, Pa., by the liberals among the Brethren or Tunkers; and its position is defined (in the *Independent* of May 8, 1879) as follows:

"We are in full accord with the Church on all Gospel doctrines and practices; but do not believe in any tradition as being worthy of comparison with a divine injunction. In fact, we do not regard a custom one hundred or five hundred years old, whether it originated in the Church or in the world, as possessing any claims upon the attention of Bible Christians. We believe in 'nonconformity to the world' from all its sinful practices; but we hold

that the earth is the Lord's and the fulness thereof, and that the inventions and discoveries of man are simply the products of the wisdom of God, and should be applied by the Christian to the glorifying of his name. We believe that the time now is when we shall neither in the garb of a hundred years ago nor in the style of the present age worship the Father; but when the true worshippers shall worship him in spirit and in truth. We believe in self-denial, but not in stoicism; we advocate close communion, but not exclusiveness. In short, we hold that the Word of God is our perfect law, which if we obey we do well."

See BAPTISTS, GERMAN.

Tunnell, John, an early Methodist minister, was about thirteen years in the work of the ministry; was elected to the office of an elder at the Christmas Conference in 1784; travelled extensively throughout the United States; was for years the leader of a pioneer band of preachers among the Holston mountains; and died in great peace near Sweet Springs, Va., in July, 1790. He was buried by Asbury among the Alleghany heights, a martyr to his work. He was a man of solid piety, great simplicity, and godly sincerity; well known and much esteemed both by ministers and people for his indefatigable labors, and his commanding talents as a preacher. See *Minutes of Annual Conferences*, i, 37; Bangs, *Hist. of the M. E. Church*, i, 319; Stevens, *Hist. of the M. E. Church*, ii, 34, 38, 39, 43, 53, 99, 272, 297, 496.

Tunstall (or Tonstall), Cuthbert, a learned Romish prelate, was born at Hatchford, near Richmond, Yorkshire, about 1474. He entered Baliol College, Oxford, about 1491, but subsequently went to Cambridge and became a fellow of King's Hall. He afterwards went to Padua and took the degree of LL.D. On his return to England, archbishop Warham constituted him vicar-general, August, 1511, recommended him to Henry VIII, and in December of the same year collated him to the rectory of Harrow-on-the-hill, Middlesex, which he held till 1522. In 1514 he was installed prebendary of Stowlonga, Church of Lincoln, and in the following year admitted archdeacon of Chester. He was made master of the rolls in 1516. Serving as an ambassador to emperor Charles V, he was rewarded on his return (prob. 1519) by a series of preferments. In 1519 he was made prebendary of Bontevant, Church of York; in May, 1521, prebendary of Combe and Hornham, Church of Sarum, and dean of Salisbury. He was promoted to the bishopric of London in 1522; was made keeper of the privy seal in 1523; and in 1525 he and Sir Richard Wingfield went as ambassadors to Spain. In July, 1527, Tunstall attended cardinal Wolsey on his embassy to France, and in 1529 was one of the English ambassadors employed to negotiate the treaty of Cambray. On his return he exerted himself to suppress Tyndale's edition of the New Test. In 1530 he was translated to the bishopric of Durham, where he laid out large sums in improving his episcopal houses. At first Tunstall favored the divorce of Henry VIII, but afterwards espoused the cause of the queen. When Henry took the title of supreme head of the Church, Tunstall recommended this course in his injunctions and in a sermon preached at Durham. He also vindicated the king's supremacy in 1533, in a sermon preached before the king on Palm-Sunday. In 1535 he was one of the commissioners for taking the valuation of ecclesiastical benefices, and in 1538 was appointed to confer about the Reformation with the German ambassadors. A new edition of the English Bible was revised by him and Nicholas Heath, bishop of Rochester, in 1541. In December, 1551, he was committed to the Tower on a charge of misprision of treason, and although the bill was thrown out by the House of Commons, he was brought before a commission (consisting of the chief-justice of the king's bench and six others) and deprived of his bishopric. He continued a prisoner in the Tower during the remainder of Edward's reign. On the accession of Mary, in 1553, Tunstall was restored to his bishopric, but, on account of his mild treatment of the Protestants, was again deprived, July, 1559. He was committed to the custody of Parker, then in possession of Lambeth Palace, who treated him

in a very friendly and respectful manner, until he died, Nov. 18, 1559. Tunstall was opposed to making transubstantiation an article of faith, and also held the doctrine of justification by faith only. His principal writings are, *In Laudem Matrimonii* (Lond. 1518, 4to);—*De Arte Supputandi* (Lond. 1522, 4to);—*Sermon on Royal Supremacy* (Lond. 1539, 4to);—*Confutatio*, etc. (Paris, 1522, 4to);—*De Veritate Corporis et Sanguinis Domini Jesu Christi in Eucharistia* (Lutet. 1554, 4to);—*Compendium in Decem Libros Ethicorum Aristotelis* (Paris, 1554, 8vo);—*Contra Impios Blasphematores Dei Prædestinationis* (Antwerp, 1555, 4to);—*Godly and Devout Prayers in English and Latin*, etc. (1558, 8vo). See Chalmers, *Biog. Dict.* s. v.; Allibone, *Dict. of Brit. and Amer. Authors*, s. v.

Tunstall, James, D.D., an English divine, was born about 1710, and educated at St. John's College, Cambridge, of which he afterwards became fellow and tutor. In 1739 he obtained the rectory of Sturmer, Essex, and two years later was elected public orator of the university, and was appointed chaplain to Potter, archbishop of Canterbury. In 1744 he was created D.D. at Cambridge; was afterwards collated to the rectory of Great Chart, Kent, and to the vicarage of Minster, Isle of Thanet; both of which he resigned in 1757 for the valuable vicarage of Rochdale, Lancashire, where he remained until his death, March 28, 1772. His writings are, *Epistola ad Virum Eruditum Congers Middleton*, etc. (Camb. 1741, 8vo);—*Observations on the Present Collection of Epistles between Cicero and Brutus*;—*Sermon before the House of Commons* (May 29, 1746);—*Vindication of the Power of the State to Prohibit Claudestine Marriages*, etc. (1755);—*Marriage in Society Stated*, etc. (1755);—*Lectures on Natural and Revealed Religion* (published after his death, in 4to). See Chalmers, *Biog. Dict.* s. v.; *English Cyclop.* s. v.

Tuonela was, according to the Finnish belief, the river of the country of the dead.—Lenormant, *Chald. Magic*, p. 258.

Tuoni, was the father of Kivutar, or Kipu-typö, the Finnish goddess of diseases.—Lenormant, *Chald. Magic*, p. 259.

Tuquoq, in the mythology of the Hottentots, is the evil spirit causing harm and misery, for whom numerous sacrifices are offered for the purpose of relieving the Hottentots, whom he is said to persecute.

Tura (or Turra), Cosimo (Cosini da Ferrara), an Italian painter, was born at Ferrara in 1406. He was a disciple of Galasso Galassi, and was court-painter in the time of the duke Borso d'Este. He died in 1469. Tura worked both in oil and fresco, and painted in the dry, Gothic style then prevailing. Among his paintings are, *Annunciation and Nativity*, in the cathedral;—*Acts of St. Eustace*, Monastery of San Guglielmo;—*Virgin and Saints*, Church of San Giovanni;—*Christ Praying in the Garden*, at the Cappuccini;—*Madonna with Saints*, Berlin Museum. See Spooner, *Biog. Hist. of Fine Arts*, s. v.

Turban. Though it is presumable that in a climate like that of Palestine the inhabitants did not expose themselves to the cold of winter or the heats of summer without some covering for the head, there is no certain evidence that any such was in common use. The Hebrews have several words by which articles of head-dress are designated, but they all apparently belong to coverings which were either official or merely ornamental, with the exception of those used by the military.

In the Pentateuch two kinds of head-coverings are mentioned as forming part of the priest's dress, the כִּטְיָא of the high-priest, and the מִצְנַף of the common priests; the former of which was probably a sort of tiara, while the latter may have been a turban, but was more probably a high cap of a flower-like shape, such as are found among Orientals in the present day (Bähr, *Symbolik des mos. Cult.* ii, 66). As these head-

coverings (A. V. "bonnets") were expressly designed for "glory and for beauty" (Exod. xxviii, 40), they evidently give us no idea of what was commonly worn on the head by the people. In the ceremony prescribed for the drinking of the waters of jealousy, the priest is directed to *loosen* (פָּרַט) the woman's head—i. e. to let her hair fall down loosely (Numb. v. 18); and in the law concerning the leper it is prescribed that his head shall be *loosened* (פָּרַט) phraseology which seems to indicate that it was customary in the Mosaic times to bind the hair with a band or fillet, such as we see represented on the Egyptian and Assyrian monuments. On the other hand, from the stress that is laid in the law concerning the Nazirite on his suffering his locks to grow, and on his hair thus abundantly grown being the crown of God on him (Lev. xiii, 45), it seems fair to infer that the cropping of the hair, and perhaps also the shaving of the head and the wearing of some covering (it may be of artificial hair, as among the Egyptians), was common among the people.

In the other books the terms which occur designating head-dress, besides those which are *regal*, such as כִּנֹּר [see CROWN], and those which are *military* [see ARMOR], are the following:

1. **תְּסִיפָה**, *tseniph*. This term occurs three times in the Old Test. (Job xxix, 14; Isa. lxi, 3; Zech. iii, 5). In all these cases the usage of the word shows that it refers, not to an ordinary article of dress, but to one which was ornamental and for display. It was probably a turban, the word being derived from תָּסַב, to roll round or wind. Schröder (*De Vest. Mulier. Heb.* p. 364) endeavors to prove from the Arabic that this word means a narrow strip wound round the head: but his instances only prove that the Arabic *tsinf* and *tsinfu* denote a small band, or the hem of a garment. In Isa. iii, 22 the fem. *tsenipháh* is used of a female head-dress worn for ornament.

2. **פֶּעֶר**, *peér*. This word is used of the head-dress of distinguished persons, both male and female (Isa. iii, 20; lxi, 3, 10; Ezek. xxiv, 17, 23; xlv, 18). In Exod. xxxix, 28 it is used of the priest's head-dress, as also in Ezek. xlv, 18. In all the other instances it indicates an article of holiday costume. Saalschütz suggests that the *peér* was probably the hat or bonnet, properly so called, and the *tseniph* the ornamental head-band wrapped round it.

3. **צִפְרָה**, *tsaphiráh*, from צָפַר, to circle, a circlet or diadem (Isa. xxviii, 5); or it may have been a piece of fine muslin wound round the turban for ornament, such as the Orientals still use.

4. **לִירְיָה**, *liryáh* (Prov. i, 9; iv, 9). Some regard this as a species of fillet by which the head was bound; but it probably means rather a garland or wreath of flowers.

The examination of these terms has failed to convey to us any information respecting the ordinary every-day costume for the head of the Hebrew people. Probably they were wont simply to throw some part of their dress over their heads when they had occasion to expose themselves to the weather, or to fold a piece of cloth over their heads, as do the Arabs of the present day, reserving such articles as those above named for holiday or festive occasions (Jahn, *Biblische Archäologie*, i, ii, 2, p. 116; Saalschütz, *Arch. der Hebr.* ii, 22).—KITTO. See HEAD-DRESS.

Turchi, ALESSANDRO, called *Veronese*, also *L'Orbetto*, an Italian painter, was born at Verona (according to Pozzo) about 1578. When a lad his talent was recognised by Felice Riccio, who took him into his study, and carefully instructed him. Leaving Riccio, he went to Venice, where he studied with Carlo Cagliari, and then proceeded to Rome. Here he made his home until his death, in 1648. Turchi excelled in the choice and distribution of his colors, among which he introduced a reddish tint which much enlivens his pictures. At Rome he paint-

ed some altar-pieces and other pictures for the churches, the most esteemed of which are in the Church of La Concezione. Among his other principal works at Rome are, *The Flight into Egypt*, in San Romualdo; *The Holy Family*, in San Lorenzo; and *St. Carlo Borromeo*, in San Salvatore. There are also to be noticed his *Passion of the Forty Martyrs*, in San Stefano; and his *Pietà* at La Misericordia. See Spooner, *Biog. Hist. of Fine Arts*, s. v.

Turck, ANTHONY, a Methodist Episcopal minister, was a native of New York State, and of Dutch descent. He was received into the travelling connection in 1793; "a holy and devout man, indefatigable and successful in his labors, subject to great afflictions, temptations, and trials," but with "increasing sweetness in communion with God" towards his end, and victory in death. He died March 13, 1803. See *Minutes of Annual Conferences*, i, 109.

Turibio (TURIBIUS), *St.* is said to have been born Nov. 16, 1538, of good family. Every Christian perfection distinguished him in early youth. He was educated at Valladolid and Salamanca, was made president of Granada by Philip II, and subsequently became archbishop of Lima, in South America, though still a layman. He was consecrated in 1581, and proceeded to initiate an excellent administration, during which he founded hospitals, seminaries, and churches, ordered diocesan and provincial synods, travelled in the execution of his duties over the entire country, and displayed great devotion during a contagious pestilence. He is credited with the miraculous cure of several persons who were sick, and with at least one successful raising of the dead to life. He died at Santa, Nov. 23, 1606. It is said that his body was brought, undecayed, to Lima after a whole year had passed since his decease, and that it continued to work miracles. He was accordingly beatified in 1679 by Innocent XI, and canonized by Benedict XIII in 1726. See WETZEL u. WELTE, *Kirchen-Lex.* xi, 330; Herzog, *Real-Encyklop.* s. v.

Turin, COUNCIL OF (*Concilium Turinense*), was held at Turin, Italy, in 398, or, according to others, in 401, to settle certain differences which had arisen among the Gallican prelates. The bishops of the province of Aix, Proculus of Marseilles, Simplicius of Vienne, and the bishop of Arles were present. As Turin was at that time under the metropolitan of Milan, it is conjectured that Simplicianus of Milan convoked it.

1. The first question settled in the council was that of Proculus of Marseilles, who (although that see was not in the province) desired to be recognised as metropolitan of the province of Narbonne. The council, for the sake of peace, granted to Proculus personally, but not to his see, the right of primacy which he claimed, declaring, however, that after his death the metropolitan should be a bishop of the province itself.

2. The council took into consideration the differences between the archbishops of Arles and Vienne, who both pretended to the primacy of Viennese Gaul. The decision was that he of the two who could prove his city to be the metropolis of the province as to civil matters should be considered as the lawful metropolitan, and in the meantime they were exhorted to live in peace.

3. The excuses of the bishops Octavius, Ursion, Remigius, and Triferius were considered. These prelates were accused of having conferred orders irregularly and uncanonically. The council decided that, in this case, indulgence should be granted to the four bishops; but that, in future, any bishops so violating the ancient decrees of the Church should be deprived of the right of ordaining, and of all voice in synodical assemblies; and that those who should be so ordained should be deposed. This canon was confirmed in the Council of Riez, A.D. 439.

Several other regulations relating to the affairs of the Church were also made, and eight canons in all published. See Mansi, *Concil.* ii, 1155.—Landon, *Manual of Councils*, s. v.

Turkey is the largest Mohammedan empire of the world, containing extensive possessions in Eastern Europe, Western Asia, and Northern Africa. Including the provinces in Europe and Africa which are virtually independent, and only pay an annual tribute to the Turkish government, the Turkish empire, in 1880, had an area of 2,302,000 square miles, and 47,000,000 inhabitants. In consequence of the treaty of Berlin in 1878, Turkey had to recognise the entire independence of Roumania and Serbia, and to consent to the occupation of Bosnia and Herzegovina by the government of Austria. Moreover, Bulgaria and Eastern Roumelia have become virtually independent of Turkish rule, leaving to the Turkish government only a small territory in Europe which is fully under its control. In Africa, Egypt and Tunis are likewise independent in point of administration. Deducting the dependencies, the Turkish government at present rules over a territory of 1,043,000 square miles, with a population of 23,500,000. In June, 1880, the Supplementary Conference at Berlin declared that in order to carry out the provisions of the treaty of Berlin concerning the rectification of the frontier between Turkey and Greece, Turkey ought to cede to Greece a territory containing about 8292 square miles and 400,000 inhabitants.

[Note by the Editor.—For the purpose of enabling our readers to understand more fully the present complicated boundaries of Turkey, we insert a map based upon the one recently issued by Stanford, of Charing Cross, London. It will be perceived that, in consequence of the late Russo-Turkish war, Turkey has lost far more than

half her European possessions, which are to be bounded henceforth by the Balkan Mountains instead of the River Save and the eastern Carpathian chain. Roumania, Bulgaria, Serbia, Bosnia, and Montenegro are wholly severed from her. Bulgaria has lost a slice of her territory on the west, given to Serbia, and another on the north-east, given to Roumania. Montenegro has gained a piece on the north-west from Bosnia, and another on the south-east from Turkey. Bosnia, including the part of Croatia formerly in Turkey, together with Herzegovina, has been occupied by Austria, and is not likely to be restored to Turkey. Greece gains a part of Albania and Thessaly; and Russia that part of Roumania (bounded by the Pruth and the Danube) adjoining Bessarabia (which she already held). In Asia Russia also acquires a district of Armenia adjoining Batum. Besides, there is created a quasi-independent district of Eastern Roumelia, within the above narrowed limits of Turkey. Turkey in Europe virtually now consists merely of a part of Roumelia and a part of Albania. The interior changes in territory and population made by the Berlin treaty are stated as follows in the London *Athenæum*. Estimates of other statisticians vary considerably from these figures.

	Square Miles.	Inhabitants.	Mohammedans.
Ceded to Roumania.....	5,355	246,000	142,000
Ceded to Serbia.....	4,326	264,000	75,000
Ceded to Montenegro.....	1,549	40,000	9,000
Ceded to Austria.....	15	2,000	
Ceded to Greece (?).....	5,300	750,000	40,000
To be occupied and administered by Austria.....	28,125	1,061,000	513,000
Formed into the principality of Bulgaria.....	24,404	1,773,000	681,500
Included in Eastern Roumelia.....	13,646	746,000	265,000

Roumania, in exchange for the territory ceded, is called upon to surrender 3270 square miles, with 140,000 inhabi-

Map of Turkey in Europe, showing the Territorial Changes made by the Treaty of Berlin.

tants, to Russia. If we exclude the provinces "indefinitely" to be occupied by Austria, and Eastern Roumelia, there remain to Turkey in Europe only 74,790 square miles, with 4,779,000 inhabitants, of whom 1,521,500 are Mohammedans. In Armenia Russia takes 10,000 square miles, with about 350,000 inhabitants. Cyprus, intrusted to the keeping of England, has an area of 2288 square miles, and about 150,000 inhabitants. Many of these accessions, however, are already the fruitful source of contention, and some of them will probably have to be taken possession of by force of arms. Greece is at the present moment (Aug. 1880) preparing to do so for her share. It is impossible now to predict what the issue will be.]

The former volumes of this *Cyclopædia* have special articles on BULGARIA, EGYPT, ROUMANIA, SERBIA; and on some of the Eastern Churches which are wholly or chiefly found in Turkey, as the JACOBITES, NESTORIANS, and MARONITES. In the present article, after giving such preliminary information of a general character as the intense interest at present prevailing on the Oriental question seems to demand, we treat, more particularly, of the religions of Turkey proper, so far as they have not yet been discussed in the special articles which have just been referred to.

I. *Geographical and Ethnological Features.*—The geographical position of the Turkish empire is peculiar, and would, under a strong government, be most advantageous. It connects Europe with Asia, Asia with Africa, the East with the West, the Mohammedan with the Christian world. It has an extensive seacoast, which is indented by numerous gulfs and bays, and embraces many excellent harbors. Some parts of this coast were in former times the seat of a very flourishing commerce, which would undoubtedly be revived under favorable circumstances. Almost the entire territory which is subject to direct Turkish rule is noted for its fertility; but Turkish misrule has not only arrested, but diminished, its productiveness. By far the greater portion of the Turkish possessions is situated in Asia. The European possessions have always been much smaller, but as they contained the capital and seat of government, they have hitherto been of much greater political importance. This importance has, however, of late been greatly reduced by the territorial losses which Turkey has sustained by the last Eastern war and the treaty of Berlin. The African part of the Turkish empire consists almost wholly of tributary states; and the farther the territory of one of these states, Egypt, is extended, the smaller becomes the hold the Turkish government has on it. Although ruling over portions of Europe, Asia, and Africa, Turkey is really an Asiatic power.

While the Turks are the ruling race of the empire, they constitute a majority of the total population only in the Asiatic possessions. Even Asiatic Turkey can hardly be said to be an Ottoman land, for the bulk of the people are descendants of the old Seljukian Turks who have been subjected by the Ottoman Turks. In the African dependencies the Turks are hardly represented at all, and in Europe they are almost everywhere in a minority. According to an elaborate article on the ethnographical relations of Turkey in Petermann's *Geographische Mittheilungen*, 1876, No. 7, the Turks are to be found as a compact population only in three sanjaks, those of Ruscuk, Tulcha, and Varna. These three sanjaks formed part of the vilayet of the Danube. They are less numerous in the Rhodope Mountains. On the shores of the Ægean Sea and the Sea of Marmora, and on the south-east shore of the Black Sea, they are greatly outnumbered by the Greeks, especially in the direction of Constantinople. It is a remarkable fact that all the sanjaks which contain the most compact Turkish population are now subject to the semi-independent prince of Christian Bulgaria and to the Christian governor of the autonomous province of Eastern Roumelia. The aggregate number of the Osmanli Turks in Europe, including Bulgaria, Eastern Roumelia, Bosnia, and Herzegovina, is estimated at about 2,000,000. Exclusive of these provinces, over which the authority of the sultan is not likely to be

ever restored, the number of Osmanlis will barely reach 1,000,000 in a total population of about 5,000,000. In Asia the Turkish race is supposed to number more than 8,500,000 of a total population of 17,000,000; but this number embraces many old tribes who have been totally absorbed and merged in the Turks. The Turcomans, who live chiefly in Northern Mesopotamia, and number about 100,000, belong to the same race as the Turks.

Up to the time of the late Eastern war, the bulk of the population in the European dominions of Turkey was made up of five non-Turkish tribes—Roumanians, Servians, Bulgarians, Greeks, and Albanians. The Roumanians, who chiefly inhabit the principality of Roumania, where they number about 5,000,000, have long been semi-independent of Turkey, and became entirely independent by the treaty of Berlin. Only about 200,000 remain subject to Turkish rule. Outside of Roumania and Turkey, Austria has a Roumanian population exceeding three millions. West and south of the Roumanians we find two branches of the Slavic race, the Servians and the Bulgarians. The Servians embrace the inhabitants of the principalities of Servia and Montenegro, and of Bosnia and Herzegovina. Both Montenegro (q. v.) and Servia (q. v.) are now independent states; Bosnia and Herzegovina have been placed under Austrian administration, and are likely to become soon a part of the Austrian empire. In Bosnia, the landed aristocracy, after the conquest of the country by the Turks, became Mohammedans, in order to save their property and their privileges, but they continue to speak the Servian language. Outside of the present and former dominions of the sultan, Austria has a Servian population of about 4,500,000, called Croatians, Slavonians, Dalmatians, and Slovenians. The large majority of the Servians belong to the Greek Oriental Church; but in Austria and in Bosnia there is also a large Roman Catholic element. According to a recent work by Klaić on Bosnia (Agram, 1878), written in the Croatian language, the population of Bosnia is divided, as regards the religious denominations, into—Orthodox Greek Church, 646,678, or 48.4 per cent.; Mohammedans, 480,596, or 35.9 per cent.; Roman Catholics, 207,119, or 15.5 per cent.; and Jews, 3000, or 2 per cent.; but in regard to race, 1,291,393 of this population are Slaves, only 2000 Osmanli Turks, 30,000 Albanians, and 11,000 gypsies. The Servians of all the different denominations in Austria and the former Turkish dominions are only now awakening to the full significance of the fact that their common language makes them joint members of one nationality, and a strong movement towards uniting at some future time all these members into one state has set in. Although the Mohammedan Bosnians are strongly opposed to this union movement, as well as to the annexation of their province to Austria, the rule of the Osmanli Turks over the Servian nationality may be said to be at an end.

The second Slavic race of European Turkey is the Bulgarians. They occupy the country south of the Danube, their southern ethnic boundary being a line passing through the towns of Nissa, Prisdend, Ochrida, Kastoria, Niagostos, Salonica, Adrianople, and Burgas, on the Black Sea. The number of Bulgarians is estimated at from three to four millions. After four centuries and a half of oppression, they were considered at the beginning of the 19th century the most wretched people of Europe. Then a marvellous awakening began. See BULGARIA. In spite of all oppression, they laid the foundation of a national system of education, and re-established the independence of their national Church. The treaty of San Stefano, March 3, 1878, between Russia and Turkey, provided for the establishment of Bulgaria as a tributary Ottoman principality and a national militia. The principality thus constituted would have extended from the boundaries of Servia and Albania to the Black Sea, and from the Danube nearly to the Ægean Sea, taking in about fifty miles of the Ægean coast. It would have included all the pre-

dominantly Bulgarian districts, both north and south of the Balkans, containing an aggregate of 79,400 square miles and an estimated population of between five and five and a half millions. But although the Bulgarians would have been the dominant race, a considerable number of Turks, Servians, and Greeks would have been merged in the Bulgarian majority. The treaty of Berlin of July 13, 1878, greatly modified this plan. The tributary principality of Bulgaria, as constituted by it, contains only 33,000 square miles and about 1,860,000 inhabitants. The Bulgarian districts south of the Balkans were constituted as the autonomous province of Eastern Roumelia, the governor of which must be a Christian, but is appointed by the Turkish government with the consent of the treaty powers. Eastern Roumelia has about 13,664 square miles and 850,000 inhabitants, of whom about 600,000 are Bulgarians, 150,000 Greeks, and 70,000 Turks. The aggregate population of Bulgaria and Eastern Roumelia reaches about 3,000,000, of whom fully 2,500,000 are Bulgarians, and the remainder mostly Turks and Greeks. The Mohammedan population is estimated at from 800,000 to 950,000, but fully two thirds of them are of Bulgarian descent. The Bulgarians, generally, were greatly dissatisfied with the provisions of the treaty of Berlin, and a strong movement began at once for a reunion of Bulgaria and Eastern Roumelia, which can hardly fail to be ere long successful, and result in the emancipation of the entire Bulgarian population from Turkish rule.

The Greeks, or Hellenes, have a numerical preponderance in the southern part of European Turkey, especially in Thessaly, Epirus, Southern Macedonia, and the islands, the most important of which is Crete. They are the most civilized among the Christian races of Turkey. Their number is estimated at about 1,000,000 in European and 1,000,000 in Asiatic Turkey. The people of the predominantly Greek districts expressed during the late civil war a desire to be annexed to the kingdom of Greece, and the government of that kingdom made in January, 1879, an attempt to occupy these districts. The attempt had, however, to be abandoned at the request of the great powers. The Congress of Berlin expressed a desire that the frontier between Greece and Turkey should be rectified to the advantage of the former power, and offered the mediation of the great powers in case Turkey and Greece should be unable to agree. As this agreement was not reached, the supplementary congress held in Berlin in June, 1880, designated the new frontier between the two states. In Asia, the Greeks are fast occupying the seaports and coast of Asia Minor, from which the Turks are steadily retiring before them, and it is believed by many that a vigorous Greek kingdom in Europe would soon find a legitimate field of expansion along the coast of Asia no less than that of Europe.

The Albanians occupy the country south of the Servians and Bulgarians, and north of the Greeks. Their number is estimated at from 1,200,000 to 2,000,000. More than one half of them have embraced Islam, though it is said that many of the Mohammedan Albanians remain secretly Christian. They are divided into a number of tribes. Some of the most warlike mountain tribes are Roman Catholics. In the frontier districts the Albanians are greatly mixed with Servians in the north and with Greeks in the south. They opposed with great vigor the cession to Montenegro by the Turkish government of some districts largely inhabited by Albanians, and declared an intention to oppose no less vigorously the cession of some of their southern districts to Greece. The Albanians are the only one of the five non-Turkish nationalities of European Turkey which shows some kind of attachment to the Ottoman government. This must partly be explained by the predominance among them of Mohammedanism, and partly by their determination not to be absorbed by Servians and Greeks. The increasing consolidation of Servians, Bulgarians, and

Greeks will, however, cut them off from Constantinople, and make it impossible for them to remain a Turkish province.

A curious fact in the relation of the different races that people European Turkey is the irregular manner in which they are distinguished and mingled. "No locality," says Baker, in his *Turkey*, "can be found where the population is exclusively of the same nationality; but a rival race crops up here and there, and jostles its neighbors. We find, for instance, a quarter where the majority of the population are Bulgarians; but among them in considerable numbers are Turks, Greeks, Circassians, and gypsies. In another quarter the majority are Albanians, but they again have to bear the friction of Bulgarians, Wallachians, Greeks, and Turks; and so on all over the country. Each of these nations has its own language, religion, and customs; and it therefore follows that the difficulty of governing the mass lies in a direct ratio to the number of races represented in it." This irregular distribution of races has, however, been considerably affected by the close of the Eastern war, when, especially, large numbers of Turks and Bulgarians left their endangered homes, and emigrated to districts predominantly inhabited by coreligionists. The Austrian consul Sax (in *Oesterreichische Monatsschrift für den Orient*, 1878) estimates the number of those who from the spring of 1877 to the close of 1878 changed their residence at more than one million.

II. *Origin and Political History.*—The Turks are first heard of in history when they emerged from the regions of Central Asia, and emigrated, early in the Christian era, to the neighborhood of the Aral and Caspian seas. In the 6th century they formed an alliance with the Roman emperor Justin II; in the 7th they began to learn the Mohammedan religion at the hands of the Saracens. After their conversion to Mohammedanism they rapidly rose in power and influence. One branch, which, after its leader, Seljuk, received the name of Seljukian Turks, subjugated a large portion of Persia, and thence spread into Syria, Armenia, Georgia, and Lower Egypt. Under Malek Shah, the grandson of Seljuk, the dynasty of the Seljukian Turks was in the 11th century the greatest power in Asia. They gradually pressed their conquests to the West, and from this time a more special and crying persecution of the Christians began. After Malek's death, the empire was divided into smaller states, which became rivals, and were finally extinguished in the 13th century by the irruption of the Moguls under Genghis Khan. Then the history of the Ottoman Turks begins. The first mention of them is made at the beginning of the 13th century, when they emigrated, under the name of Oghuzes, from the main body in Khorassan, Persia, to the mountains in Armenia, whence a part removed and settled near Angora, still acknowledging the suzerainty of the Seljukian sultan of Iconium. Partly at the expense of the Greeks, partly at that of other Turkish emirs or princes, the leaders of this band, Ertoghrul and his son Othman, or Osman, gradually grew in power. Othman became the most powerful prince in Western Asia, and from him his followers took the name by which this branch of the Turks has ever since been designated, that of Ottoman, or Osmanli. Shortly before the death of Othman, in 1326, his armies took Brousa, which became the Asiatic capital of the Ottomans. With Othman's son, Orkhan, the Ottoman empire begins. He made himself entirely independent of the Seljukian sultan, though he continued to bear the inferior title of emir. During his reign Gallipoli, in the Thracian Chersonesus, the first acquisition of the Turks in Europe, was conquered, in 1357, and all of Western Asia occupied. He imposed upon the conquered Christian nations the tribute of children, who were brought up in the Mohammedan faith, and out of whom was formed the famous force of the Janizaries, who for three centuries constituted the strength of the Ottoman armies.

In the reign of Murad I, the successor of Orkhan, Adrianople was taken, which became the European capital of the Ottomans till they captured Constantinople. When the Turks entered Europe, the territory of the Greek empire was almost limited to a quadrangle extending from Constantinople to Adrianople, and from the Black Sea to the Archipelago, to a small part of the coast near Thessalonica, and the larger portion of the Peloponnesus. The bulk of what subsequently became European Turkey consisted of the empire of Serbia, extending from the Danube to the Peloponnesus, and bounded on the west by Bosnia and the Adriatic Sea; and of the kingdom of Bulgaria, extending from the Danube to Adrianople, bounded on the east by the Black Sea. The frontier between Bulgaria and Serbia was constantly changing. When the Turks began to get a foothold, Widdin and Sophia were the nearest Bulgarian towns to the frontier. At this time the power of Serbia began to go down after the death of Stephen Dushan, its greatest ruler, and Bulgaria began to split up into three separate kingdoms. Thus both were unable to resist the advancing Turks. In 1363 the Bulgarian city of Philippopolis was taken. About 1371 the chief of the three Bulgarian kingdoms, that of Tirnova, became tributary. For a while a Slavic confederation, under the Bosnian king Stephen, won some successes; but in the great battle of Kossova, in 1389, the confederate Bosnians, Servians, Bulgarians, and Wallachians were utterly defeated. Two or three years later, Serbia and Wallachia became tributary, and the greater part of Bulgaria was conquered. Murad's son, Bajazet I, was the first to exchange the humbler title of emir for that of sultan, and also the first who attacked Constantinople. The progress of the Turks was arrested by the stunning defeat which they suffered in 1402 at Angora, at the hand of Timur, the famous Tamerlane; but they recovered their power under Bajazet's grandson, Murad II (1421-51), who conquered Thessalonica, Corinth, Patras, and a part of Albania, which was heroically defended by the great Scanderbeg. His son, Mohammed II (1451-81), conquered Constantinople, and thereby destroyed the Greek empire. He reduced, in 1459, Serbia from a tributary principality to an Ottoman province; in 1463 Bosnia was annexed; in 1461, the Christian empire of Trebizond, in Asia; in 1466, Caramania; in 1479, the Peloponnesus, which at that time belonged to the Venetians. In 1480 Otranto, in Italy, was captured; and the design was openly avowed to conquer all of Western Europe and to exterminate Christianity. But Mohammed's death, in 1481, put an end to these schemes; Otranto was soon abandoned, and no further progress was ever made west of the Adriatic. The conquests of Mohammed gave to the Turkish empire about the same extent it had before the late Eastern war. In the whole of the Balkan peninsula only the small mountain district of Montenegro has kept its independence to our own times. Selim the Inflexible (1512-19) warred against Mohammedan enemies, and annexed Syria and Egypt to his dominions. From the last of a line of nominal caliphs Selim obtained a cession of his rights, and ever since the Ottoman sultans have been acknowledged as chiefs of their religion by all Mussulmans of the Sunni sect. During the reign of Suleiman II (1519-66) the empire attained the greatest extent it has ever had. The larger portion of Hungary was annexed; a Turkish pasha ruled at Buda; and the princes of Transylvania, Moldavia, and Wallachia became vassals of the sultan. Rhodes was taken from the Knights of St. John, and a large tract of land in Asia from the Persians. With the death of Suleiman the decline of Turkish power began. The reign of Selim II, the Drunkard (1566-74), was marked by the first great reverse of the Ottoman arms—the overthrow of the Turkish fleet by the fleets of Spain and Venice at the battle of Lepanto, in 1571. No lasting conquests of importance were made from this time, except the islands of Cyprus and Crete. The frontier

on the north towards Hungary, and in later times towards Russia, went steadily back. The succession of great rulers was stopped. The powers of the sultan became less, the power of the pashas greater. In 1622 a sultan was, for the first time, murdered. In the latter half of the 17th century the Turks began to lose their hold on Hungary. The battle of St. Gotthard, in 1664, was the first great overthrow of the Turks by land. At the end of the 17th century the Turks had been at war with all their Christian neighbors, and they had lost territory at all points except one. In a war against Poland they had gained Podolia; they had lost, besides Hungary, the Peloponnesus, and Azof. All of these territories, inclusive of Podolia, were given up by the treaties in 1699 and 1700. The peace of Carlowitz, in 1699, marks a point in the decline of the Ottoman power, and the Turks were for the first time compelled to treat with the Christian powers of Europe on equal terms. The wars against Austria, which, with breaks from time to time, had gone on since the battle of Mohacz, 1526, by which the Turks established their rule over Hungary, were ended by the peace of Sistova in 1791. The result was that Hungary was freed from the Turk, but that Serbia and Bosnia were left in his clutches. The frontier established by that peace has remained almost unchanged. The most dangerous of all the foreign enemies of Turkey proved to be Russia. The wars between Russia and the Turks began in the middle of the 17th century, and the two countries have ever since appeared as irreconcilable hereditary foes whose interminable conflict could only be ended by the destruction of the one or the other. The wars between Russia and Turkey put on a very distinctive character when Peter the Great, in 1696, took Azof, the key of the Black Sea. From the time that Mohammed the Conqueror took the Genoese possessions in the Crimea, the Black Sea had been wholly under the power of the Turks. When Azof fell into the hands of the Russians, it remained for a great time the point of contention between the two countries. A new stage in the history of these wars is marked by the famous treaty of Kainarji of 1774, which ended the first war of Catherine II against the Turks. This treaty for the first time brought the Ottoman power into some measure of dependence. It gave Russia a firm foothold on the Black Sea, and the important right to remonstrate in behalf of Wallachia and Moldavia, in case of any breach of their privileges by the Turks.

The most prominent feature in the Turkish history of the 19th century is the successful revolt of the subject Christian nations against the Ottoman power. This war of independence began in Serbia in the first years of the new century. It was at first a rising against local tyrants who defied the authority of the sultan, but it soon became a war of independence. In 1826 the independence of the country was recognised by Turkey, which was only to receive an annual tribute, and for some time retained the right of keeping garrisons in certain fortresses. The Greek war of independence began in 1821. Finding himself unable to subdue both Greece and Serbia, the sultan had to apply for help to his rebellious vassal, pasha Mehemet Ali of Egypt; but the outrages of the Egyptians led to an interference by England, France, and Russia, who, in 1827, in the treaty of London, agreed to make Greece free; destroyed, in November, 1827, at the battle of Navarino, the Turkish and Egyptian fleet, and compelled the sultan to agree to the treaty of London. In the treaty of Adrianople (1829), Turkey had not only to acknowledge the independence of Greece, but the almost complete independence of Moldavia and Wallachia, whose hospodars thereafter held office for lifetime, and to cede several fortresses on the coast of the Black Sea to Russia. Mahmud II (1808-40) was desirous of introducing important reforms, and in 1826 exterminated the Janizaries; but while his reforms did little good to the Christians, they set his Mohammedan subjects

against him. There were Mohammedan revolts in Albania and Bosnia, which were put down in 1831 and 1832; but more important was the rebellion of Mehemet Ali of Egypt, who conquered Syria and other Asiatic possessions of the sultan, and seemed to threaten the very existence of the empire, when (1840) four of the great Christian powers of Europe concluded the treaty of Buda-Pesth, and compelled Mehemet Ali to give up his Asiatic conquests. In the Crimean war (1853-55), Turkey would probably have been crushed by Russia but for the interference of England, France, and Sardinia in its behalf. By the treaty of peace in 1856, the powers which signed it—France, Austria, Great Britain, Prussia, Russia, and Sardinia—declared that the Sublime Porte was admitted to partake in the advantages of public law and the European concert. This concession was made to the Porte in recognition of the *hatti-humayun* (Feb. 18, 1856), a proclamation which promised to the Christians equal civil rights, but which the Porte found itself no more able to carry out than a preceding reformatory edict, the *hatti-sherif* of Gulhane of 1853. The approaching collapse of Turkey became more and more apparent. Terrible massacres of Christians in Damascus and Mount Lebanon led, in 1860, to a French intervention. In 1861 Moldavia and Wallachia united themselves, in spite of the treaty of Paris and of the protest of the Porte, into one state, called Roumania. A powerful impulse was given to the aspiration of the Christians for freedom by the complete victory of the nationality principle in Italy and Germany. As the Italians and Germans had re-established an Italian kingdom and a German empire, thus the Greeks of Turkey expressed a wish for a union with Greece, the Servians began to dream of the re-establishment of a large Servian empire, the Bulgarians of a Bulgarian kingdom, the Roumanians of severing the last tie of connection with Turkey. The first movement in this direction was the insurrection in Crete in 1866, which was suppressed in 1869. The powers which had signed the treaty of Paris held a special conference and recognised the demands of the Porte as just. In 1867 the demand of Servia that the Turkish garrisons be withdrawn from all the Servian fortresses was granted. In 1872 the sultan conceded to the khedive of Egypt two important attributes of sovereignty, the direct hereditary succession and the authorization to make loans. On July 6, 1875, an insurrection broke out in Herzegovina, which gradually kindled the great Eastern war. A series of joint steps were taken by the great powers of Europe to induce the Porte to concede the reform demanded by the Christian insurgents. The most important were, the note of count Andrassy of Dec. 30, 1875; the Berlin Memorandum of May 14, 1876; the Constantinople Conference from December, 1876, to January, 1877; and the London Protocol of March 21, 1877. On April 24 Russia declared war, and at the beginning of 1878 Turkey was utterly crushed. In the peace of San Stefano of March 3, 1878, Turkey had to recognise the entire independence of Roumania, Servia, and Montenegro, to cede some additional territory to Servia and Montenegro, and to consent to the establishment of an independent principality of Bulgaria. In the case of Bulgaria, these stipulations were considerably modified by the treaty of Berlin of July 13, 1878, as has already been stated. Bosnia and Herzegovina were placed under Austrian administration, and to Greece the annexation of some Greek districts in Southern Turkey was promised. The introduction of the reforms formally demanded by the great powers of Europe was again promised, and their execution placed under the guarantee of the great powers. A few weeks before (June 4, 1878), Turkey had concluded a secret treaty with England, which assumed a protectorate over the Asiatic dominions of the sultan as long as Russia would not return its conquests in Armenia. In return, Cyprus was placed under English administration, and the Porte pledged itself to carry through administrative reforms in the Asi-

atic possessions. Thus Turkey appeared in an entirely helpless condition, and, so far as its European possessions were concerned, in a state of total decay. Among the European powers, only one—the Tory government of England—occasionally used its influence in behalf of the Turkish government. The fall of the Tory ministry in 1880, and the access to power of the Liberal party, which, during the war, had openly expressed its sympathy with the Christian nationalities of the Balkan peninsula, especially with the Greeks, deprived the Mohammedan government of its last hope. As the Turks had been unable to agree with the Greek government about the promised rectification of frontier, the powers which had signed the treaty of Berlin held another special conference at Berlin in June, 1880, and designated the districts which, in their opinion, should be ceded to Greece. The vital power of Turkey appears to be exhausted. A constitution drawn up by Midhat Pasha, and proclaimed Dec. 23, 1876, which promised to the population very extensive rights, failed to make any impression either at home or abroad. The Parliament which met in March, 1877, attracted more attention by its novelty than by its work.

III. *National Characteristics and Governmental Policy.*—Comparing Turkey with the other states of Europe, we are struck with one very remarkable distinction. In all the other countries of Europe the bulk of the people have learned that they have a common country, and that, however widely their opinions may differ, and however much they may dislike the existing government, they have important interests in common. The Turks have never become a nation. After subjecting many tribes of different race and religion, the exclusive aim of the sultans has been to keep them in subjection, and to extort from them as high a tribute as possible. The effect of Turkey's rule has therefore been most blighting upon every interest of her subjects. Morally, socially, economically, and politically, her dependencies have sunk, under the combined influence of a false, fanatical, and sensual religion, a bigoted, selfish, and imbecile régime, and an ignorant, fatalistic, and effete philosophy, to the lowest possible point of civilized communities. Corruption reigns in every department of state, and superstition in every form of society. The ruling class, being Turks and Moslems, feel no sympathy with the natives, who are largely Christian and of different races from themselves. Extortion, bribery, chicanery, and treachery have for ages characterized the government, until it has become a festering ulcer and a burning shame upon the face of Europe. But for the intrigues and jealousies among the other European powers, each of which has been anxious to outwit the rest in seizing upon the spoils of "the Sick Man's estate," Turkey would have been dismembered long ago by foreign interference, or have collapsed in utter ruin by its internal rottenness. England has been largely chargeable for maintaining, by her diplomatic policy, this eyre and blot upon the map of the world.

Several large territories are but very loosely connected with the empire. Tunis, in Africa, considers itself as a vassal state of the sultan, but without any definite obligation, not even that of paying an annual tribute. Formerly there were two other states of this class, Algeria and Tripoli; but the former has been conquered by France, and the latter has recently come under the direct authority of the sultan. The vassal states which had only to pay an annual tribute, and were otherwise autonomous, were, in 1878, Roumania and Servia, in Europe; Samos, in Asia; and Egypt, in Africa. In 1878 Roumania and Servia became entirely independent, and Bulgaria was erected into a tributary vassal state. In the autonomous province of Eastern Roumelia, the power of the sultan has been almost reduced to the right of appointing a governor.

By the old law of succession, which has been left unchanged by the constitution of 1876, the crown is inherited, according to seniority, by the male descendants

of Othman, sprung from the imperial harem. The harem is considered a permanent State institution. All children born in the harem, whether offspring of free women or of slaves, are legitimate and of equal lineage; but the sultan is succeeded by his eldest son only when there are no uncles or cousins of greater age. It has not been the custom of the sultans for some centuries to contract regular marriages. A special feature attending the accession of new sultans to the throne has been the slaughter of brothers and other near kinsfolk who were feared as rivals. Until very recently the will of the sultan was not limited by any law. The precepts of the Koran were regarded as the fundamental law of the empire. The legislative and the executive authority were exercised in the name of the sultan by the grand-vizier as head of the temporal government, and the Sheik el-Islâm as the head of the Church. The constitution of 1876 pretended to make the sultan a constitutional monarch, and to provide for the exercise of the legislative and judicial powers after the model of the West European states; but the constitution thus far (1880) is almost a dead letter. Several Christians, however, have of late held the position of Minister of State. The financial affairs of the government are in a condition of thorough and hopeless disorganization, and the time of the empire's complete dissolution cannot be distant.

IV. *Mohammedanism*.—The Turks have been a Mohammedan people from the 10th century, and have ever since been the banner-bearer among the Mohammedan states. The sultan is regarded as the head of the Sunnite Mohammedans [see *SUNNITES*], not only in Turkey, but as far as the Sunnite form of Mohammedanism extends. Church and State are so intimately united in Turkey that the judicial and the priestly power are vested in the same officer, the *Ulema*, who regards the Koran as the sole authority for the decision of ecclesiastical as well as civil causes. "The administration of justice in Turkey is now divided into two parts—that of the *Sheri*, wherein all judges are Mussulmans, and that of the *Nizâmîyeh*, composed of both Christians and Mussulmans. The head of all the courts of the *Sheri* is the Sheik el-Islâm, who sanctions all their judgments. The judicatory of the *Sheri* is composed of a high court of appeal (*Ayaz-ahuey*), divided into two chambers (*Sudûr*), one for Turkey in Europe, and one for Asia. At the head of each is a *câzi-asker*, literally military judge. The *câzi-asker* is assisted by fourteen honorary chief-justices. In the hierarchy of the *Ulema* the mollahs rank next to the *câzi-asker*, and after them the cadis. The first in rank are the mollahs of Constantinople, nine in number, and who sit in the court *Sheri*, at the capital, for a year, being taken in turn from the body of the mollahs. At its head is the mollah of Stamboul. The second in rank is the *Mederizet*, which numbers fifty-seven titularies. The mollah, when on duty, serves for only a year, and then returns to the roll" (Baker, *Turkey*). Turkish education, until recently, was also in close connection with the State religion. It was organized by sultan Mohammed I (1451-81), the greatest soldier-statesman that the Ottoman empire has produced. He established elementary schools called *mektebs*, scattered over his empire in every town and in almost every Mohammedan village, and numerous public schools or colleges of the higher order, which were called *medresses*, in distinction from the *mektebs*, or elementary schools. The *medresses* went through ten regular courses of grammar, syntax, logic, metaphysics, philology, the science of tropes, the science of style, rhetoric, geometry, and astronomy. The taker of a degree in these subjects received the title of *danîshmend*, which has now been replaced by the term *sofîa*. The degree entitles him to the mastership of one of the minor public schools; but in that case he renounces the prospect of becoming a member of the *Ulema*, or of any of the higher educational appointments. For this it is necessary to go through a still further course of study, and to pass several examinations. Incentives to work are

given in the honors and endowments which are conferred. The *Ulema* supplies all the professors of the high-schools, who are called *muderris*, and from the same order are chosen all the ministers of justice, including the *câzi-askers*, the mollahs, and the cadis. The actual priesthood of Turkey takes a very inferior position in the State. The ministers of public worship are called *imams*, who officiate at public prayers, and sheiks, or preachers. But the fact that the appointments to the priesthood are allotted to the holders of minor degrees does not mark, on the part of the Turks, any want of respect for their faith. It only arises in consequence of the legal profession being so intimately connected with the Church as exponents of the law of the Koran that they, in fact, form the senior branch of the hierarchy. Dervishes, or Mohammedan monks, are very numerous and are divided into a number of sects. See *DERVISH*. The *Vacouf*, or Church property, which belongs to the mosques and other religious institutions and to benevolent foundations, is administered by a special department of the State called the *Erkuf*, and consists of two classes: 1st. Property or its produce actually belonging to such ecclesiastical establishments, and held and received on their account by the *Evkaf*; and 2d. Property owned by private persons, but lapsing, in default of direct heirs of the owner, to the *Evkaf*, and subject, in the meantime, to a small yearly contribution payable to that department; but an owner of *Vacouf* property having no direct heirs is not debared from selling it to a person having such heirs, and so preventing it, for the time, from falling into the *Evkaf*. By a recent law a private person holding *Vacouf* property can, on payment of certain fees to the government, have it converted into what is called *mülkiyeh*, a title which gives the holder the fee simple of the land, to do with it as he pleases, to leave it by will, and in default of his doing so, it passes to his next heir.

Trustworthy statistics on the religious denominations of Turkey cannot yet be obtained. E. G. Ravenstein, in an article on the population of Russia and Turkey in the *Journal of the Statistical Society* (Lond. 1877), estimates the total population of European Turkey, exclusive of Roumania and Servia, but inclusive of Bosnia and Bulgaria, at 9,661,000, which he distributes as follows among the religious denominations:

EUROPE.		
Turkish Mohammedans.....	1,767,500	
Mohammedans of other nationalities.....	2,479,500	
Total Mohammedans.....		4,247,000
Greek Church.....	4,705,450	
Armenians.....	89,000	
Roman Catholics.....	426,000	
Protestants.....	10,000	
Total Christians.....		5,230,450
Jews.....	78,000	
Gypsies.....	104,750	
Total.....		9,660,200
ASIA.		
Turks.....	6,973,500	
Other Mohammedans.....	6,299,850	
Total Mohammedans.....		13,273,350
Greek Church.....	1,484,868	
Armenians.....	735,100	
Roman Catholics.....	100,100	
Protestants.....	10,450	
Maronites, etc.....	487,000	
Total Christians.....		2,817,518
Jezides and Kizilbashî.....	62,000	
Jews.....	106,000	
Gypsies.....	67,000	
Total.....		16,325,868

A Servian statistician, Jakshitsch, gives the following estimates of the population of European Turkey: *Christians* in Turkey proper, 2,484,501; in Eastern Roumelia, 559,776; in Bosnia, 780,276; in Bulgaria, 1,196,248; total, 5,020,801. *Mohammedans* in Turkey proper, 1,883,127; in Eastern Roumelia, 359,434; in Bosnia, 400,635; in Bulgaria, 760,267; total, 3,403,463. *Jews* in Turkey

proper, 55,018; in Eastern Roumelia, 3969; in Bosnia, 6968; in Bulgaria, 8959; total, 74,914. Total population of European Turkey, 8,499,178. According to these authorities, the aggregate number of Mohammedans in European and Asiatic Turkey may be estimated at from 15,700,000 to 16,500,000, that of Christians of all denominations at about 8,000,000, that of the Jews at about 200,000. The aggregate population of the African dependencies, owing to the rapid expansion of the Egyptian dominions of late years, was estimated, in 1880, at 20,500,000, nearly all of whom, with the exception of the Copts of Egypt, are Mohammedans. See MOHAMMEDANISM.

V. *The Christian Churches of Turkey.*—Although the Turks, after the conquest of the Balkan peninsula, displayed all the horrors of Oriental despotism, they did not aim at the extermination of the Christian religion. There is probably no country of Christian Europe which has not imposed, at some time in the course of its history, more severe penalties upon the profession of a dissenting Christian creed than the Turks have done upon the profession of Christianity. The Christians, in their civil relations, found themselves greatly oppressed, but the Turks did not meddle with the internal affairs of the churches. The influence which they usurped by the appointment of the high dignitaries in the Eastern churches was inspired by considerations not of power or proselytism, but of greed. The social advantages which an apostasy to Islam involved gradually induced nearly the whole population of Albania, the entire nobility of the Bosnians, and large numbers of the Bulgarians and other Christian tribes to adopt the religion of the conquerors; but the immense majority of the population of the European dominions of Turkey and large numbers in Asia continued to adhere to the several Christian churches. As the military power of Turkey began to wane, Russia, France, and other powers claimed, and received by treaty, the right of protectorate over the Turkish subjects professing the national religions of the several European countries. In 1839 the sultan, by the *hatti-sherif* of Gulhane, proclaimed the equality of Christians and Moslems before the law. The provisions of this charter of religious liberty were renewed and extended by sultan Abdul-Mejid in the charter called the *hatti-humayum*, promulgated in February, 1856. The renewal of the charter was mentioned in the treaty of Paris as the consideration on which the powers admitted Turkey to the company of European states, and guaranteed to it its rights as an independent and inviolable power. The new Turkish constitution of December, 1876, promised to the professors of all religious denominations full equality of civil rights. In the first Turkish Parliament, which met in 1877, all the religions of the empire were fairly represented. Thus among the deputies returned from Constantinople were five Turks, four Christians, and one Jew; and of the Christians, one was a Greek, one a Roman Catholic Armenian, and two Gregorian Armenians. In 1878 the treaty of Berlin (art. 62) placed the establishment of the principle of religious liberty to its fullest extent under the guarantee of all the great powers of Europe. When the Turks completed the conquest of the Balkan peninsula, they designated the aggregate of the Christian subjects as *rajah* (herds), while the different tribes were distinguished as *millet* (nation). The Mohammedan Turks were, however, so strongly inclined to confound Church and State that they viewed the several millets as so many religious communions. Mohammed II, after the capture of Constantinople, made the patriarch of that city the secular head of all the *rajah* belonging to the Orthodox Eastern or Greek Church. The civil functions of the patriarch were shared in different degrees by the subordinate bishops, and thus the entire hierarchy of the Greek Church appeared as the actual administrator of the civil interests of the people, and as such were held by the Porte responsible for the loyalty of the population. Besides the millet of the

Greeks, there are others for the Armenians, United Armenians, Latins, Protestants, and Jews. Their organization is similar to that of the Greeks. The secular jurisdiction of the Armenian patriarch includes the Jacobites. For various statistical statements of the present Christian population of Turkey, see above.

1. *The Greek Church.*—When the Turks took, in 1453, possession of Constantinople, the foremost episcopal see of the Eastern Church became subject to their rule. The patriarch of Constantinople had gradually become for the Eastern Church what the patriarch of Rome became for the West. See GREEK CHURCH. When the termination of ecclesiastical communion between the patriarchs of Rome and Constantinople became a fixed fact, all of the Orthodox Eastern churches looked upon the patriarch of Constantinople as the most eminent bishop of the Orthodox churches, although many of them, like the churches of Russia, were entirely independent of his jurisdiction. As long as there was a shadow of hope that the Eastern Roman empire would be aided by the Catholic Church of Western Europe in its resistance to the advance of the Turks, several patriarchs of Constantinople had shown a readiness to reunite with Rome. To the bulk of the clergy and the laity the idea of such a reunion was extremely distasteful, and after the conquest of Constantinople it was entirely abandoned. The sultans claimed the same rights with regard to the appointment of the patriarchs that had been possessed by the Eastern or Byzantine emperors, and the Eastern Church submitted to the demand. Georgius Scholarius, who was elected patriarch soon after the conquest of Constantinople, and assumed the name of Gennadius, accepted from sultan Mohammed II the investiture as patriarch of New Rome. The sultan showed, however, but little respect for the authority of the patriarch, and finally compelled him to resign, notwithstanding the petitions of the faithful in his behalf. The next patriarch, Joasaph, was banished by the sultan because he had refused to acknowledge the unlawful marriage of a Mohammedan minister with the daughter of an Athenian prince. Patriarch Simon, also living in the second half of the 15th century, was the first who offered to the sultan one thousand ducats for the patriarchate. This money for the confirmation of the new patriarch is called *kharratzion* or *peskesion*; it has not only been always paid since, but the amount was constantly increased, and the Turkish government generally showed a disposition to sell the patriarchate to the highest bidder, and to vacate it as often as possible. Only a few of the patriarchs were allowed to remain in office for a long term; generally, after holding it for a short term, they were either compelled to resign, or they were banished, throttled, or degraded. The habit of the patriarch to purchase the confirmation by the sultans had a most disastrous influence upon the Church. The Simonistic corruption descended from the patriarchs to the archbishops and bishops, who had to pay heavy sums for their confirmation, and, in return, tried to indemnify themselves by extorting as much money as possible from their people. For political reasons, the external form of the Church was changed as little as possible; but in consequence of the corruption prevailing in the high places, the Church fell into great decay. The lower clergy, who were generally destitute of a higher education, showed but little sympathy with the people; and when the government conferred upon them some privileges, they looked with indifference upon the heavy taxes which oppressed the laity. Little resistance was even made by the clergy to the cruel institution of the Janizaries, a military corps formed by the children of Christians, who were taken away from their parents, educated as fanatical Moslems, and used for the compulsory extension of Mohammedanism. In some of the provinces the power of the Christian people to resist the proselytism of the Turks gradually relaxed. Especially was this the case in Albania, where the Christian population decreased

from 350,000 to 50,000 during the period from 1620 to 1650. Among the apostates were even many priests and monks. The subsequent history of the Greek Church of Turkey does not offer many points of great interest. The growing power of Russia extorted from the Ottoman Porte in a number of treaties the official promise to protect the Christian religion and the Christian churches, and made itself chiefly felt in behalf of the coreligionists of Russia, the Orthodox Eastern Church. Between Constantinople and Rome an entire estrangement continued to exist. At the beginning of the 17th century the patriarch Neophytus II of Constantinople was believed to be favorable to a union with Rome; but no formal negotiations were opened, and none of the following patriarchs of Constantinople has shown any leaning in that direction. All the invitations and overtures that were made by the popes met, in Constantinople, with a firm and decided refusal: thus, in 1848, an invitation from Pius IX, addressed to the entire Eastern Church, for a corporate union with Rome, and another in 1869, addressed by the same pope to the Greek bishops to attend the Vatican Council, were promptly and firmly declined in Constantinople and throughout the Greek Church. In the Asiatic part of Turkey the patriarch Athanasius IV of Antioch, who was elected in 1686, joined the communion of Rome, and was followed by a part of the clergy and laity. Thus arose the United Greek Church of Turkey [see GREEK CHURCH, UNITED], which, from Syria, spread over all parts of the Turkish empire. In the 16th century both the Lutheran and the Calvinistic theologians endeavored to establish friendly relations with the Greek Church, and entered into correspondence with several patriarchs of Constantinople. The Lutheran attempts were never attended with any success. The Calvinists completely gained over to their side one of the most gifted patriarchs that have ever occupied the see of Constantinople, Cyril Lucar (q. v.), who went so far as to transmit to Geneva the form of a Calvinistic confession of faith; but, with the violent death of the patriarch, who was strangled, and whose memory was execrated by the Oriental patriarchs, this attempt, too, came to an end, and the Greek Church in Turkey, as well as in other countries, has kept aloof from all corporate negotiations with Protestant churches. In the 19th century the attempts made by the more congenial Anglican churches of the British isles and the United States to establish intercommunion with the various Episcopal churches of the East led to friendly correspondence between the patriarchs of the Greek Church, on the one hand, and the archbishop of Canterbury and other Anglican bishops, on the other. At the union conferences held at Bonn, Germany, in 1874 and 1875, between Oriental, Anglican, and Old-Catholic theologians, the Greek Church of Turkey was also represented by several theologians. See RUSSIA.

Until the establishment of the independence of Greece, the Turkish empire comprised nearly all the Greek churches of the world, except those of Russia and Austro-Hungary. Among the bishops of the Greek Church the patriarch of Constantinople holds the highest rank. He alone is invested by the Turkish government with the attributes of civil head of the entire Church. In regard to ecclesiastical jurisdiction, he is, however, only the head of the patriarchate of Constantinople, the other three patriarchs (of Antioch, Jerusalem, and Alexandria), as well as the metropolitan of Cyprus and the abbot of Mount Sinai, being independent of him. The three patriarchs named receive in their *berat*, or official decree of confirmation, the same rights and privileges as the patriarch of Constantinople; each of them has his own patriarchal synod, which fills the see in case of vacancy. An attempt made by the patriarch of Constantinople to appoint the patriarchs of the three other sees led, from 1843 to 1845, to a violent controversy between the patriarch of Constantinople and the Patriarchal Synod of Jerusalem, in which the latter remained

victorious. The three patriarchs communicate, nevertheless, with the Turkish government through the patriarch of Constantinople, and are not even allowed to come to the capital without his permission. The aggregate territory of these three patriarchates is, however, small, and all the remainder of the Greek churches of Turkey was until recently under the immediate jurisdiction of the patriarch of Constantinople. The establishment of the kingdom of Greece, in 1821, virtually severed the connection of the churches of the kingdom with the patriarch of Constantinople, on whom they had formerly been dependent. The entire independence of the Church of Greece was, however, not proclaimed until 1833, when a synod of the bishops of Greece met for this purpose at Nauplia, and the formal recognition of the independence by the patriarch of Constantinople did not take place until 1850. Servia and Roumania were virtually as independent of the patriarch of Constantinople in ecclesiastical affairs as they were of the sultan in politics. The establishment of their entire political independence, in 1878, entails the complete severance of their ecclesiastical connection with Constantinople. The Bulgarians, although agreeing in doctrine with the Eastern Orthodox Church, were, until 1767, independent of the jurisdiction of the patriarch of Constantinople, having a primate and patriarch of the national Bulgarian Church at Ochrida; but in 1767 the last patriarch abdicated, and, by the joint efforts of the Turkish government and the patriarch of Constantinople, the Bulgarian Church was not only placed under the spiritual jurisdiction of the Greek patriarch, but entirely denationalized. Their bishops and priests were dismissed, their sees and parishes were occupied by Greeks, their monasteries and schools were seized, and the revenues appropriated by the Greek communities; but the greatest blow of all was struck in the elimination of the Bulgarian language and literature from all the educational establishments. A strong educational movement for re-establishing the rule of the Bulgarian language in school and Church set in about 1840. It made at once rapid and steady progress in the province of education, and at length, in 1870, led to the reorganization of a national Bulgarian Church. Notwithstanding the most desperate opposition to the Bulgarian movement by the patriarch of Constantinople and the Greek Fanar, the Porte found it necessary to yield to the Bulgarians so far as to issue a firman which constituted, under the title of *The Bulgarian Exarchate*, a separate spiritual administration, comprising in its jurisdiction the towns and districts of Rustchuk, Silistria, Shumla, Tirnova, Sophia, Vratscha, Lovtcha, Widdin, Nish, Kustenji, Samakov, Veles (with the exception of about twenty villages and three towns), the sanjak of Slivnia (except a few villages), the district of Sisopolis, the town of Philippopolis, the district of Stanimaka (with the exception of a few villages), and the metropolitan diocese of Philippopolis (except a few monasteries). The firman further provided that the powers of the exarchate be defined by an organic code, which was to be in conformity on all points with the established laws and religious principles of the Orthodox Church; but to exclude entirely, on the other hand, all interference, direct or indirect, on the part of the patriarch, with monastic affairs, and more especially with the election of the exarch and the bishops. The exarch was to be named by imperial *berat*. He was to be bound, in conformity with ecclesiastical rules, to commemorate the name of the patriarch of Constantinople, and the synod of the exarchate was to be bound to obtain the holy oils in use in the Church from the patriarchate of Constantinople. Although the patriarch of Constantinople at first excommunicated all who availed themselves of the firman and connected themselves with the Bulgarian exarchate, the latter rallied more and more all members of the Orthodox Church who were of the Bulgarian nationality. The treaty of Berlin of 1878, which provided for the establishment

of a tributary principality of Bulgaria, and an autonomous province of Eastern Roumelia, in both of which countries the Bulgarians are the predominant race, made the bulk of the Bulgarian nation virtually independent of both the sultan and the patriarch of Constantinople, and cannot fail to complete, ere long, the organization of a national Bulgarian Church, comprising all the Orthodox Christians who speak the Bulgarian language, and enjoying an independence equal to the national churches of Russia, Greece, Roumania, and Servia. The jurisdiction of the patriarch of Constantinople is thereby restricted to those Christians of the Eastern Orthodox Church who are of the Greek nationality. See RUSSO-GREEK CHURCH.

The office of the patriarch is intended to be held by the occupant for life; but the Porte may remove him on account of high-treason, and the synod may ask the Porte for his removal on account of bad administration and of heresy. Charges of the first class are very frequent; and as it is the pecuniary interest of Turkish officials to have the patriarchs removed as often as possible, they are always found willing to co-operate in such removal. Depositions of patriarchs are therefore very frequent. The patriarch is assisted by a "Holy Synod" (*Jemiat*), which consists of from ten to twelve metropolitans, besides the patriarch, its president. The patriarch has the right to select them, with the exception, however, of the metropolitans of Heraclea, Cyzicus, Nicomedia, and Chalcedon, who are members *ex officio*, and among whom, as they are so near the capital, the patriarchal seal, which consists of four parts, is divided. As the keepers of the patriarchal seal must always be present in Constantinople, the four metropolitans occupy a peculiar position, which the Porte recognises by specially enumerating them in the *berat* of the patriarch. The patriarch has no right to send them to their dioceses. He may increase the number of the members of the synod, but is not allowed to reduce it below ten. It is customary for eight of the metropolitans who are members of the synod to be present at Constantinople. They are called "the prominent" (*ἑξοίκοι*), and are addressed as the "holy old ones" (*ἁγιοὶ γέροντες*). In 1847, the Porte desired to add to the synod, for all questions not relating to the doctrine or discipline of the Church, three lay members—the grand logothete Aristarchi; the ex-prince of Samos, Vogorides; and a rich merchant of Chios, Psychari, generally called Messeyani; but the synod opposed the plan so strongly that it was abandoned by the Porte. According to a habit which is expressly recognised by the sultan, all the patriarchs and metropolitans of the Eastern Orthodox Church who happen to be present at Constantinople have a right to take part in the debates and resolutions of the Holy Synod. For questions of minor importance, especially such as relate to the administration of the Church, the decision of the patriarch and the four metropolitans who keep the patriarchal seal is deemed sufficient. The Holy Synod is the supreme tribunal for the clergy of the Greek Church, and serves as a court of appeal from the decisions of the bishops. Without its consent, the patriarch can give no decision in ecclesiastical or temporal affairs, and appoint no bishop. The synod alone has judicial and punitive power over the patriarch; and the deposition of the patriarch by the Porte, except in cases of high-treason, takes place only at the request of the Holy Synod. The most important right of the synod is the election of a new patriarch. The synod regulates and distributes the ecclesiastical taxes, and keeps the seals of all the monasteries. It has its own seal, consisting of four pieces, one of which is kept by the patriarch of Constantinople, and the other three by metropolitans elected by the synod. The sessions of the synod are generally held on Sundays and holidays, after divine service. Most of its decrees need for their execution a firman of the sultan. When a new patriarch is to be elected, the members of the

synod, and the archbishops and bishops present at the time in Constantinople, assemble at the synodicon, or patriarch's palace, which is situated in the Fanar, or Greek quarter, in order to nominate by ballot, in the presence of a commissary of the Turkish government, three candidates for the vacant see. All the candidates must be metropolitans. As soon as the nomination is made, it is communicated to the representatives of the Greek community, who are assembled in the vestibule of the synodicon. This assembly designates by acclamation, and the shout of *ἄξιος* (worthy), the candidate of its preference. The election, being thus completed, the minutes are signed by all present, and an official report is made to the Porte, which then orders the *berat* to be drawn up. This official *berat*, for which a large amount of money has to be paid, enumerates all the rights belonging to the patriarch and the synod. On the day after the election, the new patriarch officially visits the grand-vizier, who presents him with a magnificent suit of clothes, consisting of a *caftan* (a long silken robe), a cloak, a black capuchon, and a patriarchal hat; moreover, with a finely wrought patriarchal staff and a white horse. The patriarch pays also to the other ministers of the Porte an official visit. Soon after these visits follows the intronization, an act of great simplicity, which is performed by the metropolitan of Heraclea. The ecclesiastical rights of the patriarch are very extensive. He appoints, with the concurrence of the synod, all metropolitans and bishops. He has supreme jurisdiction in all affairs relating to marriage and wills. Complaints against bishops can be decided by the government only with the concurrence of the patriarch. The arrest of a Greek prelate requires the consent of the patriarch and the co-operation of his officers. He has the right, without restraint, to excommunicate any member of the church; to deny ecclesiastical burial, etc. He enjoys the privilege of consecrating the holy oil, and has in all dioceses the right of the *stauropégion*, i.e. the right, at the foundation of a church or a monastery, to erect a cross on the spot where the altar is to stand, and thereby to subject to his control such church or convent. The civil jurisdiction which the patriarch enjoys as the head of the "Greek nation" (which means, in the official language, all the members of the Eastern Church), is in some respects even more comprehensive because it extends also over the other patriarchal dioceses. This power, however, is on the wane. As has already been indicated, the non-Greek nationalities have either achieved their entire independence of Turkish rule, or, like the Bulgarians, have severed their ecclesiastical connection with the patriarch of Constantinople, whose jurisdiction, ecclesiastical as well as civil, will be restricted to the Church members of the Greek nationality. The patriarch has his own court, before which especially cases of minor importance are brought, not only between Greeks and Greeks, but also between Greeks and people of other churches, even between Greeks and Turks. An appeal can, however, be had from the patriarch's court to the Turkish courts. The revenue of the patriarch is considerable. He inherits the property of metropolitans, bishops, priests, monks, and nuns who die without legal heirs. If there are legal heirs, the persons named may bequeath to the patriarch up to one third of their property. Other sources of revenue are the fees for ordination, the tax on the installation of metropolitans and bishops, the annual contributions from the bishops and from the convents which are immediately subject to the patriarch, smaller contributions from each priest and each layman of his diocese, the fees of his chancery, fees for every marriage and burial, etc. The patriarch has the right to have all these dues collected by special commissaries, who, if necessary, can invoke the aid of the government officials. The patriarch is exempt from ordinary taxes, but has to pay a large sum annually to the government as a special tax, and to make frequent presents to the ministers. The patriarch is assisted in

the administration of the patriarchate by a number of officers. They are divided into two choirs—one at the right, and the other at the left. The former consists of three sections, each of which embraces five persons, and is therefore called a *πένταξ*. All these offices were formerly of great importance, and, with the exception of those which required an ordination or had the superintendence of convents, were in the hands of the noble Greek families, the so-called Phanariotes. The occupants had a vote at the election and deposition of the patriarch. At present, most of these offices are mere titles. The only officer who has still an important political position and considerable influence is the grand logothete (*μὲγας λογοθέτης*), or the grand keeper of the seal. He is elected by the patriarch and Holy Synod from among the Greek notables for lifetime. He is confirmed by the Porte, and can only be removed by the concurrent action of both powers. The patriarchate conducts through him all negotiations with the Porte relating to its secular privileges; and all the official communications from the patriarch to the Porte pass through his hands. He has the right to countersign all synodal resolutions relating to the appointment of metropolitans and bishops, and to receive certain fees for drawing up the official documents. See PATRIARCHS.

The three patriarchs of Alexandria, Antioch, and Jerusalem are not subject to the ecclesiastical jurisdiction of the patriarch of Constantinople, but are co-ordinate to him. The *berat* by which they are appointed confers upon them the same rights, and each of them has a synod which has the same rights as the Synod of Constantinople. They are inferior to the patriarch of Constantinople only in so far as they have no civil jurisdiction. The patriarch of Alexandria has jurisdiction over the Greek churches of Egypt, Libya, Arabia, and Nubia; the patriarch of Antioch, who resides at Damascus, over those of Syria, Cilicia, Mesopotamia, Isauria, and other Asiatic provinces; the patriarch of Jerusalem, who resides at Galata, a suburb of Constantinople, over those of Palestine. The aggregate territory of the three patriarchates is, however, but small compared with that of Constantinople. Metropolitans with suffragan bishops are rare in the Turkish empire. The name metropolitan or archbishop is generally only a title which confers a higher dignity than the title bishop, but not a greater jurisdiction. The title of metropolitan is especially given to the bishops of the provincial capitals. As bishops must be unmarried, they are generally taken from the monasteries. If a layman is to be ordained a bishop, he has first to take all orders up to priesthood, and then can receive the episcopal ordination only after the expiration of thirty days. The candidate must be thirty years of age, and at his ordination three bishops must be present. Bishops are bound to reside in their dioceses; and if a bishop is absent from his diocese for more than six months, except it be by order of the patriarch, he is deposed. The bishop has entire control of the Church property of the diocese, and can impose taxes upon his diocesan. Without his permission, no convent can be built within the diocese. The revenue of metropolitans and bishops is derived from the same sources as that of the patriarch. They receive annual contributions from the priests and the laity of the diocese, besides fees and inheritances. The income of many bishops is considerable. The metropolitans and bishops have also an influential position in the political administration of the empire, as they are, in virtue of their office, members of the administrative councils, by which the *valis* of the vilayets are assisted. In 1836, patriarch Gregory VI and the Holy Synod issued a circular in which all bishops were requested to establish in their dioceses an ecclesiastical committee, after the model of the one existing in Constantinople, for consulting on the spiritual interests of the dioceses. All the diocesan committees send reports to Constantinople, and thence receive advice. The committees consist of not less than three members, who are se-

lected from among the educated, virtuous, and zealous clergy. One member of the committee has to examine the candidates for ordination, and to instruct and guide the confessors. A second member has to superintend the printing and the sale of books, the ecclesiastical discipline, and the lives of the clergy. No book can be printed without his permission. The third member superintends education and preaching. The secular clergy are mostly uneducated and poor, and, to support themselves and their families, they often carry on some trade, cultivate a farm, and perform other manual labor. The parochial churches are maintained by the congregations, and on every Sunday and holiday collections are taken up for the purpose. The *kaja bachi*, or chief of the congregation, administers the financial affairs, and has, in particular, to take care of the support of the priests, the churches, and the schools. No one can be admitted to a male or female convent without an examination, or before being ten years of age. Besides the monks and nuns who live in convents, there are eremites on Mount Athos, and anchorites in Macedonia. See MONKS, EASTERN.

The number of metropolitans and bishops who were subject to the patriarch of Constantinople before the churches of Roumania, Servia, and Bulgaria had severed their connection with him amounted, according to Silbernagl (*Verfassung sämtlicher Kirchen des Orients* [1865]), to 131, of whom 92 belonged to Europe, 21 to Asia, and 18 to the provinces. In consequence of the decay of the Turkish empire, a very large number of the dioceses are now no longer subject to the jurisdiction of the patriarch, which, ere long, may be restricted to the dioceses in which the people are of the Greek nationality. Under the patriarch of Antioch were 12 dioceses, and to this patriarchate also belongs the archbishop of Cyprus, who is exempt, and has under his jurisdiction 5 suffragan bishops. Under the jurisdiction of the patriarch of Jerusalem are 14 archbishops and bishops, under that of Alexandria 4. The population of the patriarchate of Alexandria is reported as only 5000 souls; that of Jerusalem as 15,000; while the patriarchate of Antioch comprises 29,000 families. The total population connected with the Greek or Orthodox Eastern Church of Turkey, after the great territorial changes made in 1878, was estimated at 3,800,000 (see *Appletons' Annual Cyclopadia*, 1878, art. "Greek Church"); but of this number a considerable part belongs to the Bulgarian dioceses of Eastern Roumelia, which have no longer any ecclesiastical communion with the patriarch of Constantinople. Of the convents of the Church, which are still numerous, the most celebrated are those on Mount Athos (q. v.). Of late, education has begun to make great progress among the population connected with the Greek Church. Two theological seminaries have been established, the one on the island of Chalki, near Constantinople, and the other at Jerusalem; and no one is henceforth to be appointed as bishop who has not been educated at one of these institutions, or is not fully up to the standard of the education there imparted. A flourishing teachers' seminary, according to the German model, has been established at Salonica, in Macedonia. See EASTERN CHURCH.

2. *The Armenian Church.*—For more than three hundred years nearly two thirds of ancient Armenia has been under the rule of Turkey [see ARMENIA]; and, therefore, although the head of the Church (the catholicos of Echmiadzin) is now a subject of Russia (q. v.), the large majority of the adherents of the Armenian Church are still to be found in Turkey. Among the Armenian bishops of Turkey, the patriarch of Constantinople occupies the highest rank; he is inferior only to the catholicos of Echmiadzin. An Armenian diocese was established at Constantinople as early as 1307. Archbishop Joachim, of Bursa, was raised to the rank of patriarch of Constantinople in 1461 by the sultan Mohammed II, and he was at the same time appointed the civil head of the Armenian nation. The

patriarch is elected by the notables and the prominent clergymen of the Armenian community of Constantinople, and is confirmed by the Porte. Formerly the Armenian bankers had the ascendancy in this assembly; but in 1839 several Armenian employes of the Turkish government obtained the leading influence. The patriarch is entirely dependent upon these laymen, who appoint a coadjutor, or have him removed by the Turkish government, whenever they please. The new patriarch has to make a profession of faith, which consists of nine articles, the eighth of which designates the patriarch as the vicar of Christ. The *berat* which the patriarch receives from the Porte confers upon him a direct power over the priests and laity of his diocese. Like the catholikos, he has the right to ordain bishops and to consecrate the holy oil. With the exception of the patriarch of Jerusalem, he can appoint metropolitans and bishops throughout Turkish Armenia; remove, exile, and recall them; divide or unite their dioceses. The entire property of the Church is under his control; in the administration of it he is, however, limited by the lay synod, which consists of twenty members elected by the people and confirmed by the Porte. Moreover, he is assisted in the exercise of his ecclesiastical functions by a clerical synod consisting of his officials. As he has also civil jurisdiction, he has, like the Greek patriarch, his own court and a patriarchal prison. He is the civil head not only of the Armenian nation, but also of the Syrian Jacobites. All communications between the Turkish government and the Armenians pass through his hands; and even the Armenian patriarch of Sis and the bishops not directly subject to his jurisdiction receive their *berat* through him. Like the Greek patriarch, he enjoys a number of honorary rights and exemption from taxation, but, in return, has to pay an annual tribute to the Porte. His revenue consists chiefly of taxes of installation and annual contributions from bishops; fees for ordination, for the holy oil, for marriages; inheritances and donations. Besides the patriarch of Constantinople, the Armenian Church of Turkey has patriarchs at Sis, in the vilayet of Adana, at Jerusalem, and at Aghtamar, on the island of Van.

The first patriarch of Sis was elected in 1440, when the clergy of Sis, after the death of the catholikos Joseph III, feared lest the residence of the patriarch, which had been at Sis since 1294, might be removed to Echmiadzin. Without waiting for a general assembly of the Armenian bishops, the clergy of Sis hurriedly proceeded, conjointly with the people of Sis, to the election of a catholikos. The bishops and *vartabeds* met, however, in 1441, at Echmiadzin, and elected as catholikos the monk Kyriakos, who was almost generally recognised by the Armenian churches. In order to prevent a permanent schism, the privilege was conferred upon Sis to be governed by a patriarch, on condition, however, that he receive the holy oil from the catholikos as a sign of his submission. The condition was accepted, and from that time Sis has had its own patriarchs. According to a concordat concluded between the catholikos of Echmiadzin and the patriarch of Sis, the jurisdiction of the latter was to extend over the Armenian churches of Cilicia, Syria, Egypt, and Palestine; but, as the bishop of Jerusalem made himself independent in the middle of the 17th century, his jurisdiction has since been limited to the Armenian churches of Armenia Minor, Cappadocia, and Cilicia. The patriarch of Sis has the title "Patriarch and Primate of Armenia Minor and the Armenians who are in Cilicia, Syria, and Palestine, Minister of the Right and of the Throne of St. Gregory the Illuminator."

The patriarchate of Jerusalem has been in existence since the middle of the 17th century, when the catholikos Philippos conferred upon the archbishop of Jerusalem the right of consecrating, himself, the holy oil; and the archbishop consequently assumed the title of patriarch, and began to ordain bishops. The patriarch of Jerusalem, however, ceased long ago to exercise

these functions; and his powers have been greatly curtailed, as the patriarch of Constantinople calls him to account when he pleases. In order to guard as much as possible his own independence, the patriarch procures from the Turkish government his own *berat*, and supports in Constantinople an agent of his own. He has to pay an annual tribute, not only to the Porte, but to the pasha of Damascus. He is elected by his suffragan bishops, and has his residence in the monastery of St. James at Jerusalem. His income is derived from the same sources as that of the patriarch of Constantinople, the presents from the pilgrims to Jerusalem constituting an element of special importance.

In 1114 bishop David of Tornik made himself patriarch of Aghtamar, in Lake Van, and assumed the title catholikos. The schism has continued to the present day; but the patriarchate is of little importance, since its jurisdiction extends hardly any farther than Lake Van. The patriarch is elected by the bishops and clergy under his jurisdiction, and is supported by the revenue of the monastery on the island of Aghtamar.

The metropolitans, or archbishops, are not distinguished from the bishops by any greater jurisdiction, but only by some honorary rights. The catholikos can only be elected out of their number. The bishops are regularly elected from the unmarried *vartabeds*, and only occasionally, and by special permission of the catholikos or the patriarchs, from the monks, since, according to the Church law, a monk is not to become a bishop. The bishop is generally elected by the clergy and the heads of families, and after the election he is presented for confirmation to the catholikos or the patriarchs, who appoint several (generally three) bishops for examining the candidate. It is required that he be fifty years of age, of legitimate descent for three generations, on both father's and mother's side, and well versed in the Holy Scriptures and the canonical law. Many of the metropolitans and bishops have no dioceses, but live in convents, and there hold the office of archimandrite. Many of them are at the same time *vartabeds*. The patriarch of Constantinople, according to the regulations made by the provincial council on Nov. 20, 1830, has under his jurisdiction 18 archbishops, or metropolitans, and 35 bishops. The patriarchate of Sis embraces three towns and forty villages. Towards the close of the 16th century the patriarch of Sis still had 23 archbishops and bishops under his jurisdiction. The diocese of the patriarch of Jerusalem embraces the churches of Palestine, Syria, Akra, and Tripolis. His residence, in the monastery of Mar Yakub on Mount Zion, was built in the 11th century, belonged to the Armenians as early as 1238, and has been in their undisputed possession since 1666. Besides the patriarch, 5 bishops and more than 100 priests live in the monastery. The total number of suffragan bishops is reported to be 14. The diocese of the patriarch of Aghtamar comprises two towns and thirty villages. In the second half of the 17th century he had under his jurisdiction from 8 to 9 bishops residing in the monasteries on the shore of Lake Van. The population connected with the Armenian Church is estimated at about 2,400,000, of whom about 400,000 are in the European dominions of Turkey. See ARMENIAN CHURCH.

3. *Other Oriental Churches.*—Besides the Greeks and Armenians, Turkey has two other Oriental churches—the so-called *Nestorians* and *Jacobites*. Both have been fully treated in former volumes of this *Cyclopædia*. See JACOBITES; NESTORIANS.

4. *The Roman Catholic Church in Turkey.*—There are only a few tribes and congregations in the present dominions of the Turkish empire which have always been in connection with the Church of Rome. They are chiefly to be found in Albania. The foundation of other congregations dates from the time of the crusades, which established the Latin Church on a permanent basis in Syria, Palestine, and Cyprus. The rule of the Venetians in the Mediterranean Sea, and the commer-

cial intercourse between the Balkan peninsula and the Catholic nations of Western Europe increased the number of Latin congregations in all the large cities of the empire. Finally, the unceasing efforts of the numerous missionaries which the Church of Rome has supported in all parts of the empire have won over fractions of all the various Oriental Christian denominations in which the empire abounds. These fractions have been allowed by the pope to retain a number of national and ecclesiastical peculiarities; and, while they have adopted the doctrines of the Roman Catholic Church, recognise the pope as the head of the Church Universal, and must be recognised themselves, in the fullest sense of the word, as part of the Roman Catholic Church, they appear, especially in consequence of the retention at divine service of a rite different from the Latin, as a kind of semi-independent division of the Church. A correct view of the actual strength of the Roman Catholic Church in the Turkish empire is best obtained by reviewing the several rites separately.

The Latin *millet* embraces the Roman Catholics of all rites, except the United Armenians, who have their own civil head. The head of the Latin *millet* is a layman, who has the title *Yekil* (representative). He is assisted by four deputies of the Latin population, with whom he constitutes a permanent council called the Latin Chancery. The functions of this council are similar to those of the Greek patriarch.

(1.) *The Latin Rite.*—A Latin patriarchate was established at Constantinople in 1203, in consequence of the crusades. The occupant received a rank next to the pope. When Constantinople, in 1453, became the residence of the sultan, the Latin patriarchs transferred the seat of the patriarchate to Venice, and sent to Constantinople as their representative a vicar, who for a long time was only a monk. When the Catholics, in consequence of their increasing number, applied for a bishop, the Propaganda prevailed upon the patriarch to appoint an assistant bishop for Constantinople, and to pay him a regular salary. This bishop sometimes called himself patriarchal vicar, sometimes suffragan of the patriarch. After some time, the Propaganda found it necessary to appoint, in its turn, an apostolical patriarchal vicar. When, after the middle of the 17th century, the patriarch took up his residence at Rome, and the patriarchate of Constantinople became a mere title *in partibus infidelium*, which was conferred upon a prelate residing in Rome, the apostolical vicar was invested with full jurisdiction over all Catholics of the Latin rite. The population of his diocese, which extends over Thrace and the opposite coast of Asia Minor, is estimated at about 15,000. The larger portions of the vicariate apostolic (formerly archbishopric) of Sophia, which had before the late war a Latin population of about 8000, and of the diocese of Nicopolis, which had a population of about 3000, are no longer under Turkish rule. Both the towns of Sophia and Nicopolis lie within the new principality of Bulgaria. A considerable portion of the archbishopric of Scopia, or Uskub, in Macedonia (now the western part of Roumelia) has been annexed to Servia. The whole diocese numbered before the war about 8000 Catholics of the Latin rite. Before the enlargement of the principality in 1878, the entire Roman Catholic population, numbering about 4000 persons, was included in the diocese of Belgrade and Semendria [see SERVIA], which belonged as a suffragan see to the ecclesiastical province of Antivari. The two vicariates apostolic of Moldavia and Wallachia, numbering in 1878 an aggregate Roman Catholic population of 114,000, now belong to the independent state of Roumania. The two vicariates of Bosnia and Herzegovina, which embrace the entire Roman Catholic population in the two provinces after which they have been called, were in 1878, by the treaty of Berlin, placed under Austrian administration. The Catholic population in these vicariates is numerous, especially in the northern and north-western districts of Bosnia, which before the conquest of the coun-

try by the Turks belonged to Hungary. The bishop of Bosnia fled, in consequence of the Turkish conquest, to Hungary, and established his residence at Deacovar. The occupant of this see still has the title bishop of Bosnia and Sirmium; but, as the Turks did not allow the jurisdiction of a foreign prelate, a vicar apostolic was appointed for the Catholics of the Turkish provinces. The Catholic population is estimated at about 140,000, that of Herzegovina at 42,000. In the European provinces remaining under Turkish rule the Roman Catholic Church has its greatest stronghold in Albania. There are two ecclesiastical provinces in Albania, Antivari-Scutari and Durazzo. The latter has no longer any suffragan see, and consists only of the archdiocese of Durazzo. The archdiocese of Antivari and the diocese of Scutari were united in 1867, at which time they had an aggregate Roman Catholic population of about 33,000. The suffragan sees of Antivari and Durazzo are Sappa, Pulati, and Alessio, all in Albania, with an aggregate population of about 42,000. The diocese of Belgrade, in Servia, which has already been referred to, also belongs to this ecclesiastical province. The island of Scio, which belongs to Asiatic Turkey, has still an episcopal see, although the number of Roman Catholics is less than one thousand. It is a suffragan see of the archdiocese of Naxos, which belongs to the kingdom of Greece. In the Middle Ages, while this island was under the rule of the Venetians, it was very flourishing, and the Roman Catholic population was numerous; but during the Greek war of independence nearly the entire Christian population was exterminated or sold into slavery. The population of Cyprus, which in 1878 was placed under English administration, has rapidly increased during the last twenty years, and the Roman Catholic Church there numbers about 10,000 Catholics of the Latin and Greek rites, and 3000 Maronites. The flourishing city of Smyrna, in Asia Minor, has an archdiocese with about 15,000, nearly all of whom live in the capital. The archbishopric in this city was restored in 1818, and has now as a suffragan see the diocese of Candia, which, after being long conferred as a title *in partibus infidelium*, was restored in 1874. Besides these dioceses, the Church of Rome has an archbishop of Babylon, who resides at Bagdad. For the Roman Catholics of Jerusalem, who were formerly under the jurisdiction of Franciscan monks, an archbishopric was established in 1847, the occupant of which received the title of patriarch. The number of Roman Catholics in Palestine is estimated at about 15,000. Two "apostolic delegations" have been established, one called "Asiatic Turkey," and embracing Mesopotamia, Kurdistan, and Armenia Minor, and the other Syria; and two apostolical vicariates, Aleppo and Asia Minor. The number of Roman Catholics in all these dioceses and ecclesiastical districts is small, but the bishops and the comparatively numerous orders display a considerable activity among the Christians of the Oriental rites. Several Catholic congregations have been collected in the commercial towns of the Arabian coast. They are administered by the apostolical vicar of Aden. The number of Catholics in the African dependencies of Turkey is small, but is increasing by immigration from Catholic countries of Europe, especially France and Italy. The French population residing in Egypt in 1877 amounted to 17,000, the Italian to 13,900, the Austrian to 6300; the large majority of all these are Catholics. The patriarchate of Alexandria, like that of Antioch in Asia, is now a mere title conferred upon an Italian prelate who resides in Rome. For the 25,000 Catholics of Tunis there is a vicar apostolic, and for the 5000 of Tripoli a prefect apostolic.

(2.) *The Armenian Rite.*—The Church of Rome began to gain a firm footing among the Armenians at the time of the crusades. See ARMENIAN CHURCH. Although the bulk of the nation always continued averse to a union with Rome, considerable numbers accepted the union, and, retaining the rites of the national Church,

were organized into a United Armenian Church. The Mechitarists (q. v.) have gained for this ecclesiastical community a greater literary distinction than can be claimed by any other Oriental communion. In regard to their political rights, the United Armenians were subject to the jurisdiction of the patriarch of the National Armenian Church until pope Pius VIII, in 1830, succeeded, with the aid of France and Austria, in making them independent. He erected at Constantinople the see of an archbishop-primate for the Catholic Armenians, who was to be immediately subject to the holy see. At the appointment of the first primate the pope appears to have taken into consideration the national wishes, and to have conceded to them the right to propose three candidates for the vacant see, from whom the pope chose one. In 1845 the pope appointed Anthony Hassun as successor of the primate, without consulting the nation. By a brief of April 30, 1850, pope Pius IX erected the towns of Aneyra, Artvin, Brousa, Erzrüm, Ispahan, and Trebizond into episcopal sees of the United Armenians, and made them suffragans of the Armenian archbishop of Constantinople. The same brief appointed the bishops of these sees without consulting the nation. The United Armenian nation gave its consent to the establishment of the sees, but refused to recognise the bishops, because they had not previously been consulted. After some time, they yielded this point also, in order to prevent a schism; and the Turkish government, through the mediation of France, gave to the new bishops the necessary *berat*. When the pope established the see of an archbishop-primate at Constantinople, it was intended to confer upon him also the secular jurisdiction over the Catholic Armenians; but the Porte did not recognise the primate, and clothed, by a *berat* of 1831, a priest of the Order of Mechitarists with the *prefectura nationalis*. At the request of the French ambassador, after some time, a patriarch was appointed, but without any ecclesiastical functions, and having only those secular rights which are connected with the offices of the Greek and the Gregorian-Armenian patriarchs. The patriarch was to be elected by the United Armenian community, and to be confirmed by the Porte. He was to be assisted by a council of administration consisting of twelve members, who were likewise to be elected by the nation and to be confirmed by the Porte. The *berat* given to the patriarch extended his jurisdiction over all the United Eastern churches; but, in consequence of the religious controversies and inner dissensions which arose, the patriarch lost the right to represent the other Catholic nationalities at the Porte, and this right passed over to the *velkî* of the Latins. In 1866 Hassun, the archbishop-primate of Constantinople, was elected also patriarch of Cilicia, and assumed as such the name Anthony Peter IX. Thus for the first time the highest ecclesiastical dignity of the United Armenians, the patriarchate of Cilicia, was united in one person with the civil headship of the United Armenian nation which was attached to the office of the primate of Constantinople. Simultaneously with confirming the new patriarch, pope Pius IX, in July, 1867, issued the bull *Reversurus*, which abolished the rights that hitherto the United Armenians had enjoyed with regard to the election of their patriarch and their bishops, and reserved for the pope rights hitherto not exercised by him. The opposition which at once manifested itself against this bull led in 1870 to an open schism. The opponents secured the assistance of the Turkish government; Hassun was exiled from Constantinople and from Turkey, and Kupelian chosen in his stead patriarch of the United Armenians. Besides, a number of bishops sympathizing with Kupelian were appointed for United Armenian dioceses. Notwithstanding repeated excommunications by Rome, the party headed by Kupelian remained in opposition to the pope, and assumed a position similar to that of the Old Catholics in Western Europe. The Kupelians continued for many years to enjoy the patronage and active support of the

Turkish government, but never succeeded in bringing over to their side the majority of the United Armenian laity. In 1876 a general amnesty, granted by the new sultan, Murad, on his accession to the throne, permitted Hassun to return to Constantinople. The schism continued, however, until 1879, when the efforts made by the papal delegates and the ambassador of France secured the submission of Kupelian and the other bishops of the opposition, and the entire end of the schism.

(3.) *Other United Oriental Rites.*—The Roman Catholic Church has also gained over the entire tribe of the Maronites, as well as portions of the Nestorians and the Jacobites in Asia, and of the Copts in Egypt. The United Nestorians are generally called Chaldeans, while the United Jacobites are designated United Syrians. These United Orientals have already been referred to in the articles MARONITES; CHALDEANS; COPTS; JACOBITES. The aggregate number of these religious denominations is not large. The number of Chaldeans (inclusive of the congregations in Persia) is estimated at from 20,000 to 30,000, that of the Syrians at from 9000 to 30,000, that of the Copts at 10,000. From 1870 to 1879 almost the entire community of the Chaldeans, including their patriarch, Andu, and all their bishops, was in a state of open rebellion against Rome. The patriarch desired to extend his jurisdiction over the Christians of St. Thomas in British India, who, like the Chaldeans, are United Nestorians, and number about 100,000. Rome objected to this, desiring the Christians of St. Thomas to remain as heretofore under the jurisdiction of the vicar apostolic of Verapoli, who is of the Latin rite. The Chaldeans, moreover, protested against a Roman bull, issued in 1869, which forbade the patriarch to ordain bishops without the previous approbation of the pope. The Chaldeans had possessed and exercised this right from the time when they joined the communion of Rome, and they denied the right of the pope to abolish it without their consent. The patriarch and the bishops long resisted all the efforts made by Rome. One of their bishops visited India and prevailed upon a large portion of the Christians of St. Thomas to place themselves under his jurisdiction, and withdraw from that of the Latin vicar apostolic of Verapoli. At length, however, they relented in their resistance; and, after the death of patriarch Andu, the pope succeeded, in 1879, in securing the submission of the Chaldeans, and in the election of a new patriarch who declared himself willing to concede all the demands made by Rome. See THOMAS (ST.), CHRISTIANS OF.

(4.) *Protestantism.*—The most important Protestant churches in the Turkish empire are under the care of American missionary societies. The Rev. Pliny Fisk and the Rev. Levi Parsons were appointed by the American Board in 1818 missionaries to Palestine, and arrived at Smyrna in 1820. In the next year Mr. Parsons went to Jerusalem. A printing-press, designed to print books for Turkey, was set up at Malta by the Rev. Daniel Temple in 1823, and was removed in 1833 to Smyrna. The Rev. Messrs. William Goodell and Isaac Bird were stationed at Beirut, where they began the Syrian mission in 1823, and opened schools the next year. In the same year the circulation of the Scriptures was forbidden by the government. The station at Jerusalem was suspended for nine years after the death of Mr. Fisk, in 1825, and the mission in Syria was suspended for a short time in 1828. It was soon resumed; the Rev. William Goodell was appointed to Constantinople, and a deputation was sent to visit the Armenian populations of the empire. Mr. Goodell visited the Armenian patriarch and ecclesiastics at Constantinople in 1831, and was at first welcomed by them. Schools were opened near Constantinople, and in 1834 stations were established at Trebizond and Brousa. The Greek and Armenian ecclesiastics became jealous of the progress of the missions, and a strong opposition was instigated against them; but in 1839 the new sultan made the first of a series of concessions of religious liberty. In 1841 the

Rev. Cyrus Hamlin opened a school at Bebek, near Constantinople, which was the beginning of what is now Robert College.

Churches were formally organized at Constantinople, Adabazar, and Trebizond in 1846. In the next year the Protestants were recognised by the government as an independent community, and in 1850 they were accorded a charter, placing them on the same basis as the other Christian communities of the empire. In 1856 the sultan granted, and in 1860 formally proclaimed, the *hatti-humayum* by which religious liberty and equal rights were conferred upon all classes. The missions in Syria were transferred to the Board of Foreign Missions of the Presbyterian Church in the United States of America in 1870. The churches of the American Board are distributed through a territory extending from Mosul, on the Tigris, to Monastir, in Macedonia. They are arranged into four missions, which are known as the Eastern Turkey (Armenia), Central Turkey (embracing the country south of the Black Sea), Western Turkey (Asia Minor), and European Turkey (Constantinople, Eastern Roumelia, Bulgaria, and Macedonia) missions, and include 90 churches with 7300 members. The Presbyterian Church has 12 churches in Syria, with 716 communicants. The Synod of the Reformed Presbyterian Church of North America has a mission at Latakia, with 94 members; the Free Church of Scotland has two missionaries, with 26 members; an independent Baptist missionary reports 11 members, and the Friends have 14 members, all in Syria. The Rev. Samuel Gobat, an agent of the Church Missionary Society, went to Palestine in 1841, and was afterwards appointed bishop of Jerusalem. He founded schools, which passed in 1877 under the control of the Church Missionary Society. This society returns 12 native Protestant congregations in Palestine, having 1108 members. Other societies engaged in Palestine are the London Jewish Mission, the Jewish Mission of Berlin, the Crischna Mission, and the Kaiserswerth Deaconesses' Association.

The Methodist Episcopal Church has a mission in Bulgaria, begun in 1857, which included, in 1878, 5 stations, 38 members, and 13 probationers. The Disciples of Christ appointed a missionary to Constantinople in 1878. The mission of the United Presbyterian Church of North America in Egypt, after twenty-five years of development, has 9 churches and 947 communicants. The Protestant churches have in all in the empire about 385 preaching-places, more than 100 ordained missionaries with as many churches, and about 10,000 communicants. Besides these, the Jewish mission societies of London, the Established and Free Churches of Scotland, and the Irish Presbyterian Church have stations and schools at Alexandria, Smyrna, Beirut, Constantinople, Salonica, Adrianople, and Rustchuk.

The Protestant religious work is supplemented by efficient schools of every grade. The American Board has 300 common-schools, 16 boarding-schools for girls, and 12 seminaries and training-schools, with a total attendance of more than 11,000 pupils; the Presbyterian Mission in Syria has 84 common-schools, 3 high-schools, and 2 female seminaries, with a total of 4097 pupils, a college, and a theological seminary; the Reformed Presbyterian Mission has 476 day-school scholars; the Society of the British Syrian Schools and Bible Mission, 30 schools and 3000 scholars; and in Syria proper, not including Palestine or Asia Minor, there are 11,000 children in evangelical schools, of whom about one half are girls. In Palestine, there are under the control of the Church missionary and other societies some 36 or 37 Protestant schools, which are attended by Mohammedan, Jewish, Druse, and Samaritan pupils. The United Presbyterians in Egypt have 39 schools, with 1893 pupils, and 6 theological students in the training-schools. The English Church schools at Cairo and Damietta have 590 pupils. Of the Jewish mission schools, those of the Church of Scotland return 1702 Jewish and other

than British pupils. At the Syrian Protestant College of the Presbyterian Mission at Beirut instruction is given in the English language, while the Arabic is taught as a classic. The college has a faculty of 8 professors, 120 students, and a medical department which had 23 students in 1877, and which has sent out several graduates, who are practicing as physicians in different parts of the empire. Robert College, near Constantinople, is not immediately connected with any Church organization, but is under Protestant direction, with a board of trustees composed of citizens of the United States. It has a faculty of 15 instructors, including American, European, Armenian, Bulgarian, Greek, and Turkish professors, and registered, in 1878-79, 151 students, among whom fifteen nationalities and all the religions prevailing in the empire were represented. Instruction is given in the usual collegiate studies, and in fifteen ancient and modern languages. The college has a library of 6000 volumes. Central Turkey College, at Aintab, is also an independent Protestant institution, in which instruction is given in the branches of science and literature, the English, Turkish, and Armenian languages.

The American Board has a press at Constantinople, and the Presbyterians have one at Beirut, at both of which religious, educational, and scientific books are published in the languages of the people. The Arabic Bible published at Beirut is circulated in all Mohammedan countries. Other editions of the Bible are published in all the languages spoken in the empire. The whole number of copies of books, tracts, etc., printed at the press of the American Board from the beginning of its operations to 1879 is 2,248,354, comprising a total of 325,503,988 pages, in the Armenian, Armeno-Turkish, Greco-Turkish, and Bulgarian languages; and the whole number of pages printed on the Presbyterian press from the beginning to 1879 is 183,705,027.

The organization of Protestant churches has been generally confined to other than Mussulman populations—chiefly to Greeks, Bulgarians, and Armenians. It was until recently a capital offence, by the Turkish law, for a Moslem to become a Christian. More attention is now given to the evangelization of the Turkish population; but the number of Protestant Turks is still very insignificant. The Protestants have acquired a good reputation in the communities among whom they live, and have gained their esteem and confidence to a degree that is rarely accorded to persons professing a strange religion. See SYRIA, MISSIONS IX.

VI. *Other Religious Denominations.*—The most important of the other religious denominations of the Turkish empire are the Jews. Their old native land, Palestine, is now a part of Turkey in Asia, but the overwhelming majority of its population consists at present of Mohammedans, the total number of Jews in all Asiatic Turkey being estimated at only 50,000. It is believed that their first appearance in European Turkey may have been connected with the conquests of Alexander the Great, who planted many colonies of Jews about his empire. Philo mentions Jews in Thessaly, Boeotia, Macedonia, etc. Luke speaks of them at Thessalonica and Berea. The Jews have probably been settled in Macedonia from the first emigration to the present time. In consequence of their expulsion from Spain, a large number of Spanish Jews settled in Thessalonica. Paul Lucas says that in his day there were 30,000 in that city, with twenty-two synagogues. The descendants of these Spanish Jews spread throughout the empire; they continue to speak among themselves the Spanish language, but their written correspondence is carried on in Hebrew. The great mass of the Jews in Turkey are Talmudists, but there exists a small section of *Karaites* (q. v.). The latter have about a hundred families at Has-Keui, near Constantinople; there are also many in Galicia and the Crimea; but the great bulk of the Jews of this persuasion are, outside of the Turkish empire, in Galicia and the Crimea. "There is

also a curious sect of Jews at Salonica called *Mamim*, which signifies 'turncoat.' They believe in the fourteenth false Messiah, Sabati Levi, who, to save his life, became with his followers Mohammedans; but these, again, have their religious differences, and are divided into three sects. They are still Jews at heart, but their tridling with two creeds makes them despised and looked down upon. They marry among themselves only, and live together in a particular quarter of the town. There are others of the same sect in parts of Russia. At Salonica they are Mohammedans in public and Jews in private life. The Jews have no hierarchy, but each congregation is independent, and is governed by its own chief rabbi; but they have a representative head at Constantinople, called the *khakham-bashi*, who is chief of the Israelitish nation in the empire. The *khakham-bashi* at Constantinople has a court or council to assist him in administering both ecclesiastical and civil law. It is divided into two parts—first, the *Mejliss-i-rouhani*, or spiritual council, composed of six grand rabbins, which, as its name implies, deals with questions relating to the Jewish religion; and, second, the *Mejliss-i-i-jesnâni*, or civil council, which deals with questions of civil law, and assists the Turkish courts in any questions relating to Jews. The same organization applies to each grand rabbi, who, in his turn, is assisted by two similar councils. As the Jewish law, like that of the Mohammedan, is explained by the teaching of the sacred books, the establishment of these councils forms a ready means of arriving at a judgment on all religious and civil cases arising in the Jewish community. The *khakham-bashi* takes rank immediately after the Greek and Armenian patriarchs. The Jewish population of the Turkish empire is estimated at 158,000. The poorer are entirely dependent upon the liberality of the upper classes for education and relief in case of want, and the obligation is met in a most commendable spirit. They possess an institution called the 'Universal Israelitish Alliance,' which is charged with the administration of education, etc. In 1875 the alliance had twenty-one schools throughout the empire, which gave instruction to 2094 children of both sexes, and of this number 809 were admitted gratuitously. The teachers of these schools are educated in the Rabbinical Seminary at Paris, and they give their pupils instruction in foreign languages and all the elements of a first-class education. The elementary schools, or *talmudtora*, are crowded with children of both sexes, who are simply taught to read and write" (Baker). The estimates of the Jewish population in the Turkish empire vary greatly. It has already been mentioned that Baker, in his work on Turkey, gives the total number as 158,000, and that in the Asiatic possessions they are supposed not to exceed 50,000. The Servian statistician Jakshitch estimates the Jews in the immediate European possessions at only 55,000, distributed as follows among the several vilayets: Constantinople, 22,943; Adrianople, 13,492; Salonica, 7409; Monastir, 2566; Kossovo, 1323; Yanina, 4085; Crete, 3200—total, 55,018. The same statistician gives the number of Jews in Roumelia at 3969, in Bosnia at 6968, in Bulgaria at 8959—total in Turkish empire in Europe, 74,914. In the African dependencies, the Jews are chiefly represented in Tunis, where they are supposed to number 45,000 souls. See Jews.

There are a number of sects peculiar to Turkey. The most prominent among them are the *Anasarians* (q. v.) and the *Druses* (q. v.). The number of gypsies is estimated at about 200,000.

VII. *Literature*.—For information on the religious denominations of Turkey, see Baker, *Turkey* (Lond. and N. Y. 1878); Audouard, *L'Orient et ses Peuplades* (Paris, 1867); Zur Helle von Samo [a Mohammedan dervish, previously an Austrian diplomatist], *Die Völker des osmanischen Reiches* (Vienna, 1877); Ubicini, *Études Historiques sur les Populations Chrétiennes de la Turquie d'Europe* (Paris, 1867). (A. J. S.)

Postscript.—Since the above was in type, the political situation of Turkey has undergone no material change. The Turks, as well as the natives, made so much opposition to carrying out the provisions of the treaty of Berlin that a naval demonstration by the great European powers in the Archipelago became necessary in order to compel the surrender to Montenegro of Duleigno, a seaport of Albania, on the Adriatic. Meanwhile both Greece and Turkey continued their warlike attitude and preparations, both parties declining the mediation of the other powers; but as none of these seemed disposed to aid either of the contestants, the latest advices (April, 1881) are that a compromise of the boundary question will be peaceably effected (by the absolute cession to Greece of a part only of the disputed territory in Albania and Thessaly, as suggested by Turkey and recommended by the other governments), and that thus a new lease of life, for a short time, will be granted to the Turkish rule in Europe.

TURKEY, VERSIONS OF. There exist a great many translations of the Scriptures which are used throughout the Turkish empire, but do not properly belong to Turkey alone, as the following list of versions, furnished to us by the Rev. Dr. A. W. Thomson, agent of the British and Foreign Bible Society at Constantinople, will show:

Albanian, Gheg.	Judeo-Polish.
Albanian, Tosk.	Judeo-Spanish.
Arabic.	Kurdish.
Armenian, Ararat.	Kurdish, Armeno-Maltese.
Armenian, Modern.	Roumanian.
Azerbaijan.	Russ, Modern.
Bulgarian, General.	Servian.
Bulgarian, Eastern.	Syriac, Modern.
Bulgarian, Western.	Turkish.
Croatian.	Turkish, Armeno-
Greek, Modern.	Turkish, Græco-
Hebrew.	
Judeo-German.	

These versions have already been treated, more or less fully, in separate articles, or will be found in their proper order in the *Supplement*. Some of the most important translations—such as the Arabic, Turkish, Bulgarian, and Armenian—have been prepared entirely by American missionaries; and it is very interesting to know how their work is appreciated and regarded by scholars of other countries. The *British Quarterly Review*, in its January number, 1878, after speaking of the work done by Americans in the Turkish empire in respect to explorations, literature, and education, medical practice, and the improved condition of woman, thus goes on concerning the Bible translations:

"The most important contribution, however, which the Americans have made to the literature of Turkey is found in the accurate translations which they have made of the Christian Scriptures. These translations are worthy of special notice, because, apart from the religious influence of the Scriptures, they are making a marked impression upon the intellectual life of the various nationalities of Turkey. Fifty years ago there was no version of the Scriptures in any one of the modern languages of that country. The task of making these translations was not an ordinary one. Regard must be had, on the one hand, to the uneducated classes—the style must be such that the common people would readily understand the meaning; on the other hand, regard must be had to the educated classes—the style must be sufficiently elegant and idiomatic to commend itself to the taste of those who are proud of the literary excellences of their ancient tongues. The Americans may fairly claim that they have succeeded in this difficult task, in respect, at least, to four of the important languages of the country. We refer to the modern Armenian, the Arabic, the Turkish, and the Bulgarian. The Turkish versions have varied somewhat, according as they have been prepared for the Armenians, the Greeks, or the Osmanli Turks. The preparation of the entire Bible in the Armeno-Turkish language (the Turkish language written with the Armenian character) was the life-work of the late William Goodell, D.D. The Rev. Dr. Schauffer has given many years to the preparation of a version of the Scriptures in the Arabo-Turkish, or Turkish written with the Arabic character; while at the present time a permanent committee, of which the Rev. Dr. Riggs is chairman, is engaged in an attempt to recast all the Turkish versions of the Bible, and form one that may be printed in any character. We understand that there is one English representative on this commit-

tee. The translation of the Scriptures into Arabic is the result of the labors of two accomplished American scholars—Rev. Eli Smith, D.D., and Rev. C. V. A. Van Dyck, D.D. We are assured by many who are capable of judging that this Arabic version of the Scriptures is worthy of the highest praise, and reflects great credit upon the scholarship of the translators. The same is said of the translations of the Bible that have been made into modern Armenian and Bulgarian by the Rev. Elias Riggs, D.D. We cannot forbear quoting an extract from a letter from Dr. Riggs in regard to the time spent on this branch of his work: 'You ask,' he says, 'in regard to the time devoted to the Armenian and Bulgarian translations of the Bible. In both cases the translations were first issued in parts in small editions, intended partly to supply the existing demand and partly to secure criticisms and to leave room for corrections arising from comparison of the different parts of the Bible. In both cases the whole Bible was finally printed in a single imperial octavo volume, with references. To the Armenian Bible (including the two editions) I gave most of my time for seven years, and the Bulgarian more than half my time for eleven years. How long our committee will take to complete the Turkish version it is quite impossible to say. We spent a year on the four gospels.' When we remember that these translations are all made from the original Hebrew and Greek; and when we remember, also, that the translations, when put in their permanent form, have been commended by the best Arabic, Turkish, Bulgarian, and Armenian scholars of Turkey; and when we recall, also, the great obstacles the Americans must have met in carrying these translations through the press at Constantinople and Beirut, we cannot refrain from expressing our appreciation, not only of their high scholarship, but of their persevering diligence and steadfastness of purpose; and we are convinced that generations of men yet to come will join in this hearty commendation."

This speaks well of the work performed by these American scholars. For reasons stated above, we have confined ourselves in this article to the *Turkish* version properly so called, and to its transcription into the Armenian and Greek characters.

I. Turkish.—The Turkish language, in its numerous dialectic varieties, is more or less diffused through the vast regions which extend from the Mediterranean to the frontiers of China, and from the shores of the Frozen Ocean to Hindustan. The nations to which this language is vernacular have acted an important part in history; and though their power has now declined, and the Crescent has fallen like a star from heaven, yet a member of this race still occupies the throne of Constantine. The peculiar dialect of this language to which the name of Turkish is generally, by way of pre-eminence, applied is spoken in European Turkey by the Ottoman or Osmanli Turks, and is the only language which can be employed as a general medium of communication with all the various kindreds of people inhabiting European and Asiatic Turkey. The most ancient Turkish alphabet is the Ouigour, from which the Mongolian is derived; but the modern Turks use the Arabic and Persian characters. Their present alphabet consists of thirty-three letters, twenty-eight of which are Arabic, four are Persian, and one is peculiar to the Turkish. Like most Oriental languages, Turkish is written and read from right to left. Two versions of the Scriptures in kindred dialects of the Turkish language appear to have been completed about the same period. One of these versions, executed by Seaman, and printed in England in 1666, will be noticed in the *Supplement*, under KARASS. The other, comprising both the Old and the New Test., was the work of Ali Bey, whose history is rather remarkable. His original name was Albertus Bobowsky, or Bobovins. He was born in Poland, in the beginning of the 17th century, and while a youth was stolen by the Tartars and sold as a slave in Constantinople. After having spent twenty years in the seraglio, he publicly embraced Mohammedanism, at the same time assuming the name of Ali Bey. He became first dragoman, or translator, to Mohammed IV., and was said to be thoroughly conversant with seventeen languages. At the suggestion and under the direction of the famous Levin Warner, then Dutch ambassador at Constantinople, Ali Bey was induced to translate the catechism of the Church of England into Turkish, and afterwards betook himself to the translation of

the entire Scriptures into Turkish. The study of the sacred volume was not without effect on the translator; for it is recorded that Ali Bey entertained thoughts of returning to the Christian Church, and was only prevented by death from accomplishing his design. When his version was corrected and ready for the press, it was sent by Warner to Leyden to be printed. It was deposited in the archives of the university of that city, and there it remained for a century and a half, until baron Von Diez, formerly Russian ambassador at Constantinople, drew the attention of Europe to this long-neglected translation. He offered his services in editing the MS. to the committee of the British and Foreign Bible Society; and, meeting with great encouragement to prosecute his design, Mr. Diez immediately addressed himself to the revision of the Old Test. When four books of the Pentateuch were revised he died, and the work of revision was transferred by the society to Kieffer, professor of the Turkish language at the University of Paris and interpreting secretary to the king of France. The new editor disapproved of the plan pursued by his predecessor, particularly of his insertion of vowel-points, and he therefore commenced the work anew, applying himself, in the first instance, to the New Test. He followed the text of the MS. implicitly, without collating it with the original Greek; and thus several errors in the text were inserted in the printed copies, which were, however, soon detected, and gave rise to a printed controversy. The circulation was immediately suspended, the errors were examined and corrected by a sub-committee, and Prof. Kieffer commenced a laborious and thorough revision of the text by collating every portion, not only with the original, but with the English, German, and French versions; with the Tartar of Seaman, and of the Scotch missionaries at Karass; with the versions of Erpenius and of Martyn; and with those in the London Polyglot. The revision was carried on from 1820 to 1828, when the entire Bible, with the embodied corrections, was completed, and obtained the attestation of the most eminent Orientalists in Europe. The work was printed at Paris, and the original MS. was afterwards returned to Leyden. An edition of the Turkish New Test., carefully revised by Mr. Thrabi under the superintendence of Dr. Henderson, was completed by the society in 1853. A subsequent revised edition was printed in 1857. A new version was commenced by the Rev. Dr. Schauffler, and the New Test. was printed in 1866. In 1867 the Psalms followed, to which were afterwards added the Pentateuch and Isaiah. These are, at present, the parts published of Dr. Schauffler's translation. The entire Bible was completed in 1873. "This work," says the *Annual Report* of the British and Foreign Bible Society for the year 1873, "is of a somewhat extraordinary character, requiring rare powers of scholarship for its execution. It has occupied many years, and the translator has devoted to it the most conscientious and untiring application. It has been the one thing to which his mind and learning have been consecrated. The question has been frequently mooted, and is again under discussion, whether a distinct translation in Turkish is to be published with exclusive reference to the Osmanlis, or whether one and the same text may not be made available both for Osmanlis and for other nationalities speaking the Turkish tongue, but reading their native characters. The latter was the object proposed when the translation of Dr. Schauffler was commenced; but the views of the translator became modified in the very early stages of his work, and he has aimed to adapt his translation in style to the taste of the Osmanlis, believing that the style common to the Greeks and Armenians speaking Turkish is too coarse and degraded to be met by a version acceptable to the Osmanlis. It is, moreover, alleged that the different nationalities employ the same terms frequently in widely different senses. This view does not elicit the sympathy or endorsement of many of the missionaries, who still hold to the theory

that one text should suffice for all classes, and that two versions would be injurious to the cause of divine truth, on the ground that it might, with some show of propriety, be objected that Protestants had one Bible for the rich and learned and another for the poor and unlearned. It is further contended that the necessity for distinct texts does not exist; that the style of Turkish spoken by the Christian populations has materially improved in dignity, although not level with that of the Osmanlis; and that it would be practicable to educate them to something still higher by means of a version of the Scriptures in pure idiomatic Turkish, without being cast in too lofty and artificial a mould. In order to bring the whole question to some practical and satisfactory solution, it is proposed that a committee be formed, composed of the best Turkish scholars, of which Dr. Schauffler shall be president, and to which the examination of his translation shall be submitted; and that authority be given to call in the aid of such literary effendis as may be judged desirable." The committee of joint revisers was formed; but, states the *Report* for 1874, "after a short experiment the venerable translator (Dr. Schauffler) resigned his position on the Board of Revisers, and handed over the MS. of the Old Test. to the agents of the British and Foreign and of the American Bible Society, at whose expense the translation has been made. It is an understood thing that the forthcoming Turkish Bible will be based on Dr. Schauffler's work, so that if he should have to regret that the whole will not be printed exactly as it leaves his hand, yet he will enjoy the satisfaction of knowing that he has contributed in a pre-eminent degree to this work, which was the fondest object of his later years; and that his name will go down to future generations associated with one of the hardest tasks ever attempted—the translation of the whole Bible into Osmanli Turkish." As to the work of the committee, we read in the *Annual Report* of the British and Foreign Bible Society for the year 1879 the following: "The revision of the Turkish Scriptures has been completed, and the version may be fairly considered a new translation. The committee began their work in June, 1873, and the last words of the Old Test. were written at eleven o'clock on May 25, 1878. The object of the committee was to produce a complete Bible for the Turks, which would be simple in language and idiom, and intelligible to the uneducated and acceptable to the learned. The committee was composed of the Rev. Dr. Schauffler (who soon retired from the committee), Dr. Riggs, the Rev. R. H. Weakley, and the Rev. G. F. Herrick, and these called to their help the Rev. Avedis Constantian, pastor of Marash, and two Turkish scholars, one of whom soon withdrew, and was replaced by a very learned man from the banks of the Tigris. One of these Turkish assistants became a first-fruit of the new version. The New Test. was first printed (Constantinople, 1877), and a second edition, in smaller form, was ready in time to send to Russia for the Turkish prisoners; and the printing of the Old Test. was completed in December, 1878. The Turkish government, to prevent the publication of the version, insisted that each copy should bear the *imprimatur* of the Imperial Council of Public Instruction, so that the copies go forth with the permission of the Turkish government; and what was meant for a hindrance has turned out to the furtherance of the work. The American Bible Society has shared with this society the labors and expenses of this great work." As to the MS. of Dr. Schauffler, which, as has been stated above, was handed to the agents of the British and Foreign and the American Bible Society, the translator has completed his final revision. "The parts," states the same report, "were not ready in time to be used by the revision committee, as had been intended. The MSS. of the Old Test. (except the Pentateuch and Isaiah already published) are now deposited in the strong-room of the American Bible House, New York, to the joint account of the British and Foreign and the American Bible Society."

II. Turkish-Armenian.—This is, properly speaking, a Turkish version, but printed in Armenian letters, and accommodated to the dialectic peculiarities which prevail among the Armenians of Asia Minor. A Turkish version in their peculiar dialect, and written in their characters, was commenced in 1815 by an Armenian archimandrite named Seraphim, in concert with another Armenian. An edition of five thousand copies of the Testament was printed at St. Petersburg in 1819. Mr. Leeges, agent of the British and Foreign Bible Society, devoted much time and trouble to the preparation of a revised edition. The work was afterwards taken up by the missionaries of the American Board of Missions; and in 1843 the entire Scriptures were printed in Smyrna at the expense of the American Society, the translation having been made by the Rev. W. Goodell. Subsequent editions of the Armeno-Turkish Scriptures have been printed at the American Mission press on behalf of the British and Foreign Bible Society.

III. Turkish-Greek.—This, like the preceding version, is Turkish, but printed in Greek letters. In 1782 the Psalms, translated into Turkish by Seraphim, metropolitan of Karamania, were printed in Greek letters; and in 1810 a Turkish version of the Acts and Epistles was printed in the same character at Venice. In consequence of inquiries instituted in 1818 by Dr. Pinkerton, respecting the state of the Christian inhabitants of the ancient Lydia, Caria, Lycia, Phrygia, Pisidia, Cilicia, and Lycaonia, it was ascertained that these poor people are all Greeks or Armenians, acquainted with no language but that of their Turkish masters. As they were unable to read or write except in their native characters, the British and Foreign Bible Society published the Turkish Testament in Greek letters, the translation having been made by Messrs. Goodell and Bird. This edition was printed at Constantinople in 1828. In order to make it more conformable to the provincial mode of speaking Turkish which prevails among the Greek Christians of Asia Minor, Mr. Leeges, agent of the society, undertook a new and revised version, assisted by Mr. Christo Nicolaides, of Philadelphia, who joined Mr. Leeges in 1832, and from that period to 1839 was uninterruptedly employed in the undertaking. The printing of the entire Bible was commenced at Syra, and afterwards transferred to Athens. In 1865 the Psalms, revised with great care under the editorial superintendence of the Rev. Dr. Riggs, passed through the press, and in 1870 the whole Bible, with marginal references, was published in Constantinople. See, besides the *Bible of Every Land*, the *Annual Reports* of the British and Foreign and American Bible Societies; and Reed, *The Bible Work of the World* (Lond. 1879). (B. P.)

Turlupins, the French name for the BRETHREN OF THE FREE SPIRIT (q. v.). The origin of the word is unknown, though it is thought to be connected with wolfish or predatory habits.

Turner, Daniel, an English Baptist minister, was born at Blackwater, Hertfordshire, March 1, 1710. He first settled at Reading, and after devoting some years to school-teaching, became, in 1748, pastor of the Baptist Church in Abingdon, Berkshire, which position he filled till his death, Sept. 5, 1798. Many of his publications were highly approved; among them were, *Compendium of Social Religion* (1758, 8vo);—*Letters Religious and Moral* (1766, 8vo);—*Meditations on Scripture* (Abing. 1771, 12mo);—*Dissertations on Religion* (1775, 8vo);—*Essays on Religion* (1780, 2 vols.; Oxf. 1787, 2 vols. 12mo);—*Expositions on Scripture* (Lond. 1790, 8vo). See Chalmers, *Biog. Dict.* s. v.; Allibone, *Dict. of Brit. and Amer. Authors*, s. v.

Turner, Francis, an English prelate of the 17th century, received his education at Winchester School, graduated at New College, Oxford, April 14, 1659, and took his degree of A.M. there in 1663. He received his degree of D.D. July 6, 1669, and in the following December was collated to the prebend of Sueating, in

St. Paul's. He succeeded Dr. Dunning to the see of Chichester, and followed him in the mastership of St. John's College, Cambridge, April 11, 1670. In 1683 he was made dean of Windsor; was consecrated bishop of Rochester, Nov. 11; and Aug. 23, 1684, was translated to the bishopric of Ely. He was one of the six bishops who joined archbishop Sancroft on May 18, 1688, in refusing to read the *Declaration for Liberty of Conscience*, and with them was committed, June 8, to the Tower, but was acquitted on the 29th. Refusing to take the oath when William and Mary ascended the throne, he was deprived of his bishopric, and lived in retirement till his death, Nov. 2, 1700. He wrote, *A Vindication of the late Archbishop Sancroft and his Brethren*, etc.:—*Animadversions on the Naked Truth:—Letters to the Clergy of his Diocese:—Brief Memoirs of Nicholas Ferrar* (2d ed. 1837, 12mo):—*Sermons* (1681–85). See Bliss's *Wood, Athen. Oxon.* iv, 545; Burnett, *Oxen Times*; Macaulay, *Hist. of England*, ch. xiv, xvi, xvii; Chalmers, *Biog. Dict.* s. v.; Allibone, *Dict. of Brit. and Amer. Authors*, s. v.

Turner, James (1), a Presbyterian minister, was born in Bedford County, Va., May 7, 1759. He was converted in 1789, licensed to preach in 1791, and ordained and installed as colleague pastor with the Rev. James Mitchel, July 28, 1792, in what was then called the Peaks Congregation. He also took charge of the New London Congregation. Here he spent the whole of his ministerial life, and died, Jan. 8, 1828. He was exceedingly attractive as a preacher; a man of real genius; acknowledged to be unrivalled among the clergy of Virginia in his power over the passions of men. See Sprague, *Annals of the Amer. Pulpit*, iii, 581; Foote, *Sketches of Virginia*, 2d series.

Turner, James (2), an English Congregational minister, was born at Oldham, March, 1782. He was educated at Rotherham College, and ordained at Knutsford in 1808, which place became the chief centre of his exertions. He was for years secretary of the British and Foreign Bible Society and the Cheshire Union of Independent Ministers. His judgment and clearness of mind were often consulted in private business, and great confidence was reposed in him. He died May 22, 1863. See (Lond.) *Cong. Year-book*, 1864, p. 248.

Turner, Jesse H., a Presbyterian minister, was born in Bedford County, Va., Jan. 1, 1788; was educated in Hampden Sidney College, Va.; studied theology in the Union Seminary, Prince Edward, Va.; was licensed by Hanover Presbytery and ordained by the same in 1813. He began his labors as a missionary in Richmond, Va.; he subsequently preached at Fayetteville, N. C.; Manchester, Va.; and in Hanover County, Va. He died March 13, 1863. He was a sincere, good man, and successful as a preacher. See Wilson, *Presb. Hist. Almanac*, 1867, p. 454.

Turner, Joseph M. W., an English painter, was born at 26 Maiden Lane, Covent Garden, London, April 23, 1775. He became a student, in 1789, of the Royal Academy, and as early as 1799 was elected an associate of the Academy, becoming three years after a full academician. In 1807 he was elected professor of perspective, but failed on account of literary qualifications. He travelled in Scotland, France, Switzerland, and the Rhine countries, and paid three visits to Italy. He died at Chelsea, Dec. 19, 1851. He bequeathed a noble collection of his works to the nation, and they were placed in a room in the National Gallery. Among his many works we notice, *The Fifth Plague of Egypt:—Tenth Plague of Egypt:—a Holy Family*. He also wrote a poem, *The Fallacies of Hope*. See Ruskin, *Modern Painters*; Thornbury, *Life of Turner* (Lond. 1862, 2 vols.; new ed. 1874).—*Chambers's Encyclop.* s. v.

Turner, Nathaniel, a Congregational minister, was born at Norfolk, Conn., in 1771; graduated at Williams College in 1798; studied theology with Dr. Catlin; was ordained over the Church in New Marlborough,

Mass., in 1799; and died May 25, 1812. See *Cong. Quarterly*, 1859, p. 46.

Turner, Peter, an English Congregational minister, was born at Wolverhampton in 1808. His parents were Wesleyans, and it was in connection with that body that he began to labor, at the age of eighteen, as a local preacher. He continued a liberal and zealous member of the Wesleyan community until 1846, when he joined the Independents, and in 1851 accepted the pastorate of the Independent Church at Evesham, Worcestershire. In 1856 he removed to Southampton, and labored with the Congregational Church until his death, July 26, 1861. Mr. Turner was very devoted to his people and pastoral duties, and his pulpit ministrations were highly prized by all who knew him. See (Lond.) *Cong. Year-book*, 1862, p. 267.

Turner, Samuel Hulbeart, D.D., an eminent Episcopal clergyman and scholar, was born in Philadelphia, Pa., Jan. 23, 1790, and graduated at the University of Pennsylvania in 1807. He was ordained deacon in 1811, and priest in 1814; was pastor of a church at Chestertown, Md., from 1812 to 1817; and was elected professor of historic theology in the General Episcopal Seminary, New York, Oct. 8, 1818. He continued with the institution during its stay in New Haven, Conn., and returned with it to New York in 1821. On Dec. 19 he took the chair of Biblical learning and interpretation of Scripture, in which he continued till his death, Dec. 21, 1861. He was also professor of Hebrew language and literature in Columbia College from 1831. He was the author of, *Notes on the Epistle to the Romans* (N. Y. 1824, 8vo):—with Dr. Whittingham, *Introduction to the Old Testament*, transl. from the Latin and German of John Jahn (1827, 8vo):—*Introduction to Sacred Philology and Interpretation*, transl. from the German of Dr. G. J. Planck (Edinb. 1834, 12mo):—*Companion to the Book of Genesis* (N. Y. 1841, 8vo):—*Biographical Notices of some of the Most Distinguished Rabbies*, etc. (1847, 12mo):—*Parallel References Illustrative of the New Testament* (1848, 12mo):—*Essay on Our Lord's Discourse*, etc., *John vi* (1851, 12mo):—*Thoughts on the Origin, Character, and Interpretation of Scripture Prophecy* (1852, 12mo):—*Epistle to the Hebrews*, in Greek and English (1852, 8vo):—*Epistle to the Romans* (1853, 8vo):—*Epistle to the Ephesians* (1856, 8vo). See *Autobiography of Samuel H. Turner, D.D.* (1862, 12mo); *Amer. Quar. Church Rev.* 1862, p. 734; Allibone, *Dict. of Brit. and Amer. Authors*, s. v.

Turner, Sharon, an English author, was born in London, Sept. 24, 1768. After many years' practice as an attorney in the Temple, he retired, in 1829, to Winchester Hill, where he resided until a few weeks before his death, which occurred in London, Feb. 13, 1847. Mr. Turner is best known by his *History of England from the Earliest Period to the Death of Elizabeth*, etc. (Lond. 1799–1805). He also wrote, *History of Henry VIII*, etc. (1826, 4to):—*History of the Reigns of Edward VI, Mary, and Elizabeth* (1829, 4to):—*Sacred Meditations and Devotional Poems by a Layman* (1810, 12mo):—*The Sacred History of the World*, etc. (1832, 3 vols. 8vo). See Allibone, *Dict. of Brit. and Amer. Authors*, s. v.

Turner, Thomas, D.D., an English divine, was born at St. Giles's, Heckfield, in 1591. He was educated at St. John's College, Oxford, and in 1623 was presented by his college to the vicarage of St. Giles's in Oxford. Laud, when bishop of London, made him his chaplain, and in 1629 collated him to the prebend of Newington, Church of St. Paul, and in October following to the chancellorship of the same church. Charles I made him a canon residentiary, and appointed him one of his chaplains in ordinary, giving him the rectory of St. Olave, Southwark, with which he held the rectory of Fitcham, Surrey. At the request of Charles I he accompanied that prince to Scotland to be crowned.

In 1641 he was preferred to the deanery of Rochester, but on the death of the king he was stripped of his preferments and treated with indignity. At the Restoration he entered the deanery of Canterbury, August, 1660. He died in October, 1672. See Chalmers, *Biog. Dict.* s. v.

Turner, William, an English divine, was born near Broadock, Flintshire, and for some time previous to going to Oxford he was an inmate of the house of Philip Henry, father of Matthew, the commentator. He took his A.M. at Edmund Hall, Oxford, June 8, 1675. Becoming, afterwards, vicar of Walberton, in Sussex, he resided there in 1697; but the date of his death is uncertain. He published, a *History of All Religions* (Lond. 1695, 8vo):—*Complete History of the Most Remarkable Providences*, etc. (1697, fol.). "This curious collection ranks with the similar performances of Clark, and Wanley in his *History of the Little World*, but is superior perhaps to both in selection and conciseness." See Chalmers, *Biog. Dict.* s. v.

Turner, William Hindley, an English Congregational minister, was born at Beeston, Leeds, in 1784. He was educated at Rotherham College, and became an exceedingly popular preacher. Mr. Turner's first settlement was at Bury, and after seven years' efficient work he removed to Hindley, where he built up a prosperous and manly ministry. In 1862 growing infirmities led him to resign the stated ministry. He was a disinterested, devoted, and faithful minister of Christ. He died Dec. 8, 1868. See (Lond.) *Cong. Year-book*, 1870, p. 324.

Turnus, in ancient Italian mythology, was the king of the Rutuli, and a son of Daunus and Venelia, who was a niece of queen Amata, wife of Latinus. Her daughter Lavinia, having been destined by fate to Æneas, was the subject of dispute between the Trojans and the Latins, in which the former were victorious. Turnus, after many wild battles, was finally killed in a duel with Æneas.

Turpentine-tree (τερέβινθος, τερέβινθος; Vulg. *terebinthus*) occurs only once, viz. in the Apocrypha (Ecclus. xxiv. 16), where wisdom is compared with the "turpentine-tree that stretcheth forth her branches." The τερέβινθος or τέρινονθος of the Greeks is the *Pistacia terebinthus*, *terebinth-tree*, common in Palestine and the East, supposed by some writers to represent the *elah* (אֵלָה) of the Hebrew Bible. See OAK. The terebinth, though not generally so conspicuous a tree in Palestine as some of the oaks, occasionally grows to a

large size. See Robinson (*Bibl. Res.* ii, 222, 223), who thus speaks of it. "The butm" (the Arabic name of the terebinth) "is not an evergreen, as often represented, but its small lance-shaped leaves fall in the autumn, and are renewed in the spring. The flowers are small, and followed by small oval berries, hanging in clusters from two to five inches long, resembling much those of the vine when the grapes are just set. From incisions in the trunk there is said to flow a sort of transparent balsam, constituting a very pure and fine species of turpentine, with an agreeable odor like citron or jessamine, and a mild taste, and hardening gradually into a transparent gum. In Palestine nothing seems to be known of this product of the butm!" The terebinth belongs to the natural order *Anacardiaceæ*, the plants of which order generally contain resinous secretions.—Smith. See TEREBINTH.

Turpin (or **Tilpin**), a French prelate of the 8th century, of whose early history nothing definite is known, was a monk of St. Denis, and became bishop of Rheims probably in 753, after a long opposition by Milon. He was one of the twelve French bishops present in 769 at the council called at Rome by pope Stephen to condemn the antipope Constantine. About 786 Turpin founded a chapel dedicated to St. Denis, which afterwards became an abbey. He died Sept. 2, 800. He left a genuine letter to pope Adrian I, and a romantic Latin *Chronicle* of the wars of Charlemagne against the Saracens in Spain, the authenticity of which has been greatly doubted, although avouched by a declaration of pope Calixtus in 1122. The oldest MSS. of it date from the end of the 11th century, and the first writer who speaks of it is Raoul of Tortoise (1096–1145). The Latin text was published in 1584 by Schard, in his *Germanicarum Rerum Chronographi*, and French versions have appeared by Raguin (Paris, 1527, 4to; Lyons, 1583, 8vo, etc.), and lately by Clampi (Florence, 1822, with a dissertation on the author) and Reiffenberg (Brussels, 1836). See Gascon Paris, *De Pseudo Turpino* (Paris, 1865).

Turpin, THOMAS D., a Methodist Episcopal minister, was born in Somerset County, Md., June 30, 1805. He was converted Sept. 8, 1823; licensed to preach Sept. 12, 1827; admitted on trial in the travelling connection Feb. 7, 1829, and was appointed to Union Circuit; in 1830, to Pendleton; in 1831, to the Savannah mission; in 1832, to the Black Swamp Circuit; in 1833, to May and New River; in 1834, to the Wadmatane and John's Island mission and Orangeburg Circuit; in 1835, to Pee Dee; in 1836, to Laurens; in 1837, again to Pendleton; and in 1838, to the Cambridge and Flat Woods mission, where he died, July 26, 1838. See *Minutes of Annual Conferences*, ii, 665.

Turquoise, a Persian gem of a peculiar bluish-green color, which was very generally used in the Middle Ages for the adornment of every species of sacred vessel, e. g. the chalice, ciborium, altar-cross, mitre, and pastoral staff.—Lee, *Gloss. of Liturg. Terms*, s. v.

Turret, **Touret**, or **Turette**, a small tower: the name is also sometimes given to a large pinnacle. Turrets are employed in Gothic architecture for various purposes, and are applied in various ways; they also differ very greatly in their forms, proportions, and decorations. In many cases they are used solely for ornament; they are also often placed at the angles of buildings, especially castles, to increase their strength, serving practically as corner buttresses. Occasionally they carry bells or a clock, but one of the most common uses to which they are applied is to contain a *newel*, or spiral staircase: for this purpose they are usually found attached to church-towers, forming an external projection, which very frequently terminates considerably below the top of the tower; but in some districts turrets of this kind generally rise above the tower, and are finished with a parapet or small spire. Turrets of all dates are sometimes perfectly plain and sometimes variously ornamented, according to the character of the prevailing style of archi-

Pistacia terebinthus.

Beckley, Oxfordshire.

St. Mary's, Beverley, Yorkshire.

ture, the upper part being the most enriched, and not unfrequently formed of open-work. In the *Norman* style the lower part is usually square, and this form is continued to the top, but the upper part is sometimes changed to a polygon or circle. Few turrets of this date retain their original terminations, but they appear to have been often finished with low spires, either square, polygonal, or circular, according to the shape of the turret. In the *Early English* and later styles they are most usually polygonal, but are sometimes square, and occasionally circular. The upper terminations are very various; in the *Early English* style spires prevail, but in the *Decorated* and *Perpendicular* not only spires, but parapets, either plain, battlemented, panelled, or pierced, and pinnacles are used. The peculiar kind of turrets often found attached to small churches and chapels, which have no tower to receive the bells, is designated by the term *Bell-gable*.—Parker, *Gloss. of Architect.* s. v. See SPIRE; TOWER.

Turretini, the name of a family of theologians of Geneva, whose ancestor, Francis Turretin or Turretini, the son of a gonfalonier of Lucca, was expatriated on account of his religion. He came to Geneva in 1579. Among his descendants three men deserve mention in this place.

1. **BENEDETTO** was born in 1588 at Zurich, became pastor at Geneva in 1612, and professor of theology in 1618. In 1620 he represented the Church of Geneva at the national synod of Alais, which introduced the decrees of Dort into France, and in the following year he was sent to Holland and the cities of the Hanseatic League to solicit aid towards fortifying Geneva, a task in which he was eminently successful. He died in 1631, leaving to the world a number of sermons and theological writings. See *Len, Allgem. hist. Lexikon*, xviii, 375; *Senebier, Hist. Lit. de Geneve*, ii, 136.

2. **FRANÇOIS** was born in 1623, became pastor of the Italian congregation at Geneva, and in 1653 professor of theology. He was sent to Holland on a similar mission to that formerly undertaken by his father, Benedetto. He is particularly known as a zealous opponent of the theology of Saumur [see AMYRAUT], and defender of orthodoxy in the sense of Dort. He was also one of the originators of the *Helvetic Consensus* (q. v.) He left numerous works, the more important of which, includ-

ing the *Institutio Theol. Elenchie*, were reprinted at Edinburgh in 1847 sq.

3. **JEAN ALPHONSE**, the son of François, was born in 1671, and became the pupil of the Cartesian Chonet and of the Arminianizing Louis Tronchin (q. v.) at Geneva. In 1691 he went to Holland to study church history under Spauheim, and in 1692 he visited England, where he became acquainted with Newton and acquired the English language. On his return to the Continent he sojourned for a time in Paris, and was admitted to the society of men like Bossuet, Mabillon, Malebranche, etc. He availed himself of this opportunity to study Arabic under the tuition of the abbé Langueine. In Geneva he was received into the ministry at the age of twenty-two, and soon afterwards into the *Vénérable Compagnie des Pasteurs*. His ability as an orator at once commanded attention. He was accustomed to follow the English practice of presenting to the view a leading truth or duty; but he made the application of his discourse with greater union than the English speakers cultivated, and by thus combining the methods of the Genevan and the English pulpit he became the originator of a new method. The arrangement of his sermons was natural and logical, his statement clear and

simple, his manner dignified. In 1697 he was made professor of church history, and in 1701 became rector of the academy. The latter honor was conferred upon him ten times, to which fact we are indebted for ten important addresses delivered on the successive days of promotion. He followed Tronchin, in 1705, as professor of systematic theology, though still retaining his own (historical) chair. He wrote upon almost the whole of dogmatics, and connected with these labors exegetical lectures on parts of the New Test.

The influence of Turretini was especially apparent in the management of the enterprise to bring about the abrogation of the *Helvetic Consensus* as a binding formula. He kept it before the Venerable Company, the council, and the Two Hundred until a majority were gained over to that project; and he induced Wake, archbishop of Canterbury, to urge the abrogation upon leading men throughout Switzerland, and also to persuade the king of England to address an appeal to the cantons in behalf of the same measure. He was also prominent in promoting fraternal relations between Lutherans and Reformed Christians in Geneva, in recognition of which fact he was made a member of the Royal Academy of Berlin, and awarded a gold medal by the Prussian king.

The principal theological works of Turretini, from which his tendency may most readily be learned, are, *Nubes Testium pro Moderato et Pacifico de Rebus Theol. Judicio et Instituenda inter Protestantes Concordia* (1729), with a dissertation on the fundamental articles of the faith annexed. Such articles he describes as "quorum cognitio atque fides ad Dei gratiam salutemque obtinendam necessaria est." This dissertation exposed Turretini to attack from two different directions: first, from the Jesuit De Pierre, Lyons, 1728, who sought to show that the Reformed Church had no greater reason to renounce the communion of the Church of Rome than that of the Lutheran Church; and, second, from Crinsons, Protestant pastor of Bionens, 1727. A second and more important work is his *Cogitationes et Dissertationes Theologice*, in which he displays a liberal type of orthodoxy. He emphasizes the importance of natural theology in genuine Reformed fashion, but holds that revealed religion has for its object merely the supplementing and completing of what natural religion

teaches. He recognises the existence of mysteries in revealed religion, but zealously rejects foreign and scholastic additions in theology. With respect to the doctrine of the divine decrees, he avoids, as he does everywhere, all extreme statements, but lays hold on the elements of practical utility in the teaching. With reference to the doctrine of Divine Providence, he represented the optimistic Leibnitzian theory. He followed that philosopher also in his rejection of innate ideas. The *Cogitationes* contained much apologetical material, and earned for their author an honorable place among apologists (see Pelt, *Encyclop.* p. 391). The form in which his apologetical ideas were given to the French world of readers by Vernet is, it should be noted, revised and altered, in the first editions with the author's consent, as Vernet claimed; but the improvement progressed with each successive edition, and Vernet clearly reveals the deism of the 18th century in his work.

In 1725 Turretini was commissioned to deliver the so-called *Clôture des Promotions*, an address in the French language, together with the charge prescribed by the laws for the occasion, when the Two Hundred and the General Assembly of citizens were to elect the principal magistrates of the State. The twenty-five addresses which he delivered to these bodies were highly commended because of the striking and practical ideas with which they were filled. He also took active part in the improvement of the liturgy, in the ordering of week-day services, in the publication of a new edition of the French New Test. (1726), in the forming of a society for the religious instruction of youth, and finally in the introduction of the public confirmation of catechumens. He rendered important services to the churches of Hungary, Transylvania, the Palatinate, and the Waldenses, and maintained an extensive correspondence with Switzerland, England, Holland, Germany, etc. George II of England and his consort honored him with expressions of their favor, and employed him in works of benevolence. His last years were disturbed by the troubles of Geneva in 1734. He died May 1, 1737. After his death were issued from the press his *Comment. Theoret.-pract. in Ep. ad Thesalon.* (Basle, 1739):—*Prælectiones* on Romans xi (Geneva, 1741):—and a tractate on the exposition of Scripture (Berlin, 1766). A complete edition of his works appeared in Leeuwarden in 1775.

Tur.* in the *Bibl. Raisonnée*, xxi; various biographical dictionaries; and Herzog, *Real-Encyclop.* s. v.

Turri, in the mythology of the Finns, was a god of war and hunting, living in steep rocky caverns, and was worshipped as the god of the nation.

Turrigera (or **Turrita**) (*tower-bearer* or *towered*), in Roman mythology, was a surname of Cybele.

Turselin (Lat. *Tursellinus*), HORACE, a learned and indefatigable Jesuit of Rome, was born in 1545, and taught rhetoric in that city twenty years, and was rector of several colleges. He promoted the study of belles-lettres in his society, and died at Rome, April 6, 1599. His principal works are, *Life of St. Francis Xavier* (best ed. 1596, 4to):—*History of Loretto* (8vo):—*Treatise on the Latin Particles*:—*Abridgment of Universal History from the Creation to 1598*, etc. (best editions are those which have a continuation by father Philip Briet, 1618-61; the best French translations are by abbé Lagneau, Paris, 1757, 4 vols. 12mo). See Chalmers, *Biog. Dict.* s. v.

Turstine, a monk of Caen, in Normandy, who, in 1081, was sent over to England and installed first Norman abbot of Glastonbury Abbey. Through his influence, William I granted the abbey a charter, restoring its lost lands, and confirming all its privileges. In a

general council, he opposed the assumptions of Giso, bishop of Wells, and was so successful that Giso had to go to Glastonbury and there have decided the question of jurisdiction over the two minor monasteries, Muchelney and Etheling. Turstine then turned his attention to the internal arrangements of the abbey, but by his introduction of foreign practices brought about insubordination among the monks. French soldiers were brought in, who slew some of the monks while in the sanctuary. Turstine was obliged to retire to Normandy in disgrace. William II permitted him to return to the abbey on payment of five hundred pounds in silver, but he seems not to have stayed there. See Hill, *English Monasticism*, p. 247, 248, 252.

Turtle, or **TURTLE-DOVE** (תוֹר, *tôr*, so called, no doubt, in imitation of its cooing note; *τρυγών*), occurs first in Scripture in Gen. xv, 9, where Abram is commanded to offer it along with other sacrifices, and with a young pigeon (זִיזָא, *gozâl*). In the Levitical law a pair of turtle-doves or of young pigeons are constantly prescribed as a substitute for those who were too poor to provide a lamb or a kid, and these birds were admissible either as trespass, sin, or burnt offering. In one instance, the case of a Nazarite having been accidentally defiled by a dead body, a pair of turtle-doves or young pigeons were specially enjoined (Numb. vi, 10). It was in accordance with the provision in Lev. xii, 6 that the mother of our Lord made the offering for her purification (Luke ii, 24). During the early period of Jewish history there is no evidence of any other bird except the pigeon having been domesticated; and up to the time of Solomon, who may, with the peacock, have introduced other gallinaceous birds from India, it was probably the only poultry known to the Israelites. To this day enormous quantities of pigeons are kept in dove-cots in all the towns and villages of Palestine, and several of the fancy races so familiar in this country have been traced to be of Syrian origin. The offering of two young pigeons must have been one easily within the reach of the poorest, and the offerer was accepted according to what he had, and not according to what he had not. The admission of a pair of turtle-doves was, perhaps, a yet further concession to extreme poverty; for, unlike the pigeon, the turtle, from its migratory nature and timid disposition, has never yet been kept in a state of free domestication; but, being extremely numerous, and resorting especially to gardens for nidification, its young might easily be found and captured by those who did not even possess pigeons.

Turtur Ægyptiacus.

It is not improbable that the palm-dove (*Turtur Egyptiacus*, Temm.) may, in some measure, have supplied the sacrifices in the wilderness, for it is found in amazing numbers wherever the palm-tree occurs, whether wild or cultivated. In most of the oases of North Africa and Arabia every tree is the home of two or three pairs of these tame and elegant birds. In the crown of many of the date-trees five or six nests are placed together; and sportsmen have frequently, in a palm-grove, brought down ten brace or more without moving from their post. In such camps as Elim a considerable supply of these doves may have been obtained.

From its habit of pairing for life and its fidelity for its mate, the dove was a symbol of purity and an appropriate offering (comp. Pliny, *Hist. Nat.* x, 52). The regular migration of the turtle-dove and its return in spring are alluded to in Jer. viii, 7, "The turtle and the crane and the swallow observe the time of their coming;" and Cant. ii, 11, 12, "The winter is past . . . and the voice of the turtle is heard in our land." So Pliny, "Hyeme mutis, a vere vocalibus;" and Aristotle, *Hist. An.* ix, 8, "Turtle-doves spend the summer in cold countries, the winter in warm ones," although elsewhere (viii, 5) he makes it hibernate (φωλεῖ). There is, indeed, no more grateful proof of the return of spring in Mediterranean countries than the voice of the turtle. One of the first birds to migrate northwards, the turtle, while other songsters are heard chiefly in the morning or only at intervals, immediately on its arrival pours forth from every garden, grove, and wooded hill its melancholy yet soothing ditty unceasingly from early dawn till sunset. It is from its plaintive note, doubtless, that David, in Psa. lxxiv, 19, pouring forth his lament to God, compares himself to a turtle-dove.

From the abundance of the dove tribe and their importance as an article of food, the ancients discriminated the species of *Columbidae* more accurately than of many others. Aristotle enumerates five species, which are not all easy of identification, as but four species are now known commonly to inhabit Greece. In Palestine the number of species is probably greater. Besides the rock-dove (*Columba livia*, L.), very common on all the rocky parts of the coast and in the inland ravines, where it remains throughout the year, and from which all the varieties of the domestic pigeon are derived, the ring-dove (*Columba palumbus*, L.) frequents all the wooded districts of the country. The stock-dove (*Columbaenas*, L.) is as generally, but more sparingly, distributed. Another species, allied either to this or to *Columba livia*, has been observed in the valley of the Jordan, perhaps *Col. leuconota*, Vig. (see *Ibis*, i, 35). The turtle-dove (*Turtur auritus*, L.) is, as has been stated, most abundant, and in the valley of the Jordan an allied species, the palm-dove, or Egyptian turtle (*Turtur Egyptiacus*, Temm.), is by no means uncommon. This bird, most abundant among the palm-trees in Egypt and North Africa, is distinguished from the common turtle-dove by its ruddy chestnut color, its long tail, smaller size, and the absence of the collar on the neck. It does not migrate, but, from the similar-

ty of its note and habits, it is not probable that it was distinguished by the ancients. The large Indian turtle (*Turtur gelastes*, Temm.) has also been stated, though without authority, to occur in Palestine. Other species, as the well-known collared dove (*Turtur risoria*, L.), have been incorrectly included as natives of Syria.—Smith.

The birds of this subgenus are invariably smaller than pigeons properly so called; they are mostly marked with a patch of peculiarly colored scutellated feathers on the neck, or with a collar of black, and have often other markings on the smaller wing-covers. The species *Columba Turtur*, with several varieties merely of color, extends from the west of Europe through the north of Africa to the islands south of China. The turtle-dove of Palestine is specially the same; but there is also a second, we believe local: both migrate farther south in winter, but return very early, when their cooing voice in the woods announces the spring.—Kitto. See Schlichter, *De Turture* (11al. 1738); Tristram, *Nat. Hist. of the Bible*, p. 217 sq.; Wood, *Bible Animals*, p. 419 sq. See DOVE.

Turtle, JOHN, a Wesleyan missionary, was born in the County of Suffolk, England, June 9, 1793. He was converted in 1811, commenced to preach in 1815, at Thetford, and in 1817 he received his appointment for the Bahamas, W. I. His first circuit was Eleuthera; next, New Providence; and after that, successively, Turk's Island, Harbor Island, Abaco, Jamaica (1822), Abaco, Eleuthera, and Turk's Island, where he died, Aug. 16, 1825. Mr. Turtle cut short his life by his indefatigable labors. He had natural abilities of a high order, and a spiritual life of beauty and consistency. See *Wesleyan Meth. Mag.* 1828, p. 217; *Wesleyan Minutes*, 1826.

Turton, Thomas, D.D., a bishop of the Church of England, was born in Yorkshire in 1782. He became a pensioner of Queen's College, Cambridge, in 1801; two years thereafter he removed to St. Catharine's College (then known as Catharine Hall), from which he graduated in 1805. In 1806 he was elected a fellow of his college, and in 1807 became a tutor. In 1822 he was appointed Lucasian professor of mathematics, and in 1826 accepted the college living of Gimingham-cum-Trunch, in the County of Norfolk; but was recalled to the university in the following year by his election to the regius professorship of divinity. In 1830 he obtained the deanery of Peterborough, which office he filled until 1842, when he was appointed dean of Westminster. In 1845 he became bishop of Ely. He died at his residence in London, Jan. 7, 1864. As a controversialist, Dr. Turton has been rarely surpassed. His taste in fine arts was exquisite, and he was the composer of several excellent pieces of Church music. See *American Quar. Church Rev.* April, 1864, p. 157.

Turton, William, an English Wesleyan missionary, was born in the island of Barbadoes, W. I. His father was a planter. His first labors were on the island of Antigua. In 1798 he received an appointment for St. Bartholomew from the English Conference. In 1800 he was sent to New Providence, and labored for the rest of his life on that and adjacent islands. He died at Nassau, May 10, 1818, aged fifty-seven. He was a faithful toiler. See *Wesleyan Meth. Mag.* 1821, p. 3, 81; *Wesleyan Minutes*, 1818.

Tutānus, in Roman mythology, was a deity who was implored in times of peril and danger for help and protection.

Tutiani, BARTOLOMEO, an engraver on wood, who is said to have executed some cuts marked with a Gothic monogram of his initials. Bartsch describes only one cut with this mark, *Christ Scoffed at by the Jews*, in a book (Nuremb. 1515); but there is no evidence that it was engraved by Tutiani. See Spooner, *Biog. Hist. of the Fine Arts*, s. v.

Columba Turtur.

Tutilina, in Roman mythology, was a goddess who was said to care for the fields of corn and grain. She had an altar and a pillar in the circus—no temple, however, as she could only be worshipped in the open air.

Tutilo, a monk of St. Gall and celebrated artist, was contemporary with the great teachers Nokter Balbulus and Radbert of St. Gall, and associated with them in friendship and in the work of making St. Gall the foremost seat of the arts and sciences in their day. He was of gigantic stature and full of joyous humor; a *magister* and *presbyter* according to the necrology, but none the less a born artist and unquestioned genius. Driven into the world by his artist nature, he nevertheless preserved his piously simple and blameless life. In the monastery itself his strength and geniality determined his position. He was its butler and sacristan, and also the host and companion of visiting strangers, serving in the latter capacity down to A.D. 912.

The Irish bishop or presbyter Mark, and his nephew Moengal (the latter preferably called Marcellus by the monks), visited St. Gall in the middle of the 9th century; and Moengal instructed Tutilo, among others, in the art of music until he became a proficient composer. As an instrumentalist and vocalist he captivated the ear and the heart. He became himself a teacher of music, and in a separate room gave regular instruction to the sons of the nobility in the use of stringed instruments. Nor did he confine himself to sacred music only; but his finest laurels were still gathered in that field. He imitated the Scottish custom of associating instrumental music with vocal in the worship of the Church, and carried it further. Some of the instruments used in the small chapel of St. Gall are pictured in old MSS. which are still extant. His own most especial creation were the so-called *tropes*, i. e. ornamental melodic additions, with texts, to the hymns of the mass, and particularly to its *Introit*, which were intended to impart a specifically festive character to the hymns for festal days. His Christmas trope *Hodie Cantandus* is well known. These tropes were widely received and used throughout the Church, and were perpetuated, under various modifications, down to the 17th century. He also composed hymns and litanies (see the St. Gall MSS. Nos. 37 and 380).

The genius of Tutilo was displayed with equal force in the arts of painting, sculpture, and architecture. He had the independence to work from new, indigenous motives as well as from Roman and Byzantine models and after a traditional type. His fame extended widely, and made it the fashion to procure works from his hand. A statue of the Virgin Mary, erected by him at Metz, was wrought in so exalted a manner as to give currency to the report that the Virgin herself was his instructor. Of his carvings the ivory tables which Charlemagne kept under his pillow are especially celebrated. They passed into the hands of archbishop Hatto of Mayence, then into those of Solomon, abbot of St. Gall, and from him into the possession of the monastery. One of them was smooth, and upon its upper surface Tutilo carved the Virgin between four angels, while its lower surface received a portrayal of the legend of St. Gall, in which the saint gives bread to his obedient bear in reward for his labor of bearing wood for fuel. Stumpf, the ancient Swiss chronicler, mentions also an astronomical chart of brass upon which the orbits of the heavenly bodies were beautifully marked, as having been one of Tutilo's masterpieces and as being still in existence in his day. It is now, however, lost. On Tutilo's death he was buried in a chapel which was dedicated to his memory and called by his name; and he was venerated as a saint. The documents of the 11th and 12th centuries always speak of him as a saint; but his worship was soon lost.

Tuttle, Amos C., a Presbyterian minister, was born at Monckton, Vt., July 28, 1800. He pursued his preparatory studies in the Academy at Middlebury, Vt.; graduated at Middlebury College in 1827; studied theology privately; was licensed by the Addison County Association June 30, 1829; ordained by an ecclesiastical council Oct. 30, 1829; and became stated supply of the Church in Whitehall, N. Y., Sept. 1, 1830. In 1832 he became pastor of the Congregational Church in Hartford, N. Y.; in 1836 he accepted an agency for the Auburn Theological Seminary; in 1837 became pastor of the Presbyterian Church in Fayetteville, Onondaga Co., N. Y.; in 1841, of a church at Liverpool, N. Y.; in 1844, of the Congregational Church in Sherburne, Chenango Co., N. Y.; in 1856, of the Church in Paw Paw, Van Buren Co., Mich.; in 1859, of the Church in Lapeer, Mich., where he labored until his death, Sept. 24, 1862. Mr. Tuttle was a man of more than ordinary mind, well educated, and popular as a preacher. See Wilson, *Presb. Hist. Almanac*, 1863, p. 308. (J. L. S.)

Tuttle, Jacob, a Presbyterian minister, was born at New Vernon, Morris Co., N. J., Aug. 24, 1786. He was educated at the Bloomfield Academy, N. J.; studied theology privately; taught at the Academy at Newton, Sussex Co., N. J., from 1817 to 1820; was licensed to preach by the Presbytery of New Jersey April 27, 1820; ordained and installed pastor of the West Milford Church, Passaic Co., Aug. 14, 1821; and removed to Ohio in 1832, where he engaged in home missionary labors, planting several churches, and was everywhere honored as a true man of God. He died Jan. 6, 1866. He was a successful minister, full of concern for his hearers, and honored of God. See Wilson, *Presb. Hist. Almanac*, 1867, p. 324.

Tuttle, Samuel Lawrence, a Presbyterian minister, was born at Bloomfield, N. J., Aug. 25, 1815. He was converted in 1830; pursued his academical studies in Newark, N. J.; graduated at the College of New Jersey in 1836; studied theology at the Auburn Seminary, N. Y.; was licensed by the Newark Presbytery Oct. 8, 1840; ordained pastor of the Caldwell Church, N. J., March 9, 1841; was in the employ of the American Bible Society from 1849 to 1854; became pastor of the Madison Church, Morris Co., N. J., Jan. 3, 1854; agent of the American Bible Society for Western New York from 1862 to 1863; and assistant to the secretaries until his death, which occurred April 16, 1866. Mr. Tuttle was an eloquent preacher. The Rev. Dr. Taylor, one of the secretaries of the American Bible Society, gave it as his opinion that there was no person so thoroughly and minutely acquainted with the history and workings of the Bible Society as he. See Wilson, *Presb. Hist. Almanac*, 1867, p. 327. (J. L. S.)

Tuttle, Timothy, a Congregational minister, was born at East Haven, Conn., Nov. 29, 1781. He graduated at Yale College in 1808; studied theology with Rev. David Smith of Durham, Conn.; commenced preaching at Durham, N. Y.; and was ordained over the Church in Ledyard, Conn., in 1811. Here he labored until his death, June 6, 1864. Mr. Tuttle was plain in appearance and manners, yet a man of godly sincerity and of considerable influence. He was an instructive preacher. See *Cong. Quar. Rev.* 1864, p. 301.

Twelfth-day, (1) the feast of Epiphany, being the twelfth day after Christmas; (2) the old Christmas-day.

TWELFTH DAY OF THE MONTH. In the evening service of the Church of England for the twelfth day of any month, the hymn after the second lesson, beginning "God be merciful unto us," etc., is omitted, because it comes in the regular psalm for the day, and would thus occasion an unnecessary and useless repetition.—Stanton, *Diet. of the Church*, s. v.

Twelfth-night, the eve of the festival of the Epiphany, which occurs exactly twelve days after the feast of Christmas.

Twelfth-tide. See EPIPHANY.

Twells, LEONARD, a learned English divine, was educated at Jesus College, Cambridge, where he proceeded A.B. in 1704. In 1733 the University of Oxford conferred on him the degree of A.M. by diploma, in approbation probably of his *Critical Examination*, etc. He was at that time vicar of St. Mary's, Marlborough, but in 1737 was presented to the united rectories of St. Matthew's, Friday Street, and St. Peter's, Cheap. He was also a prebendary of St. Paul's, and one of the lecturers of St. Dunstan's-in-the-West. He died Feb. 19, 1741 or 1742. His publications in his lifetime were, *A Critical Examination of the Late New Text and Version of the Testament, in Greek and English* (pts. i, ii, Lond. 1731; pt. iii, 1732, 8vo):—*A Vindication of the Gospel of St. Matthew* (1735, 8vo):—*Answer to the Inquiry into the Meaning of Demoniacs in the New Test.* (1737, 8vo):—*Answer to the Further Inquiry* (1738, 8vo). After his death, his *Sermons* at Boyle's and lady Moyer's lectures were published for the benefit of his family (1743, 2 vols. 8vo). See Chalmers, *Biog. Dict.* s. v.; Allibone, *Dict. of Brit. and Amer. Authors*, s. v.; Nichol, *Lit. Anec.*; id. *Illustr. of Liter.*

Twelve. This number was sacred among the Jews, probably because it was that of the tribes (q. v.), or of the months of the year, or (as some think) of the signs of the zodiac. It was symbolical of just proportion, beauty, and stability. It is sometimes used in the general sense of a dozen: thus, Jeroboam's garment is said to have been rent into twelve pieces (1 Kings xi, 30), and Elisha to have ploughed with twelve yoke of oxen, etc. See NUMBER.

Twesten, AUGUST DETLEV CHRISTIAN, a Protestant divine of Germany, was born April 11, 1789, at Glückstadt, in Holstein. He studied theology and philosophy at Kiel, and in 1812 went to Berlin, where he became one of the earliest followers and an intimate personal friend of Schleiermacher. For some time he was professor of languages in one of the colleges at Berlin, but in 1814 he went back to Kiel as professor of theology and philosophy. After the death of Schleiermacher, in 1834, he was called to Berlin to succeed his teacher in the chair of systematic divinity. In 1850 he was appointed *Oberkirchenrath*, and died Jan. 8, 1876. As a writer, Twesten was the least prolific of all the more eminent German divines. This was owing partly to a certain timidity and conscientiousness, and partly to an unwillingness to publish anything which he had not first thoroughly searched and mastered, and for which there seemed to him no urgent need. He wrote an analytical logic, a critical edition of the three oecumenical creeds and the unaltered Augsburg Confession, essays on Hecæus Illyricus, on Schleiermacher's *Ethics*, etc. But his main work is his *Vorlesungen über die Dogmatik der evangelisch-lutherischen Kirche* (Hamb. 1837, 2 vols.), which in its unfinished condition has great and abiding excellences; "for he is, perhaps," says Schaff, "the clearest thinker and writer among all the systematic divines of Germany. He possesses the gift of didactic exposition and analysis in an eminent degree. His learning is always accurate, minute, and thoroughly digested; his style transparent, smooth, and polished." The volumes which were published contain—the first, the introductory chapters on religion, revelation, inspiration, the authority and inspiration of the Scriptures, the use of reason, the history of dogmatic literature; the second embraces only the doctrine of God, the holy Trinity, the creation and preservation of the world, and angelology. As to his theological standpoint, it is, according to Schaff, "Schleiermacher's system passing over into Lutheran orthodoxy under a modernized form, or the Lutheran scholasticism of the 17th century revived, enlarged, and liberalized by

the scientific influence of Schleiermacher and the tolerant spirit of the evangelical union." See *Theol. Universal-Lex.* s. v.; Zuchold, *Bibl. Theol.* ii, 1353; Schaff, *Germany, its Universities*, etc., p. 320 sq. (l. p.)

Twichell, PLINY, a Presbyterian minister, was born at Athol, Worcester Co., Mass., Feb. 25, 1805. He was educated at Washington College, Pa.; studied theology in Auburn Seminary, N. Y.; was licensed by the Genesee Presbytery in 1836; and was ordained and installed pastor of the Presbyterian Church in Wyoming, N. Y., in 1841. Here he labored for fifteen years, until 1856, in which year he took charge of East Bethany Church, where he preached until his death, Sept. 15, 1864. See Wilson, *Presb. Hist. Almanac*, 1866, p. 180.

Twilight, ALEXANDER L., a Congregational minister and teacher, was born at Corinth, Vt., Sept. 23, 1795. By his own exertions he put himself through Randolph Academy and Middlebury College, graduating in 1823. He taught four years in Peru, N. Y.; was licensed to preach by the presbytery in Plattsburg in 1827; taught and preached one year in Vergennes, Vt.; and for eighteen years was principal of the grammar-school in Brownington, Vt., and again from 1852 to 1855. From 1847 until 1852 he taught in Shipton and Hatley, Ontario. He was ordained in Brownington in 1829, and supplied the pulpit there for many years, but was never a regular preacher. He died June 19, 1857. Mr. Twilight's great work was as a teacher; in this he was successful and influential. He pursued his purposes with undeviating energy, and built up his pupils in both character and knowledge. He was an able and often eloquent preacher. See *Cong. Quar. Rev.* 1867, p. 281.

Twining, THOMAS, a learned Anglican divine, was born in 1734, and educated at Sidney College, Cambridge, being contemporary in that university with Gray, Mason, and Bate. Mr. Twining was well versed in the composition, harmony, and history of the art and science of music. In 1760 he took his degree of A.B., and that of A.M. in 1763. He became rector of White Notley, Essex, in 1768, and of St. Mary's, Colchester, to which he was presented by the bishop of London, in 1770. He died Aug. 6, 1804. Sound learning, polite literature, and exquisite tastes in all the fine arts lost an ornament and defender in the death of this scholar and worthy divine. See Chalmers, *Biog. Dict.* s. v.

Twisse, WILLIAM, D.D., a distinguished Nonconforming Calvinistic divine, was born at Newbury, Berkshire, England, in 1575. He was educated at, and became subsequently a fellow of, New College, Oxford. He became chaplain to princess Elizabeth, afterwards queen of Bohemia. After this he was appointed to the curacy of Newbury. In 1643 he was elected prolocutor of the Westminster Assembly of Divines. He confined himself with great thoroughness to the study of theology, and produced numerous works, among which are the following: *Vanitie* (1631, 4to):—*Vindicia Gratie, Potestatis, ac Prævidentie Dei* (Amst. 1632, 4to):—*Dissertatio de Scientia Media, tribus Libris absoluta* (fol.):—*Morality of the Fourth Commandment* (Lond. 1641):—*Treatise on Reprobation* (1646, 4to):—*Riches of God's Love to Vessels of Mercy Consistent with his Absolute Hatred, or Reprobation of Vessels of Wrath* (Oxf. 1653, fol.). This work was strongly recommended by Dr. Owen, *De Causa Dei contra Pelagium*. He left a number of works in MS. His death occurred July 20, 1646. See Chalmers, *Biog. Dict.* s. v. (W. P. S.)

Two. This number is sometimes used in Scripture in a symbolical sense: it typifies the connection between the magistracy and the ministry in the persons of Moses and Aaron; the two systems of idolatry which were learned in Egyptian and Babylonian bondage; the Old and New Tests; the Jewish and Christian dispensations; and, among the early fathers, the divine and human natures of Christ. Several of the early heretics endeavored to introduce the Persian duality into the

Christian system, and they therefore declared that the number two had a more mystic sanctity than any other. Traces of this delusion may be found so late as the 9th century of the Church. See NUMBER.

Twombly, ISRAEL S., a Presbyterian minister, was born at Charlestown, Mass., Sept. 1, 1817. He was educated in Marion County, Mo.; graduated at Lane Theological Seminary in 1852; was licensed by Cincinnati Presbytery the same year, and ordained by Athens Presbytery pastor of the Church in Troy, O. He afterwards became pastor of the Church at Pomeroy, O., where he died, Oct. 31, 1860. He was a thorough scholar, and an earnest and impressive preacher. See Wilson, *Presb. Hist. Almanac*, 1862, p. 198.

Twyne, BRIAN, an English divine, was born in 1579, and admitted a scholar of Corpus Christi College in 1594. He was admitted probationer fellow in 1603, and, entering into holy orders, took the degree of B.D. in 1610. In 1614 he was made Greek reader of his college, in which office he acquitted himself with credit, but left his college in 1623. He was afterwards presented to the vicarage of Rye, Sussex, but passed most of his time at Oxford in reading, writing, and contemplation. He died in St. Aldate's, July 4, 1644. He published *Antiquitatis Academiæ Oxoniensis Apologia*, etc. (Oxon. 1608, 4to). See Chalmers, *Biog. Dict.* s. v.

Tyana, COUNCIL OF (*Concilium Tyanense*), was held in 367 in Tyana, a town of Asia Minor. There were present in this council Eusebius of Cesarea in Cappadocia, Athanasius of Ancyra, Pelagius of Laodicea, Gregory Nazianzen the elder, and many others who had declared their belief in the consubstantiality of the Son at Antioch in 363. The letters of pope Liberius and the bishops of Italy, Sicily, Africa, and Gaul were read, which had been written to wipe out the disgrace attaching to them on account of the Council of Ariminum. Eustathius of Sebaste, formerly deposed, was re-established; and a synodical letter written to all the bishops of the East, exhorting them to testify in writing their rejection of the acts of Ariminum, and their adherence to the faith of Nicaea. See Mansi, *Concil.* ii, 836.—Landon, *Manual of Councils*, s. v.

Tychæcum, the original name of a Temple of Fortune at Antioch, which was turned into a church, and called by the name of Ignatius by Theodosius. See Bingham, *Christ. Antig.* bk. viii, ch. iii, § 4.

Tychè, in Greek mythology, is identical with *Fortuna* of the Romans. Pindar calls her a daughter of Jupiter. She possessed at Thebes, and at numerous other places, temples and monuments.

Tyches, in Egyptian mythology, is one of the four protecting domestic spirits which are allotted to each human being during the period of life.

Tychicus (Τύχικος for τυχικός, *fateful*), a companion of Paul on some of his journeys, and one of his fellow-laborers in the work of the Gospel. A.D. 54-64. (1.) In Acts xx, 4, he appears as one of those who accompanied the apostle through a longer or shorter portion of his return journey from the third missionary circuit. Here he is expressly called (with Trophimus) a native of Asia Minor (Ἀσιανός); but while Trophimus went with Paul to Jerusalem (Acts xxi, 29), Tychicus was left behind in Asia, probably at Miletus (xx, 15, 38). (2.) How Tychicus was employed in the interval before Paul's first imprisonment we cannot tell; but in that imprisonment he was with the apostle again, as we see from Col. iv, 7, 8. Here he is spoken of, not only as "a beloved brother," but as "a faithful minister and fellow-servant in the Lord;" and he is to make known to the Colossians the present circumstances of the apostle (τὰ κατ' ἐμὲ πάντα γνωρίσαι), and to bring comfort to the Colossians themselves (ἵνα παρακαλέσῃ τὰς καρδίας ὑμῶν). From this we gather that diligent service and warm Christian sympathy were two features of the life and character of Tychicus. Colosse was in

Asia; but from the fact that of Onesimus, who is mentioned immediately afterwards, it is said, ὅς ἐστιν ἐξ ἰμῶν, whereas Tychicus is not so styled, we naturally infer that the latter was not a native of that city. These two men were doubtless the bearers both of this letter and the following, as well as that to Philemon. (3.) The language concerning Tychicus in Eph. vi, 21, 22 is very similar, though not exactly in the same words. It is the more important to notice this passage carefully, because it is the only personal allusion in the epistle, and is of some considerable value as a subsidiary argument for its authenticity. If this was a circular letter, Tychicus, who bore a commission to Colosse, and who was probably well known in various parts of the province of Asia, would be a very proper person to see the letter duly delivered and read. (4.) The next references are in the Pastoral Epistles, the first in chronological order being Tit. iii, 12. Here Paul (writing possibly from Ephesus) says that it is probable he may send Tychicus to Crete, about the time when he himself goes to Nicopolis. (5.) In 2 Tim. iv, 12 (written at Rome during the second imprisonment) he says, "I am herewith sending Tychicus to Ephesus." At least it seems natural, with Dr. Wordsworth, so to render ἀποστείλα, though Bp. Ellicott's suggestion is also worth considering, that this mission may have been connected with the carrying of the first epistle. (See their notes on the passage.) However this may be, we see this disciple at the end, as we saw him at the beginning, connected locally with Asia, while also co-operating with Paul. We have no authentic information concerning Tychicus in any period previous to or subsequent to these five scriptural notices. The tradition which places him afterwards as bishop of Chalcedon in Bithynia is apparently of no value. But there is much probability in the conjecture (Stanley's *Corinthians*, 2d ed. p. 493) that Tychicus was one of the two "brethren" (Trophimus being the other) who were associated with Titus (2 Cor. viii, 16-24) in conducting the business of the collection for the poor Christians in Judea. As arguments for this view we may mention the association with Trophimus, the probability that both were Ephesians, the occurrence of both names in the Second Epistle to Timothy (see 2 Tim. iv, 20), the chronological and geographical agreement with the circumstances of the third missionary journey, and the general language used concerning Tychicus in Colossians and Ephesians.—Smith. See ASIA; EPISTESUS; TROPHIMUS.

Tycho, in Greek mythology, was a daemon similar to Consalus, generally found represented in company with Priapus.

Tychonius, a Donatist of the 4th century, who displayed an impartial and sincere desire to arrive at the truth with respect to the controversy between his sect and the Church. He is described as having been learned in the Scriptures, tolerably acquainted with history and with secular literature, and zealously interested in the affairs of the Church. He regarded the Church as the sole divinely provided remedial institution, into which all men must enter if they would attain to salvation; and therefore held that the moral state of the members cannot destroy the value and efficiency of the Church. He was also consistent in protesting against the rebaptism of persons who became Donatists. His views were attacked as heretical by the Donatist Parmenian (q. v.), and drew forth an epistle from Augustine. Tychonius was accused of being a Chiliast, but the charge is probably untrue. A single work from his pen remains, the *Liber Septem Regulis*, first published by Gryneus (Basle, 1569), and afterwards in a better edition by Gallandi in the *Bibl. Vet. Patrum* (Venet. 1772), viii, 107-129. The work is designed to serve as a guide to the interpretation of the Scriptures, and some of its rules are still followed by some expositors: e.g., the sixth, *De Recapitulatione*, which teaches that the same thing is sometimes repeatedly narrated or de-

scribed, especially in the Apocalypse, so that successive narratives do not necessarily refer to successive events. The book furnished Isidore of Seville the idea for his work *Sententiarum Libri Tres*. As the earliest endeavor to construct a theory of Christian hermeneutics, the work certainly deserves attention. It would appear from Augustine that Tychonius died about 390; but Gennadius (*De Script. Eccles.* c. 18) fixes a later time. Gallandi furnished a sketch of Tychonius in *Proleg. to Bibl. Vet. Patr.* VIII, ii, 5, and a more careful notice is given in Tillemont, *Mémoires pour servir à l'Hist. Eccles. des Six premiers Siècles* (2d ed. Paris, 1704), vi, 81 sq., 145-150. See Herzog, *Real-Encyklop.* s. v.

Tychsen, Olaus Gerhard, a German Talmudist, was born Dec. 14, 1734, at Tondern, a town in Sleswick. He studied the classical and Oriental languages in the gymnasium of Altona, with the exception of Arabic, which he acquired from a merchant whose business had caused him to reside during many years in North Africa. He finished his theological course at Halle, and was soon afterwards appointed a teacher in G. A. Franke's Orphanage. While so employed he learned the English, Hindostani, and Tamil languages from a missionary (Schulz). His favorite study, however, was the Rabbinical Talmud, in whose language he was so proficient as to be able to speak and write with great ease. He was, in April, 1759, appointed missionary to the Jews and Mohammedans, and travelled in that capacity through North Germany, Prussia, Denmark, and Saxony, but without accomplishing anything. In the synagogue at Altona his sermon even earned for him a severe beating. In 1760 Tychsen went to the University of Büztow, in Mecklenburg, as *magister legens*, and remained there until Büztow was united with the University of Rostock and transferred to the latter place, when he likewise removed thither. He died Dec. 30, 1815. Tychsen had earned a great reputation, as is attested by his election to numerous societies and by many flattering testimonials; but this reputation respected simply the extent, and not at all the thoroughness, of his knowledge. He possessed solid acquirements only in the Rabbinical, and joined with them a keen eye and considerable skill for the detection of foreign written characters; but he was deficient in judgment, ready to venture the most improbable hypotheses, and anxious for notoriety. He is consequently important only as a Talmudist, a numismatist, and an epigrapher. His controversy with Kennicott and Bayer directed attention to him more than any other incident of his career, and it afforded evidence of all the traits described above—his wide learning, obstinate orthodoxy, and want of critical judgment. In this dispute he wrote, *Tentamen de Variis Codicum Hebr. Vet. Test. MSS. Generibus* (Rost. 1772, 8vo), in support of the Masoretic text:—*Befreites Tentamen*, etc. (1774):—and a supplement (1776). He insisted that the Greek versions had been made from a Hebrew text written in Greek characters, and advocated the no less singular theory that the Samaritan Pentateuch had been copied from a Hebræo-Jewish (Masoretic) text with the vowel-points—the latter in *Disputatio Hist.-phil.-crit. de Pent. Samarit.* etc. (Büztow, 1765, 4to). In 1779 he published a work to demonstrate the spurious character of all Jewish coins bearing Jewish or Samaritan characters, including those of the Maccabean period, which drew forth a reply from the Spanish Jesuit Bayer and occasioned a protracted dispute. In the study of Arabic coins Tychsen rendered real service, and began the systematic study of Oriental numismatics. He showed himself a master in the deciphering of inscriptions (see *Erklärung d. arab. Schrift auf d. röm.-kaiserl. Krönungsmünzen, in der Meckl.-Schwerin. Gelehrten Beiträge*, 1780, Nos. 42, 45, and the *Interpret. Inscript. Cypic. in Marm. Templ. Patriarch. S. Petri Cathedra* [Rost. 1787]). Tychsen also published editions of Al-Makrizi: *Al-Makrizi Hist. Monete Arab. è Cod. Escorial.* (ibid. 1797, 8vo):—and *Tractat. de Legalibus Arab. Ponderibus et Mensuris* (ibid. 1800, 8vo). His *Elementale Arabi-*

cum, etc., is of inferior value, as is also his *Element. Syriacum*. See Hartmann, *Olaus Gerhard Tychsen*, etc. (Bremen, 1818 sq.); De Sacy, *Biog. Universelle*, xlvii, 120 sq.—Herzog, *Real-Encyklop.* s. v.

Tychsen, Thomas Christian, a German scholar and professor, was born at Horsbyll, in Sleswick, May 8, 1758; studied at Kiel and Göttingen; travelled over the Continent after having completed his studies; and became professor extraordinary of theology in Göttingen in 1784, through the intervention of Heyne, his patron. In 1788 he was made ordinary professor of philosophy; 1806, councillor; 1817, honorary doctor of theology. He was a member of several learned societies, and director of the Royal Scientific Association of Göttingen. He died Oct. 24, 1834. This Tychsen, like Olaus G. Tychsen (q. v.), to whom he was in nowise related, was more prominent as an Oriental and classical scholar and antiquarian than as a theologian. He composed forty-three books and essays, all of which are characterized by learning, thoroughness, and good judgment. We mention, *De Propaganda Christi et Notionibus de Adventu Christi in N. T. Obris*:—*De Josephi Auctoritate et Usu*, etc.:—*De Literatura Hebr.*:—*Illustr. Vaticin. Joelis*, c. 3 (Gott. 1788). The dispute of Olaus Tychsen with Bayer led him also to give attention to the study of Jewish coins. In this pursuit he wrote, *De Numis Hebræo-Samarit.* etc., in *Nov. Comment. Soc. Reg. Gott.* viii, 120 sq.:—*De Numis Oriental.* (1789):—*De Numis Hasmæorum*, etc., in *Nov. Com.* vol. xii. He furthermore wrote *Geschichte d. hebr. Literatur* (ibid.). In 1791 he became the collaborator of J. D. Michaelis in the Oriental and exegetical library published by the latter, and his successor beginning with vol. ix. He also completed part iv of Michaelis's *Anmerk. für Ungelehrte* and vol. vi of his *Supplem. ad Lex. Hebr.* (1792). He edited vol. vi of Koppe's edition of the New Test., comprising *Galatians, Ephesians*, and *Thessalonians* (2d ed. 1791). A complete list of his works and detailed sketch of his life may be found in *Neuer Nekrolog der Deutschen* (1834, pt. ii; Weimar, 1836), p. 894-900.—Herzog, *Real-Encyklop.* s. v.

Tye, Christopher, an English musician of the 16th century, was born at Westminster, and brought up in the Royal Chapel. He was musical preceptor to prince Edward, son of Henry VIII. In 1545 he was admitted to the degree of doctor in music at Cambridge, and in 1548 was incorporated a member of the University of Oxford. In the reign of queen Elizabeth he was organist of the Royal Chapel, and a man of some literature. "The Acts of the Apostles," set to music by Dr. Tye, were sung in the Chapel of Edward VI; but the success of them not meeting the expectation of their author, he commenced the composition of music to words selected from the Psalms of David. The former was published with the following title, *The Actes of the Apostles, translated into Englyshe Metre*, etc. (1553, sm. 8vo). He also composed *A Notable Historie of Nustagio and Travelsari, no less Pitefull than Pleasaunt* (Lond. 1569, 12mo). See Allibone, *Dict. of Brit. and Amer. Authors*, s. v.; Chalmers, *Biog. Dict.* s. v.

Tyler, Bennet, D.D., an eminent Congregational divine, was born at Middlebury, Conn., July 10, 1783. His parents were in humble circumstances, and he worked on the farm until he was fifteen, when an accident disabled him so that it was resolved to send him to college. His own exertions, with some assistance from his father, enabled him to graduate at Yale College in 1804 free from debt. He was converted while at college in the great revival of 1802, studied theology with Rev. Asahel Hooker, and in 1808 was ordained over the Church in South Britain, Conn., where he remained fourteen years. From 1822 to 1828 he was president of Dartmouth College, also performing the duties of college pastor. In 1828 he succeeded Dr. Payson in the pastorate of the Second Church, Portland, Me., where he was greatly beloved. Dr. Tyler was a clear, logical,

and pungent preacher, and he specially delighted in doctrinal themes. About this time Prof. N. W. Taylor, of Yale Divinity School, enounced views which were regarded by many New England theologians as unsafe and unsound. Dr. Tyler was his principal opponent, and the long and able discussion which followed belongs to the history of controversy. To offset the influence of the New Haven theology on the young preachers in the state, the Theological Institute of Connecticut was founded at East Windsor in 1833, and Dr. Tyler was chosen its president and professor of theology. He held these positions until his resignation, July 16, 1857. He died at East Windsor, after only a few hours' sickness, May 14, 1858.

Dr. Tyler was a man of humble and sincere piety, and of a genial and sympathetic nature. In his theological opinions he did not embrace pure Calvinism, but as modified by Edwards and his school. He was in full sympathy with the traditional theology of New England, and was a straightforward controversialist, avoiding metaphysical speculations and verbal subtleties. In forming his system he began, not with mind, but with the Bible, and he looked for no advances in theology except such as come from a richer Christian experience. His writings are permeated by a spirit of practical religion, and, according to some, checked the influence of Dr. Taylor's views. Dr. Tyler published many sermons and controversial articles and pamphlets. His larger works are as follows: *History of the New Haven Theology in Letters to a Clergyman* (1837);—*A Review of Day on the Will* (1837);—*Memoir of Rev. Asahel Nettleton, D.D.* (Hartford, 1844, 12mo);—*Nettleton's Remains* (ibid. 1845, 12mo);—*The Sufferings of Christ Confined to his Human Nature* (N. Y. 1845);—*A Treatise on New England Revivals* (1846);—*Letters to Dr. Horace Bushnell on Christian Nurture* (1847-48);—*Lectures on Theology* (posthumous), with a *Memoir* by Rev. Nahum Gale, D.D. (his son-in-law) (Boston, 1859, 8vo). See *Cong. Quar. Rev.* 1860, p. 351 sq. (by A. H. Quint); *New-England*, August, 1859 (by Prof. Lawrence); Allibone, *Dict. of Brit. and Amer. Authors*, s. v.

Tyler, Edward Royall, a Congregational minister and author, was born at Guilford, Vt., Aug. 3, 1800. He was the son of chief-justice Tyler, two of whose sons became ministers in the Protestant Episcopal Church and one in the Presbyterian. Edward was converted while a clerk in a counting-house in New York, and under the ministry of Dr. Spring. He graduated at Yale College in 1825, studied theology, and was ordained pastor of the South Church in Middletown, Conn., in 1827. Here he was successful in building up the Church, but ill-health induced his resignation in 1832. He was next pastor in Colebrook, Conn., 1833-36. For a year Mr. Tyler was agent of the American Antislavery Society, and from 1838 to its discontinuance in 1842 he was editor of the *Connecticut Observer*. In 1843 the *New-England* was established under his proprietorship and editorship, and he continued in connection with it until his death, except during the periods of his prostration through illness. He died Sept. 28, 1848. Mr. Tyler contributed twenty-two articles to the first six volumes of the *New-England* (see these enumerated in that periodical, vi, 607). His other publications were, *Slavery a Sin per se*:—*Lectures on Future Punishment* (Middletown, 1829, 12mo);—*Holiness Always Preferable to Sin*: a Sermon (New Haven, 1829, 8vo). This opposed the position of some of the metaphysical divines of New England, that God sometimes preferred sin to holiness:—*The Doctrine of Election*: a Sermon (New Haven, 1831, 8vo);—*The Congregational Catechism* (ibid. 1844, 18mo). Tyler's writings are able, and some were thought at the time to be unsurpassed in their treatment of the subject in hand. Many were produced under the depressing influence of disease. "He was by nature, by culture, and by the grace of God, one of the best sort of men, in whom the elements of character are ennobled by faith and sanctified by devotion. We have

seen his uncomplaining patience, his uniform cheerfulness, his kindness and sympathy, his generous impulses, his childlike piety." See *New-England*, 1848, p. 603 sq. (by L. Bacon); *Cong. Quar. Rev.* 1866, p. 287.

Tyler, James Endell, an English clergyman, was born at Monmouth in 1789. He was educated at Oriel College, Oxford, where he became fellow, dean, and tutor. Presented to the rectory of St. Giles-in-the-Fields, London, in 1826, he became canon residentiary of St. Paul's in 1845. He died in 1852. He wrote, *Indices Attici* (Lond. 1824, 12mo);—*Oaths, their Origin, Nature, and History* (1834, p. 8vo);—*Conversations of a Father with his Children* (5th ed. 1840, 2 vols. 18mo);—*Primitive Church Worship* (1840, 8vo);—*A Father's Letters to his Son on Confirmation* (1843, 12mo);—*Worship of the B. V. Mary in the Church of Rome* (1844, 8vo);—*Image-worship of the Church of Rome* (1847, 8vo);—*Meditations from the Fathers of the First Five Centuries* (1849, 2 vols. 12mo);—*Rector's Address to his Parishioners* (1851, 8vo);—*Christian's Hope in Death*:—*Sermons* (1852, 8vo). See Allibone, *Dict. of Brit. and Amer. Authors*, s. v.

Tyler, Joseph D., a clergyman and instructor of the Protestant Episcopal Church, was born at Brattleborough, Vt. He graduated at Yale in 1829, and pursued a theological course at Alexandria, Va. His organs of hearing having become impaired by disease, he became connected with the Deaf-and-Dumb Asylum at Hartford, Conn., and subsequently became principal of the Deaf-and-Dumb Institution of Virginia. He died at Staunton, Va., Jan. 28, 1852. He was an excellent scholar, and made some graceful contributions to the literature of the day. See *Amer. Quar. Church Rev.* 1852, p. 142.

Tyler, William, a Congregational minister, was born at Attleborough, Mass., Jan. 7, 1780, and was educated at Brown University in the class of 1800. For some time after leaving college he was engaged in secular pursuits. Having decided to study theology, he placed himself under the tuition of Rev. Dr. Emmons, of Franklin, Mass., and was licensed to preach in 1818. He was ordained in 1819 as junior pastor of the Congregational Church in South Weymouth, Mass., soon becoming sole pastor. He remained thirteen years in this place (1819-32). He removed to South Hadley Falls, Mass., in 1832, and was pastor of the Church in that place seven years (1832-39). For several years he performed missionary service, under the direction of the Home Mission Society, in the interior of Massachusetts, having his residence at Amherst. He removed to Northampton, Mass., in 1847, and became the editor of the *Courier*, published in that place. For several years he resided in Pawtucket, R. I., and represented that town in the convention which met in 1853 to revise the State Constitution. He removed to Aburudale, Mass., in 1863, where he spent the remainder of his life, and where he died Sept. 27, 1875. "He was well instructed," says Prof. Gammell, "in theology, and was particularly interested in local history and antiquities, and on these subjects he was a frequent contributor to magazines and newspapers." (J. C. S.)

Tympānum, the triangular space between the horizontal and sloping cornices on the front of a pediment in classical architecture; it is often left plain, but is sometimes covered with sculpture. This name is also given to the space immediately above the opening of a doorway, etc., in mediæval architecture, when the top of the opening is square and has an arch over it; this arrangement is not uncommon in England in Norman work, and on the Continent is to be found in each of the styles. Tympanums of this kind are occasionally perfectly plain, but are generally ornamented with carving or sculpture. In Continental work the subjects are usually arranged in tiers one above another, and often embrace a great number of figures. Also when an arch is surmounted by a gable-moulding or triangular hood-

Tympanum of Doorway, Essendine, Rutlandshire, cir. 1130.

mould, the space included between the arch and the mould is termed the *tympanum* of the gable.—Parker, *Gloss. of Architect.* s. v.

Tympe, JOHANN GOTTFRIED, professor of theology and Oriental languages at Jena, was born in 1699 at Biederitz, near Magdeburg, and died June 28, 1768. He wrote, *Forma Verborum Perfectorum Hebraicorum, Chaldaicorum, Syriacorum atque Arabicorum Communis et Harmonica in Tabulis Compendio Exhibita et Descripta* (Jena, 1728-32).—*Progr. quo Indistinctum Antiquorum Ebraeorum Scripturam esse recens Commentum Morinianum, Certitudina Dicinarum Literarum longe Perniciosissimum Ostendit* (ibid. 1730).—*Tabulae Universae Accentuationis Hebr.-Chald. tum Pros. tum Metr.* (ibid. 1740).—*Geneseos Prima quinque Capita et Partem Secti Hebraice et Singularum Vocum Rationem Grammaticam Secundum Principio Danziano exposuit in Usus Auditorum* (ibid. 1727).—*De Cultu Divino ad Stata Loca Restricto*, etc. (ibid. 1728).—*Schediasma, quo Iterandae Editiones Concordantiarum Ebraeo-Chaldaicarum Chr. Noldii Novique Conc. Pronominum*, etc. (ibid. eod.).—*Forma Arabicorum Verborum Perfectorum Descripta* (ibid. eod.).—*Diss. I et II de Descensu Nubis Glorise in Sanctuarium ante Consecrationem Aaronis Facto, adversus Talmudistas et Veteres Ebraeorum Commentatores* (ibid. 1731-33), etc. See Fürst, *Bibl. Hebr.* iii, 456; Winer, *Handb. der theol. Lit.* i, 115, 121; Steinschneider, *Bibliog. Handb.* p. 141. (B. P.)

Tyndale (or Tindal), WILLIAM, the Bible translator and martyr, was born in the hundred of Berkeley, either at Stinchcomb or North Nibley, Gloucestershire, about the year 1484 (or 1477). At an early period he was sent to Oxford, where he took his degree, and also gave instructions in Magdalen Hall. But he left Oxford for Cambridge, where it is believed that he took a degree. In 1502 he obtained priest's orders, and in 1508 entered the monastery at Greenwich as a friar. He seems to have already formed the design, or even to have actually begun the work, of translating the New Test., and had probably imbibed some of the notions which were beginning to be circulated in favor of reforming the Church. In 1522 (or 1520) Tyndale is next found as tutor in the house of Sir John Welch, of Little Sodbury, not far from Bristol, where he preached in the villages and towns on the Sabbath, and often disputed with neighboring abbots and other Romish ecclesiastics. Here, too, he translated the *Enchiridion Militis* of Erasmus, as a present to his host and his lady. His free opinions and discussions soon got him into troublesome examinations before the popish dignitaries, but no penalty was inflicted on him. He took the hint, however, left the county, and went to London, his mind being now fully occupied with the idea of translating the Scriptures. He soon found, as he himself quaintly says, "that there was no room in my lord of London's palace to translate the New Test.; nay, no place to do it in all England." In London he sometimes preached at St. Dunstan's-in-the-West, while alderman Humphrey Monmouth took him under his protection, and gave him an annuity of ten pounds a year to enable him to live abroad, for which ten pounds

he was in return to pray for the souls of the alderman's father and mother. Tyndale on leaving England went first to Hamburg. It is often said that from Hamburg he proceeded to Wittenberg, where he met Luther, who had now thrown off the last vestige of popish thralldom, and that there he completed his translation of the New Test. The statement is apparently not correct, for during 1524 he seems to have remained at Hamburg, and in 1525 he appears to have been first at Cologne and then at Worms. At Cologne Tyndale seems to have commenced to print his first edition in 4to, but after ten sheets were printed the work was interrupted, and the translator and his coadjutors betook themselves to the Lutheran city of Worms, where the quarto was finished, and an octavo edition also issued from the press (1525). The prologue to the quarto has been republished under the name of *A Pathway to the Scriptures*. The translator's name was attached to neither of the two editions, and he assigns a reason for this omission in his *Wicked Mammon*, published in 1527. Copies of these versions early found their way into England. In 1526 Tunstall, bishop of London, fulminated his prohibition of them, and two years afterwards a number of copies were collected, nay, some were purchased by the bishop in Antwerp, and burned at St. Paul's Cross. Warham and Wolsey were also dreadfully enraged, and Sir Thomas More was employed to denounce Tyndale, but his genius was foiled in the attempt, and Tyndale won a victory over the learned chancellor. Of the first edition only a fragment now exists, and of the second only two copies, one of them imperfect. Two editions were afterwards printed at Antwerp, and found their way to England in vessels laden with grain. Endeavors were made to seize Tyndale and punish all who had assisted him, but he removed to Marburg, in Hesse, in 1528, and published there a book of great value—*The Obedience of a Christian Man*. The result of all the English opposition was that, as Fox expresses it, "copies of the New Test. came thick and threefold into England." We find Tyndale again at Antwerp in 1529, during which year a fifth edition was printed; the four books of Moses were also translated, printed each at a separate press, and put into circulation. The enemies of the translator endeavored to decoy him into England, but he was too wary to be so easily entrapped, for he well knew what displeasure Henry VIII felt at his tract called *The Practice of Prelates*, and what penalty the royal indignation would speedily inflict. After the martyrdom of Frith, Tyndale set himself to revise and correct the version of the New Test., and it was soon thrown off, with this remark in the preface, "Which I have looked over again with all diligence, and compared with the Greek, and have wedded out of it many fautes." But his enemies in England, whose power had been shaken by the copious circulation of the English New Test., were the more enraged against him, and conspired to seize him on the Continent, in the name of the emperor. An Englishman named Philips betrayed him, and, acting under such information, the authorities at Brussels seized him, in the house of Pointz, his friend, and conveyed him to Vilvoorden, twenty-three miles from Antwerp. Pointz, who had with difficulty escaped himself, made every effort for him, but in vain. The neighboring University of Louvain thirsted for his blood. Tyndale was speedily condemned, and on Friday, Oct. 6, 1536, in virtue of a recent Augsburg decree, he was led out to the scene of execution. On being fastened to the stake, he cried, in loud and earnest prayer, "Lord, open the eyes of the king of England," and then was first strangled and afterwards burned. The merits of Tyndale must ever be recognised and honored by all who enjoy the English Bible—for their authorized version of the New Test. has his for its basis. He made good his early boast that ploughboys should have the

Word of God. His friends all speak of his great simplicity of heart, and commend his abstemious habits, his zeal, and his industry; while even the imperial procurator who prosecuted him styles him *homo doctus, pius, et bonus*. The works of Tyndale and Frith were collected and published (Lond. 1831, 3 vols. 8vo). For information respecting Tyndale, his writings, and editions of his translations of the Testament, Pentateuch, etc., see Bliss's *Wood, Athen. Oxon.* i, 94; Fox, *Acts and Mon.*; *Biog. Tyndareus, in Greek mythology, was the husband of the renowned Leda, and was king in Sparta, from which he was driven with his brother Icarus. Hercules placed the fleeing brothers again in possession of their kingdoms. Pausanias saw his grave in Lacedæmonia before the temple of Jupiter Cosmetes (iii, 17, 4).

Tyndarides, in Greek mythology, was a surname of the *Dioscuri*.

Tyndaris, in Greek mythology, was a surname of *Helén*.

Tyng, DUDLEY A., a clergyman of the Protestant Episcopal Church, was born in Prince George County, Md., in 1825. He graduated at the University of Pennsylvania in 1843; studied at the Alexandria (Va.) Theological Seminary; became deacon in 1846 and priest in 1849; was first settled as a clergyman in Columbus, O., and afterwards was rector of Christ Church, Cincinnati; in 1854 was pastor of the Church of the Epiphany, Philadelphia, where he remained one year, resigning and organizing a new parish called the Church of the Covenant, of which he was minister at the time of his death, which occurred at Brookfield, near Philadelphia, April 19, 1858. See *American Quar. Church Rev.* 1858, p. 344.

Type. I. *Name*.—The Greek word *τύπος*, from which our *type* is derived, denotes primarily a *blow*, then the *mark left by a blow*, then a *mark or print of any kind*, then a *figure or image*, and finally a *mould or model*, whether that be viewed as the original from which something else has taken its form, or as indicating the form which something not yet existing may assume. In the New Test. the word occurs in several of these senses, and in some passages with a shade of meaning peculiar to itself. In John xv, 25 it is used to denote the mark which the nails made in our Lord's hands and feet; in Acts vii, 43 it means a copy or image; in ver. 44 and Heb. vii, 5 it signifies a model after which something is made; in Rom. vi, 17 it denotes a mould from which a form is derived; in ver. 14 it conveys the idea of one person presenting some analogy to another person; and in several places it means an example which others may follow (1 Cor. x, 6, 11; Phil. iii, 17; 1 Thess. i, 7; 2 Thess. iii, 9, etc.).

As used by theologians, the word *type* has received a special technical meaning not exactly equivalent to any of these usages, though approaching to that of Rom. vi, 14, where Adam is said to be the type of Christ. They mean by it any object, whether office, institution, person, or action, by means of which some truth connected with Christianity was prefiguratively foretold under preceding dispensations. Such an object the apostles call a *σκιά*, a shadow or adumbration of that which it indicated (comp. Heb. x, 1; Col. ii, 17). This shadow became a type because it presented the model or representation of something yet future. Some-

times, also, the term *παράβολή* is used with a similar meaning (Heb. ix, 9; xi, 19).

II. *Fundamental Principles*.—There are certain notions which must be assumed as lying at the basis of typology.

1. Spiritual truths, ideas, thoughts, may be represented by material symbols, whether actions, institutions, or objects. This the usage of all nations establishes. More especially was this a favorite method of communicating thought among the imaginative Orientals; in general, it is found to prevail most in the earlier stages of a people's history, while as yet the use of objects that appeal to the senses is more effective than the use of written documents. In Scripture, frequent instances occur of such symbolical methods of conveying ideas; as, for instance, the placing of the hand under the thigh for confirmation of an oath; the boring of the ear of the servant who declined to avail himself of the liberty brought by the year of jubilee; the rending of the garments in token of grief; and such acts as those of Abijah when, in announcing to Jeroboam the secession of the ten tribes from the house of Solomon, he tore his garment into twelve pieces and gave to Jeroboam ten (1 Kings ix, 29); that of Elisha when he indicated to the king of Israel the victories which by divine help he should obtain over the Syrians by commanding him to shoot an arrow from the window eastward after he had placed his hand on the king's hand (2 Kings xiii, 14–19); and those of Jeremiah and Ezekiel when they were signs to the people (Jer. xix, 1–11; Ezek. xii, 3–16).

2. Such symbolical representations may be employed to convey religious truth. This usage we find also to have prevailed among all nations, especially in the earlier stages of their history. Among the Jews it was abundantly used; not, however, according to human caprice or ingenuity, but always in obedience to the express ordinance of God. The symbolical observances of an earlier age introduced into the service of God, it may be presumed, were also of divine appointment, on the general principle that, as God alone can declare what worship he will receive, it is only as he appoints that any service can be properly offered to him.

3. The true religion has in all ages been essentially the same, so that the truths symbolized by the institutions of the earlier dispensations are identical with those more directly and fully made known to us under the Christian dispensation. The substantial identity of the patriarchal and Mosaic religions with the Christian must be assumed in all attempts to argue from the Old Test. to the New, or *vice versa*, and will not be denied by any who receive these books as divine. From this it necessarily follows that what was taught by *symbol* under the ancient economies as part of religious truth will be found identical with what is taught in *words* under the new dispensation.

4. The religion of Jesus Christ is one resting on the facts of his personal appearance and work. Out of these all its truths flow directly or indirectly; and to these they all have respect. Hence the truths taught symbolically to the Old-Test. saints, being identical with those of Christianity, must also rest on, and have respect to, these facts.

5. A twofold character was thus of necessity given to the religious institutions of the ancient economies. They were primarily symbolical of religious truth. They were secondarily predictive of facts in the future on which these truths rested.

III. *Nature of Types*.—Proceeding on these data, we may attempt to construct a typology, the design of which shall be to show what are the types in the Old Test. and the correspondence between them and their antitypes in the New Test. The most important step towards this is to determine from the preceding data what is the proper idea of a type. This we would express as follows: A type is an institute or act appointed by God to symbolize a religious truth, and to prefigure

by means of analogy or resemblance those facts in the mediatorial work of Christ on which these truths rest. This definition involves the following elements:

1. A type is an *institute* or *act*. We use these terms in a wide sense, understanding under the former not only formal organizations and religious offices, but times, places, implements of religious service; and under the latter not only rites and ceremonies, but special acts or series of acts determined by the proper criterion to be typical. By this definition, however, *persons* and *things* simply as such are excluded. A person *per se*, or a thing simply as such, cannot possess a symbolical character; and cannot be the *σκιά*, or prefigurative sign, of another person or thing, much less of a fact or series of facts. A person may sustain a typical office or may perform a typical act, and a thing may be used in a typical service or ceremony, but in and by itself it cannot be a type. This sets aside a whole host of types which the ingenuity of interpreters has constructed out of the historical personages of the Old Test. That many of these sustained typical offices and performed typical acts is admitted; but that they were in themselves—in their proper individual personality—types of our Lord, we cannot believe. The assertion, indeed, is to us unintelligible except in a sense which would be profane and untrue—viz, that their personal character and conduct were a representation of the character and conduct of our blessed Lord. It is true that for this doctrine of personal types the authority of the New Test. has been pleaded. But we are unable to find a solitary instance in the New Test. of any historical character mentioned in the Old Test. being brought forward as having been personally a *σκιά* of Christ or his work. In one passage, indeed, Adam is called a *τύπος* of Christ, but *τύπος* is not there equivalent to *σκιά*; and, even if it were, it would not follow that it was Adam as a *person* who was the type of Christ, for the apostle is speaking throughout that context of our first parent in his official, federal, or representative character. The words of Peter also (1 Pet. iii. 21) have been cited as showing that a simple historical occurrence may be the type of a Christian truth; but, whatever the apostle may mean in that passage by calling salvation by baptism the *ἀντίτυπον* of Noah's salvation by the ark, he certainly cannot mean that the latter was a divinely appointed prefiguration of the former. The utmost that can be drawn from his words is that an analogy subsists between the two, whereby the one is fitted to illustrate the other. The strongest case in favor of the opinion we are opposing is our Lord's representation of himself as the true bread of which the manna was the prefiguration. We cannot understand this as intimating less than that the manna was a type of him. Still it was the manna, not as a natural phenomenon, but as a special and peculiar provision made by God for the feeding of the people, that was the type of Christ; and in this divine appointment we find what reduces this under the head of proper types.

2. A type is an institute or act *appointed by God*, and by him adapted to the end it is designed to serve. Knowing what in due time was to be exhibited to men by the mission and work of his Son, God could not only predict it in words, but also give by means of symbolical acts and institutes such representation of it as would, in some measure at least, bring before the minds of the ancient saints a lively idea of it. As God alone could do this, it is on his appointment that the whole must rest. "To constitute one thing the type of another, as the term is generally understood in reference to Scripture, something more is needed than mere resemblance. The former must not only resemble the latter, but must have been *designed* to resemble the latter. It must have been so designed in its original institution. It must have been designed as something *preparatory* to the latter. The type as well as the antitype must have been preordained; and they must

have been preordained as constituent parts of the same general scheme of Divine Providence. It is this *previous design* and this preordained connection which constitute the relation of type and antitype" (Marsh, *Lectures on Criticism and Interpretation*, p. 374). By the earlier typologists this condition was neglected, and resemblance was made the sole criterion of the relation between an event or person of the Old Test. and a fact or doctrine of the New Test. as type and antitype. A once popular book written on this plan is that of McEwen, *On the Types and Figures of the Old Test.* But the principle has been carried out to the wildest extent in a work entitled *The Typical Testimony to the Messiah*, by Micahail Hill (Lond. 1862).

3. Each act or institute designed by God to serve as typical possessed a *symbolical* as well as a *predictive* character. This follows from the position that a type is a sensible emblem or prefigurative token of some spiritual truth, which itself rests upon certain events yet future, but of which events a certain degree of knowledge is possessed by those to whom the type is exhibited. In all such cases a twofold impression is conveyed to the mind: in the first place, that a particular truth already known is symbolically indicated; and, in the second place, that those events on which that truth depends shall certainly take place. In the testimony of God concerning his Son there are two points—one of fact, and one of doctrine—on both of which we must be instructed before we can really believe that testimony in all its fulness. What God calls us in the Bible to believe is, first, "the truth;" and, secondly, that "truth as it is in Christ Jesus." With regard, for instance, to the doctrine of salvation by the atonement, there is, first, the general principle that such a mode of salvation is reasonable, practicable, and intended by God; and, secondly, the matter of fact that such an atonement has really been presented by our Lord Jesus Christ and accepted by the Sovereign and Judge of all. Now it was, of course, the same under the Old-Test. dispensation: there were both the doctrine to be announced and the fact to be predicted before a complete statement of saving truth could be laid before the mind; and it was only as both of these were apprehended that the belief of a Jew in the truth became full and intelligent. Hence every type contained at once a symbol of the truth and a prediction of the fact. It presented to the senses of the beholder an outward sign of a great general truth, and a memorial that in due season the event on which that truth rested would take place. Thus, for instance, in the case of sacrifice, there were both a symbol and a prediction. The slaying of the animal and the burning of its flesh were emblems of the great truth that the sinner whose substitute that animal had become deserved death and subsequent agony, as well as of the general truth that God's plan of saving men from that desert was by the substitutionary sufferings of another. All this, however, would have been of no avail to the sin-burdened Israelite, who knew well that no mere animal could make atonement for the sins of man, had not that act prefigured and predicted the great sacrifice for sin on the part of the Lamb of God. But, pointed forward to this, his faith obtained an object upon which to rest, and he was enabled to rejoice in the salvation of God. So, also, with regard to the immediate consequences of sacrifice. When a Jew had committed a trespass against the Mosaic law, he had to offer certain sacrifices before he could enjoy his civil and political rights. Immediately, however, on presenting these, he stood *rectus in curia*; he was acquitted of the sin he had committed, and restored to his civil privileges. With this a mere carnal and worldly Jew was content. But to the pious believer all this was only the symbol and type of something spiritual. It reminded him that his sins against God had made him guilty and excluded him from the divine favor; it directed him to the need of a sacrifice for sin ere God would forgive his transgression; and it

assured him that, just as by sacrifice he had been restored to his place in the Jewish State, so by the great sacrifice he might be restored to the divine favor, and to a place in that spiritual kingdom of which the Jewish nation was the type.

4. Though *resemblance* to that which it is designed to prefigure does not constitute the only, or even the primary, condition of a type, it is obvious that this must form a very important element in the adaptation of the type to serve its designed end. Hence we may expect to find some obvious analogy not only between the symbol and that which it symbolizes, but also between the divinely appointed act or institute and that which it was designed to prefigure.

On the other hand, as there must be a similarity or analogy between the type and the antitype, so there is also a *disparity* or dissimilitude between them. It is not in the nature of type and antitype that they should agree in all things; else, instead of similitude, there would be *identity*. Hence the apostle, while making Adam a type of Christ, yet shows how infinitely the latter excelled the former (1 Cor. xv, 47). So the priests of old were types of Christ, though he infinitely excelled them both as to his own person and as to the character of his priesthood (see Heb. vii, viii, ix, x). Chrysostom observes (*Hom.* 61, *in Gen.*) that there must be more in the type than in the antitype. Hence the distinction must be observed between *total* and *partial* types. This distinction (Eumenius also draws in commenting on Heb. vii, p. 829. He says: 'Ο τύπος οὐ κατὰ πάντα ἴσος ἐστὶ τῇ ἀληθείᾳ (ἐπεὶ καὶ αὐτοῦς ἀλήθεια εὐρίσκειται, καὶ ταυτοῦτος μᾶλλον, ἢ τύπος), ἀλλ' εἰκόνας ἔχει τινὰς καὶ ἠνάγχα—“A type does not express that which it represents in every minute particular, for then, instead of similitude, there would be identity, but it contains certain outlines and assimilations of the antitype.” Cyril of Alexandria, *in Amos* vi, p. 315, also observes on this subject: 'Ο τύπος οὐκ ἀλήθεια, μὴ ὅσῳν δὲ μᾶλλον τῆς ἀληθείας εἰσέρχεται—“A type is not the very truth itself, but its representation.”

IV. *Relation to other Modes of Teaching.*—Having thus indicated the nature of a type, we would now point out the relation of this mode of teaching divine truth to other modes employed in Scripture more or less akin to it.

1. *Relation to Prophecy.*—Type stands related to prophecy as its parallel. Like it, it teaches a present truth, and announces a future fulfilment of it: like it, also, it has in its capacity of a type one definite meaning and one definite fulfilment, to both of which it was intended and designed to point. The difference between a prophecy and a type lies only in this, that the former teaches by words, the latter by things; the former, that is, by an artificial combination of signs, the latter by a scenical representation of the whole truth at once. A word is the symbol of an idea; a type is the symbol of some principle or law, and the prediction of some great general fact in the economy of redemption. See PROPHECY.

2. *Relation to Parable.*—From the word *παραβολή* being used to designate a type, it may be inferred that the connection between the two is intimate. A type, in fact, may be viewed as a sort of *acted parable*. Let us suppose, for instance, that our Lord, instead of describing in words the conduct and circumstances of the prodigal son, had, by the help of suitable actors and scenes, made the whole to pass before the eyes and ears of his auditors, the lesson would have been conveyed to them much in the same way as the truth concerning himself was conveyed to the ancient Jews by the typical rites of the Mosaic economy. In neither case is the lesson *new*, nor fully to be understood without an elucidatory comment; the object of both being to impress vividly a truth, otherwise reasonable or familiar, upon the minds of those to whom it is presented. There is this difference, however, between such a representation

and a type—that the former, being merely doctrinal, would be exhausted in inculcating a present truth, while the latter would, with the doctrine, incorporate a prophetic reference to some great event yet to happen on which the doctrine was based. See PARABLE.

3. *Relation to Comparison.*—The New-Test. teachers occasionally, for the sake of illustrating their meaning, introduce a comparison, drawn from some well-known fact in the history of the Jewish people, between which and the point they are discussing there exists some obvious analogy. In this way our Lord makes use of the fact of Moses' erecting the brazen serpent in the wilderness for the purpose of illustrating his own character as a deliverer, who was to be “lifted up, that whosoever believeth in him should not perish, but have everlasting life” (John iii, 14, 15). On another occasion he instituted a comparison between his own case, as about to be consigned for a season to the tomb, and that of Jonah, who had been “three days and three nights in the belly of the fish” (Matt. xii, 40). From this it has been hastily concluded that these events, and others alluded to in the New Test. in a similar manner, were real types and prefigurations of the facts they are brought to illustrate. It is obvious, however, that there is a great difference between a historical event—whether occurring in the natural course of things, or by the special interposition of the divine power, and which a subsequent writer or speaker may make use of to illustrate, by comparison, some fact or doctrine of which he is treating—and a symbolic institute expressly appointed by God to prefigure, to those among whom it was set up, certain great transactions in connection with that plan of redemption which, in the fulness of time, he was to unfold to mankind. In the two cases above referred to there is the absence of any express evidence that the events recorded possess any other than a simple historical character. In the case of the brazen serpent, indeed, we have divine appointment; but along with the appointment we have the specific mention of the purpose for which it was set up, which was not to teach any religious truths at all, or to form any part of religious worship, but simply that it might act as an instrument of cure to the Israelites who were bitten by the fiery flying serpents. See BRAZEN SERPENT. Yet even in this case it is clear from the whole tenor of the narrative that the act was significant of more than a mere physical remedy; and our Lord's reference to the event confirms its higher import. It is also possible that such a thing as the brazen serpent *might* possess a symbolical character; but if any will from this argue that it really had such a character, and that it was a symbol of Christ, it will be incumbent upon him, in the first place, to show some evidence in favor of his inference, and, in the next, to explain how it should come to pass that the express symbolical antithesis of the Messiah, the *serpent*, could form part of an institute intended to prefigure his work as the Saviour of men. As to the case of Jonah, we do not find in it so much as the appearance of anything typical; and, indeed, it would have been very strange had God caused the prophet to perform an action typical of the burial and resurrection of Christ, under circumstances in which there was no human being to receive any instruction by it except himself. A type is an acted lesson—a visible representation of invisible truths. To its utility, therefore, spectators are as indispensable as actors; and where the former are not present, to say that God appoints the latter to go through their performance is to charge him with doing something in vain. See SIMILITUDE.

4. *Relation to Allegory.*—“An allegory,” says bishop Marsh, “according to its original and proper meaning, denotes a representation of one thing which is intended to excite the representation of another thing.” Adopting this as a just explanation, it is obvious that type and allegory are closely allied. In both there is an original representation which has a meaning of its own, and there is the use of that for the purpose of calling up

to the mind the conception of another thing analogous to the former. The two, however, are very distinct. They differ in two respects: the one is that the subject of an allegory is a mere historical event occurring in the ordinary course of things, whereas a type is an act or institute expressly appointed by God to teach some important truth; the other is, that the allegorical sense is a fictitious meaning put upon a narrative for the sake of illustrating something else, whereas the explanation of a type is its true and only meaning, and is adduced solely for the sake of unfolding that meaning. Thus Paul, in order to explain the doctrine of the covenants, allegorizes the anecdote of Sarai and Hagar recorded by Moses, making Sarai represent the Abrahamic or new or everlasting covenant, and Hagar the Sinaitic or old covenant (Gal. iv, 24, 25). In the same way he allegorizes the fact of the water from the rock following the Israelites through the wilderness, speaking of it as representing Christ in the blessings he confers upon his church (1 Cor. x, 4). These allegorizings (*ἀλληγοροῦμεν*) are only comparisons without the form; and their use is obviously merely to explain one thing by another. The radical difference between the exposition of a type and an allegorical interpretation of history, is apparent from the use which the apostle makes of them respectively. His allegorizings are mere illustrations on which, by themselves, nothing is built; whereas his typical explanations are all brought forward as forming the basis of arguments addressed to those who, admitting the type, were thereby pledged to the admission of the truths it embodied. See ALLEGORY.

V. *Interpretation of Types*.—As a general rule it may be laid down that we should always expect to find in the antitype something higher and more glorious than in the type (Chrysost. *in Genes. Hom. 35: μή πάντα ἀπαιτεῖν ἐν τῷ τύπῳ· οὐδὲ γὰρ ἂν εἴη τύπος εἰ μὲλλον πάντα ἔχειν τὰ τῇ ἀληθείᾳ συμβαινόντα*). This follows from the nature of the case. For if the design of a type be by outward symbols to foreshadow spiritual truths, it follows that, in proportion as the thing signified is more valuable than the mere sign, and as things spiritual and eternal are more glorious than things material and transitory, the type must be inferior in value and in majesty to that which it is designed to prefigure.

More specific rules having reference especially to the Mosaic ritual are—1. The symbolical ritual, as a whole and in its individual parts, can set forth only such ideas and truths as accord with the known, and elsewhere clearly announced, principles of Old-Test. theology. 2. An accurate knowledge of the outward constitution of each symbol is an indispensable condition of its interpretation; for, as the sole object of the symbol is to convey spiritual truth by sensible representations, to attempt to discover the former before we understand the latter is to endeavor to reach an end without using the means. 3. The first step in the interpretation of a symbol is the explanation of its *name*; for, as this is generally given with a direct reference to the idea symbolized, it forms of itself a sort of exponent of the symbol to which it is affixed. 4. Each symbol expresses, in general, only *one* grand idea; at the same time, of course, including all subordinate ideas that may be involved in it. Thus, in the case of sacrifices, a variety of truths are presented to the mind, but all going to make up the one grand truth which that rite symbolized. 5. Each symbol has always the same fundamental meaning, however different may be the objects with which it is combined. Thus, for instance, the act of purification has the same symbolical meaning, whether it is performed upon a person or an animal, or upon a material object. 6. In interpreting a symbol, we must throw out of view all that is merely necessitated by the laws of its physical condition, and that does not serve to help out the symbolical representation. Symbols have often accessories of two kinds: the one consisting of such as are in themselves symbolical, and which go to make up the sum total of the representation; the other, of such as are,

from the nature of things, required by the material objects composing the symbol for their continued existence. Thus, in the case of the candlestick in the sanctuary, it was provided that it should have branches and knobs and flowers, and also that it should be supplied with snuffers and snuff-dishes. Now, of those accessories the former were not indispensable to its serving the purpose for which it was designed—that of giving light; but they, having each a symbolical meaning, added to the symbolical effect of the whole; whereas the latter were merely required in order to prevent the lights from dying out for want of cleansing. Keeping this distinction in view, we need not be afraid of going too minutely into the explanation of the Mosaic ritual. Everything, in fact, of which it was composed was a symbol, with the single exception of such things as the earthly, physical condition of the substance or persons employed rendered indispensable. Nay, even these, from belonging to a typical institute, such as the nation of Israel was, acquired a sort of secondary typical character; just as the ordinary events of Israelitish history have for the same reason a spiritually doctrinal character. See SYMBOL.

VI. *Examples of Types*.—In tracing out *who* and *what* typified or shadowed forth Christ and his salvation under the antediluvian, patriarchal, and Mosaic dispensations, we must be careful not to substitute the suggestions of our own imaginations for the intimations of Scripture. We must endeavor to learn the mind of God as to what actually constitutes a type, either by the express declarations of Scripture, or by the obvious analogy which subsists between things under the Gospel and its antecedent dispensations. Thus guarding ourselves, we may notice the various types by which God was pleased, at all times, in a sense, to preach the Gospel to mankind.

1. Among *individual persons*, before the law, Adam, Enoch, Noah, Melchizedek, Abraham, Isaac, and Joseph were eminently typical of Christ, but only in certain relations. Again, under the law, Moses, Joshua, Samson, David, Solomon, Elijah, Elisha, Jonah, Zerubbabel, and Joshua the high-priest were, in many points, singularly types of Christ.

2. The first-born, the Nazarites, prophets, priests, and kings were *typical orders of persons*.

3. Under the head of *things typical* may be noticed: Jacob's ladder, the burning bush, the pillar of cloud and fire; and, in the opinion of some, the manna, the rock, and the brazen serpent.

4. *Actions typical* were: the deliverance out of Egypt, the passage of the Red Sea, the sojourn in the wilderness, the passage over the Jordan, the entrance into Canaan, and the restoration from Babylon.

5. *Rites typical* were: circumcision, various sacrifices, and sundry purifications.

6. *Places typical* were: the land of Canaan, the cities of refuge, the tabernacle, and the temple.

The above types were designed to shadow forth Christ and the blessings of his salvation; but there were others also which pointed at our miseries without him. There were ceremonial uncleannesses: the *leprosy*, for instance, was a type of our natural pollution.—KITTO.

See Michaelis, *Entwurf der typischen Gottesgelehrtheit* (Gött. 1763); Keach, *Tropologia*, p. 225–237; Suicer, *Thesaur.* ii, 1337; Mather, *Types of the Old Test.* (Lond. 1705); Bähr, *Symbolik des mosaischen Cultus* (Heidelb. 1837, 2 vols.); Chevallier, *Hulsean Lecture* for 1826; Fairbairn, *The Typology of Scripture* (Edinb. 1854, 2 vols.); and other works cited by Darling, *Cyclop. Bibliog.* col. 1803 sq., and by Malcom, *Theol. Index*, s. v. See MESSIAH.

Typhoeus=TYPHON (q. v.).

Typhon (*Typhos, Typhoen, Typhoeus, and Typhaon*), in Greek mythology, was a monster of remote antiquity, at one time thought to have been a destructive gale of wind, at another time represented as a giant of

the earth, ejecting volcanic flames. Homer places him in the country of Arim, buried in the earth, which Jupiter strikes with lightning. Hesiod represents Typhaon and Typhoeus as two different and distinct beings. Typhaon is the son of Typhoeus, a mighty wind, who with Echidna begets the dog Orthrus, Cerberus, the Lernaean hydra, and Chimæra. Typhoeus is the youngest son of Tartarus and Gaia, with one hundred dragon-heads, frightfully sparkling eyes, and hideous voice. He attempted to gain sovereignty over gods and men, but Jupiter bound him with lightning, and he now lies under Ætna. In Egyptian mythology Typhon is the Greek name for the evil spirit represented by the dog-star, originally the influence that brought to Egypt the blessing of a yearly overflow of the banks of the river Nile, without which the country could not flourish. When the worship of Isis and Osiris came into practice, the dog-star was designed to be the destroyer of the life of nature by heat, and now Typhon became an evil god, whose names and titles upon monuments were destroyed, because he was believed to be the enemy and persecutor of Osiris (q. v.). Typhon owned Nephthys as his wife, who by him gave birth to Anubis. His real Egyptian name is stated differently as *Set* or *Sutekh*.—Vollmer, *Wörterb. d. Mythol.* s. v.

Typhrestus, in Greek mythology, was the son of Sperchius, after whom a city in the Trachinian province was named.

Týpikon (Gr. Τύπικον), a Greek term for (1) a book of rubrics; (2) a selection from the Psalter; (3) a Sunday service in the Oriental Church.—Lee, *Gloss. of Liturg. Terms*, s. v.

Tyr, in Norse mythology, is one of the supreme deities of Northern antiquity, a son of Odin and Frigga, and brother of Thor. As the god of boldness, wisdom, and strength, he was implored by the Heliandians as well as by the Skaldians for his favor, and was worshipped with Thor and Odin. At the end of the world he will combat with the hell-dog Garm, and each will kill the other. Several antiquarians are inclined to identify him with Tuiskon.

Tyran'nus (Τύραννος, *sovereign*), the name of a man in whose school or place of audience Paul taught the Gospel for two years, during his sojourn at Ephesus (see Acts xix, 9). A. D. 52, 53. The halls or rooms of the philosophers were called *σχοলাί* among the later Greeks (Liddell and Scott, s. v.); and as Luke applies that term to the *auditorium* in this instance, the presumption is that Tyrannus himself was a Greek, and a public teacher of philosophy or rhetoric. He and Paul must have occupied the room at different hours; whether he hired it out to the Christians or gave them the use of it (in either case he must have been friendly to them) is left uncertain. Meyer is disposed to consider that Tyrannus was a Jewish rabbi, and the owner of a private synagogue or house for teaching (צִיּוּן בֵּית־רַבִּי). But, in the first place, his Greek name, and the fact that he is not mentioned as a Jew or proselyte, disagree with that supposition; and, in the second place, as Paul repaired to this man's school after having been compelled to leave the Jewish synagogue (Acts xix, 9), it is evident that he took this course as a means of gaining access to the heathen; an object which he would naturally seek through the co-operation of one of their own number, and not by associating himself with a Jew or a Gentile adherent of the Jewish faith. In speaking of him merely as a certain Tyrannus (Τυράννον τινός), Luke indicates certainly that he was not a believer at first; though it is natural enough to think that he may have become such as the result of his acquaintance with the apostle. Hensen (*Der Apostel Paulus*, p. 218) throws out the idea that the hall may have belonged to the authorities of the city, and have derived its name from the original proprietor.—Smith. See Seelen, *De*

Schola Tyranni, in his *Meditt. Ereg.* ii, 615 sq.; Wallen, *Acta Pauli Ephesin.* (Gryph. 1783). See PAUL.

Tyrannus, in Greek mythology, was one of the Pterclaide, who were slain in the contest against the sons of Electryon.

Tyrbenus, in Greek mythology, was a surname of Apollo.

Tyre (Heb. *Tsôr*, צֹר [or צָר, 1 Kings v, 1; Psa. lxxxiii, 7; lxxxvii, 4; Ezek. xxvi, 15; xxvii, 3, 8, 32; xxviii, 12; Hos. ix, 13; Zech. ix, 3; the form likewise found in inscriptions, Gesenius, *Monum. Phæn.* p. 261]; Sept., New Test., Josephus, and other writers, *Τύρος*; A. V. "Tyrus" [q. v.] in Jer., Ezek. [usually], and the minor prophets [except Joel]; see also TYRIAN), a celebrated commercial city of antiquity (Josh. xix, 29; 2 Sam. xxiv, 7; Isa. xxiii, 1; Ezek. xxvi, 15; xxvii, 2, etc.), situated in Phœnicia, on the eastern coast of the Mediterranean Sea, in latitude 33° 17' N. (Smythe, *Mediterranean*, p. 469). (The following account of it is principally based upon the articles in Kitto and Smith, s. v.) See PHŒNICIA.

I. *The Name.*—Its Hebrew name, *Tsôr*, signifies a *rock*, which well agrees with the site of *Sûr*, the modern town on a rocky peninsula, formerly an island. From the word "Tsôr" were derived two names of the city, in which the first letters differed from each other, though both had a feature of their common parent: 1st, the Aramaic word *Tura* (ܬܘܪܐ), whence the Greek word *Tyros*, probably pronounced *Tyros*, which finally prevailed in Latin, and, with slight changes, in the modern languages of the West; and, 2d, *Sara*, or *Sarra*, which occurs in Plautus (*Truc.* ii, 6, 58, "purpuram ex Sara tibi attuli"), and which is familiar to scholars through the well-known line of Virgil, "Ut gemma bibat, et Sarrano dormiat ostro" (*Georg.* ii, 506; comp. Anl. Gell. xiv, 6; Silius Italicus, xv, 203; Juvenal, x, 30). According to a passage of Probus (ad Virg. *Georg.* ii, 115), as quoted by Grote (*Hist. of Greece*, iii, 353), the form "Sara" would seem to have occurred in one of the Greek epics now lost, which passed under the name of Homer. Certainly this form accords best with the modern Arabic name of *Sûr*.

II. *Ancient Relations.*—1. *Old Tyre.*—There is no doubt that, previous to the siege of the city by Alexander the Great, Tyre was situated on an island; but, according to the tradition of the inhabitants, if we may believe Justin (xi, 10), there was a city on the mainland before there was a city on the island; and the tradition receives some color from the name of Pake-tyrus, or Old Tyre, which was borne in Greek times by a city on the continent, thirty stadia to the south (Strabo xii, 11, 24). But a difficulty arises in supposing that Palætyrus was built before Tyre, as the word Tyre evidently means "a rock," and few persons who have

Ancient Insular Tyre.

visited the site of Palætyrus can seriously suppose that any rock on the surface there can have given rise to the name. To escape this difficulty, Hengstenberg makes the suggestion that Palætyrus meant Tyre that formerly existed. "quæ quondam fuit;" and that the name was introduced after the destruction of the greater part of it by Nebuchadnezzar, to distinguish it from that part of Tyre which continued to be in existence (*De Rebus Tyriorum*, p. 26). Moreover, justly deeming this explanation unlikely, suggests that the original inhabitants of the city on the mainland possessed the island as part of their territory, and named their city from the characteristic features of the island, though the island itself was not then inhabited (*Das phönizische Alterthum*, II. i. 173). This explanation is possible; but other explanations are equally possible. For example, the Phœnician name of it may have been the Old City; and this may have been translated "Palætyrus" in Greek. Or, if the inhabitants of the mainland migrated to the island, they may afterwards, at some time or other, have given to the city which they left the name of Old Tyre, without its being necessarily implied that the city had ever borne simply the name of Tyre. Or some accidental circumstance, now beyond the reach of conjecture, may have led to the name. This again would tally with the remark of Grote, who observes (*loc. cit.*) that perhaps the Phœnician name which the city on the mainland bore may have been something resembling Palætyrus in sound, but not coincident in meaning. It is important, however, to bear in mind that this question regarding Palætyrus is merely archaeological, and that nothing in Biblical history is affected by it. Nebuchadnezzar necessarily besieged the portion of the city on the mainland, as he had no vessels with which to attack the island; but it is reasonably certain that, in the time of Isaiah and Ezekiel the heart or core of the city was on the island. The city of Tyre was consecrated to Hercules (Melkarth), who was the principal object of worship to the inhabitants (Quintus Curtius, iv, 2; Strabo, xvi, 757; and Arrian, in his *History*, says that the temple on the island was the most ancient of all temples within the memory of mankind (ii, 16). It cannot be doubted, therefore, that the island had long been inhabited. With this agree the expressions as to Tyre being "in the midst of the seas" (Ezek. xxvii. 25, 26); and even the threat against it that it should be made like the top of a rock to spread nets upon (see Des Vignoles, *Chronologie de l'Histoire Sainte* [Berlin. 1738], ii, 25). As, however, the space on the island was limited, it is

very possible that the population on the mainland may have exceeded the population on the island (see Movers, *loc. cit.* p. 81).

2. *Connection with Sidon.*—Whether built before or later than Palætyrus, the renowned city of Tyre, though it laid claims to a very high antiquity (Isa. xxiii, 7; Herod. ii, 14; Quintus Curtius, iv, 4), is not mentioned either in the *Iliad* or in the *Odyssey*; but no inference can be legitimately drawn from this fact as to the existence or non-existence of the city at the time when those poems were composed. The tribe of Canaanites that inhabited the small tract of country which may be called Phœnicia proper was known by the generic name of Sidonians (Judg. xviii, 7; Isa. xxiii, 2, 4, 12; Josh. xiii, 6; Ezek. xxxii, 30); and this name undoubtedly included Tyrians, the inhabitants being of the same race, and the two cities being less than twenty English miles distant from each other. Hence when Solomon sent to Hiram king of Tyre for cedar-trees out of Lebanon, to be hewn by Hiram's subjects, he reminds Hiram that "there is not among us any that can skill to hew timber like the Sidonians" (1 Kings v, 6). Hence Virgil, who, in his very first mention of Carthage, expressly states that it was founded by colonists from Tyre (*Æn.* i, 12), afterwards, with perfect propriety and consistency, calls it the Sidonian city (*ibid.* i, 677, 678; iv, 545; see Des Vignoles, *loc. cit.* p. 25). In like manner, when Sidonians are spoken of in the Homeric poems (*Il.* vi, 290; xxiii, 743; *Od.* iv, 84; xvii, 424), this might comprehend Tyrians; and the mention of

the city Sidon, while there is no similar mention of Tyre, would be fully accounted for—if it were necessary to account for such a circumstance at all in a poem—by Sidon's having been in early times more flourishing than Tyre. It is worthy, likewise, of being noted that Tyre is not mentioned in the Pentateuch; but here, again, though an inference may be drawn against the importance, no inference can be legitimately drawn against the existence, of Tyre in the times to which the Pentateuch refers. See Sinox.

3. *General Characteristics.*—As already intimated, Tyre was composed of two distinct parts or towns in historical times: the one situated on the mainland, or continental Tyre, and one on the island opposite, from four to thirty stadia (Pliny, Strabo) distant from each other. According to Pliny, the circumference of both was reckoned at about nineteen Roman miles, the island-town comprising about twenty-two stadia. The town on the shore was called Palætyrus, not from its having been founded before Island-Tyrus—for this, indeed, we may assume to have been the first of the two (Reland, Vitranga, Hengstenberg, etc.)—but from the circumstance of its having achieved a high renown long before its much less favorably situated island-sister. Constantly exposed to earthquakes and deluges—occupying a space naturally circumscribed, and rendered still more so by the erections necessary for the purple-fisheries and manufactories, and cut off from the easy means of export and import by caravans that belonged to the opposite city, Island-Tyrus was by far inferior in importance. In fact, only one (the western) part of the island had been built over up to the time of Hiram, the contemporary of Solomon—viz. the “Old Town” (τὸ ἄστυ), which probably served as harbor, a place for arsenals and magazines, to Palætyrus, that by this time had sent out colonies already to Tartessus and the northern coast of Libya. The other part of the island, or rather a small island by itself, which has now ceased to be such, and which was first joined to the ἄστυ as the “New Town” by Hiram, had till then probably been inhabited only by the priests attached to the sanctuary of Melkart. Besides these two there was a third town or suburb, the Eurychoros (esplanade), formed by means of substructions on the eastern side of the rock, Palætyrus, extending from the river Leontes on the north to the Ras el-Ain on the south, covered with all its outlying parts the whole available maritime strip of land, and lay in one of the most fertile and blooming plains of Phœnicia (comp. Hos. ix, 13, שְׂדֵיכֶם שְׂדֵיכֶם, “planted in a pleasant place;” or William of Tyre, “Fertilitate præcipua et amœnitate quasi singularis, habet planitiem sibi continuam divitis glebæ et opimi soli,” xiii, 3). It was watered by several aqueducts, which carried the stream from the fountain-group situated in the plain itself (head of the well, Ras al-Ayin), not only through the whole territory of the continental city, but, probably by means of subterranean pipes, also into the island-city. Without this supposition it would hardly be credible how the latter, which, up to the siege by Shalmaneser (before the 8th century), had subsisted on rain-water only collected in cisterns and open canals (ὡρυγῶν) from the Ras, could have stood the long sieges by Nebuchadnezzar (thirteen years) and of Alexander, who naturally stopped the overground supplies, without apparently once suffering from want of water. Possibly we may, in a certain annual rite called the “Wedding of the land-water to the sea-water,” still kept up by the inhabitants, see a faint reminiscence of this ancient juncture. Here also stood the ancient royal palace and the first sanctuary of Hercules, though the most celebrated one lay on the island opposite. The happy mixture of land and sea scenery thus exhibited by the two cities in the time of their prosperity is graphically described by Nonnus, a learned Egyptian antideologist of the end of the 4th Christian century: “The sailor furrows the sea with his oar, as the plough-

man the soil; the lowing of oxen and the song of birds answer the deep roar of the main; the hamadryad among the tall trees hears the voice of the nereid calling to her from the waves; the breeze from Lebanon, while it cools the rustic at his midday labor, speeds the sailor seaward.” “O Tyrus,” exclaims the prophet (Ezek. xxvii, 3, etc.), “thou hast said, I am of perfect beauty; thy borders are in the midst of the sea, thy builders have perfected thy beauty.” The poets call her “a virgin bathing in the sea, a Tartessus-ship swimming upon the ocean, an island on shore, and a city in the sea withal,” etc. Above all, however, Nonnus makes his Indian hero get into ecstasies at the “primeval fountains, especially those where the water . . . gushing out of the depths of the earth, returns every hour;” and he mentions three distinct sources or water-nymphs—“Abarbarea, the fertile; Kallirrhoe, the sweet; and Drosera, the rich and bridal one.”

The description of Tyre in the prophecy of Ezekiel (xxvii, 10) receives striking illustration from what we believe to be its earliest coins. These coins were held to be most probably of Tyre or some other Phœnician city, or possibly of Babylon, on numismatic evidence alone, by Mr. Burgon, of the British Museum. They probably date during the 5th century B.C.—they may possibly be a little older—but it is most reasonable to consider them as of the time of, and issued by, Darius Hystaspis. The chief coins are octodrachms of the earlier Phœnician weight, bearing, on the obverse, a war-galley beneath the towered walls of a city, and, on the reverse, a king in a chariot, with an incuse coat beneath. This combination of galley and city is exactly what we find in the description of Tyre in Ezekiel,

Early Coin of Tyre.

which mainly portrays a state-galley, but also refers to a port, and speaks of towers and walls. See NAVIGATION.

III. *History.*—1. The early history of Tyre is so completely shrouded in mythical mystery that a rational reconstruction of it is next to impossible. We hear of kings of Phœnicia whose very names mostly prove them to be mere types of deities, or special tribes, such as Agenor, Phœnix, Phalis, Sidon, Tetramnestus, Tennes, Strato, Abdalomimus (a word spelled in many different ways, the only reasonable orthography of which, however, must be Abd-Alonim [Heb. Elyonim], עֲבֹד עֲלֵי־יוֹנִים, “servant of the highest ones, or gods”). Abibal, however, is called the first king of Tyre, and the predecessor of Hiram (Ilierom, Suram, etc.), the Biblical Chiram, with whom, indeed, begins what to us is approximately the historical period of Phœnicia. We have already mentioned the calamity in consequence of which the Sidonians, hitherto the mightiest power of Phœnicia, were obliged to leave their capital and seek refuge in neighboring Tyre. This took place about B.C. 1200, and very soon after that period Tyre assumed the hegemony. Before the time of Samuel we already hear of the princes (Suffetes) of Tyre oppressing the Israelites (Judg. x, 12).

In the Bible, Tyre is named for the first time in the book of Joshua (xix, 29), where it is adverted to as a fortified city (in the A. V. “the strong city”), in reference to the boundaries of the tribe of Asher. Nothing historical, however, turns upon this mention of Tyre;

for it is indisputable that the tribe of Asher never possessed the Tyrian territory. According to the injunctions of the Pentateuch, indeed, all the Canaanitish nations ought to have been exterminated; but, instead of this, the Israelites dwelt among the Sidonians or Phœnicians, who were inhabitants of the land (Judg. i, 31, 32), and never seem to have had any war with that intelligent race. Subsequently, in a passage of Samuel (2 Sam. xxiv, 7), it is stated that the enumerators of the census in the reign of David went in pursuance of their mission to Tyre, among other cities, which must be understood as implying, not that Tyre was subject to David's authority, but merely that a census was thus taken of the Jews resident there.

2. But the first passages in the Hebrew historical writings, or in ancient history generally, which afford glimpses of the actual condition of Tyre are in the book of Samuel (2 Sam. v, 11), in connection with Hiram king of Tyre (B.C. 980-947) sending cedar-wood and workmen to David, for building him a palace; and subsequently in the book of Kings, in connection with the building of Solomon's temple. One point at this period is particularly worthy of attention. In contradistinction from all the other most celebrated independent commercial cities out of Phœnicia in the ancient and modern world, Tyre was a monarchy, and not a republic; and, notwithstanding its merchant princes, who might have been deemed likely to favor the establishment of an aristocratical commonwealth, it continued to preserve the monarchical form of government until its final loss of independence. Another point is the skill in the mechanical arts which seems to have already been attained by the Tyrians. Under this head, allusion is not specially made to the excellence of the Tyrians in felling trees; for, through vicinity to the forests of Lebanon, they would as naturally have become skilled in that art as the backwoodsmen of America. But what is peculiarly noteworthy is that Tyrians had become workers in brass or copper to an extent which implies considerable advancement in art. In the enumeration of the various works in brass executed by the Tyrian artists whom Solomon sent for, there are lilies, palm-trees, oxen, lions, and cherubim (1 Kings vii, 13-45). The manner in which the cedar-wood and fir-wood were conveyed to Jerusalem is likewise interesting, partly from the similarity of the sea voyage to what may commonly be seen on the Rhine at the present day, and partly as giving a vivid idea of the really short distance between Tyre and Jerusalem. The wood was taken in floats to Joppa (2 Chron. ii, 16; 1 Kings v, 9), a distance of less than seventy-four geographical miles. In the Mediterranean, during summer, there are times when this voyage along the coast would have been perfectly safe, and when the Tyrians might have reckoned confidently, especially at night, on light winds to fill the sails which were probably used on such occasions. From Joppa to Jerusalem the distance was about thirty-two miles, and it is certain that by this route the whole distance between the two celebrated cities of Jerusalem and Tyre was not more than 106 geographical, or about 122 English, miles. Within such a comparatively short distance (which by land, in a straight line, was about twenty miles shorter), it would be easy for two sovereigns to establish personal relations with each other, more especially as the northern boundary of Solomon's kingdom, in one direction, was the southern boundary of Phœnicia. Solomon and Hiram may frequently have met, and thus laid the foundations of a political alliance in personal friendship. If by messengers they sent riddles and problems for each other to solve (Josephus, *Ant.* viii, 5, 3; *Cont. Apion.* i, 17), they may previously have had, on several occasions, a keen encounter of wits in convivial intercourse. In this way, likewise, Solomon may have become acquainted with the Sidonian women who, with those of other nations, seduced him to polytheism and the worship of Astarte in his old age. Similar remarks apply to the circumstances which may

have previously occasioned the strong affection of Hiram for David (1 Kings v, 1). However this may be, it is evident that under Solomon there was a close alliance between the Hebrews and the Tyrians. Hiram supplied Solomon with cedar-wood, precious metals, and workmen, and gave him sailors for the voyage to Ophir and India; while, on the other hand, Solomon gave Hiram supplies of corn and oil, ceded to him some cities, and permitted him to make use of some havens on the Red Sea (ix, 11-14, 26-28; x, 22). Under Hiram, Tyre not only attained to its fullest glory and renown among its sister-states, but the capital itself, enlarged by him into three distinct towns, received its fullest share of palaces, temples, and public edifices, and its two roadsteads and two harbors probably date from this period. It is at this period also when the joint trading expeditions to Ophir are recorded to have taken place, in which the Tyrians furnished the pilots and mariners. Hiram himself seems altogether to have been a very refined, pious, and peaceful monarch. Hardly any wars are recorded during his lifetime, and his reported interchange of problems with the "wisest of mankind" points to his renown as a *bel esprit*. These friendly relations survived for a time the disastrous secession of the ten tribes, and a century later Ahab married a daughter of Ethbaal, king of the Sidonians (xvi, 31), who, according to Menander (Josephus, *Ant.* viii, 13, 2), was a daughter of Ithobaal, king of Tyre.

3. Hiram was followed, according to Menander (in Josephus) and Theophilus, by Balectartus, whose four sons reigned after him for short periods. First came Abdestartus (939-931), who, in consequence of a palace revolution, was followed on the throne for twelve years by a son of his nurse—a period of internal sedition and general lawlessness having intervened, during which (so Justin tells us) all the free citizens of Tyre were murdered by the slaves. Astartus, the eldest son of Balectartus, succeeded to the government, and ruled from 918 to 907, when a third brother, Astarmus, was made king. He was murdered nine years later by Phœtus, his youngest brother, who, after a brief reign of nine months, was put to death by Ithobaal, priest of Astarte, in whose family the kingdom henceforth became hereditary. This Ithobaal, the Ethbaal of Scripture, whose daughter was married to Ahab, is called by Josephus "king of Tyre and Sidon," a sign of the supremacy which Tyre had acquired in his day. The drought reported to have taken place in Judæa under Ahab seems to have also touched Phœnicia, and such was Ithobaal's piety that at his supplication thunder-claps were heard, followed by copious rains. It was chiefly before his reign (898-866) that Tyre commenced to spread its colonies as far as Africa, Spain, etc.—owing, in the first instance, probably to the danger of life and uncertainty of circumstances into which the country had been plunged by the internal conflicts. But Ithobaal himself seems to have encouraged colonization, and, in order to prevent the overcrowding of the old cities, to have built a number of new cities. Balezor, his son, succeeded in 865, and was followed by his son Mutton, the office of high-priest devolving on his second son, Sicharbaal. Mutton died in 833, and left two children, Elissa (Dido) and Pygmalion, who were to share the kingdom between them, while Elissa, by her marriage with Sicharbaal, was to unite the high-priesthood with the crown. To this arrangement, however, the people, averse to the supreme priestly power, demurred, and Pygmalion was declared sole king. Elissa's husband having been killed, for the sake of his treasures, by the new king, and herself being deprived of her dominion, she is said to have entered into a conspiracy with the aristocratic party, and, in the ninth year of Pygmalion's reign, assisted and followed by her brother Barea and the principal families of the land, to have reached Carthage (New Town, כְּרִית הַדָּשָׁה), a colony founded some time

before by the Sidonians (about B.C. 813), and to have completely rebuilt it and laid the foundation for a power which contended with mighty Rome for the empire of the world.

4. The political existence of Palestine, Syria, and Phœnicia, which, instead of making a joint desperate stand, kept on intriguing and plotting against each other—Phœnicia, moreover, being hated and despised by her allies for her iniquitous trade in slaves kidnapped among her neighbors, chiefly in Judæa—was henceforth doomed. From this time commenced denunciations, and, at first, threats of retaliation (Joel iii. 4-8; Amos i. 9, 10); and, indeed, though there might be peace, there could not be sincere friendship between the two nations. But the likelihood of the denunciations being fulfilled first arose from the progressive conquests of the Assyrian monarchs. It was not probable that a powerful, victorious, and ambitious neighbor could resist the temptation of endeavoring to subjugate the small strip of land between the Lebanon and the sea, so insignificant in extent, but overflowing with so much wealth, which by the Greeks was called Phœnicia. Accordingly, when the king of Assyria had taken the city of Samaria, had conquered the kingdom of Israel and carried its inhabitants into captivity, he turned his arms against the Phœnician cities. At this time Tyre had reached a high point of prosperity. It possessed the island of Cyprus, with the valuable mines of the metal "copper" (so named from the island), and apparently the city of Sidon was subject to its sway. But the Assyrian king seems to have taken advantage of a revolt of the Cyprians; and what ensued is thus related by Menander, who translated the archives of Tyre into the Greek language (see Josephus, *Ant.* ix. 14, 2): "Elulæus reigned thirty-six years (over Tyre). This king, upon the revolt of the Kittæans (Cyprians), sailed with a fleet against them, and reduced them to submission. On the other hand, the king of the Assyrians attacked in war the whole of Phœnicia, but soon made peace with all, and turned back. On this, Sidon and Ace (i. e. Akkô or Acre) and Palætyrus revolted from the Tyrians, with many other cities which delivered themselves up to the king of Assyria. Accordingly, when the Tyrians would not submit to him, the king returned and fell upon them again, the Phœnicians having furnished him with sixty ships and eight hundred rowers. Against these the Tyrians sailed with twelve ships, and, dispersing the fleet opposed to them, they took five hundred men prisoners. The reputation of all the citizens in Tyre was hence increased. Upon this the king of the Assyrians, moving off his army, placed guards at their river and aqueducts to prevent the Tyrians from drawing water. This continued for five years, and still the Tyrians held out, supplying themselves with water from wells." But there can hardly be a doubt that Tyre, as well as the whole of Phœnicia, very soon was made tributary to Assyria, like all the neighboring countries, and the calamities brought upon them all alike by the uninterrupted war expeditions of the Assyrian monarchs could not but be felt also by the dependencies and colonies. These fell more or less about this time into the hands of new settlers, from whom again Carthage, somewhat later, wrested a part for herself.

5. After the siege of Tyre by the Assyrians (which must have taken place not long after B.C. 721), Tyre remained a powerful state with its own kings (Jer. xxv. 22; xxvii. 3; Ezek. xxviii. 2-12), remarkable for its wealth, with territory on the mainland, and protected by strong fortifications (ver. 5; xxvi. 4, 6, 8, 10, 12, xxvii. 11; Zech. ix. 3). Our knowledge of its condition thenceforward until the siege by Nebuchadnezzar depends entirely on various notices of it by the Hebrew prophets; but some of these notices are singularly full, and especially the twenty-seventh chapter of Ezekiel furnishes us, on some points, with details such as have scarcely come down to us respecting any one city of antiquity, excepting Rome and Athens. One point espe-

cially arrests the attention, that Tyre, like its splendid daughter, Carthage, employed mercenary soldiers (Ezek. xxvii. 10, 11). This has been the general tendency in commercial cities on account of the high wages which may be obtained by artisans in a thriving community, compared with the ordinary pay of a soldier, and Tyre had been unable to resist the demoralizing temptation. In its service there were Phœnicians from Arvad, Ethiopians obtained through the commerce of Egypt, and hardy mountaineers from Persia. This is the first time that the name of Persia occurs in the remains of ancient literature, before its sons founded a great monarchy on the ruins of the Chaldean empire. Independently, however, of this fact respecting Tyrian mercenary soldiers, Ezekiel gives interesting details respecting the trade of Tyre. On this head, without attempting to exhaust the subject, a few leading points may be noticed. The first question is as to the countries from which Tyre obtained the precious metals, and it appears that its gold came from Arabia by the Persian Gulf (v. 22), just as in the time of Solomon it came from Arabia by the Red Sea. See Ormus. Whether the Arabian merchants, whose wealth was proverbial in Roman classical times (Horace, *Od.* i. 29, 1), obtained their gold by traffic with Africa or India, or whether it was the product of their own country, is uncertain; but so far as the latter alternative is concerned, the point will probably be cleared up in the progress of geological knowledge. On the other hand, the silver, iron, lead, and tin of Tyre came from a very different quarter of the world, viz. from the south of Spain, where the Phœnicians had established their settlement of Tarsish, or Tartessus. As to copper, we should have presumed that it was obtained from the valuable mines in Cyprus; but it is mentioned here in conjunction with Javan, Tubal, and Meshech, which points to the districts on the south of the Black Sea, in the neighborhood of Armenia, in the southern line of the Caucasus, between the Black Sea and the Caspian. The country whence Tyre was supplied with wheat was Palestine. It may be added that the value of Palestine as a wheat country to Tyre was greatly enhanced by its proximity, as there was scarcely a part of the kingdom of Israel on the west of the river Jordan which was distant more than a hundred miles from that great commercial city. The extreme points in the kingdom of Judah would be somewhat more distant, but the wheat probably came from the northern part of Palestine. Tyre likewise obtained from Palestine oil, honey, and balm, but not wine apparently, notwithstanding the abundance of grapes and wine in Judah (Gen. xlix. 11). The wine was imported from Damascus, and was called wine of Helbon, which was probably not the product of the country adjoining the celebrated city of that name, but came from the neighborhood of Damascus itself (see Porter, *Handbook for Syria*, ii. 495; comp. Athenæus, i. 51). The Bedawin Arabs supplied Tyre with lambs and rams and goats, for the rearing of which their mode of life was so well adapted. Egypt furnished linen for sails, and doubtless for other purposes, and the dyes from shell-fish, which afterwards became such a source of profit to the Tyrians, were imported from the Peloponnesus (comp. the *Luconicus purpuræ* of Horace, *Od.* ii. 18, 7, and Pliny, ix. 40). Lastly, from Delan, in the Persian Gulf, an island occupied possibly by a Phœnician colony, horns of ivory and ebony were imported, which must originally have been obtained from India (Ezek. xxvii). See COMMERCE.

6. When the iron grasp of Assyria began to relax, the Chaldeo-Egyptian contest brought still greater miseries upon that unfortunate Syro-Phœnician coast, and Phœnicia, still nominally ruled by Tyre. The Phœnicians, it would appear, had allied themselves to the Egyptians, who under Psammetichus had seized upon Philistia, and were about to assist Pharaoh-Necho in his further conquest of the Tyro-Palestinian states. When, therefore, at Carchemish, the Egyptians had been defeated by the

Chaldeans, the latter instantly followed up their victory by occupying Syria, Palestine, and Phœnicia, and selling a great number of the inhabitants of the latter, about B.C. 605. A league having been formed between these states to throw off the foreign yoke, gave rise to a new Chaldean expedition against them under Nebuchadnezzar (Jer. xxv, 22; xxvii, 3; xlvii, 4), which ended with the destruction of Jerusalem (B.C. 588) and the reduction of the sea-coast, except Tyre. For thirteen years Nebuchadnezzar besieged it by water and by land, but with what degree of success is still a matter of debate. Hitzig, Gesenius, Heeren, Winer, Kenrick, and others hold that the siege was a failure. It is certain that the fall of Tyre is mentioned in no ancient history—neither by Josephus, nor by the Tyrian historian Menander, nor by Philostratus. Berossus, indeed, affirmed that Nebuchadnezzar “subdued all Syria and Phœnicia,” but Tyre is not expressly mentioned. Nay, Jerome says persons who had examined Greek and Phœnician histories, especially the writings of Nicolaus Damascenus, find no mention of the siege at all, but the reply of the father is only a retort upon the *perfidia et mendacia* of profane writers. Jerome’s own assertion is, “Deus prædixerat, hoc sufficit.” The question then comes to be, whether the oracle of Ezekiel implies the capture of Tyre. The most graphic descriptions of this siege are found in Ezek. xxvi, 7–12, 17; xxviii, 2; xxix, 18, etc. The prophet’s language, “Son of man, Nebuchadnezzar, king of Babylon, caused his army to serve a great service against Tyrus: every head was made bald, and every shoulder was peeled; yet he had no wages, nor his army, for Tyrus, for the service that he had served against it. Therefore, thus saith the Lord God, Behold I will give the land of Egypt unto Nebuchadnezzar, king of Babylon, and he shall take her multitude, and take her spoil, and take her prey; and it shall be the wages for his army. I have given him the land of Egypt for his labor wherewith he served against it, because they wrought for me, saith the Lord God” (xxix, 18–20), would seem to imply that Nebuchadnezzar had failed; that his army had put forth all its energies, till “every head was bald” by the constant pressure of the helmet, and “every shoulder peeled” by the hard labor of the trenches and siege-work, but that he had been disappointed; that he got “no wages;” that the rich booty of the city did not fall into his possession, and that therefore Egypt was to afford him compensation “as a spoil,” “a prey,” “and wages for his army.” But surely the author or the collector of these oracles could not so contradict himself and his own utterances as to affirm, as in xxvi, 7–21, and then deny, the capture of Tyre by Nebuchadnezzar. The narrative of Berossus and Jerome is accepted by Movers and Ewald, the latter of whom says that Jerome’s statement “quite agrees with the brief words of Ezekiel.” It may also be replied, with Hävernick, Hengstenberg, Fairbairn, and others, that the meaning is that Nebuchadnezzar, though he took the city, yet found no fitting recompense, as, according to Jerome, the inhabitants had removed all their valuable property to the island. That he took Paketyrus seems certain, though there is no proof of Jerome’s assertion that, in his assault upon the island, he had nearly completed a dam, and had erected warlike engines on it. It is plain, too, that Tyre made submission to the Chaldean king. Many of the Tyrian royal family resided afterwards at Babylon, perhaps as hostages, and several of them were asked by the Tyrians at different times and crises to come and reign over them. These facts are proofs of the Chaldean conquest, and that it was more than such a capitulation as is admitted by Niebuhr, Dunker, Kenrick, and others (Niebuhr, *Gesch. Assur’s*, p. 216; Dunker, *Gesch. des Alterthums*, i, 172; Kenrick, *Phœnicia*, p. 390; see Pusey, *On Daniel*, p. 288). Moreover, Isaiah, in his oracle against Tyre, specifically declared that it should be destroyed, not by the power which then threatened, but by the Chaldeans, a people “formerly

of no account” (xxiii, 13). The more detailed predictions of the prophet Ezekiel were delivered a hundred and twenty years later, B.C. 588. Tyre was not taken till the fifteenth year after the captivity, B.C. 573, more than seventeen hundred years, according to Josephus, after its foundation. Its destruction then must have been entire; all the inhabitants were put to the sword or led into captivity, the walls were razed to the ground, and it was made a “terror” and a desolation. It is remarkable that one reason assigned by Ezekiel for the destruction of this proud city is its exultation at the destruction of Jerusalem. “I shall be replenished now she is laid waste” (xvi, 2). This clearly indicates that its overthrow was posterior to that event; and if we take the seventy years during which it was predicted by Isaiah (xxiii, 15) that Tyre should be forgotten to denote a definite term (which seems the most natural sense), we may conclude that it was not rebuilt till the same number of years after the return of the Jews from Babylon. That it was continental Tyre, and not insular Tyre, which Nebuchadnezzar besieged appears from the description of the siege which we have given us by Ezekiel; for we find that the king cast up a mound against it, and erected engines to batter down the walls (Ezek. xxviii, 8–10). But that the city on the island then escaped this fate is manifest from the Phœnician histories. But as to the latter also, at least a show of submission, if not a subjection—leaving the native sovereigns on the throne, and their wealth and naval power untouched—was what Nebuchadnezzar gained when he ended the “wageless” siege (comp. xxix, 17). Once more Nebuchadnezzar armed, at the end of this war, against Egypt, but Pharaoh-Apries, swiftly marching upon Phœnicia, subduing it and destroying its fleet, prevented this expedition. In this expedition Apries besieged Sidon, fought a naval battle with Tyre, and reduced the whole of the coast of Phœnicia, though this could not have had lasting effects (Herod. ii, 161; Diod. i, 68. Movers, *Das phönizische Alterthum*, ii, 451). The rule of Nebuchadnezzar over Tyre, though real, may have been light and in the nature of an alliance; and it may have been in this sense that Merial, a subsequent Tyrian king, was sent for to Babylon (Josephus, *Cont. Apion.* i, 21). At this time the ancient constitution of Tyre was changed. Ittobaal had been followed by Baal, but after Baal two judges (suffetes) took for a certain period the place of the monarch. We hear of internal commotions—natural enough in a country and city upon which calamity after calamity had fallen in so short a time, and the existence of two parties in the commonwealth that looked respectively to Chaldaea and to Egypt could not but foster those internal dissensions. In 538, while Darius stood at the head of the Tyrian or Phœnician affairs, Cyrus captured Babylon, and thus became master also of Phœnicia, which had reverted to this power. At that time Sidon, being made the royal residence, again resumed the hegemony.

7. During the Persian domination the Tyrians were subject in name to the Persian king, and may have given him tribute. With the rest of Phœnicia, they had submitted to the Persians without striking a blow; perhaps through hatred of the Chaldees, perhaps solely from prudential motives. But their connection with the Persian king was not slavish. Thus, when Cambyses ordered them to join in an expedition against Carthage, they refused compliance, on account of their solemn engagements and parental relation to that colony; and Cambyses did not deem it right to use force towards them (Herod. iii, 19). Afterwards they fought with Persia against Greece, and furnished vessels of war in the expedition of Xerxes against Greece (ibid. vii, 98); and Mapên, the son of Sirom the Tyrian, is mentioned among those who, next to the commanders, were the most renowned in the fleet. It is worthy of notice that at this time Tyre seems to have been inferior in power to Sidon. These two cities were less than twenty English miles distant from each other; and it is easy to

Modern Tyre.

conceive that in the course of centuries their relative importance might fluctuate, as would be very possible in modern times with two neighboring cities, such, for example, as Liverpool and Manchester. It is possible, also, that Tyre may have been seriously weakened by its long struggle against Nebuchadnezzar. Under the Persian dominion, Tyre and Sidon supplied cedar-wood again to the Jews for the building of the second Temple; and this wood was sent by sea to Joppa, and thence to Jerusalem, as had been the case with the materials for the first Temple in the time of Solomon (Ezra iii, 7). Under the Persians, likewise, Tyre was visited by a historian, from whom we might have derived valuable information respecting its condition (Herod. ii, 44). But the information actually supplied by him is scanty, as the motive of his voyage seems to have been solely to visit the celebrated Temple of Melkarth (the Phœnician Hercules), which was situated in the island, and was highly venerated. He gives no details as to the city, and merely specifies two columns which he observed in the temple, one of gold and the other of emerald; or, rather, as is reasonably conjectured by Sir Gardiner Wilkinson, of green glass (Rawlinson, *Herodotus*, ii, 81, 82). Under the successive Persian rulers Phœnicia was allowed to retain many of its national institutions, and even a certain amount of independence, in return for which it paid a comparatively small tax and placed its again powerful fleet at the disposal of the conquerors, who entirely lacked that most vital element of naval power. Together with Philistia and Cyprus, it was incorporated under Darius Hystaspis in the fifth

nomos, or circle, of the empire; and up to the time of Xerxes the relations between the conquerors and the conquered were of a perfectly friendly nature. But when this king, during his Greek invasion, had managed to destroy the highly prized Phœnician fleet almost completely, and to this calamity added galling measures and humiliations without end, the people became so exasperated that they took part, under Sidon's leadership, in the revolt of Egypt against Artaxerxes Mnemon and Ochus, about the middle of the 4th century, which ended most disastrously for the whole country, and particularly for Sidon, which, wealth and all, was fired by its own inhabitants. Tyre afterwards (350) again resumed the sway, until, after the battle on the Issus, all the Phœnician cities except herself paid their allegiance to the Macedonian warrior.

8. It was in consequence of this contumacy that Tyre was assailed for the third time by a great conqueror; and if some uncertainty hangs over the siege by Nebuchadnezzar, the results of the siege by Alexander were clear and undeniable. It was essential to the success of his military plans that the Phœnician fleet should be at his command, and that he should not be liable through their hostility to have his communications by sea

with Greece and Macedonia suddenly cut off; and he accordingly summoned all the Phœnician cities to submit to his rule. All the rest of them, including Aradus, Byblos, and Sidon, complied with his demands, and the seamen of those cities in the Persian fleet brought away their ships to join him. Tyre alone, calculating probably at first on the support of those seamen, refused to admit him within its walls; and then ensued a memorable siege which lasted seven months, and the success of which was the greatest of all the achievements which Alexander up to that time had attempted. At that time Tyre was situated on an island nearly half a mile from the mainland; "it was completely surrounded by prodigious walls, the loftiest portion of which on the side fronting the mainland reached a height not less than one hundred and fifty feet;" and, notwithstanding his persevering efforts, he could not have succeeded in his attempt, if the harbor of Tyre to the north had not been blockaded by the Cyprians, and that to the south by the Phœnicians. Moreover, owing to internal disturbances, Carthage was unable to afford any assistance to its parent state. For seven months Tyre sustained one of the most remarkable sieges ever recorded (B.C. 332). Palætyrus having been razed to the ground, the island-city was connected by the conqueror with the mainland by means of a mole, which, once destroyed, had to be reconstructed entirely anew. An immense fleet was collected, the ablest engineers of Phœnicia and Cyprus exercised all their skill on the construction of new battering and other machines; while the means of defence on the part of the Tyrians were as

cunning as they were successful, and fearfully galling to the besiegers. At last Tyre fell under a furious double attack, and, provoked by their desperate resistance even after the town was already taken, the soldiery fired it and massacred an immense number of the inhabitants. In accordance with the barbarous policy of ancient times, 30,000 of its inhabitants, including slaves, free females, and free children, were sold as slaves (Arrian, iv, 24, 9; Diodorus, xvii, 46). Alexander replaced the population by new colonists, chiefly Carians, and soon again the exceptionally favorable position of the place regained for it part of its ancient prosperity, though its trade is said to have suffered by the vicinity and rivalry of Alexandria.

9. Ptolemy had, after Alexander's death, annexed Phœnicia to his kingdom; but when, in B.C. 315, Antigonus returned from Babylonia, he easily expelled his garrisons from all the Phœnician cities save Tyre, which only surrendered after an eighteen months' siege. The boundaries of its territory at that period were: Sarepta to the north, the "Tyrian Ladder" to the south, and Kedes and Baka in Galilee to the east. Under the Macedonian successors of Alexander, it shared the fortunes of the Seleucidae, who bestowed on it many privileges; and there are still in existence coins of that epoch with a Phœnician and Greek inscription (Eckhel,

ing it he says that the circumference of the city proper (i. e. the city on the peninsula) was twenty-two stadia, while that of the whole city, including Palætyrus, was nineteen Roman miles (*Hist. Nat.* v, 17). The accounts of Strabo and Pliny have a peculiar interest in this respect, that they tend to convey an idea of what the city must have been when visited by Christ (Matt. xv, 21; Mark vii, 24). It was perhaps more populous than Jerusalem; and if so, it was undoubtedly the largest city which he is known to have visited. It was not much more than thirty miles distant from Nazareth, where Christ mainly lived as a carpenter's son during the greater part of his life (Matt. ii, 23; iv, 12, 13, 18; Mark vi, 3). We may readily conceive that he may often have gone to Tyre while yet unknown to the world; and whatever uncertainty there may be as to the extent to which the Greek language was likely to be spoken at Nazareth, at Tyre and in its neighborhood there must have been excellent opportunities for conversation in that language, with which he seems to have been acquainted (Mark vii, 26). At an early period a Christian community was formed there (Acts xxi, 3, 7). It was early the seat of a Christian bishopric, and Cassius, bishop of Tyre, is named as having been present at the Council of Casarea towards the close of the 2d century (Reland, *Palestina*, p. 1054).

For a long time Tyre retained her manufactures and trade, though a mere shadow of what these once had been. Chiefly with regard to her dyeing produce Hadrian granted Tyre the title of metropolis, and it formed the principal naval station on the Tyrian coast. Once again it was fired in A.D. 193, when it took part with Septimius Severus against Pescennius Niger in their contest for the crown, and Severus gratefully bestowed upon the place, which he peopled with his third legion, the title of colony and the *Jus Italianum*. Such was its elastic vitality that at the time of Constantine it again equalled all the Eastern cities in wealth and commercial prosperity. Jerome, in the 4th century, calls it the noblest and most beautiful city of Phœnicia, and expresses his astonishment at the apparent nonfulfilment of the prophecy which threatened its eternal desolation ("Nec edificabitur ultra videtur facere questionem, quomodo non sit edificata? quam hodie cernimus Phœnicies nobilissimam et pulcherrimam civitatem").

11. In the 7th century took place the extraordinary Arabian revolution under Mohammed which has given a new religion to so many millions of mankind. In the years A.D. 633-638 all Syria and Palestine, from the Dead Sea to Antioch, were conquered by the caliph Omar. This conquest was so complete that in both those countries the language of Mohammed has almost totally supplanted the language of Christ. In Syria there are only three villages where Syriac (or Aramaic) is the vernacular language. In Palestine it is not the language of a single native; and in Jerusalem, to a stranger who understands what is involved in this momentous revolution, it is one of the most suggestive of all sounds to hear the muezzin daily call Mohammedans to prayers in the Arabic language of Mohammed within the sacred precincts where once stood the Temple in which Christ worshipped in Hebrew or in Aramaic. (As to the Syriac language, see Porter, *Handbook for Syria and Palestine*, ii, 551.) But even this conquest did not cause the overthrow of Tyre. The most essential conditions on which peace was granted to Tyre, as to other Syrian cities, were the payment of a poll-tax, the obligation to give board and lodging for three days to every Moslem traveller, the wearing a peculiar dress, the admission of Moslems into the churches, the doing away with all crosses and all sounds of bells, the avoiding of all insulting expressions towards the Mohammedan religion, and the prohibition to ride on horseback or to build new churches (see Weil, *Gesch. der Chalifen*, i, 81-82). Some of these conditions were humiliating and nearly heart-breaking; but if submitted to, the lives

Greek Coin of Tyre.

Doctr. Nummorum Vet. iii, 379, etc.; Gesenius, *Monum. Phœn.* p. 262-264, and Tab. 34).

10. Beyond this nothing particular is known of Tyre from this time forth to the time of the civil wars of Rome—with which empire Phœnicia had been incorporated together with Syria by Pompey—when Cassius divided Syria into small provinces and sold them separately. Tyre for a short period thus became a principality again with a king of her own. Under the Romans it thus at first continued to enjoy a kind of freedom; for Josephus mentions that when Cleopatra pressed Antony to include Tyre and Sidon in a gift of Phœnician and Jewish territory which he made to her, he steadily refused, knowing them to have been "free cities from their ancestors" (*Ant.* xv, 4, 1). Subsequently, however, on the arrival of Augustus in the East (A.D. 20), he is said to have deprived the two cities of their liberties for seditious conduct (*ἑξουλώσατο*, Dion Cassius, lxi, 7). Still the prosperity of Tyre in the time of Augustus was undeniably great. Strabo gives an account of it at that period (xvi, 2, 23), and speaks of the great wealth which it derived from the dyes of the celebrated Tyrian purple, which, as is well known, were extracted from shell-fish found on the coast, belonging to a species of the genus *Murex*. In the days of Ezekiel, the Tyrians had imported purple from the Peloponnesus; but they had since learned to extract the dye for themselves; and they had the advantage of having shell-fish on their coast better adapted for this purpose even than those on the Lacedæmonian coast (Pausanias, iii, 21, 6). Strabo adds that the great number of dyeing-works rendered the city unpleasant as a place of residence. He further speaks of the houses as consisting of many stories, even of more than in the houses at Rome—which is precisely what might be expected in a prosperous fortified city of limited area, in which ground-rent would be high. Pliny the Elder gives additional information respecting the city, for in describ-

and private property of the inhabitants remained untouched. Notwithstanding the establishment of an imperial dyeing manufactory at Constantinople, Tyre yet retained her ancient celebrity for her purple, which was imported into Lombardy at the time of Charlemagne. Under the caliphs it enjoyed the benefits of a mild and enlightened dominion, and during the crusades was much admired both for its natural beauty and its fine edifices and its generally prosperous aspect. It again had at that time to sustain a long siege, but finally surrendered (1124), and was made an archbishopric, bestowed four years afterwards upon William of Tyre, the chronicler of the crusades. In August, 1192, it was fixed as the northern boundary of the Christian territories in Palestine, and continued to flourish, chiefly through the Venetian trade, as a commercial city until the conquest of Syria by Selim I in 1516, from which time forth its decline, further aided by the discovery of the New World and the route to Asia by the Cape of Good Hope, has been rapid and complete.

IV. *Present Condition*.—In the first half of the 14th century Tyre was visited by Sir John Maundeville, who says, speaking of "Tyre, which is now called Sür, here was once a great and goodly city of the Christians; but the Saracens have destroyed it in great part, and they guard that haven carefully for fear of the Christians" (Wright, *Early Travels in Palestine*, p. 141). About 1610–11 it was visited by Sandys, who said of it, "But this once famous Tyre is now no other than a heap of ruins; yet have they a reverent aspect, and do instruct the pensive beholder with their exemplary frailty. It hath two harbors, that on the north side the fairest and best throughout all the Levant (which the coursers enter at their pleasure); the other choked with the decays of the city" (Purchas, *Pilgrims*, ii, 1393). Towards the close of the same century, in 1697, Maundrell says of it, "On the north side it has an old Turkish castle, besides which there is nothing here but a mere Babel of broken walls, pillars, vaults, etc., there being not so much as an entire house left. Its present inhabitants are only a few poor wretches that harbor in vaults and subsist upon fishing" (see Harris, *Voyages and Travels*, ii, 846). Lastly, without quoting at length Dr. Richard Pococke, who in 1737–40 stated (see vol. x of Pinkerton, *Voyages and Travels*, p. 470) that, except some janizaries, there were few other inhabitants in the city than two or three Christian families, the words of Hasselquist, the Swedish naturalist, may be recorded, as they mark the lowest point of depression which Tyre seems to have reached. He was there in May, 1751, and he thus speaks of his visit: "We followed the seashore . . . and came to Tyre, now called Zur, where we lay all night. None of these cities, which formerly

were famous, are so totally ruined as this except Troy. Zur now scarcely can be called a miserable village, though it was formerly Tyre, the queen of the sea. Here are about ten inhabitants, Turks and Christians, who live by fishing" (*Voyages and Travels in the Levant* [Lond. 1766]). A slight change for the better began soon after. Volney states that in 1766 the Metawileh took possession of the place, and built a wall round it twenty feet high, which existed when he visited Tyre nearly twenty years afterwards. At that time Volney estimated the population at fifty or sixty poor families. Since the beginning of the present century there has been a partial revival of prosperity. But it has been visited at different times during the last thirty years by Biblical scholars, such as Robinson, Stanley (*Sinai and Pal.* p. 270), and Renan (*Letter in the Moniteur*, July 11, 1861), who all concur in the account of its general aspect of desolation. Mr. Porter, who resided several years at Damascus, and had means of obtaining correct information, stated in 1858 that "the modern town, or rather village, contains from 3000 to 4000 inhabitants, about one half being Metawileh, and the other Christians" (*Handbook*, p. 391). They are living among the broken ruins of its former magnificence, eking out a scanty livelihood upon insignificant exports of tobacco, cotton, wool, and wood. The place as it now stands was founded under the old name Sür in 1766, and suffered very considerably during the earthquake in 1837. The remains of an ancient cathedral church probably enclose the bones of the emperor Frederick Barbarossa and of Origen. About one and a half mile distant from Tyre is the so-called Tomb of Hiram, an immense sarcophagus of limestone, popularly supposed to contain the corpse of that king. See HIRAM.

The present city lies only upon the eastern part of the island, on the junction of the island and isthmus. The houses are mostly mere hovels, one story high, with flat roofs; and the streets are narrow, crooked, and filthy. Yet the numerous palm-trees and pride-of-India trees interspersed among the houses and gardens throw over the plain an Oriental charm. One of the best accounts of its present appearance is given by Dr. Robinson, who spent a Sabbath there in 1838 (*Bibl. Res.* iii, 395): "I continued my walk," says he, "along the shore of the peninsula, part of which is now unoccupied except as 'a place to spread nets upon,' musing upon the pride and fall of ancient Tyre. Here was the little isle, once covered by her palaces and surrounded by her fleets; but, alas! thy riches and thy fame, thy merchandise, thy mariners and thy pilots, thy calkers, and the occupiers of thy merchandise that were in thee—where are they? Tyre has indeed become

Ruins of Tyre on the Mamluk.

like 'the top of a rock.' The sole tokens of her more ancient splendor—columns of red and gray granite, sometimes forty or fifty heaped together, or marble pillars—lie broken and strewed beneath the waves in the midst of the sea; and the hovels that now nestle upon a portion of her site present no contradiction of the dread decree, 'Thou shalt be built no more.'

The downfall and permanent desolation of Tyre is one of the most memorable accomplishments of prophecy which the annals of the world exhibit. The sins which sealed its ruin were, in the words of the sacred writers, these: "Because that Tyrus hath said against Jerusalem, Aha, she is broken that was the gates of the people; she is turned unto me: I shall be replenished, now she is laid waste" (Ezek. xxvi, 2). "Because thine heart is lifted up, and thou hast said, I am a god, I sit in the seat of God, in the midst of the seas" (xxviii, 2). "The children also of Judah and the children of Jerusalem have ye sold unto the Grecians, that ye might remove them far from their border" (Joel iii, 6).

Geog.* s. v.; Poulan de Bossay, *Recherches sur Tyre* (Paris, 1864); Thomson, *Land and Book*, i, 260 sq.; Gesenius, *Comment. zu Jesa.* i, 707 sq.; Wilson, *Land of the Bible*, ii, 229; Bädeker, *Palestine*, p. 426 sq.; Ridgeway, *The Lord's Land*, p. 604 sq.

TYRE, COUNCIL OF. The Arians, through Eusebius of Nicomedia, obtained the convocation of this council from the emperor Constantine, A.D. 335, under pretext of thereby healing the divisions which existed among the bishops; but their real intention was to oppress Athanasius. The bishops who were summoned to attend were selected by the Eusebian party, and came from Egypt, Libya, Asia, and most of the eastern provinces. The most noted were Marius of Chalcodon, Theognis of Nicæa, Ursaces of Singedunum, and Valens of Mursia; in all about sixty Arian bishops attended. There were also a few bishops present who were not of the Eusebian faction, as Maximus of Jerusalem, Marcellus of Ancyra, Alexander of Thessalonica, etc. Constantine sent the count Dionysius to keep order, who, as the event showed, was completely devoted to the Eusebian cause, and by his violence destroyed all liberty of debate.

Athanasius, compelled by the order of the emperor, came to the council, attended by forty-nine Egyptian bishops, among whom were Potamon and Paphnutius. No accusation was brought against Athanasius on account of his faith; but he was arraigned for having killed a Meletian bishop named Arsenius, and for having forcibly broken into a church while Ischyrus, a pretended priest, was celebrating; and for having overturned the altar and broken the sacred chalice. He was made to stand as a criminal, while Eusebius and the others sat as his judges, against which treatment Potamon of Heraclea made a vehement protest, heaping reproaches upon Eusebius. From the very first the Egyptian bishops protested against the proceedings; but their objections were not heeded. Sozomen says that Athanasius appeared frequently before the council, and defended himself admirably, listening quietly to all the calumnious accusations brought against him, and replying with patience and wonderful sagacity. However, his enemies, not contented with the charges which they had already brought against him, dared to impeach his purity, and introduced into the council a debauched woman, whom they had bribed to assert that she had been ravished by him. The utter falsehood of the charge was, however, triumphantly proved; for Athanasius having deputed one of his priests, named Timotheus, to reply for him, the woman, who was ignorant even of the person of the holy bishop, mistaking Timotheus for him, declared that he was the man who had offered violence to her at such a time and place.

Neither were his accusers more successful in their endeavor to fix upon him the murder of Arsenius, who, in the midst of their false statements, appeared before the council alive. Foiled in both these infamous attempts, the Arians were filled with fury, and endeavored to offer violence to him, in which, however, they were prevented by the officers of Constantine. Nothing now remained but the charge of having broken the chalice, and there being no proof ready, and the clergy of the country where the offence was said to have taken place having solemnly sworn to the falsehood of the charge, a deputation was sent to make inquiry on the spot (in the Mareotis), composed of the most decided of his enemies. In the meantime, Athanasius, seeing that his condemnation, by fair means or foul, was resolved, withdrew from Tyre. The deputies, upon their return, declared that they had found the charge correct; and upon this statement, sentence of deposition was pronounced, on the plea of his having been convicted of a part of the accusation brought against him. More than fifty bishops protested against the acts of this assembly. See Mansi, *Concil.* ii, 435; Landon, *Manual of Councils*, s. v. See ATHANASIUS.

Tyr'ian (Τύριος), a native or inhabitant of the city of Tyre (Eccles. xvi, 18). The corresponding Heb. word (צִרְיָ, *Tsori*) is rendered by the indirect phrase "of Tyre" in the A. V. (1 Kings vii, 14; 1 Chron. xxii, 4; 2 Chron. ii, 14; Ezra iii, 7; Neh. xiii, 16), and so likewise the Greek (1 Esdr. v, 55; 2 Macc. iv, 10; Acts xii, 20).

Tyrimmas, in Greek mythology, was a friend of Ulysses, with whom the latter lived while on his journey from Troy to Epirus to consult the oracle about the war. Tyrimmas had a beautiful daughter, Erippe, whom Ulysses loved, and by whom he begot a son, Euryalus.

Tyrius (i. e. the *Tyr'ian*), in Greek mythology, was an epithet of *Hercules*, as adored in Cyprus.

Tyrônēs DEI (*new soldiers of God*), a name given, in the early Church, to catechumens, by Tertullian (*De Penitent.* c. 6) and Augustine (*De Fide ad Catechumen.* ii, 1), because they were just entering upon that state which made them soldiers of God and candidates of eternal life. See Bingham, *Christ. Antiq.* bk. x, ch. i, § 1.

Tyropæon (Τυροποιών, *of the cheese-makers*), the name of a valley (φάραξ) in Jerusalem, mentioned only by Josephus, who says that the city "was built, one quarter facing another, upon two hills, separated by an intervening valley, at which over against each other the houses terminated." Again, "The valley of the Tyropæon, which, I have said, divided the hill of the upper town from that of the lower, extended as far as Siloam, . . . a fountain whose waters are sweet and copious" (*War.* v, 4, 1). He also tells us that the "other hill, called Akra, which sustained the lower city," lay opposite to Mount Moriah, from which it was separated by "another broad valley;" and, further, that the whole city, situated on these two hills, "lay over against the Temple in the manner of a theatre" (*Ant.* xv, 11, 5). Notwithstanding this repeated and seemingly definite notice, the position of the valley is still a matter of dispute. Dr. Robinson, in accordance with his theory of the site of Akra (q. v.), and of the topography of ancient Jerusalem in general, maintains that it is the small valley on the north of Zion; and the English engineers have determined that this chasm, although now inconsiderable, was formerly much deeper, being filled up with the rubbish of ages. Most archaeologists, however, have regarded the "Valley of the Cheesemongers" as identical with the conspicuous and important one leading from the Damascus gate to the Pool of Siloam, which in all ages has been the principal drain of the internal waters of the city (Thomson, *Land and Book*, ii, 470; Pierotti, *Jerusalem Restored*, i, 19). See JERUSALEM.

Tyrrhēnus, in Greek mythology, was a son of Hercules and Omphale, or a son of Telephus and Hiera, and a brother of Tarchon; or a son of Atys and Callisthea, and brother of Lydus. He is said to have introduced the use of the great sea-shell as a trumpet. He colonized that part of Italy named after him at the time of his flight from Mæonia because of starvation.

Tyrrhus, in ancient Italian mythology, was a chief shepherd of Latins, king of Italy. He was the owner of a beautiful tame deer which Silvia nursed, bathed, and ornamented with flowers. The Fury Allecto, sent from Tartarus, chased this deer, so that it came within reach of Ascanius, who wounded it, whereupon it fled towards home. The angry shepherd and his sons, and invisibly the Furies also, assembled the neighboring inhabitants, and this was popularly assigned as the original cause of the war which Æneas was obliged to carry on with the Latiniens in Italy.

Ty'rus (Τύρος), the Greek form of the name of two places in Palestine.

1. The well-known city of TYRE (q. v.), as the name is usually Anglicized, but "Tyrus" in the A. V. in certain passages (Jer. xxv, 22; xxvii, 3; xlvii, 4; Ezek. xxvi, 2, 3, 4, 7, 15; xxvii, 2, 3, 8, 32; xxviii, 2, 12; xxix, 18; Hos. ix, 13; Amos i, 9, 10; Zech. ix, 2, 3; 2 Esdr. i, 11. Judith ii, 28; 1 Macc. v, 15; 2 Macc. iv, 18, 32, 44, 49).

2. A place described by Josephus as lying "between Arabia and Judea, beyond the Jordan, not far from the country of Heshbon," where Hyrcanus built a strong castle, of a sumptuous character, as the centre of his power in that region (*Ant.* xii, 4, 11). It has been identified in modern times with the magnificent ruins *Arak el-Emir*, four hours from Heshban, which Tristram minutely describes as corresponding to the statements of the Jewish historian (*Land of Israel*, p. 529).

TYRUS, LADDER OF. See LADDER OF TYRE.

Tyson, MICHAEL, a learned English divine, was born in the parish of All-Saints, Stamford, Nov. 19, 1740. He was educated at Benedict College, Cambridge, where he received his degrees; that of A.B. in 1764, A.M. in 1767, and B.D. in 1775. After taking his bachelor's degree, he was elected a fellow of his college. In 1766 he travelled with Mr. Gough (afterwards the celebrated antiquarian), and, after his return in the following year, was elected a fellow of the Society of Antiquaries, and in 1769 a fellow of the Royal Society. In 1770 he was ordained deacon at Whitehall Chapel; and in 1773 received the officialty of the archdeaconry of Huntingdon from his father. He was, at the same time, bursar of the college, and succeeded to the cure of St. Benedict's Church, Cambridge. In 1776 he became Whitehall preacher, and in the same year was presented by the college to the rectory of Lambourne, near Ongar, Essex. He died May 3, 1780. Mr. Tyson wrote an ode *On the Birth of the Prince of Wales*, and another, *An Ode to Peace*. He was also an excellent draughtsman and painter. See Chalmers, *Biog.* Dict. s. v.

Tyssens, PETER, a Flemish painter, was born at Antwerp in 1625; and, after the death of Rubens and Vandeyck, was considered one of the ablest painters of his time. He was made director of the Academy at Antwerp in 1661. "His compositions are copious and ingenious, his design more correct than is usual with painters of his country, his coloring strong, clear, and harmonious." He died, according to best authorities, in 1692. Among his works most worthy of notice are, *The Martyrdom of St. Benedict*, Church of the Capuchins, Brussels;—*The Crucifixion*, at the Church of the Barefooted Carmelites;—*The Assumption of the Virgin*, Church of St. James, Antwerp. See Spooner, *Biog. Hist. of Fine Arts*, s. v.

Tzschirner, HENRICH GOTTLIEB, a German theologian and orator, was born Nov. 14, 1778, at Mitweida, in Saxony. He graduated at Leipsic, and in February, 1800, became an adjunct to the philosophical faculty at Wittenberg. His lectures were principally concerned

with empirical psychology, and yielded fruit in the works *Leben u. Ende merkw. Selbstmörder nebst Abhandl. üb. d. Selbstmord* (1805);—*Ueber d. moral. Indifferentismus*;—and *Verwandschaft d. Tugenden und Laster*. He was also associated with Manchart in the publication of the *Neues Repert. f. empir. Psychologie*. In 1801 the sickness of his father called him away from the university, and he became first assistant, and, after the decease of his father, deacon at Mitweida. At that time he began a history of apologetics, but published only one volume (Leips, 1805). In the same year he was received into the theological faculty at Wittenberg, and in 1809 he removed to Leipsic, where he remained until his death, with a temporary interruption occasioned by the war of deliverance from French domination, in which he served as chaplain and gained the decoration of the green cross (1813). The literary fruitage of his campaign is contained in the volume *Ueber den Krieg*, etc. (Leips, 1815). He died Feb. 17, 1823, regretted by the whole community of Leipsic.

Tzschirner's theological tendency was that known in his day as aestheticism, whose aim was the reconciliation of rationalism and supernaturalism. He regarded Christianity as being in its nature a religion of reason, though introduced by a supernatural revelation. See *Briefe, veranl. durch Reinholds Geständnisse* (Leips, 1811), and *Briefe eines Deutschen an Chateaubriand*, etc., published by Krug. His *Dogmatik* (published by Hase, Leips, 1829) is non-committal, and contents itself with merely stating the differences of the two great opposing schools of thought in Protestant theology (see Röhr, *Krit. Prediger-Bibliothek*, x, 1). He was rather a historian than a systematic theologian, and disposed to hide himself behind his work. He added the two final volumes to Schröckh's *Church History since the Reformation*; but his principal work, according to his own judgment, is his *Fall des Heidenthums*, published by Niedner (Leips, 1829).

The period following the Napoleonic wars and beginning with the jubilee of the great Reformation (1817), developed Tzschirner into a foremost defender of Protestantism and popular freedom. Enthusiastically inspired by the study of the great past of the Evangelical Church, he yet refused to confine himself to the letter of Luther's authority, but insisted upon the exercise of the Protestant principle of intellectual liberty. In view of the fact that timid statesmen endeavored to repress the enthusiasm of the nation consequent on the defeat of Napoleon, and that Romanists and would-be reverts to Romanism charged upon Protestantism the originating and development of every revolutionary tendency and excess, he devoted his brilliant diction and incisive thought to the demonstration that Protestantism tends to mature the intelligence and fix the principles of peoples; and that it therefore tends to peace and quietness, and is more favorable to any legitimate form of settled government than Romanism. Numerous works, some of which became famous and were translated into foreign languages, were the result of this effort—e. g., *Katholicismus u. Protestantismus aus den Standpunkte der Politik* (1822). He also wrote in behalf of oppressed Protestants in France, Sardinia, and Hungary (1824), and of the liberties of Greece (1821). His Protestant contemporaries, for their part, gave him many tokens of their appreciation of his labors in their behalf, among them the king of Denmark, who in 1826 conferred on him the Order of Danebrog.

Tzschirner had taken Reinhard for his model as a pulpit orator. His sermons are occasionally models of pulpit eloquence. They were carefully elaborated and strictly memorized, sometimes pervaded with a poetic spirit and great freshness, and characterized by the frequent use of matter drawn from Church history. His personality, voice, and manner in the pulpit gave him great power over his audiences, despite difficulties he experienced with his respiratory organs. Five volumes and several separately published *Sermons* by Tzschirner

are extant. His views respecting the effect of rationalistic principles upon the preacher are contained in the article *Dass die Verschiedenheit d. Dogmen Systeme kein Hinderniss des Zweckes d. Kirche sei.* in *Magazin für christl. Prediger*, 1823. His theory of homiletics sets forth that homiletics "is the art of edifying by means of speech which harmonizes with the forms of beauty and excites into activity all the faculties of the soul, subject to the purpose of promoting piety and vir-

tue, for which the Church exists" (see Röhr, *ut sup.* ii, 2, p. 243, art. "Tzschirner als Homiletiker").

Literature.—Krug, *Tzschirners Denkmal*, etc. (Leips. 1823); H. G. Tzschirner, etc. (2d ed. ibid. 1828); Goldhorn, *Dr. H. G. Tzschirner*, etc. (1828); Röhr, *Krit. Prediger-Bibl.* i, i, 126; Tittman, *Memoria Tzschirneri* (Lips. 1829); and many others. See also Herzog, *Real-Encyklop.* s. v., where an extended list of Tzschirner's numerous works is given.

U.

Ubal dini, ROGER, archbishop of Pisa in 1276, was noted for his cruelty as a Ghibelline chief. Having captured Ugolino and his sons of the opposite party, he shut them up in a room and left them to die of hunger.

Ubbonites, the followers of Ubbo Phillips, who constituted a moderate class among the fanatical Anabaptists of Germany in the 16th century, and originated about 1531. Ubbo was born at Leeuwarden and became a Romish priest, but with his brother, Dirk Phillips, renounced the papacy as corrupt, and joined the party of the Anabaptists, in which both became leaders. The Ubbonites agreed with the Anabaptists with respect to the sacraments, the incarnation of Christ, and the freedom of the human will, but they did not teach that Christ's kingdom is of the earth and that the ungodly should be extirpated. They held, instead, that his kingdom is spiritual and subject to persecutions, and that it must be constantly renewed by regularly called apostles. They rejected the doctrine of divorce, and regarded themselves as the true Church. They denominated their meetings for worship "admonitions" and their ministers "admonishers," and they taught the necessity to an effective discipline of the rigid use of excommunication. Both Ubbo and Dirk disapproved of the fanatical outbreak at Münster, and the former acknowledged in a public confession that he heartily regretted that he had permitted himself to be deceived and that he had performed consecrations. He eventually separated from the sect and the party he had founded and entered the communion of the Reformed Church. He died in 1568. See Jehring, *Gründl. Historie . . . der Taufgesinnten oder Mennoniten*, etc. (Jena, 1720); Bergmann, *De Ubbone Philippo et Ubbonitis* (Rost. 1733).—Herzog, *Real-Encyklop.* s. v.

Ubertinus, surnamed, from the village of his birth, *De Casali*, was a Franciscan monk of the 13th century, and belonged to the strict party which insisted upon a rigid observance of the vow of poverty, and regarded the life and work of our Saviour as constituting a mere preparation for a higher and more perfect æra of the Holy Ghost. They also denounced the condition of the papacy and of the entire Church as being utterly corrupt. Ubertinus was a pupil of Peter John Olivi (died 1297), who stood at the head of his party. He defended the tenets of his party in an apology for Olivi, which is given in Wadding, *Annales Minorum*, etc. (Romæ, 1733; ann. 1297), xxxvi, 380 sq., and was severely assailed. Pope Clement V and many others called him to account for his book, and Ubertinus thereupon resolved to sever his connection with his order. Pope John XXII permitted him to enter the Benedictine convent of St. Peter at Gemblours; but the monks refused to receive him, and it is said that he ultimately became a Carthusian. In the meantime, pope John had again demanded an explanation of his opinions respecting the poverty of Jesus, etc., and Ubertinus responded that Jesus could not be said to have had possession of property in any secular meaning of the words (see Wadding, *ut sup.* vi, 362 sq.). In addition to the above, Ubertinus wrote a sort of commentary on the Apocalypse, entitled *Tractatus de Septem Statibus Ecclesie* (Venet. 1516). The time and manner of his death are unknown. See Herzog, *Real-Encyklop.* s. v.

Ubiety (Lat. *ubi*, "where") is the presence of one thing to another, or the presence of a thing in place. The schoolmen distinguish ubiety as

1. *Circumscriptive*, by which a body is so in one place that its parts are answerable to the parts of space in which it is and exclude every other body.

2. *Definitive*, as when a human spirit is limited or defined in its presence to the same place, like a human body.

3. *Repletive*, as when the Infinite Spirit is present through every portion of space.

This last is sometimes called **Ubiquity** (q. v.), and means the Divine Omnipresence. See Krauth, *Vocab. of Phil. Sciences*, s. v.

Ubiquitarians (from the technical term "ubiquity" [q. v.]), in ecclesiastical history, a sect of Lutherans which arose and spread itself in Germany, and whose distinguishing doctrine was that the body of Jesus Christ is everywhere, or in every place. Brentius, a canon of Wittenberg, one of the earliest Reformers, is said to have first broached this error in 1560. Luther himself, in his controversy with Zwingli, had thrown out some unguarded expressions that seemed to imply a belief of the omnipresence of the body of Christ; for instance, that the man Christ *could* be everywhere present, not that he was *always* and *everywhere* present. He saw, however, that this opinion was attended with great difficulties, and particularly that it ought not to be made use of as a proof of Christ's corporeal presence in the eucharist. However, after the death of Luther, this absurd hypothesis was renewed, and dressed up in a specious and plausible form by Brentius, Chemnitz, and Andreas, who maintained the communication of the properties of Christ's divinity to his human nature. It is, indeed, obvious that every Lutheran who believes the doctrine of consubstantiation, whatever he may pretend, must be a Ubiquitarian. The doctrine again became a subject of controversy early in the 17th century, between the divines of Tübingen and Giessen, the former supporting the Ubiquitarian theory, and the latter earnestly opposing it. The Ubiquitarians are strong opponents of the Calvinistic and Zwinglian theories of the holy eucharist, and their dogma is, in fact, a revulsion from them. See Bergier, *Dict. de Théologie*, s. v.; Cramer, *Enchirid. Controvers.* *Ubiquit.* (1613); Dörner, *Person of Christ*, II, ii, 280 sq., 422; Mosheim, *Eccles. Hist.* V, iii, 153 sq.

Ubiquity (Lat. *ubique*, "everywhere") is the opinion of some German divines that the body of Christ is present everywhere by virtue of its union with his divine nature. It was adopted in 1577 as a mode of explaining the eucharistic Presence by those who compiled the Formula of Concord. The party was soon divided in opinion, some affirming that Jesus Christ during his mortal life was everywhere, others dating the ubiquity from the time of his ascension into heaven. See **UBIQUITARIANS**.

Ublanizn, in Slavonic mythology, was a domestic god of the Poles, whom the negligent, lazy people authorized to make greater conveniences, and to whom they intrusted the protection of their household furniture.

Uboze (*Ubosche*), in Slavonic mythology, was the

name given to the spirits of the departed, who appeared in the family circles of their relatives in the form of dwarfs. They were therefore worshipped and made harmless by being made to eat and drink.

U'cal (Heb. *Ukal'*, *זְכַל*, in some copies, *Ukkal'*, *זְכַל*). According to the received text of Prov. xxx, 1, Ithiel and Ucal must be regarded as proper names; and if so, they must be the names of disciples or sons of Agur the son of Jakeh, an unknown sage among the Hebrews. But there is great obscurity about the passage. The Sept. translates *τοις πιστεύουσιν Θεῷ καὶ παύονται*; the Vulg., *cum quo est Deus, et qui Deo secum morante confortatus*. The Arabic follows the Sept. to some extent; the Targum reproduces Ithiel and Ucal as proper names, and the Syriac is corrupt, Ucal being omitted altogether. Luther represents the names as *Leithiel* and *Uchal*. De Wette regards them as proper names, as do most translators and commentators. Junius explains both as referring to Christ. The Sept. probably read *זְכַל וְזַלְזַל*. The Veneto-Greek has *καὶ συνήσονται* = *זְכַל וְזַלְזַל*. Cocceius must have pointed the words thus, *זְכַל וְזַלְזַל*, "I have labored for God and have obtained;" and this, with regard to the first two words, must have been the reading of J. D. Michaelis, who renders, "I have wearied myself for God, and have given up the investigation," applying the words to a man who had bewildered himself with philosophical speculations about the Deity and had been compelled to give up the search. Bertheau also (*Die Sprüche Sal. Einleit. xvii*) sees in the words "I have wearied myself for God, and have fainted" (*זְכַל וְזַלְזַל*) an appropriate commencement to the series of proverbs which follow. Hitzig's view is substantially the same, except that he points the last word *זְכַל*, and renders, "and I became dull;" applying it to the dimness which the investigation produced upon the eye of the mind (*Die Spr. Sal. p. 316*). Bunsen (*Bibelwerk, i, p. clxxx*) follows Bertheau's punctuation, but regards *זְכַל וְזַלְזַל*, on its first occurrence, as a symbolical name of the speaker. "The saying of the man 'I-have-wearied-myself-for-God: I have wearied myself for God, and have fainted away.'" There is, however, one fatal objection to this view if there were no others, and that is that the verb *זָכַל*, "to be wearied," nowhere takes after it the accusative of the object of weariness. On this account alone, therefore, we must reject all the above explanations. If Bertheau's pointing be adopted, the only legitimate translation of the words is that given by Dr. Davidson (*Introd. ii, 338*), "I am weary, O God, I am weary, O God, and am become weak." Ewald considers both Ithiel and Ucal as symbolical names, employed by the poet to designate two classes of thinkers to whom he addresses himself, or, rather, he combines both names in one, "God-with-me-and-I-am strong," and bestows it upon an imaginary character, whom he introduces to take part in the dialogue. "The name 'God-with-me,'" says Keil (*Hävernicks, Einleit. iii, 412*), "denotes such as gloried in a more intimate communion with God, and a higher insight and wisdom obtained thereby, while 'I-am-strong' indicates the so-called strong spirits who boast of their wisdom and might and deny the holy God, so that both names most probably represent a class of freethinkers who thought themselves superior to the revealed law, and in practical atheism indulged the lusts of the flesh."—Smith. Both names are probably symbolical, but the exact import remains uncertain. See PROVERBS.

Ucalëgon, in Greek mythology, was an inhabitant of Troy, an elder honored in the senate. His dwelling-place adjoining the dwelling of Deiphobus was, with the latter's, entirely destroyed by fire.

Uckewallists, one of the sects into which the old Flemings, or strict Anabaptist followers of Menno,

divided. They took their name from *Uke Walles*, a native of Friesland, who published his sentiments in 1637. In conjunction with John Leus, he propagated a doctrine of Universalism, in which he entertained a favorable opinion of the eternal state of Judas and the rest of Christ's murderers. His argument was this—that the period of time which extended from the birth of Christ to the descent of the Holy Ghost was a time of deep ignorance, during which the Jews were destitute of divine light; and that, of consequence, the sins and enormities which were committed during this interval were, in a great measure, excusable, and could not merit the severest displays of the divine justice. He was excommunicated by the Mennonites of Groningen, and banished from the city by its magistrates, but settled down in East Friesland. This denomination strictly adhered to the doctrine of the Mennonites. See Blunt, *Dict. of Sects*, s. v.; *Theol. Dict.* s. v.

Udæus, in Greek mythology, was one of the followers of Cadmus, five of whom murdered each other. He was grand sire of Tiresias.

Udainsakr, in Northern mythology, is the name given to that part of the land of the blessed where, with all earthly wants, all sorrows are at an end, whose inhabitants neither sickness nor death befalls. This place is in possession of king Gudmund, who was ruler of Jotunheim. From this last fact it would seem to follow that Udainsakr was not a paradise of the Ases, but of the former inhabitants of Scandinavia, the Jotes. —Vollmer, *Wörterb. d. Mythol.* s. v.

Udall, Ephraim, a loyal Puritan divine of the 17th century, was educated at Emanuel College, Cambridge, where he took his degree of A.B. in 1609, and that of A.M. in 1614. His only preferment appears to have been the rectory of St. Augustine's, Watling Street, London, but the time of his admission is not stated. He was sequestered in 1643, having declared openly for episcopacy and the liturgy. He died in May, 1647. Mr. Udall published, *A Coal from the Altar:—A Sermon on Psa. cxix, 11* (1629, 4to);—*Communion Comeliness* (1641, 4to), in which he recommends rails around the communion-table. See Allibone, *Dict. of Brit. and Amer. Authors*, s. v.; Chalmers, *Biog. Dict.* s. v.

Udall, John, a Nonconformist divine of the 16th century, was a great sufferer on account of his nonconformity. He died in Marshalsea prison about the end of 1592. He published, *Sermons* (1584-89, 6 vols. 8vo);—*A Demonstration of the Truth of that Discipline which Christ hath Prescribed* (1588, 4to), for which he was condemned to die;—*Commentarie on the Lamentations of Jeremy* (Lond. 1593, 4to);—*Key of the Holy Tongue*, etc. (Leyden, 1593, 12mo); said to be the first Hebrew grammar in English. Respecting Udall and his works, see Fuller, *Church History*; Hallam, *Constitutional Hist. of England*; D'Israeli, *Quarrels of Authors*; *Lond. Quar. Rev.* x, 104; (*Lond.*) *Gent. Mag.* XXII, i, 306; ii, 624; Allibone, *Dict. of Brit. and Amer. Authors*, s. v.; Chalmers, *Biog. Dict.* s. v.

Udall, Nicholas, an English clergyman, was born in Hampshire in 1504 (others say 1506); and was admitted to Corpus Christi College, Oxford, June 18, 1520, where he became probationer fellow, Sept. 3, 1524. He wrote verses for the city of London pageant at the coronation of Anne Boleyn, May, 1533; took orders in the Church of England; and was made master of Eton School in 1534. In 1543 he was charged with complicity in the robbery of some college chapel plate, and for this is said by some to have been dismissed from the mastership of the school. He was vicar of Braintree, Essex, from 1537 to 1544; entered the service of queen Catherine Parr; in 1551 he became canon of Windsor; in 1552 was preferred to the rectory of Calbourne, Isle of Wight. He was appointed head-master of Westminster School in 1556; and died, according to some authorities, in December, 1556, but, according to a manu-

script note on a copy of Bale, in 1557. Udall was the author of several school-books, some poems, etc. See Allibone, *Dict. of Brit. and Amer. Authors*, s. v.; Chalmers, *Biog. Dict.* s. v.

Udine, Giovanni da, an Italian painter (whose family name is variously called *Manni*, *Nami* [contractions of *Giovanni*], and *Ricamatore*), was born at Udine probably in 1489. He became a pupil and afterwards an assistant of Raphael. On the sacking of Rome he fled to his native city; was afterwards engaged by the Medici in Florence; and returned to Rome in the pontificate of Pius IV, where he died, 1561. He painted *The Holy Virgin and Infant Christ*, at Udine; and two *Scripture Histories*, in the archiepiscopal palace, Udine. See Spooner, *Biog. Hist. of Fine Arts*, s. v.

Udine, Girolamo da, another painter of Udine, Italy, flourished about 1540. Little is known of him. There is an altar-piece, *The Coronation of the Virgin*, in the Church of San Francesco, Udine, bearing his signature. See Spooner, *Biog. Hist. of Fine Arts*, s. v.

Udine, Martino da, called *Pellegrino di San Daniello*, an Italian painter, was born, according to some authorities, at Udine about 1480; others say at the Castle of San Daniello, about ten miles distant. He studied with Giovanni Bellini during that artist's residence at Udine. Martino died about 1545. He executed many works for the churches and public buildings at Udine and San Daniello, among which are, *St. Joseph, with the Infants Christ and St. John*, in the cathedral at Udine;—*Virgin, with several Female Saints and St. John the Baptist*, an altar-piece in the Church of Santa Maria di Battuti;—several frescos of the *Life of Christ*, in the Church of San Antonio, San Daniello. See Spooner, *Biog. Hist. of Fine Arts*, s. v.

Udu, an Accadian deity, and possibly the same with the Assyrian Samas, god of the sun.—Lenormant, *Chald. Magic*, p. 17.

Udur (the destruction), in Norse mythology, was one of the daughters of Éger and Rán.

Udvarde, THE COUNCIL OF, was held in 1309, under Charles I, king of Hungary, and Thomas, archbishop of Strigonia. It was decreed,

1. That the angelical salutation should be rung out at noon, or at the close of the day.
2. That the inhabitants of Buda should pay some impost which they had endeavored to evade.
3. The constitutions of cardinal Gentil were read, and an order made that a copy should be sent to every prelate, to use in his own diocese; the other regulations have perished.

See Mansi, *Council*, Suppl. iii, 335.—Landon, *Manual of Councils*, s. v.

Ueberweg, Friedrich, a German historian of philosophy, was born near Solingen, Rhenish Prussia, Jan. 22, 1826. He studied at Göttingen and Berlin, was tutor at the university from 1852 to 1862, and was appointed professor of philosophy at Königsberg in the latter year. He died there, June 7, 1871. He wrote, *The Development of Consciousness by Teachers* (Berlin, 1853);—*System der Logik und Geschichte der logischen Lehren* (Bonn, 1857; 3d ed. 1868; English transl. by Thomas Lindsay, Lond. 1871);—*Grundriss der Geschichte der Philosophie von Thales bis auf die Gegenwart* (Berlin, 1862-66, 3 vols.; English transl. by Geo. S. Morris, N. Y. and Lond. 1874, 2 vols.);—*Hist. of Philosophy* (N. Y. 1876);—and other minor works.

U'el (Heb. *Uel*, *עֵל*, will of God, accord, to Gesen., but for *Abel* [God is father], accord, to Fürst; Sept. *Ὀυῖλ* v. r. *Ὀυῖλ*, Vulg. *Uel*), a "son" of Bani who divorced his Gentile wife after the Captivity (Ezra x, 34). B.C. 458.

Ughelli, Ferdinando, an Italian ecclesiastical historian, was born at Florence, March 21, 1595. After pursuing his studies with credit, he took the habit of the Cistercians, and held several honorable posts in the or-

der. He was appointed abbot of Tre Fontane at Rome, procurator in his province, and counsellor to the Congregation of the Index. Popes Alexander VII and Clement IX esteemed Ughelli, and gave him a pension of five hundred crowns. He refused offers of several bishoprics. He died May 19, 1670. His principal work is *Italia Sacra, sire de Episcopis Italie, et Insularum Adjacentium*, etc. (Rome, 1642-62, 7 vols. fol.; reprinted, Venice, 1717-22, 10 vols.);—also *Lives of the Cardinals of the Cistercian Order*, etc. See Chalmers, *Biog. Dict.* s. v.

Uginda is a festival of praying observed among the Cheremisses, before harvesting-time, as an occasion for asking the special blessing of the god Ageberen for an abundant harvest.

Ugolino, Blaisio, a Jewish convert of Venice, born in 1748, is best known as the editor of a stupendous work under the title *Thesaurus Antiquitatum Sacrarum completens Selectissima Clarissimorum Virorum Opuscula, in quibus Veterum Hebræorum Mores, Leges, Institutiones, Ritus Sacri et Civiles Illustrantur* (Venet. 1744-69, 34 vols. fol.). This *Thesaurus* contains what the title indicates. The republic of learning of the 17th and 18th centuries is here represented. The names of Buxtorf, Trigland, Witsius, Goodwin, Hottinger, Pfeiffer, Signonius, Khenfeld, Bouffere, Selden, Lowth, Reland, Huet, Bochart, Cellarius, Prideaux, Claverius, Opitz, Van Til, Carpov, Saubertius, Spencer, Deyling, Wagenseil, etc., are found among the contributors to the *Thesaurus*, which forms a library in itself. Of course most of the works of the authors mentioned are published separately, but, being scarce, this *Thesaurus* will always be perused with great profit by such as have the good luck to be near great libraries which can afford to keep this stupendous work on their shelves. Besides the scholars mentioned above, the editor himself has largely contributed to this work. His translations of the Midrashim and some of the Talmudical treatises, found in vol. xiv, xv, xvi, xvii, xviii, xix, xxv, are of great importance. The following is a general index of the contents:

- Vol. i treats of sacred seasons among the Jews.
- Vol. ii, iii, and iv treat of Jewish antiquities.
- Vol. v and vi relate to sacred geography.
- Vol. vii, viii, ix, x, xi, xii, and xiii bear upon the tabernacle, Temple, priesthood, and all matters connected with the same.
- Vol. xiv, xv, xvi, and xvii contain translations of the Midrashim, such as *Mechilta*, *Siphra*, *Siphre*, *Pesikta*, and of *Tosaphoth*, or additions to the Talmud.
- Vol. xviii, xix, and xx contain translations of different Talmudical treatises.
- Vol. xxi treats of the synagogue, rites, phylacteries, and prayers of the Jews.
- Vol. xxii treats of Jewish sects and proselytes.
- Vol. xxiii treats of Gentile deities.
- Vol. xxiv treats of Jewish theocracy.
- Vol. xxv, xxvi, and xxvii treat of Jewish civil law.
- Vol. xxviii treats of Jewish, Samaritan, and Phœnician coinage.
- Vol. xxix treats of vestments.
- Vol. xxx has reference to the rites of marriage, divorce, and of Biblical medicine.
- Vol. xxxi and xxxii treat of Hebrew poetry and musical instruments.
- Vol. xxxiii relates to mourning and burial rites and usages.
- Vol. xxxiv forms a fourfold index to the whole, giving an *Index Auctorum*, *Locorum*, *S. Scripturæ*, *Dictionary Hebraicarum*, and *Verborum*.

A complete list of the contents of the single volumes is given by Meusel, *Bibliotheca Historica*, i, 1, 118-42; and Darling, *Cyclop. Bibliog.* s. v. (B. P.)

Uhländ, Ludwig Joseph, a German doctor and professor of theology, was born at Tübingen, May 15, 1722, where he also died, Dec. 15, 1803. He wrote, *De Hist. Restaurati post Diluv. Orbis ab Eritu Noe ex Arca usque ad Dispersionem Gentium* (Tub. 1761);—*De Ordine Vaticanorum, quæ in Sæclum Prophet. Scripta Extant, Chronologico* (ibid. 1778);—*Amotaciones ad Loca quedam Amosi*, Imprim. Historica (ibid. 1779-80);—*Amotaciones in Hosea Cap. iii* (ibid. 1787); *Cap. v*, vi, 1-3 (ibid. 1789); *Cap. vi*, 4-11; *vii*, 1-6 (ibid. 1790); *Cap.*

viii (ibid. 1791); *Cup. ix* (ibid. 1792):—*Dissertatio Eregetica in Hagg. ii. 1-9* (ibid. 1789). See Winer, *Handbuch der theol. Literatur*, i, 225-226, 230, 553; ii, 810; Fürst, *Bibl. Jud.* iii, 457 sq. (B. P.)

Uhle, AUGUST GEORG, a Protestant theologian of Germany, was born Jan. 16, 1737, at Brunswick. He studied theology and philosophy at Helmstedt. For a time he instructed at the Orphanage in Brunswick, when, in 1770, he was called as pastor to the Church of St. Egidius at Hanover. In 1793 the learned society at the Hague awarded to him the second prize for his dissertation *De Jesu Christo Vero Dei Filio*; and in the same year he was made member of consistory and first court-preacher. In 1791 he was appointed general superintendent, and in 1801 he was honored with the doctorate by the Göttingen University. He died May 12, 1804. Uhle was not only very well-acquainted with the ancient classical writers, but also with the writings of Hume, Robertson, Gibbon, Tillotson, Saurin, etc. In philosophy he leaned more towards the system of Leibnitz and Wolf than that of Kant; he was less satisfied with Fichte and Schelling. Among the German pulpit orators of the last century Uhle holds a prominent place. For his writings, see Döring, *Deutsche Kanzelredner*, p. 551. (B. P.)

Uhlemann, FRIEDRICH, a German doctor and professor of theology, was born at Zeitz, Nov. 26, 1795, and died at Berlin, April 19, 1864. He is the author of *Hebräische Sprachlehre* (Berlin, 1827):—*Elementarlehre der syrischen Sprache* (ibid. 1829; 2d ed. 1857; Engl. transl. by E. Hutchinson, N. Y. 1855):—*Institutiones Lingue Samaritanae: acced. Chrestomath. Samur. cum Glossario* (Lips. 1837):—*De Variis Cantici Canticorum Interpretandi Ratione* (Berlin, 1839):—*Anleitung zum Uebersetzen aus dem Deutschen in das Hebräische* (ibid. 1839-41, 2 pts.):—*Symeon der erste Säulenhelge in Syrien und sein Einfluss auf die weitere Verbreitung des Christenthums im Orient* (Leips. 1846). See Zuchold, *Bibl. Theol.* ii, 1361; Fürst, *Bibl. Jud.* iii, 457; Stein-schneider, *Bibliog. Handb.* p. 142. (B. P.)

Uhlich, LEBERREUR, a German sectary, the head of the so-called *Lightfriends* (Lichtfreunde), was born Feb. 27, 1799, at Köthen. He studied theology at Halle from 1817 to 1820 under Wegscheider, was tutor at Köthen, and in 1827 he went to Prussia as pastor in Pömmelte, near Schönebeck. In 1841 he organized the liberal preachers' meetings at Gnadau, which finally led to the formation of the Society of the Protestant Friends, or *Lichtfreunde*. Uhlich became the spiritual head of this movement, and soon obtained adherents in different countries, especially in the north of Germany. He went from place to place for the purpose of presiding at the meetings held by his adherents, until, in 1845, he was forbidden to leave his parish without permission. In the same year he was called to St. Catharine's Church in Magdeburg, where he went on in his usual way. But his low views of Christianity brought him into conflict with his consistory, until he was finally suspended from his office in September, 1847. He now left the Church and put himself at the head of a free religious congregation at Magdeburg, where he labored until March 23, 1872. Uhlich was a preacher of considerable popular eloquence and managing talent, sincere withal, and of an unblemished character; but his very low views of Christianity finally led him to a philanthropic-pantheistic naturalism, which he presented in a popular manner before his audience. Speaking of the Dissenting sects in Germany, Dr. Schaff, with regard to the Lichtfreunde, says, "It is deeply humiliating that a superficial rationalism which was supposed to be dead and buried could create such a commotion in a state like Prussia, and on the classical soil of the Lutheran Reformation. But the emptiest wagons often make the greatest noise" (*Germany, its Universities*, etc., p. 144). Of course it was only a noise, and hence as "for the development of the history of doctrines, the Protestant Friends," as Hagenbach says, "have only

a negative importance, and their place is rather in the transient story of the day than in the earnest history of religious truth" (*Hist. of Doctrines*, ii, 410). Uhlich wrote a great deal, and his publications consist mainly of sermons and discourses, for which see Zuchold, *Bibl. Theol.* ii, 1361 sq. See also his *Autobiography* (Magdeburg, 1872); *Theologisches Universal-Lex.* s. v.; Niedner, *Kirchengeschichte*, p. 912 sq. (B. P.)

Ujen, in Hindü mythology, was a celebrated king in the dynasty of the Children of the Moon. He was married to Marwa, who presented him with two daughters, Mirkinda and Lashmene, two of the seven princesses that became Krishna's first wives.

Ukko (the *ancient* or *honorable*) was the chief god of the Finns, "the celestial old man," "the god of heaven." He was the first of the trinity composed of himself, Wainämöinen, and Ilmarinen. He appeared sometimes even as a first principle, whence his surname of *Ylijumala*, "the supreme god." In case of wounds, the secondary deities were resorted to for a cure; but, in order to complete and consolidate the work of the lesser divinities, the intervention of Ukko was needed. The cure of a wound needing the formation of new flesh was considered a regular act of creation, and therefore the help of the creative power himself was necessary,—Lenormant, *Chald. Magic* (see Index).

Ukkuma, the great spirit of the Esquimaux, a being of infinite goodness, to whom they apply for the satisfying of all their wants.

Uknaz. See KENAZ 4.

U'lai [many U'la'i] (Heb. *U'lay*, עֵלַי [in pause עֵלַי], probably *Pehlei Am-Halesh*, i. e. "pure water") Sept. *Oûlâi*; Theodotion. *Oûpâi*; Vulg. *U'lai*) is mentioned by Daniel (viii, 2, 16) as a river near Susa, where he saw his vision of the ram and the he-goat. It has generally been identified with the *Eulaeus* of the Greek and Roman geographers (Marc. Heracl. p. 18; Arrian, *Exp. Al.* vii, 7; Strabo, xv, 3, 22; Ptolemy, vi, 3; Pliny, *H. N.* vi, 31), a large stream in the immediate neighborhood of that city. This identification may be safely allowed, resting as it does on the double ground of close verbal resemblance in the two names, and complete agreement as to the situation. The Eulaeus has been by many identified with the *Choaspes*, which is undoubtedly the modern *Kerkhah*, an affluent of the Tigris, flowing into it a little below Kurnah. By others it has been regarded as the *Kuran*, a large river considerably farther to the eastward, which enters the Khor Bamishir, near Mohammerah. Some have even suggested that it may have been the *Shapur* or *Shahr*, a small stream which rises a few miles N. W. of Susa, and flows by the ruins into the Dizful stream, an affluent of the Kuran.

1. The general grounds on which the Eulaeus has been identified with the Choaspes, and so with the Kerkhah (Salmassius, Rosenmüller, Wahl, Kitto, etc.), are the mention of each separately by ancient writers as "the river of Susa," and, more especially, the statements made by some (Strabo, Pliny) that the water of the Eulaeus, by others (Herod., Athenaus, Plutarch, Q. Curtius) that that of the Choaspes, was the only water tasted by the Persian kings. Against the identification it must be noticed that Strabo, Pliny, Solinus, and Polydorus (ap. Strabo, xv, 3, 4) regard the rivers as distinct, and that the lower course of the Eulaeus, as described by Arrian (*Exp. Al.* vii, 7) and Pliny (*H. N.* vi, 26), is such as cannot possibly be reconciled with that of the Kerkhah river.

2. The grounds for regarding the Eulaeus as the Kuran are decidedly stronger than those for identifying it with the Kerkhah or Choaspes. No one can compare the voyage of Nearchus, in Arrian's *Indica*, with Arrian's own account of Alexander's descent of the Eulaeus (vii, 7) without seeing that the Eulaeus of the one narrative is the Pasiügris of the other, and that the Pasi-

tigris is the Kuran is almost universally admitted. Indeed, it may be said that all accounts of the lower Euleus—those of Arrian, Pliny, Ptolemy, and Ptolemy—identify it, beyond the possibility of mistake, with the lower Kuran, and that so far there ought to be no controversy. The difficulty is with respect to the upper Euleus. The Euleus, according to Pliny, surrounded the citadel of Susa (vi, 27), whereas even the Dizful branch of the Kuran does not come within six miles of the ruins. It lay to the west, not only of the Pasitigris (Kuran), but also of the Coprates (river of Dizful), according to Diodorus (xix, 18, 19). So far, it might be the *Shapur*, but for two objections. The Shapur is too small a stream to have attracted the general notice of geographers, and its water is of so bad a character that it could never have been chosen for the royal table (*Geograph. Journ.* ix, 70). There is also an important notice in Pliny entirely incompatible with the notion that the short stream of the Shapur, which rises in the plain about five miles to the N.N.W. of Susa, can be the true Euleus. Pliny says (vi, 31) the Euleus rose in *Medin*, and flowed through Mesopotamia. Now, this is exactly true of the upper Kerkhah, which rises near Hamadan (Ecbatana), and flows down the district of Mahabadan (Mesopotamia).

The result is that the various notices of ancient writers appear to identify the upper Euleus with the upper Kerkhah, and the lower Euleus, quite unmistakably, with the lower Kuran. A recent survey of the ground has suggested a satisfactory explanation. It appears that the Kerkhah once bifurcated at Pai Pul, about twenty miles north-west of Susa, sending out a branch which passed east of the ruins, absorbing into it the Shapur, and flowing on across the plain in a S.S.E. direction till it fell into the Kuran at Ahwaz (Loftus, *Chaldea and Susiana*, p. 424, 425). Thus, the upper Kerkhah and the lower Kuran were in old times united, and might be viewed as forming a single stream. The name Euleus (Ula) seems to have applied most properly to the eastern branch stream from Pai Pul to Ahwaz; the stream above Pai Pul was sometimes called the Euleus, but was more properly the Choaspes, which was also the sole name of the western branch, or present course, of the Kerkhah from Pai Pul to the Tigris. The name Pasitigris was proper to the upper Kuran from its source to its junction with the Euleus, after which the two names were equally applied to the lower river. The Dizful stream, which was not very generally known, was called the Coprates. It is believed that this view of the river names will reconcile and make intelligible all the notices of them contained in the ancient writers. It follows from this that the water which the Persian kings drank, both at the court and when they travelled abroad, was that of the Kerkhah, taken probably from the eastern branch, or proper Euleus, which washed the walls of Susa, and (according to Pliny) was used to strengthen its defences. This water was, and still is, believed to possess peculiar lightness (Strabo, xv, 3, 22; *Geograph. Journ.* ix, 70), and is thought to be at once more wholesome and more pleasant to the taste than almost any other.—Smith.

See Porter, *Travels*, ii, 412; Kinneir, *Persian Empire*, p. 100-106; Sir H. Rawlinson, in *Geograph. Journ.* ix, 81-93; Layard, *ibid.* xvi, 91-94; Loftus, *Chaldea and Susiana*, p. 424-431.

U'lam (Heb. *Ulam'*, עֻלָּם, *porch*; Sept. Οὐλάμ v. r. occasionally Αἶλμ), the name of two Hebrews.

1. First named of the two sons of Sheresb and father of Bedan in the Gileadite posterity of Manasseh (1 Chron. vi, 16, 17). B.C. cir. 1618.

2. The first-born of Eshek among the descendants of king Saul, and the ancestor of one hundred and fifty valiant archers (1 Chron. viii, 39, 40). B.C. cir. 588.

Ulber, CHRISTIAN SAMUEL, a Protestant theologian of Germany, was born Aug. 26, 1714, at Landsbut, in Silesia. He studied at Jena; was appointed pastor

at Heinersdorf, in Silesia, in 1737; in 1741 he was called to his native place, and in 1757 to Hamburg, where he died Aug. 27, 1776. Ulber was not only a man of great learning, but also a good pulpit orator. His numerous writings are more of an ascetical nature, valuable indeed for their time, but less so now. They are enumerated in Döring, *Gelchrte Theologen Deutschlands*, iv, 547 sq. (B. P.)

Ulenberg, CASPAR, a Roman Catholic priest of Germany, was born of Lutheran parents in 1549, at Lippstadt. He studied at Wittenberg. At Cologne he succeeded in bringing back a cousin of his, who had become a Roman Catholic, to the Lutheran Church; but in 1572 they both joined the Catholic Church, and Ulenberg was appointed teacher at Cologne. In 1575 he received holy orders, was appointed pastor at Kaiserswerth, and in 1583 was made canon of the Church of St. Swibertus. From 1593 to 1615 he stood at the head of the gymnasium in Cologne, where he died as pastor of St. Cuniberti, Feb. 16, 1617. He is the author of *Die Psalmen Davids in allerlei teutsche Gesangsreimen gebracht* (Cologne, 1582; 5th ed. 1709). See Koch, *Gesch. des deutschen Kirchenliedes*, ii, 442 sq. (B. P.)

Ulfilas (**Ulphilas**, **Ulfila**, or **Wulfila**, prob. = *Ulfila*, or "wolfkin"), a Gothic bishop, was born among the Goths in 310 (or 311, or 313), and is believed to have belonged to a family of Cappadocian Christians whom the Goths had carried into captivity (Philostorg, *Hist. Eccles.* ii, 5). Having mastered the Gothic, Greek, and Hebrew languages, he became bishop of the Goths in 341, and (according to Auxentius) in 348 settled, with permission of the emperor Constantius, in Moesian territory, near Nicopolis. He propagated among his people the love of letters, formed an alphabet of twenty-four characters, based on the Greek, and translated into Meso-Gothic the whole Bible, excepting Kings. Ulfilas was a semi-Arian, subscribed to the Creed of Rimini in 359, was at the Synod of Constantinople in 360, and died while attending the Œcumenical Council of 381. Ulfilas's Bible was constantly used by the Gothic people so long as they maintained their nationality, but in the 9th century it disappeared. In the latter part of the 16th century, Arnold Mercator discovered in the Abbey of Werden a fragment containing the four gospels. It was the so-called *Codex Argenteus*, written with silver letters on purple parchment. It is now preserved at Upsala, Sweden. Another fragment, containing nearly all the epistles of St. Paul, was discovered in 1818 on some palimpsests by cardinal Mai and count Castiglioni in the Lombardian monastery of Bobbio, and published at Milan (1819-39). See **GOthic VERSION**. Among its recent editors and commentators are Gabelenz, Löbe, Massmann, and Stamm. A new edition by Bernhardt appeared at Halle in 1876. See Bessel, *Ueber das Leben des Ulfilas und die Bekehrung der Gothen* (1860); Waitz, *Ueber das Leben und die Lehre des Ulfila* (1840).

Ulfurua, in Norse mythology, was one of the nine beautiful giant-maidens, and became mother of the god Heimdall, the guard of heaven.

Ulin, JOHN, a minister of the Methodist Episcopal Church, was born in Virginia in 1792 or 1793. After preaching ten or eleven years as a local preacher, he was admitted to the Ohio Conference in 1826. He died of the cholera, near New Richmond, O., July 13, 1833. Success attended his ministry. See *Minutes of Annual Conferences*, ii, 276.

Ulius, in Greek mythology, was a surname of *Apollo*. It is uncertain whether he carried this name as a god of destruction or preservation. To him Theseus made an oath conditioned upon his safe return from Crete.

U'l'la (Heb. *Ulla'*, עֻלָּלָה, *yoke or burden*; Sept. Οὐλά v. r. Ὀλά; Vulg. *Olla*), a descendant of Asher (perhaps the son of Jether or Ithran), and the father of four sons esteemed among the valiant chiefs of the tribe (1 Chron. vii, 39). B.C. apparently cir. 1014.

Ullan Machaitæ, in the religion of the Lamaïtes, was a sect calling themselves the *Red-caps*. They do not recognise Dalai-Lama as their head, but have their own chief, Bogdo Lama. The sovereignty belongs to the emperor of China.

Ullåra, in the superstition of the Norwegians, was the name of the river deity upon whom depended success and blessing in fishing. His favor was sought in like manner to that of Nipen.

Uller, in Norse mythology, was the son of the beautiful golden-haired Sif, second wife of Thor; not by Thor, however, but through a former union. Uller is renowned as a good protector and an excellent hunter, and walks upon scales, which are indispensable in Norway, with great alacrity, so that no one is competent to keep up with him, for which he is called Weida As, the hunting Asa. In the legend of Uller, that he was made king subsequent to Odin's banishment from Asgard, eventually, however, was himself banished, and slain by the victoriously returning Odin, the latest appendix is quite evident.—Vollmer, *Wörterb. d. Mythol.* s. v.

Ullmann, KARL, an eminent German doctor and professor of theology, was born March 15, 1796, at Effenbach, in the Palatinate, and studied at the University of Tübingen, where he formed an intimate friendship with Uhland, Pfizer, and Schwab. In 1819 he took his degree as doctor of philosophy, and commenced his professional career at Heidelberg with lectures on exegesis and Church history. For ten years he stayed at Heidelberg and published during this period, *Der zweite Brief Petri kritisch untersucht* (Heidelb. 1821):—*Ueber den durch W. Fr. Rück aus armen. Übersetzung bekannt gemachten Brief Pauli an die Corinthier* (ibid. 1823):—*De Hypsistariis* (ibid. eod.):—*Gregory of Nazianzum* (Darmstadt, 1825; 2d ed. 1867), which, as Dr. Schaff says, is "the most complete work on the life and doctrines of this eminent divine of the ancient Greek Church, who, for his able defence of the Nicene faith and the divinity of Christ, was emphatically styled the 'Theologian.'" In 1828, together with his friend Umbreit (q. v.), he also commenced the publication of the well-known *Studien und Kritiken*, which has been before the public ever since, and is still one of the ablest and most learned theological journals of Germany. For the first volume of this journal Ullmann wrote an essay on the *Sinlessness of Jesus*, which was afterwards printed separately, and published in its seventh edition in 1863 (Engl. transl. by S. Taylor, Edinb. 1870). "In its improved form," says Dr. Schaff, "it must certainly be numbered among the most valuable contributions to the apologetic literature of the Church, and is better calculated, in our judgment, to satisfy an inquiring and well-cultivated mind on the claims of our holy religion than many large volumes on the evidences of Christianity." It shows the way by which the author himself found the truth, and by which many a theological student of Germany has since escaped the whirlpool of rationalism and pantheism. . . . It is impossible to read this book attentively without being edified as well as instructed, and overwhelmed with the glory of the only begotten of the Father that shines through the veil of his flesh upon the eye of faith and enlightened reason." In 1829 Ullmann was called to Halle, and for about seven years he lectured, besides Church history, on symbols and dogmatics; and in 1836 he returned again to Heidelberg as professor of ecclesiastical history and Church councillor, and spent there the best years of his manhood. When, in 1853, Ullmann was elected to the prelacy, or the highest ecclesiastical dignity of the Evangelical Church, in the grand-duchy of Baden, he withdrew from the academic chair and took his residence at Karlsruhe, devoting his whole energy to the affairs of the Church. In connection with his like-minded colleague, the learned Dr. Bähr, author of *Symbolism of the Mosaic Worship*, he faith-

fully endeavored to build up the Protestant Church of Baden, which was deeply undermined by theological rationalism and political red-republicanism. When, however, the liberal element became too strong, he retired in 1861 from all public affairs, and died Jan. 12, 1865.

Ullmann, starting from the school of Schleiermacher and Neander, was at first somewhat latitudinarian in doctrine and too compromising in disposition, but he grew with the better spirit of the age in orthodoxy and evangelical sentiment. Thus he not only took part, while at Halle, in the efforts made against the still existing remnant of rationalism, but also used all means at the General Synod, which met at Karlsruhe in 1855, to have the rationalistic catechism heretofore in use replaced by a better one constructed on the basis of the small Lutheran and Heidelberg catechisms. Similar reforms he introduced with regard to the liturgy and the common school-books. But more than through his ecclesiastical reforms, he acquired a lasting reputation by a number of works "equally distinguished for solid and well-diffused historical information, comprehensive views, calm and clear reflection, dignified and conciliating tone, and masterly power of exhibition." Besides those already mentioned, we name his *Historisch oder Mythisch* (Hamburg, 1838), in which he brings out the signification of Christ's personality under a historical point of view, as an unanswerable argument to the infidel work of Strauss on the life of Jesus:—*Das Wesen des Christenthums* (ibid. 1845; 5th ed. 1865), with a critical appendix on Feuerbach's infamous book on the essence of Christianity:—*De Beryllo Bostreno ejusque Doctrina Commentatio* (ibid. 1835). But his main work, which has assigned to him a rank among the first Church historians of the present century, is his *Reformers before the Reformation* (1841–42, 2 vols., forming also a part of Clark's *Foreign Theological Library*). This work "is certainly one of the strongest historical arguments for the Reformation that have yet been presented. . . . What Flacius attempted in a crude form in the infancy of Protestant historiography, and with an unmeasured polemical zeal against the Romanists of his age, Ullmann has carried out with all the help of modern erudition, in the calm, truth-loving spirit of an impartial historian, and with full acknowledgment of the great and abiding merits of Catholicism as the Christianizer and civilizer of the barbarian nations of the Dark Ages. With him the Reformation is not so much a rebellion as the flower and fruit rather of the better and deeper life of Christianity that slumbered in the maternal bosom of mediæval Catholicism. This, it seems to us, is the noblest and strongest historical vindication of it" (Schaff). In these two volumes special attention is paid to the German and Dutch forerunners of the Reformation from the 13th to the 15th century, who are treated with exhaustive minuteness of detail. Here we find trustworthy and carefully sifted information on the life and theology of John Goch, John Wessel, the Brethren of the Common Life, and the various schools of the mystics, Ruysbroek, Suso, Tauler, Thomas à Kempis, the anonymous author of the curious tract on German theology, and Staupitz, the patron and early friend of Luther. The latter and principal part of the second volume contains the author's former monograph on John Wessel (Hamburg, 1834) in an improved form which leaves but little to be added. "But the work of Ullmann, although very satisfactory as far as it goes, does not exhaust the general subject, which would require two or three additional volumes. He leaves out of view the important preparatory movement of Wycliffe and the Lollards in England, of Huss and the Hussites in Bohemia, of Savonarola in Italy, and of what is generally called the Revival of Letters and Classical Learning by such men as Erasmus, Reuchlin, Agricola; not to speak of the more negative preparation of the Reformation by the anti-Catholic sects of the Middle Ages, es-

pecially the Waldenses and Albigenses" (Schaff). Besides these works there are a number of essays from his pen in the *Studien und Kritiken*, and other treatises published separately. See Zuchold, *Bibl. Theol.* ii, 1365 sq.; Herzog, *Real-Encyklop.* s. v.; *Theologisches Universal-Lexikon*, s. v.; Schaff, *Germany, its Universities*, etc., p. 345 sq.; Beyschlag, *Dr. Carl Ullmann* (Gotha, 1867); Schenkel, *Allgemeine kirchliche Zeitschrift* (1867), p. 87 fol.; Kurtz, *Lehrbuch der Kirchengeschichte* (Mittau, 1874), ii, 384 sq. (B. P.)

Ulphilas. See ULFILAS.

Ulric of AUGSBURG, in the 10th century, occupied a noteworthy position among his contemporaries both as a prince and a prelate. He was born about A.D. 890 at Augsburg, educated at St. Gall, and ordained to his bishopric Dec. 28, 923. In accordance with the custom of his time, he followed with his retainers the standards of the emperors Henry I and Otto I. He was influential in securing an armistice between Henry and his revolted son duke Liutulf in 954, and in the following year he won great fame by a successful defence of Augsburg against the Magyars. He was equally zealous in the erection and adorning of churches and chapels, and in the restoration of cities, castles, dwellings, and lands. His bounty was long the only support of impoverished priests and retainers. In the administration of his diocese he was accustomed to make journeys of visitation to dispense justice, confer absolution, and examine the official conduct and private life of his clergy. He greatly increased the number of festivals and the pomp with which they were observed, and he was eminently zealous in the collection of relics. He was, in brief, a thorough exponent of the piety of his age, and also a fine specimen of the militant churchman. Towards the close of his life he became more thoroughly an ascetic than before, and assumed the Benedictine habit. He died July 4, 973. Soon after his decease, it was reported that miracles were wrought upon persons who visited his grave, and his memory and remains were accordingly highly venerated in Augsburg and vicinity. Provost Gerhard, who had been Ulric's constant companion in the closing years of the bishop's life, wrote a *Life*, in which many of these wonders are mentioned; and Ulric's successor in the bishopric, Liutulf, persuaded pope John XV to canonize their author. The bull to this effect was issued in February, 993, and is noteworthy as the first clearly authenticated document which marks the transition from a saint-worship which grew naturally out of the excellences of character in Christians, to a saint-worship established by decree of the pope.

Ulric's name is mentioned in connection with the authorship of several writings, but without satisfactory proof. The first is entitled *Nicolaus Domino et Patri S. Rom. Eccl. Provisori V.* [some MSS. have G.] *solo Nomine Episc. Amorem ut Filius, Timorem ut Serrus*, in Martène et Durand, *Ampliss. Collectio*, p. 449-454. It was first printed by Flacius in 1550, and afterwards incorporated with his *Catodogus Testium Veritatis*. The second is a *Sermo Synodalis Paroch. Presbyt. in Synod. Ennuntiandus*, on which comp. Vogel, *Ratherius von Verona* (Jena, 1854), i, 343, note. The last is an *Epist. de Vita Notingi Episc. Constantiensis*. The best source on Ulric is the biography translated by Gerhard (988-993), and published by Waitz in *Monum. Scriptores*, iv, 377 sq. The latter also gives a list of later and dependent lives. Comp., in addition, Mabillon, *Acta SS. Ord. S. Bened. Sec. I.*; and Braun, *Gesch. d. Bischöfe v. Augsburg* (Augsb. 1813), pt. i. See Herzog, *Real-Encyklop.* s. v.

Ulrich, the name of a Swiss family noted for the theological learning of several of its members.

1. JEAN JACQUES (1) was born at Zurich in 1569, and died there in 1638. He was educated at the schools of his own country, and afterwards at Middelburg, Leipsic, Wittenberg, and Tübingen, and occupied different chairs of theology at Zurich, where he published various Biblical and historical works in Latin.

2. JEAN JACQUES (2) was born at Zurich in 1683, and died there in 1731. He studied at his native schools, and also at Bremen, Franeker, and Leyden, and afterwards occupied a chair in the University of Zurich. He wrote, besides sermons and commentaries, two or three historical works in Latin.

3. JEAN GASPARD was born at Zurich in 1768, and died there in 1795. He studied at his native place, and at Utrecht and Bremen, and, after travelling in Germany and the Netherlands, was engaged in ecclesiastical labors and Oriental studies. Besides sermons and dissertations, he wrote one or two historical works in French.

4. JEAN RODOLPHE was born at Zurich in 1728, and died there in 1795. He was professor in the gymnasium there from 1763, and pastor in 1769, and was eminent for his piety and public sentiment. He left several sermons and ascetic works. See *Biographie Universelle*, s. v.

Ulrick, HENRY, a German engraver, who flourished at Nuremberg from about 1590 to 1628. He engraved some portraits, etc., among which were twelve circular prints, one of them a *Crucifixion*. See Spooner, *Biog. Hist. of Fine Arts*, s. v.

Ulster, SYNOD OF, the chief body of Presbyterians in the North of Ireland. See PRESBYTERIAN CHURCHES, No. 7.

Ultimate Appeal to SCRIPTURE AUTHORITY. It is the opinion of some persons that a considerable portion of the essentials of Christianity is not to be found in Scripture, but in a supplementary tradition, which is to be sought in the works of those early fathers who were orthodox. Others, again, utterly oppose such notions; and, independently of the consideration that upon such a theory the foundations of a Christian's faith and hope become inaccessible to nearly the whole of the laity, and to much the greater part of the clergy, they reject the system on its own account. They acknowledge the *authority* of no private individual, ancient or modern, in a question of doctrine. With true respect for all who are entitled to it, and with a just acknowledgment of the valuable instruction to be derived from their works, they yet consider that, be they of what age or of what country they may, anti-Nicene, or post-Nicene, Popish or Protestant, they are not to stand with them, as Christians, in place of the Holy Scriptures; or, as Christian ministers, in place of their own Church.—Eden, *Churchman's Dict.* s. v. See FAITH, RULE OF.

Ultor (the *Avenger*), in Roman mythology, was a surname of *Mars*, in whose honor a temple was built by Augustus for the revenge upon the murderers of Julius Caesar.

Ultramontanists (from *ultra montes*, "beyond the mountains"), the name applied to those who recognize the papal claim of supremacy over every part of the Church, as well as over every sovereign within its boundaries; and also, since 1870, to those who accept the decrees of the Vatican Council. Ultramontanism dates from Gregory VII, who propounded the following claims: "Quod solus papa possit uti imperialibus insigniis; quod solius papæ pedes omnes principes deosculentur; quod illi liceat imperatores deponere; quod a fidelitate iniquorum subjectos potest absolvere." These views are principally maintained in the Italian peninsula, but it is the tone generally adopted by English seceders. The free action of national churches is wholly superseded by such pretensions. The theory has apparently grown up from the feudal relations of the papacy as a temporal power. An assertion of authority so incompatible with catholic liberty aroused opposition on the other side of the Alps, in the Gallican and German churches, and in the Swiss cantons. Belarmino's statements are important as regards papal infallibility. He sets forth the opinion of divines in four propositions: (1) - The Roman pontiff ruling any

point, even in an œcumenical council, may be guilty of heresy, and of teaching others heresy—which has *de facto* happened;" (2) "The Roman pontiff may be heretical and teach heresy, if he rule anything apart from synodical assistance, and this has happened *de facto*;" (3) "The pope cannot be in any way heretical, nor teach heresy publicly, even though he rule any point on his own responsibility alone;" (4) That "whether the pope can be heretical or not, he can rule nothing heretical as a point to be believed by the whole Church." After the Council of Constance the question of the direct or indirect power of the papacy over states and sovereigns became the chief point of dispute, and everywhere assumed a national character. In Germany Febronius (bishop Honthelm) wrote a powerful work against Ultramontanism; and in 1786, at the Convention of Ems, the archbishops of Mentz, Treves, Cologne, and Salzburg denounced it. In Italy its chief opponent in the last century was Scipione Ricci, bishop of Pistoja, who convened a synod in that city, September, 1786, and promulgated disciplinary decrees and a doctrinal exposition favoring extreme Gallicanism and Jansenism. These were partially confirmed, April 23, 1787, by an assembly of the bishops of Tuscany, but were condemned by Pius VI, in the dogmatic bull *Auctorem fidei*, Aug. 28, 1791.

Among modern assertors of the Ultramontane theory the most strenuous are English Romanists, especially neophytes. Among Continental writers are bishop Ziegler, *Das katholische Glaubensprincip*; Carové, *Die alleinseligmachende Kirche*; Der Papst im Verhältniss zum Katholicismus; and the abbé Lamennais in his journal *L'Avenir*. Perhaps the work of greatest influence is Möhler's *Symbolik* (1832). For a fuller account of the controversies to which the claims of Ultramontanism have given rise, see IMMACULATE CONCEPTION; INFALLIBILITY; PAPACY.

Ultraquist, a term of reproach, in the 16th century, against certain persons who were permitted by their ecclesiastical rulers, in opposition to Roman custom, to communicate under both kinds in the sacrament of the altar.—Lee, *Gloss. of Liturg. Terms*, s. v.

Umâ, in the epic and Purânic mythology of India, is one of the principal names of the consort of Siva. She is also called *Durgâ*, *Devî*, *Kâlî*, *Parvâtî*, *Bhavadî*; while there are many more belonging to her of less frequent occurrence, as *Katyayânî*, *Ambikâ*, *Haimavatî*, *Sivâ*, etc. She was the younger of two sisters (Gangâ being the older), and was so beautiful that she remained thirty-six thousand years in the embrace of Siva, her husband. She was, however, barren, and inflicted upon all the gods the curse of remaining childless. She also cursed the earth, making it constantly subject to change, and to be the wife of many husbands. In great anxiety, the gods now all turned to Brahma, who promised that heaven should not be depopulated, and that Uma's elder sister, Gangâ, should, by Siva, become mother of a son who should command the heavenly hosts in the great Dæmon-war. Thus it happened that Gangâ became pregnant by Siva, and so also Uma, whereupon the latter became reconciled and withdrew the curse. Though the popular creed regarded Uma far more as the type of destruction than as that of divine wisdom, yet the works devoted to her praise never fail to extol her also as the personification of the highest knowledge. The myths relating to this goddess, who is worshipped in various parts of India—particularly in Bengal—are met with in the great epic poems and Purânas, in poetical works such as the Kumarasambhava, and in modern popular compositions. She is as Kali (q. v.) the favorite divinity of the Thugs. See Moor, *Hindû Pantheon*; Muir, *Original Sanscrit Texts* (Lond. 1863), vol. iv.; the *Hārivarṇa*, translated by Langlois (Paris, 1834-35); and the *Murkandeya Purāna*, in the *Bibliotheca Indica*, edited by Rev. K. M. Banerjea (Calcutta, 1862).

Kali (after the figure in Coleman's *Mythology of the Hindûs*).

Umbracûlum (*a little shade*), an altar canopy, more generally called the *ciborium* (q. v.).

Umbreit, FRIEDRICH WILHELM CARL, an eminent doctor and professor of theology of Germany, was born April 11, 1795, at Sonneborn, near Gotha. He studied at Göttingen, where Eichhorn instructed him in Oriental languages. In 1818 he took his degree as doctor of philosophy, and commenced his academical career as a private lecturer at Göttingen. In 1820 he was called to Heidelberg as professor of theology and philosophy, where he became intimately connected with Ullmann, Rothe, and others; and where he also died, April 26, 1860. Umbreit possessed a poetical nature, and was, as he himself acknowledged, unfit for ecclesiastico-political questions. His piety had nothing to do with dogmatical hairsplitting; his faith in the living personal God, as he revealed himself in Christ, his Son, and in the immortality—these were the only positions which he would not suffer to be attacked. He wrote, *Commentatio exhibens Histor. Emirorum al Omrah ex Abulfida* (Gott. 1816);—*Kohleth, des weisen Königs, Seelenkampf* (Gotha, 1818);—*Kohleth Scepticus de Summo Bono* (ibid. 1820);—*Was bleibt? Zeitgemässe Betrachtungen des Königs und Predigers Salomo*, etc. (Hamburg, 1849);—*Salomons Lied von der Liebe* (Gött. 1820; 2d ed. Heidelberg, 1828);—*Erinnerung an das Hohelied* (Heidelberg, 1839);—*Das Buch Hiob* (ibid. 1824; 2d ed. 1832);—*Commentar über die Sprüche Salomos* (ibid. 1826);—*De Veteris Testam. Prophetis, Clariss. Antiquiss. Temporis Oratoribus* (ibid. 1833);—*Christl. Erbauung aus dem Psalter* (Hamburg, 1835; 2d ed. 1848);—*Der Knecht Gottes* (ibid. 1840);—*Practischer Commentar über die Propheten des alten Bundes* (ibid. 1841-46, 4 vols.);—*Daniel und Jonah are waiting*;—*Die Sünde, Beitrag zur Theologie des A. T.* (Gotha, 1853);—*Der Brief an die Römer, auf dem Grunde des A. T. ausgelegt* (ibid. 1856). Besides these works, he wrote contributions to the *Studien und Kritiken*, Herzog's *Real-Encyclop.*, etc. See Zuchold, *Bibl. Theolog.* ii. 1367; Fürst, *Bibl. Jud.* iii. 459; Kitto, *Cyclop.* s. v.; Herzog, *Real-Encyclop.* xvi. 628 sq.; *Theolog. Universal-Lex.* s. v.; Schenkel, *Allgem. kirchliche Zeitschrift*, 1860, vi,

11 sq.; Mühlhäuser, in the *Neue evangel. Kirchenzeitung*, 1860, p. 23; Zittel, in the *Allgemeine Kirchenzeitung*, 1860, p. 54; Winer, *Handbuch der theol. Literatur*, i, 11, 82, 206, 212, 213, 215; ii, 355; Diestel, *Geschichte des A. T. in der christl. Kirche* (Jena, 1869), p. 658, 666, 668 sq., 774, 784; Kurtz, *Lehrbuch der Kirchengeschichte* (Mittau, 1874), ii, 316. (B. P.)

Umbrella, in ecclesiastical ceremony, is borne over bishops and priests during solemn processions at councils, and at other high solemnities, especially during processions of the blessed sacrament. The name was also applied to a kind of *baldacchino* of red velvet, with golden summits, erected in 1550 over the altar of Winchester College. See Lee, *Gloss. of Liturg. Terms*, s. v.; Walcott, *Sac. Archaeol.* s. v.

Um'mah (Heb. *Ummah'*, אֲמָה, *union*, as often; Sept. Ἀμμά v. r. Ἀρχώβ or Ἀρχόβ, Vulg. *Anma*), a town of the tribe of Asher, mentioned between Achzib and Aphek (Josh. xix, 30). Its site was evidently unknown to Eusebius and Jerome (*Onomast.* s. v. "Amma"). Dr. Thomson suggests (*Bibliotheca Sacra*, 1855, p. 822) that it may be the modern village *Aolun*, situated on the coast about five miles E.N.E. of Ras-en-Nakurah, and described by him as a large ruin with excellent water and fig-trees (*Land and Book*, ii, 156). The *Kefr Ammieh* suggested by Keil (*Comment.* ad loc.) is quite beyond the boundaries of the tribe.

Umuruk, a title of the Chaldaean goddess *Belit*.

Umvin, JOHN HARDING, a Welsh Congregational minister, was born at Meldrith, Jan. 6, 1818, and commenced his ministry with village preaching. Finding Beltham a prosperous field for labor, he settled with that people, erected a commodious chapel, and built up a large congregation. His uprightness of character and consistent walk in life won for him a large circle of true friends. He died April 11, 1867. See (Lond.) *Cong. Year-book*, 1868, p. 297.

Unam Sanctam (*the one holy*, i. e. Church) is the name of the famous papal bull published Nov. 18, 1302, so called from its first two words. In this the memorable statement occurs, "We declare, define, and pronounce that subjection to the Roman pontiff is for every hu-

man being altogether of necessity for salvation." It also affirms that there are two swords, a spiritual and material—the one to be employed by the Church, and the other for the Church under the direction of its head; and that to deny the subservience of the latter to the former is to maintain the doctrine of two principles, and to fall into the heresy of the Manicheans. See Trench, *Medieval Church Hist.* p. 282.

Unbelief, the refusing assent to testimony, the withholding of due belief. According to Kant, it is the withholding of assent to that which, though objectively insufficient as a ground of cognition, is subjectively sufficient as a ground of faith. Moral unbelief is the rejection of that which, though we cannot know it, is yet morally necessary, as faith in God, freedom, and immortality. "It includes," says Dr. Guise, "disaffection to God, disregard to his word, prejudices against the Redeemer, readiness to give credit to any other than him, inordinate love to the world, and preferring of the applause of men to the approbation of God." "Unbelief," says Charnock, "is the greatest sin, as it is the foundation of all sin: it was Adam's first sin; it is a sin against the Gospel, against the highest testimony; a refusal to accept of Christ upon the terms of the Gospel. It strikes peculiarly at God; is the greatest re-

proach of him, robs him of his glory, is a contradiction to his will, and a contempt of his authority." The causes of unbelief are Satan, ignorance, pride, and sensuality. The danger of it is great; it hardens the heart, fills with presumption, creates impatience, deceives with error, and finally exposes to condemnation (John iii, 11).

Naturalistic unbelief is that which is indifferent and opposed to revelation. The *unbelief of reason* is the making our reason independent of its own needs—the renunciation of the faith of reason. See Charnock, *Works*, ii, 601; Case, *Sermons*, ser. 2; Porteus, *Sermons*, vol. i, ser. 2; Owen, *Reasons of Faith*; Hannam, *Compendium*, ii, 26; Churchill, *Essay on Unbelief*; Buck, *Theol. Dict.* s. v.; Fleming and Krauth, *Vocab. of Phil. Sciences*, s. v.

Unbloody Sacrifice, a theological term to designate the holy sacrifice of the altar.

Unchangeableness of God. See ATTRIBUTES OF GOD; IMMUTABILITY.

Uncial Letters—so called as being an inch (Lat. *uncia*) long—characters of a large and round form used in some ancient MSS. The earliest form of an alphabet is its capitals, and the oldest Greek and Latin MSS. are written entirely in capitals. Uncial letters, which began to take the place of capitals in the middle of the 5th century, differ from them in being composed of rounded and not straight lines, and exhibiting a tendency towards greater expedition in style. Uncial writing arose as writing on papyrus or vellum became common, the necessity for more rapid execution leading to the practice of curving the lines. Its being more easily learned than the cursive style was probably the cause of its becoming the favorite mode of writing books of importance among the monkish scribes: while legal instruments, which required greater despatch, were executed by professional scribes in a corrupted form of the Roman cursive hand. Uncial writing prevailed from the 6th to the 8th, or even 10th, century. The following specimens of uncial Greek and Latin writing are from a MS. of the four gospels and Acts of the Apostles in both languages, written early in the 6th century, and presented to the University of Cambridge by Theodore Beza in 1581. The passage is from John xxi, 19—"signifying by what death he should glorify God."

According to Kant, it is the withholding of assent to that which, though objectively insufficient as a ground of cognition, is subjectively sufficient as a ground of faith. Moral unbelief is the rejection of that which, though we cannot know it, is yet morally necessary, as faith in God, freedom, and immortality. "It includes," says Dr. Guise, "disaffection to God, disregard to his word, prejudices against the Redeemer, readiness to give credit to any other than him, inordinate love to the world, and preferring of the applause of men to the approbation of God." "Unbelief," says Charnock, "is the greatest sin, as it is the foundation of all sin: it was Adam's first sin; it is a sin against the Gospel, against the highest testimony; a refusal to accept of Christ upon the terms of the Gospel. It strikes peculiarly at God; is the greatest re-

During the 6th and 7th centuries a transitional style of writing prevailed in Italy, and to some extent elsewhere, in which the letters approximated more nearly to the Roman cursive hand: this passed by a gradual transition into the *minuscule* manner, or small hand, which, from the beginning of the 10th century, became usual in MSS. See Silvestre, *Universal Paleography* (transl. and edit. by Sir F. Madden, Lond. 1850); *Traité de Diplomatique*, par deux Religieux Bénédictins de la Congrégation de St-Maur (Paris, 1755).—*Chambers's Encyclop.* s. v. See MANUSCRIPTS.

Uncircumcised (בְּרִיָּה, i. e. having a foreskin, ἀκροβυστιαν ἔχων; and so ἀκροβυστία, *the prepuce*, alone, for "uncircumcision"), a word literally denoting a heathen among the Jews. So also it is sometimes used figuratively "of uncircumcised lips," i. e. dull of speech, stammering, one whose lips still have, as it were, the foreskin, and are therefore too thick and large to bring out words easily and fluently (Exod. vi, 12, 30). So, likewise, "their ear is uncircumcised," shut up by a foreskin (Jer. vi, 10); also "their uncircumcised heart," to which the precepts of religion and piety cannot penetrate (Lev. xxvi, 41; Deut. x, 16; Jer. iv, 4; Ezek. xlv, 9; Isa. vi, 10; Acts vii, 51; James i, 21; Col. ii, 13). So, also, "the foreskin of a tree," i. e. uncircumcised

fruit, the fruit of the first three years, which by the law was to be regarded as unclean (Lev. xix. 23). See CIRCUMCISION.

Unclean (usually some form of the verb טָמַא, which is the technical term for *ceremonial pollution*; ἀκάθαρτος, *impure*; but occasionally נָקִי, *naked*; שָׁמֵן, *consecrated*; טָמֵא, *filth*; κοτράς, *common*). In this article we treat of *food* prohibited by the Mosaic law, reserving defilements of the *person* for the following article. See CLEAN.

The Jews were forbidden to eat things strangled, or dead of themselves, or through beasts or birds of prey; whatever beast did not both part the hoof and chew the cud; and certain other smaller animals rated as "creeping things" (רֶמֶשׂ); certain classes of birds mentioned in Lev. xi and Deut. xiv, twenty or twenty-one in all; whatever in the waters had not both fins and scales; whatever winged insect had not besides four legs the two hind-legs for leaping; besides things offered in sacrifice to idols; and all blood or whatever contained it (save perhaps the blood of fish, as would appear from that only of beast and bird being forbidden [Lev. vii. 26]), and therefore flesh cut from the live animal; as also all fat, at any rate that disposed in masses among the intestines, and probably wherever discernible and separable among the flesh (iii, 14-17; vii, 23). The eating of blood was prohibited even to "the stranger that sojourneth among you" (xvii, 10, 12, 13, 14), an extension which we do not trace in other dietary precepts; e. g. the thing which died of itself was to be given "unto the stranger that is in thy gates" (Deut. xiv, 21). As regards blood, the prohibition indeed dates from the declaration to Noah against "flesh with the life thereof which is the blood thereof," in Gen. ix, 4, which was perhaps regarded by Moses as still binding upon all Noah's descendants. The grounds, however, on which the similar precept of the Apostolic Council, in Acts xv, 20, 21, appears based, relate not to any obligation resting still unbroken on the Gentile world, but to the risk of promiscuous offence to the Jews and Jewish Christians, "for Moses of old time hath in every city them that preach him." Hence this abstinence is reckoned among "necessary things" (τὰ ἐπ'ἀνάγκης), and "things offered to idols," although not solely, it may be presumed, on the same grounds, are placed in the same class with "blood and things strangled" (ἀπέχεσθαι εἰδωλοσύγων καὶ αἵματος καὶ πικτύου, ver. 28, 29). Besides these, we find the prohibition twice recurring against "seething a kid in its mother's milk." It is added, as a final injunction to the code of dietary precepts in Deut. xiv, after the crowning declaration of ver. 21, "for thou art an holy people unto the Lord thy God;" but in Exod. xxiii, 19; xxxiv, 26, the context relates to the bringing first-fruits to the altar, and to the "angel" who was to "go before" the people. To this precept we shall have occasion further to return.

The general distinction of clean and unclean is rightly observed by Michaelis (*Smith's Transl.* art. ccii, etc.) to have its parallel among all nations, there being universally certain creatures regarded as clean, i. e. fit for food, and the rest as the opposite (comp. Lev. xi, 47). With the greater number of nations, however, this is only a traditional usage based merely, perhaps, either on an instinct relating to health, or on a repugnance which is to be regarded as an ultimate fact in itself, and of which no further account is to be given. Thus Michaelis (as above) remarks that in a certain part of Germany rabbits are viewed as unclean, i. e. are advisedly excluded from diet. English feelings as regards the frog and the snail, contrasted with those of Continentals, supply another close parallel. Now, it is not unlikely that nothing more than this is intended in the distinction between "clean" and "unclean" in the directions given to Noah. The intention seems to have been that creatures recognised, on whatever ground, as unfit for human food,

should not be preserved in so large a proportion as those whose number might be diminished by that consumption. The dietary code of the Egyptians, and the traditions which have descended among the Arabs, unfortified, certainly down to the time of Mohammed, and in some cases later, by any legislation whatever, so far as we know, may illustrate the probable state of the Israelites. If the law seized upon such habits as were current among the people, perhaps enlarging their scope and range, the whole scheme of tradition, instinct, and usage so enlarged might become a ceremonial barrier, having a relation at once to the theoretic idea, to the general health of the people, and to their separateness as a nation.

The same personal interest taken by Jehovah in his subjects, which is expressed by the demand for a ceremonially pure state on the part of every Israelite as in covenant with him, regarded also this particular detail of that purity, viz. diet. Thus the prophet (Isa. lxvi, 17), speaking in his name, denounces those that "sanctify themselves (consecrate themselves to idolatry), eating swine's flesh, and the abomination, and the mouse," and those "which remain among the graves and lodge in the monuments, which eat swine's flesh, and broth of abominable things is in their vessels" (Isa. 4). It remained for a higher lawgiver to announce that "there is nothing from without a man that entering into him can defile him" (Mark vii, 15). The fat was claimed as a burnt-offering, and the blood enjoyed the highest sacrificial esteem. In the two combined, the entire victim was by representation offered, and to transfer either to human use was to deal presumptuously with the most holy things. But, besides this, the blood was esteemed as "the life" of the creature, and a mysterious sanctity beyond the sacrificial relation thereby attached to it. Hence we read, "whatsoever soul it be that eateth any manner of blood, even that soul shall be cut off from his people" (Lev. vii, 27; comp. xvii, 10, 14); whereas the offender in other dietary respects was merely "unclean until even" (xi, 40; xvii, 15). Blood was certainly drunk in certain heathen rituals, especially those which related to the solemnization of a covenant, but also as a pledge of idolatrous worship (Psa. xvi, 4; Ezek. xxxiii, 25). Still there is no reason to think that blood has ever been a common article of food, and any lawgiver might probably reckon on a natural aversion effectually fortifying his prohibition in this respect, unless under some bewildering influence of superstition. Whether animal qualities, grosser appetites, and inhuman tendencies might be supposed by the Hebrews transmitted into the partaker of the blood of animals, we have nothing to show: see, however, Josephus, *Ant.* iii, 11, 2. See BLOOD.

It is noteworthy that the practical effect of the rule laid down is to exclude all the *αἰμαῖνα* among quadrupeds, and, so far as we can interpret the nomenclature, the *raptores* among birds. This suggests the question whether they were excluded as being not averse to human carcases, and in most Eastern countries acting as the servitors of the battle-field and the gibbet. Even swine have been known so to feed; and further, by their constant ruminant among whatever lies on the ground, suggest impurity, even if they were not generally foul feeders. Among fish, those which were allowed contain, unquestionably, the most wholesome varieties, save that they exclude the oyster. Probably, however, sea-fishing was little practiced by the Israelites; and the Levitical rules must be understood as referring backward to their experience of the produce of the Nile, and forward to their enjoyment of the Jordan and its upper lakes. The exclusion of the camel and the hare from allowable meats is less easy to account for, save that the former never was in common use, and is generally spoken of in reference to the semi-barbarous desert tribes on the eastern or southern border-land, some of whom certainly had no insuperable repugnance to his flesh; although it is so impossible to substitute any other

creature for the camel as the "ship of the desert" that to eat him, especially where many other creatures give meat much preferable, would be the worst economy possible in an Eastern commissariat—that of destroying the best, or rather the only, conveyance in order to obtain the most indifferent food. The hare was long supposed, even by eminent naturalists, to ruminate, and certainly was eaten by the Egyptians. The horse and the ass would be generally spared from similar reasons to those which exempted the camel. As regards other cattle, the young males would be those universally preferred for food, no more of that sex reaching maturity than were needful for breeding, while the supply of milk suggested the copious preservation of the female. The duties of draught would require another rule in rearing neat-cattle. The laboring steer, man's fellow in the field, had a life somewhat ennobled and sanctified by that comradeship. Thus it seems to have been quite unusual to slay for sacrifice or food, as in 1 Kings xix, 21, the ox accustomed to the yoke. And perhaps, in this case, as being tougher, the flesh was not roasted, but boiled. The case of Araunah's oxen is not similar, as cattle of all ages were useful in the threshing-floor (2 Sam. xxiv, 22). Many of these restrictions must be esteemed as merely based on usage, or arbitrary. Practically, the law left among the allowed meats an ample variety, and no inconvenience was likely to arise from a prohibition to eat camels, horses, and asses. Swine, hares, etc., would probably, as nearly as possible, be exterminated in proportion as the law was observed, and their economic room filled by other creatures. Wunderbar (*Biblisch-talm. Medicin*, ii, 50) refers to a notion that "the animal element might only with great circumspection and discretion be taken up into the life of man in order to avoid debasing that human life by assimilation to a brutal level, so that thereby the soul might become degraded, profaned, filled with animal affections, and disqualified for drawing near to God." He thinks, also, that we may notice a meaning in "the distinction between creatures of a higher, nobler, and less intensely animal organization as clean and those of a lower and incomplete organization as unclean," and that the insects provided with four legs and two others for leaping are of a higher or more complete type than others, and relatively nearer to man. This seems fanciful, but may, nevertheless, have been a view current among Rabbinical authorities. As regards birds, the *raptors* have commonly tough and indigestible flesh, and some of them are, in all warm countries, the natural scavengers of all sorts of carrion and offal. This alone begets an instinctive repugnance towards them, and associates them with what was beforehand a defilement. Thus to kill them for food would tend to multiply various sources of uncleanness. Porphyry (*Abstinentia*, iv, 7, quoted by Winer) says that the Egyptian priests abstained from all fish, from all quadrupeds with solid hoofs, or having claws, or which were not horned, and from all carnivorous birds. Other curious parallels have been found among more distant nations. See ANIMAL.

But as Orientals have minds sensitive to teaching by types, there can be little doubt that such ceremonial distinctions not only tended to keep Jew and Gentile apart, but were a perpetual reminder to the former that he and the latter were not on one level before God. Hence, when that economy was changed, we find that this was the very symbol selected to instruct Peter in the truth that God was not a "respector of persons." The vessel filled with "fourfooted beasts of the earth, and wild beasts, and creeping things, and fowls of the air," was expressive of the Gentile world, to be put now on a level with the Israelite, through God's "purifying their hearts by faith." A sense of this, their prerogative, however dimly held, may have fortified the members of the privileged nation in their struggle with the persecutions of the Gentiles on this very point. It was no mere question of which among several means of sup-

porting life a man chose to adopt, when the persecutor dictated the alternative of swine's flesh or the loss of life itself; but whether he should surrender the badge and type of that privilege by which Israel stood as the favored nation before God (1 Macc. i, 63, 64; 2 Macc. vi, 18; vii, 1). The same feeling led to the exaggeration of the Mosaic regulations, until it was "unlawful for a man that was a Jew to keep company with, or come unto, one of another nation" (Acts x, 28); and with such intensity were badges of distinction cherished that the wine, bread, oil, cheese, or anything cooked by a heathen was declared unlawful for a Jew to eat. Nor was this strictness, however it might at times be pushed to an absurdity, without foundation in the nature of the case. The Jews, as, during and after the return from captivity, they found the avenues of the world opening around them, would find their intercourse with Gentiles unavoidably increased, and their only way to avoid an utter relaxation of their code would lie in somewhat overstraining the precepts of prohibition. Nor should we omit the tendency of those who have no scruples to "despise" those who have, and to parade their liberty at the expense of these latter, and give piquancy to the contrast by wanton tricks, designed to beguile the Jew from his strictness of observance, and make him, unguardedly, partake of what he abhorred, in order to heighten his confusion by derision. One or two instances of such amusement at the Jew's expense would drive the latter within the intrenchments of a universal repugnance and avoidance, and make him seek the safe side at the cost of being counted a churl and a bigot. Thus we may account for the refusal of the "king's meat" by the religious captives (Dan. i, 8), and for the similar conduct recorded of Judith (xii, 2) and Tobit (Tob. i, 11); and in a similar spirit Shakespeare makes Shylock say, "I will not eat with you, drink with you, nor pray with you" (*Merchant of Venice*, act i, sc. iii). As regards things offered to idols, all who own one God meet on common ground; but the Jew viewed the precept as demanding a literal objective obedience, and had a holy horror of even an unconscious infraction of the law; hence, as he could never know what had received idolatrous consecration, his only safety lay in total abstinence; whereas Paul admonishes the Christian to abstain, "for his sake that showed it and for conscience' sake," from a thing said to have been consecrated to a false god, but not to parade his conscientious scruples by interrogating the butcher at his stall, or the host in his guest-chamber (1 Cor. x, 25-29); and to give opposite injunctions would doubtless, in his view, have been "compelling the Gentiles to live as did the Jews" (*ἰονδαῖον*, Gal. ii, 14). See ALISEMA.

The prohibition to "seethe a kid in its mother's milk" has caused considerable difference of opinion among commentators. Michaelis (art. cccx) thought it was meant merely to encourage the use of olive-oil instead of the milk or butter of an animal, which we commonly use in cookery, where the Orientals use the former. This will not satisfy any mind by which the clue of symbolism, so blindly held by the Eastern devotee, and so deeply interwoven in Jewish ritual, has once been duly seized. Mercy to the beasts is one of the under-currents which permeate that law. To soften the feelings and humanize the character was the higher and more general aim. When Paul, commenting on a somewhat similar precept, says, "Doth God care for oxen, or saith he it altogether for our sakes?" he does not mean to deny God's care for oxen, but to insist the rather on the more elevated and more human lesson. The milk was the destined support of the young creature: viewed in reference to it, the milk was its "life," and had a relative sanctity resembling that of the forbidden blood (comp. Juvenal, xi, 68, "Qui plus lactis habet quam sanguinis," speaking of a kid destined for the knife). No doubt the abstinence from the forbidden action in the case of a young creature already dead, and a dam unconscious probably of its loss, or whose consciousness such a use of her milk could in

nowise quicken, was based on a sentiment merely. But the practical consequence, that milk must be foregone or elsewhere obtained, would prevent the sympathy from being an empty one. It would not be the passive emotion which becomes weaker by repetition, for want of an active habit with which to ally itself. And thus its operation would lie in indirectly quickening sympathies for the brute creation at all other times. The Talmudists took an extreme view of the precept, as forbidding generally the cooking of flesh in milk (Mishna, *Cholin*, viii; Hottinger, *Leg. Hebr.* p. 117, 141).

It remains to mention the sanitary aspect of the case. Swine are said to be peculiarly liable to disease in their own bodies. This probably means that they are more easily led than other creatures to the foul feeding which produces it; and, where the average heat is great, decomposition rapid, and malaria easily excited, this tendency in the animal is more mischievous than elsewhere. A *meazel* or *mazel*, from whence we have "measled pork," is the old English word for a "leper," and it is asserted that eating swine's flesh in Syria and Egypt tends to produce that disorder (Bartholinus, *De Morbis Bibl.* c. viii; Wunderbar, p. 51). But there is an indefinite-ness about these assertions which prevents our dealing with them scientifically. *Meazel* or *mazel* may well, indeed, represent "leper," but which of all the morbid symptoms classed under that head it is to stand for, and whether it means the same, or at least a parallel, disorder in man and in pig are indeterminate questions. See *LEPER*. The prohibition on eating fat was salubrious in a region where skin diseases are frequent and virulent, and that on blood had, no doubt, a similar tendency. The case of animals dying of themselves needs no remark: the mere wish to insure avoiding disease, in case they had died in such a state, would dictate the rule. Yet the beneficial tendency is veiled under a ceremonial difference, for the "stranger" dwelling with the Israelite was allowed it, although the latter was forbidden. Thus is their distinctness before God, as a nation, ever put prominently forward, even where more common motives appear to have their turn. As regards the animals allowed for food, comparing them with those forbidden, there can be no doubt on which side the balance of wholesomeness lies. Nor would any dietetic economist fail to pronounce in favor of the Levitical dietary code as a whole, as insuring the maximum of public health, and yet of national distinctness, procured, however, by a minimum of the inconvenience arising from restriction.

Literature.—Bochart, *Hierozycon*; Forskål, *Descriptiones Animalium*, etc., *quæ in Itinere Orientali Observavit*, with his *Icones Rerum Naturalium*; and Rosenmüller, *Handbuch der bibl. Alterthumskunde*, vol. iv, *Natural History*, may be consulted on some of the questions connected with this subject; also, more generally, Maimonides, *De Cibis Vetitis*; Reinhard, *De Cibis Hebræorum Prohibitis*.—Smith. See *FOOD*.

Uncleanness (chiefly טָמֵא, used in the almost technical sense of Levitical defilement) is the term by which, in the law of Moses, is indicated that condition which caused the temporary suspension of a Hebrew man or woman from religious and social privileges as a subject of the Theocracy.

1. About seventy specific cases of possible uncleanness are described, and others implied. Various modes of classifying them have been resorted to. The old Jewish writers made two classes, according to the length of the ceremonial suspension. The lighter class embraced the instances of uncleanness for the day; the heavier class, those of a longer period (*Pesietha*, in Ugol, xv, 1148; Maimonides, *Constitutions*, in Ugol, viii, 58, where the contaminated of the lighter class is called טָמֵא לַיּוֹם, *de die larandus*; comp. Lightfoot, *Harm. of O. T.* [Works by Pitman, ii, 122]; although he gives four classes, according to time). Other writers (see Cornelius à Lapide on Lev. xv, 22) make also two classes,

but on a different principle: "Duplex fuit immundities Hebr. Una erat peccatum, quia præcepto Dei vetita, talis erat comedere carnes immundas. Talis etiam erat pati lepram, etc. Altera non erat vetita, sed solum indicata et statuta, talis erat tangere leprosum, etc. Hæc non erant peccata, sed tantum inducebant irregularitatem quandam." Modern Jews profess to be bound only by the former of these classes. The threefold classification, however, which is indicated in the law of Moses itself seems to be most convenient, and is most commonly adopted—(a) "Every leper;" (b) "Every one that hath an issue;" (c) "Whosoever is defiled by the dead" (see Numb. v, 2). The lawgiver, no doubt, here refers to his own enactments in Leviticus, and under the three generic phrases includes all the instances of uncleanness.

(1.) He begins with leprosy, the gravest of all instances. A minute diagnosis of this terrible malady in its ceremonial character, and the purification which the law prescribed, are given in Lev. xiii. See *LEPROSY*.

(2.) Under the second head, of uncleanness from "issues," are included all those physical emanations or bodily discharges to which either sex is liable. They are described in their several details in the following passages: [1.] The woman's periodical issues in Lev. xv, 19-24, and irregular issues in ver. 25-27. These were alike unclean in themselves (the former for seven days, the latter during the irregularity), and communicated uncleanness during the day alike to "whosoever touched her," "her bed," or "anything that she sat on;" from which uncleanness they escaped "at even" by washing their clothes and bathing. Any man who so far forgot decency as to lie with her and be stained with her menstrual taint incurred an equally long defilement as the woman herself, and like her communicated uncleanness to the bed whereon he lay. On the day after the cessation of her issue (the eighth) the woman, for her purification, was to bring two turtle-doves or two young pigeons, one for a sin-offering and the other for a burnt-offering, to the priest, who was to make atonement for her before the Lord. [2.] The issues of males, two sorts of which are mentioned in Lev. xv, 3, produced uncleanness with effects precisely similar to those of women (see ver. 4-12). This is not the place to discuss the nature of these male fluxes; Michaelis adduces strong reasons for disputing the general opinion, which denies that the *Gonorrhæa virulenta* is referred to in the passage before us (*Laws of Moses* [Smith's transl.], art. cexii). See *ISSUE*. The purification prescribed for men under this defilement is identical with that for women (ver. 13-15). [3.] Sexual copulation, including conjugal intercourse, caused to both man and woman uncleanness "until the even," from which they were to cleanse themselves and their garments by bathing and washing (ver. 16-18). [4.] The final result of the sexual act in childbirth produced a still more marked defilement (see Lev. xii). The mother's uncleanness in this her puerperal state, on the birth of a boy, was identical in duration with that of her menstrual issues. Seven days was she unclean (ver. 2); on the eighth the child was circumcised (ver. 3); after which the mother remained in private, excluded from the sanctuary, during thirty-three days more (ver. 4). This period of forty days' defilement was doubled in the case of the birth of a maid child (ver. 5). The purification rites of the mother, however, were the same, whether observed at the end of the forty or of the eighty days. She brought a yearling lamb for a burnt-offering, and a young pigeon or turtle-dove for a sin-offering, unto the priest, that he might make atonement for her before the Lord, and she might be cleansed. In case of inability to bring the lamb, the substitution of another young pigeon or turtle-dove by the mother was allowed (ver. 6-8; comp. the Virgin Mary's humbler offering in her "low estate," Luke ii, 22-24). In our general article on the *LAW OF MOSES*, we had occasion to remark on the probable *substratum*

of moral and religious mystery which underlies much of the ceremonial enactments. The havoc made by sin on our human race seems most strongly indicated by the fact that the normal and inevitable conditions of our natural life are affected with uncleanness. The gradations of pollution from conception to parturition, and their remarkable culmination in the birth of the female child, are wonderfully significant of the original "transgression," and of woman's first and heavier share in it (1 Tim. ii. 14; comp. with Gen. iii. 6, 16, 17).

The two periods in the mother's purification are, however, different in character. "For seven days, immediately after she is brought to bed, she lies **בדמי נִינְאָה**, 'in the blood of her uncleanness; but the three-and-thirty following, **בדמי נְהִירָה**, 'in the blood of her purifying.' Although the privacy continued to the mother, she was after the seven days released from the ban of uncleanness, and did not communicate defilement to others, as in the previous period of her perfect isolation and disability. The old Jewish authorities are as usual very dogmatic on the point: 'In *Pesietha*, col. 4, it is written, **בדמי נְהִירָה**, "in the blood of her purifying:" **אִפְּלוּ שׁוֹפֵט דָּם כְּנֹהַר נְהִירָה**, "though she issue blood like a flood, yet is she clean." Nor doth she defile anything by touching it but what is holy" (Lightfoot, *Exercit. on St. Luke* [ed. Pitman], xii, 37).

(3.) Equally noticeable, as might be expected, are the traces of this havoc as displayed in the various uncleannesses of *death*—the third and last of our chapters of classification; and herein we recognise the deeper implication of our human race in the ruin, above all other living beings. "By the law of Moses," says Lightfoot, "nothing was unclean to be touched while it was alive, but only man: a man in leprosy was unclean to be touched, and a woman in her separation; but dogs, swine, worms, etc., were not unclean to be touched till they were dead; and there were also different degrees herein; while touching a dead beast brought uncleanness for a day, touching a dead man produced the uncleanness of a week," etc. (*Harm. of O. T.* as above). This gradation of defilement from contact with death is described—(a) In Lev. xi, 8, 11, 24, 26, 27, 31–35, 39, 40; xvii, 15. (b) In Lev. xxii, 4–8. (c) In Numb. xix, 11, 14, 16. (d) In Numb. vi, 9. In the first of these four sections, the uncleanness arises from the dead bodies of animals, fishes, birds, and reptiles. It was the shortest in duration, lasting in every case only "until even"; and it was to be terminated uniformly by the washing of the clothes. The last statute, Lev. xvii, 15, prescribed ablation of the person also for "every soul that eateth that which died of itself, or that which was torn with beasts." In the second section, the same defilement is described as incidental to the priests, no less than to the laity, from which they must free themselves by ablation. So much for the minor uncleannesses from the dead. Our third and fourth sections contain the instances where the major disability of seven days is occasioned by contact with human dead: "Whosoever toucheth one that is slain with a sword in the open fields, or a dead body, or a bone of a man, or a grave, shall be unclean seven days." As the defilement was deeper, so was the mode of purification more elaborate and solemn. For the details of the ceremony—the sacrifice of the red heifer without the camp; the sevenfold sprinkling of her blood before the tabernacle; the utter consumption by fire of the slain animal; the cedar-wood, hyssop, and scarlet cast into the burning mass; the gathering-up of the ashes; their mixture in running water for "the water of separation;" the sprinkling of this water over the unclean person, on the third and the last of the seven days; his own washing of his clothes and bathing of his person, and his final cleansing on the evening of the seventh day—the reader will consult the 19th chapter of Numbers. Our fourth section

describes the interruption of the Nazarite's vow by any sudden death happening in his presence. This mortality "lost him" all the days of his vow which had transpired, and required for its own expiation also the usual hebdomad, on the last day of which he was to shave his head, and on the morrow bring two young pigeons or two turtles to the priest, that he might present them as a sin-offering and a burnt-offering as an atonement for the polluted. See PURIFICATION.

2. A few stray instances remain of a peculiar kind, which we proceed to class in a supplementary notice. (1.) We have then under this head, first, the cases of what may be called official uncleanness. [a.] The priest who superintended the holocaust of the red heifer was rendered unclean until evening by the part he took in the sacred rite; from this defilement he purified himself by the washing of his clothes and the ablation of his person (Numb. xix, 7). This uncleanness was the more remarkable from the precautionary character of the law, which in other cases seemed strongly to aim at preserving the priests, as far as might be, from the incidence of ceremonial pollution (see Lev. xxi, 1–4). [b.] The man that burned the heifer was involved in the same defilement as the priest, from which he was also extricated by a similar purification (Numb. xix, 8). [c.] So, again, the man who gathered the ashes of the consumed heifer was unclean until evening; but from this disability he was released by the lesser ceremony of simply washing his clothes (ver. 10). Similar instances of uncleanness, arising out of official routine, occur in the ordinances of the Day of Atonement. [d.] The man who dismissed the scape-goat was to wash his clothes and bathe himself before returning to the camp (Lev. xvi, 26), and a like purification was required of him who burned the bullock and the goat of the sin-offering (ver. 28). [e.] Under this head of official uncleanness, we may perhaps place the abnormal case of the Israelitish soldiers who slew the Midianites at the command of Moses (Numb. xxxi, 17). They were to remain outside the camp seven days; purify themselves on the third and on the seventh day; cleanse their raiment, etc., with either fire or the water of separation, as the case might require, and on the last day wash their clothes (ver. 19, 20, 23, 24).

(2.) Besides these cases of official uncleanness, we find one instance *sui generis* occurring in Deut. xxiii, 10, 11, which, with its purification, is thus described: "If there be among you any man that is not clean by reason of uncleanness that chanceth him by night, then shall he go abroad out of the camp . . . but when evening cometh he shall wash himself with water, and when the sun is down, he shall come into the camp again." It may be observed that this case is not designated by the usual term **טִמְאָה**, the phrase merely denotes its accidental character, **לֹא-טִמְאָהוּ בַּיָּמָה-לַיְלָה**.

(3.) Our enumeration, to be complete, should include the aggregate uncleanness of the priest and his household, and the nation (Lev. xvi); this was expiated by the grand ritual of the great Day of Atonement, for the imposing details of which ceremony we must refer the reader to our article on that subject.

3. Some few historical instances of uncleanness, and more of purification, are mentioned both in the Old Test. and the New Test. As being, however, applications only of some of the statutes which we have given above, we shall refrain from adducing them here, except one case, which is important because it led to the enactment of a proviso in the law. "There were certain men, who were defiled by the dead body of a man, that they could not keep the Passover on that day." They stated their difficulty to Moses and Aaron, the former of whom referred it to the Lord, and obtained from him a statute allowing a supplemental celebration of the Passover for such as were incapacitated in the manner in question or on a distant journey (Numb. ix, 6–12). See PASSOVER.

In contrast with this relief was the inflexible penalty threatened against all wilful neglect of the various rites of purification prescribed in the law. The fullest formula of this penalty occurs in Numb. xix, 20: "The man that shall be unclean and shall not purify himself, that soul shall be cut off from among the congregation [or, as it runs in ver. 13, 'from Israel'], because he hath defiled the sanctuary of the Lord." That this *excision* meant death is evident from Lev. xv, 31, and xx, 9 (see Michaelis, *Laws of Moses* [Smith's transl.], iv, 43, and Keil on *Gen.* xvii, 14). Jehovah, the theocratic king and holy God, who had his own ways of "cutting off" the disobedient, is pleased to include in his sentence of excision the reason for its infliction—"because he hath defiled the sanctuary of the Lord." This is in direct accordance with the principle by which the Divine Legislator repeatedly sanctions his laws: "Ye shall be holy; for I the Lord your God am holy" (Lev. xix, 2, and frequently elsewhere), and it was the recognition of these saintly duties which always characterized the pious Israelite. "God" (says the psalmist, *Psa.* lxxxix, 7) "is greatly to be feared in the assembly of the saints [קְדוֹשִׁים], which is likewise the word used in the formula of Leviticus; the phrase קְדוֹשִׁים קְדוֹשִׁים also, which occurs in ver. 5 of this psalm, is the frequent designation of the political organization of the Israelites], and to be had in reverence of all them that are about him."

The Mosaic ritual on uncleanness illustrates much of the phraseology of the Psalms and the prophets, and (what is more) many statements in the New Test., not only in obvious comparisons, as in the Epistle to the Hebrews, but in oblique phrases, such as in Eph. v, 26, 27, where the apostle, "speaking of Christ's washing the Church, that he might present it to himself 'without spot or wrinkle,' etc., seemeth to allude to the Jews' exceeding great curiousness in their washings for purification" (Lightfoot, who quotes Maimonides in *Mikraoth*, III, iii, 297).

In conclusion, we must refer to the notices of purification which occur in the New Test. These are of three kinds—(a) the *legitimate* instances, such as that of the Virgin Mary (Luke ii, 22), the leper (Mark i, 41), the Nazarite (Acts xxi, 23, 24), all of which make express reference to the law; (b) the *unauthorized* cases, such as the traditional and Pharisaical washings of the hands (*Matt.* xv, 2), and of tables, cups, and platters (*Mark* vii, 4), all which the Lord condemned in strong terms as superstitious encroachments on the divine law; (c) the *doubtful* cases, such as the case of those who came to Jerusalem to purify themselves before the Passover (*John* xi, 55), and the discussion mentioned in *John* iii, 25. "Their controversy," says Lightfoot, "was partly about the pre-eminence of the Judaical washings and the evangelical baptism—and here the Jews and John's disciples were at opposition, and partly about the pre-eminence of John's baptism and Christ's—and here the Jews would huss them on in the contestation" (*Works* [ed. Pitman], v, 67).

4. Our object in this article has been to collect the *scriptural* laws on uncleanness and purification, and have avoided the Jewish traditional doctrines. These may be discovered by the curious on such subjects by a careful use of the indexes to the works of Lightfoot, Schöttgen (*Horæ Heb. et Talmud.*), and Surenhusius (*Mishna*). Dr. Wotton, in his work on the *Mishna* (i, 160-170), has analyzed the *Seder Taharoth*, or *Order of Purifications*, which contains the authorized tradition on the subject of our article. "In this order," says Wotton, "more than in any of the rest, the true Pharisaical spirit which our blessed Lord so severely reprehends in *Matt.* xv and *Mark* vii is plainly and fully seen." We subjoin the names of the chief "titles" or sections of this order: 1. *Kelim*, vessels; 2. *Ohaloth*, tents—treating of pollutions from the dead; 3. *Nega'im*, plagues—of leprosy; 4. *Parah*, the red heifer; 5. *Taha-*

roth, purifications—relating to lesser uncleannesses which last but a day; 6. *Mikraoth*, collections of water for the cleansing baths, etc.; 7. *Niddah*, menstrual pollutions; 9. *Zabim*, men that have seminal uncleannesses; 10. *Tibbul Yom*, washed by day (see above); and 11. *Yudaim*, hands—the constitutions in which title have no foundation in the written law.—Kitto. See TALMUD.

Uncles, JOSEPH, a Methodist Episcopal minister, was born Feb. 17, 1812, in Anne Arundel County, Md. He was converted when about eighteen years old; followed school-teaching for some time in Eastern Pennsylvania; graduated at Alleghany College in 1838; labored two years as professor of moral science in Madison College, Uniontown, Pa., and subsequently as principal of Woodfield Academy, O., and at Meadville. In 1843 he joined the Erie Conference, and labored successively at Greenville, Randolph, Forestville, Portland, Jamestown, Silver Creek, Northeast, and Painesville. In 1854 Mr. Uncles was prostrated by disease, and retired to Meadville, where he spent two years as a supernummate, and where, after two years' labor at Sharon, he died, Nov. 12, 1858. He was devout, energetic, and eminently successful. See *Minutes of Annual Conferences*, 1859, p. 198; Simpson, *Cyclop. of Methodism*, s. v.

Unconditioned Election. See ELECTION OF GRACE.

Unction (*anointing*), an ecclesiastical ceremony which consists in the application of sacred oil to a person or thing. In the Roman Catholic Church there are several of these ceremonies, which are described below. See ANOINTING.

1. *Unction of an Altar.*—This consists in anointing with holy oil the five crosses of an altar-slab by the bishop who consecrates it. The Latin formula is as follows: "Consecratur et sanctificetur hoc sepulchrum. In nomine Patris, et Filii, et Spiritus Sancti. Pax huic domui." This rite has been abolished in the Church of England since the Reformation. See CHRISM.

2. *Unction of the Baptized.*—Some, but not all, of the ancient ritualists mention an unction preceding baptism, and used by way of preparation for it. It was called *χρίσις μυστικὴ ἑλαίου*, the "unction of the mystical oil." It was consecrated by the bishop, with the prayer that "God would sanctify the oil in the name of the Lord Jesus, and grant it spiritual grace and efficacious power, that it might be subservient to the remission of sins, and the preparation of men to make their profession in baptism, that such as were anointed therewith, being freed from all impiety, might become worthy of the initiation according to the command of his only begotten Son." Men were thus anointed that they might be partakers of the true olive-tree, Jesus Christ; and the exorcised oil was a symbol of their partaking of the fatness of Christ, and an indication of the flight and destruction of the adverse power. See Bingham, *Christ. Antiq.* bk. xi, ch. ix, § 2, 3. See BAPTISM.

3. *Unction of the Confirmed.*—This is anointing with holy oil those confirmed. In the Roman Church the formula runs thus: "Signo te signo crucis; et confirmo te chrismate salutis. In nomine Patris, et Filii, et Spiritus Sancti. Amen." In the Church of England this rite was abolished at the Reformation, and in the Scottish Episcopal Church, as well as the Protestant Episcopal Church of the United States, no unction is now used. See CONFIRMATION.

4. *Unction of a Priest.*—This is anointing with holy oil a person promoted to the priesthood. This rite is peculiarly Latin. When using the holy oil, the bishop who ordains prays thus: "Consecrare et sanctificare digneris, Domine, manus istas per istam unctionem et nostram benedictionem. Amen. Ut quæcumque benedixerint benedicantur, et quæcumque consecraverint consecrentur, et sanctificentur, in nomine Domini nostri Jesu Christi. Amen." There is no such consecration in the

Greek form for bestowing the priesthood. See CONSECRATION.

5. *Unction of the Sick*. See EXTREME UNCTION.

UNCTION, EXTREME. See EXTREME UNCTION.

UNCTION IN PREACHING is that gracious assistance of the Holy Spirit which quickens the mental powers, gives a glow to the feelings, and imparts such a spiritual tone to the preaching of the Word as renders it efficacious in making the truth convincing and authoritative. See SPIRIT (HOLY), BAPTISM OF.

Undergird (ὀποσῶννυμι, lit. to *gird under* the breast, 2 Mace. iii, 19; comp. Elian, *V. II.* x, 22), a naval term employed (Acts xxvii, 17) to designate the act of passing cables around the middle of a ship in order to strengthen it (so Polybius, xxvii, 3, 3; Appian, *Bell. Civ.* v, 91; Plato, *Rep.* p. 616). See STIRP.

Underhill, JAMES EVAN, an English Wesleyan missionary, was a native of Staffordshire. He was appointed to Jamaica, W. I., by the Conference of 1817. His diligence in study and knowledge of Methodist doctrine and discipline qualified him to give instruction and manage wisely the affairs of his charges. He died of fever at Morant Bay, Jamaica, Sept. 24, 1821, in the twenty-seventh year of his age. He was much beloved by his people. See *Minutes of Wesleyan Conference*, 1822.

Undersetter (קַתֶּפֶת, *kathéph*, a *shoulder*, as usually rendered), an appendage to the laver (q.v.) in the Temple of Solomon (1 Kings vii, 30, 31), consisting, according to Keil (*Comment.* ad loc.) of props running up from the body of the vehicle and holding the basin between them.

Underwood, ALVAN, a Congregational minister, was born at West Woodstock, Conn., Sept. 8, 1777. He graduated at Brown University in 1798, studied theology with Rev. Dr. Sanger, and was ordained pastor in his native place in 1801, dismissed in 1833, and thereafter supplied for nearly ten years vacant churches, particularly those in Westford and South Killingly, and finally, for a year or more, his former charge in Woodstock, where he died, April 4, 1858. He published a few sermons and tracts. See *Cong. Quarterly*, 1861, p. 355.

Underwood, Henry Beman, a Congregational minister, son of Rev. Almon Underwood, was born at Poughkeepsie, N. Y., Dec. 25, 1839. He studied at Monson Academy, Mass., graduated from Williams College in 1862, and from Andover Theological Seminary in 1865, after having spent two years in the Union Theological Seminary. He was ordained at Ringwood, Ill., Jan. 19, 1866, and was acting pastor there until the following year, when he began preaching at East Longmeadow, Mass., remaining two years. His next field of labor was Marlborough, N. H.; then Baxter Springs, Kan. In 1871 he was installed pastor of the church at Hillsborough Bridge, N. H., in which position he remained for one year and four months. The last charge which he filled was at Algona, Ia., where he became acting pastor in 1873, and died Sept. 2, 1875. See *Cong. Quarterly*, 1876, p. 436.

Underwood, Joseph, a Congregational minister, was born at Bradford, Vt., Oct. 2, 1796. He acquired his preliminary education at Kimball Union Academy from 1817 to 1820, and at Chesterfield Academy in 1821, and graduated from Bangor Theological Seminary in 1824. His ordination occurred at New Sharon, Me., and he was pastor there from 1826 to 1831. During 1827-30 he was also serving as acting pastor at Industry. In this latter office he served the Church at North Augusta from 1832 to 1833. He was installed pastor at Williamsburgh, Me., in 1833, and remained there two years, during which time he was also acting pastor at Sebec. The two years following he served as a home missionary in Foxcroft, Dover, Atkinson, Milo, and Bradford, when he was reinstalled at New Sharon, Feb. 22, 1837, remaining there two and a half years. At Millport and Veteran, N. Y., he was installed pastor in

1841, and was dismissed in 1843. As acting pastor, he preached at Hardwick, Vt., for two years, and then, in December, 1846, he was installed there, continuing in charge until February, 1858. During the following year he was acting pastor at Burke, Vt.; from 1860 to 1866 at Barnet; and from 1870 to 1872 he again served the Church at Burke. After the last date he resided, without charge, at Hardwick, of which town he was a representative in the Vermont Legislature in 1856, 1868, and 1869. He died July 27, 1876. See *Cong. Quarterly*, 1877, p. 426.

Undine (from *unda*, "wave"), in mediæval superstition is a water-sprite, corresponding nearly to the nymphs of classical mythology. Paracelsus has given several minute rules what to do and how to act when one has happened to marry an Undine, and Friedrich de la Motte Fouqué has treated the subject in a German tale entitled *Undine*.

Ungal. Several of the water-gods of the ancient Accadian mythology have names beginning with Ungal, as *Ungal-aba*, "the king of the wave;" *Ungal-ubba*, "the king of the sea;" *Ungal-ariada*, "the king of the river." See Lenormant, *Chald. Magic*, p. 184.

Ungchan, JOHN. See JOHN, PRESTER.

Unger, SALOMON GOTTLÖB, a Protestant divine of Germany, was born April 25, 1752, at Nieder-Pöllnitz, near Weida, and died June 16, 1818, at Cölleda, in Thuringia. He wrote, *Anmerkungen über den Homs oder von der Weissagung Davids und der Stärke ihres Beweises für die Göttlichkeit und Messianität Jesu* (Leips. 1784):—*De Auctoritate Librorum V. T. in Familia Dei* (ibid. 1785):—*Die Schriften des alten Bundes*, etc. (ibid. 1787):—*De Thernis Sionis Jos. xi, 8, et xiii, 6, Memoratis Pauca Disp.* (ibid. 1803):—*Lutherus Auctoritatem Librorum Mosis apud Christianos Vindex* (ibid.). See Fürst, *Bibl. Jud.* iii, 461; Winer, *Handb. der theol. Literatur*, i, 820, ii, 811. (B. P.)

Ungewitter, REINHARD CHRISTOPH, a Protestant theologian of Germany, was born at Marburg, Jan. 25, 1715. He studied in his native place, and when twenty-one years old he publicly defended his dissertation *De Studio Prophetico sobrie Instituendo*. After completing his studies, he went to Cassel in 1736, and until the year 1778 he was actively engaged in pastoral duties. While on a visitation in his function as superintendent and member of consistory, he was paralyzed, and was thus deprived of the power of speech. Although unable to preach, yet he performed the duties connected with his ecclesiastical position, and died Dec. 31, 1784. He published, *Erklärung des Briefes des heiligen Jakobs* (Lengo, 1754):—*Commentatio de Theologo Tempori Serviente* (Hersfeldiae, 1755):—*Versuch einer freien Uebersetzung der beiden Briefe Petri und der drei Briefe Johannis* (Frankfort, 1757):—*Predigten über wichtige Glaubenswahrheiten und Lebenspflichten* (Cassel, 1780-81, 2 vols.). See Döring, *Gelehrte Theologen Deutschlands*, iv, 551 sq. (B. P.)

Unhallowed Uses. In the consecration of a church or chapel among the Episcopalians, the building is said to be separated henceforth "from all unhallowed, ordinary, and common uses." The word "unhallowed," as here used, does not mean simply such things as are morally evil, impure, and contrary to the spirit of religion, which is the popular sense, but strictly all such purposes as are not hallowed, made sacred, and consecrated to holy purposes.—Stanton, *Dict. of the Church*, s. v.

Uniates are Eastern Christians in external communion with the see of Rome, and are most numerous in those provinces which formerly belonged to Poland. When Sigismund III was elected to the crown of Poland, being a zealous agent of the Jesuits, he at once took measures for reconciling the Polish Church to Rome. His plans were so successful that the archbishop of Kiev summoned a synod at Brest, in Lithuania, to

whom he presented the necessity and advantages of a union with Rome. The clergy favored the project, but it met with a strong opposition from the laity, and could not then be carried into effect. At a synod which met at the same place Dec. 2, 1594, the archbishop and several bishops gave their assent to the scheme of union which had been proposed at the Council of Florence, thus recognising the *Filioque*, or double procession of the Nicene Creed, and acknowledging the supremacy of the pope. They stood out, however, for retaining the use of the vernacular Slavonic in the celebration of divine service for the ritual and discipline of the Eastern Church. On the return of the bishops sent to Rome to announce this event, the king, in 1596, convened the synod at Brest for the publication and introduction of the union. This was met by a public protest on the part of the opposite party, which repudiated the acts of the Uniates, and declared their unaltered attachment to the ancient Church of their country and to the patriarch of Constantinople. Sigismund deprived them of their churches and convents, and forbade the promulgation of Greek doctrines in his dominions. This division of the Church continued in full force until the partition of Poland, in 1772, at which time between two and three millions of the Uniates gave up their allegiance to Rome, and returned to the Eastern Church. In 1839 2,000,000 more were reconciled; but there are still about 300,000 in Russia and 3,000,000 in Austria. See Krasinski, *Reform in Poland*; Mouravief, *Hist. of the Church of Russia*; Neale, *Patriarchate of Alexandria*.—Blunt, *Hist. of Sects*, s. v.

Unicorn is the invariable but unfortunate rendering in the A. V. of a Heb. word which occurs nine times in three slightly varied forms (𐤄𐤊𐤍, *reēm*, Numb. xxiii, 22; xxiv, 8; plur. [𐤄𐤊𐤍𐤍, *reēmim*] Psa. xxix, 6; Isa. xxxiv, 7; 𐤄𐤊𐤍, *reēm*, Psa. xlii, 10; 𐤄𐤊𐤍, *reēm*, Job xxxix, 9, 10; and 𐤄𐤊𐤍, *reēm* [only with plur. 𐤄𐤊𐤍𐤍, *reēmim*], Psa. xxii, 21; never with the article; Sept. *μορκεύς* or *ἀέρις*; Vulg. *rhinoceros* or *unicornis*) as the name of some large wild animal. More, perhaps, has been written on the subject of the unicorn of the ancients than on any other animal, and various are the opinions which have been given as to the creature intended. The etymology of the Heb. term (according to Gesenius, from 𐤄𐤊𐤍 = 𐤄𐤊𐤍, *to be high*; but according to Fürst, from an obscure root 𐤄𐤊𐤍, *to roar*) affords no clear indication of the animal, and hence we must resort to indirect means for elucidating the subject.

I. Scriptural Characteristics.—The great strength of the *reēm* is mentioned in Numb. xxiii, 22; Job xxxix, 11; his having two horns in Dent. xxxiii, 17; his fierce nature in Psa. xxii, 21; his indomitable disposition in Job xxxix, 9-11; the active and playful habits of the young animal are alluded to in Psa. xxix, 6; while in Isa. xxxiv, 6, 7, where Jehovah is said to be preparing "a sacrifice in Bozrah," it is added, "*Reēmim* shall come down, and the bullocks with the bulls." The following is a close rendering of Job's famous description of this animal (xxxix, 9-12):

"Will Reym be disposed to serve thee?
Would he perchance lodge on thy stall?
Canst thou tie Reym in a furrow [with] his braid?
Will he perchance harrow valleys after thee?
Wilt thou trust in him, because vast [is] his force;
Or leave to him thy labor?
Wilt thou believe in him, that he will return [home] thy seed,
Or [into] thy threshing-plat gather [it]?"

II. Modern Attempts at Identification.—1. The *reēm* of the Hebrew Bible has little at all to do with the one-horned animal mentioned by Ctesias (*Indica*, iv, 25-27), Elian (*Nat. Anim.*, xvi, 20), Aristotle (*Hist. Anim.*, ii, 2, 8), Piny (*H. N.* viii, 31), and other Greek and Roman writers (Solin, 55; Nieph. *H. E.* ix, 19), as is evident from Dent. xxxiii, 17, where, in the blessing of Joseph, it is said, "His glory is like the firstling of his bullock,

and his horns are like the horns of a *unicorn*" (𐤄𐤊𐤍 𐤄𐤊𐤍, not, as the text of the A. V. renders it, "the horns of unicorns." The two horns of the *reēm* are "the ten thousands of Ephraim and the thousands of Manasseh"—the two tribes which sprang from one—i. e. Joseph, as two horns from one head. This text puts a one-horned animal entirely out of the question, and, in consequence, disposes of the opinion held by Bruce (*Trav.*, v, 89) and others, that some species of rhinoceros is denoted, or that maintained by some writers that the *reēm* is identical with some one-horned animal said to have been seen by travellers in South Africa and in Thibet (see Barrow, *Travels in South Africa*, i, 312-318; *Asiatic Journal*, xi, 154), and identical with the veritable unicorn of Greek and Latin writers.

Little, however, can be urged in favor of the rhinoceros, for, even allowing that the two-horned species of Abyssinia (*R. bicornis*) may have been an inhabitant of the woody districts near the Jordan in Biblical times, this pachyderm must be out of the question, as one which have been forbidden to be sacrificed by the law of Moses; whereas the *reēm* is mentioned by Isaiah as coming down with bullocks and rams to the Lord's sacrifice. "Omnia animalia," says Rosenmüller (*Schol. in Is.*, loc. cit.), "ad sacrificia idonea in unum congregantur." Again, the skipping of the young *reēm* (Psa. xxix, 6) is scarcely compatible with the habits of a rhinoceros. Moreover, this animal, when unmolested, is not generally an object of much dread, nor can we believe that it ever existed so plentifully in the Bible lands, or even would have allowed itself to be sufficiently often seen so as to be the subject of frequent attention, the rhinoceros being an animal of retired habits.

2. Bochart (*Hieroz.* ii, 335) contends that the Hebrew *reēm* is identical with the Arabic *rēm*, which is usually referred to the *Oryx leucoryx*, the white antelope of North Africa, and at one time, perhaps, an inhabitant of Palestine. Bochart has been followed by Rosenmüller, Winer, and others.

But with regard to the claims of the *Oryx leucoryx*, it must be observed that this antelope, like the rest of the family, is harmless unless wounded or hard pressed by the hunter; nor is it remarkable for the possession of any extraordinary strength. Figures of the oryx frequently occur on the Egyptian sculptures, "being among the animals tamed by the Egyptians and kept in great numbers in their preserves" (Wilkinson, *Anc. Egypt.* i, 227, ed. 1854). Certainly this antelope can never be the fierce indomitable *reēm* mentioned in the book of Job (see Lichtenstein, *Ueb. d. Antilopen des nördl. Africa* [Berl. 1826]). See ANTELOPE.

3. Arnold Boot (*Animad. Sacr.* iii, 8 [Lond. 1644]), with much better reason, conjectures that some species of *Urus*, or wild-ox, is the *reēm* of the Hebrew Scriptures. He has been followed by Schultens (*Comment. in Jobum xxxix*, 9, who translates the term by *Bos sylvestris*: this learned writer has a long and most valuable note on this question), Parkhurst (*Heb. Lex.* s. v. 𐤄𐤊𐤍), Maurer (*Comment. in Job.* loc. cit.), Dr. Harris (*Nat. Hist. of the Bible*), and by Cary (*Notes on Job*, loc. cit.).

Considering that the *reēm* is spoken of as a two-horned animal of great strength and ferocity, that it was evidently well known and often seen by the Jews, that it is mentioned as an animal fit for sacrificial purposes, and that it is frequently associated with bulls and oxen, we think there can be no doubt that some species of wild-ox is intended. The allusion in Psa. xcii, 10, "But thou shalt lift up, as a *reēm*, my horn," seems to point to the mode in which the *Borile* use their horns, lowering the head and then tossing it up. But it is impossible to determine what particular species of wild-ox is signified. At present there is no existing example of any wild bovine animal found in Palestine; but negative evidence in this respect must not be interpreted as affording testimony against the supposition that wild

cattle formerly existed in the Bible lands. The lion, for instance, was once not infrequently met with in Palestine, as is evident from Biblical allusions; but no traces of living specimens now exist there. Dr. Roth found lions' bones in a gravel bed of the Jordan some few years ago; and it is not improbable that some future explorer may succeed in discovering bones and skulls of some huge extinct *Urus*, allied, perhaps, to that gigantic ox of the Hercynian forests which Caesar (*Bell. Gall.* vi. 20) describes as being of a stature scarcely below that of an elephant, and so fierce as to spare neither man nor beast should it meet with either. "Notwithstanding assertions to the contrary," says Col. Hamilton Smith (Kitto, *Cyclop.* art. "Reem"), "the urus and the bison were spread anciently from the Rhine to China, and existed in Thrace and Asia Minor; while they, or allied species, are still found in Siberia and the forests both of Northern and Southern Persia. Finally, though the buffalo was not found anciently farther west than *Araecoria*, the gigantic *Gaur* (*Bibos gaurus*) and several congeners are spread over all the mountain wildernesses of India and the Sheriff al-Wady; and a further colossal species roams with other wild bulls in the valleys of Atlas. We figure *Bibos cavifrons*, a species which is believed to be still found south-west of the Indus, and is not remote from that of the Atlas valleys." See WILD BULL.

Wild Bull (*Bibos cavifrons*).

4. Russell (*Aleppo*, ii. 7), Robinson (*Bibl. Res.* ii. 412), and Gesenius (*Thesaur.* s. v.) have little doubt that the buffalo (*Bubalus bubalus*) is the *reem* of the Bible; and this opinion is shared by Umbreit, Hitzig, Ewald, Hengstenberg, and other commentators. Although the *Chainsa*, or tame buffalo, was not introduced into Western Asia until the Arabian conquest of Persia, it is possible that some wild species (*Bubalus arnee*, or *B. brachycerus*) may have existed formerly in Palestine. See BUFFALO.

III. *The Unicorn Proper*.—1. *Legendary Notices*.—Throughout classical antiquity (as seen above) vague notions of a true unicorn prevailed. In the *ὄναι ἄγριοι* of Ctesias, which were larger than horses—white, with a horn on the forehead a cubit long, which were very swift and strong, not ferocious unless attacked, and then irresistible, so that they could not be taken alive—we can trace the original of the familiar form that figures in the English national heraldic shield. Aristotle and Herodotus follow Ctesias, and Strabo gives the unicorn a deer-like head. Oppian makes it a bull with undivided hoofs and a frontal horn; and Caesar, who puts it in the Hercynian forest, gives its single horn palmate branches like those of a deer. Pliny draws the portrait with the greatest attention to details. It was a most savage beast, generally like a horse, with the head of a deer, the feet of an elephant, the tail of a boar, a deep bellying voice, and a single black horn, two cubits long, projecting from the middle of its forehead. See the *Ann. and Mag. of Nat. Hist.* Nov. 1862.

Although the medallie history of the

kings of Macedon (Havercampus, *Gen. Hist.* [in the Dutch language]) furnishes no coins bearing a single-horned goat, it is still asserted by Maillot and others that such was to be found among their ensigns; but this was most probably after the Macedonian conquest; for a single-horned ibex appears on the bas-reliefs of Che el-Minar; another occurs on a cylinder; and one cast in brass, supposed to have been the head of a Macedonian standard, was found in Asia Minor, and presented to the Antiquarian Society of London. If mysterious names were resolvable by the canons of pictorial definition, the practice of imagining horns to be affixed to the most sublime and sacred objects would be most evident from the radical meaning of the word cherub, where the notion of horns is everywhere blended with that of "power and greatness." See CHERUBIM. There were also horns at the corners of altars—the beast with ten horns in Daniel, etc. (ch. vii). In profane history we have the goat-head ornament on the helmet of the kings of Persia, according to Ammianus, more probably Ammon horns: such Alexander the Great had assumed; and his successors in Egypt and in Persia continued a custom even now observed by the chief cabossiers of Ashantee, who have a similar ram-head of solid gold on the front of their plummy war-caps. Indeed, from early antiquity Greek and Ionian helmets were often adorned with two horns; among others the head of Seleucus I (Nicator) appears thus on his coins. The practice extended to metal horns being affixed to the masks or chaffrons of war-horses (so coins of Seleucus Nicator) and of elephants (Antiochus Soter); and they form still, or did lately, a part of the barbed horse-armor in Kajalistan. Triple-horned and bicorn helmets are found on early Gallic and Iberian coins; they were again in use during the chivalrous ages; but the most remarkable, the horn of strength and dominion, is seen elevated on the front of the helmet impressed on the reverse of the coins of the tyrant Tryphon, who, in his endeavors to obtain Syria, was at war with Antiochus Sidetes during the æra of the Maccabees, and was not likely to omit any attribute that once belonged to its ancient kings. See HORNS.

2. *Scientific Descriptions*.—In later times the fancy ran riot in describing and figuring the unicorn, and no one who attempted a *Historia Naturalis* thought his work complete without full particulars concerning this interesting beast. As some of the descriptions of the ancients were a little inconsistent with each other, and as the materials were too valuable to allow any to be sacrificed, different species of unicorn were established, in the copiousness of which the most fastidious student might satisfy his choice. Thus there were the wald-esel, the meer-wolf, the ox-hoofed unicorn, the camel-hoofed unicorn, the sea-unicorn (not the cetacean so named), the two-horned wald-esel (one horn behind the other), and several others, all of which are duly

Unicorn (*Rhinoceros simus*).

figured by the indefatigable Johnston (*Hist. Nat.* 1657).

Admitting that there is abundance of chaff in all this, naturalists have for some time been inclining to admit that there may be some little wheat also (see Meyer, *Ueb. d. Säugethier Reem* [Leips. 1796]). The rhinoceroses of India and Africa showed that a single central horn was not in itself unnatural; and the discovery of several species of this huge pachyderm in the southern parts of the latter continent has brought out some features of the old descriptions which had been assumed to be fabulous. Some years since the missionary Campbell excited much interest by sending home from South Africa the head of a rhinoceros which came much nearer that of the traditional unicorn than anything as yet known to naturalists. It bore a single straight slender horn, projecting from the face to the height of three feet, with a small tubercle-shaped horn immediately behind this. The zoological researches of Dr. Andrew Smith, and the exploits of not a few naturalist sportsmen in the wild-beast regions lying to the north of the Cape Colony, have made us familiar with this species (*Rhinoceros sinus*), as well as others with a similar arrangement of horns.—Kitto; Smith; Fairbairn.

Unicūlus, a Low-Latin term for an alms-box with a perforated cover.

Uniformity. The ecclesiastical use of this word is to denote the use of one and the same form of public prayers, administration of sacraments, and other rites, etc., prescribed by the Acts of Uniformity. The first of these was issued by Parliament during the reign of Elizabeth, and provided—for the first offence, forfeiture of one year's profits and six months' imprisonment; for the second offence, deprivation of all spiritual promotions and imprisonment for one year; and for the third offence, deprivation of all spiritual promotions and imprisonment for life (see stat. 1 Eliz. c. 2, § 4-8). According to the act passed in the reign of Charles II, 1662, every person obtaining preferment in the Church or universities must declare his assent to everything contained in the *Book of Common Prayer*. See CONFORMITY.

Unigenitus (so called from its first word, referring to the *only-begotten Son*), THE BULL, was an instrument which was issued by pope Clement XI. and made its appearance on Sept. 8, 1713. It was directed against the French translation of the New Test. with notes, published by Quesnel, a celebrated Jansenist. In consequence of the disputes which this book had occasioned, it had previously been condemned in 1708; but, this step being found ineffectual, Clement proceeded to condemn one hundred and one propositions contained in the notes. The following may be taken as a specimen of the opinions denounced by this bull: "No graces are given except through faith." "The reading of the Sacred Scriptures is for all." "The obscurity of the Sacred Word is no reason for laymen to dispense themselves from reading it." "The Lord's day ought to be sanctified by Christians for works of piety, and, above all, for the reading of the sacred Scripture. It is damnable to wish to withdraw a Christian from this reading." This bull, procured by Louis XIV and the Jesuits, produced great commotions in France. Forty Gallican bishops accepted it; but it was opposed by many others, especially by Noailles, bishop of Paris. Sixteen bishops suspended the bull in their dioceses. They were supported by the universities of Paris, Rheims, and Nantes, and by the Paris faculties of theology, law, and arts. Many of the prelates and other persons appealed in vain to a general council, and were for this reason called Appellants. A persecution was raised against those who adopted the principles of the Jansenist Quesnel, and many of them were obliged to flee

their country. This bull was, however, overruled for good. It tended to confirm Protestants in their separation from Rome; and it affords a full and satisfactory answer to the falsehood put forth by popish priests, that they do not hide the Scriptures from the people. See Blunt, *Dict. of Theol. s. v.*; Farrar, *Eccles. Dict. s. v.*

Unio Mystica (*mystical union*) is a theological term applied to that intimate union between God and man that results through the exercise of saving faith. See Hagenbach, *Hist. of Doctrines* (1869), i, 188; ii, 288.

Union American Methodist Episcopal Church, THE, was founded by Rev. Peter Spencer, in Wilmington, Del., June, 1813, and was composed of seceding colored members of the Methodist Episcopal Church. It was chartered under the title of "The African Union Church," which it retained until after the war, when its present name was adopted. Originally the ministers served without compensation, and without any limit to their term of service. The societies, though, adopting common articles of religion, usages, and discipline, were distinct from each other. In 1871 a convention was called, which adopted an itinerant ministry, limiting the pastoral term to two years; and permitting compensation. The doctrines are precisely those of the Methodist Episcopal Church, as are also the general features of the government. They have a general conference, meeting once in four years; annual conferences, of which there are now five; quarterly conferences; love-feasts; and class-meetings. A general superintendent is elected by the General Conference, who holds his office for four years, and is eligible to re-election. The general superintendent in 1878 was Rev. Edward Williams, and two superintendents, Rev. John C. Ramsey and Rev. A. S. Sandford, D.D. The statistics in 1876 are given as follows:

Conferences.	Preachers.	Members.	S. S. Sch-lars.	Church Property.
Delaware and Pennsylvania.....	60	1347	2180	\$50,460
New England.....	25	600	200	45,000

Canada West.....	5	300	50	5,000
Arkansas.....	25	315		5,000
Total.....	121	2862	2533	\$140,000

UNION WITH CHRIST, that act of divine grace by which we are joined to Christ; and is considered, 1. As *virtual*, or that which was formed from all eternity (Eph. i. 4); 2. *Literal*, or *spiritual*, formed in the moment of our regeneration (John xvii. 26; 1 John iv. 13). It is represented in the Scripture by the strongest expressions language can admit of, and even compared to the union between the Father and the Son (John xvii, 11, 21, etc.). It is also compared to the union of a vine and its branches (xv, 4, 5); to the union of our food with our bodies (vi, 56, 57); to the union of the body with the head (Eph. iv, 15, 16); to the conjugal union (v, 23, 30); to the union of a king and his subjects (Matt. xxv, 34, 40); to a building (1 Pet. ii, 4, 5; Eph. ii, 21, 22). It is also represented by an identity or sameness of spirit (1 Cor. vi, 17); by an identity of body (xii, 12, 27); by an identity of interest (Matt. xxv, 40; John xx, 17). This union must be considered, not as a mere mental union only in comfort or notion; nor a physical union, as between the head and the members; nor as an essential union, or union with the divine nature; but as a mystical union (Eph. v, 32); an honorable union (1 John iii, 1, 2); a supernatural union (1 Cor. i, 30); holy (1 John iii, 24); necessary (John xv, 4); inviolable (Rom. viii, 38, 39). Some state it thus: 1. A union of natures (Heb. ii, 11); 2. Of actions, Christ's obedience being imputed to us, and our sins reckoned to him (2 Cor. v, 21); 3. Of life (Col. iii, 4); 4. Of sentiment (2 Cor. v, 17); 5. Of interest (Matt. xxv, 34, etc.); 6. Of affection (2 Cor. v, 14); 7. Of residence (John xvii, 24). The *advantages* of it are knowledge (Eph. i, 18), fellowship (1 Cor. i, 9), security (John xv,

felicity (1 Pet. i, 8), spirituality (John xv, 8); and, indeed, all the rich communications of spiritual blessings here and hereafter (Col. i, 22). The *evidences* of union with Christ are: light in the understanding (1 Pet. ii, 9); affection to him (John xiv, 21); frequent communion with him (1 John i, 3); delight in his word, ordinances, and people (Psa. xxvii, 4; cxix); submission to his will, and conformity to his image (1 John ii, 5). See Dickinson, *Letters*, let. 17; Flavel, *Method of Grace*, ser. 2; Polhill, *On Union*; Brown, *Compend*, V, i.—Buck.

UNION OF CHURCHES, in English law, is the combining and consolidating of two churches into one. It is also where one Church is made subject to another and one man is rector of both, and where a conventual Church is made a cathedral. In the first case, if two churches were so mean that the tithes could not afford a competent provision for each incumbent, the ordinary, patron, and incumbents might unite them at common-law before any statute was made for that purpose; and in such case it was agreed which patron should present first; for though, by the union, the incumbency of one Church was lost, yet the patronage remained, and each patron might have a *quare impedit*, upon a disturbance, to present it in his turn. The license of the king is not necessary to a union, as it is to the appropriation of advowsons; because an appropriation is a mortmain, and the patronage of the advowson is lost, and, by consequence, all first-fruits and tenths; whereas in a union these consequences do not follow. The three statutes in existence relating to union of churches are the 37 Henry VIII, c. 21; the 17 Charles II, c. 3; and the 4 and 5 William and Mary, c. 12.—Eadie, *Eccles. Cyclop.* s. v.

UNION, CONGREGATIONAL. Conder says of such unions, "The recent formation of the Congregational and Baptist unions has given rise to the notion that there exists among the Nonconformists of the present day a disposition to abandon the principles of strict Independency, and to adopt a new species of machinery or organization more nearly approaching to Presbyterianism. For this idea there is no foundation. These unions differ in no other respect than in their more extended or comprehensive character from the county unions and associations of churches which have always existed in both denominations for similar objects. They have no relation to a scheme of Church government; their object is not to set up a Church or to create a jurisdiction, but simply to facilitate a general co-operation for common and public objects of a religious nature."—Eadie, *Eccles. Cyclop.* s. v. See INDEPENDENTS.

UNION, HYPOSTATICAL, is a theological term devised by the old divines to express the union of the human nature of Christ with the divine in one person. It must be observed that this union is not consubstantial, as of the three persons in one Godhead; nor physical, as soul and body united in one person; nor mystical, as between Christ and believers; but so that the manhood subsists in the second person, yet without making confusion, both forming but one person. See Arianism; HYPOSTATICAL UNION; PERSON OF CHRIST; SABELLIANS.

Unitarianism, belief in the unity of God. In a comprehensive sense it includes, with a part of Christendom, Jews, Mohammedans, Deists, and all who worship God as one. For this use, however, the accepted term is *Monotheism*. Within the ranks of Christendom the name *Unitarian* is given to those who reject the dogma of the Trinity in its varying phases of a threefold or tripersonal Deity, whether three in substance or only in name and form, and who maintain the essential unity of God as Creator and Father, and the created nature and subordinate rank of Jesus Christ. Within this range opinions about Jesus vary from those that assign him a pre-existent and superangelic rank to an estimate purely human. While the name strictly touches this doctrine only, it is vitally related and gives character to the whole system of belief concerning human nat-

X.—S s

ure and need, human life and its purpose, this world and its meaning, and the future world and man's destiny.

I. *History of the Belief*.—1. *In the Early Church*.—Unitarianism has accompanied Christianity from the beginning, at least as one form of its faith. Unitarians maintain that their faith is that of the early Church as taught by Jesus Christ and his apostles. They appeal to Jesus as the supreme teacher of Christianity, finding in his word and character the essence of the Gospel. They state their chief tenets in the language of the New Test. without note or comment, "To us there is but one God, the Father;" "This is life eternal to know thee, the only true God, and Jesus Christ whom thou hast sent." They hold that the doctrine of the Trinity, so startling to Jews trained in the worship of one God and expecting a Messiah of human lineage, would have required a statement more explicit than any found in the Bible record. They hold that the doctrine, at best, is an inference from texts of obscure meaning or doubtful genuineness, every one of which is separately abandoned by prominent Trinitarian scholars as not expressly teaching the doctrine; while the Roman Catholic holds it on the authority of the Church, deeming it not clearly taught in the Bible.

Unitarians consider the doctrine of the Trinity a gradual development, as Gentiles came into the Church and subjected the Gospel to the influence of Oriental speculations and Greek philosophy. The followers of Zoroaster and Plato, teaching the eternal antagonism of spirit and matter, filled the time with speculations concerning God as a superior essence creating the world by inferior divinities. In the Platonic doctrine of the Logos began the gradual deification of Jesus, consummated only by votes of successive councils of the 4th century. A succession of testimonies meanwhile show the continued existence of faith in the undivided unity of God. In the latter half of the 2d century, Justin Martyr says, "Some there are among ourselves who admit that Jesus is Christ while holding him to be man of men." Still later, Tertullian says, "Common people think of Christ as a man." About the year 200 Tertullian was himself the first to introduce into Christian theology the word "Trinitas." The unity of God was expressly taught by a sect called the "Monarchians." Some held that God the Father himself was born and suffered in human form, and hence were called "Patripassians." Of these were Beryllus, bishop of Bostria in Arabia; Praxeas, who came from Asia Minor to Rome; Noetus, of Smyrna; and, still later, Sabellius, a presbyter in the Church about A.D. 250, the most original and profound mind among the Monarchians. The teachings of Sabellius are variously represented by friend and foe, and are not now very accurately to be known. He had followers as late as the 5th century in Mesopotamia and in Rome. Others held that Christ was in nature purely human, but exalted by his superior measure of divine wisdom and inspiration. Of these were Theodotus of Byzantium, Artemon of Rome, and Paul of Samosata. This noted teacher, bishop of Antioch from the year 260, makes prominent the human personality of Christ, teaching that "Christ was a man," "exalted to peculiar union with the divine nature by the illumination of divine wisdom." Deposed in 269, his name became a synonym for heresy; and in the next century the celebrated historian Eusebius confirms the testimony that he taught "that Christ was in nature but a common man." Speculation and controversy thus went forward until, in the beginning of the 4th century, the relation of God and Christ had become a question of substance or resemblance. In the famous theological struggle over the terms *homo-* and *homo-ousion*, whether God and Christ were of the *same* or only *similar* nature, Arius maintained that Jesus was a created being. He was opposed by the bishop Alexander, aided by Athanasius; and the controversy waxed hot and opinion was divided, until Constantine, recently come to the throne as the first Christian emperor, summoned in A.D. 325 the

Council of Nice, in which the angry storm of the three hundred theologians was allayed and Arius and his doctrine condemned. The historian Eusebius naively says, "The emperor succeeded in bringing them into similarity of judgment and conformity of opinion on all controverted points." For another century controversy continued as to the Holy Spirit, the double nature of Christ, and Mary as Mother of God, all of which were gradually settled by majority votes of successive councils, culminating in the Creed long attributed to Athanasius, but now believed to have been written a hundred years after his death.

In surveying the opinions of the early Church, it thus becomes clear that Unitarianism existed from the beginning; that the belief in the Trinity and the Deity of Christ was three or four centuries gradually forming; that during this period the range of opinions concerning Jesus was as widely varied as at the present time; that two or three hundred years after the death of Christ it was still doubtful, and settled only by the majority of a council, whose decision was secured through the influence of a newly converted emperor, whether the Christian Church should regard Jesus as a person in the God-head, or, as the apostle Peter declared him, a man approved by signs and wonders which God did by him. The Unitarian deems the whole question a corruption of the pure Gospel by philosophic speculation, and seeks, as the essence of Christianity, the practical religion taught by Jesus Christ—of love to God and man.

It may be added as a fact of interest, and one significant of the aid rendered to Christianity by this branch of the Church, that one of the chief lights of Arianism, the Gothic Ulfilas, born near the Lower Danube at about the time of the Council of Nice, and consecrated bishop at the age of thirty, devoting himself to the religious and social development of his people, familiar with the Latin, Greek, and Gothic languages, rendered his name forever to be honored by his translation of the Bible into his native tongue, which at once helped to give lasting form to the Gothic language and to perpetuate Christianity among the Gothic people. For four centuries the Goths were accompanied in their migrations by this sacred national work, portions of which still remain in the University Library of Upsal, in Sweden. The sect of the Nestorians, also, who may fairly be counted on the Arian side, at about the 7th century, were the first to carry Christianity to the far East, into Persia and China.

2. *The Reformation* reveals Unitarianism existing, and awakens it to renewed life. It accompanied Protestantism from its cradle, as it had accompanied primitive Christianity. Before Luther's death it had appeared in Italy, Hungary, Poland, Switzerland, Germany, and England. In the contest with the pope and his hierarchy, the majority of Protestants, absorbed in the struggle for freedom, accepted, unchallenged, as their hereditary belief, the substance of doctrine of the Romish Church. Yet in every Protestant confession the doctrine of the Trinity is reiterated as if on the defensive; while the testimonies of Calvin, Melancthon, and others against the Unitarian heresy reveal its strength. Among the many who, before and after the Reformation, bore witness to their faith in persecution and death, Unitarianism has its own list of confessors and martyrs. In bishop Mant's *History of Ireland* is a brief account of Adam Duff, who for his denial of the Trinity was burned alive, near Dublin, in 1326. The early theological repositories make record of a priest, William Taylor, put to death as an Arian, in England, in 1422.

Conspicuous among the Reformers were the Unitarians Servetus and the Socini. Michael Servetus, born in Villanueva, Aragon, in 1509, the year of Calvin's birth, while studying law at Toulouse, heard of the contest, left his home and his profession, and sought the Reformers (Ecolampadius, at Basle, Bucer and Capito, at Strasburg, and Calvin, at Paris. His bold genius pushed past them in seeking a rejuvenated Christiani-

ty. Skilled in mathematics and the Oriental languages, in law, medicine, and theology, his fearless spirit of inquiry and eager thirst for truth gave the highest interest to his religious speculations. "Your trinity," he declares, "is a product of subtlety and madness. The Gospel knows nothing of it. The old fathers are strangers to these vain distinctions. It is from the school of Greek sophists that you, Athanasius, prince of tritheists, have borrowed it." Such sentiments provoked bitter hostility. Zwingli denounced him as "that wicked and cursed Spaniard;" Calvin spoke of him as the "frantic" Servetus, who "has thrown all things into confusion." When Servetus published his *Seven Books on the Errors of the Trinity*, and his more noted work on the *Restoration of Christianity*, severely criticising Calvin's views, his doom was sealed. On his flight from persecutors at Vienne, as he stopped at Geneva, Calvin caused his arrest and trial. The flames of Protestant persecution dismissed into eternity, through frightful agony, this brave soul that dared assert the absolute unity of God. The leading Reformers expressed no regret, but silently or openly approved it. See SERVETUS.

Laelius Socinus, born in Siena in 1525, of distinguished ancestry, familiar with Biblical languages, an able critic, a member of the famous Vicenza Secret Religious Society of Forty, on their dispersal fled to France, England, Poland, and at last to Zurich, where he died at the age of thirty-seven. A student rather than reformer or controversialist, he yet left behind him a deep impress of his free and original thought. His nephew, Faustus Socinus, born also in Siena in 1539, was expelled from Italy at twenty, studied at Basle, visited Poland and Transylvania, where, carrying forward his uncle's thought and work until his death in 1604, he became the more active and noted leader of Socinianism (q. v.).

Less conspicuous, but with these, may be named in Germany, Cellarius, Capito, Johann Denk, Sebastian Frank, and the scholarly Ludwig Hetzer, one of the ablest, who, for writing against the Deity of Christ, was imprisoned by the magistrates of Constance, and suffered death in 1529; also Claudius of Savoy, George Blandrata in Transylvania, Gonesius and Farnovius in Poland, Stephen Dolet, friend and disciple of Servetus, who, at the age of thirty-seven, was tried for heresy and burned alive in Paris in 1546; and John Valentine Gentilis, who preached in France and Switzerland, and suffered death at Berne in 1566, saying, as he laid his head on the block, "Many have suffered for the glory of the Son, but none have died for the glory and supremacy of the Father."

3. In Italy, before the Reformation, the doctrine of the Trinity encountered dissent, the advocates of which were driven from the country, or were attracted by the larger freedom farther North. Thus went forth many to Switzerland, Germany, Hungary, and Poland; among whom were the famous Socini and the celebrated preacher Bernardo Ochino. Hundreds also were put to death, among whom were James Paleologus, burned at Rome, and Segna and Guirlanda, drowned at Venice. It was in this interest of reforming the faith that the society was formed in Vicenza, of forty persons of talents and learning, discarding the Trinity, meeting in secret, of whom, after 1546, many were imprisoned and others suffered death. From that time there has been no recognised or organized Unitarian body of any strength in Italy, although it is believed there are many who hold this faith. The advocate Magnani has for years conducted Unitarian service at Pisa. The astronomer Filopanti has lectured in Bologna, Milan, Rome, and Naples upon Channing, the distinguished American Unitarian leader, of whom further mention will be made below. Professor Ferdinando Bracciforti has translated Channing's works into Italian, and has for years conducted Unitarian service at Florence and at Reggio. Professor Sbarbaro, in the *Rivista Europa* of October, 1879, argues that Channing supplies the form and spirit of the religion needed by the

craving heart of thoughtful Italy. He there says, "I have made choice of Channing as the most eloquent witness and an irrefragable proof of the new evolution of Christian thought in the world, and of the reform which is in process of initiation in human religiousness; because in the story of his career, and in the fortunes of his books, in the marvel of their rapid diffusion in all corners of the civilized earth, is to be seen the most luminous and triumphant proof of the reality of that movement which is inwardly transforming European society, and bringing it, little by little, to worship under the roof of a new temple, that Church really catholic, whose frontal shall bear, without untruth, the inscription 'To the One God,' which Mazzini hailed on the façades of the Unitarian churches of Hungary."

4. *In France*, reporting two million Protestants, since the martyrdom of Dolet in Paris, no specific Unitarian movement has been known. But during the last fifty years, in the Reformed Church, which is mostly Trinitarian, has been a growing liberal party; among whom the Coquerels, father and son, Martin Paschoud, Fontanes, Colani, Vincent, and the present liberal Parisian pastor Auguste Dide have substantially represented Unitarianism. Their papers were formerly *Le Réformateur*, and *Le Disciple de Jésus*, and at present *La Renaissance*. Says Renan, in a brilliant essay on Channing in 1863, "France has rejected Protestantism. She is the most orthodox country in the world, because she is the most indifferent in religious matters."

5. *In Switzerland*, where the early Unitarian martyrs (Hetzler, at Zurich, in 1529, and Servetus, at Geneva, in 1553) paid the penalty of their lives, the spirit of liberty in Church as in State has prevailed; and, without separate formal organization, Unitarian sentiments, from the first, have been steadily held. The Swiss Church has been committed to no dogmatic declaration, but only "to preach purely and fully the Word of God as contained in the Holy Scriptures." The Genevan Church, in general, denies the equality of the Son with the Father, and the Godhead of the Messiah. The correspondent of the *Evangelical Christendom*, Feb. 1, 1875, says, "The Grand Council of Basle, on the question of the Deity of Christ, on May 2, 1871, decided in the negative by a vote of sixty-three voices against forty-eight." Étienne Chastel, professor of ecclesiastical history at Geneva, is among Channing's most ardent admirers. French Switzerland has itself produced two great liberals, Samuel Vincent and Alexander Vinet, who were largely in sympathy with Unitarian thought.

6. *Holland*, like Switzerland and America, always hospitable to those who are exiles for conscience, has never been wanting in representatives of a free theology. Of its two and a half million Protestants, about four fifths belong to the Reformed Church; which, again, has its two parties of Orthodox and Moderns. Since the burning of Flekyk, a Dutch Baptist, for his denial of the Trinity in 1569, there has been continued progress. In a popular religious work by Dr. Matthes, it is a significant fact that the chapter on God has no allusion to the Trinity; but at the close occurs a foot-note in which, with the calm spirit of the historian rather than that of the controversialist, he speaks of "the antiquated doctrine of the Trinity." The creed adopted at the Synod of Dort in 1618 has given place to the acceptance of the Bible as the standard of faith, together with the toleration and diversity of sentiment which are sure to follow.

7. *Germany*, that gave the world, along with Luther, some of the first Unitarian reformers, during the succeeding three and a half centuries, without any distinctly organized Unitarian movement, has, with its noted scholarship and philosophy, produced all shades of rationalism, from extreme orthodoxy to extreme unbelief. In South Germany, governmental statistics of 1861 report 325,000 Unitarians. Says Dr. Beard, "The Trinity subsists among the learned of Germany only in name. The patristical doctrine has been attenuated to a shadow or reduced to nothing; if brought down into

scriptural form it is abandoned; if converted into three 'somewhats,' it is no longer such as the creeds declare or their advocates recognise. The doctrine once taught and held for an essential article of Christian faith is virtually repudiated and silently disowned." A translation of Channing's complete works, by Sydow and Schultze, was published in Berlin in 1850. After that, the chevalier Bunsen, in his *God in History*, speaks of Channing as "a grand Christian saint and man of God—nay, also a prophet of the Christian consciousness regarding the future." The Protestanten-Verein of Germany, established at Eisenach in 1865, a free Union Association, holding annual conference sessions, though not organized on a dogmatic basis and not professedly Unitarian, welcomes and cherishes fellowship and sympathy with the Unitarians of England and America.

8. *In Poland* the Unitarian faith early took a firm hold and spread rapidly, aided by refugees who there found a hospitable asylum. Yet it was not without persecution at the start. In 1539, in the market-place in Cracow, was burned Katharine Vogel at the age of eighty, wife of a goldsmith and alderman, condemned for denying the Deity of Christ and affirming the divine unity. In 1552 the Bible was translated, chiefly by Unitarian scholars, into the Polish language. Hither came Faustus Socinus, around whom flocked converts from all ranks and classes of society, among them many of the nobility. These, protected from persecution by the privileges of their rank, proved especially favorable to a movement which, more than any other of the time, seemed destructive of the traditions and prestige of the Romish Church. The prosperous commercial city of Racow, with its large printing establishment publishing many of the best books of the day, became its headquarters. Here was issued the famous Racovian Catechism, which became widely known and influential, and was afterwards signally burned in London. King Sigismund II became a convert, and during his reign this party of reformers grew strong enough to form a church of their own. For a century it flourished, till, in 1660, prince Casimir, a cardinal and a Jesuit, coming to the throne, with unrelenting persecution burned the homes of its adherents, drove them into silence, exile, or death. So effectually did he exterminate it, and with it the spirit of liberty in the state as in religion, that it may fairly be said that Jesuit tyranny at once obliterated a church and a nation.

9. *In Transylvania*, Unitarianism was earliest declared by Francis David, first Unitarian pastor and bishop; and afterwards by Socinus and by Georgio Blandrata, an Italian from Piedmont, who became court physician to Sigismund. In 1540 David preached to a multitude in the open streets of Thorda, asserting the Father to be the only God. By his preaching from place to place large numbers were converted, including the king himself, and nearly the whole city of Klausenburg, and many Unitarian churches were established. While persecution was rife in the rest of Europe, Transylvania was early conspicuous for religious liberty. Four forms of Christianity—the Roman Catholic, the Reformed Evangelical, the Lutheran, and the Unitarian—were recognised by law with equal rights, with penalties for those only who should infringe the rights of others. Under this broad tolerance, Unitarianism, which was, indeed, instrumental in producing it, gained a strong foothold, which, under subsequent persecution, it has never wholly lost. Unhappily, the early tolerance was of short duration. The bishop, Francis David, himself became a martyr to his faith, dying in prison in November, 1579, an event, the tercentenary anniversary of which, in 1879, was celebrated in the land of his martyrdom. The Unitarians of Transylvania are said to have at one time possessed four hundred church buildings, eleven colleges, and three universities. Through the last two centuries the iron hand of Austrian and Jesuit oppression has largely dispossessed them of churches, schools, lands, and even of civil as well as religious

rights. They were robbed of their churches, which were transferred to the Jesuits. During the present century, they are regaining privileges and strength, and are reported as having a population of 60,000, now increasing, with 126 churches; a university at Klausenburg with 12 professors and 300 students; two smaller colleges at Thorla and St. Kerezstur; a newspaper, *The Seedsower*; and many distinguished scholars and literary men, preachers and civilians, in their ranks. Their Church government is that of Episcopacy, strongly modified by Congregationalism, their present bishop being Joseph Ferenez. A special intimacy of fellowship has recently been cherished and growing between them and the Unitarians of England and America. With their aid the translation of Channing's writings has been widely circulated among the people of Hungary of all sects.

10. *England*, though later than the Continent in receiving the Unitarian faith, was visited by Ocellino, Socinus, and other reformers. In 1548, the priest John Asheton was cited to Lambeth for Arian sentiments, and saved his life only by recanting. Under a similar charge occurred several martyrdoms. George von Parria, a devout German surgeon, for denying the Trinity was burned at Smithfield in 1551, during the brief reign of Edward VI. During the reigns of Mary and Elizabeth, Hammont, Lewes, Ket, Wright, and many others met a similar fate. In the reign of James I, in 1611, the Unitarian Bartholomew Legate became the last of the Smithfield martyrs; and in 1612, at Lichfield, Edward Wightman, a Unitarian Baptist, was the last martyr who was burned for heresy in England. In the time of Cromwell, John Biddle formed in London the first English Unitarian Church, and gained the title of the father of the English Unitarians, but perished in prison for his faith. In 1640 the synods of London and York deemed it worth while to issue a special canon against Socinianism. And in 1652 the Racovian Catechism, which had been translated into English and actively circulated, was burned in London. To such strength and influence had Socinianism grown there during the century that in 1655 Dr. Owen writes of it, "The evil is at the door; there is not a city or town, scarce a village, in England wherein some of this poison is not poured forth." Before the close of the 17th century, London had houses of Unitarian worship. Milton was an Arian, as has been proved since his death. Sir Isaac Newton is now known to have written anonymously on the Unitarian side. Locke wrote a work on *The Reasonableness of Christianity*, which is substantially Unitarian. The scholarly Lardner, author of *The Credibility of the Gospel History*, one of the ablest defenses ever written, held Unitarian opinions. That these views had notably invaded the Established Church is testified by Palmer in 1705 writing that there were "troops of Unitarian and Socinian writers, and not a Dissenter among them." Rev. Thomas Emlyn preached the Unitarian faith in Dublin and London. The Act of Uniformity in 1662 expelled from the Church of England two thousand ministers, mostly Calvinistic Presbyterians. Free from dogmatic tests, many of these ministers and their followers gradually became Arminian, and ultimately Unitarian. After the passing of the Toleration Act in 1689 legalizing Nonconformity, the way was opened by which the prevailing faith largely passed into Unitarianism. Half the Unitarian churches in England to-day are of this Presbyterian origin. Until 1813 the law made it blasphemy to speak against the Trinity; but a more tolerant public sentiment had long rendered the law a dead letter. Unitarianism as an organized movement was most distinctly initiated by Dr. Theophilus Lindsey, who in 1774 resigned his charge in the Established Church and became pastor of a Unitarian congregation in Essex Street, London. A still more important apostle was the noted Dr. Joseph Priestley. Born in 1733, educated a Calvinist, distinguished for his scholarship and scientific attainments, in 1755 he became pastor of a small Dissenting

congregation in Suffolk, and a conspicuous champion of the humanitarian theology. Believing in the Bible as a divine revelation, and in the miracles as credentials of Christ's authority, while continuing to hold some tenets of Calvinism, he rejected the Trinity and vicarious atonement as unscriptural, wrote to show how these dogmas came in as later corruptions of primitive Christianity, and held that Christ himself claimed to be simply a man. His views brought upon him obloquy and persecution; and, at the hands of a mob losing his books, manuscripts, and philosophical instruments, he was virtually banished from his native land. In 1792 he removed to America, gave courses of lectures in Philadelphia, which added fresh stimulus to the rising Unitarianism, but retired for his closing years to the small neighboring village of Northumberland, where he died in 1804. In 1813 the Unitarians were first placed by law on an equality with other Dissenters. For some years sharp controversy continued as to the proprietary rights in certain Church properties held by them, but claimed by orthodox Dissenters. These claims were finally silenced in favor of the Unitarian occupants by the Dissenters' Chapels Act of 1844. At the present time there are reported about 350 Unitarian churches in England, mostly Congregational in Church government, and of which one fourth have been formed within the last twenty-five years. In Northern Ireland there is a Unitarian population of about 10,000, still Presbyterians in Church government.

In Scotland there are in the larger cities and towns about ten Unitarian churches. In that country occurred the last execution for blasphemy against the Trinity in the person of a young student, Thomas Aikenhead, hanged near Edinburgh in 1696. The present Unitarian Church of Edinburgh, originally strictly Calvinistic, having adopted the principle of free inquiry, became Arian and finally humanitarian under the pastorate of Dr. Southwood Smith in 1812. In Wales about thirty-four churches of this faith are reported; and there are several strong societies at Montreal, Sydney, Melbourne, Adelaide, and other places in the British colonies in Canada, India, and Australia. The English Unitarians maintain a missionary college in Manchester, a Presbyterian college at Carmarthen which educates Unitarian and Independent ministers, and the larger unsectarian institution of Manchester New College, removed recently to London. In their interest are conducted several weekly religious papers: *The Inquirer*, *The Christian Life*, *The Unitarian Herald*, and the new periodical *The Modern Review*. Their representative missionary society is the British and Foreign Unitarian Association, formed in London, May 25, 1825. Among the leading writers may be named (besides Priestley, Lindsey, and Belsham early in the century), more recently, Revs. John James Tayler, Charles Beard, John Hamilton Thom, and James Martineau, one of the greatest living exponents of the higher philosophy of the spirit *versus* modern materialism. It may be truthfully added that the movement of English Unitarianism is outgrowing the legalism and literalism of a philosophy which narrowed its earlier faith, and is reaching a broader and deeper spirituality.

11. In *America*, the free inquiry and open field of thought from the beginning have been favorable to Unitarian views, and the movement for spiritual liberty found special stimulus in the public sentiment following the Revolution. The Pilgrims, bringing to America the parting injunction of their pastor, John Robinson, of Leyden, that there was "more light to break out from God's Word," organized the first Congregational churches in New England at Plymouth, Salem, and Boston upon covenants so broad and undogmatic that these have required no change in accepting the Unitarian faith. Without doubt, the prevailing sentiment was mainly Calvinistic at the start, yet with a measure of Arminianism intermingled that grew imperceptibly, until for the last century and a half the progress of Unitarianism

rian sentiments may be distinctly traced. Dr. Gay, of Hingham, ordained in 1717, is supposed to have been the first American preacher of Unitarianism. Before the Revolution, many lawyers, physicians, tradesmen, and farmers were Unitarians, according to the testimony of the elder president Adams, himself a Unitarian; and not the laity only, but many of the clergy, prominent among whom was Mayhew, of the West Church, Boston. In 1768 the famous Hopkins prepared a sermon especially against what he deemed the heresy of the Boston ministers. In 1783, under the lead of their young minister, Rev. James Freeman, then recently ordained, the Episcopal Church of King's Chapel in Boston expunged from its *Book of Common Prayer* all reference to the Trinity and the worship of Christ, and thus became the first distinctively Unitarian Church in America. Its liturgy and Church organization continue substantially the same at the present time. Priestley's coming gave fresh impulse to this faith, and the writings of Lindsey and Belsham found their way hither. In a letter to Dr. Lindsey, in London, Rev. James Freeman writes that there were "many churches in which the worship was strictly Unitarian, and some of New England's most eminent clergymen openly avowed that creed." In 1801 the oldest Puritan Church in America, the original Church of the Mayflower, established at Plymouth in 1620, by a large majority vote declared itself Unitarian; and with no change in its covenant, using the identical statement of faith drawn up by its Pilgrim founders, it to-day accepts the Unitarian name and fellowship. Free from restraints of dogmatic creeds and tests, the New England Congregational churches were especially hospitable to inquiry and progress. By imperceptible degrees change came. In 1805 the Unitarian Rev. Dr. Ware was made professor of divinity at Harvard University, Cambridge. This fact excited opposition and controversy. In 1815 a controversy between Dr. Channing and Dr. Worcester resulted in open rupture between the Trinitarian and Unitarian Congregationalists. In 1816 the Divinity School at Cambridge was established by Unitarians. Harvard College was in their hands, and chiefly by their influence has maintained the undenominational position which it claims to-day. For ten years, from 1815 to 1825, the controversy waxed hot; lines of separation were drawn, and churches and men took sides. As the churches divided the majority carried their name and property to Trinitarian or Unitarian ranks. Meanwhile the seceding minorities organized anew on one side or the other. Thus the ancient parishes, each coextensive with its town, were divided; and in many New England towns the oldest church, retaining its ancient Congregational liberty and usages, became in faith and fellowship Unitarian.

II. *Organization and Present Condition.*—During the eventful decade just reviewed, Rev. William Ellery Channing (born in Newport, R. I., April 7, 1780), then in the prime of manhood, with early ripeness of spiritual fruitage, became, by eloquence of tongue and pen, the conspicuous leader of the Unitarian movement. At the ordination of Jared Sparks, in 1819, as minister of the Unitarian Church in Baltimore, his discourse expounding Unitarian Christianity made a profound impression. His intense dislike and dread of sectarianism gave to his preaching an emphasis of individualism and spiritual liberty. Never permitting himself to become the devotee of a sect, to him Unitarianism owes much of its freedom from sectarian and dogmatic trammels. Less a controversialist than a devout and practical preacher, he fearlessly, yet reverently, sought the truth, brought into prominence the spiritual elements of human nature, subjected religious systems to the test of the soul's best instincts and sentiments, and made it his supreme aim to kindle the aspiration for holiness. His testimony was chiefly borne to the fatherhood of God and the brotherhood of man, to the worth of human nature and blessedness of human life, to the dignity of labor and the elevation of the working classes, to spiritual

freedom and the divine mission and authority of Jesus Christ. He has come to be recognised by all sects as one of the foremost of American preachers and writers, a leading champion of religious and civil freedom, of education and philanthropy, a seeker for truth, a lover of mankind, and a devoted advocate of Christianity. In April, 1880, the centenary of his birth was celebrated in London and in several of the larger cities in America, many persons of other denominations joining, and the corner-stone was laid of a memorial church at Newport, his birthplace. See CHANNING.

The division in the Church was not of Unitarian seeking. The Unitarian leaders were willing, in the large fellowship and free faith of Congregationalism, to maintain the unity of the Church unbroken. They would have borne their testimony to truth as they saw it, urging all others freely to do the same. The necessity of separation was enforced by fellowship withdrawn, controverted opinions put forward as tests, and by charges made that rendered it impossible to stay. After the break had come, it was with no desire to build a new sect or to prolong the bitterness of controversy—it was to do their own part in the vineyard that the Unitarians went apart and worked in their own way. But, from the first, their attitude has never ceased to be that Church unity is to be found, not in identity of opinion, but in personal freedom and in brotherly love; and they have declared their readiness on this broad basis to join in fellowship with all who claim to hold the Christian faith and who prove their discipleship by consistent lives. In the exercise of freedom there have always been within the Unitarian fold varieties of individual opinion, while in the same freedom a few have gone into the Trinitarian household and others into a position antichristian or non-Christian.

On May 24, 1825, was formed in Boston "The American Unitarian Association." Its first article declares its purpose to be "to diffuse the knowledge and promote the interests of pure Christianity." It was incorporated in 1848, with the right to hold trust funds, and has at the present time about \$200,000. Without ecclesiastical authority, it is purely a missionary organization, using annual contributions from the churches for publishing and distributing books and tracts, sustaining missionaries, aiding feeble churches, and planting new ones. Its operations are mainly in the home-field of America. For forty years its activities were small, the missionary spirit of the denomination being checked by dread of the sectarian spirit, and the benevolent gifts of the people taking more the direction of education and general philanthropy. But within the last fifteen years its income has greatly increased, in 1866 and 1872 exceeding \$100,000, although it by no means receives all of the denominational gifts for religious missionary purposes.

On April 5, 1865, a convention, consisting of the pastor and two delegates from each church or parish in the Unitarian denomination, met in the city of New York and organized a National Conference, "to the end of energizing and stimulating the denomination with which they are connected to the largest exertions in the cause of Christian faith and work." Its preamble declared that "the great opportunities and demands for Christian labor and consecration at this time increase our sense of the obligations of all disciples of the Lord Jesus Christ to prove their faith by self-denial, and by the devotion of their lives and possessions to the service of God and the building-up of the kingdom of his Son." It is a representative body of pastors and delegates, chosen and meeting biennially, purely advisory in character, for counsel and fellowship. Its meetings are held in September at Saratoga, open to the public, and are steadily increasing in the numbers attending, also in interest and in practical purpose and value. Since its formation, the Unitarian churches of America have given more for missionary purposes than in all their previous history. Within smaller and more convenient

territorial districts have been formed also local conferences with more frequent meetings, which have been successful in fostering fellowship and co-operation, and a more devout and earnest religious life.

Without other ecclesiastical authority, the government of the churches and their usages and modes of worship are purely Congregational. The rites of baptism and of the Lord's supper are recognised and observed, not as having mystic value or binding authority, but as having spiritual worth and influence. The denominational *Year-book* for 1880 reports 340 churches, of which 240 are in New England, chiefly in Massachusetts, and 100 mainly in the West; 400 ministers, 20 local conferences, besides a number of organizations of purely benevolent aim and purpose. Two theological schools are sustained—one at Cambridge, founded in 1816, having four professors and about twenty students, and a library of 18,500 volumes, while the large University library of 240,000 volumes is also open to its use. About \$140,000 have recently been added to its endowment fund to increase its corps of professors. The Theological School at Meadville, Pa., was formed in 1844, and has four resident professors, 15,000 volumes in its library, and about twenty students.

The periodicals of the denomination are the *Unitarian Review*, the *Christian Register*, now in its fifty-ninth year; *The Dayspring*, a Sunday-school paper, all published in Boston, while several smaller organs are published elsewhere. The denomination is rich in its literature, especially in the direction of practical and devout religious sentiment. The works of Channing, now widely circulated among English-speaking people all over the world, are translated in part or entire into the Dutch and German, French, Italian, Swedish, Hungarian, Icelandic, and Russian languages. There may also be mentioned as leading Unitarian preachers and writers, Henry Ware (father and son), James Walker, Theodore Parker, Edmund H. Sears, Orville Dewey, William H. Furness, Henry W. Bellows, James Freeman Clarke, Frederick H. Hedge, and Andrew P. Peabody. Unitarian writers are also largely represented in the walks of history and literature in America as in England. It may be added that Unitarian sentiments are held substantially by "Universalists," "Christians," "Hicksite Quakers," and "Progressive Friends."

III. *Doctrinal Views*.—In seeking the present form of Unitarian faith, it is needless to recount the speculations of earlier times. The tenets of Sabellius and Paul of Samosata and Arius, also of Servetus and the Socini, in their special forms sharing the crudities of contemporaneous thought, have largely passed away. They are not to be quoted as authority. They are simply in the line of historical progress, agreeing only in the single fundamental thought that God is one, and Jesus Christ a created and subordinate being. Unitarianism is characteristically not a fixed dogmatic statement, but a movement of ever-enlarging faith. It welcomes inquiry, progress, and diversity of individual thought in the unity of spiritual fellowship. With faith in the unity of God as its key-note, it asserts the unity of all truth in nature, history, experience, and the Bible; the unity of the Church as based on character, not on dogma; and the unity of spiritual life in this world and the next. Its leading principles are, first, the freedom of every individual soul to seek the highest truth and to obey it; and, second, that character is the test of Christian discipleship. Unitarians declare life, not dogma, to be the essence of Christianity. They deem Christianity to be essentially a reasonable religion, according with the truths of nature, instructing reason and appealing to it as interpreter and judge. They hold it to be a progressive religion; that its principles, like the axioms of mathematics, are eternally true, but that its germs unfold with the increasing intelligence of mankind. Right belief they deem important for right living, and they emphasize the value of righteousness as establishing the kingdom of God on earth, and as alone

fitting the soul for his kingdom above. They refuse to formulate their belief in fixed creeds of ecclesiastical and exclusive authority; because these never settle open questions, but only start fresh controversy; because they limit inquiry and hinder progress; and because they make dogma instead of character, and opinion instead of spiritual purpose, the bases and tests of fellowship. Yet, while refusing any authoritative creed statement, there is an unwritten consensus of faith in which Unitarians are substantially agreed. They believe in the one God as the Creator of the universe and Father of all souls; a Father who wills man's welfare, desiring that not even the least shall perish; the Fatherly Friend in all worlds, who does not wait for forgiveness and favor to be purchased, but freely pours forth blessing on all who will accept it; Father of the sinner as of the saint, seeking every wanderer with his pursuing love, and punishing the erring not for his pleasure, but for their profit, that they may become partakers of his holiness. Unitarians believe in man as naturally neither saint nor sinner; that his nature is not corrupt and ruined, but undeveloped and incomplete; that he inherits tendencies to good as well as to evil, and that he is sinful only as he knowingly and wilfully does wrong; that he needs regeneration, the unfolding and renewal of his spiritual nature, which he experiences through obedience to the truth, under that divine influence which is called the Holy Spirit; that, as a child of the Infinite, allied to the Supreme Goodness by ties that cannot be sundered, having in him a spark of divinity that makes his ultimate redemption an inextinguishable hope, he yet needs to be taught and inspired of God, but with the aid of the divine grace, which is his birthright privilege, he is able to climb to celestial summits. Unitarians believe in Jesus Christ, as the four evangelists describe him, as at once Son of God and Son of man. They care little for metaphysical speculation about the mystery of his nature, but emphasize his word and life as a practical help for human salvation. They hold that he is our Saviour as he becomes to us the Light of the World, the Fountain of Living Water, and the Bread of Life; our Saviour by illustrating the eternal principles of right, inspiring his followers to holiness, and imparting to them true life more abundantly; our Saviour so far as he leads and helps us to be large-hearted, truth-seeking, pure, loving, and devout; that he came into the world to bear testimony to the truth, and was here not to be ministered unto, but to minister, and that he proved himself humanity's Lord and Leader by his divine helpfulness. Under the influence of elevated views of man's spiritual nature, affirming his innate power of apprehending religious truth, Unitarianism, in declaring the humanity of Christ, does not bring Jesus down, but lifts humanity up. It asserts that Jesus was purely human only to show that human nature itself is, in the phrase of Athanasius, *homoousian*, of the same substance with God, and that Jesus is the best expression of that divine humanity which is the birthright and promised destiny of all souls. While they are jealous of ecclesiastical authority or dictation, and perpetually refuse to limit their belief by formula, the Unitarians have, in public assembly of the American Unitarian Association, and in representative meetings of their national and local conferences, repeatedly reaffirmed their attitude of Christian discipleship, and shown that they hold themselves to be a body of believers upon the Christian foundation and within the Christian Church. They deem the mind of Christ the best index of Christianity. For the sources of Unitarian thought, therefore, they refer to Unitarian literature, more especially to the New Test., and supremely to the word and life of Jesus Christ. (R. R. S.)

Unitarians, a general name for those bodies of professed Christians who do not fully recognise the equality of the three Persons in the Godhead. The essential errors of Unitarianism, as evangelical Trin-

itarians regard them, are a denial (*a*) of the true divinity of Jesus Christ; and (*b*) of the inherent and total moral depravity of human nature. These two are claimed to be not simply *dogmas*, but *facts* sustained by observation and history as well as by the plain and constant teachings of the Holy Scriptures. They are intimately correlated to each other; for if Christ be not truly divine, then there is no adequate atonement for human sin; and, conversely, if man be not essentially a sinner, he needs no such divine Saviour. Hence our Lord in treating with Nicodemus announced the necessity of a radical, moral change as the first and all-important condition of Christianity (John iii, 1-13). Accordingly the doctrine of a spiritual and fundamental *regeneration* will be found to be the true touchstone of all evangelical orthodoxy, and those branches of Christendom who lay most stress upon it prove to be the most efficient in the moral renovation of mankind. Humanitarianism alone can never be more than a negative and powerless, because a really false, view of the actual condition and relation of the race as respects their Creator and Redeemer. See HUMANITARIANS.

In the same summary manner, Unitarians reject, as being to them unphilosophical and unintelligible, the divinity of the Holy Spirit, a doctrine which all who have passed through the pangs of true contrition into the joys of conscious pardon and heavenly communion find so comforting and necessary to the explanation of their own religious experience (Rom. v, 1-5; 1 Cor. ii, 10-14). See TRINITY.

While pointing out these, as we deem, radical defects in Unitarianism as a system of Christian faith, we nevertheless are bound to bear witness to the literary culture, social refinement, and moral virtues which Unitarians as a body have exhibited, and to their amenity and ameliorating influence in the defence of civil rights and the general cause of philanthropy. These we attribute, however, not so much to their creed as to the hereditary effect of early Puritan training and the power of a sound Christianity diffused through the community in the midst of which they live and operate. See UNITARIANISM.

Unitas Fratrum. See MORAVIANS.

United Armenians, a name applied to those Armenian Christians who acknowledge the pope; the orthodox Armenians being called Gregorians. The Armenian rite in the Roman Catholic Church has one patriarch and primate (in Cilicia), four archbishops (at Constantinople, Aleppo, Seleucia or Diarbekir, and Lemberg), besides two *in partibus*, and sixteen bishops. Their union took place from 1314 to 1344. They number some 100,000, of whom 78,000 are in Turkey and Persia (20,000 under the archbishop of Constantinople, 56,000 under the patriarch of Cilicia, and 1000 in Mount Lebanon). Austro-Hungary, in 1870, had 8279 United Armenians; Russian Caucasasia and Siberia, in 1869, had 13,722. In 1872 a very considerable part of the Turkish United Armenians left the Roman Catholic communion and joined the Old Catholic movement. See ARMENIAN CHURCH.

United Brethren in Christ, the full title of a body of evangelical Christians in this country.

I. Origin.—In the year 1752, the Rev. Philip William Otterbein (q. v.), a distinguished scholar and missionary in the German Reformed Church, emigrated from Dillenberg, in the Duchy of Nassau, Germany, to America. Not long after his arrival in his new field of labor, he became deeply impressed with the necessity of a more thorough work of grace in his heart than he had ever before experienced. Lancaster, Pa., was his first pastoral charge, and, early in his ministry there, on a certain occasion, he passed from his pulpit to his study, and there remained in earnest prayer until God, in his mercy, poured upon his soul the spirit of grace and power. Mr. Otterbein, from this time forth, preached with an unction which neither he nor his people had

realized before. Having now entered, as it were, upon a new life, he was eminently fitted for a leader. He was calm, dignified, humble, and devout. After six years of service at Lancaster Mr. Otterbein transferred his labors to Tulpohocken, Pa., at which place he introduced evening meetings, and in them read portions of the Bible and *exhorted* the people to flee from the wrath to come. At this time there was not a Methodist society in America. The German churches of the land, especially, were sunk in lifeless formality. The "new measures" of Mr. Otterbein brought upon him severe criticisms, if not actual persecution.

While Mr. Otterbein was engaged in enforcing experimental godliness at Tulpohocken, the Rev. Martin Boehm, a zealous Mennonite, was led into the light of a new life. These men were ministers of churches widely different in doctrines and modes of worship. Two awakenings were now in progress—one under the labors of Mr. Otterbein in Tulpohocken, the other led by Mr. Boehm in Lancaster County, Pa. During a "great meeting" held in a barn in that county, these two ministers met for the first time. Mr. Boehm preached the opening sermon in the presence of Mr. Otterbein. As the heart of the preacher warmed with his theme, it kindled a flame in the soul of the other. At the close of the sermon, and before Mr. Boehm could resume his seat, Mr. Otterbein arose, and, embracing the preacher in his arms, exclaimed aloud, "*We are brethren.*" These words afterwards suggested the name which the denomination now bears.

From this time these godly men became co-laborers, and travelled extensively through Eastern Pennsylvania, Maryland, and Virginia. In the meantime other German ministers of "like precious faith" were raised up through their labors, and numerous societies were formed in the states mentioned. It seems to have been no part of Mr. Otterbein's purpose to organize a new church. He only sought to impress upon the consciences of the people generally, and of formalists in particular, that a vital union with Christ is essential to a religious life. Providence so shaped circumstances that Mr. Otterbein, without his own seeking, was placed at the head of a new denomination.

The eminently Christian character of Mr. Otterbein, and his usefulness in founding this Church, make it proper that a few sentences more be written of him. He was born at Dillenberg, Germany, March 6, 1726, and resided in his native land twenty-six years, and in America sixty-one years, dying Nov. 17, 1813, having continued his ministry to the close of his long life. He was an eminent scholar in classical attainments, and in philosophy and divinity. He was held in high esteem by bishops Asbury and Coke of the Methodist Church, and assisted, by special request, at the ordination of the former. On hearing of his death, bishop Asbury said of him, "Great and good man of God! An honor to his Church and country; one of the greatest scholars and divines that ever came to America, or who were born in it."

As the work thus begun grew to considerable proportions, it became very important to consider the best means of perpetuating and extending it. Conferences were therefore annually held for this purpose, beginning at Baltimore in the year 1789. In 1800 the societies gathered were united in one body, under the name of the "United Brethren in Christ," and elected Mr. Otterbein and Martin Boehm their superintendents or bishops. At that time there was little uniformity among them as to doctrine. Some were German Reformed, others were Mennonites or Lutherans, and a few were Methodists. In regard to the mode of baptism, probably to meet the wishes of the Mennonites, they agreed that each man should act on his own convictions. From 1800 to 1815, the growth of the Church was steady, but not speedy. Several new conferences were formed, and the work extended westward of the Alleghany Mountains.

At a conference held in Ohio in 1814 it was resolved to call a general council for the purpose of agreeing upon some system of discipline. It was also determined that the members of this council should be elected from among the preachers by the vote of the people throughout the whole Church. Under this order the first General Conference was convened on June 6, 1815, at Mount Pleasant, Pa.

II. *Doctrines*.—At this conference the following summary of doctrines was adopted, and remains unchanged to the present time:

In the name of God, we declare and confess before all men that we believe in the only true God, the Father, the Son, and the Holy Ghost; that these three are one—the Father in the Son, the Son in the Father, and the Holy Ghost equal in essence or being with both; that this triune God created the heavens and the earth, and all that in them is, visible as well as invisible, and furthermore sustains, governs, protects, and supports the same.

We believe in Jesus Christ; that he is very God and man; that he became incarnate by the power of the Holy Ghost in the Virgin Mary, and was born of her; that he is the Saviour and Mediator of the whole human race, if they with full faith in him accept the grace proffered in Jesus; that this Jesus suffered and died on the cross for us, was buried, arose again on the third day, ascended into heaven, and sitteth on the right hand of God, to intercede for us; and that he shall come again at the last day to judge the quick and the dead.

We believe in the Holy Ghost; that he is equal in being with the Father and the Son, and that he comforts the faithful, and guides them into all truth.

We believe in a holy Christian Church, the communion of saints, the resurrection of the body, and life everlasting.

We believe that the Holy Bible, Old and New Testament, is the word of God; that it contains the only true way to our salvation; that every true Christian is bound to acknowledge and receive it, with the influence of the Spirit of God, as the only rule and guide; and that without faith in Jesus Christ, true repentance, forgiveness of sins, and following after Christ, no one can be a true Christian.

We also believe that what is contained in the Holy Scriptures—to wit, the fall in Adam, and redemption through Jesus Christ—shall be preached throughout the world.

We believe that the ordinances, viz. baptism, and the remembrance of the sufferings and death of our Lord Jesus Christ, are to be in use and practiced by all Christian societies; and that it is incumbent on all the children of God particularly to practice them; but the manner in which ought always to be left to the judgment and understanding of every individual. Also the example of washing feet is left to the judgment of every one, to practice or not; but it is not becoming for any of our preachers or members to traduce any of their brethren whose judgment and understanding in these respects are different from their own, either in public or private. Whosoever shall make himself guilty in this respect shall be considered a traducer of his brethren, and shall be answerable for the same.

III. *Organization and Government*.—The polity of the Church is outlined by the following constitution, established in 1841:

We, the members of the Church of the United Brethren in Christ, in the name of God, do, for the perfecting of the saints, for the work of the ministry, for the edifying of the body of Christ, as well as to produce and secure a uniform mode of action, in faith and practice, also to define the powers and the business of quarterly, annual, and general conferences, as recognised by this Church, ordain the following articles of constitution:

Art. I, § 1. All ecclesiastical power herein granted to make or repeal any rule of discipline is vested in a general conference, which shall consist of elders elected by the members in every conference district throughout the society; provided, however, such elders shall have stood in that capacity three years in the conference district to which they belong.

§ 2. General Conference is to be held every four years; the bishops to be considered members and presiding officers.

§ 3. Each annual conference shall place before the society the names of all the elders eligible to membership in the General Conference.

Art. II, § 1. The General Conference shall define the boundaries of the annual conferences.

§ 2. The General Conference shall, at every session, elect bishops from among the elders throughout the Church who have stood six years in that capacity.

§ 3. The business of each annual conference shall be done strictly according to Discipline; and any annual conference acting contrary thereunto shall, by impeachment, be tried by the General Conference.

§ 4. No rule or ordinance shall at any time be passed to change or do away the Confession of Faith as it now stands, nor to destroy the itinerant plan.

§ 5. There shall be no rule adopted that will infringe upon the rights of any as it relates to the mode of baptism, the sacrament of the Lord's supper, or the washing of feet.

§ 6. There shall be no rule made that will deprive local preachers of their votes in the annual conferences to which they severally belong.

§ 7. There shall be no connection with secret combinations, nor shall involuntary servitude be tolerated in any way.

§ 8. The right of appeal shall be inviolate.

Art. III. The right, title, interest, and claim of all property, whether consisting in lots of ground, meeting-houses, legacies, bequests, or donations of any kind, obtained by purchase or otherwise, by any person or persons, for the use, benefit, and behoof of the Church of the United Brethren in Christ, are hereby fully recognised and held to be the property of the Church aforesaid.

Art. IV. There shall be no alteration of the foregoing constitution unless by request of two thirds of the whole society.

Membership in the Church is conditioned upon a belief in the Bible as the Word of God, the experience of pardon of sins, a determination by grace and a good life to save the soul, and a pledge to obey the discipline of the Church.

Only one order of ministers is recognised by the Church, viz. that of elders. The bishops of the Church are only elders elected for a term of four years as superintendents of the whole field.

Her ecclesiastical bodies consist of official boards, quarterly, annual, and general conferences. The latter meet quadrennially. Her officers are, superintendents of Sabbath-schools; stewards, who attend to the finances of the churches; class-leaders, or subpastors, who have charge of classes for spiritual instruction and worship; preachers in charge, who have the pastoral care of a mission, circuit, or station; presiding elders, who are elected by the Annual Conference from among the ordained elders, and who travel over a certain number of fields of labor, preside at the quarterly conferences, and see that all the laborers in their respective districts faithfully perform their duties; and bishops, or general superintendents of the whole Church, who preside at all the annual and general conferences.

The method of supplying the churches of the denomination with pastors is that known as "the itinerant system." Pastors in charge are subject to removal or reappointment at the end of each conference year by a committee constituted by the Annual Conference, composed of the bishop, the presiding elders of the past and the present year, and an equal number of local elders or preachers. A minister cannot remain in the same charge more than three years, except by the consent of two thirds of the members of the Annual Conference.

Presiding elders have no limit as to the time they may serve on a district, subject only to the option of the Annual Conference. Bishops may be re-elected every four years indefinitely by the General Conference.

The General Conference of 1877 made provision for lay representation in the annual conferences, leaving it to the will of the several annual conferences to accept or not. A considerable number of conferences have adopted it, and its introduction is believed to be advantageous.

IV. *Numbers, Operations, and Sphere*.—The statistics of the denomination in 1879 show 47 annual conferences, 3 mission districts, 2217 ministers, 4356 organized churches, 154,796 members, 2152 houses of worship, 319 parsonages, 3268 Sabbath-schools, 187,203 officers, teachers, and scholars in Sabbath-schools. During the year 1879 the Church contributed for the support of the Gospel and for connexional purposes \$661,662.56.

During the past thirty years the denomination has been active in the educational work, and has now thirteen colleges and seminaries and one theological school. The latter is located at Dayton, O., and wholly under the management of the General Conference.

The Missionary Society of the Church is thoroughly organized, and since its origin, in 1853, has gathered

and expended for the spread of the Gospel nearly two millions of dollars. The missionaries of the Church are scattered over many portions of the United States and territories, in Canada, Germany, and Western Africa. There are in the foreign work 12, in the frontier department 140, and on home missions 240 missionaries.

A Women's Missionary Society was established in 1877, and has founded one mission in Germany and one in Africa.

A Church Erection Society was organized in 1869 by the General Conference. The object of this organization is to aid feeble churches in erecting houses of worship. Already many congregations have been assisted by funds raised by this society.

A Sabbath-school Association was established in 1869, and gathers by systematic annual collections a liberal sum each year to aid Mission Sabbath-schools in all parts of the denomination and in heathen lands. The Church is deeply interested in the work of saving the children, and no appliance useful to this end is withheld from them.

The literature of the Church is found chiefly in strict-denominational books and periodicals. It has a publishing house at Dayton, O., under the supervision of the General Conference. Its net capital on the 1st of April, 1880, was \$144,606.10. It is out of debt, and has a handsome balance of cash in the treasury. Its periodical literature is of a high moral tone, and compares well with the best of its kind everywhere. The house issues nine periodicals, with an average aggregate circulation of 175,000 copies.

The Church of the United Brethren in Christ is not an offshoot of any other Church or churches, but bears the impress of a providential upraising for the accomplishment of a special mission. It presents no new doctrine, and is distinguished mostly as an organization in which the ministry and people have an equal proportion of power, and the rulers hold office only by the authority and consent of the governed. Its history has been marked by radical reformatory ideas, which have doubtless in some degree retarded its growth in numbers. Slavery, the use of intoxicating drinks as a beverage, and the making and trading in ardent spirits, Freemasonry, and other secret societies are entirely prohibited on pain of excommunication. Its field thus far has been mainly among the rural populations of the land. Its ministers and people are striving to maintain the old landmarks of a vital and experimental religion, insisting upon the witness of the Spirit and a holy heart and life. (W. J. S.)

United Christians of St. THOMAS, a body of East Indian Roman Catholics, chiefly found in Travancore, at the southern extremity of India. In 1599 the Synod of Diamper (Udiampoor) compelled the ancient Church of St. Thomas Christians to conform to the Church of Rome, conceding to them a modern Syrian rite. In 1653 nearly all fell away, but were soon after induced in great numbers to return, chiefly by the labors of the Barefooted Carmelites. At present more than one half are of the Latin rite, but a portion retain the Oriental rite. They are chiefly in the vicariate apostolic of Verapoli (Latin rite), reported in 1868 as having 295 priests and 233,000 members. See THOMAS (ST.), CHRISTIANS OF.

United Copts are those who, since 1732, have acknowledged the authority of the pope. They are of two rites—the Egyptian, and the Ethiopic or Abyssinian—and in Egypt they number 12,000. In 1855 the pope appointed one of their priests vicar apostolic and bishop *in partibus*. See COPTS.

United Evangelical Church, a denomination in Germany, formed in 1817 by a union of the Lutheran and Reformed churches. Attempts at uniting these churches were made as early as 1529, when leading theologians of both schools held a conference at Marburg. Other conferences were held at Leipsic in 1631, and at

Cassel in 1661. In 1703 Frederick I of Prussia convened several Lutheran and Reformed theologians at Berlin to discuss the practicability of a union, but was successfully opposed by the Lutheran clergymen. A "Plan of Union," proposed by Klemm and Pfaff, theologians of Tübingen (1710–22), met with little favor. About the beginning of the 19th century, however, a voluntary union of the two communities was established in some parts of South Prussia, which extended in 1805 to many congregations at Cologne, Würzburg, and Munich. In 1810, king Frederick William took up the subject warmly, and in 1814 drew up, chiefly with his own hands, a liturgy, which was adopted in the Royal Chapel, and authorized for use elsewhere. A royal proclamation followed, dated Sept. 27, 1817, in which the king requested the Lutherans and the Reformed throughout his dominions to unite in one community, and expressed his intention of taking part in a united celebration of the holy communion in the Royal Chapel at Potsdam, on Oct. 31, the occasion of the tercentenary of the Reformation. A synod assembled on Oct. 1 at Breslau, and another subsequently at Berlin; both of them readily adopting the proclamation, as did most of the ministers and laity throughout Prussia. A general assent was given to the movement on the day mentioned by the king, viz. Oct. 31, and not long after it was ordered that the distinctive names "Lutheran" and "Reformed" should be disused in all official documents, and the United Evangelical Church alone recognised as the national religion. It soon spread beyond the boundaries of Prussia, and was adopted in Nassau, Hanover, and Bavaria in 1818, in Hesse-Cassel in 1822, and in Württemberg in 1827; but it did not extend either to Lutheran Austria, on the one hand, or to Calvinistic Switzerland, on the other. Even in Prussia the revised Service-book which the king set forth in 1821 was rejected by many congregations, and uniformity was far from being established even within the bounds of the united body. On June 25, 1830, the king directed that the Service-book should be used in all churches; but a number of the Lutheran clergy refused to adopt it, and were suspended, some of them being treated with great severity, and even imprisoned.

Three parties arose in the Church. One, generally called the Confederalists, under the leadership of Prof. Hengstenberg and Dr. Stahl, maintained that the union consisted in a mere external confederation and subjection to the same general Church government; and that the individual churches remained Lutheran, Reformed, or United. A second party, commonly called the Consensus party, took for its doctrinal basis the Bible and the common dogmas of the Lutheran and Reformed confessions. It controlled the theological faculties of most of the universities, and had among its leading men Nitzsch, Twisten, Hoffmann, Niedner, Tholuck, Julius Müller, Jacobi, Dörner, Lange, Stier, Herzog, and Rothe. The third, or Union, party rejected the authoritative character of the old symbolical books of both the Lutheran and the Reformed denomination, and based themselves on the Bible simply, claiming, at the same time, the right of subjecting the authenticity of the Old and New Testaments to critical examination. This party included many of the disciples of Tübingen, and liberal divines of different shades of opinion.

The persecution of the "Old Lutherans" was kept up until the death of Frederick William. A milder policy was introduced by his son, who succeeded him in 1840; and in 1845 the Old Lutherans were allowed to organize into a separate community, but did not receive any share of the public funds. In 1873 laws were passed substituting the principle of ecclesiastical self-government for that of the consistorial administration theretofore exercised by the State. In January and February, 1875, provincial synods met in all the eight old provinces of Prussia, and in November and December an extraordinary general synod met at Berlin, to make all necessary preparations for a transfer of the government

of the Church to a regular general synod. United Evangelical churches were also formed in other German states; in Nassau, 1817; the Bavarian Palatinate, 1818; Baden, 1821; and in Württemberg, 1827. In Austria and France a fusion of the Lutheran and Reformed churches has also many friends, but nothing practical has been as yet accomplished. In the United States a branch of the United Evangelical Church was established at St. Louis in 1840, when six German ministers organized an ecclesiastical body called *Evangelischer Kirchenverein des Westens* (Evangelical Church-Union of the West). This body, in 1856, was divided into three districts, and in 1866 changed its name to "German Evangelical Synod of the West." In 1870 it reported, at the General Assembly held in Louisville, as follows:

Ministers.	Congregations.	Voting Members.	Communicants.	Total Population.
162	300	12,000	about 20,000	about 50,000

Another branch of the United Evangelical Church was constituted in 1848, under the name of "Evangelical Synod of North America." In May, 1859, it split into two independent bodies, one of which assumed the name "United Evangelical Synod of the North-west," and the other "United Evangelical Synod of the East." Both of them united in 1872 with the "German Evangelical Synod of the West," constituting the fourth and fifth districts of this body. In 1874 the Church was redistricted by the General Conference held in Indianapolis into seven particular synods. It then numbered about 300 ministers and 40,000 communicants. The Church has a theological seminary in Warren County, Mo.; another educational institution at Elmhurst, Ill.; and three denominational papers. See Bunsen, *Signs of the Times*;

to establish a theological seminary. The Wesleyan Methodist Association retained its separate identity till 1837, when, by uniting with the Wesleyan Reformers, it became merged in the United Methodist Free churches. The union was completed, and the name adopted, in the town of Rochdale. This body is the third in numerical importance of English Methodist denominations, having its seat principally in England. Only three of its circuits are in Scotland, and it has no footing in Ireland. It has missionary stations in Jamaica, Victoria, Queensland, New Zealand, Eastern Africa, and China.

The constitution of the body is democratic, the members of its annual assembly being freely chosen representatives. This assembly does not regulate the internal affairs of circuits, they being independent, except on matters of connec-tional import. The home circuits are divided into districts; but the district meetings do not wield any important functions. The various schemes, funds, and institutions of the body are intrusted during the year to committees which are, for the most part, elected annually. It is so with the Connec-tional Committee (which may be regarded as the executive of the body), with the Foreign Missionary Committee, the Chapel Fund Committee, the Superannuation Committee, and the Book-room Committee. Ashville College is governed by a body of trustees elected for life, and a committee of six elected for three years, but so arranged that two retire each year. The Theological Institute is governed by a body of trustees elected for life, and nine others chosen annually. The connec-tional officers are the president of the assembly, the connec-tional secretary, the connec-tional treasurer, and the corresponding secretary.

In 1877 their statistical report showed as follows:

Itin. Min.	Local Preachers.	Leaders.	Members.	Members on Trial.	Chapels.	S. Schools.	Teachers.	Scholars.	Raised for Missions.

United Presbyterian Church. The genea-logical descent of the existing body may be best ex-hibited by the following pedigree [see PRESBYTERIAN CHURCHES, 2, 14]:

trouble arose in Leeds in reference to the introduction of an organ into Brunswick Chapel. This resulted in the organization of the Protestant Methodists, who had a separate existence until 1836, when they became merged in the denomination formed in that year, and known subsequently as the Wesleyan Methodist Association. The immediate occasion of the formation of the latter body was the determination of the conference

United Secession Church, THE, was formed in Scotland in 1820 by a reunion of the Associate (or Burghers) and the General Associate (or Antiburghers) Synod. In 1847 it was united to the present United Presbyterian Church.

United Society of Believers IN CHRIST'S SECOND APPEARING, the name given to themselves by the Shakers (q. v.).

United States of America is the full title of the principal nation on the Western continent, occupying the whole central portion of North America. See **AMERICA**. In this article we propose to treat our country only in its general religious aspects, leaving its other features to the secular cyclopaedias. For the religious beliefs and customs of the aborigines, see **INDIANS (NORTH AMERICAN)**.

I. Church History.—1. *Religious Character of the Original Settlers.*—New England was originally settled by the Puritans (q. v.) from England. These were a band of dissenters from the faith and practice of the Established Church of England who were persecuted for their dissent and granted no rest in their own land. Accordingly they decided to leave their own country for one that would permit them liberty of conscience in religious worship, and, after one unsuccessful attempt at departure, finally set out from the coast of Lincolnshire in the spring of 1608 for Holland. They reached Amsterdam in safety, where they passed one winter; and then removed to Leyden. Here they enjoyed that religious liberty for which they were seeking; but they were in a strange land, among a strange people, who used a strange language. The love of country was still warm in their hearts notwithstanding their persecution at home, and during the ten years they remained in Holland they became thoroughly anxious to return to the allegiance of their mother country. With this desire in their hearts, they sent John Carver and Robert Cushman to England to ask permission of the government for the Pilgrims at Leyden to settle in America. After some hesitation on the part of the king and the ministry, they obtained from the former an informal promise that he would not disturb them in America if they should decide to go there. Arrangements were completed for their removal to America, and they landed on Plymouth Rock on Monday, Dec. 11 (old style), 1620. Their arrival occurred in the dead of winter, and they were obliged during the long and severe season that followed to undergo great privation and suffering. Diseases engendered by the rigors of the climate swept away one half of their number. But the spirit which had brought the Pilgrim Fathers to New England caused them to remain undaunted by opposition, from whatever source. These were a vigorous and determined people, with strong convictions on all questions of morals and religion. They took possession of the new country and held it. They increased in number and gradually extended their borders over our present New England, and became as zealous for their religion as had been the English government before they left England. If the Church was not under the control of the State, the State was under the control of the Church; for a man could not hold office except he were a member of the Church; and religion lay at the basis of their political system. Notwithstanding their own bitter experience in their old home, they were intolerant of all dissent in their new abode, and they sometimes ran to great extremes of fanaticism against so-called heretics. Puritanism, however, has exerted a powerful influence for good in the development of American institutions by holding out sternly for the right in government as well as in private life.

Rhode Island was settled originally by the Baptists, followers of Roger Williams (q. v.). In 1636, along with a few companions, Roger Williams, seeking for a refuge beyond the limits of the Plymouth colony, founded Providence Plantation, and made it a resort for all the distressed and persecuted of whatever name or faith. Notwithstanding this liberality on the part of the founder, the colony was settled chiefly by those of the Baptist communion.

Connecticut was contested ground between the English settlers of Plymouth and the Dutch of New Netherlands. The Dutch, finding that the English were about to establish a colony in the valley of the Connecticut River, built a fort at Hartford called the House

of Good Hope; but this was not regarded by the English as of any right belonging to the Dutch, and they proceeded to settle the country from Plymouth. In 1635 a colony of sixty persons left Boston for Connecticut, where they arrived in due time, and settled at Hartford, Windsor, and Wethersfield. A little later other settlements were formed, and in 1639 the leading men of New Haven adopted the Bible as their political constitution. At the Restoration in England, Connecticut obtained a royal charter, and thus became a colony free and independent in all except the name. Puritan influence was in the ascendancy, and the colony enjoyed great prosperity and freedom from invasion.

New York was settled originally by the Dutch as a trading-post. A colony was planted on Manhattan Island (the present site of New York city), and the village was called New Amsterdam. In 1623 a considerable addition was made to the numbers of the colony by the arrival of thirty families of Dutch Protestant refugees from Flanders, called *Walloons*. They came to America to escape the persecutions which they had to undergo at home. The settlements were extended rapidly, even to the present site of Albany. In 1626 Manhattan Island was purchased from the Indians for *twenty-four dollars*. There was a bond of sympathy between the Walloons and the Pilgrims of Plymouth in that they were alike refugees from persecution at home, and, furthermore, the English remembered their kind treatment in Holland. Visits were exchanged and a friendly intercourse was kept up. The English notified their neighbors of their own claim to the territory of the Hudson, and advised them to make good their titles by accepting deeds from the council of Plymouth. In 1664 the Dutch power in America was completely broken. All the territory possessed by Holland in this country had been granted by Charles II to his brother James, duke of York, who made haste to secure the land thus granted. A squadron was sent against New Netherlands, and easily subdued the country. Thereafter the country and city passed under the name of New York. English settlers were brought in, but they lived at peace with the Dutch; even the strifes of the two home governments failed to embroil the colonists of New York in a contest. From the time of the English conquest of the territory, the Episcopal Church was established by law, and was supported by the usual taxation and grants of land. Traces of both the Dutch and English forms of worship are abundant in New York at the present time. (Dutch) Reformed churches and societies are numerous, as also are the Protestant Episcopal.

New Jersey was at first a part of New Netherlands, and was settled by the Dutch, especially in the northern part in the vicinity of New Amsterdam (New York). But, on the reduction of the Dutch power to submission to the English, that portion of the territory likewise passed under the control of the duke of York. It was assigned, however, to lord Berkeley and Sir George Carteret. A liberal government was provided, and in the first assembly, held in 1668, the Puritans were in the ascendancy, and the customs of New England were largely adopted in New Jersey. In 1676 the colony was divided into two sections by a line starting at the southern point of land on the east side of Little Egg Harbor, and extending north-northwest to a point on the Delaware River in latitude 41° 40'. The territory lying east of this line was to be known as East Jersey, and remain under the control of Sir George Carteret; while that lying between the line and the Delaware was called West Jersey, and had been assigned to certain Quakers (William Penn and others) in trust for Edward Byllinge. The western section, being under the control of the Quakers, became a place of refuge for the persecuted of that name. Many Friends found homes here, and enjoyed great prosperity. In 1682 William Penn and some other Quakers purchased the territory of East Jersey from

the heirs of Sir George Carteret, and extended their control over the whole province. Robert Barclay, an eminent Scotch Quaker, was chosen governor for life, and continued to administer the government until 1690, when he died. During this period East Jersey received a large accession of Scotch Quakers, and a still larger accession of Scotch Presbyterians. The northern section of the state retains a large number of the followers of the early Dutch Protestants, while the central and southern portions have the descendants of the Scotch Quakers and Presbyterians.

William Penn (q. v.) was greatly pleased with the success of the Quaker colonies in New Jersey, and formed the project of establishing a free state on the banks of the Delaware, founded on the principle of universal brotherhood. After a vigorous effort, seconded by powerful friends in Parliament, he obtained a charter in 1681 by which he became proprietor of Pennsylvania. Emigrants flocked to the new colony, a liberal government was planned, the land was purchased from the Indians, and relations of friendship were established with the savages which lasted for a long period of time. It is a pleasure to look back upon the history of Pennsylvania. It is one continued reign of peace and prosperity, resulting from the righteous principles upon which the colony was founded and maintained. Immigration was encouraged by the liberal policy of the proprietors, and thousands of German Protestants, who fled from persecutions at home, came and settled to the westward of the English communities. Their descendants remain to this day, and are among the most industrious and thrifty people in the whole land. Many Huguenots also came from France and formed settlements, and Irish Protestants occupied lands still farther west. From these different classes of emigrants have sprung the various prevailing religious bodies of Pennsylvania; but the Quakers and Germans have made the deepest impression upon the country, and they have had more to do in shaping the religious sentiment and policy of the people than any other.

Delaware was settled by the Swedes. Gustavus Adolphus, as early as 1626, had formed a plan of colonization, but was prevented from carrying it out by difficulties at home, and the plan was put into execution by Oxenstiern, the Swedish minister. In the early part of 1638 a company of Swedes arrived in Delaware Bay. They purchased from the Indians the country lying to the west of the bay, from Cape Henlopen to Trenton Falls, and named it New Sweden. This territory comprised the present state of Delaware and a part of Pennsylvania. But the colony of New Sweden was of short duration. In 1655 the country was entirely subdued by the Dutch of New Netherlands.

The colony of Maryland was founded as a home for persecuted Catholics. Sir George Calvert, of Yorkshire, England, a man of liberal education, large experience, and a devoted Catholic, was desirous of founding a colony which should afford a home for the persecuted Catholics of his own land, and should grant equal toleration to all creeds. About the year 1630 he obtained from king Charles I a charter for a new colony on the Chesapeake, but died before the colonization began. His son, Cecil Calvert, received the charter June 20, 1632, and named the new province Maryland. His brother, Leonard, was sent out with the colony as governor. The provisions of the charter were the most liberal that had yet been granted. Christianity was the religion of the State, but no preference was expressed for any creed. Free-trade was guaranteed, and arbitrary taxation forbidden. The power of making the laws of the colony was conceded to the colonists or their representatives. Under these liberal provisions, and the prudent conduct of the officers and the colonists themselves, the enterprise was very prosperous, and the colony grew very rapidly. Religious toleration and freedom of conscience were reiterated in the legislation of the colonial Assembly, and Maryland, along with

Rhode Island and Connecticut, went far beyond the other colonies in securing liberty of conscience. In 1691 the patent of the Baltimores was taken away by king William III. During the following year Sir Lionel Copley assumed the government of the province, and a revolution was speedily effected. The Episcopal Church was established by law, and supported by taxation; religious toleration was abolished, and the former liberal policy entirely swept away.

On April 10, 1606, king James I granted a patent to an association of nobles, gentlemen, and merchants residing in London, called the London Company, assigning to them all the region between the thirty-fourth and thirty-eighth degrees of north latitude. The affairs of the company were intrusted to the management of a superior council, residing in England, and an inferior council, residing in the colony. To carry out the purpose for which the charter was granted, a fleet of three vessels was fitted out, to be under the command of Christopher Newport. On Dec. 9, 1606, the vessels set sail, and in May following landed on the banks of the James River, in Virginia, fifty miles from Chesapeake Bay. Here they immediately laid the foundations of Jamestown, the oldest English settlement in America. The first settlers of Jamestown were idle, improvident, and dissolute. While a few were laborers and artisans, the great majority were enrolled as *gentlemen*. John Smith, the best and most energetic man of the colony, was accused of conspiracy and sedition, but was able to defend his name against the accusations. The colony was organized by making known the names of the inferior council, and the election of Edward Wingfield as governor of Virginia. The new colony had a hard struggle for its existence. The idleness and dissolute habits of the settlers, the treachery of some of the leaders, and the civil dissensions which arose in the community threatened to break up the settlement in the very beginning. But, after various disasters and discouragements, Smith was elected president, and began a vigorous administration which added new life to the enterprise. By the undaunted courage of the officers from this time onward, and the encouragement given by the arrival of new accessions to their number from time to time, the colony was able to maintain its existence. The settlements were extended, and the colony grew into a flourishing province. The Episcopal Church was established by law and supported by taxation; churches were built in various parts of the province, and remained for many years. Along with the English revolution came religious intolerance in Virginia. In March, 1643, a law was enacted by the Assembly declaring that no person who did not assent to the doctrines of the Established Church should be allowed to teach, or to preach the Gospel, within the limits of Virginia. Their persecution of the Puritans within their borders brought upon the Virginians the distrust of the colonists of New England for many years.

The attempt to form settlements in the Carolinas was for a long time unsuccessful. In 1663 began the first colonial settlements in North Carolina on the Chowan River and Albemarle Sound. The colony passed through many vicissitudes of fortune, but the settlers remained in possession of the territory. In 1704 an attempt was made by Robert Daniel to establish the Church of England. George Fox, the founder of the Quakers, at one time (1672) made a visit to the settlements of Carolina, and obtained many hearers to his instructions. Other Quakers came from New England and Delaware, and made their homes in this colony. In 1707 a band of French Huguenots were added to the settlers; a hundred German families from the banks of the Rhine came to find a home on the banks of the Neuse; and a number of Swiss peasants founded New Berne, at the mouth of the River Trent. Little attention was paid to questions of religion at first. There was no minister in the colony until 1703, and no church

until 1705. But the largest liberty of conscience was allowed, and a field opened for the sowing of precious seed.

South Carolina was colonized in 1670, and Old Charleston founded. The present city of Charleston was laid out and a beginning made in building ten years later. In 1686 South Carolina began to receive the Huguenots (q. v.) from France, and in a short time had more of these French refugees than any other American colony. The proprietors pledged them protection and citizenship, but, owing to the unsettled condition of their political plan, the Huguenots were kept in suspense for many years. The first general act of enfranchisement was passed in their favor in May, 1691, and their full political rights were established in 1697. In 1695 began the administration of John Archdale as governor. He was a Quaker of distinction, and ruled with such wisdom and moderation that the colony greatly prospered. He was instrumental in procuring the passage of a law by which all Christians, except the Catholics, were fully enfranchised; and the exception was made against his earnest protest. The policy of South Carolina, as well as that of her northern sister, had been one of religious toleration and civil liberty; consequently no church was established by law, but Christians of all denominations were welcomed to her shores. The Dutch came from the banks of the Hudson, the French vine-dressers were sent by king Charles; Churchmen and Dissenters from England, Irish peasants, Scotch Presbyterians, and Huguenots, all found a home and welcome under the genial sun of South Carolina.

The colony of Georgia was founded as an asylum for the oppressed poor of England and the distressed Protestants of other lands. James Oglethorpe, an English cavalier and member of Parliament, obtained a charter from George II, by which the territory between the Savannah and Altamaha rivers was organized and granted to a corporation for twenty-one years in trust for the poor. This charter was dated June 9, 1732, and the new province was named Georgia, in honor of the king. The organization of the colony was on a liberal basis. Oglethorpe, who was the first governor, was a High-Churchman, but made no distinction among the immigrants who came. Swiss peasants, Scotch Highlanders, and German Protestants from Salzburg came and made their home with the English. Then came the Moravians with their vital religion, and the Methodists, in the persons of John and Charles Wesley and George Whitefield. The labors of the Wesleys were not productive of any permanent results, but those of Whitefield were more successful.

The colonization of Florida was first effected in 1565. Pedro Melendez, a Spanish soldier of a wicked disposition and evil habits, was commissioned by Philip II to explore the coast of Florida, conquer the country, and plant a colony in some favorable site. Melendez arrived in sight of land on St. Augustine's day, but did not land until Sept. 2. The harbor and the river which enters it were named in honor of that saint. On the 8th of the same month, after the proclamation of the Spanish sovereignty and the celebration of mass, the foundations of St. Augustine were laid. This is the oldest town in the United States, having been founded seventeen years before Santa Fé, and forty-two years before Jamestown. The founders were Catholics, and their dastardly leader was a cruel monster who hoped to regain the favor of his countrymen by murdering the members of a Huguenot settlement about thirty-five miles above the mouth of the St. John's River. The work was done in a most heartless manner, and the French settlement entirely broken up. The outrage was subsequently avenged by Dominic de Gourgues, a soldier of Gascony, who attacked successively three Spanish forts on the St. John's, captured the inmates, and afterwards hanged the principal of them.

When La Salle visited the lower Mississippi valley in 1682 he took possession of the country in the name of

Louis XIV of France, giving it the name of Louisiana. A settlement was attempted by Iberville and his followers at Biloxi, in 1699. He died before the project was fairly successful, and was succeeded in command by Bienville, who was driven from his post by the Indians and compelled to take up his abode at the present site of New Orleans. Others succeeded Bienville in the governorship of the new territory, but he was reappointed in 1718, and began to build a town on the site he had formerly selected as headquarters, and named the city New Orleans, in honor of the Duke of Orleans. In 1723 it was made the capital of the province. A large tract of country was ceded by France to Spain in 1762, and remained under control of that power for thirty-eight years, but was restored in 1800, and in 1803 sold by Napoleon Bonaparte to the United States for \$11,250,000 and the assumption of certain claims due from the French government to citizens of the United States, amounting to \$3,750,000. Thus was purchased, at a cost of \$15,000,000, nearly all the territory included in the present states of Louisiana, Arkansas, Missouri, Iowa, Minnesota, Dakota Territory, Nebraska, most of Kansas, Indian and Wyoming territories, part of Colorado, and the whole of Montana, Idaho, Oregon, and Washington Territory. This was afterwards divided up from time to time as the wants of the population required. The Mississippi valley, while under the control of the French, had many settlements of French Catholics, which have left their impress upon the country to a greater or less extent.

The first attempt to colonize Texas was by the French under La Salle in 1687; but this great explorer lost his life in returning towards the Mississippi during the same year, and the men who were left to hold the post established were either killed or driven away. In 1690 a trading-post and a mission were established by the Spanish, and subsequently other settlements were made by the same power. Then in 1735 a French colony was sent into Texas from the Red River. But neither the French nor the Spanish held possession of the country unmolested. After the Louisiana purchase, difficulty arose between Spain and the United States as to the boundary, the United States claiming the territory west to the Rio Grande, while Spain claimed it east as far as the Sabine. This was finally settled by treaty, in which the United States guaranteed to Spain her territory west of the Sabine. Mexico became independent in 1821, and Texas formed a part of it, being united under one government with Coahuila. But while Coahuila was exclusively Mexican, Texas was settled largely by colonists from the United States, generally under grants of land from the Mexican government. Thus there existed a natural barrier between the Texans and the Mexicans, and after much dissatisfaction with the government of the latter, the former fought for and gained their independence in 1836. Texas was annexed to the United States in 1846.

Tennessee was originally a part of North Carolina, and was settled mainly by emigrants from that State. Kentucky belonged to Virginia, and was settled likewise by Virginians. The other Western States lying east of the Mississippi were included in the *Territory north-west of the Ohio*. The French under La Salle had explored this region, laid claim to it, and established trading-posts guarded by forts in various parts of it, but they finally relinquished their claim to it. A considerable part of this territory was claimed by Virginia, Pennsylvania, New York, and New England under their original territorial grants; but these claims were all relinquished except a part belonging to Connecticut, called the Western Reserve, and a Virginia reservation, now a part of Indiana, each including about 3,700,000 acres. Emigration extended into this section from the older states, as a rule, on the lines of latitude, although there were many exceptions, and each new settlement partook of the characteristics of the region from which it was peopled. The first settlement in Ohio was at Ma-

rietta in 1788, formed by a colony from New England. Many localities in Southern Ohio were settled by emigrants from Virginia, while the northern section was peopled by New-Englanders. The oldest settlements in Indiana were made by the French at Vincennes, Corydon, and other places in that vicinity, in 1702. Michigan and Illinois, as well as Wisconsin and Minnesota, had numerous settlements which were formed by the French Catholics in the 16th and 17th centuries. Subsequently these states, especially Michigan, Minnesota, and Wisconsin, were filled up largely from the New England States and New York.

Like the rest of the Mississippi valley, Iowa was explored and claimed by the French, but was a part of the Louisiana purchase, and so became the property of the United States government. The first white settlements under the authority of this government were made in 1833-34 at Fort Madison, Burlington, and Dubuque. The inhabitants of Iowa have always taken high ground on all questions of civilization, education, and morals.

The Pacific Slope has received its population in recent times. The southern portion extending far towards Texas was formerly a Spanish possession, and there yet remain many Spaniards and Mexicans within those states and territories. The population of California grew up very rapidly after the discovery of gold in 1848. Miners, speculators, and adventurers rushed thither from all parts of the country, and formed a very motley crowd. Many of these remained, but by far the larger portion returned to their former homes or wandered to other lands. Oregon was included in the Louisiana purchase, and began to be settled by emigrants from the States about 1832. In 1834 the missionary colony of Dr. Marcus Whitman and Rev. Mr. Spalding entered Oregon, and in 1842 the emigration to that region was large.

The settlement of Utah constitutes a remarkable chapter in the history of our country. The Mormons (q. v.), under the leadership of Joseph Smith, made their first settlement in Missouri, where they grew to be a body of considerable numbers; but their theories and habits were distasteful to the people of that state, and they were compelled to remove in 1840. They found their way across the Mississippi into Illinois, where they founded the city of Nauvoo. Here they increased to ten thousand in number, but were obliged to leave this place also on account of the dissatisfaction of the people among whom they lived. In 1846 they removed beyond the Rocky Mountains to the basin of the Great Salt Lake, and founded Utah Territory. In this territory they have held sway during all the succeeding years, and have lived in defiance of the laws of the United States, with, seemingly, no power to check them. A new era seems to be dawning. Law-abiding and Christian people are finding homes within the limits of the territory, and a population is fast growing up whose influence will secure the execution of the laws of the land.

New Mexico was colonized by the Spaniards about the close of the 17th century. Many missions were established by the Roman Catholics and many of the Indians were converted to that faith. The mineral wealth of the country was discovered, the colonists opened and worked the mines, and enslaved the Indians for that purpose. At length the Indians shook off the power of their oppressors and drove the Spaniards from their territory; but near the close of the 17th century the latter regained a part of their former power. In 1821, along with the rest of Mexico, New Mexico became independent of Spain, and was a part of that republic until 1848, when it was ceded to the United States. The Gadsden purchase was added in 1853, when it included all of Arizona and part of Colorado. Arizona was set off from it in 1863, and a portion of Colorado in 1865. The inhabitants are largely Mexican, Spanish, and Indians, with an ever-increasing number of emigrants from the United States.

2. *Effects of more Recent Immigration.*—The United States are peculiar among all the nations of the earth, as being composed of a population entirely foreign in its origin. While other countries have been invaded and the lands occupied by conquerors, largely to the exclusion of the natives, yet the old stock has not been entirely rooted out, but has become the basis of the succeeding race. In English history, the Anglo-Saxon united with the old Celtic stock, and the Norman with the Saxon, forming the Anglo-Norman race of the present. But in America the aborigines have always been treated as aliens and intruders, and are fast declining towards extermination. The great breadth of our unoccupied lands, and the excellent opportunities for obtaining cheap homes, have rendered America a favorite resort for emigrants from all parts of the world, so that at the present time more than *thirteen per cent.* of our population are foreign-born. The aggregate immigration from 1820 to 1810 was 750,949; from 1841 to 1850 it was 1,713,251; from 1851 to 1860 it was 2,598,214; from 1861 to 1870 it was 2,491,451; and from 1871 to 1878 it was 2,177,108—making a total of 9,731,073; in the year ending June 30, 1880, it was 457,243 persons. Of this vast number about one fifth have been from Ireland, one fourth from England, one tenth from Scotland and Wales, four fifteenths from Germany, one thirtieth from France, the remainder (nearly one sixth) from Scandinavia, Switzerland, Italy, Austria, Spain, Portugal, Russia, Holland, Belgium, China, etc. More than *one twentieth* of this immigration has been from Roman Catholic countries, and, in addition to this, a large proportion of those from other countries are of the same faith. Thus we have added to our population from foreign countries a large Catholic element, besides the natives who are of that faith, and the rapid increase of their numbers by the ordinary methods of propagation. Among these Catholics have come many Jesuits (q. v.), some from choice, others because of their expulsion from their European homes, who have used their influence so far as it was in their power to mould the government to their own ideas. Officers have been elected at the dictation of the priesthood, political parties and municipal governments have been under their control, and vast wealth has been amassed at the expense of the public. They have maintained their own schools, and have waged an unceasing warfare upon the public-school system of our states. They have fought hard to exclude the Bible from the public schools, and, when it was accomplished in a few instances, denounced them as godless schools. Under pretext of the right of conscience, they have sought and obtained a division of the public-school funds in a few instances.

Protestant immigrants, as a rule, have been in sympathy with our institutions from the first, and have readily fallen in with American ideas and practices. The recent accessions from the British isles have found the institutions and customs established by their ancestors, and have easily accommodated themselves to the new order. German Protestants as well as Roman Catholics have less readily Americanized. They continue, as far as possible, to use their native language and retain their German habits. They gather into communities of their own, and thus, in a degree, isolate themselves from American society. Of the great mass of Protestant immigrants who arrive here from European countries, by far the larger part are poor; but in so far as they honestly endeavor to adapt themselves to their new surroundings they make good citizens. The Jews who come among us are mainly from Germany. They still continue to be a despised race, and are compelled to seek their society among their own numbers. They live together in communities, and have but little sympathy with American customs. With our Sabbath and the prevailing religion they are utterly at variance. A few infidels arrive from time to time, and join with those of our own country in antagonizing so much of our present system as is designed to restrain

* Including negroes, Indians, Chinese, etc.

Sabbath-desecration and preserve a wholesome regard for the laws of God. The Mormons of Utah find it to their interest to add to their numbers by means of converts secured in European countries. These, however, make their homes within the limits of the Mormon territory, and their influence is not felt except in the increased strength of the sect with which they have united. There have been considerable accessions to our population in late years from China, mainly on and near the Pacific coast. The Chinese, however, do not come to remain here, but simply to improve their temporal condition, and then return to their former home. There are certain kinds of labor in which they excel, and their services may be had at a lower price than those of any other people. Hence "Chinese cheap labor" has become a proverb among us, and has been the occasion of serious disturbances in various parts of California, loafers and politicians making it the pretext for deeds of violence and shame.

The general influence of foreign immigration upon our institutions has been most noticeable in large cities and towns, and in respect to the observance of the Sabbath and temperance. Very many who come to us from foreign lands have been addicted to the use of strong drinks at home, and their improved financial condition and the absence of restraint give them opportunities for indulging their appetites to an extreme. They are thus plunged into excesses which exert a very baleful influence upon our country. The traffic in lager-beer is almost entirely dependent upon our German population for its maintenance. With them the Sabbath is a holiday, and is spent in visiting beer-saloons, parks, and gardens, and picnic excursions of various kinds. Wherever they exist in sufficient numbers to exert a controlling influence, their shops are kept open on the Sabbath, and the traffic is carried on nearly as on any other day. Their example is contagious. Many Americans who first looked upon the practice with horror, in time have become so accustomed to it that they no longer feel any annoyance, and finally begin to purchase goods upon the Sabbath. In this way the former reverence for the sacred day, so nearly universal in our country, is fast passing away, so that to-day more people are found pleasure-seeking, or engaged in labor, on the Sabbath than are found in churches in many localities. These evils are more especially apparent in large cities. Many of these, or at least whole wards in them, are made up almost entirely of foreigners. These become citizens while yet ignorant of the duties of citizenship, and fall under the control of unprincipled politicians, by whom the design of a free government is perverted, and the principles of morality are disregarded.

3. *Denominational Organization.*—The early colonists, who had never known any other relation between the Church and State than the control of the latter over the former, naturally began with the old order of things; but they soon perceived that the liberty which they sought was not consistent with such control, and they gradually abandoned it. The effort soon came to be, not to control the Church by law, but to emancipate conscience; and at the organization of the Federal government all were ready for a Church free from State control. See CHURCH AND STATE. The early settlers of Virginia brought with them the Episcopal form of service [see ENGLAND, CHURCH OF], and it was carried to other parts of the land. Out of this grew the Protestant Episcopal Church (q. v.) of this country. The Reformed (Dutch) Church (q. v.) was the outgrowth of the Dutch settlements in New York and New Jersey. The Puritans of New England retained their peculiarities, which have come down to us in the Congregationalists (q. v.). The Presbyterian churches (q. v.) of this country originated from parties of immigrants from England, Ireland, and Scotland, who settled within the limits of various colonies. These united subsequently according to their former organizations on the other side of the Atlantic. The Baptists (q. v.) originated among the Puritans and were banished from their midst. Their history is well given under the appropriate heads. Methodism (q. v.) in this country was propagated by the followers of Wesley. Their zeal and energy were great, and their growth rapid in consequence. The Roman Catholics of Maryland were from England, those of Florida from Spain, those of the

Lake region and the Mississippi valley from France. See ROMAN CATHOLIC CHURCH IN THE UNITED STATES. The Quakers (q. v.) originated in England, and found their way among the American colonists. They founded large and flourishing colonies of their own, and propagated their doctrines with unprecedented zeal.

II. *Ecclesiastical Statistics.*—These are given in detail under each denominational head in this *Cyclopædia*. Their aggregate is presented in tabular form at the foot of the preceding page, and is made up from the census of 1880 and other sources.

United Synod of the Presbyterian Church. See PRESBYTERIAN CHURCHES, 16.

United Syrians, one of the Syrian churches which dates from the 17th century, when a numerous party under Andreas Achigian, their first patriarch, seceded from the Jacobites, and acknowledged the authority of the pope. They have a patriarch at Aleppo, styled patriarch of Antioch; and archbishops at Aleppo, Babylon, Damascus, and Seleucia, besides eleven bishops. They number about 30,000. See SYRIAN CHURCHES.

Unity, as a philosophical term, signifies *oneness*. Aristotle makes it the element of number, and defines it as indivisibility. In the Kantian philosophy it is defined as "that mental representation in the understanding by which the manifold is thought of as linked together." It is by the same authority classified as *analytic*, or unity of a logical connection; and *synthetic*, or unity of intentions in the concept of an object.

As a theological term, unity is employed to signify a oneness whether of sentiment, affection, or behavior (Psa. cxxxiii, 1). The "unity of the faith" is an equal belief of the same great truths of God, and the possession of the grace of faith in a similar form and degree (Eph. iv, 13). The "unity of the spirit" is that union between Christ and his saints by which the same divine spirit dwells in both, and they have the same disposition and aims; and that unity of the saints among themselves by which, being joined to the same head, and having the same spirit dwelling in them, they have the same graces of faith, hope, love, etc., and are rooted and grounded in the same doctrine of Christ, and bear a mutual affection to each other. When Christian unity is spoken of in the New Test., it generally means the unity of dispensation for the various classes of converts. It is expressive of the great principle that all were to be under one fold and one Shepherd.

UNITY OF THE CHURCH is a phrase employed to denote that all true believers are "one body in Christ." The Church is not to be considered as one on account of the common origin of the different societies, but because they were formed on common principles. There is no necessity for a visible head, as is now claimed by the Church of Rome, in order to unite all parts of the universal Church into one communion; nor is it necessary that the whole Church should agree in all rites, ceremonies, and observances in order to the same result. The circumstance of its having one common head, Christ, one Spirit, one Father, are points of unity which no more make the Church one society on earth than the circumstance of all men having the same Creator, and being derived from the same original pair, renders the human race one political community. The scriptural representations of this unity of believers in Christ is thus summarized by Chrysostom: "He is the head, we are the body; he is the foundation, we are the building; he is the vine, we are the branches; he is the bridegroom, we are the bride; he is the shepherd, we are the sheep; he is the way, we are the travellers; we are the temple, he the inhabitant; he is the first-born, we are the brothers; he is the heir, we are the co-heirs; he is the life, we are the living. These things are manifestly one." The unity of the Church is not so much an accomplished fact as the original design would have it, nor as must be in the future. The intimacy of this union is indicated in our Saviour's intercessory prayer,

in which he asks that the members of this body may be one, as he and the Father are one. See Neander, *Hist. of the Church*, i, 180, 181; Hagenbach, *Hist. of Doct.*, i, 195; Bingham, *Ch. Antiq.*, bk. vi, ch. iii; bk. xvi, ch. i.

UNITY OF GOD is a term used to denote that there is but one God or self-existent being. The unity of God is argued from his self-existence, his independence, the perfection of his nature, his omnipotence, and the unity of design in the works of nature. The doctrine was lost sight of by heathens, and maintained by Israel and in the Gospel. The Scriptures make no attempt to prove the doctrine, but assert it unequivocally. See Exod. xx, 3; Deut. iv, 35; vi, 4; Psa. lxxxvi, 10; 1 Cor. viii, 4, 6, etc. When the doctrine of the Trinity (q. v.) was formulated, it became necessary for the Church to declare that this does not conflict with the doctrine of his unity. See Hagenbach, *Hist. of Doct.*, i, 102, 330; Van Oosterzee, *Christian Dogmatics*, i, 250.

UNITY OF THE HUMAN RACE. See ADAM.

Universal Bishop, a title assumed by the Roman prelates succeeding Gregory I (590-604). The patriarchs of the Eastern Church, particularly John Jejunator, had claimed the title of *æcumenical patriarch*. This Gregory denounced as arrogant and anti-christian. The title, however, was adopted by the successors of Gregory in its original signification. See Trevor, *Rome*, p. 104; Schaaf, *Hist. of the Christian Church*, ii, 328 sq. See **ÆCUMENICAL BISHOP**.

Universal Friends, a sect which arose in Yates County, N. Y., near the close of the last century, professing to be followers of Jemima Wilkinson (q. v.), a Quakeress, who professed to work miracles, and assumed the title of "the universal friend of mankind." The sect is now almost extinct, and the Universal Friends are sometimes called *Wilkinsonians* (q. v.).

Universal German Library is a work begun in 1765, under the direction of Frederick Nicolai, with about fifty writers, afterwards increased to one hundred and thirty. It became at once the public organ of all those who felt called upon to lift their voice against superstition, fanaticism, and prejudice, as well as everything which was spiritually elevated or that was related to a more lively imagination and a deeper feeling. It was the high tribunal of rationalism. Not alone the orthodox, nor supposed enthusiasts and pietists, nor Lavater, but Goethe, and even poetry, and philosophy wherever it arose above arbitrary and secular discussion (e. g. Kant and Fichte), were spurned by this inquisitorial court as folly, flattery, and secret Jesuitism. The much-lauded tolerance was immediately converted into intolerance and bigotry. All the articles in the *Library*, however, were not colored by Nicolai's scepticism, for there were also many weighty opinions of worthy scholars. The work served an important purpose in bringing to the knowledge of the world literary productions of value, and in fostering and encouraging a taste for reading. See Hagenbach, *Hist. of the Church in the 18th and 19th Centuries*, i, 307 sq.

Universal Redemption. See ATONEMENT; REDEMPTION.

Universalism. The ultimate restoration of all sinners to happiness and the favor of God is maintained by Universalists (q. v.) on the ground that the final exclusion of any soul from heaven would be contrary to the illimitable love of God; that the wrath of God is only exercised against sin—repentance, even in the future life, bringing about a restoration to his love. But this supposes a distinction between sin and the sinner which is not only without foundation in the Holy Scriptures, but is contradictory to their statements. We are nowhere told, as regards a future state, that God's wrath against sin will *only* continue so long as sin remains, but that the *sinner* himself who dies impenitent will be eternally punished.

Again, it is asserted that Scripture has no plain dog-

matie statements at all as to the possibility or impossibility of repentance after death (i. e. in hell). There are terrible threats of divine vengeance which will overtake the ungodly; but there are some distinct utterances of a hope embracing all times, existence, and states, and the specific question at issue does not seem to be raised by Scripture. Such utterances are supposed to be contained in 1 Cor. xv, 22-28; Eph. i, 9, 10; Phil. ii, 9-11; Col. i, 19, 20. Now it may fairly be admitted that the passages cited *do* appear to favor Universalism, and they might have been so understood, had it been elsewhere taught in Scripture; but they are of no weight whatever in opposition to its clearest and most emphatic declarations. The apostle here says that God will be all in all—that all things shall be subdued unto Christ, reconciled unto him, and that every tongue shall confess that he is Lord of all. But such statements must be viewed in connection with other passages of Scripture which contradict the doctrine of universal salvation, and also according to scriptural usage and the meaning which can only be given to many parallel passages. For example, our Lord says that when lifted up on the cross (referring to the present efficacy of his atonement) he will draw all men unto him (John xii, 32). No declaration can be more positive and unequivocal than this; and yet, literally understood, it is not merely untrue, but contradictory to other statements of Scripture, e. g. that no man can come to Christ except the Father draw him, and that they only are drawn who hear and learn of the Father (vi, 44, 45)—certainly not all men. Such is the usage of Scripture language; a thing is spoken of as being really effected to indicate the certainty of the purpose, and that every provision has been made for its accomplishment, though eventually through man's sinfulness God's benevolence may be frustrated. See PURGATORY.

Again, Christ died for all men, and God would have all men to be saved—statements obviously leading to the supposition, at least, that all mankind will at last be saved. Yet in other passages of Scripture there is an apparently discordant statement that Christ died for "many," laid down his life for "the sheep," and the object of redemption is said to be to "gather together in one the children of God which are scattered abroad" (Blunt, *Dict. of Theol.* s. v.). These passages are to be reconciled by the ready answer that *provision* indeed is made for the salvation of all, but its actual effect will depend upon the voluntary embracing or rejecting of it on the part of men individually. See REDEMPTION.

Dr. Chauncy's arguments in favor of Universalism (*Salvation of All Men*) are these: 1. Christ died not for a select number of men only, but for mankind universally, and without exception or limitation, for the Sacred Scriptures are singularly emphatic in expressing this truth (John i, 29; iii, 16, 17; Rom. v, 6; 1 Cor. xv, 3; 1 Thess. v, 10; Heb. ii, 9; 1 Pet. iii, 18; 1 John ii, 2). 2. It is the purpose of God according to his good pleasure that mankind universally, in consequence of the death of his son Jesus Christ, shall certainly and finally be saved (Rom. v, 12, etc.; viii, 19-24; Eph. i, 9, 10; iv, 10; Col. i, 19, 20; 2 Tim. i, 4). 3. As a means in order to men's being made meet for salvation, God will sooner or later, in this state or another, reduce them all under a willing and obedient subjection to his moral government (Psa. viii, 5, 6; Matt. i, 21; John i, 29; 1 Cor. xv, 24-29; Phil. ii, 9-11; Heb. ii, 6, 9; 1 John iii, 8). 4. The Scripture language concerning the reduced or restored, in consequence of the mediatory interposition of Jesus Christ, is such as leads us into the thought that it is comprehensive of mankind universally (Rev. v, 13). The opponents, however, of Dr. Chauncy and this doctrine observe, on the contrary side, that the Sacred Scriptures expressly declare that the punishment of the finally impenitent shall be eternal (Matt. xii, 31, 32; xvii, 8; xxv, 41, 46; xxvi, 24; Mark iii, 29; ix, 43; Luke xii, 10; Eph. ii, 17; 2 Thess. i, 9; Heb. i, 4, 6; x, 26, 27; 1 John v, 16; Jude xiii; X.—T T

Rev. ix, 3; xiv, 11; xx, 20).—Henderson's Buck. See HELL.

In short, severe as may seem the doctrine of eternal punishment, and however much we may naturally wish to avoid its acceptance, this is not a question for us to solve according to our inclination. We must ask, with reference to all matters connected with the future world, What has God revealed? what has *he* declared? The Scriptures are the ultimate appeal, and these to candid and thoughtful minds have ever been plain and positive on the subject. Moreover, the same abstract arguments which are often adduced against the *everlasting* punishment of sin apply to its present punishment, and, indeed, against the fact of sin itself. If God loves man and loves holiness, why does he suffer him to sin at all? We are thus brought back to Butler's immortal argument, and constrained to bow to the sovereign will of the Almighty. The following judicious remarks are from Van Oosterzee, *Christian Dogmatics*, ii, 438:

"The duration of future punishment is most definitely represented in Holy Scripture as absolutely endless (Mark iv, 44-50; Rev. xiv, 11, etc.). Even if the word *eternal* does not in itself denote absolute endlessness, it is surely a different matter when eternal pain is without any limitation associated with eternal life (Matt. xxv, 46). We will here only call to mind the fact that those who maintain the contrary of restorationism can bring forward numerous and plain statements of the Lord and his witnesses; at any rate, the possibility of an endless misery is most distinctly declared in Matt. xii, 31, 32; and such words as those in Luke xvi, 26; Matt. xxv, 10, 41; xxvi, 24 could hardly be vindicated from a charge of exaggeration if he who spoke them had himself seen even a ray of light in the outer darkness, and been able and willing to kindle it before others' eyes. In no case could such a ray be seen without previous contrition and conversion; but, viewed even psychologically, this latter is certainly nowhere to be looked for less than in a hell of sorrow and despair, not to say that the Gospel nowhere opens up to us a certain prospect of the continuance of the gracious work of God on the other side of the grave. He who here talks of harshness must by no means forget that sinful man is a very partial judge in his own case; that nothing less than the highest grace is boldly and stubbornly set at naught in the case here supposed; and that there always will be, according to the teaching of Scripture, an equitable distinction in the rewards as well as in the punishments of the future (Luke xii, 47, 48; Rom. ii, 12 sq.). Ay, even if men might flatter themselves with a diminution or postponement of the punishment, there still would always be a remembrance of the incalculable mischief which they had done to themselves and others, and this would be a dark cloud before the sun of an eventual happiness. Least of all could they hope for such an end who have known the great salvation, and all their lives ungratefully despised it (Matt. xi, 24; Heb. ii, 3). As to the heathen and others who, entirely without their own fault, have missed the way of life, Holy Scripture nowhere compels us to believe that these should summarily, and on that account alone, be the victims of an eternal damnation. While there is only one way of salvation (Acts iv, 12), the Merciful One will make it known to men in some way (1 Pet. iii, 19). We can safely leave to God the justification, even in this respect, of his own government of the world; but we must take careful heed that we do not try to be more merciful and wise than he to whom sin, as long as it continues to be sin, is thoroughly damnable. Even in preaching the Gospel, his servants are not free to leave this darker side entirely unmentioned. The statement of it should always be joined with that of the friendly light of grace, and let the preacher take care that he does not lead his hearers in the way of despairing fear or unbelieving doubt by yielding to the desire to paint hell as black as possible. The best statement of the prospect of the sinner is that of 'going to his own place,' i. e. to the land of his own choice, where he may still continue to dwell."

SEE PUNISHMENT, FUTURE.

Universalists, a Christian sect believing in the final destruction of sin and the reconciliation of all souls to God through the Lord Jesus Christ. They claim that there is proof of the existence of their doctrine, Universalism, and of the activity of its advocates under various names, from the introduction of Christianity to the present time.

I. Origin and History.—(1.) *Informal*.—1. In *Former Centuries*.—The earliest notices now to be found of Universalism after the days of the apostles are in the writings of some of the more prominent Gnostic

sects, as the Basilidians, Carpocratians, and Valentini-ans, about A.D. 130. The ultimate purification of the race was, according to their theories, by means of the discipline of the souls of the wicked through transmigration. In the *Sibylline Oracles*, which appeared A.D. 150, Universalism is taught as resulting from the prayers of the saints affected by the miseries of the damned. The Almighty is represented as granting this favor to the redeemed on account of the great love which he bears to them for their fidelity. In 195 Clements Alexandrianus, who was president of the Catechetical School at Alexandria, advocated Universalism on the ground of the remedial character of all punishment. His pupil and successor in the school, Origen Adamantius, famous alike for his learning, piety, and zeal, taught Universalism on the ground of the ever-continuing freedom of the will, the deep mental and spiritual anguish occasioned by the light and knowledge of the truth until it leads to repentance, and then the harmony of the soul with God. Origen's position, abilities, and untiring efforts for the spread of the Gospel gave him great influence with his pupils, and with the Church at large, in whose behalf he became a voluminous writer. In addition to his position and work in the school of Alexandria, he also had care for several years, in connection with Pamphilus, of the theological school at Cæsarea, one of whose distinguished pupils was the celebrated Gregory Thaumaturgus, a great admirer of his master's theories, and finally, about A.D. 235, his strong defender and ardent eulogist. Pamphilus, and Eusebius, the first Church historian, also defended Origen's doctrines from charges brought against them by the Western Church, and in answering the complaint that he denied all future punishment they quote from his writings in contradiction thereof, not only his positive assurances of future and severe punishment, but his equally positive assertion that such correction is purifying and salutary. In A.D. 364, Titus, bishop of Bostra, wrote in advocacy of Universalism, contending that, although there are torments in the abyss of hell, they are not eternal, but that their great severity will lead the wicked to repentance and so to salvation. Gregory of Nyssa, A.D. 380, also advocated Universalism on the same grounds. Contemporary with him was the justly celebrated defender of orthodoxy, Didymus the Blind, a successor of Origen in the school at Alexandria, and a zealous Universalist. Prominent among his scholars was Jerome, eminent alike for his abilities, his inconsistencies, and instability. Universalism as taught by Origen is clearly and ably set forth by Jerome in his commentaries on the epistles, and in his letters. John, bishop of Jerusalem at this period, was also an advocate of Universalism on Origen's theory. Another contemporary, Diodorus, a teacher of great repute in the school at Antioch, and afterwards bishop of Jerusalem, was also a Universalist, who, in opposition to the then general prevalence of allegorical interpretation, strictly adhered to the natural import of the text in his many commentaries on the Scriptures. He defended Universalism on the ground that the divine mercy far exceeds all the effects and all the deserts of sin. His pupil and successor in the school, Theodore of Mopsuestia, A.D. 420, called "the crown and climax of the school of Antioch," and by the Nestorians, whose sect he founded, "the interpreter of the Word of God," and whose writings were text-books in the schools of Eastern Syria, was a prominent and influential Universalist. His theory was that sin is an incidental part of the development and education of the human race; that, while some are more involved in it than others, God will overrule it to the final establishment of all in good. He is the reputed author of the liturgy used by the Nestorians, a Church which at one time equalled in its membership the combined adherents of both the Greek and Latin communions, and which has had no rival in military zeal. In the addresses and prayers of this liturgy Universalism is distinctly avowed. The-

odore, A.D. 430, bishop of Cyprus in Syria, a pupil of Theodore of Mopsuestia, was also a Universalist, holding the doctrine on the theory advocated by the Antiochian school.

For some time prior to this, certain opinions of Origen on pre-existence and on the salvation of the devil had been in dispute and pronounced heretical by a synod; but his doctrine of the universal salvation of the human race had not been involved in this condemnation. At a local council called by the emperor Justinian at Constantinople, A.D. 544, Origen's doctrine of universal salvation was declared heretical. Nine years later another council was held by the same authority at the same place, when condemnation was pronounced on the Nestorians, although their belief in Universalism was not mentioned. It has been common to call this an œcumenical council, but without warrant (see the action of the Latin Church in refusing to recognise it or to send a legate to it). Doderlein, in his *Institutes of Christian Theology*, after quoting the decree of Justinian against Origen, says, "That was not the belief of all, and in proportion as any one was eminent in learning in Christian antiquity, the more did he cherish and defend the hope of the termination of future torments." Drexelius, in his defence of eternal punishment, gives this testimony: "That God should doom the apostate angels and men at the day of retribution to eternal torments seemed so hard and incredible a doctrine to some persons that even Origen himself, who was mighty in the Scriptures, and no less famous for his admirable wit and excellent learning, presumed to maintain in his book of principles that both the devils and the damned, after a certain period of years, the fire having purged or cleansed them from their pollutions, should be restored to grace. Augustine and others set forth his error and condemned him for it. But, notwithstanding their condemnation, this error has found a great many in the world who have given it a kind of civil reception. The *Anti*, heretics so called, dispersed this error throughout all Spain under various interpretations." Gieseler, the ecclesiastical historian, says, "The belief in the inalienable capacity of improvement in all rational beings, and the limited duration of future punishment, was so general, even in the West, and among the opponents of Origen, that, even if it may not be said to have arisen without the influence of Origen's school, it had become entirely independent of his system." And Augustine bears this testimony: "Some—nay, very many—from human sympathy commiserate the eternal punishment of the damned and their perpetual torture without intermission, and thus do not believe in it; not, indeed, by opposing the Holy Scriptures, but by softening all the severe things according to their own feelings, and giving a milder meaning to those things which they think are said in them more terribly than truly."

Universalism almost wholly disappeared during the period known as the Dark Ages, although there are occasional glimpses of it even in the mutilated records which the papal Church has permitted to descend to us. In the 7th century, Maximus, the Greek monk and confessor, taught Universalism; in the 8th, Clement of Ireland was deposed from the priesthood for teaching that when Christ descended into hell he restored all the damned; while in the 9th, John Scotus Erigena, a famous philosopher who stood at the head of the learned of the court of France, was a bold defender of Universalism. In the 11th century, the Albigenses were, according to papal authorities, Universalists; in the 12th, Raynold, abbot of St. Martin's, in France, was charged before a council with holding "that all men will eventually be saved;" in the 13th, Solomon, bishop of Bassorah, discussed the question of universal salvation, answering it in the affirmative. The Lollards in the 14th century taught Universalism in Bohemia and Austria; and at the same period a council convened by Langman, archbishop of Canter-

bury, gave judgment against Universalism as one of the heresies then taught in that province. In the early part of the 15th century, a sect called "Men of Understanding" taught Universalism in Flanders, advocating it on the ground of the German Mystics, as did Tauler of Strasburg, and John Wessel, who, with others, have been called "the Reformers before the Reformation," whose writings Luther industriously studied and greatly admired.

2. *In Modern Times.*—With the Reformation, Universalism made a fresh appearance early in the 16th century, chiefly among some of the Anabaptist sects. The seventeenth article of the Augustine Confession, 1530, was expressly framed to "condemn the Anabaptists, who maintain that there shall be an end to the punishments of the damned and of the devils." Denk, Hetzer, and Stanislaus Pannoniuss were the most eminent defenders of Universalism at this period. Later in the century, Samuel Huber, divinity professor at Wittenberg, taught Universalism, it is alleged by Spanheim; and because, says Mosheim, he would not go back to the old methods of teaching, "he was compelled to relinquish his office and go into exile." Early in the 17th century, Ernest Sommer, professor of philosophy at Altorf, published "a theological and philosophical demonstration that the endless punishment of the wicked would argue, not the justice, but the injustice, of God." John William Petersen, at one time court preacher at Lutin, and subsequently superintendent at Lumenberg, adopted and defended Universalism with such zeal that he was cited before the consistory, and, as he could not conscientiously renounce his convictions, was deprived of his office and forced into private life. In his retirement he wrote and published three folio volumes on Universalism, entitled *Musterion Apokatastaseôs Pantôn*, in which he mentions many who had defended that doctrine. The volumes appeared between the years 1700 and 1710. They opened a century of spirited controversy, of which Mosheim says, "The points of theology which had been controverted in the 17th century were destined to excite keener disputes in the 18th, such 'as the eternity of hell torments, and the final restoration of all intelligent beings to order, perfection, and happiness.'" Dietelmair, an opponent of Universalism, wrote on its history about the middle of this century. In the preface to his work he speaks of the "contests which raged vehemently enough within the very bounds of the orthodox Church in the end of the last century and the beginning of the present." Among the defences of Universalism contained in the first volume of Petersen's work was the *Everlasting Gospel*, attributed to Paul Siegvolk, which was but an assumed name of George Klein-Nicolaï, deposed for his Universalism as preacher of Friesdorf. He published other works in defence of Universalism, but the most rapid and lasting popularity belonged to the *Everlasting Gospel*, which in forty-five years passed through five editions in Germany. In 1726 John Henry Haug, professor at Strasburg, having procured the assistance of Dr. Ernest Christoph Hochman, Christian Dippel, Count De Marcey, and others, commenced the publication of the *Berleburger Bibel*, an entirely new translation and commentary of the Holy Scriptures. They made themselves familiar with all the writings of the Mystics, and in their great work taught and defended Universalism from the Mystical standpoint. Their work fills eight large folio volumes, the last of which was published in 1742. Strong persecution assailing them, and no printer being willing to risk his office in doing their work, they were compelled to purchase their own type and a small press. When the Church they had established was at last broken up by their enemies, the members fled to America, taking their press with them, and it was set up by Christopher Sower in Germantown, Pa. One of De Marcey's intimate friends was George De Benneville, born of French parents in London in 1703. Before he was twenty years of age he

commenced preaching in France, where he was arrested and condemned to die, but was reprieved on the scaffold by Louis XV. Making his way into Germany, he there preached Universalism several years, and then came to America. In 1727 appeared Ludvig Gerhard's *Complete System of the Everlasting Gospel of the Restoration of All Things, together with the Baseless Opposite Doctrine of Eternal Damnation*. The author was at one time professor of theology in the University of Rostock, and his publication called forth, according to Walch, no less than fourteen volumes in reply. Jung-Stilling, in the latter part of the 18th century, an able defender of Christianity against German rationalism, was an ardent and eminent Universalist. Prof. Tholuck wrote, in 1835, that this doctrine "came particularly into notice through Jung-Stilling, that eminent man who was a particular instrument in the hand of God for keeping up evangelical truth in the latter part of the former century, and at the same time a strong patron to that doctrine." During the present century, Universalism has made rapid progress in Germany. Olshausen says of it that it "has, no doubt, a deep root in noble minds, and is the expression of a heart-felt desire for a perfect harmony of the creation." Dr. Dwight wrote in 1829 "The doctrine of the eternity of future punishment is almost universally rejected." Similar testimony was borne by Prof. Sears in 1834: "The current hypothesis is that in the middle state, intervening between death and the resurrection, the righteous will gradually attain to perfection; and that to all the wicked, whether men or angels, the Gospel will be preached, and that they will ultimately accept it and be restored."

In Switzerland Universalism was advocated in the last century by Marie Huber, whose *World Unmasked* was translated and republished both in England and America. In 1786 Ferdinand Oliver Petitpierre promulgated Universalism in a work entitled *Thoughts on the Divine Goodness*, of which several English and American editions have been published. Lavater, the great physiognomist, and the intimate friend and correspondent of Jung-Stilling, was a Universalist. Later J. H. D. Zschokke advocated Universalism in his *Stunden der Andacht*, the favorite book with the late prince Albert, and after his death translated into English by request of queen Victoria for general circulation among her subjects. In France, in the last century, Rev. Thomas Cuppe wrote in defence of Universalism. Later in the same century, Chais de Sourescol wrote and published in its defence. In the present century the Coquerels—father and sons Athanase and Étienne—have advocated it in the pulpit and from the press. In Scotland Rev. James Purves wrote in defence of the doctrine, and established a Universalist society about 1770; Rev. Neil Douglass founded another about 1800; and within twenty-five years four or five others were started, largely through the instrumentality of Mr. Douglass and his successor, Rev. William Worral. These societies are either disbanded or merged in the Unitarian churches, which in Scotland are all Universalist in their views of destiny. Prominent among the Scotch Unitarian Universalists was Dr. T. Southwood Smith, who published, in 1816, *Illustrations of the Divine Government*, a book that has passed through several editions. Thomas Erskine, recently deceased, was also an able writer on Universalism. At present there are a few distinctive Universalist churches and a convention in Scotland. In Wales Universalism was preached as early as 1782. In 1783 Rev. Thomas Jones, who had been educated at lady Huntingdon's school, became a Universalist. He subsequently came to America, and after being the successor of Winchester at Philadelphia for about eight years, he removed to Gloucester, Mass., and was the successor of Murray for forty-five years.

In England the Protestants, in drawing up their Forty-two Articles of Religion, in 1552, condemned Universalism. Ten years later, when the convocation

revised the doctrines of the Church, the number of articles was reduced to thirty-nine, omitting, among others, the one condemning Universalism. Since that time Universalism has not been a forbidden doctrine in the Church of England, but has been advocated and defended by some of the most eminent members of its communion—such men as Dr. Henry More, Sir George Stonehouse, Bp. Thomas Newton, Dr. David Hartley, William Whiston, Dr. Thomas Burnet, Revs. Frederick W. Robertson, Charles Kingsley, Stopford Brooke, and canon Farrar, and indirectly by archbishop Tillotson. The Presbyterian Parliament of 1618, which temporarily overthrew Episcopacy, passed a law against all heresies, punishing the persistent holders of some with death, and of others with imprisonment. "That all men shall be saved" was among the heresies punishable in the latter manner. This law was not long operative, for the Independents, headed by Cromwell, soon overthrew the law-makers. Gerard Winstanley published a work in advocacy of Universalism only a few days after the passage of the law, which was soon followed by similar works from his pen. William Ebury fearlessly preached Universalism. Richard Coppin was active in its advocacy, publishing largely in its exposition and defence, and was several times tried for his offence. Samuel Richardson, an eminent Baptist, also wrote strongly in its behalf. Sir Henry Vane (the younger), member of the Parliament dissolved by Cromwell, and in 1636 governor of Massachusetts, was a Universalist. Jeremy White, one of Cromwell's chaplains, preached Universalism, and published a work which has passed through several editions. Jane Lead, a Mystic, was the author of several Universalist books. Henry Brooke, a literary writer, avowed his belief in Universalism in his *Fool of Quality*, and in a poem on the Messiah. William Law, author of the *Serious Call*, declared in his *Letters*, "As for the purification of all human nature, I fully believe it, either in this world or some after-ages." The English literary reviews of the last century contain many notices of works in defence of Universalism.

In 1750 James Rely, who had been a preacher in Whitefield's connection, shocked at the doctrine of reprobation, was by meditation and study led into another scheme of redemption, some of the peculiarities of which may be said to have had their origin with him. Accepting as true the common theory that all men, having sinned in Adam, justly incurred eternal damnation, and that Christ had borne this infinite guilt and punishment in behalf of all who should be saved, Rely was moved to find, if possible, some ground of justice in such a scheme. The divine law explicitly declares that "the soul which sinneth, it shall die," and that the innocent shall not suffer for the guilty. How could a transfer of human sin and penalty to Christ be consistent with that law? How could it be reconciled with equity? The divine sovereignty, without regard to inherent justice in the plan, could not account for it; for the absoluteness that could set justice aside might just as easily, and more mercifully, have gone straight to its aim by remitting instead of transferring sin and its deserts. To say that the sufferings of Christ were merely *accepted* as satisfaction for human deserts, only *reckoned* as such, by God's sovereign pleasure, was no adequate explanation, since they were thus only a fictitious, not a real, satisfaction; and, further, any sufferings whatsoever, even those of a man, would have answered just as well as an arbitrary acceptance of the coequal of God. The perfect consistency of God's procedure, its absolute harmony with justice and equity, Rely found, as he claimed, in such a real and thorough union of Christ with the human race as made their acts his, and his theirs. All men, he held, were really in Adam and sinned in him, not by a fictitious imputation, but by actual participation; equally so are all men in the second Adam, "the head of every man," and he is as justly accountable for what they do as is the head in the natural body ac-

countable for the deeds of all the members united to that head. Accordingly Christ, in his corporate capacity, was truly guilty of the offence of the human race, and could be, as he actually was, justly punished for it; and the race, because of this union, really suffered in him all the penalty which he endured, and thus fully satisfied justice. There is no more punishment, therefore, due for sin, nor any further occasion for declaring the demands of the law, except to make men feel their inability to obey, and thus compel them to an exclusive reliance on Christ the head. He has effected a complete and finished justification of the whole world. When man believes this he is freed from the sense of guilt, freed also from all doubt and fear. Until he believes it he is, whether in this world or in another, under the condemnation of unbelief and darkness, the only condemnation now possible to the human race. In illustration and defence of this theory, Rely wrote and published several books, preached zealously in London and vicinity, and gathered a congregation in the metropolis. After his death in 1778, two societies were formed from his congregation; but both have now ceased to exist, as has the society gathered by Winchelsea about 1789, and the Church founded by David Thom, D.D., in Liverpool in 1825. The Unitarians in England are all believers in Universalism, as are also many of the Congregationalists.

3. In America Universalism is the result of the proclamation of a variety of theories, some of them at a very early date, all resulting in one conclusion—the final holiness of the human race. Sir Henry Vane, as was said above, was a Universalist. It is not known that while in America he made any public avowal of that belief; but the presumption is that he did not stand alone. In July, 1684, Joseph Gatchell, of Marblehead, Mass., was brought before the Suffolk County Court for discoursing "that all men should be saved," and, being convicted, was sentenced "to the pillory and to have his tongue drawn forth and pierced with a hot iron." Dr. George De Benneville, also mentioned above, came to America in 1741, expressly called of God, as he believed, to preach the Gospel in the New World. For more than fifty years he preached in various parts of Pennsylvania, Maryland, Virginia, and the Carolinas. He was not an organizer, but simply a preacher, and quite a voluminous writer, though only a few of his productions were published. For several years he was welcomed to the pulpits of the "Brethren" (Dunkers). It was no doubt at his suggestion that Siegvolk's *Everlasting Gospel* was translated into English, and published by Christopher Sower, printed, probably, on the identical press on which the *Berleburger Bibel* had been struck off. This edition was reviewed by Rev. N. Pomp, a German minister in Philadelphia. Alexander Mack, an eminent preacher among the Dunkers, replied to Pomp, defending Siegvolk's views. This work was never published, but the MS. is still preserved. There was found among Dr. De Benneville's papers, after his death, in 1793, a *Commentary on the Apocalypse*, which was printed in German, at Lebanon, Pa., in 1808. There was also *Universalism in the Episcopal Church*. Rev. Richard Clarke, rector of St. Philip's in Charleston, S. C., from 1754 to 1759, was a pronounced advocate of it; as was Rev. John Tyler, rector of the Church in Norwich, Conn., who wrote a work in its defence, which was published by some one to whom he had loaned his MS., about 1787. Some of the Congregationalists of New England were believers in Universalism; among them Dr. Jonathan Mayhew, minister of the West Church in Boston from 1747 to 1766, who distinctly avowed his belief in it in a published *Thanksgiving Sermon*, Dec. 9, 1762. Dr. Charles Chauncy, minister of the First Church in Boston from 1727 to 1787, issued a pamphlet on the subject in 1782, which was reviewed by Dr. Samuel Mather. In 1784 his larger work *The Salvation of All Men* was published, a second edition following in 1787. Dr. Joseph Huntington, minister in Coventry, Conn., from 1762 to

1794, left a work in favor of Universalism, entitled *Calvinism Improved*, which was published in 1796.

(II.) *Formal*.—In 1770 John Murray (q. v.), who had formerly been a Methodist in Ireland and England, but more recently a convert to the views of James Rely, came to America and commenced the proclamation of Universalism on the Relyan theory. After itinerating a few years in various parts of the country, from Virginia to Massachusetts, he made his home in Gloucester, Mass., where, in 1779, he organized a society of Universalists, under the name of "The Independent Christian Church." With the exception of a few months spent in the army, as chaplain of the Rhode Island Brigade, he ministered to the society in Gloucester, making occasional missionary tours through the country till 1793, when he removed to Boston, where a society had been formed in 1785, and remained there as its pastor till his death, in 1815.

In 1781 Elhanan Winchester, who had been an eminent Baptist clergyman in Philadelphia, became a Universalist, and gathered a Universalist society in that city, which took the name of "Universal Baptists." As a Baptist his views were moderately Calvinistic, if not wholly Arminian, and his Universalism differed in little or nothing from the present so-called evangelical doctrines, except in regard to the duration and design of future punishment and the final restoration of all lost men and angels. Fifty thousand years, which would bring in the great jubilee, was the extreme limit in his theory of the punishment of the most sinful. Mr. Winchester itinerated extensively, as far south as the Carolinas and north to Massachusetts. Like De Benneville, he was for a time welcomed to the pulpits of the Dunkers, who, from their first coming to America in 1719, have been believers in universal restoration, although, in the main, holding it privately. Some of their preachers were bold in its advocacy; and it was proclaimed and defended in several of their published works, notably so by James Bolton, who, in 1793, published a pamphlet at Ephrata, Pa., in which he censures the "Brethren" for not giving greater publicity to it, asserting that "the German Baptists (Dunkers) all believe it." About the year 1785 the Dunkers became alarmed by the preaching of some persons, now unknown, against future punishment, and finally took action that cut off John Ham, one of their preachers of this theory, and his followers from the Church, and forbade the proclamation of Universalism in any form. In 1786 Mr. Winchester went to England, where he preached and published books in defence of his views and established a society. He returned to America in 1795 and died in 1796.

Contemporary with Murray and Winchester was Caleb Rich, of Massachusetts, who gathered a Universalist society in the towns of Warwick and Richmond. Mr. Rich may be said to have anticipated many of the views afterwards more fully elaborated by Hosea Ballou, and probably had great direct influence in forming the opinions of the latter.

In New Jersey several Baptist preachers and their congregations became Universalists. In Pennsylvania there was a congregation of Relyan Universalists, and the "Universal Baptists" before mentioned, in Philadelphia, while societies had been organized in Bucks and Washington counties. Rev. Abel Sargent, minister in the latter locality, organized Universalist churches on the basis of the doctrine of the divine unity, in opposition to the Trinity, publishing the creed of those churches in the *Free Universal Magazine*, edited by him in 1793-94. Of the existence of these churches the Universalists in the eastern portion of the country were for a long time ignorant. Relyanism made but little progress, Mr. Murray complaining in 1787 that he knew of but one public advocate of Universalism in America who fully sympathized with him in his views. This was the Rev. John Tyler before mentioned.

Rev. Hosea Ballou commenced his career as a Uni-

versalist preacher in 1790. Originally a Calvinistic Baptist, he was a Trinitarian Universalist until 1795, when he avowed his belief in Unitarian views of God and Christ; and in 1805 published his *Treatise on Atonement*, in which he combated the doctrine of vicarious sacrifice, contending that the life and death of Christ were for the reconciling, not of God, but of man, and avowed his belief that the punishment of the sins of mortality was confined to this life, and that if punishment were experienced in the life beyond the grave, it would be for sins committed there. In 1818 he had satisfied himself that there is no sin beyond the grave, and consequently no punishment after death. By 1830 Mr. Ballou's views were quite extensively held in the denomination, and some of the believers in future limited punishment seceded from the Universalist Convention and established the denomination of Restorationists. Although this secession was led by a few eminent men, it was not considered expedient nor in any sense called for by quite as many and as eminent believers in future retribution who remained in the old organization. The position of these latter was that Universalism was not, and never had been, the belief in no future punishment, nor the belief in a brief or long-continued retribution hereafter; but the belief that God would, through Christ, in his own good time, "restore the whole family of mankind to holiness and happiness." As there had never been entire unity of sentiment as to the time when this result would be reached, but had been tolerance of opinion on that as on other differences, they saw no occasion for a division on account of present differences. The "Restorationist Association" existed about eleven years, its last session being held in 1841, at which time the publication of its organ, *The Independent Christian Messenger*, ceased, and it became extinct as a sect. Some of its preachers returned to the fellowship of the Universalist Convention, some affiliated with the Unitarians, and others wholly withdrew from the ministry. Mr. Ballou died in 1852. His work and memory are held in reverent esteem by the entire denomination, and by none more ardently than by the many who do not accept his theory of sin and retribution. See BALLOU.

Eccl.* cent. viii-xii, c. 3; Priestley, *Hist. of the Christian Church*, per. xviii, lect. ix, p. 136, 137; Assemani, *Bibliotheca Orientalis*, III, i, 323, 324; Du Pin, *Eccl. Hist.* vol. xii, ch. viii, p. 113, 115; Mosheim, *Eccl. Hist.* cent. xv, pt. ii, ch. v; cent. xvi, sec. iii, pt. ii, ch. i; cent. xvii, sec. 20; Ballou, *Ancient History of Universalism* (2d ed. 1872); Beecher, *Scriptural Doctrine of Retribution*; Dunster, *Translation of Drezelin's Considerations on Eternity* (1710); Davidson, *Translation of Gieseler's Compendium of Ecclesiastical History* (1849), i, 320, 321; Augustini *Enchiridion ad Laurentium*, c. cxii; Olshausen, *Comm. on Matt. xii*, 31, 32; Law, *Collection of Letters* (1762), letter xii, p. 172; *Account of the Berleburger Bible*, in *The Universalist* (Boston, Nov. 8, 1878); Whittemore, *Modern History of Universalism* (ibid. 1860); Daleho, *Hist. of the Prot. Ep. Ch. in South Carolina* (1820); Eddy, *Papers on Universalist Conventions and Creeds*, in *Universalist Quarterly*, 1874-80; Thomas, *A Century of Universalism*; Eddy, *M.S. History of Universalism in Gloucester, Mass.*, 1774-1874; Whittemore, *Memoir of Rev. Hosea Ballou* (4 vols.); *Life of Rev. Nathaniel Stacy* (autobiography); Smith, *Historical Sketches of Universalism in the State of New York*.

II. *Organization and Government*.—In the early history of Universalism in America, the first form of organization was simply into legal societies; afterwards into churches within the societies. The only exception to this was, commencing with 1790, in Pennsylvania, where the Church became both the legal organization and the religious body of communicants. The Universalists in Gloucester, Mass., the first to organize, banded

themselves together by an agreement of association in 1779, which they changed to a charter of compact in 1785, and were incorporated in 1792. Members of the society and their property being seized for payment of taxes to the first parish in Gloucester, the Universalists entered suits in the courts in 1783 to establish their right to exemption from taxation for the support of any other than their own minister. By reason of various delays and appeals the case did not reach a final decision till 1786, when the rights of the Universalists were established. Meanwhile congregations and societies gathered in other parts of Massachusetts and in Rhode Island, desiring counsel and advice, united with the society in Gloucester in holding an association at Oxford, Mass., in 1785. The charter of compact, which was the basis of organization in Gloucester, was taken to this association, and, on being slightly amended, was recommended to the societies represented, who were also requested to take on themselves the name of "Independent Christian Society, commonly called Universalists;" to keep up a correspondence with each other; and to meet annually, by delegates, for conference. The legal rights secured the following year by the decision of the Gloucester suit seem to have accomplished all that the association aimed at, and no session was held after 1787. In 1790 the congregations organized in Philadelphia by Murray and Winchester became one, and, feeling the necessity of a more perfect organization of the believers at large, issued a call for a convention, which was held in May of that year in Philadelphia, at which time a profession of faith and platform of government for the churches was drawn up and recommended to all the churches for their adoption. Five churches were represented in this convention, and seven preachers were in attendance. The annual meetings of this convention were all held in Philadelphia; but the distance from that city to New England was so great, and the inconveniences of making the journey were then so numerous, that in 1792 the Universalists of Boston asked and obtained permission to organize another convention for the Eastern States. This convention held its first session at Oxford, Mass., in 1793, and adopted, the following year, the Philadelphia profession and platform, and recommended them to all their churches. In 1802, churches and associations of churches having increased, and a diversity of speculative opinion prevailing, the New England convention deemed it best to unite, if possible, on a profession of faith, and to establish well-defined rules of government, ordination, fellowship, and discipline for the use of that body. This was accomplished in 1803, by the adoption at the session held in Winchester, N. H., of such definite rules, and of the following Profession of Belief:

"Art. 1. We believe that the Holy Scriptures of the Old and New Testaments contain a revelation of the character of God, and of the duty, interest, and final destination of mankind.

"Art. 2. We believe that there is one God, whose nature is love, revealed in one Lord Jesus Christ, by one Holy Spirit of Grace, who will finally restore the whole family of mankind to holiness and happiness.

"Art. 3. We believe that holiness and true happiness are inseparably connected, and that believers ought to be careful to maintain order and practice good works; for these things are good and profitable unto men."

This has remained unchanged to the present time. The Philadelphia convention ceased to exist in 1809; but the New England convention, though with changes both in form of government and in name, has continued to the present, and is now "the Universalist General Convention." It is composed of clerical and lay delegates from the state conventions, and from the parishes and churches in states and territories where no state organization exists. Every parish, to be counted in the basis of representation, must maintain its legal existence and support public worship; and every minister must be actually engaged in the work of the ministry unless disabled by age or sickness. Preachers and parishes must assent to the Profession of Belief; and no parish

can settle a minister not in fellowship, nor can a minister settle over a parish not in fellowship. The convention establishes uniform rules for fellowship, ordination, and discipline, and is the final court of appeal in all cases of difficulty between conventions, or between conventions and parishes, or ministers, not otherwise settled by subordinate bodies; but it has no power to interfere with the affairs of a parish in the settlement or dismissal of a minister in fellowship; nor can it, under any circumstances, do more than to withdraw fellowship from those who are convicted of offences. State conventions are composed of ministers in fellowship, and of delegates from parishes and churches. They can make any regulations and adopt any policy not in conflict with the constitution and laws of the General Convention; provide for the enforcement of the rules on fellowship, ordination, and discipline; and raise and disburse funds for local missionary work. In several states associations still exist composed of counties or of neighboring parishes extending over larger territory; but, under the present laws, these have no ecclesiastical authority, and are only a medium of local conference and encouragement in religious growth. Parishes are local legal organizations for the purpose of holding property and conducting the business necessary to the maintenance of religious worship. Aside from a required assent to the Profession of Faith, and their obtaining the fellowship of the State Convention, or, in localities where no such organization exists, the direct fellowship of the General Convention, all parishes are Congregational in the management of their affairs, and are subject only to the civil laws of the state or territory where they are located. Churches, with the exception of those in Pennsylvania, as before noted, are the religious organizations created within the legal parish. In them the ordinances of the Gospel are administered; and the purpose of their existence is the union of believers and the quickening and increase of their religious life, obedient to the command of the Lord and his apostles. Sunday-schools are also established in the parishes, and are, while independent in the management of their affairs, chiefly watched over and directed by the Church.

III. *Doctrines.*—The Winchester Profession (given above) is regarded as a sufficiently full and explicit statement of the belief required in order to fellowship in the Universalist Church, and as affording the greatest latitude in differences on all minor points. But a more particular statement of the general belief of Universalists of the present day may be briefly set forth as embracing the following particulars:

1. *Of God.*—That he is infinite in all his perfections, the Creator and Preserver of all worlds, and of all the beings that inhabit them; revealed to man in all that nature teaches of wisdom and design; in conscience, which discriminates between right and wrong; and in the Holy Scriptures, and especially in his full perfection in Jesus Christ. That it is fundamental in the revelation through Christ that God is the Father of the spirits of all flesh, who brought men into being with a fixed and loving purpose that their existence should prove a final and endless blessing to them; and that while he is strictly just in his dealings with all, he never loses sight of his great purpose in their creation; and that, without violation of their moral freedom, he will, through the gracious influences of the Gospel, subdue and win all souls to holiness. That his government, laws, and purpose are the same in all worlds, death in no way affecting his attitude towards men; but that he is to be found wherever sought, and will always accept and forgive all who call upon him in sincerity and truth.

2. *Of Christ.*—That he is not God, but God's highest and only perfect representative, sent by the Father not for the purpose of affecting God's attitude to man, but of reconciling man to God; that he lived, taught, wrought miracles, suffered, died, and was raised from the dead and ascended into heaven, according to the Scriptures; that he alone can lead men to the Father, and is the

only perfect way, truth, and life for man; that he is Lord both of the dead and the living, able to save to the uttermost, i. e. in all places and under all circumstances, all who come to God by him; and that he must reign till every creature in heaven and in earth, and under the earth, confesses him Lord, to the glory of God the Father, and God is all in all.

3. *Of the Holy Spirit.*—That while it is not now to be expected that God's Spirit will, as in apostolic days, be manifest in conferring miraculous power on believers, the promise of its assistance is still fulfilled in the souls of believers, to whom the Spirit comes as the Comforter, and, as testified to by the apostle, helps their infirmities, inspires their prayers, and pours into their souls the peace of God which passeth all understanding.

4. *Of Man.*—That "a man is the image and glory of God;" and that whatever tendencies may be inherited, or by whatever sins man may defile himself, the divine image is never wholly destroyed, but that under the care of the appointed refiner and purifier, the stains, defilement, and dross can all be removed, and the divine likeness be manifest; that the human will, which consents to sin, can also determine on holiness, and use all the means appointed for its attainment.

5. *Of Sin.*—That it is never transferable, but consists in personal disobedience to the divine law, and is the greatest evil in the universe; that no necessity for it is laid on any mortal, yet that it is incidental to the career of a being who can be drawn away of his own lusts and enticed, and who is created with the ability of choosing good and evil.

6. *Of Rewards and Punishments.*—That obedience to the divine law, the attainment of holiness, piety, and the Christian graces, are their own exceeding great reward, and are manifest in the soul's consciousness of nearness to God and of approval by him; that punishment is in like manner the natural fruit of sin, alienation, a cloud between us and God, the burden and sorrow of an unreconciliation and enmity. That while the reward is intended to keep us in love with obedience, the punishment is designed to make us feel that it is an evil and bitter thing to sin against God, and to incline us to repent and turn to our peace, possible only in holiness.

7. *Of Conversion.*—That conversion, regeneration, the new birth, or whatever else the turning from sin to holiness may be called, is the change effected in the will and heart of man, when, wrought upon by the gracious influences of the Gospel, he turns from his sinful loves and ways, and, drawn by the Spirit of God, seeks to consecrate all his powers to holiness and duty; that while the commencement of such a change must of necessity be instantaneous, it is only by patient continuance in well-doing that it is completed.

8. *Of Salvation.*—That salvation is deliverance from the practice and love of sin, the bringing of the soul out of its bondage of error and evil into the liberty of obedience to the truth, and love to God and man; that Christ saves when he turns men away from iniquity, and that his saving work will not be completed till God's law is written in and obeyed by every heart.

9. *Of Forgiveness.*—That the forgiveness which God promises to all who confess and forsake their sins is the covering of past offences from sight, and bringing them no more to remembrance against the penitent; and that this is the forgiveness which Jesus teaches us that we ought to exercise towards all who are penitent for any wrong which they have done to us.

10. *Of Immortality.*—That God has implanted in all men "the power of an endless life;" and that what is called the resurrection is not simply the fitting of man with a spiritual body, but also his rising up into a progressive life. That death effects no moral change, but that in many respects the entrance on the life immortal must work a change on man's ignorance and error; that all sensual temptations, peculiar to a life in flesh and blood, will be absent from the world of spirits; and

that whatever discipline any may need for past offences, or to overcome the effects of sin on the soul, will be administered in love, and will be efficacious for their salvation.

IV. *Usages and Worship.*—The usages of the Universalist churches do not differ much from those of other denominations that conduct their parish affairs on Independent or Congregational principles. The following are perhaps peculiar:

1. *Ordination, Transfer, and Discipline.*—For the ordination of a minister, the rule is for the parish desiring that ordination may be conferred to make formal application to the convention Committee on Fellowship, Ordination, and Discipline, who, if there is no ground for objection, give permission to the parish to call a council, consisting of ten ordained ministers and lay delegates from ten parishes, who, on assembling, organize by the appointment of a moderator and clerk, and proceed to an examination of the fitness and qualifications of the candidate. If these are found satisfactory, the request for ordination is granted, and the parish are authorized to hold the ordination service at their convenience, which being done, the clerk of the council forwards to the convention committee a certified statement of the doings of the council, and of the fact that ordination has been conferred, whereupon the committee furnishes the new minister with a certificate of his ordination. On removing from the jurisdiction of one state convention to another jurisdiction, it is a minister's duty to request of the convention committee in the state where he has been residing a letter of transfer, which, if he is in good standing, is granted, and is of the nature of a recommendation to the convention into whose bounds he is removing. This transfer it is his duty to present to the committee of that convention, who thereupon grant him its fellowship. Should a minister neglect to seek such transfer, he is subject to discipline by the convention from which he removed, and will in time be disfellowshipped by having his name dropped from the roll of ministers. A minister disfellowshipped for this or any other cause must, if he desires to be restored to fellowship, seek his restoration from the convention which punished his offence; but if denied restoration there, he may appeal to the General Convention.

2. *The Dedication of Children.*—When John Murray began to preach in America, he was frequently importuned by parents to baptize their children; but, believing that adults were the only proper subjects for Christian baptism, he refused. As, however, he regarded children as the gift of God and members of the body of Christ, he felt that some ceremonial recognition of this fact would be appropriate and salutary, and originated a rite which he called the "dedication of children." Either in the church or elsewhere, as was most convenient, parents brought their children to him, who, if infants, he took in his arms; if older children, they stood by his side, and he, placing his hand on the child's head and pronouncing its name, declared it gratefully received as God's gift, and solemnly dedicated to his loving service, pronouncing on it the blessing which Moses was directed to command Aaron to pronounce on the children of Israel: "The Lord bless thee and keep thee. The Lord make his face shine upon thee, and be gracious unto thee. The Lord lift up his countenance upon thee, and give thee peace." This service is now very generally observed among Universalists, the second Sunday in June being set apart for it, and designated "Children's Sunday." It is customary on this occasion to decorate the churches with flowers; and as no very general objection to infant baptism now exists among Universalists, baptism is in most cases a part of the ceremonial.

3. *Christmas, Easter, and Memorial.*—Christmas has always been a day of special notice with Universalists, and of late Easter is appropriately celebrated. A Sunday in October is set apart in most Universalist churches as Memorial Sunday, the services being made

appropriate to a loving remembrance of the members of the Church and congregation who have died during the year. On this day the churches are decorated with fall flowers and leaves.

4. *Public Worship.*—The public worship of God is conducted by Universalists in much the same manner as by Protestants generally. It consists of reading of the Scriptures, prayers, singing, and sermon. A few churches make use of a liturgy, of which several have been prepared, but most congregations have an extempore service. Baptism and the Lord's supper are observed in all Universalist churches. The mode of the former is left to the choice of the candidate. The invitation to the latter is extended to all who may feel it to be either a duty or a privilege thus to remember the Lord Jesus Christ. Sunday-schools and conference and prayer meetings are regularly held in most of the churches.

V. *Statistics.*—The Universalists have one General Convention and twenty-four subordinate conventions, the latter being located in Alabama, Connecticut, Georgia, Illinois, Indiana, Iowa, Kansas, Kentucky, Maine, Massachusetts, Michigan, Minnesota, Missouri, New Hampshire, New Jersey, New York, Ohio, Oregon, Pennsylvania, Rhode Island, Vermont, Wisconsin, Canada, and Scotland. Parish organizations exist in California, Colorado, Dakota, District of Columbia, Florida, Idaho, Louisiana, Maryland, Mississippi, Nebraska, North and South Carolina, Tennessee, Texas, Virginia, and West Virginia. The total number of parishes is 959, with which 42,500 families are connected; 733 churches, with a membership of 37,825; Sunday-schools, 699; teachers and pupils, 59,633; church edifices, 784; total value of parish property above indebtedness, \$6,417,757; ministers, 724; licensed lay preachers, 9.

The General Convention is incorporated and empowered to "hold real and personal estate to the value of \$500,000, to be devoted exclusively to the diffusion of Christian knowledge by means of missionaries, publications, and other agencies." The "Murray Centenary Fund," raised in 1870, and named in honor of Rev. John Murray, the centennial anniversary of whose coming to America was then observed, amounted, at the session of the convention in 1879, to \$121,794.54. A "Ministerial Relief Fund," founded by the bequest of the late John G. Gunn, amounted at the same time to \$8077.94. The "Theological Scholarship Fund," consisting of returned scholarship loans, amounted to \$5439.32. The treasurer's receipts from all sources, in 1879, were \$19,540.74. The income of the Murray Centenary Fund is designed to aid in the education of the clergy, the circulation of denominational literature, and in church extension. About forty theological scholarships are continued in force each year, aggregating nearly \$6000. These are expected to be repaid, without interest, at the earliest convenience of the beneficiaries after graduation and settlement, and the amounts thus returned are invested, the income to be appropriated to future loans.

Several of the state conventions are incorporated, and in a few of them permanent funds are established. Either as held by the conventions directly, or by organizations existing in their jurisdiction, the aggregate amount of such funds, the incomes of which are devoted to missionary work, Sunday-school aid, and ministerial relief, is \$89,578.65.

The "Woman's Centenary Association," now incorporated, was organized in 1869 to assist in raising the Murray Centenary Fund, to which it contributed \$35,900. In addition to this, it has raised about \$120,000, with which it has helped colleges and schools, given relief to aged and infirm ministers and ministers' widows, started a Memorial Chapel at Good Luck, N. J., where Murray preached his first sermon in America, and supported a missionary in Scotland. It has also put in circulation 3,000,000 pages of tracts, besides a large number of denominational books and papers.

The "Universalist Historical Society" was organized in 1834 for the collection and preservation of facts pertaining to the history and condition of Universalism, together with books and papers having reference to the same subject. It has a library of over 2000 volumes, now at Tufts College, College Hill, Mass. The collection embraces a complete set of the writings of the Greek and Latin fathers, many French and German works, and a nearly complete line of modern books both for and against the doctrine of Universalism.

VI. *Institutions.*—1. *Colleges, Theological Schools, and Academies.*—There are four colleges, two theological schools, and six academies under the auspices and patronage of Universalists. Tufts College, located on College Hill, Middlesex Co., Mass., was incorporated in 1852, and opened for students in 1855. Its assets are about \$900,000; number of professors and teachers, 12; students, 62. Lombard University, located at Galesburg, Ill., was incorporated in 1852, and opened for students in 1855. Assets, \$175,000; professors and teachers, 6; students, 58. St. Lawrence University, at Canton, St. Lawrence Co., N. Y., was incorporated in 1856; assets, \$234,350; professors and teachers, 7; students, 44. Buchtel College, Akron, O., was incorporated in 1871; assets, \$250,000; professors and teachers, 10; students, 108. St. Lawrence Theological School, a department of St. Lawrence University, was opened in 1857. It has 3 professors and 24 students. Tufts Divinity School, a department of Tufts College, was opened in 1869, and has 4 professors and 32 students. Clinton Liberal Institute, established at Clinton, Oneida Co., N. Y., in 1831, and recently removed to Fort Plain, N. Y., has \$100,000 assets, 10 teachers, and 100 students. Westbrook Seminary, Stevens Plains, Me., was opened for students in 1834. Its assets are \$100,000; number of teachers, 7; of students, 80. Green Mountain Perkins Academy, at South Woodstock, Vt., was opened in 1848; assets, \$15,000; teachers, 8; students, 55. Goddard Seminary, Barre, Vt., was opened in 1863; assets, \$60,000; teachers, 7; students, 76. Dean Academy, at Franklin, Mass., was incorporated in 1865; assets, \$240,000; teachers, 8; students, 70. Mitchell Seminary, at Mitchellville, Ia., was opened in 1872; assets, \$25,000; teachers, 9; students, 95. Total amount invested by the twelve educational institutions, \$2,039,350.

2. *Publishing House.*—The Universalist Publishing House, located at Boston, Mass., was incorporated in 1872. Its trustees are elected by the state conventions of Maine, New Hampshire, Vermont, Massachusetts, and Rhode Island. The net assets of the house, consisting of periodicals, books, plates, etc., are about \$31,000. The number of volumes which it has published, and of which it owns the title and copyright, is one hundred and thirty. It also issues five of the twelve periodicals published by the denomination.

3. *Missions.*—Missionary work is performed in the bounds of the several state conventions; in some directly by agents or superintendents in the employ of the conventions, in others by means of local associations, and in still others by the voluntary labors of the ministry. The only foreign mission is the one sustained by the Woman's Centenary Association in Scotland.

VII. *Literature.*—American Universalist literature dates from the publication of a translation of Siegfried's *Everlasting Gospel* in Pennsylvania in 1753. William Pitt Smith, M.D., of New York, published a small book entitled *The Universalist* in 1787. Joseph Young, M.D., also of New York, wrote and published *Calvinism and Universalism Contrasted* in 1793. Rev. Elihan Winchester's *Dialogues on Universal Restoration*, published in London in 1788, were republished in Philadelphia in 1791. A *Treatise on Atonement*, by Rev. Hosea Ballou, was published in 1805. Since that time the Universalist press has issued hundreds of volumes. Some of the more prominent in the various departments of denominational literature are,

i. In *Polemics*: Smith, *On Divine Government*; Ballou, *Inquiries into the Scriptural Import of the Words Sheol, Hades, Tartarus, and Gehenna*, and the *Words Satan and Devil*; *Discussion between Ezra Stiles Ely, D.D., and Rev. Abel C. Thomas*; *Debate between Rev. David Holmes and Rev. J. M. Austin*; Rogers, *Pro and Con of Universalism*; Harrison, *Viñon-Añonios*; *Discussion between Rev. E. Manford and Rev. J. S. Sweetney*; Thayer, *Origin and History of the Doctrine of Endless Punishment*; Miner, *The Old Forts Taken*; Sawyer, *Endless Punishment in the Very Words of its Advocates*.

ii. *Doctrinal and Expository*: Ballou, *Lecture Sermons and Select Sermons*; Whittemore, *Notes on the Parables*; Cobb, *Compend of Christian Divinity*; Thayer, *The Theology of Universalism*; Williamson, *Rudiments of Theological Science and Philosophy of Universalism*; Steere, *Footprints Heavenward*; Mayo, *The Balance, or Moral Arguments for Universalism*; Brooks, *Universalism in Life and Doctrine*; *The Latest Word of Universalism*, thirteen essays by thirteen clergymen.

iii. *Commentaries*: Mauley, *Biblical Review* (5 vols. on the Old Test.); Cobb, *Explanatory Notes and Practical Observations on the New Test.*; Paige, *Commentary on the New Test.* (except the book of Revelation), 6 vols.; Whittemore, *Commentary on the Revelation of St. John*.

iv. *Works in Defence of Christianity*: Winchester, *Reply to Paine's Age of Reason*; Ballou, *Letters in Defence of Revelation*; Pickering, *Lectures on Divine Revelation*; Smith, *Causes of Infidelity Removed*; Thayer, *Christianity against Infidelity*; Williamson, *An Argument for Christianity and Sermons for the Times and People*.

v. *Practical Religion and Consolation*: Chapin, *Discourses on the Lord's Prayer, Lessons of Faith and Life, Hours of Communion, The Crown of Thorns*; Adams, *The Universalism of the Lord's Prayer*; Bacon, *The Pastor's Bequest* (sermons); Ballou, *Counsel and Encouragement* (discourses on the conduct of life); Thomas, *The Gospel Liturgy* (a prayer-book for churches and families); Hanson, *Manna* (a book of daily worship); Quimby, *Heaven our House* (a comfort to all who mourn); Thayer, *O'er the River* (a book of consolation for the sick, the dying, and the bereaved).

vi. *History and Biography*: Ballou, *Ancient History of Universalism from the Time of the Apostles to the Reformation*; Whittemore, *Modern History of Universalism from the Time of the Reformation*; Thomas, *A Century of Universalism in Philadelphia and New York*; Smith, *Historical Sketches of Universalism in the State of New York*; *Life of Rev. John Murray*, commenced by himself and completed by his wife; Stone, *Biography of Rev. Elhanan Winchester*; Rogers, *Memoranda*; *Memoir* (autobiography) of Rev. Nathaniel Stacey; *Memoirs of Rev. Hosea Ballou*, by Maturin M. Ballou (1 vol.), and by Whittemore (4 vols.); Sawyer, *Memoir of Rev. Stephen R. Smith*; *Autobiography of Rev. Abel C. Thomas*; Cook [T. D.], *Memoir of Rev. James M. Cook*; Bacon [Mrs. E. A.], *Memoir of Rev. Henry Bacon*; Adams, *Memoir of Rev. John Moore*; Gillette and Grosh, *Life of Rev. E. M. Wooley*; Adams, *Memoir of Thomas Whittemore, D.D.*

vii. *Periodicals*: The first Universalist periodical was probably that started by Rev. Elhanan Winchester, in London, England, in 1787, entitled *The Philadelphia Magazine*. It was continued several years by Rev. William Vidler, and finally merged in the *Monthly Repository*. The first American Universalist periodical was *The Free Universalist Magazine*, published in New York and Baltimore by Rev. Abel Sargent (1793-94). Rev. John Murray's friends published in Boston two volumes of a small magazine called *The Berean*, commenced in 1802. Several others followed, and from first to last a great many have been put before the public.

The periodical publications at present are the following: Weekly papers, seven, viz. *The Christian Leader* (successor to the *Universalist Magazine*, started in Bos-

ton in 1819, and the *Utica Magazine*, commenced at Utica, N. Y., in 1827), published by the Universalist Publishing House, Boston, G. H. Emerson, D.D., editor; the *Star in the West*, established in 1827, published at Cincinnati, O., J. S. Cantwell, D.D., editor; the *Gospel Banner*, started in 1836, published at Augusta, Me., G. W. Quimby, D.D., editor; the *New Covenant*, commenced in 1847, published at Chicago, Ill., edited by J. W. Hanson, D.D.; the *New Religion*, published at Norway, Me., Rev. J. A. Seitz editor; the *Atlanta Universalist*, at Atlanta, Ga., Rev. W. C. Bowman editor; and *The Myrtle*, an illustrated Sunday-school paper, issued by the Universalist Publishing House, Mrs. E. M. Bruce editor. There are two papers published once in two weeks—the *Universalist Herald*, at Notasulga, Ala., edited by Rev. John C. Burrus; and the *Guiding Star*, an illustrated Sunday-school paper, at Cincinnati, O., Mrs. Caroline M. Soule editor. The *Sunday-school Helper*, devoted to Sabbath-school teaching, is published monthly by the Universalist Publishing House, edited by Rev. G. L. Demarest. *Manford's Magazine*, commenced in 1857, is published monthly at Chicago, Ill., Rev. E. Manford and Mrs. H. B. Manford editors. The *Universalist Quarterly*, commenced in 1844, is issued in January, April, July, and October by the Universalist Publishing House, edited by T. B. Thayer, D.D. The *Universalist Register*, a statistical year-book, has been issued regularly since 1836; published by the Universalist Publishing House, and edited by Mrs. C. L. F. Skinner. (R. E.)

UNIVERSALITY OF GRACE, a doctrine introduced into the French Reformed theology, under the influence of John Cameron, in the early part of the 17th century, and advocated by Amyraldus (Amyrant), Placeus, and Pajon. Cameron himself taught the imputation of Christ's passive obedience alone, and advocated the hypothetic universalism of divine grace, which was more fully developed by Amyrant. "The peculiarity of Amyraldism," says Schweizer, "is in the combination of real particularism with a merely ideal universalism." See Hagenbach, *Hist. of Doct.* ii, 180, 275. See ATOXEMENT.

Universals, a term used in philosophical language, and divided into three classes, viz.:

1. *Metaphysical*, or "universalia ante rem," denoting those archetypal forms according to which all things were created. As existing in the divine mind, and furnishing the patterns of the divine working, these may be said to correspond with the *ideæ* of Plato.

2. *Physical*, or "universalia in re," by which are meant certain common natures which, one in themselves, are diffused over or shared in by many—as *rationality* in men.

3. *Logical*, or "universalia post rem," denoting general notions framed by the human intellect, and predicated of many things on the ground of their possessing common properties—as *tree*, which may be predicated of the oak, maple, birch, willow, etc.

In ancient philosophy the universals were called *predicables*, and were arranged in five classes, *genus*, *species*, *differentia*, *proprium*, and *accidens*.

In the system of Aquinas universals are thus treated: 1. *A parte mentis*, or *a parte intellectus*, involve the theory that universals are mental only—subjective. 2. *A parte rei* involve the theory that universals correspond with objective things. See Krauth and Fleming, *Vocab. of Phil. Science*, s. v.

UNIVERSE, as defined by Dr. Porter (*Human Intellect*, p. 646), is the collective whole, the totality of being as a unit; the world, in its philosophical or universal sense. For its origin, see CREATION; WORLD.

University, a universal school; an assembly of students of all countries, students in every branch of learning, in one general society, having their own seal and place of business. Camden says the term was generally used in the reign of Henry III (of England). Dur-

ing the 12th century there were several eminent universities in Europe. Spain and Germany had universities of schools where the students formed part of the corporation. Paris and England had universities of masters only; some in Germany and France were of either kind. See COLLEGE.

Unknown God (ἄγνωστος θεός, A. V. unfortunately "the unknown God," instead of "an unknown God"), the inscription observed by Paul on some site consecrated to a deity whose name had been lost—a fact which he ingeniously adduces in his speech before the citizens to show their scrupulousness, and to lead them to the knowledge of the true God (Acts xvii. 23). There is no evidence that it was a spot dedicated to the worship of Jehovah, as some commentators have imagined. See the monographs cited by Volbeding, *Index Programmatum*, p. 82. See ALTAR; ATHENS.

Unknown Tongue (1 Cor. xiv. 2, 4, 13, 14, 19, 27) is a gloss of the A. V.; for the Greek has simply γλώσσα, a tongue, obviously meaning a different living language from that ordinarily employed by the speaker (γλώσσα ἑτέρα, Mark xvi. 17; Acts ii. 4). Others understand an ecstatic utterance of abrupt, incoherent, and unintelligible expressions which needed an interpreter. See the monographs cited by Volbeding, *Index Programmatum*, p. 73. See SPIRITUAL GIFTS.

Unlearned (ἀγράμματος, unlettered, Acts iv. 13; ἀμαθή, un instructed, 2 Pet. iii. 16; ἀπαιδεύτος, untutored, 2 Tim. ii. 23; ἰδιώτης, private, 1 Cor. xiv. 16, 23, 24; "ignorant," Acts iv. 13; "rude," 2 Cor. xi. 6). In Acts iv. 13, the Jewish literati apply the term to Peter and John, in the same sense in which they asked, with regard to our Lord himself, "How knoweth this man letters, having never learned" (John vii. 15). In neither case did they mean to say that they had been altogether without the benefits of the common education, which consisted in reading and writing, and in an acquaintance with the sacred books; but that they were not learned men, had not sat at the feet of any of the great doctors of the law, and had not been instructed in the mysteries and refinements of their peculiar learning and literature. An apostle also uses it to describe those who are little acquainted with the mind of God and the teaching of his Spirit (2 Pet. iii. 16). The "unlearned questions" mentioned by Paul are those which do not tend to edification in sound and substantial religious knowledge. See EDUCATION.

Unleavened Bread (ἄζυμος, ἄζυμος), bread baked from unfermented dough. The Hebrews early knew the art of raising bread by means of leaven (לֶחֶם, לֶחֶם, זָמֵן; on the various ancient kinds of this see Pliny, xviii. 26) prepared from the dregs or yeast of wine, or from a mixture of flour and water, which spontaneously ferments if allowed to stand, and which may, either moist or dried, be preserved for a considerable period for this purpose (Mishna, *Pesach*, iii. 1; *Chulla*, i. 7; comp. Harner, *Obserr.* iii. 65). Sometimes they baked bread without being leavened, especially when in paste (Gen. xix. 3; Judg. vi. 19; 1 Sam. xxviii. 24), as the modern Bedawin regularly do (Arvieux, iii. 227). This was formally presented for the paschal cakes (לֶחֶם אֶזְמֵן, Exod. xii. 8, 15, 20; xiii. 3, 6 sq.), and this fact became a symbol of the festival which thence was popularly designated as "the feast of unleavened bread." See PASSOVER. In fact, the Jews were expressly prohibited from all use of leaven during the seven days of its continuance, and even from having any leaven in their houses for all that time (Exod. xii. 19; xiii. 7; comp. 1 Cor. v. 7); so that they were obliged to seek and carefully remove all traces of it on the eve of the 14th of Nisan (see *Pesach*, i-iii; Schöttgen, *Hor. Hebr.* i. 398). They usually burned it (*Pesach*, ii. 1), but not in an oven; and were so scrupulous as not even to allow domestic animals to eat it during that period (*ibid.*). The sacrificial cakes of the meat-offering were also re-

quired to contain no leaven (Exod. xxix. 2; Lev. ii. 11; Numb. vi. 15, 19; comp. Amos iv. 5; Mishna, *Menuec*, v. 1; *Pesach*, i. 5; see Otho, *Lex. Rab.* p. 227: a similar usage prevailed in the Roman ritual; see Plutarch, *Quæst. Rom.* 109; comp. Casaubon, on Pers. *Sat.* i); on the other hand, the Pentecostal loaves, which represented the usual food of men, were leavened (Lev. xxiii. 17). Also the cakes which served as a basis (perhaps by way of platter) for the thank-offering were baked with leaven (Lev. vii. 13).—Winer. See BREAD; LEAVEN.

Un'ni (Heb. *U'ni'*, אֲנִי [but text in Neh. *U'mo'*, אֲנִי], according to Gesen. for אֲנִי [depressed], but according to Fürst for אֲנִי [Un'ni, heard of Jehovah]; Sept. variously, *U'ni* v. r. *U'ni*, *U'ni*, etc.; Vulg. *Ani*, *U'ni*), the name of two Levites.

1. One of the relatives of Heman who were appointed door-keepers and musicians to the tabernacle by David (1 Chron. xv. 18, 20). B.C. 1043.

2. One of those appointed to a similar service on the return from Babylon (Neh. xii. 9). B.C. 535.

Unni, an archbishop of the 10th century who made a missionary tour into Denmark, and was instrumental in establishing Christianity throughout the kingdom. He was greatly aided by Harald, son of king Gurm, and a convert to the Christian faith, although the king himself remained a pagan. See Neander, *Hist. of the Church*, iii. 288.

Unnißer, a very common funeral title of *Osiris* (q. v.), signifying the "Good Being."

Unpardonable Sin, or "Sin against the Holy Ghost" (Matt. xii. 31, 32, and parallels), appears in the first instance to have been the ascription of the beneficent miracles of Jesus to Satanic power; and it seems to be unpardonable because it argued such an utter perversion of moral sense as to place the person capable of it beyond the province of divine grace. Similar cases of spiritual hardening or judicial blinding are elsewhere referred to in Scripture (Eph. iv. 18, 19; Heb. vi. 6). See the Latin monographs on the subject by Deutschmann (Viteb. 1668), Heidegger (Tig. 1675), Fastenau (Hal. 1751), and others cited by Hase, *Leben Jesu*, p. 152. See BLASPHEMY; SIN.

Unsel, Samuel Friedrich, a Protestant theologian of Germany, was born in 1742 at Dantzig. He studied theology at Leipsic, where his acquaintance with Gellert had the greatest influence upon him. From Leipsic he returned to his native city, where he was appointed rector of St. Mary's. For twelve years he labored as a teacher, when he was called as pastor to Praust, not far from Dantzig. A few years later he was called to Gütlland, where he died, May 1, 1790. He wrote, *Dissertatio de Natura Conversionis* (Gedani, 1763):—*Dissert. de Locorum Veteris Testamenti in Nova Accommodatione Orthodoxa* (Lips. 1766). See Döring, *Deutsche Kanzelredner*, p. 552 sq. (B. P.)

Unterberger, IGNATIUS, a German painter, was born at Karales, in the Tyrol, in 1744. After acquiring the elements of design from his father, he went to Rome, at the age of twenty, and studied with a brother. In 1776 he settled at Vienna, and became the favorite painter of the minister Kaunitz. He died in 1797. Among his principal works are, the *Descent of the Holy Spirit*, in the principal church of Königgrätz; and *Peace and Love*, represented by a young girl caressing a lamb. See Spooner, *Biog. Hist. of the Fine Arts*, s. v.

Unwin, WILLIAM JORDAN, LL.D., a Church of England divine, was born at Great Coggeshall, Essex, Nov. 29, 1811. He was educated at Totteridge; prepared for the ministry at Rothwell, Highbury College, entering in 1830, and Glasgow University, which he entered in 1833, and where he graduated in 1835, taking the two degrees of bachelor and master of arts. On leaving Glasgow he became pastor of Cutting Lane (now Beaumont) Chapel, Woodbridge; and in 1842 min-

ister of the Independent Congregation, St. Heliers, Jersey. In both spheres of labor he adorned his profession by the consistency of his life, and benefited his people by the earnestness of his preaching. Being eminently fitted by his attainments and predilections for educational work, he was, in 1818, appointed by the Congregationalists principal of the Training Institution, first established in Liverpool Street, and afterwards removed to Homerton College. In these two places, with quiet industry, unflagging zeal, conscientious attachment to Congregational principles, and fervent devotion to the Church, he labored until 1875, when failing health obliged him to relinquish his favorite employment. Numerous works useful for elementary schools proceeded from his pen; also an able letter on *Education the Work of the People*. Dr. Unwin was remarkable for his conscientiousness, integrity, his vigorous mind, accurate scholarship, firm purpose, and domestic affections. He died in 1877. See *Evangelical Magazine*, April, 1877, p. 223.

Unwritten Word. "That authority to which the Romish Church could lay no claim from the purity of its members it endeavored to support during the Dark Ages by its arrogant pretensions. The Scriptures, even in the Latin version, had long become a sealed book to the people; and the Roman see, in proportion as it extended its supremacy, discouraged or proscribed the use of such vernacular versions as existed. This it did, not lest the ignorant and half-informed should mistake the sense of Scripture, nor lest the presumptuous and the perverse should deduce new errors in doctrine, and more fatal consequences in practice, from its distorted language, but in the secret and sure consciousness that what was now taught as Christianity was not to be found in the written Word of God. In maintenance of the dominant system, tradition, or the unwritten Word, was set up. This had been the artifice of some of the earliest heretics, who, when they were charged with holding doctrines not according to Scripture, affirmed that some things had been revealed which were not committed to writing, but were orally transmitted down. The Pharisees before them pleaded the same supposititious authority for the formalities which they added to the law, and by which they sometimes superseded it, 'making the Word of God of none effect,' as our Saviour himself reproached them. Upon this ground the Romish clergy justified all the devices of man's imagination with which they had corrupted the ritual and the faith of the Western Church" (Southey, *Book of the Church*). See TRADITION.

Unxia, a surname of *Juno* in Roman mythology, was the goddess of anointing. The young women in Rome are said to have anointed the doors of their future dwellings with salve before entering them, in order that nothing evil should enter their house. From this, *Juno*, the directress of marriages, received the above name.

Unzer, JOHANN AUGUST, a German physician, born April 29, 1727, and died April 2, 1799, was distinguished by his works on physiological and psychological subjects, among which may be mentioned, *A New Doctrine concerning the Movements of the Soul and the Imagination*;—*Thoughts on Sleep and Dreams*;—*On the Sensitive Faculties of Animated Bodies*;—*The Physiology of Animated Nature*;—and *Physiological Researches* (1727–99). See Hoefler, *Nour. Biog. Générale*, s. v.

Upanishad (from *upa*, "beneath" or "near;" *ni*, "in;" and *sad*, "to sit") is the name of those Sanscrit works belonging to the Vedic literature which contain the mystical doctrine of the Hindûs on the nature of a Supreme Being, its relation to the human soul, and the process of creation. The object of the Upanishads is to impress the mind with a belief in one Supreme Spirit; to show that this Supreme Spirit is the creator of the world; that the world has no reality if thought of besides Brahman; and that the human soul is identical in

nature with that same Spirit whence it emanates. They are looked upon as inspired writings. See Müller, *History of Anc. Sanscrit Lit.*; Muir, *Original Sanscrit Texts*.

Upfold, GEORGE, M.D., D.D., LL.D., a Protestant Episcopal clergyman, was born at Shemley Green, near Gullford, England, May 7, 1796. He came to America in 1802, and settled at Albany, N. Y. In 1814 he graduated at Union College, Schenectady. In 1816 he graduated in medicine in New York, and commenced practice in Albany soon after. He soon, however, entered upon the study of theology, and was ordained minister in 1818. He was minister at Lansingburg, N. Y., from 1818 to 1820; rector of St. Luke's, New York city, from 1820 to 1828, and a portion of this time (1821–25) assistant minister of Trinity Church; rector of St. Thomas's Church, New York city, from 1828 to 1831; rector of Trinity Church, Pittsburgh, Pa., from 1832 to 1850; and was consecrated bishop of Indiana in 1849. He died at Indianapolis, Aug. 26, 1872.

Upham, Charles Wentworth, an American author and Unitarian minister, was born in St. John's, N. B., May 4, 1802. He graduated at Harvard College in 1821, and at the Cambridge Divinity School in 1824, and was colleague of Dr. Prince, pastor of the First Unitarian Church in Salem, from 1824 to 1844. He then left the profession on account of bronchial weakness, and engaged in various pursuits. He edited the *Christian Register*, travelled as agent of the Massachusetts Board of Education, was member of the Massachusetts House of Representatives in 1849, of the State Senate from 1850 to 1851, was mayor of Salem in 1852, member of the National Congress from the Sixth District from 1854 to 1855, State senator in 1858, and representative from 1859 to 1860. He died at Salem, June 15, 1875. He wrote, *Letters on the Logos* (1828);—*Prophecy as an Evidence of Christianity* (1835);—*Lectures on Witchcraft, comprising a History of the Salem Delusion of 1692* (1831; enlarged ed. 1867, 2 vols. 8vo);—*Life of Sir Henry Vane* (in Sparks's *Amer. Biog.* 1835);—*Life of John C. Fremont* (1856);—*Memoirs of Francis Peabody* (1869);—*Life of Timothy Pickering* (1867–72).

Upham, Thomas Cogswell, D.D., an American divine and author, was born at Deerfield, N. H., Jan. 30, 1799. He graduated at Dartmouth College in 1818, and at Andover Theological Seminary in 1821, when he became assistant teacher of Hebrew in the seminary, and translated Jahn's *Biblical Archaeology*. In 1823 he became associate pastor of the Congregational Church in Rochester, N. H., and in 1825 professor of mental and moral philosophy in Bowdoin College, in which position he remained until 1867. He died in New York, April 2, 1872. Among his numerous works may be mentioned, *Manual of Peace* (1830);—*Elements of Mental Philosophy* (1839, 2 vols.; abridged ed. 1864);—*Outlines of Disordered Mental Action* (1840);—*Life and Religious Experience of Madame Guyon* (1847);—*Life of Faith* (1848);—*Principles of the Interior or Hidden Life* (ed.);—*Philosophical and Practical Treatise on the Will* (1850);—*Treatise on the Divine Union* (1851);—*Religious Maxims* (1854);—*Life of Madame Catherine Adorna* (1856);—*Letters, æsthetic, social, and Moral, written from Europe, Egypt, and Palestine* (1857);—*Method of Prayer* (1859);—also *The Absolute Religion* (published posthumously in 1872).

Upham, William D., a Baptist minister, was born at Weathersfield, Vt., Feb. 13, 1810. He developed early in life a strong love for literary pursuits, and at the age of eighteen he determined to devote himself to the study of law. With this object in view, he entered Brown University in the autumn of 1831. He seems to have imbibed sceptical views, and with that conceit which not unfrequently accompanies pride of intellect in young men in a course of study, he regarded Christianity as, on the whole, hardly worthy of his notice. While engaged in teaching at Dedham, Mass., the winter succeeding his entrance into college, the Spirit of God ar-

rested his attention, and, after a severe struggle, he accepted Christ as his Saviour. By his conversion, all his life-plans were changed, and he resolved to devote himself to the service of the Lord. He became a member of the First Baptist Church in Providence, R. I., in the fall of 1832, and the Church gave him its approval in his purpose to enter the Christian ministry. Want of means compelled him to leave college at the close of his second year, and he spent the next three years in teaching in Wickford, R. I. Here he labored not only in his special vocation as a teacher, but as a Christian, and the existence of the Church in Wickford is largely owing to his toils and sacrifices. He removed to Ludlow, Vt., in 1836, and was for a time principal of the Black River Academy. He was ordained to the Gospel ministry in Ludlow in November, 1837, and in December of the following year he became pastor of the Second Baptist Church in Townshend, Vt. He secured from the outset the affections of his people, and his labors were greatly blessed. A few years only of service in the cause he so much loved were allotted to him. Four years and a few months he remained in the pastoral office, and then was called to a better world. His death occurred June 30, 1843. See *Baptist Memorial*, ii, 269. (J. C. S.)

Uphar'sin (Dan. v, 25). See MENE.

Ūphaz (Heb. *Ūphaz*, *פָּזָא*, signif. uncertain; Sept. *Μωφάζ*, *Μωφάζ*; Vulg. *Ophaz*, *obryzum*), the name of a gold region (Jer. x, 9; Dan. x, 5), like Tarshish and Ophir (comp. *Psa*. xlv, 10; 1 Chron. xxxix, 4), and hence thought by most expositors to be a corruption of the latter name (so the Targum, Syriac, and Theodotion). Fürst, however, suggests (*Heb. Lex. s. v.*) that it may be compounded of *פָּז*, *wash*, and *פָּזָא*, pure gold; and that since it is interchanged with Sheba (*Psa*. lxxii, 15), it may be regarded as the name of a gold wash in Southern Arabia. Its resemblance to *Muphaz* (*מִפְּזָא*; A. V. "best") in 1 Kings x, 18 is perhaps not accidental. See ORPH.

Upis, in Greek mythology, was a surname of *Diana*. A certain tutress was also called so, and likewise a nymph of *Diana*. Upis was, likewise, the name of a Hyperborean woman who, with Arge, paid a tribute to Delos for *Diana*, according to an oath respecting the birth of *Apollo*. Again, Upis was the name of the father of *Diana*, husband of *Glauce*. Lastly, it was a surname of *Venesis*.

Upper Chamber (or Room) (*אַלְיָא*, *aliyah*, as in modern Arabic; 2 Kings i, 2; xxiii, 12; 1 Chron. xxviii, 11; 2 Chron. iii, 9; "summer-parlor," Judg. iii, 23; "loft," 1 Kings xvii, 19, 23; "chamber over the gate," 2 Sam. xviii, 33; elsewhere "chamber" simply; *αὐλῶν*, *Mark* xiv, 15; Luke xxii, 12; *ὑπερῶν*, *Acts* i, 13; ix, 37, 39; xx, 8), a sort of guest-chamber not in common use, in the upper part of the house, where the Orientals received company and held feasts, and where at other times they retired for prayer and meditation

Front View of the Balcony of a "Chamber on the Wall."

(*Mark* xiv, 15; *Luke* xxii, 12). Among the Hebrews it seems to have been on, or connected with, the flat roofs of their dwellings; in Greek houses it occupied the upper story (1 Kings xvii, 19, 22; 2 Kings iv, 10; *Acts* i, 13; ix, 37, 39; x, 9; xx, 8). Robinson describes the "upper room of a respectable house at Ramleh as a large airy hall, forming a sort of third story upon the flat roof of the house" (*Bibl. Res.* iii, 266). Jowett describes the chief room in the houses of *Havali* (opposite *Lesbos*) as in the upper or third story, secluded, spacious, and commodious, "higher and larger than those below, having two projecting windows, and the whole floor so much extended in front beyond the lower part of the building that the projecting windows overhung the street" (*Christ. Res.* p. 67). From such a chamber, *Eutychus*, who was sitting on the window, or on an elevated divan, fell through the window into the street (*Acts* xx, 6-12). In 2 Kings i, 2 we are told that *Ahaziah* "fell down through a lattice in his upper chamber that was in *Samaria*." Indeed, it is likely that those accidents were by no means rare in the East. A person accommodated here can go in and out with perfect independence of the main building of the inner court, into which he probably never enters, and does not in the least interfere with the arrangements of the family. A visitor or friend is almost never accommodated anywhere else, and certainly never in the interior court (*Kitto, Pict. Bible*, note in 2 Kings iv, 10). Rich luxurious men are charged with sinfully multiplying chambers of this sort (*Jer.* xxii, 13, 14). As spoken of by the prophet, they would seem to have been both large and built for the purposes of comfort and luxury. We find accordingly frequent mention made of them in connection with kings, who appear to have used them as summer-houses for their coolness (*Judg.* iii, 20; 2 Kings i, 2; xxiii, 12). The summer-house spoken of in Scripture was very seldom a separate building. The lower part of the house was the winter-house, the upper room was the summer-house. If they are on the same story, the outer apartment is the summer-house, the inner is the winter-house (*Thomson, Land and Book*, i, 235; *Robinson, Bibl. Res.* iii, 417). We find the upper rooms allocated to the use of those prophets whom it was wished to honor particularly (1 Kings xvii, 19; 2 Kings iv, 10). They were also used

House with an *Aliyah*.

on account of their size and coolness as places for assembly (Acts i, 13; xx, 8), and for similar reasons the dead were laid out in them (ix, 39). There appears to have been an upper room over the gateways of towns (2 Sam. xviii, 33), and on their roofs, as being the highest part of the house, idolatrous worship was paid to Baal (2 Kings xxiii, 12). In allusion to the loftiness of the upper room, the psalmist beautifully describes God as laying the beams of his *upper chambers* in the waters, and from thence watering the hills (Psa. civ, 3, 13).—See CHAMBER; HOUSE.

Upsal, a town of Sweden, forty-five miles north-west of Stockholm, was, during the Middle Ages, the stronghold of paganism. It has a beautiful Gothic cathedral, built from 1258 to 1435. Its interior is magnificent and richly decorated, but its exterior has suffered much from fire, notably in the conflagration of 1702. It is the finest cathedral in that region. See Neander, *Hist. of the Church*, iii, 292 sq.

Upton, JAMES, a learned schoolmaster and divine of the Church of England, and editor of classical works, was born in 1670, and died in 1749.

Ur, the name of a place and of a man. (In the discussion of the former, we chiefly adopt the art, from Smith's *Dict. of the Bible*, with additions from other sources.)

1. The original seat of Abraham's family, whence he set out for Canaan (Gen. xi, 28, 31; xv, 7; Neh. ix, 7). See ABRAHAM.

I. *The Name*.—This is invariably "Ur of [the] Chaldees" (אֲרַם כַּשְׁדִּי, *Ur Kasdim*; Sept. ἡ χώρα τῶν Χαλδαίων; Vulg. *Ur Chaldecorum* [but in Neh. *ignis Chaldecorum*]). The oldest derivation of the word אֲרַם is from the Heb. אֲרַם, or אֲרָם, *light*, in the sense of *fire* (so the Targum and Jerome). This derivation is no doubt connected with the legends in the Koran and Talmud, which represent Abraham as escaping by miracle from the flames into which Nimrod or other idolatrous persecutors had thrown him (see Wagner, in the *Thesaur. Theol.-philol.* i, 173). Various other etymologies have been proposed: some taking the word as אֲרָם, *a mountain*; some as denoting the *east*, or the *light-giving region*; while Ewald, from the Arabic, makes it "place of sojourn," and others look to the Zendic *vara*, *a fort* (Gesen.), or the Sanscrit *ur*, *a town*, or even the Heb. אֲרָם, *a city* (Bonomi, *Nineveh*, p. 41). The name, however, was probably indigenous, and belongs to the old Chaldee of the first empire, the Assyrian *Uru*, and the cuneiform *Hur*.

II. *Sites Proposed*.—1. One tradition identifies Ur with the modern *Orfah*, in the north-west part of Mesopotamia. There is some ground for believing that this city, called by the Greeks Edessa, had also the name of Orrha as early as the time of Isidore (B.C. cir. 150); and the tradition connecting it with Abraham is perhaps not later than Ephraem (A.D. 330-370), who makes Nimrod king of Edessa, among other places (*Comment. in Gen.*, in *Opp.* i, 58, B.). According to Pococke (*Description of the East*, i, 159), that Ur is Edessa or Orfah, is "the universal opinion of the Jews;" and it is also the local belief, as is indicated by the title "Mosque of Abraham," borne by the chief religious edifice of the place, and the designation "Lake of Abraham the Beloved," attached to the pond in which are kept the sacred fish (Ainsworth, *Travels in the Truck*, etc., p. 64; comp. Niebuhr, *Voyage en Arabie*, p. 336).

2. A second tradition, which appears in the Talmud and in some of the early Arabian writers, finds Ur in Warka, the Ὀρχόη of the Greeks, and probably the Ereeh of Holy Scripture (called Ὀρχ by the Sept.). This place bears the name of *Huruk* in the native inscriptions, and was in the country known to the Jews as "the land of the Chaldeans."

3. A third tradition, less distinct than either of these,

but entitled to at least equal attention, distinguishes Ur from Warka, while still placing it in the same region (see *Journal of Asiatic Society*, xii, 181, note 2). There can be little doubt that the city to which this tradition points is that which appears by its bricks to have been called *Hur* by the natives, and which is now represented by the ruins at *Mugheir*, or *Umghair*, on the right bank of the Euphrates, nearly opposite to its junction with the Shat el-Hie. The oldest Jewish tradition which we possess, that quoted by Eusebius from Eupolemus (*Præp. Ev.* ix, 17), who lived about B.C. 150, may be fairly said to intend this place; for by identifying Ur (Uria) with the Babylonian city, known also as Camarina and Chalceopolis, it points to a city as the Moon, which *Hur* was—*Kamur* being "the moon" in Arabic, and *Khalbi* the same luminary in the Old Armenian.

4. An opinion unsupported by any tradition remains to be noticed. Bochart, Calmet, Bunsen, and others identify "Ur of the Chaldees" with a place of the name mentioned by a single late writer (Ammianus Marcellinus) as "a castle" existing in his day in Eastern Mesopotamia, between Hatra (El-Hadhr) and Nisibis (Amm. Marc. xxv, 8). The chief arguments in favor of this site seem to be the identity of name and the position of the place between Arrapachitis, which is thought to have been the dwelling-place of Abraham's ancestors in the time of Arphaxad, and Haran (Harran), whither he went from Ur.

5. It may be added that Tuch regards Ur as a Median town called *Örēpa* by Strabo (xi, 523), a view followed to some extent by Ewald, Lengerke, Ritter, and Knobel.

III. *Probable Identification*.—It will be seen that of the four or five localities thought to have a claim to be regarded as Abraham's city, two (or three) are situated in Upper Mesopotamia, between the Mons Masius and the Sinjar range, while the other two are in the alluvial tract near the sea, at least four hundred miles farther south. Let us endeavor first to decide in which of these two regions Ur is more probably to be sought.

That Chaldea was, properly speaking, the southern part of Babylonia, the region bordering upon the Gulf, will be admitted by all. Those who maintain the northern emplacement of Ur argue that, with the extension of Chaldean power, the name travelled northward, and became coextensive with Mesopotamia; but, in the first place, there is no proof that the name Chaldea was ever extended to the region above the Sinjar; and, secondly, if it was, the Jews at any rate mean by Chaldea exclusively the lower country, and call the upper Mesopotamia, or Padan-Aram (see Job i, 17; Isa. xlii, 19; xliii, 14, etc.). Again, there is no reason to believe that Babylonian power was established beyond the Sinjar in these early times. On the contrary, it seems to have been confined to Babylonia Proper, or the alluvial tract below Hit and Tekrit, until the expedition of Chedorlaomer, which was later than the migration of Abraham. The conjectures of Ephraem Syrus and Jerome, who identify the cities of Nimrod with places in the upper Mesopotamian country, deserve no credit. The names all really belong to Chaldea Proper. Moreover, the best and earliest Jewish authorities place Ur in the low region. Eupolemus has been already quoted to this effect. Josephus, though less distinct upon the point, seems to have held the same view (*Ant.* i, 6). The Talmudists also are on this side of the question; and local traditions, which may be traced back nearly to the Hegira, make the lower country the place of Abraham's birth and early life. If Orfah has a Mosque and a Lake of Abraham, Cutha, near Babylon, goes by Abraham's name, as the traditional scene of all his legendary miracles.

Again, it is really in the lower country only that a name closely corresponding to the Hebrew אֲרַם is found. The cuneiform *Hur* represents אֲרַם letter for letter, and only differs from it in the greater strength of the aspirate. Isidore's Orrha ("Ὀρῶα") differs from Ur consid-

erably, and the supposed Ur of Ammianus is probably not Ur, but Adur. The *Orchoë* (*Ὀρχοή*) of Southern Mesopotamia (Ptolemy, *Geogr.* v. 20; comp. Strabo, xvi. 1, 6), noted by later writers (Cellarius, *Geogr.* ii. 760; Bonomi, *Ninereh*, p. 41, 399), is probably different from the *Orōn* of Josephus and the *Ὀρόν* of Eupolemus.

The argument that Ur should be sought in the neighborhood of Arrapachitis and Seruj, because the names Arphaxad and Seruj occur in the genealogy of Abraham (Bunsen, *Egypt's Place*, iii, 366, 367), has no weight till it is shown that the human names in question are really connected with the places, which is at present assumed somewhat boldly. Arrapachitis comes probably from *Arapkha*, an old Assyrian town of no great consequence on the left bank of the Tigris, above Nineveh, which has only three letters in common with Arphaxad (אַרְפַּכְשָׁד); and Seruj is a name which does not appear in Mesopotamia till long after the Christian era. It is rarely, if ever, that we can extract geographical information from the names in a historical genealogy; and certainly in the present case nothing seems to have been gained by the attempt to do so.

On the whole, therefore, we may regard it as tolerably certain that "Ur of the Chaldees" was a place situated

in the real Chaldea—the low country near the Persian Gulf. The only question that remains in any degree doubtful is whether Warka or Mugheir is the true locality. These places are not far apart, and either of them is sufficiently suitable. Both are ancient cities, probably long anterior to Abraham. Traditions attach to both, but perhaps more distinctly to Warka. On the other hand, it seems certain that Warka, the native name of which was *Huruk*, represents the Erech of Genesis, which cannot possibly be the Ur of the same book. See EUSEBI. Mugheir, therefore, which bore the exact name of 'Ur or Hur, remains with the best claim, and is entitled to be (at least provisionally) regarded as the city of Abraham.

If it be objected to this theory that Abraham, having to go from Mugheir to Palestine, would not be likely to take Haran (*Harran*) on his way, more particularly as he must then have crossed the Euphrates twice, the answer would seem to be that the movement was not that of an individual, but of a tribe travelling with large flocks and herds, whose line of migration would have to be determined by necessities of pasturage, and by the friendly or hostile disposition, the weakness or strength, of the tribes already in possession of the regions which had to be traversed. Fear of Arab plunderers (Job i, 15) may very probably have caused the emigrants to cross the Euphrates before quitting Babylonia, and having done so, they might naturally follow the left bank of the stream to the Belik, up which they might then proceed, attracted by its excellent pastures, till they reached Haran. As a pastoral tribe proceeding from Lower Babylonia to Palestine must ascend the Euphrates as high as the latitude of Aleppo, and perhaps would find it best to ascend nearly to Bir, Haran was but a little out of the proper route. Besides, the

whole tribe which accompanied Abraham was not going to Palestine. Half the tribe were bent on a less distant journey; and with them the question must have been, where could they, on or near the line of route, obtain an unoccupied territory. They could not directly cross the open desert between Babylonia and Palestine. Even caravans travelling from Bagdad to Damascus are obliged to take the route by Haran.

IV. Description of the Modern Locality.

—Ur or Hur, now Mugheir, or *Um-Mugheir*, "the bitumen-ed," or "the mother of bitumen," is one of the most ancient, if not the most ancient, of the Chaldaean sites hitherto discovered. It lies on the right bank of the Euphrates, at the distance of about six miles from the present course of the stream, nearly opposite the point where the Euphrates re-

Plan of Mugheir Ruins.

H H H H. 9946 yards round. a a a. Platform on which the house d is built. d. House cleared. b. Pavement at edge of platform a, twelve feet below surface. c. Tomb mound. d, e, g, h, k, l, m. Points at which excavations were made by Mr. Loftus. f f f f. Comparatively open space of very low mounds.

ceives the Shat el-Hie from the Tigris. It is now not less than 125 miles from the sea; but there are grounds for believing that it was anciently a maritime town, and that its present inland position has been caused by the rapid growth of the alluvium. The remains of the buildings are generally of the most archaic character. They cover an oval space 1000 yards long by 800 broad, and consist principally of a number of low mounds enclosed within an *enceinte*, which on most sides is nearly perfect. The most remarkable building is near the northern end of the ruins. It is a temple of the true Chaldean type, built in stages, of which two remain, and composed of brick, partly sun-burned and partly baked, laid chiefly in a cement of bitumen. It is in the form of a right-angled parallelogram, the longest sides of which are the north-east and south-west. One angle points due north. The lower story is supported by buttresses thirteen inches deep, and, with the exception of those at the angles, eight feet wide. The building measures 198 feet in length and 133 in breadth. The lower story is twenty-seven feet high, and has but one entrance, which is eight feet wide. The outer surface is faced with "red kiln-baked bricks" to a thickness of ten feet; but the whole interior is of sun-dried bricks. In each of the angles of this building, six feet inward, near the foundation, an inscribed cylinder was discovered, which appears to have served the same purpose as the documents at present deposited beneath the foundation-stones of our great buildings. These cylinders are now in the British Museum. The bricks of this building bear the name of a certain *Uruckh*, who is regarded as the earliest of the Chaldean monumental kings, and the name may possibly be the same as that of *Orchamus* of Ovid (*Metam.* iv, 212). His supposed date is B.C. 2000, or a little earlier. 'Ur was the capital of this monarch, who had a dominion extending at least as far north as Niffer, and who, by the grandeur of his constructions, is proved to have been a wealthy and powerful prince. The great temple appears to have been founded by this king, who dedicated it to the moon-god, *Hurki*, from whom the town itself seems to have derived its name. Ilgi, son of Uruckh, completed the temple, as well as certain other of his father's buildings, and the kings who followed upon these continued for several generations to adorn and beautify the city. The tablets of the Chaldeans discovered at Mugheir are among the most interesting ever brought to light. These records bear the names of a series of kings from Uruckh (B.C. 2230) to Nabonidus (B.C. 540), the last of the series. Among others is that of Kudur-mapula, or Chedorlaomer (Gen. xiv, 1). The temple was dedicated to *Sin*, or "the moon," which element was preserved by the Greeks in the name *Mesene*, applied by them to the surrounding region. "The cylinder inscriptions of Mugheir are invaluable documents in confirming the authenticity and truth of Scripture. They not only inform us that Nabonidus, last king of Babylon, repaired the great temple of the moon at Ilur,

but they also explain who Belshazzar was, concerning whom the early Bible critics have in vain endeavored to reconcile conflicting statements. In the book of Daniel (v, 30) he is alluded to as the king of the Chaldees when Babylon was taken by the united armies of the Medes and Persians. The account of Berosus does not, however, agree with that of Scripture. It states that Nabonidus, after being utterly routed in the open plain by Cyrus, shut himself up in the city of Borsippa, but was soon obliged to surrender his person to the conqueror. From Daniel, therefore, we are led to conclude that Belshazzar was the last Chaldean monarch; while Nabonidus is represented in the same capacity by Berosus. . . . Sir Henry Rawlinson's reading of the Mugheir cylinders entirely reconciles these discrepancies. The records distinctly state that *Belshazzar was the eldest son of Nabonidus*, and that he was admitted to a share of the government" (*Loftus, Chaldaea and Susiana*, p. 13; comp. *Journal of Asiatic Society*, xv, 260 sq.). See BELSHAZZAR.

'Ur retained its metropolitan character for above two centuries, and even after it became second to Babylon was a great city, with an especially sacred character.

Ruins of Temple at Mugheir.

The notions entertained of its superior sanctity led to its being used as a cemetery city, not only during the time of the early Chaldean supremacy, but throughout the Assyrian and even the later Babylonian period. It is in the main a city of tombs. By far the greater portion of the space within the *enceinte* is occupied by graves of one kind or another, while outside the enclosure the whole space for a distance of several hundred yards is a thickly occupied burial-ground. It is believed that 'Ur was for 1800 years a site to which the dead were brought from vast distances, thus resembling such places as Kerbela and Nejif, or Meshed Ali, at the present day. The latest mention that we find of 'Ur as an existing place is in the passage of Eupolemus already quoted, where we learn that it had changed its name, and was called *Camarina*. It probably fell into decay under the Persians, and was a mere ruin at the time of Alexander's conquests. Perhaps it was the place to which Alexander's informants alluded when they told him that the tombs of the old Assyrian kings were chiefly in the great marshes of the lower country (*Arrian, Exp. Alex.* vii, 22). The mounds that mark the site of its great temples are bare; the whole country around it is a dismal swamp. In regard to 'Ur,

as well as to Babylon, the words of Isaiah are true, "The beauty of the Chaldees' excellency shall be as when God overthrew Sodom and Gomorrah" (xiii, 19). See Loftus, *Chaldea*, ch. xiii; Rawlinson, *Ancient Monarchies*, i. 15 sq., 27, 108, 153; *Jour. Royal Geogr. Soc.* xxvii, 185. See CHALDEA.

2. (אֶלִּיפַח, *Ur, light*; Sept. Ὀπά v. r. Ὀπά[φά], etc.; Vulg. *Ur*.) The father of Eliphaz or Eliphalet, one of David's warriors (1 Chron. xi, 35). B.C. ante 1043. In the parallel list of David's warriors (2 Sam. xxiii, 34) we have the son's name thus stated, "Eliphalet the son of Ahasbai, the son of the Maachathite," or the Maachathite simply, as it should doubtless be made to read; while the above passage still more corruptly gives two persons, "Eliphaz the son of Ur, Hephzer the Mecherathite," which should probably be corrected so as to refer to one individual, either by the rejection of the name Hephzer altogether, or its identification with one of the preceding; for the personages named before and after these in the two accounts are evidently the same, and the subjoined sum is full by counting these as one. See DAVID.

Uraettir, in Norse mythology, denotes the entire dynasty of the Trolles, Thusses, serpent-like dwarfs and giants, the Jotes, Schwarzelfs, and Dockelfs.

Uranus, a Nestorian of Syria who applied the precepts of Aristotle to the Eutychian controversies and propagated his doctrines in Persia. He succeeded in convincing Chosroes on many points, and was so popular with this ruler that he always had him at his table. See Mosheim, *Ecc. Hist.* i, 388.

Urānus (Lat. *Cælus*), the *heaven*, in Greek mythology, was the progenitor of the whole line of Grecian gods. His first children were the Hecatonchires (Centimanes). Afterwards he begot, through Gæa, the Cyclops. These were imprisoned in Tartarus because of their great strength. This so moved their mother to anger that she incited her subsequently born children, the Titans, against the father, who drove him from the throne of the earth, after Kronus (Saturnus), his younger son, had, with a diamond sickle, disqualified him for the further production of children. The sea received the mutilated organs, which gave life to Venus. From the blood which was spilled there sprang the Giants, the Furies, and the Melian nymphs. See Smith, *Dict. of Gr. and Rom. Biog. and Mythol.* s. v.

Urban I, pope from A.D. 223 to 230, was a native of Rome, but tradition mentions nothing worthy of note concerning him except that he persuaded several Romans to suffer the martyr's death, and was finally martyred himself under Alexander Severus. May 25 is dedicated to his celebration.

Urban II, pope from A.D. 1088 to 1099, previously named *Odo of Lagny*, was born in Chatillon-sur-Marne, and became successively canon of Rheims, prior of Clugny, bishop of Ostia, and legate to the court of the emperor Henry IV. In the latter station he labored efficiently to insure the papal prerogative in connection with the *Investiture* controversy. He followed Victor III as pope, and represented the Gregorian party in his administration. He succeeded in maintaining himself against pope Clement II, who was elected by the imperial party, and also in greatly extending the influence and reputation of the papacy throughout the West. In 1089 he convened a council at Rome which denounced the ban upon the emperor, his pope, and their adherents. At the *Concilium Melfitanum*, in 1090, he enunciated the decree that the laity could possess no right whatsoever against the clergy (see Mansi, *Collectio Concil.* xx, canon 11, 723 [Venet. 1775]). He was driven from Rome by the emperor, and compelled to seek a refuge with count Roger, upon whom he had conferred the districts of Apulia and Calabria. He retaliated by renewing the ban over his enemy (1091) and forming an alliance with Conrad, the emperor's son, who rebelled and made himself king of Italy. Ur-

ban returned to Rome (1093) and from that time interfered most notably in the affairs of the world. He excommunicated Philip of France, who had driven away his queen and married Bertrada, consort of count Fulco of Anjou. At the Council of Clermont (1095) he forbade the investiture of bishops by the hands of the laity of any rank whatever, and also the assumption of feudal obligations to king or other layman by any clergyman. He was not successful, however, in compelling the princes to give up their sovereignty in ecclesiastical affairs, and was even compelled to create count Roger of Sicily, his own protégé, legate to Sicily, in order that he might be able to enforce his decree without alienating the count from his side. The Council of Clermont was also specially important as furnishing the occasion for the organization of the *Crusades* for the conquest of the Holy Sepulchre. Urban delivered a fiery address, which gave the stimulus for the first crusade; and the new movement so increased his own power that he became able to expel his rival from Rome and utterly destroy his influence. Other councils were held in France under his direction, in one of which, at Nismes, he released Philip of France from the ban, in recognition of his separation from Bertrada. Something of regard was also paid by him to the politically important reunion of the Greek and Latin churches. In England William Rufus proved an obstinate opponent to the papal plans, but in Spain these plans resulted in a large extension of the power of the Church. Urban's influence over matters of doctrine was less pronounced than over matters of administration; but he nevertheless caused the teachings of Berengar (q. v.) to be condemned at the Council of Piacenza, and at Clermont the practice of dipping the bread used in the sacrament in wine. In the latter council he also pronounced a general and complete absolution—a measure which from that time became pre-eminently a privilege of the pope. He assured to all Christians who should take up arms against the infidels entire forgiveness of sins, and also blessedness and inclusion among the number of martyrs, if they should fall during the campaign. The power of the complete absolution was therefore based on the idea of the sin-extirpating power of martyrdom. Urban died June 20, 1099. See *Vita et Epist. Urb. II.* in Mansi, *ut supra*, 642-719, and the literature in Gieseler, *Lehrb. d. Kirchengesch.* ii, 2 (4th ed. Bonn, 1848), p. 39 sq., 508.—Herzog, *Real-Encyclop.* s. v.

Urban III, previously *Lambert* or *Hubert Crirelli*, of Milan, was archdeacon at Bourges and later at Milan, archbishop of Milan, and cardinal. He was made pope in 1185, and is noteworthy only because of his uninterrupted and unprofitable quarrels with the emperor Frederick, for which see *Gesta Treverorum* (Trev. 1836), vol. i.; and Gieseler, p. 96 sq. Urban died Oct. 19, 1187. See Herzog, *Real-Encyclop.* s. v.

Urban IV, pope from A.D. 1261 to 1264, named *Jacob Pantalœon*, the son of a shoemaker at Troyes, studied at Paris and became canon of Troyes, and afterwards bishop of Liege. Innocent IV sent him as legate to Germany, and Alexander IV nominated him patriarch of Jerusalem. His brief pontificate was disturbed by political agitations growing out of his determination to destroy the influence of the Sicilian king Manfred in the affairs of Italy, and his interference with the disputed succession of the German throne. He appointed fourteen cardinals to serve as counsellors, forbade the election of Conradin, the last representative of the house of Hohenstaufen, to the German throne, under pain of excommunication, and cited Richard of Cornwall and Alfred of Castile, the competitors for that throne, to Rome, that they might await his decision. He also despatched a cardinal-legate to England to assert the authority of the papacy in the administration of that country: and he summoned Manfred before his tribunal, and when that king disregarded the summons,

transferred his kingdom to duke Charles of Anjou. Manfred, however, resisted, and subjugated by force of arms a larger portion of the States of the Church. Urban was compelled to flee for safety to Orvieto, and afterwards to Perugia, where he died. Oct. 2, 1261. He is notable for having brought about a general observance of the Feast of Corpus Christi. His literary remains include, besides a number of bulls, a small collection of *Epistolæ*. See Mansi, *Concil.* xxiii, 1076 sq.; Gieseler, p. 166 sq.; and Herzog, *Real-Encyklop.* s. v.

Urban V, the last of the Avignon popes, reigned from 1362 to 1370. His name was *William Grimaud*, and he had been a Benedictine monk, abbot at Auxerre in 1353, and at St. Victor's, in Marseilles, in 1358. He was rated as a most capable canonist, and had officiated as teacher of canon and civil law in Montpellier, Avignon, Toulouse, and Paris. He succeeded Innocent VI in the pontificate, and found himself at once in difficult circumstances. In Italy Bernabo Visconte had rebelled and taken possession of several cities belonging to the Church, which could only be recovered through a treaty by which the pope pledged himself to the payment of a ransom amounting to half a million gold florins. England had refused to pay the customary tribute, and Edward III had even caused a very resolute denial of such revenues to be opposed by the Parliament to the pope's demand. The Turks were threatening danger to Cyprus. Urban sought to advance the papal interests amid these complications by means of legates, the preaching of a new crusade against the Turks, and a removal of the papal seat to Rome. Greatly to the dissatisfaction of many cardinals, the latter project was executed in 1367, the pope leaving Avignon April 30, and reaching Rome Oct. 16. He was received by queen Joanna of Naples, on whom he conferred a golden rose and a consecrated sword. The emperor John Paleologus came over to the faith of Rome and promised fealty to the papal authority, Oct. 18, 1369. But, urged by the French cardinal, the pope returned to Avignon in September, 1370. Soon afterwards he died (Nov. 13), and was buried, according to his request, at Marseilles. It is to be added that Urban cultivated a strict morality, required bishops to reside in their dioceses, and zealously combated the growing simony and accumulation of benefices in the hands of individual prelates. Several of his bulls condemn, in addition, the formation of unions and the incorporation of benefices. See Mansi, xxvi, 422 sq.; Gieseler, ii, 3, 92 sq., 117 sq.; and Herzog, *Real-Encyklop.* s. v.

Urban VI, the first to ascend the papal chair in the period of the "great schism," was previously named *Bartholomew of Prignano*, and was a native of the city of Naples. He became archbishop of Bari and followed Gregory XI, April 8, 1378, the people of Rome having demanded an Italian pope. He attempted to reform the many and scandalous abuses which had grown up during the absence of the popes at Avignon, and did not hesitate to assail even bishops and cardinals; and having offended the clergy, he was unfortunate enough to alienate the good-will of many influential laymen, also, by his haughty and arbitrary manner. The cardinals, therefore, proceeded to elect a new pope on the plea that the election of Urban was not freely made, but was forced on the cardinals by the people. Count Robert of Geneva was the new choice, and he assumed the title of Clement VII; and as Urban retained a large body of adherents, the great schism was at once consummated. Urban was supported by Italy, England, Germany, and Poland. Queen Joanna of Naples and Sicily had acknowledged him, but was driven into an alliance with Clement by his pride and obstinacy; and he thereupon induced the heir to her throne, duke Charles of Durazzo, to invade her territories. Soon afterwards he quarrelled with Charles also, and excommunicated that prince. The cardinals, who had conspired with Charles against him, were imprisoned and

tortured, and, after a time, five of them were put to death. To Ladislaws, the heir of Charles, Urban denied the possession of Naples, claiming that it was a papal fief, and he organized an expedition to defend his claim; but when his soldiers deserted his standard, he returned to Rome, October, 1388, and employed himself thenceforward more especially with ecclesiastical affairs. He ordered that the Jubilee should be observed once every thirty-three years, and that its next celebration should take place in 1390. He also introduced the Feast of the Visitation of Mary, and decreed that divine worship might be celebrated on Corpus Christi Day, even during the enforcement of an interdict. He died Oct. 15, 1389, as many supposed, of poison. See Mansi, p. 609; Gieseler, p. 132 sq.; Herzog, *Real-Encyklop.* s. v.

Urban VII, of Genoese extraction, though born at Rome, was previously named *John Baptist Castagna*. He was archbishop of Rossano, member of the Council of Trent, repeatedly a legate to Germany and Spain, and, finally, a cardinal. He was elected to the papacy as the successor of Sixtus V, but died twelve days after the election, and before his consecration, Sept. 27, 1590. See Ranke, *Die röm. Päpste*, etc. (Berl. 1836), ii, 219 sq.; Herzog, *Real-Encyklop.* s. v.

Urban VIII, pope from 1623 to 1644, was a native of Florence named *Maffeo Barberini*, and a pupil of the Jesuits. He developed a fondness for poetry, and entered the service of the curia, in which he filled many positions of great importance. His most influential work was perhaps the promotion of the restoration of the Jesuits to France. After he had become cardinal-priest and archbishop of Spoleto, he was elected to succeed Gregory XV in the pontificate, Aug. 6, 1623. His tastes were altogether those of an Italian secular prince, and he gave attention chiefly to the erection of fortifications, the enlisting of soldiers, the collecting of arms, etc. Amid the complications of the time, he at first supported the interests of France against Austria and Spain, and, in connection with Richelieu, was led even to the cultivation of relations with Protestants, so that he was not in sympathy with the Jesuitical method of enforcing the Edict of Restoration of 1629 in Germany, and directed his legate to the Diet of Ratisbon in 1630 to oppose the wishes of Austria. Complaints against this tendency were naturally raised by the Catholic princes and clergy, and found expression in the assembled Consistory itself. A number of cardinals even harbored the idea of convoking a council in opposition to the pope. In 1631 he inherited the duchy of Urbino, but thereby became involved in difficulties with the duke of Parma and his allies. His nepotism also contributed towards the troubles of his pontificate. Despite his dislike of the governments which were most zealously devoted to the interests of Rome, Urban was an unwavering defender of the traditional theory of the papacy within the Church itself. He gave effect to the canonization of the founders of the orders of Jesuits and Oratorians; beatified Francis Borgia and others; added the Collegium de Propaganda Fide (also Collegium Urbanum) to the Congregatio de Fide Cathol. Propaganda; gave to the bull *In Cena Domini* its present shape; abolished the order of female Jesuits; caused the publication of a new edition of the Breviary; condemned Galileo and his teachings; and in the bull *De Eminentissimi* declared himself against Jansen (q. v.). He forbade the clergy to use snuff in church on pain of excommunication. Urban was not, upon the whole, illiterate. His poems consist in part of paraphrases of Psalms and passages of the Old and New Tests, in Horatian measures, and in part of hymns on the Virgin and different saints. They were published in Antwerp, 1634; Paris, 1642; Oxford, 1726. He was also the author of *Epigrams* which were published with comments by Dornulius (Rome, 1643). Urban died July 29, 1644. See Simonin, *Sylvæ Urbanianæ s. Gesta Urbani* (Antw. 1637); Ranke, *Die röm. Päpste* (Appendix), iii, 408 sq.

433 sq.; Gieseler, *Lehrb. d. Kirchengesch.* (Bonn, 1855), iii, 2, 592; Herzog, *Real-Encyklop.* s. v.

Ur'bane [some *Ur'banè*, others *Urba'nè*] or rather **URBAN** (*Ὀὐρβανός*, Græcized from the Lat. *Urbanus*, i. e. of the city, or urban), a Christian at Rome saluted by Paul as having been his associate in labor (*τὸν συνεργὸν ἡμῶν ἐν Χριστῷ*) in the list of those addressed (Rom. xvi, 9). A. D. 55.

Urbanenses, one of the numerous small sects of the Donatists in Numidia, mentioned by Augustine (*Crescon.* iv, 70).

Urbanis, GIULIO, an Italian painter, of San Daniel-lo, studied with Pomponio Amalteo, and followed his manner. Lauzi mentions a fresco by him at San Daniello representing the *Virgin with the Infant Christ*, seated upon a throne, surrounded by Thomas the apostle, Valentine, and other saints, signed "Opus Julii Urbanis 1574." See Spooner, *Biog. Hist. of Fine Arts*, s. v.

Urbino, SALOMON BEN-ABRAHAM, a Jewish writer who flourished in 1480, is the author of a lexicon on the synonyms of the Old Test., entitled *אוֹרְבִּין*, *The Tabernacle of the Congregation*, in allusion to Exod. xxxiii, 7, "because therein are congregated expressions which differ in sound, but are like in sense" (*כִּצְד הַיּוֹרֵב כִּית*). The synonyms are divided into groups, the alphabetical order of which is determined by its most important word. Each group commences with the formula *לְהַזְכִּיר* (to teach, being made up from the abbreviation of the title of the work, viz. *הַזְכִּיר*), and is illustrated by quotations from the Old Test. and the corresponding passages from the Targum, as well as by quotations from Saadia Gaon's Arabic translation of the Pentateuch, the works of Dunash ibn-Librat. Hai Gaon, Ibn-Ganach, Ibn-Giath, Nathan ben-Jechiel, Ibn-Balaam, Nachmanides, Ibn-Saruk, etc. The lexicon was published at Venice in 1548, and is now very rare. See First, *Bibl. Jud.* iii, 461; De' Rossi, *Dizionario Storico*, p. 323 (Germ. transl.); Steinschneider, *Catalogus Libr. Hebr. in Bibl. Bodl.* p. 2391; Kitto, *Cyclop.* s. v.; Geiger, in *Zeitschrift für deutsch. morgenl. Gesellsch.* (Leips. 1863), xvii, 321; Wolf, *Bibl. Hebr.* i, 1037, etc. (B. P.)

Urbs Beata Hierusalem. This rugged but fine old hymn, composed in *dedicatione ecclesiæ*, and of which the author is not known, belongs to the 8th or 9th century. Trench calls it "a hymn of degrees ascending from things earthly to things heavenly, and making the first to be interpreters of the last." The prevailing intention in the building and the dedication of a church, with the rites thereto appertaining, was to carry up men's thoughts from that temple built with hands, which they saw, to that other built of living stones in heaven, of which this was but a weak shadow." This fine hymn, the first lines of which run thus,

"Urbs beata Hierusalem, dicta paucis visio,
Que constituit in cælis vivis ex lapidibus,
Et ab angelis ornata, velut sponsa nobilis:
Nova veniens e cælo, nuptiali thalamo
Præparata, ut sponsata copuletur Domino;
Plateæ et muri ejus ex auro purissimo;

has proved the source of manifold inspiration in circles beyond its own. To it we owe the

"Jerusalem, my happy home;"

or the same in a less common but still more beautiful form,

"O mother, dear Jerusalem!"

It has also inspired some of the singers of Protestant Germany. In the German language we have two noble hymns which at least had their first motive here. The one is that by Meyfahrt,

"Jerusalem, du hochgebaute Stadt;"

the other by Kosegarten,

"Stadt Gottes, deren diamant'nen Ring."

In English our hymn is found in *Lyra Mystica* (Lond. 1869), p. 409:

"Blessed city, holy Salem,
Home of peace, by seers desiered;
Rising in the courts of heaven,
Built of living stones and tried;
By angelic hands adorned,
As her fellows deck a bride.
Coming newly formed from heaven,
Ready for the nuptial bower,
Wedded to the Lamb forever,
As a bride in blissful hour.
All her streets have golden pavement,
Golden ramparts round her tower," etc.

Our hymn has been translated into German by Schlosser, Simrock, Rambach, and others. The original is given by Trench, *Sacred Latin Poetry*, p. 311; Büssler, *Auswahl altchristlicher Lieder*, p. 201; Rambach, *Anthologie christl. Gesänge*, p. 179; Simrock, *Lauda Sion*, p. 322. (B. P.)

Urd, in Norse mythology, was the destiny of the past, who, with her two sisters, Waranda and Skuld, sits under the tree Ygdrasil, where they daily receive advice.

Urdaborn, in Norse mythology, is the spring of the past, at which the three deities sit; from which clear spring they daily draw for themselves new wisdom, and with whose waters they moisten the roots of the tree Ygdrasil.

Urgel, COUNCIL OF. Seo de Urgel is a city of Spain on a plain among the Pyrenees, containing an ancient cathedral and other ecclesiastical buildings. A council was held here in 799 by Leidrade, archbishop of Lyons, whom Charlemagne had sent, together with Ne-tridius of Narbonne, the abbot Benedict, and several other bishops and abbots, to Felix, bishop of Urgel. They succeeded in persuading him to present himself to the king, promising him full liberty to produce in his presence those passages from the fathers which he believed to favor his notions.—Landon, *Manual of Councils*, s. v.

Urg hier, in Thibetan mythology, is one of the supreme deities of the Lamaïtes, generated from a flower.

Urgiaffa, in Norse mythology, was one of the nine giant maidens who were mothers of Heimdal.

U'ri (Heb. *Uri'*, *יְרִי*, *fiery* [comp. *Φωτῶς*]), the name of three Israelites.

1. (Sept. *Ὀὐρί* or *Ὀὐρίας*.) The father of Bezaleel, one of the architects of the tabernacle (Exod. xxxi, 2; xxxv, 30; xxxviii, 22; 1 Chron. ii, 20; 2 Chron. i, 5). B.C. ante 1657. He was of the tribe of Judah, and grandson of Caleb ben-Hezron, his father being Hur, who, according to tradition, was the husband of Miriam.

2. (Sept. *ʿAdai*.) The father of Geber, Solomon's commissariat officer in Gilead (1 Kings iv, 19). B.C. ante 1010.

3. (Sept. *Ῥούβ* v. r. *Ῥούβι*.) One of the gate-keepers of the Temple, who divorced his wife after the exile (Ezra x, 24). B.C. 458.

Uri'ah (Heb. *Uriyah'*, *יְרִיָּה*, *light* [or *fire*] of *Jehorah*; occasionally [in Jer. only] in the prolonged form *Uriyah'hu*, *יְרִיָּהּ*; Sept. usually *Ὀὐρίας*, and so the New Test. and Josephus; A. V. in some cases "Urijah" [q. v.]), the name of several Hebrews.

1. The last named of the principal thirty warriors of David's army (1 Chron. xi, 41; 2 Sam. xxiii, 39). Like others of David's officers (Ittai of Gath; Ishbosheth the Canaanite, 2 Sam. xxiii, 8, Sept.; Zelek the Ammonite, 2 Sam. xxiii, 37), he was a foreigner—a Hittite. His name, however, and his manner of speech (xi, 11) indicate that he had adopted the Jewish religion. He married Bathsheba, a woman of extraordinary beauty, the daughter of Eliam—possibly the same as the son of Abithophel, and one of his brother officers (xxiii, 34); and hence, perhaps, as professor Blunt conjectures (*Coincidences*, II, x), Uriah's first acquaintance with Bathsheba. It may be inferred from Nathan's parable (2

Sam. xii, 3) that he was passionately devoted to his wife, and that their union was celebrated in Jerusalem as one of peculiar tenderness. He had a house at Jerusalem underneath the palace (xi, 2). In the first war with Ammon (B.C. 1035) he followed Joab to the siege, and with him remained encamped in the open field (ver. 11). He returned to Jerusalem, at an order from the king, on the pretext of asking news of the war—really in the hope that his return to his wife might cover the shame of David's crime. The king met with an unexpected obstacle in the austere, soldier-like spirit which guided all Uriah's conduct, and which gives us a high notion of the character and discipline of David's officers. He steadily refused to go home, or partake of any of the indulgences of domestic life, while the ark and the host were in booths and his comrades lying in the open air. He partook of the royal hospitality, but slept always at the gate of the palace till the last night, when the king at a feast vainly endeavored to entrap him by intoxication. The soldier was overcome by the debauch, but still retained his sense of duty sufficiently to insist on sleeping at the palace. On the morning of the third day, David sent him back to the camp with a letter (as in the story of Bellerophon) containing the command to Joab to cause his destruction in the battle. Josephus (*Ant.* vii, 7, 1) adds that he gave as a reason an imaginary offence of Uriah. None such appears in the actual letter. Probably to an unscrupulous soldier like Joab the absolute will of the king was sufficient. The device of Joab was to observe the part of the wall of Rabbath-Ammon where the greatest force of the besieged was congregated, and thither, as a kind of forlorn-hope, to send Uriah. A sally took place. Uriah and the officers with him advanced as far as the gate of the city, and were there shot down by the archers on the wall. It seems as if it had been an established maxim of Israelitish warfare not to approach the wall of a besieged city; and one instance of the fatal result was always quoted, as if proverbially, against it—the sudden and ignominious death of Abimelech at Thebez, which cut short the hopes of the then rising monarchy. This appears from the fact (as given in the Sept.) that Joab exactly anticipates what the king will say when he hears of the disaster. Just as Joab had forewarned the messenger, the king broke into a furious passion on hearing of the loss, and cited, almost in the very words which Joab had predicted, the case of Abimelech. (The only variation is the omission of the name of the grandfather of Abimelech, which, in the Sept., is Ner instead of Joash.) The messenger, as instructed by Joab, calmly continued, and ended the story with the words "Thy servant also, Uriah the Hittite, is dead." In a moment David's anger is appeased. He sends an encouraging message to Joab on the unavoidable chances of war, and urges him to continue the siege. It is one of the touching parts of the story that Uriah falls unconscious of his wife's dishonor. She hears of her husband's death. The narrative gives no hint as to her shame or remorse. She "mourned" with the usual signs of grief as a widow, and then became the wife of David (2 Sam. xi, 27).—Smith. See DAVID.

2. A priest during the reign of Ahaz (B.C. cir. 738), whom Isaiah took as a witness to his prophecy concerning Maher-shalal-hash-baz, with Zechariah, the son of Jeberchiah (Isa. viii, 2). He is probably the same as Urijah the priest, who built the altar for Ahaz (2 Kings xvi, 10). If this be so, the prophet summoned him as a witness probably on account of his official position, not on account of his personal qualities; though, as the incident occurred at the beginning of the reign of Ahaz, Uriah's irreligious subservency may not yet have manifested itself. When Ahaz, after his deliverance from Rezin and Pekah by Tiglath-pileser, went to wait upon his new master at Damascus, he saw there an altar which pleased him, and sent the pattern of it to Uriah at Jerusalem, with orders to have one made like it against the king's return. Uriah zealously executed

the idolatrous command, and when Ahaz returned, not only allowed him to offer sacrifices upon it, but basely complied with all his impious directions. The new altar was accordingly set in the court of the Temple, to the east of where the brazen altar used to stand; and the daily sacrifices, and the burnt-offerings of the king and people, were offered upon it; while the brazen altar, having been removed from its place and set to the north of the Syrian altar, was reserved as a private altar for the king to inquire by. It is likely, too, that Uriah's compliances did not end here, but that he was a consenting party to the other idolatrous and sacrilegious acts of Ahaz (see 2 Kings xvi, 17, 18; xxiii, 5, 11, 12; 2 Chron. xxviii, 23-25).—Smith.

Uriah or Urijah was apparently the high-priest at the time, but of his parentage we know nothing positive. He probably succeeded Azariah, who was high-priest in the reign of Uzziah (or else Amariah III, otherwise called Jothan), and was succeeded by that Azariah who was high-priest in the reign of Hezekiah. Hence it is probable that he was son of the former and father of the latter, it being by no means uncommon among the Hebrews, as among the Greeks, for the grandchild to have the grandfather's name. Probably, too, he may have been descended from that Azariah who must have been high-priest in the reign of Asa. But he has no record in the sacerdotal genealogy (1 Chron. vi, 4-15), in which there is a great gap between Amariah in ver. 11, and Shallum, the father of Hilkiah, in ver. 13. Josephus, however, says that he was the son of Jothan and the father of Neriah (*Ant.* x, 8, 6). See HIGH-PRIEST.

3. Urijah the son of Shemaiah of Kirjath-jearim; he prophesied in the days of Jehoiakim concerning the land and the city, just as Jeremiah had done, and the king sought to put him to death; but he escaped, and fled into Egypt. His retreat was soon discovered: Elnathan and his men brought him up out of Egypt, and Jehoiakim slew him with the sword, and cast his body forth among the graves of the common people (Jer. xxvi, 20-23). B.C. 608. The story of Shemaiah appears to be quoted by the enemies of Jeremiah as a reason for putting him to death; and as a reply to the instance of Micah the Morasthite, which Jeremiah's friends gave as a reason why his words should be listened to and his life spared. Such, at least, is the view adopted by Rashi.—Smith.

4. One of the priests (being of the family of Hakkoz, A. V. "Koz") who stood at Ezra's right hand when he read the law to the people ("Urijah," Neh. viii, 4). B.C. 458. He is probably the same with the father of Meremoth, one of the priests who aided Nehemiah in rebuilding the walls of Jerusalem (Ezra viii, 33; Neh. iii, 4, 21).

Uri'as (Οὐρίας), the Greek form of the name of URIJAH the priest in Ezra's time (1 Esdr. ix, 43; comp. Neh. viii, 4), and of URIAH the husband of Bathsheba (Matt. i, 6).

U'ri'el (Heb. *Uri'el*, אֱלֹהֵי אִיֶּרֶל, *fire* [or *light*] of God; Sept. Οὐριήλ), the name of three Hebrews.

1. A Kohathite Levite, son of Tahath, and father of Uzziah (1 Chron. vi, 24 [9]; apparently the same in Zephaniah (ver. 36). B.C. cir. 1550. See SAMUEL.

2. Chief of the Kohathites of the family of Korah in the reign of David, who assisted, together with one hundred and twenty of his brethren, in bringing up the ark from the house of Obed-edom (1 Chron. xv, 5, 11). B.C. 1043.

3. Uriel of Gibeah was the father of Maachab, or Michaiah, the favorite wife of Rehoboam, and mother of Abijah (2 Chron. xiii, 2). B.C. ante 973. In xi, 20 she is called "Maachab the daughter of Absalom;" and Josephus (*Ant.* viii, 10, 1) explains this by saying that her mother was Tamar, Absalom's daughter. Rashi gives a long note to the effect that Michaiah was called Maachab after the name of her daughter-in-law, the mother of Asa, who was a woman of renown, and that

her father's name was Uriel Abishalom. There is no indication, however, that Absalom, like Solomon, had another name, although in the Targum of R. Joseph on Chronicles it is said that the father of Maachah was called Uriel, that the name of Absalom might not be mentioned.—Smith. See MAACHAH.

4. Uriel is also named in the Apocrypha (2 Esdr. iv, 1, 36; v, 20; x, 28) as an angel or archangel; and in the book of Enoch he is described as "the angel of thunder and lightning" (ch. xx), and as being "placed over all the lights of heaven" (lxxx, 3).

Urii, in Slavonic mythology, was a deity among the Wends, worshipped mainly by magicians as their protector.

Uri'jah (a. 2 Kings xvi, 10, 11, 15, 16; b. Jer. xxvi, 20, 21, 23; c. Neh. iii, 4, 21). See URIAH.

Urim and Thummim (Heb. *Urim ve-Thummim*, **אֲרִימ וְתֻמִּיִּם**), the Anglicized form of two Hebrew words used (always together [except in Numb. xxvii, 21; 1 Sam. xxviii, 6, where the former occurs alone; in Deut. xxxiii, 8, they are in the reverse order] and with the article [except in Ezra ii, 63; Neh. vii, 65]) with reference to some obscure mode of divination in connection with the sacerdotal regalia (Exod. xxviii, 30; Lev. viii, 8), but concerning which both ancient and modern interpreters have greatly differed. (In the following discussion of the subject we use in part the statements found in Kitto and Smith s. v.)

1. *Etymological Import.*—These words are Hebrew plurals, not proper names, but appellatives of frequent occurrence in the singular. They are generally considered to be *plurales excellentiæ*, denoting by a metonymy the things or modes whereby the revelation was given and truth declared.

1. In *Urim*, Hebrew scholars, with hardly an exception, have seen the plural of **אֵר** (*Ur*, light or fire). The Sept., however, appears to have had reasons which led its authors to another rendering than that of *φῶς* or its cognates. They give ἡ ἐγλώσσις (Exod. xxviii, 30; Eccles. xlv, 10), and ἐγλοῖ (Numb. xxvii, 21; Deut. xxxiii, 8; 1 Sam. xxviii, 6); while in Ezra ii, 63, and Neh. vii, 65, we have respectively plural and singular participles of φωτίζω. In Aquila and Theodotion we find the more literal φωτισμοί. The Vulg., following the lead of the Sept., but going further astray, gives *doctrina* in Exod. xxviii, 30 and Deut. xxxiii, 8; omits the word in Numb. xxvii, 21, paraphrases it by *per sacerdotes* in 1 Sam. xxviii, 6, and gives *judicium* in Eccles. xlv, 10, as the rendering of ἐγλώσσις. Luther gives *Licht*. The literal English equivalent would of course be "lights;" but the renderings in the Sept. and Vulg. indicate, at least, a traditional belief among the Jews that the plural form, as in Elohim and other like words, did not involve numerical plurality. Bellarmine, wishing to defend the Vulg. translation, suggested the derivation of Urim from **רָרָה**, "to teach" (Buxtorf, *Diss. de Ur. et Th.*).

2. *Thummim*. Here also there is almost a consensus as to the derivation from **תָּם** (*Töm*, perfection, completeness); but the Sept., as before, uses the closer Greek equivalent τέλειος once (Ezra ii, 63), and adheres elsewhere to ἀλήθεια; and the Vulg., giving *perfectus* there, in like manner gives *veritas* in all other passages. Aquila more accurately chooses τελειώσις. Luther, in his first edition, gave *l'ölligkeit*, but afterwards rested in *Recht*.

What has been said as to the plural of *Urim* applies here also. Bellarmine (*ut sup.*) derives *Thummim* from **יָשָׁן**, to be true. By others it has been derived from **אֶשְׁתָּ**, contr. **אֶתָּ**—"a twin," on the theory that the two groups of gems, six on each side the breastplate, were what constituted the Urim and Thummim (R. Azarias, in Buxtorf, *loc. cit.*). "Light and perfection" would probably be the best English equivalents. The as-

sumption of a hendiadys, so that the two words—"perfect illumination" (Carpzov, *App. Crit.* i, 5; Bähr, *Symbolik*, ii, 135), is unnecessary, and, it is believed, unsound. The mere phrase, as such, leaves it therefore uncertain whether each word by itself denoted many things of a given kind, or whether the two taken together might be referred to two distinct objects, or to one and the same object. The presence of the article **וְ**, and yet more of the demonstrative **אֵלֶּה** before each, is rather in favor of distinctness. Thummim never occurs by itself, unless with Züllig we find it in Psa. xvi, 5.

11. *Scriptural Statements.*—1. The mysterious words meet us for the first time, as if they needed no explanation, in the description of the high-priest's apparel. Over the ephod there is to be a "breastplate of judgment" (**זָבֻחַ הַחֵן**, Sept. λογίον κρίσεως, Vulg. *rationale judicii*), of gold, scarlet, purple, and fine linen, folded square and doubled, a "span" in length and width. In it are to be set four rows of precious stones, each stone with the name of a tribe of Israel engraved on it, that Aaron may "bear them upon his heart." See ΕΡΗΘΙΟΙ. Then comes a further order. Inside the breastplate, as the tables of the covenant were placed inside the ark (the preposition **בֵּין** is used in both cases, Exod. xxv, 16; xxviii, 30), are to be placed "the Urim and the Thummim," the light and the perfection; and they, too, are to be on Aaron's heart when he goes in before the Lord (ver. 15-30). Not a word describes them. They are mentioned as things already familiar both to Moses and the people, connected naturally with the functions of the high-priest, as mediating between Jehovah and his people. The command is fulfilled (Lev. viii, 8). They pass from Aaron to Eleazar with the sacred ephod and other *pontificalia* (Numb. xx, 28). When Joshua is solemnly appointed to succeed the great herolawgiver, he is bidden to stand before Eleazar, the priest, "who shall ask counsel for him after the judgment of [the] Urim," and this counsel is to determine the movements of the host of Israel (xxvii, 21). In the blessings of Moses, they appear as the crowning glory of the tribe of Levi ("thy Thummim and thy Urim are with thy Holy One"), the reward of the zeal which led them to close their eyes to everything but "the law and the covenant" (Deut. xxxiii, 8, 9). Once, and once only, are they mentioned by name in the history of the Judges and the monarchy. Saul, left to his self-chosen darkness, is answered "neither by dreams, nor by [the] Urim, nor by prophet" (1 Sam. xxviii, 6). There is no longer a priest with Urim and Thummim (Sept. τοῖς φωτισμοῖς καὶ τοῖς τελείοις, Ezra ii, 63; ὁ φωτισμὸς, Neh. vii, 65) to answer hard questions. When will one appear again? The son of Sirach copies the Greek names (ἐγλοῖ, ἀλήθεια) in his description of Aaron's garments, but throws no light upon their meaning or their use (Eccles. xlv, 10).

2. Besides these direct statements, there are others in which we may, without violence, trace a reference, if not to both, at least to the Urim. When questions precisely of the nature of those described in Numb. xxvii, 21 are asked by the leader of the people, and answered by Jehovah (Judg. i, 1; xx, 18)—when like questions are asked by Saul of the high-priest Ahiah, "wearing an ephod" (1 Sam. xiv, 3, 18)—by David, as soon as he has with him the presence of a high-priest with his ephod (1 Sam. xxiii, 2, 12; xxx, 7, 8), we may legitimately infer that the treasures which the ephod contained were the conditions and *media* of his answer. The questions are in almost all cases strategical, "Who shall go up for us against the Canaanites first?" (Judg. i, 1; so xx, 18), "Will the men of Keilah deliver me and my men into the hand of Saul?" (1 Sam. xxiii, 12), or, at least, national (2 Sam. xxi, 1). The answer is, in all cases, very brief; but more in form than a simple yes or no. One question only is answered at a time.

3. It deserves notice, before we pass beyond the range

of scriptural data, that, in some cases of deflection from the established religious order, we find the ephod connected not with the Urim, but with the Teraphim, which, in the days of Laban, if not earlier, had been conspicuous in Aramaic worship. Micah, first consecrating one of his own sons, and then getting a Levite as his priest, makes for him "an ephod and teraphim" (Judg. xvii, 5; xviii, 14, 20). Throughout the history of the northern kingdom, their presence at Dan made it a sacred place (ver. 30), and apparently determined Jeroboam's choice of it as a sanctuary. When the prophet Hosea foretells the entire sweeping-away of the system which the ten tribes had cherished, the point of extremest destitution is that "they shall be many days . . . without an ephod, and without teraphim" (Hos. iii, 4), deprived of all counterfeit oracles, in order that they may in the end "return and seek the Lord." It seems natural to infer that the teraphim were, in these instances, the unauthorized substitutes for the Urim. The inference is strengthened by the fact that the Sept. uses here, instead of teraphim, the same word (*ἰδύλωρ*) which it usually gives for Urim. That the teraphim were thus used through the whole history of Israel may be inferred from their frequent occurrence in conjunction with other forms of divination. Thus we have in 1 Sam. xv, 23 "witchcraft" and "teraphim" (A. V. "idolatry"), in 2 Kings xxiii, 24 "familiar spirits," "wizards, and teraphim" (A. V. "images"). The king of Babylon, when he uses divination, consults them (Ezek. xxi, 21). They speak vanity (Zech. x, 2). See THUMMIM.

III. *Theories of Interpreters.*—When the Jewish exiles were met on their return from Babylon by a question which they had no data for answering, they agreed to postpone the settlement of the difficulty till there should rise up "a priest with Urim and Thummim" (Ezra ii, 63; Neh. vii, 63). The inquiry what those Urim and Thummim themselves were seems likely to wait as long for a final and satisfying answer. On every side we meet with confessions of ignorance—"Non constat" (Kimchi), "Nescimus" (Aben-Ezra), "Difficile est invenire" (Augustine), varied only by wild and conflicting conjectures.

1. Among these may be noticed the notion that, as Moses is not directed to *make* the Urim and Thummim, they must have had a supernatural origin, specially created, unlike anything upon earth (R. ben-Nachman and Hottinger in Buxtorf, *Diss. de Ur. et Th.* in Ugolino, xii). It would be profitless to discuss so arbitrary an hypothesis.

2. A favorite view of Jewish and of some Christian writers has been that the Urim and Thummim were identical with the twelve stones on which the names of the tribes of Israel were engraved, and the mode in which an oracle was given was by the illumination, simultaneous or successive, of the letters which were to make up the answer (*Jalkut Sifre, Zohar in Exod.* f. 105; Maimonides, R. ben-Nachman, in Buxtorf, *loc. cit.*; Drusius, in *Crit. Sac.* on Exod. xxviii; Chrysostom, Grotius, *et al.*). Josephus (*Ant.* iii, 7, 5) adopts another form of the same story, and, apparently identifying the Urim and Thummim with the sardonyxes on the shoulders of the ephod, says that they were bright before a victory, or when the sacrifice was acceptable, dark when any disaster was impending. Epiphanius (*De XII Gemm.*) and the writer quoted by Suidas (s. v. *Ἐφοῦδ*) present the same thought in yet another form. A single diamond (*ἀδάμας*) placed in the centre of the breastplate prognosticated peace when it was bright, war when it was red, death when it was dusky. It is conclusive against such views (1) that, without any evidence, without even an analogy, they make unauthorized additions to the miracles of Scripture; (2) that the former identify two things which in Exod. xxviii are clearly distinguished; (3) that the latter makes no distinction between the Urim and the Thummim, such as the repeated article leads us to infer.

3. A theory involving fewer gratuitous assumptions

is that in the middle of the ephod, or within its folds, there was a stone or plate of gold on which was engraved the sacred name of Jehovah, the *Shem-hammephorash* (q. v.) of Jewish Cabalists; and that by virtue of this, fixing his gaze on it, or reading an invocation which was also engraved with the name, or standing in his ephod before the mercy-seat, or at least before the veil of the sanctuary, he became capable of prophesying, hearing the divine voice within, or listening to it as it proceeded, in articulate sounds, from the glory of the Shechinah (Buxtorf, *loc. cit.* 7; Lightfoot, vi, 278; Brauns, *De Vestitu Hebr.* ii; Saalschütz, *Archæolog.* ii, 363). A wilder form of this belief is found in the Cabalistic book *Zohar*. There the Urim is said to have had the divine name in forty-two, the Thummim in seventy-two letters. The notion was probably derived from the Jewish invocations of books like the *Clavicula Salomonis*. See SOLOMON.

Another form of the same thought is found in the statement of Jewish writers that the Holy Spirit spake sometimes by Urim, sometimes by prophecy, sometimes by the Bath-Kol (*Seder Olam*, c. xiv, in Bräunius, *loc. cit.*), or that the whole purpose of the unknown symbols was "ad excitandam prophetiam" (R. Levi ben-Gershon, in Buxtorf, *loc. cit.*; Kimchi, in Spencer, *ut inf.*). A more eccentric form of the "writing" theory was propounded by the elder Carpov, who maintained that the Urim and Thummim were two confessions of faith in the Messiah and the Holy Spirit (Carpov, *App. Crit.* i, 5).

4. Spencer (*De Ur. et Th.*) presents a singular union of acuteness and extravagance. He rightly recognises the distinctness of the two things which others had confounded. Whatever the Urim and Thummim were, they were not the twelve stones, and they were distinguishable one from the other. They were placed inside the folds of the doubled *choshen*. Resting on the facts referred to, he inferred the identity of the Urim and the Teraphim. This was an instance in which the divine wisdom accommodated itself to man's weakness, and allowed the debased superstitious Israelites to retain a fragment of the idolatrous system of their fathers, in order to wean them gradually from the system as a whole. The obnoxious name of Teraphim was dropped. The thing itself was retained. The very name Urim was, he argued, identical in meaning with Teraphim (Urim = "lights, fires;" Seraphim = "the burning, or fiery ones;" and Teraphim is but the same word, with an Aramaic substitution of ט for שׁ). It was therefore a small image probably in human form. So far, the hypothesis has, at least, the merit of being inductive and historical; but when he comes to the question how it was instrumental oracularly, he passes into the most extravagant of all assumptions. The image, when the high-priest questioned it, spoke by the mediation of an angel, with an articulate human voice, just as the Teraphim spoke, in like manner, by the intervention of a demon! In dealing with the Thummim, which he excludes altogether from the oracular functions of the Urim, Spencer adopts the notion of an Egyptian archetype, which will be noticed further on.

5. Michaelis (*Laws of Moses*, v, 52) gives his own opinion that the Urim and Thummim were three stones, on one of which was written Yes, on another No, while the third was left blank or neutral. The three were used as lots, and the high-priest decided according as the one or the other was drawn out. He does not think it worth while to give one iota of evidence; and the notion does not appear to have been more than a passing caprice. It obviously fails to meet the phenomena. Lots were familiar enough among the Israelites (Numb. xxvi, 55; Josh. xiii, 6 sq.; 1 Sam. xiv, 41; Prov. xvi, 33), but the Urim was something solemn and peculiar. In the cases where the Urim was consulted, the answers were always more than a mere negative or affirmative.

6. The conjecture of Züllig (*Comm. in Apoc. Ecc. ii.*), though adopted by Winer (*Reube.*), can hardly be looked on as more satisfying. With him the Urim are bright, i. e. cut and polished, diamonds, in form like dice; the Thumminim perfect, i. e. whole, rough, uncut ones, each class with inscriptions of some kind engraved on it. He supposes a handful of these to have been carried in the pouch of the high-priest's *choshen*, and when he wished for an oracle, to have been taken out by him and thrown on a table, or, more probably, on the ark of the covenant. As they fell, their position, according to traditional rules known only to the high-priestly families, indicated the answer. He compares it with fortune-telling by cards or coffee-grounds. The whole scheme, it need hardly be said, is one of pure invention, at once arbitrary and offensive. It is at least questionable whether the Egyptians had access to diamonds, or knew the art of polishing or engraving them. See DIAMOND. A handful of diamond cubes, large enough to have words or monograms engraved on them, is a thing which has no parallel in Egyptian archaeology, nor, indeed, anywhere else.

7. The latest Jewish interpreter of eminence (Kalisch, on *Exod. xxviii, 31*), combining parts of the views (2) and (3), identifies the Urim and Thumminim with the twelve tribal gems, looks on the name as one to be explained by a hendiadys (light and perfection=perfect illumination), and believes the high-priest, by concentrating his thoughts on the attributes they represented, to have divested himself of all selfishness and prejudice, and so to have passed into a true prophetic state. In what he says on this point there is much that is both beautiful and true. Lightfoot, it may be added, had taken the same view (ii, 407; vi, 278), and that given above in (3) converges to the same result. See TRANSC.

8. Philo, the learned contemporary of Josephus, represents the Urim and Thumminim as two images of the two virtues or powers—*ἐὶλωσιν τε καὶ ἀλήθειαν*. The full quotation is: *Τὸ δὲ λογιόν (the pectoral, or breast-plate); τετραγώνον, ἐπιπλὸν κατεσκημάζον, ὡσανεὶ βάσει, ἵνα οὐ ἀρετὰ ἀγαλματοφορῇ (that they might carry the image of the two powers); ἐὶλωσιν τε καὶ ἀλήθειαν (De Vita Mos. lib. iii. p. 152, t. 2, ed. Mangey).* He also uses the following words (*De Monarch. lib. ii. p. 824; Orp. ii, 226*): *Ἐπὶ τοῦ λογιῶνς ἐπὶ τὰ ὄρασμα κατασκευάσκει, προσαγορεύον τὸ μὲν ἐὶλωσιν, τὸ δ' ἀλήθειαν*. This statement of Philo has been thought by many recent interpreters to be supported by certain external evidence. It had been noticed by all the old commentators that a remarkable resemblance existed between the Urim and Thumminim of the Jewish high-priest and the custom recorded by Elian (*Var. Hist. xiv, 347*) of the Egyptian archjudge, who was always a priest venerable for age, learning, and probity, and who opened judicial proceedings by suspending, by a gold chain hung round his neck (comp. Gen. xli, 42), an image made of a sapphire stone, which was called *Ἀλήθεια*, i. e. "truth," and with which Diosdorus Siculus (i, 48, 75) says he touched (*προσέειπε*) the party who had gained the cause. Certain traces of a similar custom among the Romans had also been adverted to—namely, that among the Vestal Virgins, at least she that was called *Maxima*, and who sat in judgment and tried causes as the Pontifex Maximus did, wore a similar *antepectoral* (Lipsius, *De Festa et Vestalibus Syntagma* [Antv. 1603, ap. Plant.], cap. ult.). But these resemblances among the Egyptians were considered to have been derived by them from the Jews, in consequence of their correspondence with them after Solomon's marriage with Pharaoh's daughter (Patrick, on *Erod. xxviii, 30*). Subsequent discoveries, however, among the antiquities of Egypt lead to the conclusion that these resemblances belong to a much earlier period. Sir G. Wilkinson says the figure of Truth which the Egyptian archjudge suspended from his neck was, in fact, a representation of the goddess who was worshipped under the *dual*, or double, character of Truth and Justice,

Ancient Egyptian Standing Figures of the Goddess of Truth and Justice.

and whose name, Thmei, the Egyptian or Coptic name of Justice or Truth (comp. the Greek *Θέμις*), appears to have been the *origin* of the Hebrew Thumminim—"a word," he remarks, "according to the Sept. translation, implying truth, and bearing a further analogy in its plural termination." He also remarks that the word Thumminim, being a plural or dual word, corresponds to the Egyptian notion of the "two Truths," or the double capacity of this goddess. "This goddess," he says, "frequently occurs in the sculptures in this double capacity, represented by two figures exactly similar," as in the

Ancient Egyptian Sitting Figure of the Goddess of Truth and Justice.

above cut. "It is," he adds, "further observable that the chief-priest of the Jews, who, before the election of a king, was also the judge of the nation, was alone entitled to wear this honorary badge. Does the touch of the successful litigant with the figure, by the Egyptian arch-judge, afford any illustration of such passages as Isa. vi, 7; Jer. i, 9; Esth. v, 2, or of those numerous instances in which touching is represented as the emblem or means of miraculous virtue?" Our authority for these Egyptian antiquities adds that the ancient (Sept.) interpretation of the Urim and Thumminim, as signifying "light and truth," presents a striking analogy to the two figures of *Ré, the sun*, and *Thmei, truth*, in the breastplate worn by the Egyptians. Here Thmei is represented, as she frequently is, by a single figure wearing two ostrich feathers, her emblem, because all the wing-feathers of this bird were considered of equal length, and hence meant true or correct" (*Anc. Egypt. [Lond. 1842], ii, 27, etc.; v, 28, etc.* See also other remarks on the dual offices of Thmei, in *Gallery of Antiquities*, selected from the British Museum by F. Arundale and J. Bonomi). Upon a view of the preceding facts, even so orthodox an antiquarian as Hengstenberg (*Egypt and the Book of Moses*, ch. vi) adopts Mr. Mede's opinion,

Figures on Egyptian Breast-plates.

that the Urim and Thummim were "things well known to the patriarchs," as divinely appointed means of inquiring of the Lord (Gen. xxv. 22, 23), suited to an infantine state of religion; that the originals were preserved, or the real use at least, among the Abrahamides, and, at the reformation under Moses, were simply recognised; that the resemblances to them among the Egyptians were but imitations of this primal mode of divine communication, as were the heathen auspices of similar means originally connected with the sacrifice of animals.

In opposition to this view of a direct Egyptian origin of the objects in question, it has been forcibly urged (1) that the words *Urim and Thummim* do not, in fact, mean *Truth and Justice*; (2) that, with the exception of the single and undistinctive use of the term "judgment" (שֹׁפֵט) in connection with the *choshen*, or pontifical pectorale, there is no *magisterial* function of the high-priest in the cases of consultation, like that of the Egyptian archjudge; and (3) that, if such an image were intended, it is strange that no description is given to identify it, nor any prescription made as to its form or structure in the Mosaic account, as there is of all the other articles of the priestly regalia (see Keil, *Commentary*, ad loc.).

IV. *Oracular Use*.—The process of consulting the Lord by Urim and Thummim, and the form in which the answer was returned, are not explained in Scripture, and all we can say on the subject is from Rabbinical tradition. The rabbins say that the manner of inquiring was as follows: the priest put on his robes, and went (not into the sanctuary, where he could go but once a year), but into the sanctum, or holy place, and stood before the curtain or veil that divided the sanctuary from the sanctum. There he stood upright, facing towards the ark of the covenant, and behind him stood the person for whom he inquired, in a right line with the priest, facing the back of the latter, but *outside* the sanctum. Then the priest inquired of God concerning the matter required, in a low voice, like one praying half audibly, and, keeping his eyes upon the breastplate, he received by Urim and Thummim the answer to his question. Maimonides says it was not lawful to inquire by this mode for private individuals, but only for the king, or for him on whom the affairs of the congregation lay.

With respect to the mode in which the answer was returned, Prideaux, and some other Christian commentators, think that when the high-priest inquired of the Lord, standing in his robes before the veil, that an audible answer was returned from within. But the rabbins say that the answer was given by certain letters engraved on the stones in the breastplate becoming peculiarly, prominently lustrous, in proper order, so as to be read by the high-priest into words. For instance, when David inquired of God whether he should go up to one of the cities of Judah (2 Sam. ii. 1), the answer was, "Go up," אלה, *alah*; the letters א, ב, and ג became in order prominently lustrous, and thus formed the word. These explanations evidently depend upon the Talmudic theories above recited as to the form and nature of the objects themselves. See DIVINATION.

V. *Typical Significance*.—The office of the high-priest and his dress, as well as the tabernacle and its furniture and service, were all typical of the Christian dispensation, or of the office and person of Christ; in whom, also, the Urim and Thummim, as well as the other types and foreshadowings, were fulfilled. He was Light, Perfection, Manifestation, and Truth. He was the "true Light, that lighteth every man that cometh into the world" (John i. 9). "Being made perfect, he became the Author of salvation to all that obey him" (Heb. v. 9). He was "God manifest in the flesh" (1 Tim. iii. 16). He was "the Way, the Truth, and the Life" (John xiv. 6), and he "came to bear witness to the Truth" (xviii.

37). By Urim and Thummim a measure of the Holy Ghost was granted to the Jewish high-priest; Christ is a high-priest in whom are all the gifts of the Holy Ghost without measure (iii. 34). "He put on righteousness as a breastplate" (Isa. lix. 19); and by his merits and intercession as our continual High-priest, he has given to us to "put on the breastplate of faith and love" (1 Thess. v. 8). Some have seen the Urim and Thummim the object alluded to by John as "the white stone" (φύρος λευκῆ) of the Christian mysteries (Rev. ii. 17). See TYPE.

VI. *Literature*.—In addition to the works cited above, and those referred to by Winer (*Realwörterb.* s. v.) and by Darling (*Cyclop. Bibliograph.* col. 231 sq.), there are monographs on this subject in Latin by Calov (Viteb. 1675), Wolf (Lips. 1740), Schröder (Marb. 1741), and Stiebriz (Hal. 1753); and in German by Bellermann (Berl. 1824) and Saalschütz (Königsb. 1849). See HIGH-PRIEST.

URIUS, in Greek mythology, was a surname of *Jupiter*, who sends good winds to those at sea.

URIYA (or ORISSA) Version. Uriya, the vernacular dialect of Orissa (q. v.), is a tolerably pure dialect of the Sanscrit, possessing some Persian and Arabic terms, borrowed through the medium of the Hindustani, with others of doubtful origin. It is closely connected with Bengali, but greatly differing in pronunciation, for an effeminate style of articulation is prevalent in Bengal, while the inhabitants of Orissa have a broad and almost rustic accent. The Uriya has also a written character peculiar to itself.

The first version of the Scriptures in this dialect was commenced by the Serampore missionaries in 1803, and an edition consisting of one thousand copies of the New Test. was printed in 1811. The first edition of the Old Test., also consisting of one thousand copies, was printed in 1819. The New Test. was soon exhausted, and a second edition of four thousand copies left the press in 1822, in the same year in which a mission by the General Baptist Society was established at Cuttack, the capital of Orissa. In 1832 a second edition of the Old Test. left the press, together with a separate edition of the Psalms. In 1838 the Rev. Messrs. Sutton and Noyes undertook a new version of the Scriptures in Uriya. Dr. Sutton commenced with the book of Genesis, and when the translation was completed he carried on both the printing and binding at Cuttack. An edition of the Old Test. he completed for the Bible Society in 1844. In 1854 an edition of two thousand copies of the Gospel of St. Luke, from Dr. Sutton's version, was issued from the Cuttack press at the instance of the Bible Society. In the *Report* for 1863 we read that the New Test. has been revised, but the Old Test. has been reprinted as before. Whether Dr. Sutton completed his version or not we are unable to state. The only notice we find again concerning the Uriya version since 1863 is the statement made in the *Annual Report* of the British and Foreign Bible Society for the year 1873 that "the Rev. Dr. Buckley has completed the printing of a revised version of the Old Test. at the society's expense." From the *Report* for the year 1879 we see that up to March 31, 1879, the British and Foreign Bible Society had disposed of 4000 Bibles and Old Tests., 34,000 copies of portions of the Old Test., and 2000 copies of portions of the New Test., or altogether of 40,000 copies, in part or in whole, of the Uriya version. (B. P.)

URLSPERGER, JOHANN AUGUST, a German theologian and controversialist, was born Nov. 25, 1728, and during most of his public life was pastor and senior at Augsburg. He was possessed of great learning and penetration, and was a fearless and earnest thinker. He was also a foremost champion of evangelical truth against the attacks of the philosophical and rationalizing neologies of his country, and contributed several trenchant works to the literature of that controversy,

among them, *Versuche einer genauen Bestimmung des Geheimnisses Gottes* (1769-74, 4 pts. 4to):—*Kurzgefasstes System der Dreieinigkeitslehre:—Traktat vom göttlichen Ebenbilde*. He founded the "Deutsche Christenthums-Gesellschaft" (German Society for Christianity), the idea for which he took from the British Society for Promoting Christian Knowledge (founded 1698) and the Swedish society "De Fide et Christianismo." The society was first established in Basle, but failed to undertake the work for which Urlsperger had called it into being—the advocacy and defence of pure doctrine—and devoted its efforts rather to the promotion of true piety. Though disappointed, Urlsperger gave his services repeatedly to the society, and continued to travel over the Continent and to England in its behalf, until he died at Hamburg, Dec. 1, 1806. See Herzog, *Real-Encyklop.* s. v.; but comp. Smith's Hagenbach, *Hist. of Doctrines*, § 295, p. 3.

Urlsperger, Samuel, a Protestant divine of Germany, father of the preceding, was born Aug. 31, 1685, at Kirchheim, in Württemberg. He belonged to a Hungarian Protestant family, which with many others was obliged to leave the country during the Thirty Years' War. He studied at Tübingen, where he publicly spoke on *Ratio et fides collata contra Zuckium et Poirerum*. He continued his studies at Erlangen from 1708, and after a short stay at Jena and Halle, he went to Leyden, Utrecht, London, Oxford, and Cambridge. After his return to Germany, he was appointed pastor in 1713 at Stettin. In 1714 he went to Stuttgart as court preacher and member of consistory. Deposed from his office in 1718, he was appointed in 1720 superintendent at Herrenburg, and three years later he was called to Augsburg, where he died, April 21, 1772. Besides a number of sermons, he published, *Ausführliche Nachricht von den salzburgischen Emigranten, die sich in Amerika niedergelassen haben* (Halle, 1735-52, 3 vols.):—*Amerikanisches Ackerwerk Gottes oder zuverlässige Nachrichten von dem Zustande der von den salzburgischen Emigranten erbauten Stadt Eben-Ezer* (ibid. 1754-66). See Döring, *Gedhrte Theologen Deutschlands*, iv, 559 sq.; Koch, *Gesch. des deutschen Kirchenlieds*, v, 71 sq. (B. P.)

Urquhart, John, a graduate of the University of St. Andrew's, Scotland, and a youth of singular promise and piety, was born in Perth, June 7, 1808. In April, 1824, he made a decided profession of piety, and consecrated his powers entirely to the service of his Redeemer. He left the university in 1826 with the reputation of being by far the most eminent of his class, although then but seventeen years of age. He decided to become a missionary to the heathen, but, on account of his youth, was induced to wait a while before entering upon the arduous duties of that station. He died Jan. 10, 1827, at the age of eighteen. See his *Memoirs, Letters, and Select Remains*, by Orme.

Urquhart, John F., a minister in the Methodist Episcopal Church, South, was born in Montgomery County, Ala., Sept. 15, 1811. He experienced religion when about nine years old, moved with his parents to Florida in 1852, joined the Florida Conference in 1860, and labored in it faithfully until his death, Aug. 19, 1864. Mr. Urquhart was a young man of lively spirit, refined and elevated by grace, and very promising. See *Minutes of Annual Conferences of the M. E. Church, South*, 1864, p. 522.

Ursacius, bishop of Lugidunum, in Mœsia, during the 4th century, is noted as being a disciple of Arius, and one of the prominent leaders of the Arian court-party. See Neander, *Hist. of the Church*, ii, 404 sq.

Ursicinus, antipope, was a deacon of Rome, and claimed the election as successor of Tiberius over Damasus (q. v.), who was elected (A.D. 366) by a larger party of the clergy and the Roman people, and was recognised by the emperor Valentinian I. After a pro-

tracted conflict, Ursicinus was driven out of Italy, and went to Cologne. He returned to Italy in 381, and renewed the agitation, but was finally banished by the Council of Aquileia. He is not included in the lists of popes. See Herzog, *Real-Encyklop.* s. v.

Ursins (*Orsini*), the name of a French family eminent, from the 15th century, for its services in State and Church and historical literature. Two of them are appropriate here.

1. **JACQUES JOUVENEL DES**, brother of the succeeding, was born in Paris, Oct. 14, 1410, and became successively archdeacon of the Cathedral of Paris (1441) and archbishop of Rheims (Sept. 25, 1444); but in 1449 he resigned the latter position in favor of his brother, receiving the two dioceses of Poitiers and Fréjus. He died at Poitiers, March 12, 1457. He was occupied in several political and ecclesiastical negotiations of the time.

2. **JEAN JUVÉNAL** (or *Jouvenel des*), Jr., a prelate and historian, was born in Paris, Nov. 23, 1388, and, after studying at Orleans and Paris, became *doctor in utroque jure*, and enjoyed some minor offices; but was driven into exile with his parents in 1418. In 1425 he returned as advocate-general under Charles VII, and soon rose through lower ecclesiastical positions to the bishopric of Beauvais (1431). In 1444 he was transferred to the see of Laon, and in 1449 he became archbishop of Rheims, where he died, July 14, 1473. He was engaged in several diplomatic embassies, and wrote a number of ecclesiastical works, for which see Hoefer, *Nouv. Biog. Générale*, s. v.

Ursinus, Johann Heinrich, a Protestant theologian of Germany, was born at Spire, Jan. 26, 1608, and died at Ratisbon, May 14, 1667, where he had been superintendent since 1655. He is the author of *Analectorum Sacrorum Libri Duodecim* (Frankf. 1668-70, 2 vols.):—*Compendium Histor. de Ecclesiis Germanicar. Origine et Progressu ab Adscensione Domini usque ad Carolum Magnum* (Nurem. 1664):—*Ecclesiastes sire de Sacris Concioniibus* (Frankf. 1659):—*Sacrar. Concionum juxta Diversas Tractandi Methodos Paradigmata* (ibid. eod.). See Winer, *Handb. der theol. Literatur*, i, 30, 778; ii, 58; Fürst, *Bibl. Jud.* iii, 462 (B. P.)

Ursinus (BEER), **Zacharias**, a German theologian of the 16th century, the friend and pupil of Melancthon, the friend of Calvin and Peter Martyr, and one of the two authors of the *Heidelberg Catechism*, was born at Breslau, July 18, 1534. He accompanied Melancthon to the religious colloquy of Worms in August, 1557; afterwards visited Calvin at Geneva; and, finally, went to Paris, where he studied Hebrew under Jean Mercier. On his return he was called to the service of his native city, and became fourth professor of the *Collegia Primi Ordinis* in September, 1558; but the mildness of his views respecting the eucharist having excited controversy, he solicited a release from that office, which was granted April 26, 1560. In this dispute he wrote the *Theses de Sacramentis* (in *Tract. Theol.* an. 1584, p. 339-382). He went to Zurich, and became the companion and pupil of Peter Martyr, with the result that he discovered himself to be no Lutheran, and not even a mere Philipist, but altogether a supporter of the views of Calvin, Beza, and Peter Martyr.

Ursinus was soon afterwards called to the *Collegium Sapientie* in Heidelberg, and to its duties afterwards added the chair of dogmatics. He began his theological prelections Sept. 1, 1562, and in the following year undertook also the delivery of the Sunday-afternoon sermon on the catechism. To these various duties he added the formation of a constitution for the churches of the Palatinate, in which he was aided by Olevian, but whose defence devolved on him alone. It was in the prosecution of this work that he began his active literary life. He wrote a *Verantwoortung* against criticisms and perversions of the *Heidelberg Catechism*, which

formed the principal element in the new constitution; an *Antwort auf etlicher Theologen Censur*, and other works. When the Maulbronn Convention grew out of these discussions [see MAULBRONN], Ursinus was one of the collectors for the Palatinate, and demonstrated by his readiness and keenness that he was one of the ablest disputants of the time. The Würtembergers having violated the agreement to refrain from publishing the proceedings, the Heidelbergers were obliged to respond; and the duty of correcting the perversions which had gone out before the public devolved again on Ursinus. From this time onward he was involved in the controversy about the correct interpretation of Art. x of the *Augsburg Confession*, in which the strict Lutherans insisted that Luther's writings, especially his polemical writings, should be considered the only guide, and endeavored to deprive all who did not hold their view of the legal standing assured to those who accepted the *Confession* as a statement of their faith. Weary of the endless dispute, Ursinus closed his share in the controversy in 1566, with the determination to write no more. He was worn out. His health was impaired, and he was obliged to seek relief from excessive labors by resigning the chair of dogmatics to Hieronymus Zanchius, Feb. 10, 1568. A few months later, however, a new conflict demanded his attention. George Withers, an Englishman, had defended in a disputation at Heidelberg the thesis that the administration of ecclesiastical discipline in all its extent belongs properly to the ecclesiastical ministerium in connection with an organized presbytery; and Olevian had endorsed that opinion, while Erastus opposed it. Each side gained adherents without being able to intimidate its opponents. Beza and Bullinger were called on for advice, and, eventually, Ursinus was required by the elector to state his views. He did this in 1569, in so candid and kindly a manner as to win approval even from those who did not accept his conclusions. The elector finally decreed the erection of presbyteries and the execution of discipline.

The accession of the elector Louis inaugurated a new order of things in the Palatinate, under which Lutheranism was able to regain its predominance. The *Collegium Sapientie* was closed in September, 1577, and Ursinus was dismissed from his post. A professorship in Lausanne was at once offered him, but he declined it, and accepted, instead, a call to Neustadt, where the theology of the Reformed Church found a refuge in the *Collegium Illustre Casimirianum*. He had previously published, in Latin and German, the confession of faith appended to the late elector's will (1577), and was soon afterwards commissioned, in connection with Zanchius, to draw up for the Frankfort Synod (September, 1578) a confession which should be accepted in the Reformed churches of all European countries. This office he declined on the grounds of ill-health and distrust of his ability. He began his lectures on Isaiah May 26, 1578, and subsequently participated in the conflict over the acceptance of the *Formula Concordie*, having contributed the most powerful argument in opposition to that measure. He died March 6, 1583, at Neustadt. His literary remains were intrusted to Prof. Jungnitz, and he, with other friends of the departed scholar, collected and published many works which, until then, existed only in MS., and gave the author's name to others which had previously been anonymously published. The *Heidelberg Catechism*, with notes, and *Lectures on the Origin of Aristotle*, etc., were published at Neustadt. Pareus, at a later day, issued a corrected edition of the *Exposition of the Catechism* (Brem. 1623, 8vo); and a complete edition of Ursinus's works was issued by Reuter, his pupil and immediate successor in the *Sapientia*.

Urstier, in Chinese and Persian mythology. There is said to be erected in China, at Miako, in a large pagoda, a statue of a bull entirely of gold. If the reports of the Holland expeditions are true, it is marvellous what a similarity there is in the fable of this bull and that worshipped by the Persians and Egyptians. He is represented as in the act of springing, with the intention of breaking an egg that lies swimming in the water close by a rock. The Chinese, Egyptians, and Persians agree in saying that in this egg the world lay hidden. This egg was swimming about the water until a rock appeared in the water, against which it leaned itself. Then the Urstier came, cracked the shell with his horns, and from this egg there sprang the world and all that is in the world, and the breath of the bull gave man life. —Vollmer, *Wörterb. d. Mythol.* s. v.

Ursula (St.) and *The Eleven Thousand Virgins*. The legend states that Ursula was the daughter of Theonotus, or Diogenetus, of Britain. She was demanded in marriage by a heathen prince named Holofernes, and consented to his demand on condition that he should become a Christian and allow her three years before the marriage in which to make a pilgrimage. He conformed to her will, and, with his religion, changed his name into Ethernus; and she took ship with eleven thousand virgins. They went first to the port of Tila, in Gaul, and thence up the Rhine to Cologne and Basle, afterwards continuing the pilgrimage by land as far as Rome. When they returned, pope Cyriacus, with a retinue of clergy, joined the immense procession; and at Basle the bishop Paul, or Pantulus, likewise. At Cologne the returning pilgrims were attacked, while disembarking, by hordes of wild Hunnish barbarians and were all massacred, though the heathen king, Attila (Etzel), admired the beauty of Ursula and desired to spare her, that she might

St. Ursula. (From a picture by St. Cattarina de' Vigri, in the Bologna Gallery.)

become his wife. She fell pierced with an arrow, which has become her peculiar attribute in artistic representations of this saint. Immediately after the massacre heavenly hosts, equal in number to the murdered virgins, appeared and put the barbarians to flight. The delivered inhabitants of the city thereupon buried the fallen pilgrims, and erected to each one a stone bearing her name—the names having been obtained from James, a bishop, who was in the train of the pilgrims and who had found a refuge in a cave from the fate of his companions. Soon afterwards Clementius, a pilgrim from Greece, having been urged in repeated dreams, erected a church among the graves in honor of Ursula and her eleven thousand companions. The sanctity of this place of burial is apparent from the fact that no other interments, even though they be of the bodies of baptized children, can be performed in its hallowed soil.

The origin of the Ursula legend is probably to be found in the ancient martyrologies and saints' chronicles of a date earlier than the 12th century, the legend having been current in this form in Germany since that period, while a somewhat different version has prevailed in England. This rehearses that Maximus, the usurper in Gaul (383–388) and former commander in Britain, had required of king Dionotus of Cornwall a number of marriageable girls for his legionaries, and that the king at once forwarded sixty thousand virgins of common and eleven thousand of noble rank, among them his own daughter Ursula. They were driven by storms, "ad barbaras insulas appulse," and murdered by the Huns and Picts (?). The earliest mention of any similar event is found in the poetical martyrology (ad Oct. 21) of Wandelbert of Prüm, who died in 870 (see D'Achery, *Spicileg.* ii, 54). The martyrology of the monk Usuard of St. Germain, written about 875, mentions two virgins of Cologne, "Martha et Sauda, cum aliis pluribus" (*Acta SS.* [Boll.] Jun. 7, 613), and various ecclesiastical calendars of Cologne of scarcely more recent date mention eleven virgins and give their names. The massacre itself is with great unanimity attributed to the Huns, under the command of Attila. For a thorough discussion of the extent to which the legend involves credible truth we refer to Zückler, in Herzog's *Real-Encyclop.* s. v. See Crombach, *Ursula vindicata*, etc. (Col. 1647, fol.), the most extensive work; id. *Act. sive Lib. XII S. Ursule Vindice*, (4to); also Vadian, *Oratio de XI Milibus Virginum* (Vien. 1510); Usher in *Antiq. Eccles. Britan.* (Lond. 1687), p. 107 sq.; Baronius, *Martyrol. Rom.* ad Oct. 21; id. *Annales*, ad an. 383, No. 4, etc.; Jameson [Mrs.], *Legendary Art.* ii, 501 sq.

Ursulines, the name borne by the nuns and Theatines of a charitable order in the Church of Rome, which was founded Nov. 25, 1535, at Brescia by Angela Merici (q. v.), and became prominent among the benevolent orders instituted in the 16th century to impede the progress of the Protestant Reformation. Their original rule did not require ascetical retirement from the world nor the wearing of a peculiar dress. Even the obligation to chastity was rather recommended than imposed. But, after the papal confirmation of the order had been obtained (June 9, 1544), the rule became more strict. Formal congregations were organized, whose members, for the most part, lived together in convents. A girdle of leather to symbolize virginity was added to the garb. More extended measures to uniform and regulate the order were taken under the direction of cardinal Borromeo, who was from the first its zealous patron. By the end of the 16th century the order had become established in France, and rapidly increased the number of its convents. The single congregation of Paris possessed over eighty such houses. In time this congregation devised a new rule which was approved by pope Paul V. and has become the model for the rules of the congregations of Bordeaux, Dijon, and Lyons (see *Constitut. d. Religieuses de S. Urs. de la Congrèg. de Paris*, 1648, and *Règlement*,

1673). It adds to the three solemn vows of Augustine a fourth, which requires the instruction of female youth. The garb consists of gray skirt, black robe, leathern girdle with iron buckle, black cloak without sleeves, a head-cloth with short white veil, and a large black thin veil over all. The French congregations originated the Ursuline order in Germany. In the time of its greatest extension the order consisted of about twenty loosely connected congregations, having, perhaps, 350 convents and 15,000 to 20,000 nuns, the maximum number of inmates being 60 nuns and 20 lay-sisters to a convent. The Ursulines are distinguished by a conscientious performance of the obligation to instruct the young. In Italy and Switzerland the congregated or non-regulated Ursulines compose the body of the order, and they observe a more ascetical rule than the regulated nuns. They devote eight days annually to the spiritual exercises prescribed by Loyola, teach young girls daily, catechise adults on Sunday, visit the sick, dispense alms, and hold conferences every Friday. Their novitiate extends over three years. The different houses are almost everywhere under the direction of the diocesan bishops. See *Les Chroniques de l'Ordre des Ursulines* (Paris, 1676), vol. ii; *Journal des Illustr. Religieuses de l'Ordre de S. Urs.* iv, 1690; Mayer, *Ursul.-Orden* (Würzburg, 1692); Helyot, *Geschichte aller Kloster-n. Ritter-Orden*, iv, 178 sq.; Crome, *Gesch. d. Mönchs-Orden*, ch. iv.—Herzog, *Real-Encyclop.* s. v. The first Ursuline colony in America was founded by Marie Guyart at Quebec in 1639; and there are now convents of this order also at Trois Rivières and Chatham, in Canada; and in the United States at Morrisania, N. Y.; at Cleveland, Toledo, and Fayetteville, O.; at Springfield and Alton, Ill.; at Columbia, Savannah, and Augusta, Ga.; at New Orleans, San Antonio, Galveston, Louisville, and St. Louis. But they have ceased to exist in Italy, Switzerland, and Germany since 1871. See *Appletons' Cyclop.* s. v.

Ursuline of Trois Rivières, Canada.

Ursulines in Canada; and in the United States at Morrisania, N. Y.; at Cleveland, Toledo, and Fayetteville, O.; at Springfield and Alton, Ill.; at Columbia, Savannah, and Augusta, Ga.; at New Orleans, San Antonio, Galveston, Louisville, and St. Louis. But they have ceased to exist in Italy, Switzerland, and Germany since 1871. See *Appletons' Cyclop.* s. v.

Urueđ, a title of the god *Bilgi* in Chaldaean mythology, signifying "protector of the house." See Lenormant, *Chald. Magic*, p. 186.

Uruker, in Chaldaean mythology, was the name of a wicked demon, "enormous" and "multifold." See Lenormant, *Chald. Magic*, p. 3, 10.

Uru Sukhar, in Chaldaean mythology, was a title of the god *Bilgi*, signifying "protector of the family." See Lenormant, *Chald. Magic*, p. 186.

Urwick, WILLIAM, D.D., an Irish Congregational minister, was born at Shrewsbury, Dec. 8, 1791. He graduated at Hoxton College, and settled at Sligo; became interested in important discussions with the Roman Catholic divines, and by the brilliancy of his arguments and the overpowering force of his mind won for himself a place among the foremost defenders of the Gospel of Christ. In 1826 Dr. Urwick accepted the pastorate of York Street Chapel, Dublin, and during the long period of his public ministry was recognised as an able advocate of the religion of Christ. He was intimately associated with the Irish Evangelical Socie-

ty, Home Mission, and the Evangelical Alliance. He died July 19, 1868. See (Lond.) *Cong. Year-book*, 1869, p. 285.

Usagers and **COLLEGERS**, two parties existing in the Church of Scotland in the reigns of George I and George II. As the bishops who had been ejected from their sees during the Revolution were gradually removed by death, others were consecrated in their stead, without diocesan authority, to preserve the apostolic succession until the former condition of affairs should be restored. On the death of bishop Rose of Edinburgh, in 1720, the last of the old diocesan prelates, it was proposed that the Church should henceforth be governed by a *college* of bishops. The proposal was supported by the lay party and opposed by the clergy. Another cause of division arose in view of the fact that some of the diocesan party favored the adoption of certain *usages* into the Church of Scotland which had been lately revived in England, viz.—(1) mixing water with the wine; (2) commemorating the faithful departed; (3) the invocation in the prayer of consecration; (4) oblation before administration. Bishop Gadderar, one of the defenders of the usages, being subsequently chosen bishop of Aberdeen, the party opposed to the college system became identified with the usages. Hence the terms Usagers and Collegers. See Blunt, *Dict. of Sects*, s. v.

Use, the form of external worship peculiar to any Church; also the ritual of a Church or diocese arranged by authority and generally followed. In England each bishop formerly had the power of making some improvements in the liturgy of his Church; in process of time different customs arose which were so distinct as to receive the name of “uses.” We thus have the uses of Sarum, Bangor, York, Hereford, Durham, Lincoln. The Use of Sarum became the most general. All were practically abolished in the 16th century. See Hook, *Church Dict.* s. v.

Ushas, in Hindû mythology, is one of the female deities of the Vedas—the Dawn. She is represented as possessing very pleasing attributes, such as the bringer of opulence, the giver of food, endowed with intellect, truthful, and the like. See *Chambers's Encyclop.* s. v.

Usher (or **Ussher**), **James**, an illustrious prelate, and a great luminary of the Irish Church, was born at Dublin, Jan. 4, 1580. He was educated at Trinity College, Dublin, being one of the first three scholars matriculated. In 1601 he was ordained; in 1603 he became chancellor of St. Patrick's, and soon after professor of divinity at the university; in 1619 he was made bishop of Meath; and in 1624 he became archbishop of Armagh and primate. During the troubles arising out of the war between Charles I and the Parliament, Usher had to leave Ireland, and was subjected to much hardship, his property being seized and his revenues distrained. He obtained the see of Carlisle (*in commendam*), but from that but little emolument accrued to him. He afterwards became preacher at Lincoln's Inn, and was one of the six divines allowed by Parliament to confer with Charles at Carisbrook. No man could be matched against him in debate, and during the Civil War he preached many bitter sermons against the Independents. In 1642 he removed to Oxford, but, the king's power declining, he retired to Carliff. He was recognised as one of the greatest scholars of his time. Richelieu is said to have offered him a high position in France. He declined a professorship at Leyden. His later years were spent in the family of lady Peterborough at Kelgate, where he died, March 21, 1656. Usher was a laborious student, and amassed vast learning. His *Annals Vet. et Novi Test.* (1650–54, fol.) established his fame as a scholar and a chronologist, and fixed the Biblical chronology which has since been generally followed in this country, and which is adopted in the A. V. He wrote also *De Græca LXX. Versione Syntagma* :—

Epistola ad L. Capellum de Variis Text. Heb. Lectionibus (1652) :—*Britannicarum Ecclesiarum Antiquitates* (1633, fol.; enlarged ed. 1677) :—and a multitude of works on the ecclesiastical controversies of the day, and on some questions in theology. His library, for which he collected books and MSS. from all quarters, was, after his death, presented to the Dublin University, where it remains. He succeeded in obtaining six copies of the Samaritan Pentateuch and several MSS. of the Syriac version. His collected works have been edited by Dr. Elrington (1847, 16 vols. 8vo), with a life of the author.

Usher, John (1), an American Episcopal minister, was born in 1689; graduated at Harvard College in 1719; studied theology; went to England for holy orders, and returned as missionary of the Society for Propagating the Gospel in Foreign Parts; and was appointed to the mission at Bristol, R. I. He died at Bristol, April 30, 1775. See Sprague, *Annals of the Amer. Pulpit*, v, 48–50.

Usher, John (2), son of the preceding, was born at Bristol, R. I., 1722; graduated at Harvard College in 1743; practiced law for many years; commenced reading service, after the death of his father, in 1775; was ordained by bishop Seabury in 1793, and rector of the parish until 1800. He died July, 1804. See Sprague, *Annals of the Amer. Pulpit*, p. 49.

Usous, in Phœnician mythology, was, according to tradition, handed down by Sanchoniathon as a brother of Hypsuranius, who at first protected his body with hides of animals which he had killed; and when rains and winds came, and fire broke out through friction of the trees one with another, he risked himself upon a tree, whose branches he had cut off, out upon the treacherous sea. He dedicated two pillars to fire and wind, and sacrificed the blood of the animals he had slain.—Vollmer, *Wörterb. d. Mythol.* s. v.

Usque, **ABRAHAM**, whose Christian name was *Duarte Pinel*, belonged to those unhappy Jewish exiles who were driven from the Spanish peninsula in 1492. He sought refuge at Ferrara, in Italy, where he established, under the name of Abraham Usque, a great printing establishment, in order to supply the Marranos with Hebrew books. He not only edited various Rabbinical works, but also published the celebrated Spanish translation of the Hebrew Scriptures entitled *Biblia en Lengua Española, traduzida Palabra por Palabra de la Verdadera Hebraica, por muy excelentes letrados. Vista y examinada por el Oficio de la Inquisición*, which he dedicated to Hercules II and Donna Gracia Nasi (Ferrara, 5813 = 1553). There is a great deal of dispute about this Bible, since two editions of it were simultaneously printed—the one edited by Duarte Pinel, at the expense of Gerónimo de Vargas, and the other edited by Abraham Usque, at the expense of Jom Tob Athias. But the difficulty is easily removed by identifying Usque with Pinel, De Vargas with Athias; Duarte Pinel being the Portuguese name and Abraham Usque the Jewish, and so Gerónimo de Vargas being the Spanish and Jom Tob Athias the Jewish name. There is no doubt that both were Marranos, and used their Christian name in the edition which was printed for the Spanish-speaking Christians; while in the edition for their Jewish brethren they used their Jewish name, under which they have become known. Usque, or Pinel, began this version in 1543 and completed it in 1553, after ten years of diligent labor. And though the names of the translators are not given, it being simply remarked “made by very excellent scholars” (“por muy excelentes letrados”), yet there can be but little doubt that he was the principal author of it. He adopted the literal translation of the Pentateuch published in the Constantinople Pentateuch Polyglot (1547), which was commonly in use by the Jews in Spain in the middle of the 16th century, and which is most probably the early Spanish translation of the Middle Ages falsely attrib-

uted to David Kimchi (see Steinschneider, *Jewish Literature*, p. 132). There were two editions, published simultaneously, as has already been intimated: one was intended for the Jews, and the other was designed to acquaint Spanish-speaking Christians with the Old Test. New editions of the former appeared at Ferrara, 1630; Amsterdam, 1611; Venice, 1617; and with corrections, improvements, and an introduction by Manasseh ben-Israel, Amsterdam, 1630; with tables of the Haphtaroth, indices of chapters, judges, kings, and prophets of Israel according to the **סדר טורים**, as well as with an elaborate introduction by Gillis Joost (ibid. 1646), and with a new preface and corrections by Sam. de Caceres (ibid. 1661). See Fürst, *Bibl. Jud.* iii, 463 sq.; De Rossi, *Dizionario Storico*, p. 324 (Germ. transl.); id. *De Typographia Hebreo-Ferrarensi*, p. 28-46; Steinschneider, *Catalog. Libr. Hebr. in Bibl. Bodl.* col. 195; Etheridge, *Introduction to Hebrew Literature*, p. 453; Ticknor, *History of Spanish Literature*, i, 41, note (Amer. ed.); Finn, *Sephardim*, p. 468 sq.; Lindo, *History of the Jews in Spain*, p. 361; Da Costa, *Israel and the Gentiles*, p. 394 sq.; Kitto, *Cyclop.* s. v.; Kayserling, *Gesch. d. Juden in Portugal*, p. 268; Grätz, *Gesch. d. Juden*, ix, 344 sq.; Rosenmüller, *Handbuch für die Literatur der bibl. Kritik und Exegese*, iv, 268 sq.; Simon, *Histoire Crit. du V. T.* p. 311. (B. P.)

Ussermann, Emilian, a Roman Catholic divine of Germany, was born at St. Ulrich, in Baden, Oct. 30, 1737, occupied the chair of theology at Salzburg from 1767 to 1769, and died Oct. 27, 1798, as doctor of theology and capitulary in the monastery of the Benedictines of Sanct Blasien. He is the author of, *Episcopatus Wirceburg. sub Metropoli Moguntina Chronol. et Diplomat. Illustratus* (Sanct Blasien, 1794):—*Episcopatus Bamberg. . . . Illustr.* (ibid. 1801):—*Succincta Explicatio Locorum quorundam Difficiliorum Pentateuchi quoad Sensum Literalem, Moralem, Polemicum, Allegoricum et Antilogicum ex Contextu præcipue Locis Parallelis ac Linguis Adornata* (Munich, 1767):—*Compendium Syntaxeos Hebraicae, una cum Analysis Libri Geneseos*, etc. (Salzburg, 1769). See Fürst, *Bibl. Jud.* iii, 465; Winer, *Handbuch der theol. Literatur*, i, 779, 787. (B. P.)

Usteri, Leonhard, a Swiss theologian, was born Oct. 22, 1799, at Zurich. He studied in his native place, and having been ordained in 1820, he went to Berlin to attend the lectures of Schleiermacher. In 1823 he returned to his native city, and commenced a course of private lectures on the Pauline epistles. In 1824 he was called to Berne as professor and director of the gymnasium, and died there Sept. 18, 1833. He combined exact scholarship with philosophic depth and acumen. He wrote, *Commentatio Critica in qua Joannis Evangelium Genium esse, ex Comparatis IV Evangeliorum de Cæni Ultima et de Passione Jesu Christi Narrationibus Ostenditur* (Turici, 1823), written against Bretschneider:—*Entwickelung des Paulinischen Lehrbegriffes in seinem Verhältnisse zur biblischen Dogmatik des Neuen Testaments*, etc. (Zurich, 1824; 6th ed. 1851):—*Commentar über den Brief Pauli an die Galater* (ibid. 1833). He also published some essays in the *Stud. u. Krit.* See *Theolog. Universol.-Lec.* s. v.; Zuchold, *Bibl. Theolog.* ii, 1373; Winer, *Handbuch der theol. Literatur*, i, 32, 88, 261, 294; ii, 812. (B. P.)

Ustick, Hugh Stewart, a Presbyterian minister, was born at Bloomingburgh, O., Sept. 9, 1832. He pursued his academical studies in Salem Academy, Ross Co., O., and graduated at Miami University in 1853. He studied theology in New Albany Seminary; was licensed to preach by Chillicothe Presbytery in 1855; employed by the American Tract Society during 1856; and ordained as pastor of the Presbyterian Church at Hamilton, O., in May, 1857. He died Oct. 31, 1857. See Wilson, *Presb. Hist. Almanac*, 1864, p. 200.

Ustick, Stephen C., a prominent Baptist layman, son of the Rev. Thomas Ustick, was born in New

York city in 1773. He was a printer by trade, and devoted himself to his secular calling with great activity. For many years he was a deacon in the Burlington, N. J., Baptist Church, and took a deep interest in all plans for religious work, both at home and abroad. For some time his home was in Washington, D. C. He removed to Batavia, O., in which place he died, Nov. 11, 1837. Mr. Ustick was one of the founders of the Baptist Triennial Convention, formed in 1814 with special reference to carrying on the work of foreign missions. See the *Missionary Jubilee*, p. 119. (J. C. S.)

Ustur, in Chaldean mythology, was a class of protecting genii with the face of a human being, and referred to in Ezekiel's (i, 10; x, 14) vision by the river Chebar. See Lenormant, *Chaldean Magic*, p. 121.

Usuard, a French hagiographer of the 9th century, was a monk of Saint-Germain-des-Prés at Paris. He wrote a *Martyrology* under the countenance of Charles the Bald, which was first printed at the end of *Rudimentum Noritiorum* (1475), and afterwards served as the basis of the *Martyrologium Romanum*. He died Jan. 8, 876 or 877. See Hoefler, *Nouv. Biog. Générale*, s. v.

Usurpation of a Benefice is the act (by a stranger who has no right to do so) of presenting a clerk, who is thereupon admitted to, and instituted in, a Church benefice. Anciently such an act deprived the legal patron of his advowson; but now no usurpation can displace the estate or interest of the patron, but the true patron may present upon the next avoidance, as if no such usurpation had occurred.—Lee, *Gloss of Liturg. Terms*, s. v.

Usury (נִשְׁכָּה, *néské*, lit. a *biting*, i. e. extortion; *τόκος*, *yield*; twice [Neh. v, 7, 10] מַשְׁשָׁה, *mashshá*, *debt*) is used in the A. V. in the Old-English sense of *interest* for money loaned, and not necessarily in the odious and later signification, an unlawful contract for the loan of money, to be returned again with exorbitant increase. By the laws of Moses the Israelites were forbidden to take usury from their brethren upon the loan of money, victuals, or anything else, not, it has been observed by Michaelis, as if he absolutely and in all cases condemned the practice, for he expressly permitted interest to be taken from strangers, but only out of favor to the poorer classes. In other words, he did not mean to represent that the taking of interest for the loan of money was in itself sinful and unjust; but as at that period the Israelites were comparatively a poor people and strangers to commerce, they borrowed, not with a view to profit, but from poverty, and in order to procure the common necessities of life. It would therefore have been a hardship to have exacted from them more than was lent. The Israelites were, however, permitted to take usury from strangers, from the Canaanites and other people devoted to subjection. This was one of the many means they adopted for oppressing and ruining the Canaanites who remained in the land. The Israelites were not a commercial people, nor were the laws and regulations under which they were placed framed with a view to encourage them to become such, but rather to preserve them in the possession of their family inheritances, and in the cultivation of a simple, unostentatious, frugal mode of life. Among themselves, therefore, only such lending as ministered help to the struggling poor, and served to tide them over trials and difficulties, was consistent with the spirit of the old economy; not such as tended to embarrass their circumstances, and at their expense enabled a grasping neighbor to enrich himself. This last is the only kind of usury forbidden in the law, and the avoiding of this is sometimes given among the characteristics of the upright and godly man (Psa. xv, 5; Jer. xv, 10). It is also that which when practiced was denounced as a crying iniquity, and exposed

those who did it to judicial condemnation (Prov. xxviii, 8).

The practice of mortgaging land, sometimes at exorbitant interest, grew up among the Jews during the Captivity, in direct violation of the law (Lev. xxv, 36, 37; Ezek. xviii, 8, 13, 17). We find the rate reaching 1 in 100 per month, corresponding to the Roman *centesime usurae*, or 12 per cent. per annum—a rate which Niebuhr considers to have been borrowed from abroad, and which is, or has been till quite lately, a very usual or even a minimum rate in the East (Niebuhr, *Hist. of Rome*, iii, 57, Engl. transl.; Volney, *Trav.* ii, 254, note; Chardin, *Voy.* vi, 122); but under Turkish misrule it now often reaches 40 or 50 per cent. (Coudet, *Tent Work in Palest.* ii, 268). Yet the law of the Koran, like the Jewish, forbids all usury (Lane, *Mod. Egypt.* i, 132; Sale, *Koran*, c. 30). The laws of Menu allow 18 and even 24 per cent. as an interest rate; but, as was the law in Egypt, accumulated interest was not to exceed twice the original sum lent (*Laws of Menu*, viii, 110, 141, 151; Jones [Sir W.], *Works*, iii, 295; comp. Diol. Sic. i, 9, 79). This Jewish practice was annulled by Nehemiah, and an oath exacted to insure its discontinuance (Neh. v, 3–13; comp. Selden, *De Jur. Nat.* vi, 10; Hoffmann, *Lex. s. v. "Usura"*). Our Saviour denounced all extortion, and promulgated a new law of love and forbearance: "Give to every man that asketh of thee, and of him that taketh away thy goods, ask them not again." "Love ye your enemies, and do good, and lend, hoping for nothing again" (Luke vi, 30, 35).

The practice of usury was severely censured by the ancient Church and strictly forbidden to the clergy. One law prohibited a usurer from ordination. Many of the ancient canons condemned it in unmeasured terms. One of the canons of Nice says, "Forasmuch as many clerks, following covetousness and filthy lucre, and forgetting the Holy Scriptures (which speak of the righteous man as one that hath not given his money upon usury), have let forth their money upon usury, and taken the usual monthly increase, it seemed good to this great and holy synod that if any one, after this decree, shall be found to take usury, or demand the principal with half the increase of the whole, or shall invent any such methods for filthy lucre's sake, he shall be degraded from his order, and have his name struck out of the roll of the Church." The same practice is censured by the Apostolical Canons; the Council of Eliberis; the first and second councils of Arles; the first and third of Carthage; the Council of Laodicea and of Trullo. Usury was of various kinds; sometimes it was called *centesimæ*, the hundredth part of the principal being paid every month. This was allowed by the civil law, but it was generally condemned by the Church. Another form of usury was called *sescuplum*; that is, the whole and half as much more. This was condemned by a law of Justinian and reprobated by the Church. Other forms of lower interest were allowed, such as half or third of the centesimal interest. See Bingham, *Ecc. Antiq.* p. 200–201, 1014, etc.

But the taking of usury in the sense of receiving a reasonable rate of interest for the use of money employed in merchandise belongs to a different category, and is nowhere forbidden; nor is it more contrary to the law of love than the plying of merchandise itself for the sake of gain. Hence it is referred to in New-Test. Scripture as a perfectly understood and allowable practice (Matt. xxv, 27; Luke xix, 23)—a practice which the Jews of all ages, from the time of the Exile, when they began to be in a manner driven to commerce for their support, have felt themselves at liberty to carry on. That it may be, and often has been, carried on by them as well as others in a way far from consistent with the great principles of equity, there can be no doubt; but this belongs to the abuse, not to the use, of the liberty in question, and is to be condemned on commercial as well as moral grounds. Applied to Christian times, the spirit of the old enactments regarding usury

finds its fulfilment in the frank and timely ministration of pecuniary help from those who can give it to persons on whom misfortune and poverty have fallen, and, as regards commercial transactions, in the maintenance of upright and honorable dealings.

The exaction of an exorbitant rate of interest for the loan of money was first prohibited in England during the reign of Edward the Confessor; but that law is considered to have become obsolete, as in 1126 usury was forbidden only to the clergy, and in 1138 it was decreed by the Council that "such of the clergy as were usurers and hunters after sordid gain, and for the public employment of the laity, ought to be degraded." In 1199, the last year of the reign of Richard I, the rate of interest for money was restricted to 10 per cent., which continued to be the market rate until the reign of Henry VIII. In 1311, Philip IV fixed the interest that might be exacted in the fairs of Champagne at 20 per cent. James I of Arragon, in 1242, fixed it at 18 per cent. In 1490 the rate of interest in Placentia was 40 per cent. Charles V fixed the rate of interest in his dominions at 12 per cent. In 1546 the rate in England was fixed at 10 per cent.; in 1624 it was reduced to 8; in 1651 to 6; and in 1714 to 5 per cent., at which it remained until 1833. By 3 and 4 William IV, c. 98, bills not having more than three months to run were exempted from the operation of the laws against usury, and by 1 Victoria, c. 80, the exemption was extended to bills payable at twelve months. By 2 and 3 Victoria, c. 37, it was enacted that bills of exchange and contracts for loans or forbearance of money above £10 shall not be affected by the usury laws. Five per cent. is still left as the legal rate of interest for money, unless it shall appear that any different rate was agreed upon between the parties.—Kitto; Smith; Fairbairn. In most of the United States a certain rate (now generally six per cent.) is fixed by law, and penalties are imposed for exacting a higher rate. See LOAN.

U'ta (Ov'rá; Vulg. *Utha*), a corrupt Greek form (1 Esdr. v, 30) of the Heb. name (Ezra ii, 45) אַכּוּב (q. v.).

Utanubaden, in Hindû mythology, is the eldest son of king Suayambhu, the progenitor of the entire generation of men. He was married to Sunadi, by whom he had a son, Druwen, who already in his fifth year was a saint endowed by Vishnu with wisdom, and ruled the kingdom of his father through a period of twenty-six thousand years, and was finally transplanted into the polar star.

Utenheim, CHRISTOPH VOX, bishop of Basle in the era of the Reformation, and an unconscious agent in preparing the way for that change in his diocese, was born about 1450 of an ancient and noble family, and in time became a representative of the views of Gerson (q. v.). He was made a canon at Strasburg, and afterwards provost; became rector of the newly founded University of Basle, master, doctor of canon law, and, it is said, general of the Order of Cluniaciensians. In A.D. 1500 he was made administrator of the diocese of Basle, and in 1502 bishop. He introduced an economical administration, which enabled him to liquidate the debts of his diocese, and in time to promote the interests of learning, but which, to some extent, offended his clergy, and caused the Council of Basle to suspect him of entertaining ambitious designs in the direction of recovering rights over the town which his predecessors had alienated for money. This dispute ended eventually in the refusal on the part of the town to pay the *bishop's penny*, which formed the last evidence of episcopal authority in secular matters. In spiritual and ecclesiastical matters, Utenheim also placed himself at once on the side of reform. In obedience to the directions of the Council of Basle, he framed synodical statutes, and convened a synod, Oct. 23, 1503, which he addressed in words of earnest exhortation and warning, to the end that a purer life among the clergy might restore

the Church to respect among the laity, and might introduce a purer morality among the people. The statutes he had prepared were then adopted; the clergy promised to conform to them, and pledged themselves to hold two synods annually, at which reports should be rendered concerning their own conduct and the moral and religious state of the people, and measures for further improvement should be devised. This endeavor was nevertheless fruitless, because opposition and disobedience from his clergy soon appeared in measure too great for him to control; but it led to the inception of a new plan for reforming the diocese, which has given this bishop a noteworthy place among the forerunners of the Reformation. In 1512 he called Capito (q. v.) to become preacher in the cathedral, and three years afterwards Ecolampadius, neither of them representatives of rigid Romanism, and both destined soon to become leaders in the tendency away from Rome. Erasmus was also valued by the bishop, and invited (June 13, 1517) to make Basle his home; and when Luther began his work, Utenheim rejoiced in his boldness, and read his writings with avidity. So late as 1519 Capito wrote to Luther that a learned and very upright bishop had promised a refuge to the Reformer in case of need, which bishop was certainly none other than Utenheim. It soon became apparent, however, that Luther's work was causing material damage to the bishop and bishopric of Basle, and the prelate thereupon began to take retrograde steps. He first demanded and received a coadjutor in his office. A public and notorious violation of the fast on Palm-Sunday furnished him with a desired occasion to issue a mandate forbidding the public mention of Luther and threatening punishment for all further transgressions of the law of fasting. Erasmus responded to that mandate in a circular letter addressed to the bishop, which may have restrained the latter from extreme measures, but which, nevertheless, caused his own expulsion from the town soon after Easter, 1522. It is certain that Utenheim always remained accessible to the evangelicals; but, on the other hand, he advised the Church of Zurich not to risk the second disputation set down for September, 1523, and joined the association of German bishops for giving effect to the Edict of Worms. He retained the friendship of Erasmus to the last, and permitted the latter to express his views respecting the Church very frankly. Worn out with age, ill-health, and anxiety, he retired in 1524 to Bruntrut. In February, 1527, he asked to be released from his official duties, and died March 16 of that year. See Sudanus, *Basilea Sacra*, etc. (Bruntrut, 1668); Oechs, *Gesch. d. Stadt Basel*, ch. iv; Erasmus, *Utenso*, *Th. Moro*, etc.; Scultetus, *Annales ad A. 1519*; Witz, *Helvet. Kirch.-Gesch.* v, 284; Wursten, *Basler Chronik*, p. 564; *Letters of HERN. Busch and Glareau to Zwingle* (ed. Schuler and Schulthess), vii, 1, 195-197; Ranke, *Deutsche Gesch. im Zeitalter d. Reformation*, ii, 518; Herzog, *Leben Ecolampadius* (i, 9 sq.). *Beiträge zur Gesch. Basels* (1839), and *Real-Encyclop.* s. v.; also Tonjola, *Basilea Sepulta Detecta*, Appendix, p. 25.

Utgard, in Norse mythology, is the realm of Utgardslöki, lying at the end of the world, and is the land of giants and magicians. It became known from Thor's journey to Utgard.

U'thai [many U'thai'] (Heb. *Uthay'*, עֲתָי, *helpful*), the name of two Hebrews.

1. (Sept. פְּרֹצִי v. r. פְּרֹצִי; Vulg. *Othei*.) A person (called "the son of Ammihud") of the family of Pharez, who resided at Jerusalem after the return from Babylon (1 Chron. ix, 4). B.C. 536. He is usually thought to be identical with ATHAHAI (q. v.) of the somewhat parallel passage (Neh. xi, 4); but none of the names in his ancestry (except Pharez) agree.

2. (Sept. עֲבָדַי v. r. עֲבָדַי; Vulg. *Uthai*.) First named of the two "sons of Bigvai," who returned with seventy males from Babylon with Ezra (Ezra viii, 14). B.C. 459.

U'thi (Οὐθι), the Greek form (1 Esdr. viii, 40) of the Heb. name (Ezra viii, 14) עֲתָי (q. v.).

Utilitarianism, a term first applied to the doctrine of utility (q. v.) by John Stuart Mill, and adopted by very many since that time. The term *utility* was first employed to distinguish the doctrine by Jeremy Bentham. See Mill, *Utilitarianism*.

Utility, in ethico-philosophical terminology, is the doctrine that actions are right because they are useful or tend to promote happiness. It is thus defined by Mill (*Utilitarianism*, p. 9): "The creed which accepts as the foundation of morals utility, or the greatest happiness principle, holds that actions are right in proportion as they tend to promote happiness, wrong as they tend to produce the reverse of happiness. By happiness is intended pleasure and the absence of pain; by unhappiness, pain and the privation of pleasure." The fundamental objection to the doctrine is thus stated by Dr. Reid (*Active Powers*, essay v, ch. v): "Agreeableness and utility are not moral conceptions, nor have they any connection with morality. What a man does, merely because it is agreeable, is not virtue." See Fleming and Krauth, *Vocab. of Philos.* s. v.

Utino, LEONARDO DA, an Italian Dominican, rector of a gymnasium at Bologna, chaplain to Eugene IV, and provincial of his order for Lombardy, flourished in A.D. 1444. His works consist of two series of sermons and two treatises—*De Locis Communibus Prædicatorum* and *De Legibus*. See Mosheim, *Church Hist.* bk. iii, cent. xv, pt. ii, ch. ii.

Utraquists, a name at first given to all those members of the Western Church in the 14th century who contended for the administration of the eucharist to the laity *sub utraque specie*, i. e. in both kinds. The name was applied especially to the Calixtines (q. v.) in the 15th century. See Fisher, *Hist. of the Ref.* p. 178 sq.

Utrecht, PEACE OF. Utrecht is a city of the Netherlands, capital of the province of the same name, and noted for the treaties which were signed there to close the War of the Spanish Succession. The preliminary terms of the treaty between Great Britain and France were signed Oct. 8, 1711. A congress was opened at Utrecht Jan. 12, 1712. Arrangements between the two powers were completed in August of the same year. Agreement was also reached with Holland, Portugal, Prussia, and Savoy soon afterwards. Each of the contracting parties treated in its own name, and hence there were as many as nine different treaties signed April 11, 1713. Many changes were made in the possessions of the powers named, and Protestantism made substantial gain on the continent of Europe.

Utug, in Chaldean mythology, is the generic name of the inferior and malevolent spirits properly called demons. They are said to inhabit the desert and to cause diseases of the forehead. See Lenormant, *Chaldean Magic*, p. 24 sq.

Uua, in Egyptian mythology, is the name of the bark or vessel in which the image of the deity Ra (the sun) was carried by the priests. See Lenormant, *Chaldean Magic*, p. 83.

Uwienon, COUNCIL OF (*Concilium Unienoriense*), was held in 1375, under Jaroslav, archbishop of Gnesen. Several statutes were drawn up for the reformation of ecclesiastical discipline, and a subsidy granted by the clergy towards the expenses of the war against the Turks. See Mansi, *Concil.* xi, 2043; Landon, *Manual of Councils*, s. v.

Uytenbogaert (*Uytenbogard*, *Wytembogard*), HANS, one of the most prominent and influential adherents of Arminius, after the death of that scholar a leader of the Remonstrants—an independent and earnest and yet a moderate and considerate man, everywhere maintaining a firm and upright character, and inces-

santly engaged in promoting peace among the parties of Protestantism—was regarded as the ablest and most distinguished preacher of his time among the Remonstrants. His custom was to avoid, as far as possible, the application of scholastic forms, and to base his discourses directly on the Scriptures. He was born at Utrecht in 1557, studied at Geneva under Beza, and became pastor in his native town in 1584. From this post he was dismissed in 1589, because of the moderate views he held respecting the already controverted doctrine of predestination. In 1590 he was called to the Hague, where he became chaplain to the court of the prince of Orange and tutor to his son, and acquired great reputation and influence. He united with Arminius in petitioning the States-General to convoke a synod at which they might defend their party and views against the charges continually urged against them by the Gomarists. An interview between Arminius and Gomarus was the only result of this effort, and the dispute was afterwards continued without any relaxation of its bitterness. Uytenbogaert carried himself with dignity throughout. He delivered an address before the States, in which he set before them the rights and duties they were bound to observe. He showed the inadmissibility of compulsory support of a symbol, demonstrated that the clergy itself had occasioned the troubles in the Church, and that its object was to enforce the principle of the independence of the spiritual power. He demanded that the States should examine the questions in dispute themselves and bring them to a conclusion; that in the event of a synod being convened no decisions should be reached before the opposing party should have had opportunity to be heard; and, finally, that if fraternity between factions could not be attained, mutual toleration at least should be insured. After the death of Arminius, in 1609, Uytenbogaert was associated with Episcopius in the leadership of his party and in the Remonstrance through which they presented their doctrinal system to the view of the States of Holland and West Friesland (1610). He accompanied an embassy to Paris as its chaplain about this time, and in the following year participated with Episcopius and others in a colloquy with their opponents at the Hague in the vain hope of securing peace. In 1616, Henry Rousens entered legal complaint against him on account of a particular exposition given by him of the five points of the Remonstrance. In 1619 he presided over a Remonstrant synod at Walwyck, which fact intensified the hostility to which he was exposed. He thereupon retired to Antwerp until 1622, during which time sentence of banishment and confiscation of property was pronounced against him, and afterwards to Rouen, in France. In 1626 he came back to Rotterdam and lived in secrecy, endeavoring to secure a revocation of his sentence and aiding with counsel and act in the measures of his party. His goods were restored to him in 1629, and in 1631 he was permitted to be present during public worship at the Hague. He was even allowed to preach a few times, but his enemies succeeded in compelling him to finally desist from exercising the functions of the ministry. He died Sept. 24, 1644. His writings are chiefly in the Dutch language. Among them are a *Church History* (Rotterdam, 1646):—a treatise *De Auctoritate Magistratus in Rebus Eccles.* (ibid. 1647):—and a translation of the *Confessio sive Declaratio Sententiæ Pastorum*. See Schröckh, *Christl. Kirchengesch. seit d. Reform.* (Leips. 1806), v, 226–276, and the literature there given; also Gieseler, *Kirchengesch.* (Bonn, 1852), iii, 21, 33; Herzog, *Real-Encyklop.* s. v.

Uythage, CONRAD CORNELIS, a Dutch scholar of the 17th century, is the author of *גלוי הנקוד*, *Revelatio Punctuationis sive Dissertatio de Antiquorum sine Punctis Legendi Ratione deque Vocalium Notitate* (Lugd. Bat. 1680):—*קריה בלי נקודה*, *De Lectione Scripturæ S. Scriptorumque Rabbinorum absque Punctis*

(ibid. 1680):—*Artificium Investigand. Radd. Hebr. Brevis. Præceptis Comprehensum Exemplique Illustratum et Consilium de Studio Robb.*, etc. (ibid. 1682):—*Artificium Cognoscendarum Radicum Hebr. in Nominibus seu Derivatis Absolutis* (ibid. eod.):—*Explicatio R. Mosi Maimonidis super Patrum, s. Seniorum Judeor. Sententias complect. VIII Capita, ubi Præclara Multa, cum in Theologia tum Philosophia doctissime Explicantur* (ibid. 1683). All these writings are now very scarce. See First, *Bibl. Jud.* iii, 466; Steinschneider, *Bibliog. Hebr.* s. v.; Müller, *רביה הכפר*, or *Catalogue of Hebrew and Jewish Works* (Amst. 1868), p. 323. (B. P.)

Uz (Heb. *Úts*, *עֶזְרָא*, *wooded*), the name of three men, and also of a region.

1. (Sept. *Ōḏz*, v. r. *ʿŌz*, Vulg. *Us* or *Hus*.) First named of the four sons of Aram (Gen. x, 23), and grandson of Shem (1 Chron. i, 17, where the lineage is condensed). B.C. post 2500.

2. (Sept. *Ōḏz*, Vulg. *Hus*, A. V. "Huz.") The oldest of the eight sons of Nahor by Milcah (Gen. xxii, 21). B.C. cir. 2000.

3. (Sept. *ʿŌz*, Vulg. *Hus*.) First named of the two sons of Dishan the Horite chieftain (Gen. xxxvi, 28; 1 Chron. i, 42). B.C. post 1950.

4. THE LAND OF Uz was the country in which Job lived (Job i, 1; Sept. *Ἀβδῖτις*, Vulg. *Hus*). As the genealogical statements of the book of Genesis are undoubtedly ethnological, and in many instances also geographical, it may fairly be surmised that the coincidence of names in the above cases is not accidental, but points to a fusion of various branches of the Shemitic race in a certain locality. This surmise is confirmed by the circumstance that other connecting-links may be discovered between the same branches. For instance, Nos. 1 and 2 have in common the names Aram (comp. Gen. x, 23; xxii, 21) and Maachah as a geographical designation in connection with the former (1 Chron. xix, 6), and a personal one in connection with the latter (Gen. xxii, 24). Nos. 2 and 4 have in common the names Buz and Buzite (ver. 21; Job xxxii, 2), Chased and Chasdim (Gen. xxii, 22; Job i, 17, A. V. "Chaldeans"), Shuah, a nephew of Nahor, and Shuhite (Gen. xxv, 2; Job ii, 11), and Kedem, as the country whither Abraham sent Shuah, together with his other children by Keturah, and also as the country where Job lived (Gen. xxv, 6; Job i, 3). Nos. 3 and 4, again, have in common Eliphaz (Gen. xxxvi, 10; Job ii, 11), and Teman and Temanite (Gen. xxxvi, 11; Job ii, 11). The ethnological fact embodied in the above coincidences of names appears to be as follows: Certain branches of the Aramaic family, being both more ancient and occupying a more northerly position than the others, coalesced with branches of the later Abrahamids, holding a somewhat central position in Mesopotamia and Palestine, and again with branches of the still later Edomites of the south, after they had become a distinct race from the Abrahamids. This conclusion would receive confirmation if the geographical position of Uz, as described in the book of Job, harmonized with the probability of such an amalgamation. As far as we can gather, it lay either east or south-east of Palestine (Job i, 3) [see BENE-KEDDEM]; adjacent to the Sabæans and the Chaldeans (Job i, 15, 17), consequently northward of the Southern Arabians, and westward of the Euphrates; and, lastly, adjacent to the Edomites of Mount Seir, who at one period occupied Uz, probably as conquerors (Lam. iv, 21), and whose troglodytic habits are probably described in Job xxx, 6, 7. The position of the country may further be deduced from the native lands of Job's friends, Eliphaz the Temanite being an Idumaean, Elihu the Buzite being probably a neighbor of the Chaldeans, for Buz and Chased were brothers (Gen. xxii, 21, 22), and Bildad the Shuhite being one of the Bene-Kedem. Whether Zophar the Naamathite is to be connected with Naamah in the tribe of Judah (Josh. xv, 41) may be regarded as

problematical: if he were, the conclusion would be further established. From the above data we infer that the land of Uz corresponds to the *Arabia Deserta* of classical geography, at all events to so much of it as lies north of the 30th parallel of latitude. This district has in all ages been occupied by nomadic tribes, who roam from the borders of Palestine to the Euphrates, and northward to the confines of Syria.—Smith. See JOB.

"The land of Uz" is mentioned only in two other passages of Scripture. Jeremiah in one passage (xxv, 20; Sept. *Oûz*, Vulg. *Ausitis*) groups it with Egypt, Philistia, Edom, and Moab; and in another he appears either to identify it with a portion of Edom, or to affirm that some of the Edomites in his days inhabited Uz (Lam. iv, 21; *Oûz*, *Hus*). These various statements show that Uz was closely connected with Edom, and thus in general corroborate the above position. See IDUMEA.

As to later opinions, Josephus says that Uz founded Trachonitis and Damascus (*Ant.* i, 6, 4). The former province lies in Bashan, and extends as far south as Bostra. It may have formed part of the land of Uz. Jerome appears to identify Uz with Damascus and Trachonitis, following Josephus (*Quest.* in *Gen.* x, 25; comp. *Onomast.* s. v. "Uz"). Bochart makes no less than three places of this name: 1. The *Ghuthah* of Damascus, confounding the Arabic *Ghuthah* with the Heb. *יָזָה*, words which are altogether dissimilar; 2. The region of *Ausitis*, named from Uz, the son of Nahor (Gen. xxii, 21); 3. Uz of Edom, the land of the patriarch Job (*Opera*, i, 80). There seems to be no sufficient authority for this threefold division. The general opinion of Biblical geographers and critics locates "the land of Uz" somewhere in *Arabia Petraea*. Whether the name of Uz survived to classical times is uncertain: a tribe named *Æsita* (*Αἰσίται*) is mentioned by Ptolemy (v, 19, 2); this Bochart identifies with the Uz of Scripture by altering the reading into *Αἰσίται* (*Phuleg*, ii, 8); but, with the exception of the rendering in the Sept. (*ἐν χώρα τῇ Αἰσίται*, Job i, 1; comp. xxxii, 2), there is nothing to justify such a change. Gesenius (*Thesaur.* p. 1003) is satisfied with the form *Æsita* as sufficiently corresponding to Uz, without any such change; as also Winer (*Realw.* s. v.) and most others. See Spanheim, *Hist. Jobi*, iv, 10 seq.; Buddei *Hist.* l. T. i, 370; Carpov, *Introd.* ii, 42; Müller, *De Terra Jobi*, in the *Thes. Vet. Test.* i, 540; Fries, in the *Stud. n. Krät.* 1851, vol. ii; and the commentaries on Job. See ARABIA.

Uza, in Oriental mythology, was an idol of the ancient Arabians which Mohammed destroyed, ordering its priests to be strangled.

U'zai [most *U'zai*] (Heb. *Uzay*, *יָזַי*, *strong*; Sept. *Ἐζαΐ* s. v. *Ἐζέ*, Vulg. *Ozi*), the father of Palah, which latter was one of those who aided in the reconstruction of the walls of Jerusalem after the Captivity (Neh. iii, 25). B.C. ante 416.

U'zal (Heb. *Uzal*, *יָזָל*, perhaps *separate*; Sept. *Αἰζήλ* and *Αἰζήν*, v. r. *Αἰζήλ* and *Αἰζήλ*; Vulg. *Uzal* and *Huzal*), the sixth named of the thirteen sons of Joktan among the descendants of Shem (Gen. x, 27; 1 Chron. i, 21). B.C. post 2400. See JOKTAN.

Abraham Zakuth, a learned Jewish writer, states that *Sanaa*, the metropolis of Yemen, is by the Jews called *Uzal* (Bochart, *Opera*, i, 114); and in the *Kamis*, *Azal* (or *Uzal*) is said to be the ancient name of Sanaa (Goli-us, *Lex. Arab.* s. v.). This was still further confirmed by Niebuhr, who heard, when travelling in Yemen, the same statement made by Mohammedan natives (*Description de l'Arabie*, iii, 252). It was originally *Awzāl* (Ibn-Khaldūn, ap. Caussin, *Essai*, i, 40, note; *Murāsīd*, s. v.; Gesen, *Lex.* s. v.; Bunsen, *Bibelwerk*, etc.). The printed edition of the *Murāsīd* writes the name *Uzāl*, and says, "It is said that its name was *Uzāl*; and when the Abyssinians arrived at it, and saw it to be beautiful, they said 'San'ā,' which means beautiful: therefore it was called San'ā." The Hebrew name probably appears

in the *Ausara* (*Αὔσαρα* or *Αἰζάρα*) of Ptolemy (*Geogr.* vi, 7), and the *Ausaritis* of Pliny, a city of Arabia Felix, celebrated for its myrrh (*Hist. Nat.* xii, 36). See ETHNOLOGY.

Sanaa is situated in a mountainous region in the centre of Yemen, about 150 miles from Aden and 100 from the coast of the Red Sea. Its commanding position, its strong fortifications, the number of its mosques and minarets, and the size of its houses render it one of the most imposing cities in Arabia. It has a citadel on the site of a famous temple called Beit-Ghumdān, said to have been founded by Shurabil, which was razed by order of Othman. It is abundantly watered by mountain streams; and the gardens, orchards, and fields around it are said to rival in luxuriance and beauty the famous plain of Damascus. In the town of Sanaa there are still some 15,000 Jews, while in the various parts of Yemen their numbers are supposed to amount to 200,000. See Michaelis, *Spicileg.* ii, 164-175; Forster, *Geogr. of Arabia*, i, 143; Ritter, *Erdkunde*, xii, 815-840. See ARABIA.

Ezekiel, in his description of Tyre, says, as rendered in the A. V.: "Dan and Javan going to and fro (Heb. *Meûzāl*, *מְעֻזָּל*; Sept. *ἰξ' Ἀσὶλ*; Vulg. *Mosel*), occupied in thy fairs; bright iron, cassia, and calamus were in thy market" (xxvii, 19). The structure of the passage unquestionably favors the translation, "Dan, and Javan of *Uzal* (*מְעֻזָּל*), conveyed to your markets wrought iron, cassia," etc. There can be little doubt, therefore, that the prophet alludes to the great city of Yemen, the neighborhood of which is known to have been famous for its spices and perfumes. This view is strengthened by the fact that Javan occurs in the *Kamis*, and is said to be a town of Yemen. The expression Javan of Uzal is thus appropriate, for the latter was the name of the capital and of a district connected with it. The names Dedan, Arabia, Kedar, and Sheba, following immediately in the prophetic narrative, indicate the country to which the eye of the sacred writer was directed. See JAVAN.

Uz'za (Heb. *Uzza'*, *עֲזָזָה*, *strength*), the name of three Hebrews. See also UZZAN.

1. (Sept. *A'za*; Vulg. *Oza*.) First named of the two sons of Ehud the Benjamite, born to him after the removal of his former children (1 Chron. viii, 7). B.C. ante 1612. See SHAHARAIM.

2. (Sept. *O'za*; Vulg. *Aza*.) Apparently the proprietor of a garden in which Manasseh and Amon were buried (2 Kings xxi, 18, 26). B.C. ante 642. See below.

3. (Sept. *A'za* v. r. *A'zōw*, *A'zi*, etc.; Vulg. *Aza*.) The head of a family of Nethinim who returned from Babylon with Zerubbabel (Ezra ii, 49; Neh. vii, 51). B.C. ante 536.

UZZA, THE GARDEN OF (Heb. *gan Uzzā*, *עֵדֶן עֲזָזָה*; Sept. *κῆπος Ὀζᾶ*; Vulg. *hortus Aza*), the spot in which Manasseh, king of Judah, and his son Amon, were both buried (2 Kings xxi, 18, 26). It was the garden attached to Manasseh's palace (ver. 18; 2 Chron. xxxiii, 20), and therefore presumably was in Jerusalem. The fact of its mention shows that it was not where the usual sepulchres of the kings were. Josephus (*Ant.* x, 3, 2) simply reiterates the statement of the Bible. It is ingeniously suggested by Cornelius à Lapide that the garden was so called from being on the spot at which Uz-zah died during the removal of the ark from Kirjath-jearim to Jerusalem, and which is known to have retained his name for long after the event (2 Sam. vi, 8). See OBEID-EDOM. The scene of Uzzah's death was itself a threshing-floor (ver. 6), and the change of the word from this, *gōren*, *עֵדֶן*, into *gan*, *עֵדֶן*, garden, would not be difficult or improbable.

Bunsen (*Bibelwerk*, note on 2 Kings xxi, 18), on the strength of the mention of "palaces" in the same paragraph with Ophel (A. V. "forts") in a denunciation of

Isaiah (xxxii, 14), asserts that a palace was situated in the Tyropoeon valley at the foot of the Temple mount, and that this was in all probability the palace of Manasseh and the site of the Garden of Uzzah!—Smith. See UZZAH.

Uz'zah (Heb. *Uzzah*, *וִּזְזָה*, strength, i. q. *Uzza*, which in a few passages stands instead of it; Sept. *Ozā* [and so Josephus] v. r. *Azā*; Vulg. *Oza*), the name of two Hebrews.

1. A Merarite Levite, son of Shimei (q. v.) and father of Shimea (1 Chron. vi, 29 [Heb. 14]; A. V. "Uzza"). B.C. ante 1043. For a refutation of some arbitrary hypotheses of interpreters on this genealogy, see Keil *ad loc.*

2. One of the sons of Abinadab, in whose house at Kirjath-jearim the ark rested for twenty years. In 2 Sam. (vi, 3 in the A. V.; and in verses 6, 7, 8 in the Heb. also) he is invariably called "Uzzah;" but in 1 Chron. (xiii, 7, 9, 11) as invariably "Uzza." The eldest son of Abinadab (1 Sam. vii, 1) seems to have been Eleazar, who was consecrated to look after the ark. Uzzah, probably, was the second, and Ahio (q. v.) the third. The latter two accompanied its removal when David first undertook to carry it to Jerusalem. B.C. 1043. Ahio apparently went before the cart—the new cart (1 Chron. xiii, 7)—on which the ark was placed, and Uzzah walked by its side. The procession, with all manner of music, advanced as far as a spot variously called "the threshing-floor" (ver. 9); "the threshing-floor of Chidon" (ibid.); "the threshing-floor of Nachon" (2 Sam. vi, 6, Sept. "Nachor"). At this point—perhaps slipping over the smooth rock—the oxen (Sept. "the calf") stumbled (Sept. "overturned the ark"). Uzzah caught it to prevent its falling. He died immediately by the side of the ark. His death, by whatever means it was accomplished, was so sudden and awful that, in the sacred language of the Old Test., it is ascribed directly to the divine anger. "The anger of the Lord was kindled against Uzzah, and God smote him there." "For his error," *וְעַל חַטָּאתוֹ*, adds the Hebrew text, "because he put his hand to the ark" (1 Chron. xiii, 10). Josephus (*Ant.* vii, 4, 2) makes the sin to be because he touched the ark not being a priest (see below). But the narrative seems to imply that there was a rough, hasty handling of the sacred coffer. The event produced a deep sensation. David, with a mixture of awe and resentment, was afraid to carry the ark farther; and the place, apparently changing its ancient name [see UZZA, GARDEN OF], was henceforth called "Perez-Uzzah" (q. v.), the "breaking" or "disaster" of Uzzah (2 Sam. vi, 8; 1 Chron. xiii, 11).—Smith. See DAVID.

Josephus distinctly says that Uzzah was of a Levitical family (*Ant.* vi, 1, 4). It was because Abinadab, his father, was a Levite, no doubt, that the ark was taken into his house at Kirjath-jearim, as it was afterwards taken into the house of Obed-edom, the Gittite, for the same reason. Nor can it be very well understood how, if Abinadab was not a Levite, his son Eleazar should have been consecrated to take care of the ark (1 Sam. vii, 2). It is possible that Abinadab (Sept. *Ἀμινάδαβ*, Josephus, *Ἀμινάδαβος*) was the same as *Amminadab*, spoken of in 1 Chron. xv, 10 as one of the chiefs of the Levites appointed by David to bring up the ark from the house of Obed-edom to Jerusalem. It is most reasonable to suppose that the person who had entertained the ark at Kirjath-jearim should have the honor of attending its coming-up afterwards from the house of Obed-edom to Jerusalem; and Amminadab was a son of Uzziel, and therefore of the family of Kohath, who were the persons appointed to bear the ark (vi, 18; Numb. iv, 15). But they were forbidden to touch the ark. It was only a priest of Aaron's family, i. e. of the high-priest's family, that was allowed to touch the ark (ver. 5, 15). The sin of Uzzah, therefore, was not, as commonly represented, that of a layman or an undisciplined person presuming to encroach upon the office of

the ministry, but, if an irregularity at all in this respect, the sin of those who, being ministers, dare to arrogate to themselves powers and prerogatives which belong only to higher officers.—Fairbairn. The whole proceeding was very disorderly, and contrary to the distinct and far from unmeaning regulations of the law, which prescribed that the ark should be carried on the shoulders of the Levites (Exod. xxv, 14), whereas here it was conveyed in a cart drawn by oxen. The ark ought to have been enveloped in its coverings, and thus wholly concealed before the Levites approached it; but it does not appear that any priest took part in the matter, and it would seem as if the ark was brought forth, exposed to the common gaze, in the same manner in which it had been brought back by the Philistines (1 Sam. vi, 13-19). It was the duty of Uzzah, as a Levite, to have been acquainted with the proper course of proceeding; he was therefore the person justly accountable for the neglect, and the judgment upon him seems to have been the most effectual course of insuring attention to the proper course of proceeding, and of checking the growing disposition to treat the holy mysteries with undue familiarity. That it had this effect is expressly stated in 1 Chron. xv, 2, 13.—Kilto. See ARK.

Uz'zen-she'rah (Heb. *Uzzēn She'rah*, *וִּזְזֵן שֵׁרָה*, ear [i. e. point] of *She'rah*; Sept. *νιοί Οὐζάν Σερῶδ*; Vulg. *Ozensera*), a place in the vicinity of Beth-horon, founded or rebuilt by Sherah (q. v.), an Ephraimitess (1 Chron. vii, 24). The name appears to indicate some salient feature of the surface or position. It has been thought to correspond with the present *Beit Sira*, which is shown in the maps of Van de Velde and Tobler as on the north side of the Wady Suleiman, about three miles south-west of Beitūr et-Tahta. It is mentioned by Robinson (in the lists in Appendix to vol. iii of *Bibl. Res.* [1st ed.], p. 120), and also by Tobler (*Dritte Wanderung*, p. 188). It is doubtful, however, if the boundary of Ephraim ever extended so far south, and hence perhaps we should prefer *Beit Sirah*, a village with two fountains in Wady Budrus, two and a half miles east of Beitūr el-Fohka; or if both these identifications fail, possibly the modern village *Suffa*, in Wady Budrus, about one mile north-west of Beitūr et-Tahta (Robinson, *Bibl. Res.* ii, 250).

Uz'zi (Heb. *Uzzi*, *וִּזִי*, strong [or my strength, or contr. for *Uzziah*]; Sept. *Ozī*, with occasional v. rr.; Vulg. *Ozi* or *Azzi*), the name of six Hebrews.

1. First named of the six sons of Tola son of Issachar (1 Chron. vii, 2), and father of five sons who became military chiefs (ver. 3). B.C. post 1874.

2. Second named of the five sons of Bela son of Benjamin, and, like the preceding one, chief warrior (1 Chron. vii, 7). B.C. post 1874.

3. A high-priest, son of Bukki and father of Zerabiah (1 Chron. vi, 5, 6, 51; Ezra vii, 4). B.C. cir. 1400. Josephus in one passage (*Ant.* vii, 11, 5) gives his name and position correctly (*Ozī, Ozis*); but in another (*Ant.* viii, 1, 3) he calls either him or his son Joatham (*Ιωάθαμ*).

4. Son of Michri and father of Elah among the ancestors of a Benjamite family in Jerusalem after the Exile (1 Chron. ix, 8). B.C. ante 536.

5. Son of Bani, chief of the Levites at Jerusalem after the Captivity (Neh. xi, 22). B.C. 536.

6. A priest, head of the "course" of Jedaiah in the time of the high-priest Joiakim (Neh. xii, 19). B.C. cir. 500. He was probably the same with one of the priests who sang at the consecration of the new walls of Jerusalem (ver. 42).

Uzzi'a (Heb. *Uzzi'a*, *וִּזִי'א*, prob. for *Uzziah* [q. v.]; Sept. *Ozī'a*; Vulg. *Ozi'a*), one of David's subordinate warriors, called an "Ashterathite" (q. v.), probably as having come from Ashtaroth beyond the Jordan. B.C. 1053. See DAVID.

Uzzi'ah (Heb. *Uzziyah*, זְצִיָּה, *strength of Jehovah* [but in the prolonged form *Uzziya'hu*, זְצִיָּהּ, except in 2 Kings xv, 13, 30; 1 Chron. vi, 24; Ezra x, 21; Neh. xi, 4; Hos. i, 1; Amos i, 1; Zech. xiv, 5]; Sept. usually 'Oziac, but with many v. rr.; Vulg. *Ozius* or *Azias*), the name of five Hebrews. See also **Uzzia**.

1. A Kohathite Levite, son of Uriel and father of Shaul among Samuel's ancestors (1 Chron. vi, 24 [Heb. 19]). B.C. cir. 1515. He is apparently the same with **AZARIAH** (q. v.) the son of Joel and father of Zephaniah in the parallel list (ver. 36).

2. The father of Jehonathan, David's overseer of depositories in kind (1 Chron. xxvii, 25). B.C. cir. 1053.

3. The tenth king of the separate kingdom of Judah, B.C. 808-756. Like No. 1 above, he is sometimes called **AZARIAH** (q. v.). By Josephus (*Ant.* ix, 10, 3 sq.), and in the New Test. (Matt. i, 8, 9), the name occurs in the same Greek form as in the Sept. ('Oziac). The date of the beginning of Uzziah's reign (2 Kings xv, 1) in the twenty-seventh year of Jeroboam II is reconciled by Usher and others with the statement that Uzziah's father, Amaziah, whose whole reign was twenty-nine years only, came to the throne in the second year of Joash (xiv, 1); and by the supposition that Jeroboam's reign had two commencements, the first not mentioned in Scripture, on his association with his father, Joash, during the Syrian war, B.C. 835. Keil, after Capellus and Grotius, more violently supposes that the number 10 is an error of the Hebrew copyists for 27, 17, or 23, so that instead of twenty-seventh of Jeroboam we ought to read thirteenth, fourteenth, etc.

After the murder of Amaziah, his son Uzziah was chosen by the people to occupy the vacant throne, at the age of sixteen; and for the greater part of his reign of fifty-two years he lived in the fear of God, and showed himself a wise, active, and pious ruler. He began his reign by a successful expedition against his father's enemies, the Edomites, who had revolted from Judah in Jehoram's time, eighty years before, and penetrated as far as the head of the Gulf of Akaba, where he took the important place of Elath, fortified it, and probably established it as a mart for foreign commerce, which Jehoshaphat had failed to do. This success is recorded in 2 Kings (xiv, 22), but from 2 Chron. (xxvi, 1, etc.) we learn much more. Uzziah waged other victorious wars in the South, especially against the Melunim (q. v.), or people of Maan, and the Arabs of Gurbal. A fortified town named Maan still exists in Arabia Petraea, south of the Dead Sea. The situation of Gurbal (q. v.) is unknown. (For conjectures more or less probable, see Ewald, *Gesch.* i, 321.) Such enemies would hardly maintain a long resistance after the defeat of so formidable a tribe as the Edomites. Towards the west, Uzziah fought with equal success against the Philistines, levelled to the ground the walls of Gath, Jabneh, and Ashdod, and founded new fortified cities in the Philistine territory. Nor was he less vigorous in defensive than offensive operations. He strengthened the walls of Jerusalem at their weakest points, furnished them with formidable engines of war, and equipped an army of 307,500 men with the best inventions of military art. He was also a great patron of agriculture, dug wells, built towers in the wilderness for the protection of the flocks, and cultivated rich vineyards and arable land on his own account. He never deserted the worship of the true God, and was much influenced by Zechariah, a prophet who is only mentioned in connection with him (2 Chron. xxvi, 5); for, as he probably died before Uzziah, he is thought not to have been the same as the Zechariah of Isa. viii, 2. So the southern kingdom was raised to a condition of prosperity which it had not known since the death of Solomon; and as the power of Israel was gradually falling away in the latter period of Jehu's dynasty, that of Judah extended itself over the Ammonites and Moabites, and other tribes beyond Jordan, from whom Uzziah exacted tribute. See

2 Chron. xxvi, 8, and Isa. xvi, 1-5, from which it would appear that the annual tribute of sheep (2 Kings iii, 4) was revived either during this reign or soon after.

The end of Uzziah was less prosperous than his beginning. Elated with his splendid career, he determined to burn incense on the altar of God, but was opposed by the high-priest Azariah and eighty others. (See Exod. xxx, 7, 8; Numb. xvi, 40; xviii, 7.) The king was enraged at their resistance, and, as he pressed forward with his censer, was suddenly smitten with leprosy, a disease which, according to Gerlach (*ad loc.*), is often brought out by violent excitement. In 2 Kings xv, 5 we are merely told that "the Lord smote the king, so that he was a leper unto the day of his death, and dwelt in a several house;" but his invasion of the priestly office is not specified. This catastrophe compelled Uzziah to reside outside the city, so that the kingdom was administered till his death by his son Jotham as regent. Uzziah was buried "with his fathers," yet apparently not actually in the royal sepulchres (2 Chron. xxvi, 23). During his reign an earthquake (q. v.) occurred, which, though not mentioned in the historical books, was apparently very serious in its consequences, for it is alluded to as a chronological epoch by Amos (i, 1), and mentioned in Zech. xiv, 5 as a convulsion from which the people "fed." Josephus (*Ant.* ix, 10, 4) connects it with Uzziah's sacrilegious attempt to offer incense, and this is likely, as it agrees with other chronological data. See **AMOS**.

The first six chapters of Isaiah's prophecies belong to this reign, and we are told (2 Chron. xxvi, 22) that a full account of it was written by that prophet. Some notices of the state of Judah at this time may also be obtained from the contemporary prophets Hosea and Amos, though both of these labored more particularly in Israel. We gather from their writings (Hos. iv, 15; vi, 11; Amos vi, 1), as well as from the early chapters of Isaiah, that though the condition of the southern kingdom was far superior, morally and religiously, to that of the northern, yet that it was by no means free from the vices which are apt to accompany wealth and prosperity. At the same time, Hosea conceives bright hopes of the blessings which were to arise from it; and though doubtless these hopes pointed to something far higher than the brilliancy of Uzziah's administration, and though the return of the Israelites to "David their king" can only be adequately explained of Christ's kingdom, yet the prophet, in contemplating the condition of Judah at this time, was plainly cheered by the thought that there God was really honored, and his worship visibly maintained, and that therefore with it was bound up every hope that his promises to his people would at last be fulfilled (Hos. i, 7; iii, 3). It is to be observed, with reference to the general character of Uzziah's reign, that the writer of the second book of Chronicles distinctly states that his lawless attempt to burn incense was the only exception to the excellence of his administration (2 Chron. xxvii, 2).—Smith. See **JUDAH**, **KINGDOM** or.

4. Son of Zechariah and father of Athaiah, the last descendant of Perez the son of Judah resident in Jerusalem after the Exile (Neh. xi, 4). B.C. ante 536.

5. A priest of the "sons" of Harim who renounced his Gentile wife married after the return from Babylon (Ezra x, 21). B.C. 458.

Uzzi'el [some *Uz'ziel*] (Heb. *Uzzi'el*, זְצִיִּיל, *my strength is God*, or, perh. simply *strength of God*=*Uzziah* [q. v.]; Sept. *O'zqal* or *O'zujal*, with some v. rr.; Vulg. *Oziel*), the name of six Hebrews.

1. Third named of the five sons of Bela son of Benjamin, heads of valiant families (1 Chron. vii, 7). B.C. post 1874.

2. Last named of the four sons of Kohath (Exod. vi, 18; 1 Chron. vi, 2), also father of four sons (Exod. v, 22; 1 Chron. xxiii, 12, 20; xxiv, 24), and uncle of Aaron (Lev. x, 4). B.C. ante 1658. His descendants

were called after him (Numb. iii, 19, 27; 1 Chron. xxvi, 23), Elizaphan being their chief in Moses' time (Numb. iii, 30), and Amminadab in David's (1 Chron. xv, 10).

3. Third named of the fourteen "sons" of Heman appointed by David as Levitical musicians (1 Chron. xxv, 4); the same with AZAREEL (q. v.) the head of the eleventh band of orchestral performers (ver. 18).

4. Second named of the two sons of Jeduthun among the Levites, who, in the days of king Hezekiah, took an active part in cleansing and sanctifying the Temple after all the pollutions introduced by Ahaz (2 Chron. xxix, 14). B.C. 726.

5. Last named of the four "sons" of Ishi, Simeonitish chieftains who, after the successful expedition of the

tribe to the valley of Gedor, went at the head of five hundred men, in the days of Hezekiah, to Mount Seir, and smote the remnant of the Amalekites who had survived the previous slaughter of Saul and David, and took possession of their country, and dwelt there "unto this day" (1 Chron. iv, 42). B.C. cir. 712.

6. A "son of Hashaiah, of the goldsmiths," who repaired part of the walls of Jerusalem after the Captivity (Neh. iii, 8). B.C. 446.

Uzzi'elite (Heb. *Uzzieli*, *וְזִיְלִי*, with the art., a patronymic; Sept. *Ozūlā*; Vulg. *Ozēdites* or *Ozihelites*), the family designation (Numb. iii, 27; 1 Chron. xxvi, 23) of the descendants of Uzziel (q. v.) the Levite. In David's time they numbered 112 adult males (xv, 10).

V.

Vacant See, the territory under the control of a bishop which has become vacant by the death or cession of the episcopal head. In the ancient African Church it was under the control of an *inventor* or *intercessor* (q. v.), who was required to fill the vacancy within one year or give place to another. But by the 25th canon of the General Council of Chalcedon (q. v.) the metropolitan was required to fill the vacant see within three months, if possible, under pain of ecclesiastical censure. It devolved upon the metropolitans to care for these sees during the vacancy, but the Council of Chalcedon provided that the revenues should be cared for by the *æconomus*, or steward of the Church. See Bingham, *Christ. Antiq.* bk. ii, ch. xi; xv; xvi.

Vacant Sundays, in liturgical phrase, are the four Sundays after Ember weeks (q. v.) which have no proper office, owing to the protracted service of ordination on the previous night; the Sunday between Christmas and Jan. 1, because preoccupied with another office; and the fourth Sunday in Advent, because the pope gave himself to almsgiving, as on Vacant Saturday, the day before Palm-Sunday. See Walcott, *Sacred Archaeol.* s. v.

Vacantivi (Græcized *βακάντιβοι*) is a name applied to wandering clergymen, in ancient times, who deserted their own churches and would fix on no other, but wandered about from place to place. Such persons, having neither letters dismissory nor letters commendatory, and to be suspected either as deserters or as persons guilty of some misdemeanor who fled from ecclesiastical censure, were not allowed by the laws of the Church to be admitted either to ecclesiastical or lay communion. So strict were the laws of the ancient Church in reference to the inferior clergy that they might not, upon any account, remove from the Church to which they were first appointed without the consent of the bishop who ordained them. See Bingham, *Christ. Antiq.* bk. vi, ch. iv. See VAGANTES.

Vacation, in clerical phrase, is the time from the death, resignation, or removal in any other way, of a bishop or other ecclesiastical officer, until the office is filled by another person; also the season of rest given to a minister during some part of the year.

VACATION of a BENEFICE is the act of making vacant a rectory, vicarage, or other ecclesiastical benefice by the death, resignation, or deprivation of its legal holder.

VACATION of a BISHOPRIC. See VACANT SEES.

Vaccaro, Andrea, an Italian painter who was born at Naples in 1598. He studied with Massimo Stanzioni, after whose death he was considered the ablest artist of the Neapolitan school, and was without a rival until the return of Luca Giordano from Rome with a new style. In the contest for the large altarpiece in the new church of Santa Maria dei Pianti, representing the Virgin liberating the city from pestilence,

Vaccaro was successful. But Giordano soon carried all before him in art, and Vaccaro, attempting to compete with him in fresco, which he had not studied in his youth, lost his reputation. One of his best works is a *Holy Family*, at Naples. He died at Naples in 1670. See Spooner, *Biog. Hist. of the Fine Arts*, s. v.

Vaccaro, Domenico Antonio, an Italian sculptor and architect, born at Naples in 1680. After receiving a good education he studied architecture, and attained considerable eminence. His principal works are, at Naples, the church called Di Monte Calvino, the Teatro Nuovo, the Church of San Michele Arcangelo, and other buildings; in other parts of Italy, the Tarcia Palace, at Portici; the Church of San Giovanni, at Capua, and others. See Spooner, *Biog. Hist. of the Fine Arts*, s. v.

Vaccary (Lat. *vacca*, "a cow"), an old monastic term for a cow-house.

Vach (Sanskrit, *speech*), another name of *Saraswati* (q. v.), the wife, or female energy, of the Hindû god Brahma.

Vachaspâti (Sanskrit, *vach*, "speech," and *patî*, "lord"), in Hindû mythology, is one of the usual names of *Vrihaspati* (q. v.), the instructor of the gods.

Vachery, a term frequently found in monastic inventories and domestic MSS., denoting a pen or enclosure for cows.

Vacûna, in ancient Italian mythology, was a goddess of agriculture, who was worshipped after harvesting time, and was honored by rest.

Vade-mecum (Lat. *vade*, "go," and *mecum*, "with me"), a book of prayers which a person carries with him as a constant companion.

Vaeck, ALARDUS, a Lutheran theologian of the 17th century, is the author of *Tractatus de Principio Prime Theologie Jesuiticæ*:—*De Judice Controversiarum*:—*Contra Pontificis de Reducenda Unione Ecclesiastica*. See Jöcher, *Allgemeines Gelehrten-Lexikon*, s. v. (B. P.)

Vaga, PIERINO DEL, an Italian artist, was born at a small village near Florence in 1500. His true name was *Pietro Buonmacorsi*, but he was called by the above name after Del Vaga, one of his instructors, who led him to Rome, and introduced him into the school of Raphael. At an early age he was employed to assist in the decorations of the Vatican (q. v.), executing a number of the finest frescos from the designs of Raphael. One of the earliest works of his own design and execution was the *Creation of Eve*, in the Church of San Marcello, which Lanzi pronounces a "most finished performance." He fled from Italy at the sacking of Rome by the Spaniards in 1527, and in 1528 arrived, in a state of distress, at Genoa, where he was employed by prince Doria in decorating his magnificent palace. It was here that he achieved his greatest distinction. He executed many works in Lucca, Pisa, Genoa, and elsewhere. Late in life he returned to Rome, where he was much employed

by the pope, Paul III, who gave him an annuity of three hundred ducats. About 1543 he undertook the direction of the paintings for the Sala Regia [see VATICAN], but before the completion of this work he died, in 1547. See Spooner, *Biog. Hist. of the Fine Arts*, s. v.

Vagantes (CLERICI), or **Vagi**. This title was, in the language of the ancient canon law, applied to clergymen who were not employed in and supported by a definite office in the Church. Such "acephalous," wandering clergymen were at times very numerous, especially in countries which were not fully converted to Christianity. It was not always possible to assign a definite parish to the missionary who was sent forth to labor among a heathen population. But the *Vagantes* were found also in Christian lands. Sometimes they were persons ordained in order to do missionary work whom persecution or fear had compelled to return; and often they were impostors who had fraudulently secured ordination at the hands of some careless prelate. This class of persons was always disposed to traffic with its ministerial functions, not only in the way of assisting regularly inducted clergymen in their work, for pay, but also, and much more frequently, by accepting service as chaplains in the retinue of nobles, and stooping to the performance of the most menial and degrading offices. Decrees against such clergymen were issued, in occasional instances, as early as the 4th and 5th centuries. The Council of Chalcedon positively prohibited the *ordinatio absoluta s. vaga* (can. 6, *ὑποτροπὴ ἀπολῶτος*), and the older canons enforced the principle "Ne quis vage ordinetur." Complaints against the *Vagantes* became especially numerous in the Carlovingian period, and were often renewed. See the *Capitularies* of 789 and 794 by Charlemagne, and comp. Concil. Mogunt. An. 847, and C. Ticinense, An. 850, in Mansi, *Concil.* xiv, 906, 938; Agobard of Lyons, *De Privilegio et Aute Sacerdotii*; the Vita of Godehard of Hildesheim, iv, 26; Gerhoh of Reichersberg, *Liber de Corrupta Eccles.* in Baluz, *Miscellan.* v, 89 sq., and *Tractat. adv. Simoniacos*, in Martène and Durand, *Thes. Nov. Anecd.* v, 1459 sq. Bishops in the Church of Rome are forbidden to confer superior orders on a clergyman who has no definite *titulus beneficii*, on penalty of becoming personally responsible for his support (c. 4 et 16, x, *De Prob. et Dignit.* iii, 5; Cone. Trid. Sess. xxiii, c. 23, *De Ref.*). The *Vagantes* may now be considered as having ceased to exist in that Church. See Bingham, *Orig. Eccl.* ii, 387 sq.; Planck, *Gesch. d. christl. Gesellschaftsverf.* i, 375; ii, 100 sq.; Neander, *Church Hist.* vol. ii; Du Cange, *Glossar. Med. et Inf. Latinit.* vi, 1392; Herzog, *Real-Encyclop.* s. v. See VACANTIV.

Vagnucci, FRANCESCO, an Italian painter, was a native of Assisi, where he flourished in the first part of the 16th century. There are some of his works in the churches of that city, which Lanzi says are "executed in the spirit of the old masters," i. e. somewhat dry and hard. See Spooner, *Biog. Hist. of the Fine Arts*, s. v.

Vagrants. See GYROVAGI.

Vagum Ministerium, a name applied to the minister who is ordained without any fixed congregation of which to take the oversight.

Vaiano (or **Vajano**), ORAZIO (sometimes written *Vaiani*), an Italian painter, born at Florence about 1550. He resided a long time at Milan, where he executed many works for the churches and for individuals. See Spooner, *Biog. Hist. of the Fine Arts*, s. v.

Vail. In the A. V. of the Holy Scriptures this orthography is found indiscriminately together with "veil," both for the piece of female apparel and for the holy screen of the Tabernacle and Temple. In this art. we propose, for the sake of convenience, to consider the latter only, leaving the dress for the heading VEIL.

The word exclusively and invariably employed for the "vail" between the holy and most holy places is *ἱερώς*, *paróket*, a fem. gerundial form from *ἵκεῖν*, to

debar; and hence signifying *separation*, or screen. The Sept. renders it by *καταπέτασμα*, which is adopted in the New Test. (Matt. xxvii, 51; Mark xv, 38; Luke xxiii, 45; Heb. vi, 19; ix, 3; x, 20). Josephus employs (*Ant.* iii, 6, 5) the corresponding Greek verb *καταπέτασμα*. The Heb. term occurs in Exod. xxvi, 31, 33, 35; xxvii, 21; xxx, 6; xxxv, 12; xxxvi, 35; xxxviii, 27; xxxix, 34; xl, 3, 21, 22, 26; Lev. iv, 6, 17; xvi, 2, 12, 15; xxi, 23; xxiv, 2; Numb. iv, 5; xviii, 7; 1 Chron. iii, 14.

We learn from these passages (especially Exod. xxvi, 31) that the screen in question was a heavy piece of cloth, composed of white linen striped across with woollen threads of "blue, purple, and scarlet," either in a triple strand or more probably in alternate bands, and further ornamented with figures of cherubim, embroidered apparently with the needle, on one or both sides, with gold thread. This was suspended by means of silver hooks and rods upon the top of the pillars placed for that purpose in the Tabernacle, and doubtless likewise in the Temple. In the Herodian structure, as we learn from the Talmudists, the vail was double, and of very great thickness, so as to hang vertically by its own weight, and impenetrably close the interior from view. It was this piece of tapestry that was rent by the earthquake at Christ's crucifixion (Matt. xxvii, 51, and parallels) to signify, no doubt, that the way of access to God was then opened to all (see the monographs on the event in Volbeding, *Index Programmatum*, p. 65). This explanation corresponds with the apostle's key to the symbolism of the vail, which he says represented our Lord's human flesh torn by the atonement (Heb. x, 20). See Brachius, *De Velis Tabernaculi et Templi* (Vitemb. 1718). See TABERNACLE; TEMPLE.

Vail, Edward J., a Presbyterian minister, was born in 1811. He entered the New York University, and after finishing the course graduated in 1841. He soon after entered the Union Theological Seminary, and graduated in 1844. In 1845 he became a stated supply in the Church at Oriskany, N. Y., where he was ordained. After remaining a year at this place, he removed to Brooklyn, N. Y., where he was without charge until 1847, when he was called to supply the pulpit of the Church at Jamesville, N. Y. In 1848 he was called to the pastorate of the Church in Babylon, L. I. He remained in this charge until 1851, when he accepted a call to Uniontown, Cal., where he remained three years, and removed to San Francisco, and was without charge three years. He was then called to Crescent City, and supplied the pulpit four years, when he returned to San Francisco, and died Nov. 22, 1876. (W. P. S.)

Vail, Solomon T., a Methodist Episcopal minister, was born in 1814, in Saratoga County, N. Y. He was converted in 1845; received on trial by the Iowa Conference in 1849; and after serving at Anamosa and Big Woods missions, he was, in 1851, admitted into full connection, ordained deacon, and reappointed to Big Woods mission, where he died, July 28, 1852. Mr. Vail was intellectual, pious, and a young man of great promise. See *Minutes of Annual Conferences*, 1852, p. 127.

Vaill, Joseph (1), a Congregational minister, was born at Litchfield, Conn., July 14, 1751. He graduated with honor at Dartmouth College in 1778; studied theology privately; was licensed to preach by Litchfield Association in May, 1779; and ordained pastor of the Church in Hadlyme, Conn., Feb. 9, 1780, in which relation he continued fifty-nine years. He died Nov. 21, 1838. He was a good scholar, an excellent preacher, and distinguished for conscientiousness and untiring devotedness to his work. Besides frequent contributions to periodicals, he published a poem entitled *Noah's Flood* (1796);—another poem entitled *An Address to a Deist*;—and an *Ordination Sermon* (1814). See Sprague, *Annals of the Amer. Pulpit*, iv, 26, note.

Vaill, Joseph (2), D.D., a minister of the Congregational Church, son of the preceding, was born

at Hadlyme, Conn., July 28, 1790. He graduated from Yale College in 1811, and immediately began to teach. For six months he was principal of Morris Academy in Litchfield, Conn., and for the same period had charge of a high-school in Salisbury, Conn. Meanwhile he was studying theology. His first pastorate was in Brimfield, Conn., where he was ordained and installed Feb. 2, 1814. In 1834 he accepted a call to the Second Church of Portland, Me., where he was installed Oct. 15. About this time Amherst College was peculiarly involved, and it was necessary to appoint some one to collect funds in aid of it. Mr. Vaill was unanimously chosen. For a long time he had been a trustee of the institution. At this time (1841) he was again pastor at Brimfield, having returned to that charge in 1837, and was loath to accept the agency, but finally consented and removed to Somers, Conn., where he resided nine and a half years, and served the Church there as pastor. At the age of sixty-four he left Somers and settled as pastor of the Second Congregational Church in Palmer, Mass., and he remained in this pastorate until Oct. 13, 1867, nearly thirteen years. His published sermons, addresses, etc., were about ten in number. His manner in preaching was energetic, and he employed gesture and emphasis effectively. In Brimfield and Somers he was chairman of the school committee. For nearly forty years he was a trustee of Monson Academy. While in Portland, he belonged to corporations of Bangor Theological Seminary and of Gorham Academy. The last year of his life he was elected to the Massachusetts House of Representatives, and was named a member of the joint committee on the License Law, before which he read a paper on the subject. He died at Palmer, Feb. 21, 1869. See *Cong. Quar.* 1870, p. 1.

Vaill, William Fowler, a Congregational minister, the son of Rev. Joseph and the father of the Rev. Thomas Scott Vaill, was born at Hadlyme, Conn., June 7, 1783. He was prepared for college by his father, and, mainly by his own exertions, supported himself at Yale College, where he graduated in 1806. He studied theology with Rev. Asahel Hooker, was licensed to preach in 1808, and for twelve years was pastor at North Guilford, Conn. In 1820 he was appointed by the United Foreign Missionary Society superintendent of a mission among the Osage Indians, then occupying the Arkansas country, where, amid trials and hardship, hope and fear, he labored fourteen years, or until the abandonment of the mission on account of the removal of the Indians farther west. He returned to New England, where he preached in various places, until he accepted a commission from the Home Missionary Society of Connecticut as missionary to Illinois. He at once went to Wethersfield, Ill., where he was pastor seven years, and where for twenty-seven years he made his headquarters for constant and faithful missionary toil. He died with the harness on at Wethersfield, Feb. 24, 1865. Mr. Vaill loved his work intensely, and his ardent piety carried him forward in it in labors most exhausting. See *Cong. Quar.* 1865, p. 422.

Vaillant, WALLERANT, a Flemish painter and engraver, who was born at Lisle in 1623, and died at Amsterdam in 1677, is the author of several prints of sacred subjects from various masters, for which see Spooner, *Hist. Dict. of the Fine Arts*, s. v.

Vainglory. See VANITY.

Vairagis is a Hindû term denoting persons devoid of passion, and applied to all religious mendicants who profess to have separated themselves from the interests and emotions of the world. It is used in particular to designate the mendicant *Vaishnavas* (q. v.) of the Ramananda class.

Vaisheshika is the name of one of the two great divisions of the Nyaya school of Hindû philosophy, agreeing with the Nyaya itself in its analytical method of treating the subjects of human research, but differing

from it in the arrangement of its topics, and in its doctrine of atomic individualities, or *viseshas*, from which the name is derived. Kanada (*kana*, minute, and *ada*, eating) is the reputed founder of the school, although nothing is known as to his history or date. He arranges the subject-matter of his works under six *padarthas*, or topics, as follows: (1) substance, (2) quality, (3) action, (4) generality, (5) atomic individuality, and (6) coinherence. Later writers of the school add to these a seventh, viz. non-existence. According to this system, understanding is the quality of soul, and the instruments of right notion (knowledge from the contact of sense with its object, and inference) are treated of under the head of *buddhi*, or understanding. See *Bibliotheca Indica* (Calcutta, 1850); Colebrooke, *Miscell. Essays* (Lond. 1837), vol. i; Müller [Max], in *Zeitschrift der deutschen morgenl. Gesellschaft*.

Vaishnavas is the name of one of the three great divisions of Hindû sects, designating the worshippers of Vishnu, from which the word is derived. The common link of all the sects comprised under this name is their belief in the supremacy of Vishnu over the gods Brahma and Siva. Their difference consists in the character which they assign to this supremacy, and to the god Vishnu himself, in their religious and other practices, and in their sectarian marks. The following are some of the principal sects of the Vaishnavas:

1. The *Ramanujas*, or *Sri Vaishnavas*, or *Sri Sampradayins*, who derive their origin from Ramanuja, a celebrated reformer, native of Perumbur, in the south of India. He was born about the middle of the 12th century, and is considered by his followers as an incarnation of Seshha, the serpent of Vishnu. The most striking peculiarity of this sect is the preparation as well as the scrupulous privacy of their meals; for should the meal, during its preparation, or while they are eating, attract even the looks of a stranger, the operation is instantly stopped, and the viands buried in the ground. The marks by which they are distinguished from other sects are two perpendicular lines drawn with white earth from the root of the hair to the commencement of each eyebrow, and a transverse streak connecting them across the root of the nose; in the centre is a perpendicular streak of red, made with red sanders, besides other marks painted on the breast and arms.

2. The *Ramanandas*, or *Ramarats*, who derive their name from Ramananda, a descendant by discipleship from Ramanuja, who probably lived about the close of the 14th century. They are by far the most numerous class of sectaries in Gangetic India, especially in the district of Agra, where they constitute seven tenths of the ascetic population. They belong chiefly to the poorer and inferior classes, with the exception of the Rajputs and military Brahmins. The most important difference between them and the Ramanujas consists in the fact that Ramananda abolished the distinction of caste among the religious orders, and taught that one who quitted the ties of nature and religion shook off all personal distinction.

3. The *Kabir Panthis*, founded by Kabir, the most celebrated of the twelve disciples of Ramananda, belonging, therefore, to the end of the 14th century. They believe in one God, the creator of the world, but in opposition to the Vedanta (q. v.), they assert that he has a body formed of the five elements of matter, and a mind endowed with the three *gunas*, or qualities; he is eternal and free from the defects of human nature, but in other respects does not differ from man. The pure man is his living resemblance, and after death becomes his equal and associate. They have no peculiar mode of dress, and the sectarian marks are not considered important, though worn by some.

4. The *Vallabhabacharyas*, or *Rudra Sampradayins*, founded by Vallabha Swamin, or Vallabha Acharya, born in 1479. The principles of the sect, as laid down by Vallabha, are as follows: (1) To secure the firm support of Vallabhabacharya; (2) To exercise chiefly the

worship of Krishna (incarnation of Vishnu); (3) To forsake the sense of Vaidik opinion, and be a suppliant to Krishna; (4) To sing praises with feelings of humility; (5) To believe that Vallabha is a Gopi, or mistress of Krishna; (6) To swell the heart with the name Krishna; (7) To forsake his commands not for a moment; (8) To put faith in his words and doings; (9) To adopt the society of the good, knowing them divine; and (10) To see not the faults, but speak the truth. They are very ignorant and superstitious.

5. The *Madhacharyas*, or *Brakma Sampradayins*, founded by a Brahmin named Madhwacharya, who was born in 1199. The distinguishing doctrine of this sect is the identification of Vishnu with the Supreme Soul as the pre-existent cause of the universe; and this primeval Vishnu they affirm to be endowed with real attributes, and, although indefinable, to be most excellent and independent. There is also a dependent principle, a living soul dependent on the Supreme. They deny the absorption of the human soul into the universal spirit, and the loss of independent existence after death.

6. The *Vaishnavs of Bengal*, founded by Chaitanya, who was born at Nadiya in 1485. The most important innovation of this sect, in respect to doctrine, is the dogma of *bhakti*, or faith, which they declare to be infinitely more efficacious than abstraction, than knowledge of the Divine nature, than the subjugation of the passions, or anything deemed most meritorious. The *bhakti*, or faith, comprehends five stages: quietism, as that of sages; servitude, which every votary takes upon himself; friendship for the Deity; tender affection for the Deity, of the same nature as love of parents for their children; and the highest degree of affection, such passionate attachment as the Gopis felt for their beloved Krishna.

Besides these, there are many other sects of less importance. Those enumerated above are divided into smaller sects or divisions. See Wilson, *Sketch of the Relig. Sects of the Hindūs*, in *Works* (Lond. 1862), vol. i; Karsandas Mulji, *History of the Sect of the Mahanjas* (ibid. 1865).

Vaishya is one of the Hindū castes said to have sprung from the thigh of Brahma. They are the productive capitalists, and their duties are to keep cattle, carry on trade, lend on interest, cultivate the soil, and turn their attention to every description of practical knowledge. See INDIAN CASTE.

Vaison, COUNCIL OF (*Concilium Vaisense*). Vaison is a village of France, in Vaulcure, fifteen miles north-east of Orange, on the Ouvèze. Two ecclesiastical councils were held there, as follows:

I. Was held Nov. 13. 442, under the bishop Auspicius. Neetarius, bishop of Vienne, was present, and publicly maintained that the Father, Son, and Holy Spirit are but one nature, one power, one divinity and virtue. Ten canons were published.

1. Declares that it shall not be necessary to examine the Gallican bishops before receiving them to communion, but that it shall be enough to be assured that they are not excommunicated.

2. Declares that the offerings of penitents dying suddenly without receiving the communion may nevertheless be received, and that mention is to be made of their names at the altars. It permits their burial.

3. Orders priests and deacons to receive the holy chrism at Easter from their own bishops.

6. Forbids all intimacy with the enemies of religion.

9 and 10. Are for the protection of the reputation of those who, out of charity, take charge of deserted children.

See Mansi, *Concil.* iii. 1456.

II. Was held Nov. 5. 529. Twelve bishops attended, among whom were St. Casarius of Arles, who presided. Five canons were published.

1. Enjoins that parish priests shall receive into their houses young readers (being single), according to the excellent custom in Italy; that they shall provide for them, and teach them to chant the Psalms, and make them read and study the Holy Scriptures.

2. Declares that a priest may preach in his own parish, but that when he is ill, the deacons shall read the Homilies of the fathers.

3. Orders the frequent repetition of the *Kyrie Eleison* at matins, mass, and vespers; and that the *Sanctus* be sung three times at mass even in Lent, and in masses for the dead.

4. Orders that mention be made of the pope at every mass.

5. Orders that the verse "As it was in the beginning," etc., shall be chanted after the *Gloria Patri*.

See Mansi, *Concil.* iv, 1679; Landon, *Manual of Councils*, p. 669-670.

Vajez'atha [some *Vajeza'tha*] (Heb. *Vayezatha'*, נִשְׁתַּחֲוִי, prob. from Pers. *rayu*, "wind," and *zatha*, "strong;" Sept. Ζαβεθαῖος v. r. Ζαβουθαῖα and Ζαβουθεῖον; Vulg. *Jezatha*), last named of the ten sons of Haman slain by the Jews at Shushan (Esth. ix, 9). B.C. 473.

Val, ANDRÉ DU, a French theologian, was born Jan. 18, 1561, at Pontoise. In 1594 he was made doctor of theology at the Sorbonne, and died Sept. 9, 1638, as general-superior of the Carmelite Order at Paris. He wrote, *De Suprema Romani Pontificis in Ecclesiam Potestate Disputatio*:—*Elenchus Libelli de Ecclesiastica et Politica Potestate*:—*Commentarii in Primam Secundæ Partis et Secundam Secundæ Partis Summæ D. Thomæ*. See Jöcher, *Allgemeines Gelehrten-Lexikon*, s. v.; Winer, *Handbuch der theol. Literatur*, i, 671. (B.P.)

Valadon, le PÈRE ZACHARIE, a French Capuchin and missionary, was born about 1680. He labored in Asia Minor, but is especially noted for his devotion to the suffering people during the plague at Marseilles. He died in 1746. See Michaud, *Biographie Universelle* (Paris, 1843-66).

Valckenaer, LODEWIJK CASPAR, a Friesian philologist, born at Leeuwarden in 1715. He studied at Franeker and Leyden; became co-rector of the gymnasium of Campen; professor of Greek at Franeker (1741); removed to Leyden as professor of the Greek language and antiquities, and died there, March 14, 1785. Among his works are, *De Aristobulo Judæo*:—*Selecta e Scholiis L. C. Valckenarii in Libros quosdam N. T.*, published by Wassenbergh (Amst. 1815, 2 vols. 8vo).

Valdes (Ital. *Valdesso*), **Alfonso** and **Juan de**, were twin brothers from the town of Cuenca, in Castile, and born about A.D. 1500, who in their early years became attached to the Castilian court, and, at a later day, sustained relations of some practical importance towards the Reformers of the 16th century and their work.

1. ALFONSO accompanied the court, in 1520, to the coronation of the emperor Charles V at Aix-la-Chapelle, and thence to Worms. From the latter town he wrote letters to friends in Spain, in which he deprecated the course which the pope had adopted towards Luther. He had just witnessed the burning of Luther's writings at Worms when he wrote. In 1524 Alfonso was an imperial secretary of state under the grand-chancellor Gattinara; and in 1527 he began an epistolary correspondence with Erasmus, the great humanist, whose writings had shortly before been committed to the flames in Spain, and in whose defence he had been a most ardent advocate, as against the fanatical mob of excited monks. In the same year (1527) occurred the storming of Rome and the capture of the pope by the imperial army under the constable Bourbon; and on this event Valdes composed a dialogue intended to set forth the sentiment of the court respecting the case. The emperor could not deny his responsibility for the catastrophe, and his secretary accordingly proceeded to show that the pope himself had brought about the devastation of his capital by warlike agitations and disregard of the sanctity of his own word, and also by his refusal to be guided by the warning counsels of judicious friends or by the indications of Providence. This composition excited considerable interest, and led the papal nuncio Castiglione to lodge a complaint against its author with the emperor; but Valdes was safe under the protection of the chancellor, and suffered no harm.

In 1530 Valdes was present with the court at the Diet of Augsburg. The bearers of the famous *Protest* were recommended to him, among others, and found him inclined to promote harmony and friendliness above any of his associates. He met with Melancthon and discussed the religious situation, and was unwearied in the work of judicious mediation between the heads of the contending parties. After the public reading of the *Confession* he prepared a translation for the emperor's use (see Campeggio, in Lämmer, *Monum. Vatic.* p. 45); and afterwards he labored zealously to furnish him with the fullest information which the Protestants could supply in behalf of their cause. He has, nevertheless, been suspected of hostility to the Reformation because he judged that the *Confession* was written in too harsh a tone, and yet more because he wrote the emperor's letter of congratulation to the Romish Switzers (Brussels, Oct. 1531) on the occasion of their victory at Cappel over the Zwinglians; but, on the other hand, the nuncio Alexander complains (*ibid.* Dec. 30, 1531) that certain persons at court are practically in sympathy with Luther and desirous that his cause should succeed, and that they laud Erasmus to the skies only because they are not allowed to speak their thoughts respecting Luther. Among these courtiers Valdes was unquestionably the first. It would seem, however, that Valdes left the court in 1531, though he remained in the imperial service as late as 1533. He never returned to Spain, possibly because he could not be there in safety. Francisco Enzinas (q. v.) wrote to Melancthon in 1545, "If the excellent Alfonso Valdes had returned to Spain, even the emperor would have been unable to save him from the death which the monks, the satellites of the holy fathers, were preparing for him on account of his *doctrina* and *auctoritas*." The time and place of his death are thus far wholly unknown.

On Alfonso Valdes, see Raumer, *Gesch. Europa's seit d. 15. Jahrh.* i, 264; *Docum. Inedit. para la Hist. de España*, vol. xxiv; Müller, *Hist. von d. Protestation u. Appellation* (q. v.), p. 18-190; Saubert, *Wunderwerk d. Augspurg. Confession* (Nuremb. 1631), p. 220, etc.; Jonas, in *Niedner's Zeitschrift*, 1861, p. 630; Herzog, *Real-Encyklop.* s. v.

2. JUAN (1) was, physically and intellectually, strikingly like his twin brother Alfonso; and, like him, he first came before the public with a dialogue, published anonymously and, at the same time, as his brother's production—probably in 1529. His piece was entitled *A Dialogue between Mercury and Charon*. It begins with the narration by Mercury of the emperor's attempt to settle his quarrel with king Francis of France by a duel (see La Fuente, *Hist. de España*, xii, 497 sq.); but the narration is repeatedly interrupted by the introduction of newly deceased persons, who enter into the conversation, and through whom the whole obtains a political and religious character. The general corruption of the Church is censured. The ignorance and immorality of the clergy and the superstition of the people are plainly characterized, and the Scriptures and the grace of God are extolled above the adoration of relics and the Virgin Mary. The use of force as a means of conversion is condemned. Part second of the work is chiefly political, and is a sort of Anti-Machiavel. The whole reveals the simplicity of a truly noble mind and the tact of a courtier. In 1531 Juan was at Rome, having come thither from Naples, and was engaged in the study of natural history. He planned a collection of Spanish proverbs, and wrote a *Diálogo de la Lengua* (2d ed. Madrid, 1860), which is highly commended by writers on the literature of Spain. His chief interest, however, centred in religious reform. For it he labored incessantly with tongue and pen, and in its interest he became the centre of an association of Christians who endeavored to lay the foundations of an independent kingdom of God without directly assailing the Church of the State.

In 1536 the emperor issued an edict at Naples which

forbade association with persons infected with or suspected of the Lutheran heresy, under pain of death and the confiscation of property. After the emperor's departure, March 22, the vicery forbade the preaching of Ochino (q. v.), though he was afterwards induced to permit its continuation to the end of Lent. But during this same Lenten period Valdes had a conversation with Giulia Gonzaga, the childless widow of Vespasian Colonna, duke of Traietto, who had been powerfully awakened under the preaching of Ochino; and he had the courage to commit the substance of their conversation to paper, under the title *Alfabeto Christiano* (1st ed. in Italian [Venice, 1546]; 2d ed. Italian, English, and Spanish [Lond. 1860 sq.], consisting of only 150 copies for private distribution). In this dialogue he teaches that the law shows what we are to do, while the Gospel gives the Spirit by which to do it. He insists that the soul must choose between God and the world, and declares that persons whose outward life is entirely correct may need a reformation of the inward feelings and dispositions. Christian perfection consists in loving God supremely and our neighbor as ourselves. Monks and non-monks have only so much of Christian perfection as they have of faith and love to God. As the fire cannot refrain from giving forth heat, so faith cannot avoid the performing of works of love. The soul may have full assurance of the forgiveness of sins and of salvation in Christ. The evil of sin requires a radical cure, applied at the seat of the disease, and cannot be overcome by any mere surface remedy. Giulia insists, however, upon rules by which to regulate the use of institutions of the Church, and Valdes responds that benefit may be derived from the adoration of the sacrament, from the reading of the Epistles and Gospels, and from the prayers in the mass; that masses ought to be heard except when they would interrupt works of charity; that the preaching of the Word should be humbly received. He discountenances the repetition of a given number of psalms and paternosters. Of confession he says that God does not forgive sins because of the confession, but because the sinner believes in Christ. The result was that Giulia entered the Franciscan convent of Santa Chiara, though she did not take the vows of the order nor exclude herself wholly from society.

It was perhaps in the same year (1536) that Valdes dedicated to the duchess Gonzaga his version of the *Psalms*, after the Hebrew (a work never published and now lost), and in the following year *The Epistle to the Romans* and *The First Epistle to the Corinthians* (1st ed. Geneva, 1556 sq.; 2d ed. 1856), which works reveal faithful research and sincere modesty in the author, and possess both scientific and practical value. Other works by Valdes have, almost without exception, been lost to posterity, the exception being *Consideraciones Dirinas*, an Italian edition of which appeared in 1550 at Basle, and translations of which were made into Spanish, French, English, and Dutch during the 16th and 17th centuries.

Juan Valdes was a theologian of the first rank in ability, though largely self-trained, and though he never entered into orders. Sand, the editor of the *Bibliotheca Antitrinitariorum* (1684), places him at the head of his catalogue on the authority of a passage in a Unitarian publication of 1567, said to be cited from Valdes, but which certainly does not prove the charge of anti-trinitarianism; and very different sentiments are expressed by Valdes in the *Alfabeto Christ.* p. 37, and the *Commentary on First Corinthians*, p. 281, etc. In his *Consideraciones*, No. 109, he confesses that the relation existing between the Father and the Son exceeds his comprehension. In personal intercourse Valdes possessed extraordinary influence, especially among the nobles, with whom his rank brought him into contact. His manners were polished, his conversation attractive, his entire bearing full of charm. Assisted by Peter Martyr (Vermigli) of Florence, the Augustinian abbot of St. Peter ad Aram at Naples, and by Ochino and others,

he was able to beget such enthusiasm for the study of the Bible that a contemporary Neapolitan writer states that certain tanners were in the constant habit of discussing the Pauline epistles and their most difficult passages. Among his friends were also the poet Flaminio and the Reformer Pietro Carnesecchi (q. v.). Valdes died in 1540 or 1541.

See Böhmer, *Conni Biografici sui Fratelli Giordani e Alfonso di Valdes*, 1861, in the appendix to his edition of the *Consideraciones*; and id. in Herzog, *Real-Encyclop.* s. v.

Valdes, Don Juan (2) DE LEAL, a Spanish painter, descended from an ancient family of Austria, was born at Cordova in 1630. He studied in the school of Antonio del Castillo, and afterwards removed to Seville, where he became one of the most distinguished painters of that city. He was one of the founders of the Academy there, and at the death of Murillo became its president, and was esteemed as the head of his profession. Among his numerous works may be mentioned, *The Triumph of the Cross*, at Seville;—*The Martyrdom of St. Andrew*;—and *The History of the Prophet Elias*, at Cordova. He died in 1691. See Spooner, *Biog. Hist. of the Fine Arts*, s. v.

Valdes, Don Lucas DE, a Spanish painter, son of the preceding, was born at Seville in 1611. He was instructed by his father, and painted history and portraits with considerable reputation. Some of his works remain in the churches and public edifices of his native city. He died in 1721. See Spooner, *Biog. Hist. of the Fine Arts*, s. v.

Valdes, Don Sebastian LLANOS DE, a Spanish painter, flourished at Seville about 1660. He studied under Francisco de Herrera the elder; aided greatly in establishing the Academy of Seville, in the presidency of which he succeeded Juan de Valdes. Among his large historical works are a *Magdalen*, in the Church of the Recolets at Madrid;—and a picture of the *Virgin surrounded by Saints and Angels* (1669), in the Church of St. Thomas, Seville. See Spooner, *Biog. Hist. of the Fine Arts*, s. v.

Valdo. See WALDO.

Vale. See VALLEY.

Valence, COUNCILS OF (*Concilia Valentina*). Valence is a town of Dauphiny, France, on the Rhone, fifty-seven miles south of Lyons. Five ecclesiastical councils have been held there, as follows:

I. Was held July 12, 374. Thirty bishops attended, of whom the names of twenty-two have reached us. It is supposed to have been a general Gallican council, or at least collected from the chief part of Narbonnesian Gaul. The object of this council was to remedy the disorders which had crept into the discipline of the Church. Four canons were published.

1. Forbids the ordination in future of men who have had two wives, or who have married widows, but it does not insist upon the deposition of those who have been already ordained.

2. Forbids to grant penance too easily to young women who, after consecrating themselves to God, voluntarily embrace the married state.

3. Forbids absolute until death to those who, after baptism, fall back into idolatry, or who have received a second baptism.

4. Orders that all bishops, priests, and deacons falsely accusing themselves of any crimes in order to be deposed, and so escape the responsibility and weight of their orders, shall be, in fact, so deposed, and considered as guilty of the crimes wherewith they charge themselves.

See Mansi, *Concil.* ii, 904.

II. Was held about 530, in defence of the doctrines of grace and free-will, against the Semi-Pelagians. See Mansi, *Concil.* iv, 1678.

III. Was held Jan. 8, 855, by order of the emperor Lothaire. Fourteen bishops, with the metropolitans, attended from the three provinces of Lyons, Vienne, and Arles. The object of the council was to investigate the conduct of the bishop of Valence, who was ac-

cused of various crimes. Twenty-three canons were published.

The first six relate to the subjects of grace, free-will, and predestination, and reject the four canons of Quercy upon the matter.

7. Relates to the elections of bishops with the unanimous consent of the clergy and people of the see.

12. Forbids, under pain of excommunication, the singular combats to which accused persons had recourse in those times in order to prove their innocence. Directs that he who shall kill or wound his adversary shall be treated as a murderer, and excommunicated; and that the man killed shall be regarded as a suicide, and forbidden Christian burial.

14. Enjoins bishops not to give their clergy or people cause to complain against them on account of their vexations.

15. Recommends them to lead an exemplary life.

16. Orders them to preach and instruct their people both in town and country.

17. Bids them be careful to make their visitations without burdening any one.

18. Orders the re-establishment of schools for teaching religion, literature, and ecclesiastical chanting.

20. Orders care in the preservation of the Church ornaments, etc., and forbids their being put to any but their proper use.

22. Forbids bishops to exact their visitation dues when they do not make their visitations.

See Mansi, *Concil.* viii, 133.

IV. Was held in 1100 to examine the charge brought by the canons of Autun against Norigaudus, or Norgaud, bishop of Autun, whom they accused of having got possession of the see by simony, and of having squandered the property belonging to it. The pope's legates, John and Benedict, cited the bishop to appear at this council, in spite of the protest of the canons, who declared that the legates had no authority to take him beyond the province, and in spite of the opposition of the archbishop of Lyons, who complained of the legates having taken the judgment of the case out of his hands. The question accordingly came before the council, and was discussed, but the further consideration of it was reserved for the Council of Poitiers. In the meantime the bishop was suspended from the exercise of all his functions. Hugo, abbot of Flavigny, accused likewise of simony, was declared to be innocent. See Mansi, *Concil.* x, 717.

V. Was held on the Saturday after the Feast of St. Andrew. The legates Peter, cardinal-bishop of Albano, and Hugo, cardinal-priest of St. Sabine, convoked this council, consisting of four archbishops and fifteen bishops from the provinces of Narbonne, Vienne in Dauphiny, Arles, and Aix. Twenty-three canons were published.

3. Forbids clerks in holy orders, cathedral canons, and other benefited persons to exercise any secular office.

6, 7, and 8. Enjoin the punishment and public denouncement of perjured persons.

9, 10, and 11. Relate to the Inquisition.

12. Gives to bishops the correction of sorcerers and persons guilty of sacrilege, and, in the event of their refusing to amend, enjoins perpetual imprisonment, or whatever punishment the bishops may deem right.

13. Enacts penalties against those who lay aside the cross, which they have assumed upon their dress as a token of having renounced their heresy, or who escape from prison, or despise the sentence of excommunication.

The five next relate to excommunications.

22 and 23. Fulminate excommunications against the emperor Frederick and all his adherents.

See Mansi, *Concil.* ix, 696.—Landon, *Manual of Councils*, p. 670 sq.

Valencia, COUNCIL OF (*Concilium Valentinum*). Valencia is a town of Spain, capital of the province of the same name, situated on the Guadalaviar, 190 miles E.S.E. of Madrid. An ecclesiastical council was held here in 524, under king Theodoric. Six bishops attended, and six canons were published.

1. Orders that, previous to the presentation of the oblations and the dismissal of the catechumens, the Gospel shall be read after the Epistle, in order that the catechumens, penitents, and even the heathen may hear the words of Christ and the preaching of the bishop.

4. Exhorts bishops to visit their sick brethren in the episcopate, in order to assist them in settling their affairs, and to attend to their funerals. In case of a bishop

dyng suddenly with no one of his brother bishops near him, it is ordered that the body shall be kept until a bishop can come to celebrate his obsequies.

5. Excommunicates vagabond clerks who desert their calling.

6. Forbids to ordain a clerk belonging to another diocese, and any person whatever who will not promise to remain in the diocese.

See Mansi, *Concil.* iv, 1617.—Landon, *Manual of Councils*, p. 672.

Valencia, Fray Matias de, a Spanish painter, was born at Valencia in 1696. His name was *Lorenzo Chaffron*. He studied at Rome, returned to Valencia, afterwards went to Granada, where, being reduced to distress, he took refuge in a convent. There are some of his cabinet pictures in the collections at Valencia, and a picture of the *Last Supper* in the refectory of his convent. He was drowned in 1749. See Spooner, *Biog. Hist. of the Fine Arts*, s. v.

Valencia, Jacobo Perez de, an anchorite, commonly called bishop of Christopolitans, was born about 1420 at Valencia, in Spain, whence he derived his name. He became a hermit of the Order of St. Augustine, and is the author of *Questiones Quinque contra Judeos de Christo Reparatore Generis Humani*:—*Erpositio Psalmorum Davidis* (Leyden, 1512, 1514, 1517). In his *Proleg. in Psalmos*, tract. vi, he gives an amusing account of the origin of the vowel-points: "Post conversionem Constantini Magni videntes Rabbini omnes Gentiles cum tanta devotione ad fidem Christi converti per totum orbem, et ecclesiam tanto favore prosperari et etiam quod infinita multitudo Judæorum videntes manifestam veritatem per experientiam et miracula, pariter convertebantur, et sic deficiebant quæstus et redditus et tributa Rabbini, hac iniquitate commotos magna multitudo congregatos fuisse apud Babyloniam Egypti, quæ dicitur Caire; ibique quanto majis caute potuerunt, conatos fuisse falsificare et pervertere Scripturas a vero sensu et significatione. Inde confinxisse supra quinque vel septem puncta loco vocalium, quorum punctorum inventores fuisse Ravina et Ravasse duos doctores eorum. Addit istos Rabbini confinxisse libros Talmud." He died Aug. 1, 1491. See Jöcher, *Allgemeines Gelehrten-Lexikon*, s. v. "Perez." Fürst, *Bibl. Jud.* iii, 466; Hody, *De Bibliorum Textibus Originalibus* (Oxford, 1705), III, ii, 442. (B. P.)

Valens, in Roman mythology, according to Cicero, was the name of the second Mercury. Some declared him to be the father of Trophonius.

Valens, the Roman emperor, the brother and co-Augustus of Valentinian I, is important to Church history as the last political representative of Arianism in the East. He was nominated to the throne by Valentinian, March 28, 364, and assigned to the rule of the East. His first efforts were directed towards the securing of his rule against the pretensions of Procopius, whom the late emperor Julian had selected to become his successor. It is not certain that other than political motives were at work in this campaign, though Milman, basing his remark on a fragment by Eunapius, says, in Gibbon, *Decline and Fall*, iii, 25, "It may be suspected that the heathen and philosophic party espoused the cause of Procopius" (but comp. Ammian. Marcell. xxvi, 6-9). The next campaign of Valens was directed against the Goths, who had operated along the Danube in behalf of Procopius; but before entering on that undertaking, the emperor sought to conciliate the favor of Heaven by receiving Christian baptism; and as the rite was performed by Eudoxius, the Arian bishop of Constantinople, the event became decisive of the future course of the administration of Valens by identifying him with the Arian party and bringing him into direct conflict with the Catholic and semi-Arian sections of the Church and empire. The Gothic war was successfully completed, and was followed by a systematic persecution of the orthodox and semi-orthodox party throughout the East. A special edict was

issued against monks, and military bands were sent to traverse the wilderness in which they dwelt to compel them to enter the service of the State and contribute to its support. Orthodox bishops everywhere were exiled, and historians speak of many who were drowned or otherwise put to death. The persecution was most severe where the emperor was himself present; and as the operations of the Persian king compelled his presence at Antioch, that province became the scene of the most thorough and extensive persecution. The most horrible incident of the persecution was the destruction of eighty presbyters who had been deputed to protest against the instalment of the Arian Demophilus as the bishop of Constantinople, instead of Evagrius, the choice of the Catholics, and whom the præfect Methodius embarked in a vessel which he caused to be burned on the high seas. Curiously enough, the persecution resulted in the placing of Christian orthodoxy and heathen superstition under the same category of enemies to the emperor. The heathens had appealed to an oracle to obtain the name of the next emperor, when Valens discovered their action, and at once proceeded to enforce against them the edicts of the empire. His ragings were, however, brought to a close by the progress of events on the northern boundary of his State, where the migrating nations involved him in a war which became fatal to himself and the country. His army suffered an unexampled defeat near Adrianople (Aug. 9, 379), and he was slain. During his reign of fifteen years he had done all he could to intensify the hatred of religious parties within the empire, and he now achieved the un-

Coin of Valens.

enviable distinction of being the first to show to foreign invaders the way into the heart of his country. The political history of his reign is, upon the whole, given with great thoroughness and fidelity by Ammian. Marcellinus and Zosimus, while the ecclesiastical may be gathered from the writings of Basil the Great and the two Gregories, Nyssa and Nazianzen. See also Tillemont, *Hist. des Empereurs*, v, 33-39; Gibbon, *ut sup.*; Schlosser, *Universalhistor. Uebersicht*, etc., iii, 2, 370; the ancient histories of the Church, Socrates, Sozomen, etc.; Smith, *Diet. of Gr. and Rom. Biog.* s. v.; and Herzog, *Real-Encyclop.* s. v.

Valentia, in Roman mythology, was a goddess of health, similar to Hygeia, venerated by the city Oecirum, in Umbria, as a protecting goddess.

Valentia, Gregorio de, a Spanish Jesuit, was born in 1551 at Medina del Campo, in Old Castile, and died at Rome, April 25, 1603. He is the author of *De Rebus Fidei hoc Tempore Controversiis* (Leyden, 1591; Paris, 1610, fol.).—*De Trinitate Libri I* (Ingolstadt, 1586):—*De Transsubstant. Panis et Vini in Corpus et Sanguinem Christi* (ibid. 1587):—*Disput. de Legitimo Usu Eucharistie in Altera tantum Specie* (ibid. eod.). See Winer, *Handb. der theol. Literatur*, i, 341, 419, 455, 456, 853. (B. P.)

Valentin, Pierre, a French painter, was born at Coulmiers-en-Brie, near Paris, in 1600. He studied painting, and went to Rome at an early age, where he remained during the rest of his life. He painted the *Martyrdom of Sts. Processo and Martiniano* (thought to be his best performance):—*Decollation of St. John*:—*St. Peter Denying Christ*:—*Judith with the Head of Holofernes*:—*The Judgment of Solomon*:—and many others. He was an artist of great promise, but died in the flower of his life, in 1632. See Spooner, *Biog. Hist. of the Fine Arts*, s. v.

Valentine, Sr., a Roman bishop (or presbyter), was beheaded in the reign of the emperor Claudius, A.D. 270, and was early canonized. He is said to have been a man of admirable qualities, and noted for his love and charity. Feb. 14 is celebrated in his honor. The custom of choosing Valentines on that day is accounted for in various ways. By some it is said to have arisen from the fact that birds select their mates at that season; by others, from a practice prevalent at the ancient Roman festival of the Lupercalia, during the month of February, of placing the names of young women in a box, from which they were drawn by young men as chance directed. A similar custom was followed throughout Europe on the eve of Feb. 14 until recently, the person chosen becoming Valentine to the one choosing for a year. See Chambers, *Book of Days*, i, 255. See VALENTINUS, Sr.

Valentine, George M., a clergyman of the Church of England, of whose birth or early life no record remains, distinguished himself in the University of Cambridge, and graduated at Trinity College in 1829. He was ordained in the same year to the curacy of Portishead, near Bristol, where he gave himself wholly to pastoral labors for eight years. In 1837 he offered himself to the missionary committee, and in the following year sailed for Bombay, began the study of the native language, and taught a small English school. In 1839 he was married. He soon entered upon general missionary duties, and thus continued until his last sickness, which in a few weeks terminated in his death, July 23, 1846. See *Christian Guardian*, 1847, p. 433.

Valentine, Jesse M., a minister of the Methodist Episcopal Church, South. His early life is unknown. He was transferred from the Tennessee to the Florida Conference in 1850, and served faithfully about one year, when failing health necessitated his superannuation. He then studied medicine, and became quite successful in its practice. He entered the army of the Confederates some time in 1861, and was soon after taken sick, and died at Gainesville, Florida, in 1862. Mr. Valentine was a graduate of West Point, a fine scholar, characterized by strong, logical reasoning powers, and pure language as a preacher, and as a pulpit orator was surpassed by few. See *Minutes of Annual Conferences of M. E. Church, South* (1862), p. 410.

Valentinian I., Roman emperor, was the son of Comes Gratianus, and born in A.D. 321 at Cibela, in Pannonia. He succeeded Jovian on the throne in 361, and, having associated his brother Valens with himself in the empire, he assumed the government of the West. He protected the State against the incursions of the Germanic tribes, simplified and improved the internal administration of affairs, and promoted the advancement of science and general culture, thereby winning for himself an honorable place in the estimation of the world, despite the cruelties with which his life was stained. He died in the year 376. He had been reared amid Christian surroundings, and had drawn upon him the disfavor of the emperor Julian by his unflinching fidelity to his faith. On assuming the control of government he issued an edict of universal toleration in religious matters (see *Cod. Theod.* IX, xvi, 1, 9, ad A.D. 371), though he found it necessary to prohibit the offering of nocturnal sacrifices, as affording opportunity for political agitations, and also to forbid the practice of magic; and the execution of the Edict of Toleration contributed greatly towards the advancement of Christianity and

the decline of paganism. The expression *religio pauperum*—the religion of peasants—occurs for the first time in a law of Valentinian of the year 368 (*ibid.* XVI, ii, 18). Valentinian was also tolerant towards the different parties in the Christian Church, though himself an adherent of the Nicene faith. See Ammian. Marcell. vi and xxx, 9; Smith, *Dict. of Gr. and Rom. Biog.* s. v.; also Herzog, *Real-Encyclop.* s. v.

Valentinian II., Roman emperor, was successor to his brother Gratian. The only noteworthy incident of his reign which requires mention in this place was the attempt of the heathen party, in the year 384, to recover the position it had lost. Symmachus, the *præfectus urbis*, demanded the retraction of the laws issued by Gratian against paganism, and insisted that the *religio urbis* should be kept distinct from the private religion of the emperor. He also asserted that, inasmuch as man has no knowledge of divine things, it would be best to

Coin of Valentinian II.

rely on the authority of antiquity; that heathenism had made ancient Rome the mistress of the world; and that the famine of the year 383 must be regarded as a consequence of the renunciation of the ancient religion. The emperor was induced, however, chiefly through the efforts of Ambrose of Milan, to reject the demand. He was murdered by Arbogastes in the year 392. His mother, Justina, was a zealous adherent and defender of the Arian party. See Smith, *Dict. of Gr. and Rom. Biog.* s. v.; and Herzog, *Real-Encyclop.* s. v.

Valentinian III., Roman emperor, obtained notoriety by issuing the edict of A.D. 445, which contributed materially to the elevation of the papacy, for which see the articles LEO I and PAPACY. He also issued laws against the Manichæans. His mother, Pla-

Coin of Valentinian III.

cidia, administered the government for him until the year 450, and afterwards he gave himself up wholly to sensual indulgences, and left the control of affairs in the hands of a eunuch. He was murdered in 455. See Smith, *Dict. of Gr. and Rom. Biog.* s. v.; and Herzog, *Real-Encyclop.* s. v.

Valentinians, the followers of the Gnostic heretic Valentinus (q. v.).

Valentinus, Sr., the reputed apostle of Rhetia and bishop of Passau, is first mentioned in an authentic manner, by Pez, in the biography of the younger St. Severin, § 35, in *Scriptores Rer. Austriacæ*, i, 88. A presbyter, Lucillus, is there made to relate that a Valentinus who was his abbot and teacher had ministered as bishop of Rhetia early in the 5th century, and had died on Jan. 6 of some unmentioned year. Lucillus was accustomed to observe that day in his honor. In one of the poems of Venantius Fortunatus (cir. 600) it is said that a number of churches of St. Valentinus were then planted along the Inn. One hundred years later Corbinian visited the grave of the saint, near the Castle of Mais, in the Tyrolean Alps; and soon afterwards (in 730; see Aribo, in *Vita Corbin.* 18, in Meichelbeck, *Hist. Frising.* I, ii, 12) the Bavarian duke Thassilo caused Val-

Coin of Valentinian I.

entinus's bones to be removed to Passau. The diocese and Church of Passau have since claimed the saint as their earliest incumbent and representative. The *Acts of Saints* from which the Bollandists give a description of this saint are not older than the 11th century; while a leaden tablet said to have been found with his relics when they were exhumed can scarcely date further back than the 12th century. See *Acta SS. Bolland.* ad d. 7 Jan. i, 368; Raderi *Bararia Sancta*, i, 32; Rettberg, *Kirchengesch. Deutschlands*, i, 220 sq.; comp. ii, 133.

Other Valentines, of Rome, Interamna, Africa, and Belgium, are mentioned in the *Acta SS.* under Feb. 13. See also under March 16, April 14 and 29, June 2, July 16, Sept. 29, etc.—Herzog, *Real-Encyklop.* s. v. It is to one of these latter, doubtless, that the popular custom of *St. Valentine's Day* is to be assigned. See VALENTINE, ST.

Valentinus, THE GNOSTIC, and the Valentiniæns. The birthplace and descent of this most famous of Gnostics are not known. Epiphanius states that he had learned that Valentinus was an Egyptian, and had received a Hellenic training at Alexandria (*Her.* xxxi, 2). The opinion that he was of Jewish extraction is a bare surmise. He came to Rome in the reign of Antoninus Pius, probably soon after A.D. 140, while Hyginus was bishop, and he remained until Anicetus succeeded to the bishopric (Irenæus, iii, 4, 3; comp. Eusebius, *H. E.* iv, 10 sq.). Epiphanius says (*Her.* xxxi, 7) that he went from Rome to Cyprus, and there first became an open enemy to the Church and the head of a heretical sect, with which statement should be compared that of Tertullian, in *Prescript.* c. 30, that Valentinus and Marcion had in the beginning adhered to the orthodox belief. Tertullian retains them in full membership with the Roman Church as late as the bishopric of Eleutherus (with which comp. Irenæus, *ut sup.*). The further story (*Adv. Valent.* c. 4) that Valentinus, conscious of his intellectual strength and oratorical power, had hoped to be made bishop of the Church, and had turned against the Church and the truth because a confessor was preferred to him, does not compel the assumption that disappointed ambition determined him to become a heretic.

The Valentinian system is very obscure with respect to many of its details, but its general structure and material contents are quite comprehensible. It constructs a Pleroma of æons, and in the process sets forth an idealistic view of the entire course of the creation and redemption of the world. The great first cause (*ἰσχυρός, πρῶτος, προαρχή, προπάτωρ*) produced the *Nous*, or *Monogenes*, who became the principle of all subsequent emanations (*ἀρχὴ τῶν πάντων*), and who was equal and similar to the Father. The *Nous* also manifests the Bythos, who is otherwise incomprehensible, and is in comparison with the latter the revealed God, through whom the generation and formation of the æons are mediated. With the Bythos was associated a feminine principle (*σύνζυγος*) named Sige (silence), though some hold that the Bythos was both masculine and feminine in himself, or exalted above all syzygies; and with the *Nous* was associated Truth (*ἀλήθεια*). These formed a productive quaternity which became the origin of all things. *Nous* and Alertheia produced Logos and Zoe, and Logos became the father of the remainder of the Pleroma. He expressed what existed seminally in the consciousness of *Nous*, and it thereby received life, and obtained concrete form, in the syzygy Anthropos (primeval man) and Ecclesia. The quaternity thus became an octave (*Ogdoas*); and this *Ogdoas*, which constitutes the centre of æonic developments, was reinforced by a group of ten æons emanated, according to Irenæus, from Logos and Zoe, and another of twelve from Anthropos and Ecclesia, or, according to Hippolytus, the ten from *Nous* and Aletheia and the twelve from Logos and Zoe. The derived æons were necessarily subject to limitations, as they could have no other recognition

of the Bythos than that mediated by the *Nous*, and as they were subject to the law of syzygies; and this necessity caused them to experience a feeling of deficiency and want, which ultimately found expression in Sophia, the last of the female æons. She vehemently desired to unite herself with the Bythos, but was prevented by *Horos* (the principle of limitation and differentiation in the Pleroma), and thereupon she laid aside the thought (*ἐνθύμησις*) previously entertained and the passion resulting from her attempt. This *ἐνθύμησις* σὺν τῷ ἐπιγενομένῳ πάθει became an abortion (*ἐκρώμα*), or formless being (*ὁδία ἀμορφος*), produced without the co-operation of the male syzygos. To guard against a recurrence of the unnatural event, the Father caused a new pair of æons, Christ and the Holy Ghost, to be brought forth by the *Nous*, who restored harmony to the Pleroma—Christ by teaching the æons that it must suffice them to know the nature of the syzygies and the idea of the unoriginated, and that the Great Father of all is infinite and incomprehensible save as he is manifested by the *Nous* (they thus obtained a clear understanding of their relation to the Father, and learned that the immoderate desire to be united with the Bythos was threatening to their own separate existence); the Holy Spirit by imparting to them rest and contentment, in giving them similarity of form and disposition, and making each of them to be, at the same time, what all the others were. This constitutes the completion of the Pleroma. The representation of Hippolytus varies somewhat from that given above. The emanation of the abortion from the Sophia brought confusion, i.e. darkening of the intellect (*ἀγνοια*) and formlessness (*ἀμορφία*), into the Pleroma. To remove this, Christ and the Holy Ghost were produced, while *Horos*, or *Stauros*, was brought forth to be the guard and protector of the Pleroma. To celebrate the restored harmony of the Pleroma, each of the æons contributes the most beautiful and precious it contains to produce the perfect beauty, Jesus the Soter. This forms the conclusion of the heavenly drama; but in the expelled abortion the condition for a real world-process has been given. Christ gives to this abortion the form of a lower or external Sophia (*μόρφωσις κατ' οὐσίαν* as contrasted with the *μόρφωσις κατὰ γνῶσιν*), or *Achamoth*, a Sophia of nature, but not of knowledge. Contact with Christ has given her no permanent ability beyond a confused desire for light; she becomes the prey of sorrow, fear, and despair, all of which are the result of *ἀγνοια*, a lack of clear, gnostical consciousness. In response to her prayers, the Soter Jesus is sent for her support (Paraclete), and by him she is delivered from her hurtful affections and endowed with gnostical qualities. She thereupon receives into herself the light of the angels who accompany the Soter, and brings forth *pneumatical* fruit in their image. A second process of alienation and reconciliation is completed at this point, and, as in the former instance, in such a way that the affections eliminated from the æonic nature become the basis of a further development, while that æonic nature itself becomes the guiding principle of the new development. These eliminated affections existed in the first instances as an incorporeal *hyle* (*ἔλη*), but were soon incorporated in two substances, the hylic and the psychical. Fear became specifically psychical, sorrow hylic, despair dæmoniacal; and the Achamoth thus becomes the mother of all living things and the highest cosnical principle, and in her is reflected the *Ogdoas* of the æonic world, which is the prototype of the cosnical. Achamoth makes use of the Demiurge, who is the father of the psychical, the former of the hylic, and the king of all, but whose merely psychical nature deprives him of the power to comprehend the thoroughly pneumatical purpose of the cosnical development. The Demiurge forms the entire visible world, and is called *Hebdomus*, from the seven heavens. He is the fiery God of Deut. iv, 24, because he, as the principle of cosnical life, at the same time represents the might of

transitoriness. He constitutes man out of psychical and hylical elements, but he is not aware that the psychical has implanted in it pneumatual germs which the Sophia designs for further development. Such development receives a decisive impulse through the intervention of the Redeemer, whose office it is to spread gnostical light wherever any degree of receptivity exists. The Demiurge had promised his people, the Jews, a Messiah, and in due time causes him to be born (a psychical Messiah) from Mary, through whom he passes like water through a channel. The Messiah receives pneumatual endowments from the Sophia, but has in himself no hylical elements which are not capable of being saved. His psychical body is, however, so marvelously constructed that it may be seen and touched, and that it may suffer. At this point the Valentinians divided into two schools—the one of which included Heraclion and Ptolemy, and is known as the *Italiothe*, which held to the psychical body and seemed to make the pneumatual endowment dependent on the Messiah's baptism; while the *Anatolice* school, to which Axionicus and Ardesianes belonged, held to a pneumatual body formed by the descent of the Spirit (i. e. the Sophia) upon Mary and the co-operation of the Demiurge. The passion and crucifixion of our Lord likewise receive a symbolical interpretation, though the heavenly Soter is not usually allowed to participate in them. The saving process consists in the exaltation of the pneumatual element in man, and the end of all things is the separation of the pneumatual and the psychical from the hylical. Achromoth is thereby fully released from her pain, and she returns with the Soter, who becomes her husband, and with all perfect pneumatual natures who have been married to the angels of the Soter, into the Pleroma to the eternal marriage feast. The Demiurge, with all righteous psychical natures, is lifted up to the intermediate place near to, but not in, the Pleroma, and afterwards the concealed fires break forth and consume matter and themselves.

The influence of Platonic ideas is unmistakable in the structure of this system. Compare, e. g., the *κέρωμα* or *ὀστέωμα* with Plato's conception of matter as the *μη ὄν*. The *κέρωμα* is conceived of as the negation of existence or being, and thus serves to show the monistic character of the system, though all gnosis involves the dualistic principle of connecting with the process of the absolute, as related to the process of the world, a negation of itself, an element of finiteness, and of effecting the necessary reconciliation only through the development of the world-process.

Alex., *Strom.*, and other works, *passim*; Origen, especially in *Joannis xiii*; Epiphanius, *Hær.* xxxi, xxxii, xxxv; Theodoret, *Hær. Fab.* i, 7; see also Buddans, in Appendix to *Introd. ad Hist. Philos. Ebr.*; Massuet, in *Irenaeus*, diss. i; Rossel, *Theol. Schriften* (Berl. 1847), p. 280 sq.; Möller, *Gesch. d. Kosmologie*; *Meth. Quir. Rev.* 1880, p. 567 sq.; and Herzog, *Real-Encyklop.* s. v. See GNOSTICISM.

Valerian (fully PUBLIUS LICINIUS VALERIANUS), Roman emperor from A.D. 253 to 259, was at first friendly towards Christians, but in 257 began a violent persecution of them, which continued to the end of his reign. Its object was chiefly to destroy the leaders of the Church, especially the bishops. They were at first forbidden to convoke religious gatherings under pain of imprisonment and similar punishments; afterwards were sentenced, together with their lay adherents, to the mines; and, finally, were condemned to execution, in company with all priests and deacons, while all such senators, knights, etc., as would not renounce the Christian religion were threatened with confiscation of property and loss of life. The most noted victims of this persecution were Sixtus I of Rome and Cyprian of Carthage. In the year 259 Valerian attempted an invasion of the Persian kingdom, but was taken prisoner by the Sassanide

king Sapor, and held in captivity until he died, ten years later. His son and successor, Gallienus, issued an edict of toleration in 260, which inaugurated a period of forty years of comparative peace and rest for Christianity. See Cyprian, *Epp.* 82, 83; Eusebius, *Hist. Eccl.* vii, 10, 11; Neander, *Church Hist.* ad loc.; Smith, *Dict. of Gr. and Rom. Biog.* s. v.; Herzog, *Real-Encyklop.* s. v.

Coin of Valerian.

Valerian, Sr., was a bishop of Cemele, in the Maritime Alps, now in the archbishopric of Embrun. He belonged to the 5th century. He attended a synod at Riez in 439, signed the address of the Gallican bishops to Leo I in 451 (see Leonis M. *Opp.* i, 998, 1110 sq.), and took sides with the monastery of Lerins, in 454, in its dispute with the bishops of the neighborhood. The year of his death is not known. He left twenty-nine *Sermones*, or *Homilies*, and an *Epistola ad Monachos*, which were published by Sirmond (Par. 1612) and Raynaud (Lugd. 1635). Raynaud's edition is given also in Migne, *Patrolog.* (Par. 1845), lii. Galland furnished an additional edition of Valerian, together with a *Petrus Chrysologus*, in the *Bibl. Max. Patr.* (1774), c. 10. See Cave, *Script. Eccl. Hist. Lit.* i, 427; Herzog, *Real-Encyklop.* s. v.

Valeriani, DOMENICO and GIUSEPPE, two Italian painters, brothers, who flourished at Rome about 1730. They were pupils of Marco Ricci, and were jointly employed in decorating churches and other public buildings.

Another Giuseppe Valeriani was a Jesuit, and painted under Clement VIII several religious pictures, the best of which are in the Chiesa del Gesù.

Valerio, SAMUEL, a Jewish physician who flourished in the island of Corfu in the 16th century, is the author of *ספר החיים*, or a commentary on the book of Esther (Ven. 1586), in which he made use of the Talmud, of Jewish and Christian exegetical works, of the philosophical writings among Jews and Arabs; *הורן לנדר*, or a commentary on Daniel (*ibid.* col.). See First, *L. B. des Orients*, 1845, col. 566, 606; *Bibl. Jud.* iii, 467; De' Rossi, *Dizionario Storico* (Germ. transl.), p. 325. (B. P.)

Valerius, a Spanish monk and abbot who flourished in Galicia about 680. His *Life of St. Fructuosus* is extant in Mabillon, *Acta Sanctor. Ord. Bened.* tom. ii. Some other works exist in MS. See Mosheim, *Church History*, bk. ii, cent. vii, pt. ii, ch. ii.

Valerius, Augustinus. See VALIERO AGOSTINO.

Valesians, a sect or community of ascetics said to have been founded by Valens of Baeatha Metrocomia, an episcopal city spoken of by Epiphanius and Nicetas as being in "Arabia beyond Jordan." They were said by Epiphanius to hold some Gnostic opinions, and by St. John of Damascus to be profligate Antinomians. They practiced self-mutilation, and enforced the practice on all their adherents. See Epiphanius, *De Hæresibus*, lviii; St. John of Damascus, *De Hæresibus*, lviii.

Valesio, Francesco, an Italian painter and engraver, flourished at Venice about 1612. Little is known of his paintings, but his most important work is a set of plates of hermits, engraved for a work entitled *Illustrium Anchoretorum Elogia*, by Jacobus Cavaeus, which was published at Venice in 1612. His plates are sometimes marked *Franciscus Valesius*. See Spooner, *Biog. Hist. of the Fine Arts*, s. v.

Valesio, Giovanni Luigi, an Italian painter and engraver, was born at Bologna in 1561. He studied in the school of the Caracci and executed several works for the churches of his native city, such as *The Scourging of Christ*, in the Church of San Pietro; *The Annunciation*, at the Church of the Mendicanti; and *St. Roch Curing the Sick of the Plague*, in the Church of San Rocco. He went to Rome, where he enjoyed great reputation, and where he died in 1640. See Spooner, *Biog. Hist. of the Fine Arts*, s. v.

Valesius (properly *De Valois*), HESRY, a French antiquarian and critic, was born in Paris, Sept. 10, 1603, and educated in the Jesuit College at Verdun and at Paris. He formed a connection with Petavius and Sirmond which existed while they lived. In 1622 he went to Bourges for the study of jurisprudence, and on his return spent seven years in the practice of law; but subsequently gave himself wholly to learned studies, the earliest fruit of which was his edition, with critical notes, of the excerpts from Polybius, Diod. Sic., etc., made by order of the emperor Constantine Porphyrogenitus, entitled *Excerpta Polyb., Diod. Sic., Nicol. Damasc., App. Alexandr.*, etc. (Par. 1634-48). Then followed his valuable critical edition of Ammianus Marcellinus (ibid. 1636; 2d improved ed. by his brother Hadrian, 1681). These works so advanced his reputation that he was received into the circle of the foremost scholars of his time, as D'Achery, Mabillon, cardinal Barberini, Leo Allatius, Grotius, and others. He was, however, troubled with weak eyes, and threatened with total blindness; but, a reader having been provided, he was enabled to prosecute his studies of the ancient Church writers, and he was instructed in 1650 by the French bishops to publish a new and critical edition of their works, for which he received an annual pension of 600, and after a time 800, livres. He published in consequence, *Eusebii Historia Ecclesiastica*:—*De Vita Constantini Lib. IV*:—*Oratio Constantini ad Sanctos*:—and the treatises *De Donatistis*, *De Anastasi*, *De Translatione LXX Interpretum*, *De Rosweldi Martyrologio* (Par. 1659, 1678). In 1660 Louis XIV appointed him historiographer with a salary of 1200 livres, and cardinal Mazarin also gave him tokens of favor. In 1664, at the ripe age of sixty-one years, he married Margaret Chesneau, a young girl, and became the father of seven children. He continued to employ his time in literary pursuits until he died, in Paris, May 7, 1676. His later works included editions of Socrates and Sozomen; treatises on Athanasius, Paul of Constantinople, the sixth canon of the Council of Nice (Par. 1668); an edition of Theodoret, one of Evagrius, with extracts from Philostorgius, and of Theodore Lector (ibid. 1673; Mogunt. 1679; Amstel. 1695). He was planning new editions of the Latin historians of the Church when death surprised him. In Burmann, *H. Vales. Emend. Libr. Quinque et de Critica Libr. Duo*, are given several smaller works of Valesius, some of which had not been previously published, and also *H. Valesii Vita* (Par. 1677, by his brother). In Paris (1694) was also published *Valesiana*. See Herzog, *Real-Encyclop.* s. v.

Valette, Louis, a Protestant theologian, was born May 24, 1800, in Savoy. For a number of years he was chaplain to the ambassador at Naples. In 1851 he was called to the Lutheran Church des Villettes at Paris, where he also acted as chaplain to the duchess of Orleans. He was soon called to the presidency of the Lutheran Consistory at Paris, which position he occupied till his death, Oct. 20, 1872. (B. P.)

Valhalla. See VALHALLA.

Vali, in Norse mythology, was a son of Odin, who was destined to reappear in the new heavens which the All-Father should create after the fall of Valhalla. In all other respects the name remained vague, and received no distinct form in the popular imagination.

Valiero, AGOSTINO, an Italian prelate, was born at Leniaco, near Venice, April 8, 1530, of a patrician family,

being nephew of cardinal Navagero, who directed him in his studies at Padua. He made such progress in them that he was appointed in 1536 professor of philosophy at Venice, and in 1562 he accompanied cardinal Nangerius, whose secretary he was, to the Council of Trent. In 1565 he succeeded Nangerius as bishop of Verona, and in 1579 pope Gregory XIII sent him to Dalmatia to visit the churches there. In 1583 he was made cardinal, and in 1585 he was appointed abbot of Forlì by pope Sixtus V. In 1590 he was a member of the conclave which appointed pope Gregory XIV. After the death of Innocent IX, the cardinals contemplated the election of Valerius to the papal throne. Clement VIII, however, who was elected in his stead, appointed him examiner of the bishops and member of the *Congregatio Rituum et Indulc.* In 1600 Leo XI made him bishop of Palestrina. The difficulties between the pope and the republic of Venice caused his death, which took place May 21, 1606. His writings are numerous, and are enumerated in Jöcher, *Allgemeines Gelehrten-Lexikon*, s. v.; see also Winer, *Handbuch der theol. Literatur*, ii, 61; Hoefer, *Nouv. Biog. Générale*, s. v. (B. P.)

Valla, LORENZO, a Roman priest and controversialist, was born about 1410. He was ordained a priest in 1431, and taught rhetoric and philosophy at Pavia and Milan, where he had bitter controversies with the Aristotelian scholastics. In 1443 he left Rome and went to Naples, where he was patronized by Alfonso I, but for whose protection the inquisitors would have burned him at the stake. He became reconciled to the pope, Nicholas V, by whom he was restored as canon of St. John Lateran. He returned to Rome and remained there until his death, in 1465. He wrote many important works, among which are *De Fulso Credit et Ementia Constantini Donatione Declamatio*:—*Elegantiarum Lingue Latine Lib. VI*:—*In Novum Testamentum Annotationes*:—*De Collationibus Novi Testamenti*:—Notes on Sallust, Livy, and Quintilian:—and *Translations of the Illiad*, Herodotus, Thucydides, etc.; besides several controversial works and treatises on logic. His principal works were published at Basle in 1543.

Valladier, ANDRÉ, a learned French ecclesiastic, was born about 1565, at St. Paul, near Montbrison, of an ancient family which took its name from the village where it had lived. Having finished his early education at Billom, in Auvergne, he went to Avignon to study theology, and entered the Order of the Jesuits (1586), where he was appointed to teach the humanities. Jealousy at his success in sermonizing led him to leave Avignon, and he preached for a time in Moulins, Dijon, and Lyons. Henry IV, hearing of his talents, called him to Paris as historiographer of his reign (1605); but the Jesuits secreted the royal missive, and Valladier, in disgust, left their order, and went first to Paris and thence to Rome, where he obtained of Paul V letters which secured him from further persecution (July, 1608). He preached in Paris before the court with great acceptance, and in 1609 was appointed by cardinal Grévy his canon, and in 1611 he received the abbey of St. Arnould. He again became involved in trouble, however, but in 1621 he was restored to his office. He died at Metz, Aug. 13, 1638. He wrote a number of secular and religious treatises, which are enumerated in Hoefer, *Nouv. Biog. Générale*, s. v.

Valladolid, COUNCIL OF (*Concilium apud Vallemolam* or *Valium Obletum*). Valladolid is a well-known town of Spain (anciently called *Pintia*), capital of a province of the same name, situated on the left bank of the Pisuerga. An ecclesiastical council was held there in 1322 by cardinal William, bishop of Savina, and legate of pope John XXII. A preface and twenty-seven canons were published by his direction, and with the approbation of the council.

1. Orders that provincial councils be held every two years, and diocesan synods annually.

2. Orders all curates to read four times a year, in the vulgar tongue, to their parishioners the articles of belief,

the decalogue, the number of the sacraments, and the different virtues and vices.

4. Orders that Sundays and festivals be kept holy.

10. Orders that bishops shall assign limits to parishes.

11. Excommunicates monks who fraudulently evade payment of tithes.

13. Exhorts curates to exercise hospitality.

14. Forbids to present to churches before a vacancy, or to present infants.

16. Declares those to be excommunicated, *ipso facto*, who eat or sell meat on any fast-day.

17. Forbids secular meetings within churches, fairs, etc., in church-yards, or to fortify churches as places of defence.

20. Grants to clerks three years for study, during which time they may receive the fruits of their benefices without residence.

23 and 24. Excommunicate those who seize men and sell them to the Saracens; also all wizards, enchanters, and those who consult them.

See Mansi, *Concil.* xi, 1682.—London, *Manual of Councils*, p. 673.

Vallarsi, DOMENICO, an Italian antiquarian, was born at Verona, Nov. 13, 1702, and studied the humanities with the Jesuits with such success that at the age of twelve he maintained a public thesis on philosophy. He afterwards entered the order, and applied himself to the study of Hebrew, Greek, and ecclesiastical history. He finally went to Rome as reviser of the ancient languages, and there became a noted authority on the antiquities of the Middle Ages, a subject on which he wrote several works. He also edited the *Opera Omnia* of Jerome (Verona, 1734, 12 vols. fol.), and those of Tyrannus Rufinus (ibid. 1745, 4to). He died at Verona, Aug. 14, 1771. See Hoefer, *Nour. Biog. Générale*, s. v.

Valle, ANDREA DELLA, an Italian architect of the 16th century, was born at Padua. His principal work was the Carthusian monastery, two miles from Padua. This structure, from its beautiful design, has been attributed to Palladio. He published an edition of the unprinted works of Palladio, in which he inserted five plates. See Spooner, *Biog. Hist. of the Fine Arts*, s. v.

Vallée, Geoffroi, a French deist of the latter part of the 16th century, was the son of the controller of the public domain. He gave himself up to philosophical speculations, which ended in rejecting all religious belief. In consequence of an infidel work which he wrote, entitled *La Béatitude des Chrétiens* (2d ed. 1770, 8vo), he was imprisoned, and, after trial, was hanged, and his body burned at Paris, Feb. 9, 1574. See Hoefer, *Nour. Biog. Générale*, s. v.

Vallée (or Valée), Simon, a French engraver, is said to have been born at Paris about 1700. He studied under P. Drevet, and executed several plates in a neat and tasteful style. Among them are the following: *The Transfiguration* (Raphael);—*St. John in the Desert* (id.);—*The Flight into Egypt* (Carlo Maratti);—*The Resurrection of Lazarus* (Girolamo Muziano);—*The Finding of Moses* (Francesco Romazelli);—and others. See Spooner, *Biog. Hist. of the Fine Arts*, s. v.

Vallemont, PIERRE le Lorrain, abbé de, a French writer, was born at Pont-Audemer, Sept. 10, 1649, of a Norman family. He entered the religious order; was made doctor of theology; lived successively at Rouen, where his peculiar views encountered opposition; at Paris, where he superintended the education of a young nobleman; at Versailles, as prior of St. James de Bresuire; and finally returned to his native place, where he died, Dec. 30, 1721. It is not known for what reason he took the surname of Vallemont. His writings, which are of a philosophico-religious character, are enumerated in Hoefer, *Nour. Biog. Générale*, s. v.

Vallensis, Johannes, of Autun, France, who lived in the 16th century, is the author of *Grammatica Hebraica* (Paris, s. a.);—*Opus de Prosodia Hebræorum in IV Libros Divisum* (ibid. 1545): the first book contains *Accentuum Inventio*; the second, *Grammat. et Musici Locus*; the third, *Rhetorici Accent. Offic.* etc.; the fourth, *Natural. Accent. Locus*. See Fürst, *Bibl. Jud.* iii, 468; Steinschneider, *Bibl. Handb.* No. 2055. (B. P.)

Vallensis, Theophilus, who lived in the 17th century, is the author of *Enchiridion Lingue Sanctæ s. Ebrææ Grammatica* (Lips. 1631). See Fürst, *Bibl. Jud.* iii, 468; Steinschneider, *Bibl. Handb.* No. 2057. (B. P.)

Vallet (or Valet), GUILLAUME, a French engraver, was born in Paris in 1636. After some study of his art he went to Rome, where he resided many years. His plates were executed with the graver, and his prints possess considerable merit. He died in 1704. Among his prints the following deserve mention: *The Nativity*; *The Holy Family*; *Melchizedek bringing Presents to Abraham*; *The Last Supper*—all after Raphael;—*The Holy Family*, after Guido, also after Albano;—and several others. See Spooner, *Biog. Hist. of the Fine Arts*, s. v.

Vallette, WILLIAM, a Methodist Episcopal minister, studied medicine early in life; joined the Illinois Conference in 1839; was transferred to Rock River Conference in 1840; and in the following year was ordained deacon. In 1846 hemorrhage of the lungs incapacitated him for further ministerial labor, and caused his retirement to Elgin as a supernummate, where he spent the remainder of his days in the practice of medicine. He died in 1871. See *Minutes of Annual Conferences*, 1872, p. 113.

Valley (also Vale), a hollow sweep of ground between two more or less parallel ridges of high land. Vale is the poetical or provincial form. It is in the nature of the case that the centre of a valley should usually be occupied by the stream which forms the drain of the high land on either side, and from this it commonly receives its name. Valley is distinguished from other terms more or less closely related—on the one hand, from “glen,” “ravine,” “gorge,” or “dell,” which all express a depression at once more abrupt and smaller than a valley; on the other hand, from “plain,” which, though it may be used of a wide valley, is not ordinarily or necessarily so. It is to be regretted that with this quasi-precision of meaning the term should not have been employed with more restriction in the A. V. See TOPOGRAPHICAL TERMS.

The structure of the greater part of the Holy Land does not lend itself to the formation of valleys in our sense of the word. The abrupt transitions of its crowded rocky hills preclude the existence of any extended sweep of valley; and where one such does occur, as at Hebron, or on the south-east of Gerizim, the irregular and unsymmetrical positions of the enclosing hills rob it of the character of a valley. The nearest approach is found in the space between the mountains of Gerizim and Ebal, which contains the town of Nablûs, the ancient Shechem. This, however, by a singular chance, is not mentioned in the Bible. Another is the “valley of Jezreel,” the undulating hollow which intervenes between Gilboa (Jebel Fukua) and the so-called Little Hermon (Jebel Duhy). See PALESTINE.

Valley is employed in the A. V. to render the following Heb. and Gr. words. See DALE; PLAIN.

1. *Bik'ah* (בִּיקְאָה, from בָּקַע, to cleave; Sept. πείριον) appears to mean rather a *plain* than a valley, wider than the latter, though so far resembling it as to be enclosed by mountains, like the wide district between Lebzanon and Antilebanon, which is still called the *Beka'a*. It denotes a wide alluvial bottom, and its levelness is plainly referred to in Isa. xl, 4. It is usually rendered “valley” (Deut. viii, 7; xi, 1; xxxiv, 3; Josh. xi, 8, 17; xii, 7; 2 Chron. xxxv, 22; Psa. civ, 8; Isa. xli, 18; lxiii, 14; Ezek. xxxvii, 1, 2; Zech. xii, 11); elsewhere “plain” (Gen. xi, 2; Neh. vi, 2; Isa. xl, 4; Ezek. iii, 22, 23; viii, 4; Amos i, 5). This Heb. term is applied to the following places:

(1.) *The Valley of Shinar* (בִּיקְאָה שִׁנָּר), the rich plain of Babylonia (Gen. xi, 2). See SHINAR.

(2.) *The Valley of Jericho* (בִּיקְאָה יֶרִיכוֹ), the lower end of the Ghôr, or plain, through which the Jordan

flows into the Dead Sea (Deut. xxxiv, 3). See JER-ICHO.

(3.) *The Valley of Lebanon* (וְגֵבֵי הַלְבָּנוֹן), the plain of Cæle-Syria between the Lebanon and Antilebanon ranges (Josh. xi, 17). See LEBANON.

(4.) *The Valley of Megiddo* (וְגֵבֵי מֶגִּידוֹ), a part of the plain of Esdraelon, through which the Kishon flowed (2 Chron. xxxv, 22; Zech. xii, 11). See MEGIDDO.

(5.) *The Valley of Mizpeh* (וְגֵבֵי מִצְפֶּה), the plain of the Hauran or of Gilead, east of the Jordan (Josh. xi, 4). See MIZPEH.

(6.) *The Valley of Sharon* (וְגֵבֵי שָׂרֹן), the level tract about Joppa, Lod, and Ramleh (Neh. vi, 2). See SHARON.

(7.) *The Valley of Aren* (וְגֵבֵי אֶרֶן), the plain of Damascus Syria (Amos i, 5), thought by some to be the same as No. 3. See AREN.

2. 'Enek (עֵנֶק, from עָנַק, to be deep; Sept. usually φάραγξ or κοιλάς, occasionally ἀλώριον, πεδίον, or Ἐμῆκ, Ἀμῆκ; A. V. invariably [except Gen. xiv, 17; 1 Sam. xviii, 18] "valley") designates a long broad sweep between parallel ranges of hills of less extent than the preceding term, but greater than the following ones, and answering quite closely to the Western idea in general of a valley in its proper sense, having the idea of lowness and breadth rather than precipitousness or confinement. It is specifically applied to the following localities, which we enumerate in alphabetical order:

(1.) *The Valley of Achor* (וְגֵבֵי אַחֲרָיִם), a valley near the N.W. end of the Dead Sea (Josh. vii, 24, 26; xv, 7; Isa. lxxv, 10; Hos. ii, 15). See ACHOR.

(2.) *The Valley of Ajalon* (וְגֵבֵי אֶיָּלֹן), a valley in the tribe of Dan (Josh. x, 12). See AJALON.

(3.) *The Valley of Hebron* (וְגֵבֵי הֶבְרֹן), the valley in which Hebron lies (Gen. xxxvii, 14). See HEBRON.

(4.) *The Valley of Jehoshaphat* (וְגֵבֵי יְהוֹשָׁפָט), the valley between Jerusalem and the Mount of Olives (Joel iii, 2, 12); in the same connection called figuratively the valley of the decision (וְגֵבֵי הַחֲרֹם, ver. 14). See JEHOSEPHAT.

(5.) *The Valley of Jezreel* (וְגֵבֵי יִזְרְעֵאל), the eastern extension of the plain of Esdraelon (Josh. xvii, 16; Judg. vi, 33; Hos. i, 5). See JEZREEEL.

(6.) *The Valley of Keziz* (וְגֵבֵי קֶצִיז), a valley in the tribe of Benjamin (Josh. xviii, 21). See KEZIZ.

Besides the above, the term is sometimes used as an appellative for certain well-known localities, e. g. the valley of the weeping (Psa. lxxiv, 6; A. V. "valley of Baka" [q. v.]), the valley of blessing (2 Chron. xx, 26; A. V. "valley of Berachah" [q. v.]), the valley of the oak (1 Sam. xvii, 2, 19; xxi, 9; A. V. "valley of Elah" [q. v.]), the valley of giants (Josh. xv, 8; xviii, 16; "valley of Rephaim" [q. v.]; 2 Sam. v, 18, 22; xxiii, 13; 1 Chron. xi, 15; xiv, 9; Isa. xvi, 5), the valley of Shaveh [q. v.] (Gen. xiv, 17), or of the king ("dale," ibid., 2 Sam. xviii, 18), the valley of the slime-pits (Gen. xiv, 3, 8, 10; A. V. "of Siddim" [q. v.]), the valley of booths (Psa. lx, 6; cviii, 7; A. V. "of Succoth" [q. v.]), etc.

3. Gay (גַּי or גֵּי) or Grey (גַּי or גֵּי; plur. גַּיִּים and גַּיִּת, from גָּיַץ, to flow; Sept. usually φάραγξ), a deep narrow ravine with a (winter or perennial) stream in the bottom, either between hills (like the Ge-Hinnom at Jerusalem) or through an open plain (as along the Mediterranean or in Moab). (In the A. V. it is invariably rendered "valley" (in the Sept. occasionally κοιλάς, ῥάπη, ἀλώριον, and even γῆ). It is applied distinctively to the following localities. See also Ar; BETHPHOTH, etc.

(1.) *The Valley of Hinnom* (וְגֵי הֵיזֶם, Josh. xv, 8;

xviii, 16; Neh. xi, 30), or of the Son of Hinnom (וְגֵי הַזֵּם, Josh. xv, 8; xviii, 16; 2 Kings xxiii, 10; 2 Chron. xxxiii, 3; xxxiii, 6; Jer. vii, 31, 32; xix, 2, 6; xxxii, 35), the ravine on the south-western side of Jerusalem, whence the term Gehenna (q. v.).

(2.) *The Valley of Jiphthah-el* (וְגֵי יִפְתָּחֵל), a ravine on the boundary between Zebulun and Asher (Josh. xix, 14, 27). See JIPHTAH-EL.

(3.) *The Valley of Zephathah* (וְגֵי צִפְתָּחָה), a ravine in the tribe of Simeon (2 Chron. xiv, 10). See ZEPHTAH-EL.

(4.) *The Valley of Gedor* (וְגֵי גֶדוֹר), another ravine in Simeon (1 Chron. iv, 39).

(5.) *The Valley of Hamon-gog* (וְגֵי הָמוֹן גֹּג), Ezek. xxxix, 11, 15), or of the Passengers (וְגֵי הַעֲבָרִים, ver. 11), a ravine on the east of the Sea of Galilee. See HAMON-GOG.

(6.) *The Valley of the Craftsmen* (וְגֵי הַחֲרָשִׁים, Neh. xi, 35; or חֲרָשִׁים, 1 Chron. iv, 14), a ravine in the tribe of Judah. See CHARASHIM.

(7.) *The Valley of the Mountains* (וְגֵי הָהָרִים, Zech. xiv, 5, or הָהָרִים, ibid.), a ravine near Jerusalem (q. v.).

(8.) *The Valley of Salt* (וְגֵי הַמֶּלַח), a ravine on the S.W. shore of the Dead Sea (2 Sam. viii, 13; 2 Kings xiv, 7; 1 Chron. xviii, 12; 2 Chron. xxxv, 11; Psa. lx, title). See SALT.

(9.) *The Valley of the Hyenas* (וְגֵי הַצִּבְיִים), a ravine in the tribe of Benjamin (1 Sam. xiii, 18). See ZEBOM.

Other ravines, such as the valley of vision (Isa. xxii, 1, 5), of slaughter (Jer. vii, 32; xix, 6), are fanciful names, and still more tropical, the valley of the shadow of death (Psa. xxiii, 4).

4. Náchal (נַחַל, from נָחַל, to receive, or perhaps to flow; Sept. φάραγξ or χειμάριον; A. V. often "brook," "river," "stream") is the word which exactly answers to the Arabic wady. It expresses, as no single English word can, the bed of a stream (often wide and shelving and like a "valley" in character, which in the rainy season may be nearly filled by a foaming torrent, though for the greater part of the year dry), and the stream itself, which after the subsidence of the rains has shrunk to insignificant dimensions. Many of the wadies of Syria, owing to the demolition of the wood which formerly shaded the country and prevented too rapid evaporation after rain, are now entirely and constantly dry. See RIVER. As Palestine is now emphatically a land of wadies, so this Heb. term is of very frequent occurrence in the Bible. Stanley (*Palest. append.*) enumerates fifteen of these water-courses or torrent-beds: those of Gerar, of Eshcol, of Zered, of Arnon, of Jabbok, of Kanah, of Kishon, of Besor, of Sorek, of Kidron, of Gaash, of Cherith, of Gad (2 Sam. xxiv, 5), of Shittim, and of Egypt (Numb. xxxiv, 5; Josh. xv, 4, 47; 1 Kings viii, 65; 2 Kings xxiv, 7; 2 Chron. vii, 8; Isa. xxvii, 12). This last could not be distinguished by a mere English reader from the "river of Egypt," namely, the Nile, although in the original an entirely different word is used. This name náchal is also applied to the course of the Gihon (2 Chron. xxxiii, 14), and such wadies are often mentioned in the book of Job and elsewhere as characteristic of Arabia; Canaan itself is said to be a land of them (Deut. viii, 7). See BROOK.

5. Hash-Shephelah (הַשְּׁפֵלָה; Sept. τὸ πεδίον, ἡ πεδινή) is the only case in which the employment of the term "valley" is really unfortunate. The district to which alone this distinctive Heb. name is applied in the Bible has no resemblance whatever to a valley, but is a broad swelling tract of many hundred miles in area, which sweeps gently down from the mountains of Judah to-

wards the Mediterranean. It is rendered "the vale" in Deut. i, 7; Josh. x, 40; 1 Kings x, 27; 2 Chron. i, 15; Jer. xxxiii, 13; and "the valley" or "valleys" in Josh. ix, 1; xi, 2, 16; xii, 8; xv, 33; Judg. i, 9; Jer. xxxii, 44. See SHEPHELAH.

6. In the New Test. there is little notice taken of the external features of Canaan. In Luke vi, 17 we read of our Lord standing in "the plain," *τόπος πεδινός* (but this should rather be "a level place"); and in iii, 5 we meet with "valley," *φάραγξ*, for *Σῶζα*, *gey*, in Isa. xl, 4.

Valley-gate (נָחֳלֵינוּ פֶּתַח; Sept. *ἡ πύλη τῆς φάραγγος*), an entrance at the north-west end of Jerusalem (Neh. ii, 13; iii, 13; comp. 2 Chron. xxvi, 9; xxxiii, 14); probably corresponding to the present Jaffa Gate (Keil, *Comment. on Neh.* ad loc.). See JERUSALEM.

Vallière, Louise, *Duchesse de la*, one of the maids of honor to the duchess of Orleans (Henrietta of England), born in the province of Touraine in 1644. She became mistress to Louis XIV in 1661, and loved him sincerely, though not for his royal title. She was so much ashamed of her equivocal situation that she entered a convent, from which she was taken forcibly by the king in 1670, and entered again by joining the Carmelite Order in 1674 as *Sœur Louise de la Miséricorde* (Sister Louise of Mercy). She died at the Paris Carmelite Convent in 1710. She wrote *Letters and Reflections on the Mercy of God*. She has been a favorite theme with poets and painters. The *Mary Magdalene Renouncing the World*, painted by Le Brun as an altarpiece for the convent in which she made her profession, has been considered a portrait of her. Others consider *The Penitent Magdalen* in the Munich Gallery as more likely to be her portrait. A very good picture of the *Sœur Louise de la Miséricorde* may be seen in the British Museum. See Jameson [Mrs.], *Legends of the Monastic Orders*, p. 427.

Vallischolares (*scholars of the valley*), an order of Romish monks collected by the *scholares*, or four professors of theology of Paris. They were first called *scholares*, but afterwards, retiring to a valley of Campania (1234), their name was changed to that by which they are now known. This society was first governed by the rule of St. Augustine, but it is now united with the Canons Regular of St. Geneviève (q. v.). See Moshcim, *Hist. of the Church*, bk. iii, cent. xiii, pt. ii, ch. ii.

Vallombrosa (*shady valley*), a former Benedictine monastery in a valley of the Apennines, eighteen miles from Florence, founded in 1039 by Giovanni Gualberto (q. v.). The present buildings were erected in 1638, but the establishment was suppressed in 1869 by the Italian government, and the buildings converted into a royal school of forestry.

Vallonia, in Roman mythology, was the nymph of valleys.

Valois, Félix de, a pious Frenchman who, in company with John of Matha (q. v.), founded the Order of Brethren of the Holy Trinity, for the redemption of captives, in the early part of the 13th century. He led a solitary life at Cerfroi, in the diocese of Meaux, where the principal house of the sect still exists. See Jameson [Mrs.], *Legends of the Monastic Orders*, p. 217 sq.

Valpuesta, Pedro, a Spanish painter, born at Osma, in Old Castile, in 1614. He is said to have studied with Engenio Caxes, whose style he was the most successful in imitating. He died at Madrid in 1688. His principal works are in the churches and convents at Madrid. The most important are a series of pictures representing the life of the Virgin, in the Church of San Miguel:—*The Holy Family*, in the chapel of the Hospital del Buensuceso:—six pictures of the history of *St. Clara*, in the convent of the Franciscan Nuns. See Spooner, *Biog. Hist. of the Fine Arts*, s. v.

Valpy, Edward, D.D., a clergyman of the Church

of England, born in the island of Jersey in 1764. He was educated at Trinity College, Cambridge, took orders in the Church, and was for many years assistant to his brother Richard (q. v.) in the classical department of his school at Reading. He became head-master of the grammar-school at Norwich in 1810. He held the rectory of Thwaite and the vicarage of St. Mary's, Walsingham, Norfolk. He died at Yarmouth, April 15, 1832. His published works are, *Elegantie Latine* (1803):—*Greek Testament* (1816, 3 vols.):—*The Septuagint* (1819):—and *Homer's Iliad* (1819).

Valpy, Richard, D.D., F.R.S., a clergyman of the Church of England, born in the island of Jersey, Dec. 7, 1751. He was educated at the College of Volognes, Normandy, 1764 to 1769; at the Southampton Grammar-school, and at Pembroke College, Oxford, where he graduated about 1776. He took orders in the Church, held for several years a living at Bury St. Edmund's, and became rector of Stradishall, Suffolk, in 1787. From 1781 to 1830 he was head-master of the celebrated school founded at Reading by Henry VII, and composed for that institution a series of classical text-books of considerable reputation. He died at Kensington, March 28, 1836.

Vamana, the fifth avatar, or incarnation, of Vishnu, in which he appears as a dwarf. Bali was a powerful king who conquered Indra (q. v.), ruled over the three worlds, and filled the gods with dismay for their future prosperity. Even Vishnu could overcome him only by craft. While Bali was performing on an extraordinary scale a sacrifice in honor of the gods, in order that he might gain still more power by his meritorious action and rule more widely than ever, a dwarf approached him and did him reverence. Pleased with the devout and unpretending manner of the little Brahman, Bali asked him to demand a boon, however costly it might be. But the dwarf merely asked for so much ground as he could measure with three paces. The king smilingly granted so modest a request, although his family priest Usanas, suspecting the divine nature of the dwarf, strongly dissuaded him from doing so. Then the god leaped up as the mightiest of the host of Heaven, and strode with one pace over the earth, with a second over the intermediate space or atmosphere, and with a third over the sky, thus leaving to Bali only the lower regions, which he assigned him as his future abode. The utterance of Bali in reference to this disaster will serve to show how sacred a promise is held by the Hindus when once obtained. He said, "If, renowned chief of the gods, you consider the word which I uttered to be deceitful, I now do what is sincere and can be no deception, place your third step on my head. Fallen from my position, I fear not the infernal regions, or binding in bonds, or misfortune difficult to escape, or loss of wealth, or your restraint, so much as I am afflicted by a bad name" (Muir, *Original Sanscrit Texts*, iv, 128). For his piety and promise-keeping manner he was rewarded by Vishnu with the promise that, after a temporary residence in one of the most delightful places of Patala (q. v.), he should be born as Indra in the reign of the eighth Manu.

The Vedic conception of the three strides of Vishnu is doubtless the basis of the idea from which this avatar arose. In this incarnation as dwarf, Vishnu is considered to have been a son of the same Kasypa [see VARANA] who is also the father of Hiranyakasipu and Hiranyaksha; but while their mother is Diti, the dwarf's mother is *Aditi* (space); and as she had previously brought forth Indra, Vishnu is sometimes called Upendra, or the younger Indra. As son of Aditi, Vishnu becomes one of the Adityas. See VISHNU.

Vamis, or Vamacharis (*left-hand worshippers*), a Hindü sect who adopt a ritual contrary to what they dare publicly avow. They worship Devi, the Sakti of Siva (q. v.). The Sakti is personated by a naked female, to whom meat and wine are offered and then dis-

tributed among the attendants. Then follows the recitation of mantras and texts, the performance of the *mandra*, or gesticulations with the fingers, the whole terminating with the most scandalous orgies. The members of this sect are very numerous, especially among the Brahminical tribe. Their insignia are a semicircular line or lines on the forehead, of red sanders or vermilion, or a red streak up the middle of the forehead, with a red spot at the root of the nose. In worshipping they wear a piece of red silk around the loins, and decorate themselves with garlands of crimson flowers. See Gardner, *Faiths of the World*, s. v.

Van Arsdale, Cornelius C., D.D., a Reformed (Dutch) minister of the United States. He graduated at Rutgers College in 1828, and at New Brunswick Theological Seminary in 1831; supplied Central Church, Brooklyn, 1838-40; South Church, Brooklyn, 1840-41; First Church, Philadelphia, 1841-49; Greenwich Church, New York city, 1852-54. He died in 1856. His published works consist of sermons preached on various important public occasions. See Corwin, *Manual of the Ref. Ch. in America*, s. v.

Van Arsdale, Melville, a Methodist Episcopal minister, was born in Montgomery County, Ind., March 21, 1845; embraced religion in his fourteenth year; studied at Thorntown Academy; served as a soldier in the Union army; and in 1867 entered the Upper Iowa Conference. Later he was transferred to the North-west Indiana Conference, wherein he labored but a short time, and then returned to his father's home in Thorntown, and died Dec. 25, 1875. See *Minutes of Annual Conferences*, 1876, p. 98.

Van Arsdale, Simeon, a minister of the Reformed (Dutch) Church, was born in 1754. He was licensed in 1782, and preached at Readington, N. J., 1783-86. He was a powerful and polished preacher, ardent in piety, and untiring in all his pastoral labors, but was cut off in the very beginning of his ministry. He died in 1786. See Corwin, *Manual of the Ref. Ch. in America*, s. v.

Vanatta, Samuel F., a Presbyterian minister, was born in Bridgeport, Belmont Co., O., Sept. 12, 1826. He was educated in Franklin College, New Athens, O., and studied theology in the Associate Reformed Seminary, Allegheny, Pa. He was licensed by Steubenville Presbytery, June, 1855. He died in Vicksburg, Miss., May 30, 1864. See Wilson, *Presb. Hist. Almanac*, 1866, p. 280.

Van Bokkelen, James Ellisdon, a Protestant Episcopal clergyman, died in Baltimore, Md., Nov. 17, 1850, aged twenty-five years. He was a graduate of the General Theological Seminary, and during his short ministry had charge of Grace Church, Elk Ridge Landing, Md., and St. Paul's Church, St. Louis, Mo. At the time of his death he was assistant minister of St. Timothy's Church, Md. See *Amer. Quar. Ch. Rev.* 1851, p. 639.

Van Brunt, Rutgers, a minister of the Reformed (Dutch) Church, was born in New York in 1820. He graduated at Hobart College in 1840, and at New Brunswick Theological Seminary in 1848, when he was licensed by the classis of that institution. He preached at Albany, N. Y., 1848-49; Newark, N. J., 1849; Smithtown and Carmel, N. Y. (Presbyterian), 1851-57; Waterford, N. Y., 1857-61. He died April 28, 1863. He was a man of broad and liberal culture, a thorough student, a pious and faithful minister. His labors were blessed by a revival at Newark. See Corwin, *Manual of the Ref. Ch. in America*, s. v.

Van Bunschooten, Elias, a clergyman of the Reformed (Dutch) Church in America, son of a farmer, Tennis Van Bunschooten, was born at New Haekensack, near Fishkill, N. Y., Oct. 26, 1738. He was one of five brothers, none of whom ever married, although all of them lived to adult age. One of them, while on a voy-

age to the West Indies, was killed by mutineers, with all on board except a small boy. One of these mutineers, named Anderson, after conviction in New York, was executed upon an island in the harbor, which has ever since been called Anderson's or Gibbet Island, where Gibbs and other pirates were afterwards hanged. There were also three sisters, all of whom were mothers of large families. Mr. Van Bunschooten was educated at Princeton College; graduated in 1768; studied theology with Dr. Hermanus Meyer, of Kingston; and was licensed to preach in 1773 by the "General Meeting of Ministers and Elders." He settled that year at Schaghticoke, N. Y., and remained until 1785, when he removed to the Kittatinny valley, which extends from the Delaware to the Hudson, and became pastor of three united churches—Minisink, N. Y.; Magagecamaek (now Port Jervis), N. Y.; and Walpack, N. Y. During his ministry another Church was formed at the Clove in 1788 (Dutch *kloop*, a valley *clown* by a stream). At this place he ultimately located his home upon an extensive farm. In 1803 a plentiful revival blessed his faithful ministry. He withdrew from active service, on account of age, in 1812, and died Jan. 10, 1815. Mr. Van Bunschooten's ministry was pure and healthful in its influences. He was fond of books and of learning. He preached equally well in Dutch and in English, always from a careful analysis, but often with peculiarities of thought which were quite characteristic, and not always in good taste. His voice was full, but not loud, and his manner in the pulpit was earnest and impressive. He was very eccentric. He was about six feet high, erect and stately, and there was "something about him that reminded you of an Indian chief." His general manner was rather austere, although to intimate friends he could pleasantly unbend. Under his ministry the very primitive and uncultivated people of his extensive charge, which was fifty miles long, and in a newly opened wilderness region, greatly improved in mind, manners, education, and religious spirit, much of which is attributed to his influence. He was scrupulously exact in all his business transactions. His salary was about £100 per year. It is said that a defaulting deacon, who had collected his salary, mortgaged his farm to the dominie to secure his payment. After his ministry ceased this mortgage was foreclosed, and the place was given to the Church as a parsonage. He owned a mill, and once sent his negro servant on horseback after a creditor, who would not wait for three cents change, a distance of seven miles, to overtake him and pay his debt in full. He married a couple, whom he had been sent for to join in wedlock, while the Delaware River, swollen by a freshet and bridgeless, was running *between* him and the happy parties to whom he could not cross. In his marriage register he headed the date column "Time of execution." During his last illness he insisted upon paying every one of his neighbors who watched with him at night or by day a day's wages in silver, however unwilling they might be. This was his sense of exact justice and independence. Inheriting a handsome portion from his father's estate, and by frugal management acquiring a large property, in his old age he devoted an unusual proportion of his worldly goods to the cause of ministerial education. At the suggestion of his life-long friend Dr. John H. Livingston, who wrote him a memorable letter just when he was about removing from New York to take charge of the Theological Seminary in New Brunswick, July 31, 1810 (*Life of Livingston*, p. 250-256), he donated a large fund, which has always borne the founder's name, to the trustees of Rutgers (then Queen's) College, to educate "pious young men who hope they have a call of God to preach the Gospel of Jesus Christ." The nomination of incumbents must always be made by the General Synod. The manner in which this fund was given was perfectly characteristic of the donor. While the General Synod of 1814 was sitting in New York, the venerable and quaint-looking old man, with his broad-brimmed, round-crowned hat in hand, walked calmly up the aisle to-

wards the president's seat, bowing as he came up, and said, "Mr. President, I want to talk." Nobody knew him, and the president asked, "Are you a member of this body, sir?" "No, sir," was the reply, "but I want to talk." The president reminded him that none but members had a right to speak, when an aged minister, who had just come in, recognised him, and said, "I move that the Rev. Elias Van Bunschooten have leave to talk." It was carried, and then the old patriarch went up to the president's table, drew from his pocket a large roll of bank-bills and counted them—\$800. Then he took another package of obligations, amounting to \$13,810, and counted this out, and, in a few well-chosen words, donated them to the astonished synod, and asked a committee of conference to arrange the conditions. Subsequently, by will, he added other sums, the whole being allowed to accumulate until it reached \$20,000. Such is the history of this endowment, which was, so far as is known, the first one made in our country, and certainly the first made in the Reformed Church, for theological education. Not a dollar of it has been lost. The capital now amounts to over \$20,000, while the interest has educated over one hundred and twenty-five young men for the ministry, some of whom have been among the most eminent and useful in the service of the Church at home and in foreign lands. "And by it he, being dead, yet speaketh." In 1817 Mr. Van Bunschooten's remains were removed, by direction of the General Synod, to the graveyard of the ancient church in New Brunswick, where they lie beside those of his friend Dr. Livingston and other professors of theology. At the interment of his body, a respectable unconverted woman of his Church, who stood looking on, was so powerfully affected by the recollection of his faithful sermons and unheeded private teachings that, as she saw the coffin raised, she uttered a cry of anguish and became almost helpless from the rush of her feelings of sin and righteousness and judgment to come; she sank almost into despair, and it was nearly a year before she found peace in believing. The very singular and yet precise and pious terms of the formal bequest of Mr. Van Bunschooten, and which require it to be read at the regular meetings of the synods and classes of the Church, "not for aggrandizement or self-ostentation, but to be an humble pattern to others," were drawn up, doubtless at his suggestion however, by the Hon. Abraham Van Vechten of Albany, an elder of the synod and member of the committee of conference. The "pattern" has been nobly "followed by others." See McClure, in the *New Brunswick Rev.* 1855; Todd, *Life of Rev. P. Labagh*; Gunn, *Life of Dr. J. H. Livingston*; Corwin, *Manual of the Ref. Ch. in America*, s. v. (W. J. R. T.)

Van Buren, P. H., a young minister of the Reformed (Dutch) Church, was born at Fultonville, N. Y., in 1846. He graduated with honors at the University of the City of New York in 1861, and at the New Brunswick Theological Seminary in 1867; was licensed as a minister in 1867, and called to the Church at Frechold, N. J., but was prevented from settling by sickness, and died in 1868. He had made thorough preparation for the ministry, but he resigned himself to the will of God and departed in peace. See Corwin, *Manual of the Ref. Ch. in America*, s. v.

Vance, Andrew, D.D., a Presbyterian minister, was born near Abingdon, Va., July 23, 1788. He was awakened to a sense of his lost condition, and became so concerned that he neither ate, drank, nor slept, and was reduced almost to a skeleton. His whole care after conversion was as to how he could do the most good in the world, and he determined to preach the Gospel. Following out his purpose, he entered Washington College, East Tennessee, from which he graduated. He was prevented from entering Princeton Theological Seminary from want of health, and he pursued his theological studies with a private tutor. He entered the ministry in 1828 at Baker's Creek Church, E. Tenn.,

and was ordained and installed by the Union Presbytery. At the division of the Church in 1837-38 he was the only member of the Presbytery who adhered to the Old-school side. As a result of his adherence his property was all taken from him, and he was reduced to poverty. In 1867 he attended the meeting of the General Assembly at Cincinnati, O., after which he removed to Illinois and had several calls from churches in that state; but Providence having opened a way for his return to his old charge at Baker's Creek, he availed himself of it, and returned and resumed his ministrations. Here he remained and finished his long and useful labors. Died at Unitia, Tenn., Nov. 1, 1872. See *The Presbyterian*, Jan. 25, 1873. (W. P. S.)

Vance, Thomas P., a Methodist Episcopal minister, was converted in 1827, joined the Kentucky Conference in 1829, in which he continued faithful and successful until his death from bilious fever, Oct. 6, 1834. See *Minutes of Annual Conferences*, 1835, p. 343.

Van Cleef, CORNELIUS, D.D., a minister of the Reformed (Dutch) Church, born at Harlingen, N. J., Sept. 16, 1799. He graduated at Dickinson College in 1823, and at New Brunswick Theological Seminary in 1826; was licensed at Philadelphia in 1826; missionary at Palatine, N. J., in 1826; at Manayunk, Pa., 1827 to 1828; Athens, 1828 to 1833; New Hackensack, N. J., 1833 to 1866, and died June 13, 1875. He was converted at the age of sixteen, and was eminent for piety during his whole life. As a preacher he was faithful, earnest, and impressive. See Corwin, *Manual of the Reformed Church in America*, s. v.

Vandals (*Vandali, Wandali, Vindili*) were a Germanic tribe which ranks with the Goths, Herulians, Rugians, etc., among the migratory hordes that swarmed over the boundaries of the devoted Roman empire and founded new states upon its ruins. This people possesses great importance, not only for general history, but, by reason of its passionate opposition to the Catholic faith, for the history of the Church as well. Their original seat was in the northern sections of the Riesengebirge and the modern Lusatia, whence they burst forth in the reign of the emperor Marcus Aurelius as the allies of the Marcomanni. Some years later they appeared on the borders of Dacia by the side of the Goths and Gepidae, but were induced by the emperor Probus to settle peaceably in that province. They were at a later day badly defeated by the Goths, and given a residence in Pannonia by the emperor Constantine, where they sustained friendly relations to their neighbors, and received Christianity from the Visigoths in its Arian form.

In the year 406 the Vandals laid aside their peaceful habits, and, in conjunction with the Alani and the Suevoi, swept in savage irruption over the countries of Western Europe. They defeated the Gauls, crossed the Pyrenees, and entered Spain, ultimately settling in the southwestern part of the peninsula (Vandalitia, Andalusia) and making it the base from which they carried barbarous devastations into all the regions accessible to their armies, the fanatical suppression of the Catholic party being everywhere a noticeable feature in their operations. The accession of Genseric (Gaiseric, Geiseric) to the sovereignty in 428 began a new epoch in their history. Count Boniface, the Roman governor of Africa, having been goaded on to rebellion through the machinations of Aetius, the conqueror of Attila, invited Genseric to come to his assistance, and the latter responded by crossing over into Africa with more than fifty thousand men in May, 429. Boniface was soon afterwards reconciled to the emperor, through the efforts of Augustine, bishop of Hippo, and thereupon endeavored to turn back his Vandal allies, first by persuasion and afterwards by force of arms, but without success. In 435 they concluded a treaty with Rome, which gave them the provinces of Mauritania and Numidia; four years afterwards Carthage fell into their hands and was made the capital

of their possessions. Sicily, Sardinia, Corsica, Majorca, and Minorca were included in their empire. In 455 Rome itself was taken, the emperor Maximus killed, and the city given over to pillage during fourteen days—June 15–29. Many prisoners, among them the empress Eudoxia and her two daughters, and many treasures and works of art were taken away to their African dominions. The empire twice endeavored to punish the insolence and cruelties of these barbarian invaders—first in 457, when a fleet sent against the Vandals was destroyed by Genseric in the bay of Carthage; and again in 468, when an expedition sent from the East, and commanded by Heraclius, encountered a similar fate off the city of Bona. Genseric died Jan. 15, 477. Under his rule the Vandals extended their dominions in every direction; but, in the process, conducted themselves with such barbarity in the securing of spoil and the destruction of works of art that the world fixed on them its stigma of opprobrium, and perpetuated it for all time by the coining of the term *Vandalism*. Especially cruel was their treatment of orthodox Christians as it is described by the contemporary bishop Victor of Vita in the province of Byzacium. Not only were churches and other buildings destroyed, but also cities; fields and plantations were devastated; clergymen, wealthy laymen, and women of every age and rank were made to endure every form of suffering. The torture was in constant use. Masses of people were driven together in the vicinity of fortresses impregnable to the Vandal arms, and there massacred in order that the stench of the putrefying bodies might compel a surrender. After the capture of Carthage, Genseric announced his determination to thoroughly supersede the Catholic with the Arian doctrine; and to accomplish this result he either banished or enslaved the orthodox clergy and laity and gave the churches to his friends. Hunneric, the son and successor of Genseric, followed his father's example. The Catholics of Carthage were at first permitted to choose a bishop, and selected Eugenius; but the persecutions soon began afresh. Only Arians were allowed to hold office in the State; and such Catholics as had been in official stations were deposed, deprived of their property, and banished. Devoted virgins were tortured to compel the confession that they had been guilty of illicit relations with clergymen of their faith. About five thousand Catholics, chiefly clergymen, were banished to the desert, where many starved to death and others died of the maltreatment they experienced. In 484 the African bishops were summoned to meet the Arians at Carthage, and endeavor to prove the Homoousian creed from the Scriptures. No bishops from beyond the sea were allowed to be present. Previous to the meeting of the synod several orthodox bishops were scourged, and the respected and learned bishop Lætus of Nepte was burned at the stake. In the synod Cyrilla, Arian patriarch of the Vandals, presided, seated with his coreligionists upon an elevated throne, while the orthodox bishops stood before it in the attitude of criminals. When they ventured to protest against this indignity, as also against the assumption of patriarchal functions by Cyrilla, they were each beaten with one hundred blows with rods. To still further intimidate them, the king caused seven monks who refused to become Arians to be tortured at Carthage and then taken on shipboard to be burned to death on the high seas—a plan which failed because the vessel would not burn, so that the executioners were obliged to beat out the brains of their victims with their oars. The Catholics, however, presented the synod with a clear and concise statement of their doctrines, which was publicly read; but no further discussion was allowed. The king issued an edict which closed all orthodox churches in Africa on the same day, and confiscated all the property of the orthodox, for the use of the Arian, bishops. Soon afterwards a second edict commanded the execution upon Catholics who should not have accepted Arianism by June 1, 484, of all the pun-

ishments decreed by Roman emperors against Donatists, Manicheans, and other heretics. After Hunneric's death, in 486, a temporary lull took place in the fever of persecutions, which continued as long as his successor, Gundamund, occupied the throne; but when Thrasimund became king, Sept. 21, 496, the troubles of the Catholics began afresh. Among the sufferers at this time was Fulgentius of Ruspe (q. v.). Upon Thrasimund followed the more tolerant Hilderic, May 26, 523; and upon him, in 531, the usurper Gelimer, uncle to Genseric. The wealth of the Vandals and the enervating climate of their home had in the meantime destroyed their robust character; they had also been defeated in several conflicts with the Mauritanians; and were disunited among themselves. Under these circumstances, the ambitious emperor Justinian despatched an army under Belisarius to the support of the Catholic Church in Africa, which defeated the Vandal forces in 534, made a prisoner of Gelimer, and so completely destroyed the nation that its very name was lost. The Synod of Carthage followed, in which measures were taken with reference to the Arian bishops and persons whom they had baptized; and which petitioned the emperor for the return of ecclesiastical property alienated from the Church during the persecutions.

Vandercook, JACKSON C., A.M., a Methodist Episcopal minister, was born in Lyons, N. Y., Aug. 3, 1814. He joined the Church in 1833; united with the Black River Conference in 1848; and successively served the following appointments: South Canton, Fort Covington, Gouverneur, Oswego, Fairfield, Geddes, Fulton, Oswego a second time, Adams, and a second time Geddes. He died at his residence in Fulton, May 27, 1866. Mr. Vandercook possessed a vigorous and logical mind, was well versed in logic and mental and moral science; had a rare power of generalization; and was independent, energetic, and faithful. See *Minutes of Annual Conferences*, 1867, p. 122.

Vanderlinde, BENJAMIN, a Reformed (Dutch) minister, was born near Hackensack, N. J., in 1719, and was the first person educated and licensed in this country by the Coetus to preach the Gospel as a minister of the Dutch Reformed Church in America. This occurred in 1747, and was the occasion of much previous hesitation and subsequent conflict. The advocates of a learned ministry treated it as a dangerous innovation, a beginning of revolutionary proceedings, and of defection from the mother Church in Holland. His examination was sustained, and he was afterwards ordained and installed over the Church at Paramus, N. J., of which he remained the acceptable pastor for forty-one years—1748 to 1789. He preached also at a place called Ponds; and two new churches, Ramapo and Saddle River, were organized during his ministry. His wife was a niece of general Schuyler, the Revolutionary patriot. He died in 1789. See Corvin, *Manual of the Reformed Church in America*, p. 500. (W. J. R. T.)

Vanderlip, ELIAS, a Methodist Episcopal minister, was born in 1768. He joined the Church in New York city when but a young man; labored many years as a local preacher; and in 1802 was admitted into the travelling connection in the Troy Conference, and was appointed to Pittsfield Circuit. In 1806 Mr. Vanderlip located in Albany; the following year he travelled Ul-

ster Circuit; but poverty again obliged him to locate in 1808 and go into business. In 1838 he again united with the Troy Conference, and was appointed to Johnstown Circuit. In 1810 he was superannuated, and died Sept. 3, 1818. Mr. Vanderlip was deeply pious, very zealous, and a preacher of considerable ability. See *Minutes of Annual Conferences*, 1819, p. 310.

Vandermeulen, CORNELIUS, a minister of the Reformed (Dutch) Church, born at Mindelhamis, Netherlands, Dec. 15, 1800. He joined the *Christelijke Afgeschiedene Kerk in Nederland*, a body which had separated from the National Church. He preached at Mindelhamis, Rotterdam, and Goos from 1839 to 1847, when, owing to the persecutions suffered by his Church, he emigrated with a large part of his congregation to Holland, Ottawa Co., Mich., and founded the flourishing village of Zeeland, where he preached from 1847 to 1859. He was pastor of the First Church, Chicago, from 1859 to 1861; Second Church, Grand Rapids, Mich., from 1861 to 1873. He died Aug. 23, 1876. See Corwin, *Manual of the Reformed Church in America*, s. v.

Van der Schnur, K., a minister of the Reformed (Dutch) Church, was born at Midwolda, Netherlands, April 17, 1803. He studied under the Rev. Mr. Kok, and was licensed and ordained by the Church of the Separated in 1810; preached at Hoogeveen from 1840 to 1848; emigrated to Michigan in 1848; preached at Graafschap from 1818 to 1850, and at Oostburg, Wis., from 1850 to 1866. On removing to the West, he entered upon his labors in the new country, and shared in all the hardships of Western pioneer life. He died Nov. 17, 1876. See Corwin, *Manual of the Ref. Church in America*, s. v.

Van der Sloot, FREDERICK WILLIAM, a minister of the German Reformed Church, was born in Dessau, Germany, Nov. 11, 1773. His father was a minister. Educated in Europe, he emigrated to the United States in 1801. Licensed and ordained in 1802, he took charge of seven congregations in Lehigh and Northampton counties, Pa. In 1811 he was called to Germantown, near Philadelphia. In 1813 he removed to New Goshenhoppen, Montgomery Co. In 1818 he was called to Philadelphia, where he founded Salem's German Reformed Church. In 1824 he removed to Rockingham County, Va., where he served ten congregations. In 1827 he became pastor of a charge in York and Adams counties, Pa., which he served until his death, Dec. 14, 1831. He was a fine linguist, a good preacher, and also a poet, many of his poems having been published. Two of his sons entered the ministry.

Vanderveer, CYRUS G., a minister of the Reformed (Dutch) Church, was born in New Hurley, N. Y., in 1835. At the age of seventeen he entered upon a commercial career, which lasted four years; but when he found the Saviour, he gave himself to the work of the ministry. He graduated at the New Brunswick Theological Seminary in 1859, when he was licensed to preach; became missionary at Havana in 1859; at Davenport, Ia., from 1859 to 1861; chaplain in the army from 1861 to 1862; and corresponding secretary of the Board of Domestic Missions from 1866 to 1868. He died in 1868. See Corwin, *Manual of the Ref. Church in America*, s. v.

Vanderveer, JOHN, D.D., a minister of the Reformed (Dutch) Church, was born in Hunterdon County, N. J., May 5, 1800. He graduated at the College of New Jersey in 1817, and at the New Brunswick Theological Seminary in 1822, when he was licensed as a minister. He was missionary to several towns in New York in 1823; pastor at Phillipsburg, Pa. (Presbyterian), from 1824 to 1827; and teacher at Easton from 1827 to 1834. He died in 1878. His school at Easton was famous for more than a quarter of a century, and his pupils carried with them pleasant memories of their intercourse with their teacher. See Corwin, *Manual of the Ref. Church in America*, s. v.

Vandervoort, JOHN C., a minister of the Reformed (Dutch) Church, was born at Bound Brook, N. J., in 1798. He graduated at Queen's College in 1818, and at the New Brunswick Theological Seminary in 1819, when he was licensed to preach. He preached at German Valley and Fox Hill, N. J. (Presbyterian), from 1819 to 1826; Basking Ridge (Presbyterian), from 1826 to 1834; First Church, Totowa, from 1834 to 1837; Kinderhook, N. Y., from 1837 to 1842; Mellenville, from 1842 to 1845; New Paltz, from 1845 to 1848; and Second Church, Ghent, from 1848 to 1851. He died June 21, 1851. His piety was fervent, and he contented not himself with merely illustrating historical truth, but carried his appeals directly to the hearts and consciences of his hearers. In most of his charges his labors were crowned with success in the salvation of souls. See Corwin, *Manual of the Ref. Church in America*, s. v.

Vandervoort, PAUL, a Methodist Episcopal minister, was born in Mongolia County, Va., June 19, 1828. He joined the Church in 1848, and entered the traveling connection in the Western Virginia Conference in 1855. He served the Church faithfully on seven different circuits, and died at Jollytown, Pa., Aug. 26, 1865. Mr. Vandervoort was courteous and upright in deportment, calm and firm in purpose, and practical and fervent in preaching. See *Minutes of Annual Conferences*, 1866, p. 47.

Vandewater, ALBERTUS, a Reformed (Dutch) and Presbyterian minister, was born near Brunswick, L. I., Sept. 21, 1821. He received his education preparatory to college at the school of Dr. J. J. Owen, in Orchard Street, New York city, and united, on profession of his faith, with the Seventh Presbyterian Church of New York city, when about nineteen years of age. He was graduated from the College of New Jersey in 1846, and entered the Princeton Theological Seminary in the same year. There he took a full three years' course of study, and was regularly graduated in 1849. Not long after he became stated supply to the Church at Athens, Bradford Co., Pa., where he was ordained as an evangelist by the Susquehanna Presbytery, Nov. 5, 1850, and where he continued to labor until 1854. He then accepted a call to the Reformed Dutch Church of Spotswood, Middlesex Co., N. J., where he was installed Nov. 1, 1854, and continued to labor very acceptably and usefully over thirteen years, until he was released by the Classis of Monmouth, Nov. 5, 1867. His next charge was the United Dutch Reformed churches of Blenheim and Brackabeen, N. Y., in the Classis of Schoharie, where he was installed Dec. 18, 1868, and was released March 1, 1869. After this he supplied for a short time the Reformed Dutch Church of Wolcott (now Fair Haven), N. Y., but soon accepted a call to the Reformed Dutch Church of Oakland (otherwise called Pands Church), in Bergen Co., N. J., where he was installed May 26, 1869, and released April 23, 1872. After this he resided about a year at Princeton, N. J., without special employment; then taught school for a short time at Yardville, Mercer Co., N. J., after which he taught school and preached as a missionary near Farmingdale, Monmouth Co. While laboring there, his efforts were blessed with a revival, in which about seventy souls were hopefully converted. He was then induced to remove to Missouri, where he became stated supply to the Church of Mine La Motte, in the Presbytery of Potosi, in the autumn of 1876. Here he was laboring faithfully and zealously when he was summoned away by death. This event occurred Feb. 28, 1879, at Mine La Motte, Madison Co., Mo. His death was a very calm and happy one, and full of triumphant faith in the Saviour. (W. P. S.)

Van Doren, ISAAC, a Reformed (Dutch) and Presbyterian minister, was born at Griggstown, N. J., in 1772. He was educated in the College of New Jersey, studied theology privately, was licensed by the Classis of New York, and ordained about 1798. In

1802 he settled in Hopewell, Orange Co., N. Y., where, during a pastorate of twenty-three years, he was blessed with eminent success; then removed to Newark, N. J., and for four years (1825-29) was principal of the Academy; he then, with his eldest son, established a collegiate institute on Brooklyn Heights (1829-34); from there he removed to Lexington, Ky., where he taught (1834-38); and became eminent as a teacher in other parts of the West. He died Aug. 12, 1861. He was the author of a tract entitled *A Summary of Christian Duty*, compiled from the Douay Bible. See Wilson, *Presb. Hist. Almanac*, 1865, p. 133; Corwin, *Manual of the Ref. Church in America*, s. v.

Van Doren, Luther Halsey, a Presbyterian and Reformed (Dutch) minister, was born at Hopewell, Orange Co., N. Y., in 1808. He graduated at the College of New Jersey in 1831, and began his preparation for the ministry under the Rt. Rev. R. B. Smith, D.D., LL.D., Protestant Episcopal bishop of Kentucky, but was subsequently licensed by the Presbyterian Church of Lexington, Ky., and ordained presbyter at Columbia, Mo., in 1834. He preached for the Presbyterian churches of St. Louis, Farmington, and Columbia, Mo.; Freehold, N. J.; Paducah, Ky.; Spring Street and Fiftieth Street, New York city; and New Vernon, N. J., from 1834 to 1871; then for the Reformed (Dutch) churches of Montville from 1871 to 1874, and Middletown from 1874 to 1876. He died in 1876. See Corwin, *Manual of the Ref. Church in America*, s. v.

Van Doren, William, a Presbyterian educator, was born at Griggstown, Somerset Co., N. J., March 14, 1814. He was prepared for college in the Academy at Princeton under the tuition of the Rev. Charles C. Sears, and was graduated from the College of New Jersey in 1835. He united with the First Presbyterian Church of Princeton, July 14, 1832. On leaving college, he taught in Florida about a year, and then entered Princeton Seminary in 1836, but, owing to a failure of health, remained only one year. He was never licensed or ordained, but devoted himself to the work of education. He was a professor in the college at Columbia, Mo., and afterwards in the Missouri State University from 1837 to 1843. Next he had charge of the high-school at Lexington for seven years, until 1850; then served as professor in Westminster College at Fulton for twelve years, until 1862. In the latter year he removed to California, where he taught successively at Napa City, Stockton, Visalia, and Watsonville, establishing an institution of learning in each of these towns. While teaching at Watsonville his sight failed him, and for two years preceding his death his health had been steadily declining. At Columbia, Mo., he was ordained ruling elder, and in this office had faithfully and very usefully served the churches in the towns where he subsequently resided. He died at Watsonville, Cal., Dec. 3, 1877. (W. P. S.)

Van Driessen, Johannes, a Reformed (Dutch) minister, was born in 1697, and educated in Belgium. After coming to this country he went to Yale College with a commendatory letter from the patroon Van Rensselaer, and was then licensed and ordained by the Congregationalists at New Haven. This was made the occasion of great opposition to him as a minister. His motive was to save the time, trouble, and cost of a journey to Holland to procure ordination. The Dutch clergy denounced him as a schismatic, the Amsterdam Classis warned the American churches against him, and his troubles multiplied and lasted long. This was the first example of "irregular ordination," as it was regarded, that occurred in the northern section of the Dutch Church, and it was the real opening of the great controversy between the Cetus and Conferentie parties, resulting in the triumph of the former, which was the American progressive and independent element. He was settled at Claverack, Kinderhook, and Livingston Manor from 1727 to 1735; at New Paltz from 1731 to 1735; at Acquackanonck and Pompton, N. J., from 1735

to 1748; and subsequently at Poughkeepsie, Fishkill, and New Paltz temporarily in 1751. He was at length involved in other troubles and silenced. See Corwin, *Manual of the Ref. Church in America*, s. v.; Still, *Hist. Discourse* at New Paltz; Zabriskie, *Claverack Centennial*. (W. J. R. T.)

Van Driessen, Petrus, a Reformed (Dutch) minister, brother of the preceding, was minister of the Reformed Dutch Church in Albany from 1712 to 1738. Until 1727 he also supplied Kinderhook. Mention is made of his services for some time at Kinderhook and Schenectady. During his ministry at Albany a new and handsome stone edifice was built, which stood ninety-one years on State Street. He organized the important churches of Kinderhook in 1712 and Claverack in 1716. Like his predecessors, Megapolensis, Dellius, and Lydius, he acted as a missionary to the Indians. In the documentary history of New York, among several petitions to governor Burnet and his councillors from this pastor, is one dated Sept. 13, 1722, respecting his labors among the Mohawks, asking protection and assistance for himself and his interpreter, in which the petitioner is described as "finding himself in Conscience thronged and moved to continue with them in the doctrine of the true knowledge of God, if yet at some Time the Lord might give them repentance as by means of the same ministracion thro' the blessing of the Most High has been done to Our forefathers." This is followed by a "Licence by his Excellency," to Mr. Van Driessen, "to Erect and build a meeting-house for the Indians in the Mohawk's country, in order to ye assembling of themselves together for ye Solemn Worship of God; and that upon any part of the Lands to them belonging as shall be found most Convenient for the purposes mentioned." The venerable pastor and missionary labored with zeal and fidelity among his people at Albany for a period of twenty-six years, until his death, which took place about Feb. 1, 1738. For five years previously he had a colleague, Rev. Cornelius Van Schie, who had labored at Poughkeepsie and Fishkill, 1731-38, when he removed to Albany. He survived his associate only six years, dying Aug. 15, 1744, at the age of forty-one. See Rogers, *Hist. Discourse*, p. 20-24; *Documentary Hist. of New York*, iii, 915, 916; Corwin, *Manual of the Ref. Church in America*. (W. J. R. T.)

Van Duzer, Joseph E. A., a minister in the Methodist Episcopal Church, South, was born in New York city, Sept. 14, 1852; was left motherless when an infant; received a fair academic education and a good commercial training; married in early manhood; received license to preach in 1873, and united with the Florida Conference, and was appointed to the Cuban work, where he worked faithfully and beyond his endurance until his death, by typho-malarial fever, June 7, 1875. Mr. Van Duzer was a man of great energy and remarkable consecration. See *Minutes of Annual Conferences of the M. E. Church, South*, 1875, p. 179.

Van Dyck, C. L., a minister of the Reformed (Dutch) Church, was born at Kinderhook, N. Y., in 1804. He graduated at Union College in 1826, and at New Brunswick Theological Seminary in 1829, when he was licensed to preach; became pastor at Marletown, N. Y., 1829-33; at North Esopus (Port Ewen), N. Y., 1836-66. He was converted at the early age of sixteen, and was a pious and consistent professor of Christianity from that time until his death, in 1866. See Corwin, *Manual of the Ref. Church in America*, s. v.

Van Dyck, Hamilton, a minister of the Reformed (Dutch) Church, was born in 1807. He graduated at Hamilton College in 1826, and at York Theological Seminary in 1829. He preached at Chambersburg, Pa., 1829-33; and at Prattsville, N. Y., 1833-36. His constitution having been broken down by severe study during his seminary course, he died in 1836. See Corwin, *Manual of the Ref. Church in America*, s. v.

Van Dyck, Leonard B., a Presbyterian minis-

ter, was educated for the ministry of the Reformed (Dutch) Church. He graduated at Union College in 1824, and at New Brunswick Theological Seminary in 1827. During the latter part of his seminary course a controversy was carried on between Princeton and Andover in regard to the doctrines of the *extent of the atonement*, the *eternal generation of the Son*, and the *procession of the Holy Ghost*. Young Van Dyck read what was said on both sides of this controversy, and was left in doubt as to the true doctrine. In consequence of his unsettled opinions on these great doctrines, he was advised to remain at the seminary until he should become settled, and was not recommended for licensure. Accordingly he returned to his house in Cossackie, N. Y., and was licensed by the presbytery of Columbia, N. Y., in 1827. He was called to the Church at Osbornville (Windham), Greene Co., N. Y., and labored there faithfully and successfully from 1828 until about 1870, when the loss of his voice compelled him to retire. He then returned to his native village, Cossackie, where he died, Oct. 23, 1877. See Corwin, *Manual of the Ref. Church in America*, s. v.

Vandyke (Flem. *Van Dyck*), **Sir Anthony**, a Flemish painter, was born in Antwerp, March 22, 1599. He was the most illustrious pupil of Rubens. He visited England; thence went to Venice, Genoa, and Rome; returned to Antwerp in 1627; settled in England in 1632, was knighted by Charles I in the same year, and granted a life pension of £200 in 1633. He excelled as a portrait-painter, and executed many "crucifixions," "pietas," and historical pieces. He died in London, Dec. 9, 1641. See Carpenter, *Memoir of Sir A. Van Dyck* (London, 1844).

Van Dyke, John P., a Presbyterian minister, was born in Adams County, Pa., Oct. 18, 1803; graduated at Miami University in 1826; studied theology privately; was licensed by Miami Presbytery in 1828; ordained by Chillicothe Presbytery as pastor of West Union Church, O., in June, 1829, which pastorate existed for twenty-three years; in 1852 became pastor of the Church at Red Oak; in 1854, of Frankfort Church, Ind., in Logansport Presbytery; in 1856, of Pleasant Ridge Church, O.; and died Aug. 13, 1862. He was an able divine; in presbyterial and synodical bodies he had few equals; his preaching was eminently doctrinal, but ardent and impressive. See Wilson, *Presb. Hist. Almanac*, 1863, p. 214.

Vane (written also **VANE**), a plate of metal turning on a vertical spindle so as to show the direction of the wind, frequently fixed on the tops of spires and pinnacles, and in other elevated positions: it is often in the form of a cock, and from this circumstance is very commonly called a *weathercock*. Vanes were in use in the times of the Saxons, and in after-ages were very extensively employed. They were sometimes perfectly plain, and sometimes cut into ornamental forms, which were not unfrequently heraldic devices. During the prevalence of the Perpendicular and Elizabethan styles, figures supporting vanes were often placed on the tops of pinnacles, and in other exposed situations: these were usually in the form of small flags, and were sometimes pierced with a representation of some armorial bearing. Occasionally the vane was shaped like an heraldic device. — Parker, *Gloss. of Architect.*, s. v.

Vane, Sir Henry, an English republican and religious zealot of the period of the Commonwealth, eldest son of a baronet of the same name, was born at Hadlow, in Kent, in 1612. He was educated at Westminster School, and entered as gentleman commoner Magdalen

College, Oxford, about 1628; but before matriculation renounced the Church of England and refused to take the oath of allegiance. He travelled in France, Holland, and Switzerland, and completed his education at Geneva, where he became confirmed in the republican principles which he had imbibed, and avowed the Puritan doctrines. The unpopularity of his opinions in England led him to seek a home in America, and he arrived in Massachusetts in 1635, where he was received with great satisfaction on account of his high reputation and social position, and elected governor of the colony in 1636. Having taken the part of Mrs. Hutchinson in a bitter religious controversy then existing, he lost much of his popularity, and failed of a re-election for governor the following year. He was then chosen a member of the general court, but returned to England in August, 1637. He now married a daughter of Sir Christopher Wray of Ashby, in Lincolnshire; was knighted, and entered upon a political career. Through his father's interest he was appointed joint treasurer of the navy with Sir William Russell, and entered Parliament for Kingston-upon-Hull in 1640, where he almost immediately joined Pym and the anti-court party, of which he became one of the most vehement and resolute leaders. He took an important part in the impeachment of Strafford and Laud; became sole treasurer of the navy in 1642; was a zealous supporter of Parliament in the Civil War, to which body he gave up the fees of his office; was a member of the Westminster Assembly; went, in June, 1643, to Scotland as one of the joint commissioners to negotiate an alliance, and was influential in securing the adoption of the Solemn League and Covenant; enabled Roger Williams to obtain the charter of Rhode Island in 1643; was one of the chief promoters of the Self-denying Ordinance in 1644; opposed the terms of settlement offered by Charles in 1648; became a member of the Council of State in February, 1649, in which position he remained until Cromwell's dissolution of Parliament in 1653. During this period he had the direction of the navy, and important powers in reference to the foreign wars then in progress. He also enjoyed the friendship of John Milton, who addressed one of his sonnets to him. After the dissolution of the Long Parliament, he retired to his estate of Raby Castle, where he wrote religious treatises and political pamphlets, one of which led to his imprisonment for four months in Carisbrooke Castle, by order of Cromwell, in 1656. He remained in opposition until the death of Cromwell, when he was again chosen to Parliament, and became the leader of the republican party, endeavoring to mould the commonwealth to his ideas of government. He was one of the twenty persons excepted from the Act of General Pardon and Oblivion, passed at the Restoration, and in July, 1660, was committed to the Tower. He was afterwards committed to other prisons, remaining two years in a castle in the Scilly Islands, occupied in theological studies and writing. On June 2, 1662, he was arraigned for high-treason before the Middlesex grand-jury; found guilty on the 6th, and, contrary to a promise made by Charles, was beheaded on Tower Hill, June 14, 1662. His theological writings were of a highly mystical type, and of very little value. He was a Millenarian, and believed or hoped that the Saviour would come and establish a fifth universal monarchy. These views gave rise to a small sect known as Vanists (q. v.). See Knight, *Life and Death of Sir Henry Vane* (Lond. 1662); Birch, *Lives*; Ludlow, *Memoirs*; Sparks, *American Biographies*, vol. iv.

Van Gaasbeek, LAURENTIUS, a minister of the Reformed (Dutch) Church, was born in Holland. He graduated from the University of Leyden, May 15, 1674; sailed from Amsterdam May 13, 1678, arriving in New York Aug. 21 of the same year. He reached Kingston Sept. 8, and preached his first sermon there one week later. He was pastor of the Church in Kingston from that time until February, 1680, the date of his death. See Corwin, *Manual of the Ref. Church in America*, s. v.

Stanton Harcourt,
Oxfordshire.

Van Harlingen, Johannes Martinus, a Reformed (Dutch) minister, was born near Millstone, N. J., in 1724, of Dutch parentage. He went to Holland to complete his studies in one of the universities, and to get ordination by the Classis of Amsterdam, which was secured in 1761. In 1762 he returned to America and took pastoral charge of the united churches of Neshanic and Sourland, in Somerset Co., N. J., where he ministered thirty-three years, and died in 1795, universally beloved and lamented. A sufficient proof of the esteem in which he was held is found in the fact that his name was, after his death, given to the village and church and district in which he had lived and labored so long, Sourland being changed to Harlingen. He preached only in the Dutch language until within a few years before his death, when, to gratify the younger people, he preached occasionally in English. He was evangelical, faithful, a patron of learning, one of the original trustees of Queen's College, and, in all that is known of him, one of the best of the old Dutch ministers of the last century. See Corwin, *Manual of the Ref. Church in America*, s. v.; Sprague, *Annals of the Amer. Pulpit*, vol. ix. (W. J. R. T.)

Van Harlingen, John M., a Reformed (Dutch) minister, nephew of the foregoing, was born at Sourland (now Harlingen), N. J., 1761; graduated from Queen's College in 1783; studied for the ministry with Dr. Livingston; was licensed by the Christian Synod of the Dutch Reformed Churches in 1786; and settled at Millstone and Six Mile Run, N. J., 1787-95. From this period he was without charge (1795-1812), probably on account of his inanimate pulpit delivery. He was a lover of books, and lived chiefly among them; a close student, learned in theology, instructive in conversation, but exceedingly retiring and reserved in manner, and very absent-minded. While he was without charge he preached frequently for neighboring ministers, but his chief work was a full translation of a celebrated Dutch work, *Van der Kemp on the Heidelberg Catechism* (a series of sermons, with a valuable historical introduction, in 2 vols. 8vo). Before the organization of the Theological Seminary at New Brunswick, he had instructed a number of young men at his residence in Hebrew and ecclesiastical history, with a view to the ministry. In June, 1812, he was called to the chair of Hebrew and ecclesiastical history in the new seminary, and accepted the appointment of the General Synod to the Hebrew professorship, and gave temporary lessons in history. In one year thereafter he died at Millstone, after a brief and severe illness, June 16, 1813. He was never married. His meditative spirit and devout piety, with his love of learning, and a sufficiency of this world's goods, enabled him to live much above the world, "using it as not abusing it," and devoting himself to his sacred studies. He preached both in Dutch and English, and was regarded, according to the standard of his time, as a proficient in Hebrew and a Christian scholar of eminent attainments. See Sprague, *Annals of the Amer. Pulpit*, vol. ix.; Corwin, *Manual of the Ref. Church in America*, s. v. (W. J. R. T.)

Van Helmont, Baron Francis Mercurius, a Dutch physician and religious enthusiast, was born in 1618; settled in England, as the family physician of lady Conway, at Ragley, and thus became the associate of Henry Moore (q. v.). He was the son of the well-known chemist Van Helmont, and gave himself to those occult medical studies which were a passion with his father. His works were noted for their eccentricities. He died in 1699. See Tullock, *Rational Theol. in England in the 17th Cent.* ii, 329.

Van Helmont, Serges Jacob, a Flemish painter, was born in Antwerp in 1683. He was the son of Matthew Van Helmont of Brussels, and was instructed in his art by his father; but while the father painted markets, fairs, shops, and similar scenes, the son distinguished himself for religious compositions in the great

style. He settled at Brussels, and was considered one of the best Flemish painters of his time, although, from weakness of constitution, he never left his own country. The *Triumph of Elijah over the Priests of Baal*, in the Church of the Carmelites; the *Martyrdom of St. Barbara*, in St. Mary Magdalen's; and the *Triumph of David*, in St. Michael's Church at Brussels, are considered his masterpieces. He died at Brussels, Aug. 21, 1726.

Van Hoeck, Jax, a Flemish painter, was born at Antwerp about 1600. He studied with Rubens, and afterwards at Rome. He was much employed by the emperor Ferdinand II of Italy, but eventually returned to his own country, where he died about 1650. He was an admirable painter in portrait and history. His most famous painting is the *Christ on the Cross*, in the Church of St. Sauveur at Bruges, said to be one of the finest pictures in Belgium.

Van Hook, Isaac A., a minister of the Reformed (Dutch) Church in America. He graduated at Columbia College in 1797, and at New Brunswick Theological Seminary in 1819, when he was licensed by the Classis of New Brunswick. He was missionary to Spotswood, N. J., 1819-21; to Stillwater, N. J., Beaver Dam, Middletown, Kleyn Esopus, and Tishoke, N. Y., in 1822; pastor at Fort Miller and Argyle, 1823-24; missionary to Wilton in 1825; and corresponding secretary of the Board of Missions in 1827. He died in 1834. See Corwin, *Manual of the Ref. Church in America*, s. v.

Van Horne, Abram, a minister of the Reformed (Dutch) Church, was born at Whitehouse, N. J., Dec. 31, 1763. He graduated at Queen's College in 1787; studied theology privately, and was licensed in 1788; and became pastor at Wawarsing, Marlbtown, and Rochester, N. Y., 1789-95; and at Caughnawaga, 1795-1833. He died June 3, 1840. In 1783 he was a commissary in the American army. See Corwin, *Manual of the Ref. Church in America*, s. v.

Van Hovenbergh, Eggo Tonkens, a Dutch minister of the Reformed Church. He was ordained at Amsterdam, April 1, 1743; and preached at Surinam, South America, 1743-49. On his way back from Surinam to Holland in 1749 he stopped at New York, where he would have received a call from the consistory but for the unsatisfactory position he took concerning the Church and ministry of New York. He preached at Livingston Manor and Claverack, N. Y., 1749-56; and at Rhinebeck Flats, 1756-64, when he was suspended, but continued to preach until 1767. See Corwin, *Manual of the Ref. Church in America*, s. v.

Van Husen, Stephen, a Baptist missionary among the Telogeos, was born at Catskill, N. Y., Dec. 5, 1812, and received his education at the Hamilton Literary and Theological Institution, now Madison University. He received his appointment Aug. 23, 1838. He did not reach the field of his labors, Nellore, until March 21, 1840. For several years he devoted himself with zeal to his work with but little apparent fruit, in a section of the Telogeos country which has recently been so wonderfully blessed. It was a time for seed-sowing; at last the great harvest has come. Mr. Van Husen's health broke down under his arduous and often discouraging labors, and he returned to his native country, Oct. 1, 1845. He died at Brattleborough, Vt., Dec. 13, 1854. (J. C. S.)

Van Huysen, Hermanus, an American minister of the Reformed (Dutch) Church. His early literary advantages were small, and he served during the Revolution as an officer in the American army. At the close of the war he sought to enter the ministry. He studied under the direction of Dr. J. H. Livingston, and was licensed by the Classis of Hackensack, N. J., in 1793. He preached at Helderberg, Salem, and Jerusalem, N. Y., 1794-1825. He died in 1833. See Corwin, *Manual of the Ref. Church in America*, s. v.

Vani'ah (Heb. *Vanyah*, *וַנִּיָּאֵה*, *Jah is praise* [Fürst]; Sept. *Ὀβωρία* v. r. *Ὀβωρία* and *Ὀβὲχῶα*, Vulg. *Va-*

nia), an Israelite of "the sons of Bani," who divorced his Gentile wife married after the return from Babylon (Ezra x, 36). B.C. 458.

Vanière, JACQUES, a celebrated French Jesuit and modern Latin poet, was born at Causses, in the diocese of Béziers, Languedoc, March 9, 1664. He was educated at the Jesuits' college in Béziers, and joined the society in 1680. He was afterwards professor and rector of the Jesuit schools in Montpellier, Toulouse, and Auch. He died at Toulouse, Aug. 22, 1739. His chief works are, a volume of poetical *Opuscula*:—a *Dictionary of Poetry*, in Latin:—and a Latin poem entitled *Pædium Rusticum*. For others, see Hoefler, *Nouv. Biog. Générale*, s. v.

Vanini, LUCILIO, an Italian philosopher born at Taurisano, near Naples, in 1584. He studied philosophy, theology, and natural science at Rome and Padua, and took holy orders. His mind was perverted by reading Aristotle, Averroes, Cardan, and Pomponazzi. He travelled and preached his infidel doctrines in Germany, England, Holland, Switzerland, and France. In 1617 he left Paris, opened a school at Toulouse, and infused his impious notions into the minds of his scholars, on account of which he was accused of atheism, sentenced to death, and burned at the stake on the day the sentence was given, Feb. 19, 1619. He published, *Amphitheatrum Aeternæ Providentiæ* (Lyons, 1615);—*De Admirandis Naturæ Regniæ Decque Mortalium Arcanis* (Paris, 1516). See Durand, *La Vie et les Sentiments de L. Vanini* (Rotterdam, 1717); Rousselot, *Œuvres Philosophiques de Vanini* (Paris, 1841); Hoefler, *Nouv. Biog. Générale*, s. v.

Van Irhoven, WILLEM, D.D., an eminent Dutch divine, was born at Kessel, in North Brabant, Nov. 2, 1698. He received his early education at 's Hertogenbosch, first in the Latin schools, and subsequently at the Athenæum of that place. He then repaired to Leyden, where the eminent professors P. Burman, J. Heymann, and W. Seugerd were his instructors in the ancient and Oriental languages and in philosophy. He also applied himself successfully to the study of chemistry under the celebrated Boerhaave. He devoted special attention to philosophy, in which he attained great proficiency. In 1720 he defended an essay *De Intellectu Facultate vere Activa*. The year following he prepared another philosophical essay in Latin, upon which he was promoted to *artium liberalium magister et philosophiæ doctor*. It was his purpose, however, to devote himself to the work of the Gospel ministry. He attended the theological lectures of T. H. Van den Honert, F. Fabricius, J. Marek, and J. Wesselius. In 1722 he was called to Ede, near Arnhem. While discharging his ministerial duties with ardor and fidelity, he zealously prosecuted his studies. He spent a part of each year in Leyden to avail himself of the university library. In 1728 appeared his *Conjectanea Philologica-critico-theologica in Psalmorum Titulos*. This work added to his reputation. The next year he published a practical work in Dutch on the *Assured Christian*, which passed through several editions. In 1737 he accepted a professorship of theology in the University of Utrecht. This position he held for twenty-three years, with credit to himself and with great benefit to his pupils. In 1740 the additional duty was laid upon him of giving instruction in Church history. During his professorate he published but little. He died Nov. 18, 1760, deeply lamented at Utrecht, as also in the world of letters. See Glasius, *Godgeleerd Nederland*, ii, 193; also Burmanni *Oratio Funeb.* in *Obitum Gulielmi Irhovii* (Traj. ad Rh. 1760). (J. P. W.)

Vanists is a name given by Baxter to the Antinomians (q. v.) of New England on account of the favor shown them by Sir Henry Vane (q. v.), who was then governor of the colony of Massachusetts.

Vanity (as a rendering of several Heb. words, *ματαιότης*) occurs in Scripture only in the Latin sense of *emptiness*, and is often applied to this world, as unsat-

isfactory (Eccles. i, 2); to lying (Psa. iv, 2); to idols (Deut. xxxii, 21); to whatever disappoints our hopes (Psa. ix, 11). In ordinary language the term is applied to the man who wishes you to think more highly of him than what he really deserves. Hence the vain man flatters in order to be flattered: is always fond of praise; endeavors to bribe others into a good opinion of himself by his complaisance, and sometimes even by good offices, though often displayed with unnecessary ostentation. See PRIDE.

Van Keuren, BENJAMIN, a Reformed (Dutch) minister, graduated at New Brunswick Theological Seminary in 1824, and was licensed the same year. He became missionary to Charleston, Mapleton, and Westerloo, N. Y., 1824; Esopus, N. Y., 1825-26; Esopus, Hurley, and Bloomingdale, N. Y., 1826-34; Esopus and Bloomingdale, 1834-36; Warwick, N. Y., 1836-37; preached for the Presbyterian Church, 1837-56; and died in 1865. See Corwin, *Manual of the Ref. Church in America*, s. v.

Van Kleek, RICHARD D., a Reformed (Dutch) minister, graduated at Union College in 1822, and at New Brunswick Theological Seminary in 1825, when he was licensed by the Classis of New Brunswick. He preached at Rintan, N. J., 1826-31; taught at Basking Ridge (N. J.) Academy, 1831-34; preached at Canajoharie, N. Y., 1834-35; at Berne and Beaver Dams, N. Y., 1835-43; taught at Erasmus Hall, Flushing, L. I., 1843-60; in the grammar-school, Jersey City, N. J., 1860-70; and died in 1870. See Corwin, *Manual of the Ref. Church in America*, s. v.

Van Liew, John, D.D., a minister of the Reformed (Dutch) Church, was born near Neshauc, N. J., Sept. 30, 1798. He graduated at Queen's College in 1816, and at New Brunswick Theological Seminary in 1820, when he was licensed by the Classis of New Brunswick; preached for the Presbyterian Church at Meadville, Pa., 1820-23; Presbyterian Church, Mendham, N. J., 1824-25; Reformed (Dutch) Church, Readington, N. J., 1826-69. He died Oct. 18, 1869. During his ministry of forty-nine years, about six hundred persons united with the Church. See Corwin, *Manual of the Ref. Church in America*, s. v.

Van Liew, John Cannon, at first a minister of the Reformed Protestant Dutch Church, and afterwards of the Presbyterian Church, was born in Middlebush, Middlesex Co., N. J. After pursuing his classical studies, he studied theology at the Theological Seminary, New Brunswick, in the class of 1827; was licensed and called to the churches of Catskill, Leeds, and Kiskatom, in the Classis of Greene, in 1828, as colleague to his uncle, the Rev. Dr. Wyckoff; in 1829 took sole charge of Leeds and Kiskatom; in 1832 accepted a call to Spotswood, N. J., where he opened a classical school, and conducted it successfully for several years (1834-41); was subsequently rector of the Rutgers College Grammar-school; pastor at Piffard, Livingston Co., N. Y. (1845-49); principal of the "Temple Hill" Academy at Genesee, Livingston Co.; pastor at Groveland, N. Y.; Stone Arabia and Ephratah, Montgomery Co., N. Y.; Berne and Beaver Dams (1856-61); and finally located in New Jersey, where he died in 1861. Mr. Van Liew was a "man of decided mental ability, an able advocate in ecclesiastical trials and controversy, a critical linguist, and an excellent preacher." See Wilson, *Presb. Hist. Almanac*, 1862, p. 300; Corwin, *Manual of the Ref. Church in America*, s. v.

Vanloo, Charles André, called the *Caroliere Carlo Vanloo*, a French painter, was born at Nice in 1705. He was first instructed by his brother Jean Baptiste, whom he accompanied to Rome and studied under Luti; visited Paris in 1723, where he gained the first prize for historical composition; went again to Italy in 1727, where he studied the works of the masters more thoroughly, and took the prize in design at the Academy of St. Luke; went to the court of Turin, where he painted many pictures; returned to Paris in 1734; was

admitted to the Academy in 1735; and was knighted by Louis XV in 1752, and granted a liberal pension for life. He died in 1765. His principal works are, *The Apotheosis of St. Isidore*, in Rome;—*St. Francis*, and *St. Martha*, in the same city;—a series of subjects from the *Jerusalem* of Tasso, in the royal palace, Turin;—*The Marriage of the Virgin*, in the Gallery of the Louvre. He did important service in reforming the affected and gaudy style then prevalent in the French school. His countrymen are extravagant in his praises; but he may justly be compared with the best of the modern Italian painters. See Spooner, *Biog. Hist. of the Fine Arts*, s. v.

Vanloo, Jean Baptiste, a French painter, was born at Aix in 1684. He was instructed by his father, and went to Toulon, where he executed several works for the churches; but the siege of that place in 1707 compelled him to return to Aix, where he labored for five years for small compensation. He afterwards went to Rome under the protection of the prince of Carignan, where he studied the great masters. Acquiring considerable reputation, he executed, among other works, *The Scourging of Christ*, in the Church of S. Maria in Monticelli. He next went to Turin, where he distinguished himself by paintings in oil and fresco, and acquired considerable wealth. He then went to Paris; lost his fortune in the Mississippi scheme; was chosen a member of the Academy; also professor in 1735; went to London in 1737; and returned to Aix in 1742, where he died in 1746. His best works at Paris are, *The Entry of Christ into Jerusalem*, in the Church of St. Martin des Champs;—and *St. Peter Delivered from Prison*, in the Church of St. Germain des Prés. See Spooner, *Biog. Hist. of the Fine Arts*, s. v.

Van Meter, Henry L., a Baptist minister and missionary to Burmah, was born in Philadelphia, Pa., Sept. 21, 1824, and was a graduate of the University of Pennsylvania and of the Hamilton Literary and Theological Institute. He was appointed by the American Baptist Missionary Union as a missionary to Basscin, Burmah, and was ordained Sept. 28, 1848. He proceeded, immediately after his ordination, to the East, where, for about twenty-two years, with but little intermission, he devoted himself to his sacred work. His health failing, he returned to his native country. He had been at home but a few weeks when he died, at Mottville, near Skauneteles Lake, N. Y., Aug. 16, 1870. (J. C. S.)

Van Mildert, William, D.D., a bishop in the Church of England, was born in London in 1765. He studied some years at the Merchant Taylors' School, and then entered Queen's College, Oxford. Having taken his degree, been ordained in 1788, and served some time as curate, and afterwards as incumbent of the living of Bradden, Northamptonshire (1795), he was in 1796 presented to the rectory of St. Mary-le-Bow, Cheapside, London. He also, in process of time, obtained the vicarage of Farmingham, Kent. In 1812 he was elected preacher of Lincoln's Inn; in 1813 was appointed regius professor of divinity in Oxford; in 1820 was consecrated bishop of Llandaff; and in 1826 was transferred to Durham. He died Feb. 21, 1836. Bishop Van Mildert was distinguished for his theological writings, embracing his *Boyle Lectures* (1802-5);—his *Bampton Lectures* (1814);—his edition of the writings of Dr. Waterland;—and his *Sermons* preached at Lincoln's Inn. He was eminently generous. See *Church of England Magazine*, i, 21; Alibone, *Dict. of Brit. and Amer. Auth.*, s. v.

Vannel, an old English term for a fanon or *napkin*, sometimes worn round the neck instead of the amice (q. v.); also used for the amice itself.

Vannes, Council of (*Concilium Veneticum*). Vannes is a seaport town of France, capital of the department of Morbihan, on the south coast of Brittany, sixty-one miles north-west of Nantes. A council was held there in 465 by St. Perpetuus, the first archbishop of Tours, who presided over five other bishops. Paternus

was in this council consecrated to the see of Vannes, and sixteen canons were published (many of which are the same with those of Tours) A.D. 461. The following are peculiar to this council:

2. Excommunicates those who marry again after having divorced their first wives, unless it was on account of adultery.

7. Forbids monks to retire into solitary cells, except they be men of tried virtue, and upon condition that they keep within the precincts of the abbey and under the abbot's jurisdiction.

8. Forbids abbots to hold many monasteries or cells.

11. Prohibits priests, deacons, and subdeacons, who are forbidden to marry, from attending marriage festivals, feasts, and assemblies at which love songs, etc., are sung, and immodest conversations held.

12. Forbids all clerks to attend Jewish festivals.

13. Excommunicates for thirty days ecclesiastics guilty of the sin of drunkenness, and enjoins even corporal punishment.

14. Excommunicates for seven days clerks who, living in the city, absent themselves from matins.

15. Orders that the same manner of celebrating divine service shall be observed throughout the province of Lyons.

16. Excommunicates those of the clergy who meddle in divinations, and superstitiously pretend to foretell the future by chance readings of Holy Scripture.

These regulations are addressed to Victorius, bishop of Maur, and Thalassius of Angers, who were unable to attend the council. See Mansi, *Concil.* iv, 1054.—Landon, *Manual of Councils*, p. 673.

Van Nest, Abraham, an eminent Christian merchant and philanthropist of New York, was born near Somerville, N. J., May 8, 1777. At twelve years of age he left his father's house and farm to dwell with his brother in New York, where his subsequent long life was spent. Carefully nurtured by his believing parents, and converted at an early age, he united in the communion of the Collegiate Church, of which he was a member nearly sixty years, and for about half a century an active officer. By constant re-election he was almost a permanent member of the Consistory and of the General Synod and other ecclesiastical assemblies of the Reformed Church, in which his commanding influence was always quietly exerted. He was greatly prospered in business, and accumulated a large property, without a stain upon his good name, and he used it as a faithful steward of the kingdom of God. He was noted for abounding liberality and for efficient services in many benevolent institutions. But his chief sphere of usefulness was in the Church, as a wise counsellor and willing servant. He was president of the Board of Corporation for many years. As a trustee of Rutgers College, from 1823 until his decease, he did much to revive, sustain, and enlarge that institution; and his name is perpetuated in one of its edifices, *Van Nest Hall*, erected in 1842 by the efforts of the alumni, and devoted to the Museum of Natural History, Chemistry, Geology, and the Literary Societies. He did more than any other layman of that day to endow the Theological Seminary at New Brunswick by his personal labors with Drs. Ludlow, Schoonmaker, and Jacob R. Hardenbergh, as well as by his gifts. For thirty years he was honorably identified with the politics and government of New York city;—acting with the Democratic party, and always maintaining his Christian integrity amid those testing scenes of public life. Mr. Van Nest was of small stature, with a benevolent and thoughtful countenance and entirely unobtrusive manner. His will was strong; he possessed great executive ability, prudence, knowledge of human nature, and kindness of heart. His piety was intelligent, scriptural, and uniformly earnest and outspoken. He was a man of prayer, "full of faith and of the Holy Ghost." His home was the abode of a princely hospitality, and up to the time of his death one of the few remaining landmarks of the wealth and liberality of a generation that has passed away. Afflictions and age mellowed his Christian character during the later and quiet years of his once busy life; and he "came to his grave in a full age, like as a shock of corn

cometh in its season." He died Sept. 14, 1864. See *A Memorial for his Family* (1864). (W. J. R. T.)

Van Nest, Peter, a Methodist Episcopal minister, was born in Bethlehem township, Huntingdon Co., N. J., Aug. 5, 1759. In 1771 he went to reside in Philadelphia, Pa. Shortly after his settlement in that city he was powerfully awakened to a sense of sin; it was not, however, until 1788 that he was led to see himself as he really was. Being in Bristol, England, he went to hear Thomas Warwick, a Wesleyan preacher, whose discourses were so pungent, and seemed so personal to him, that his conscience was profoundly awakened. He at once joined the Methodist Church, and acquired the friendship of John Wesley. Henry Moore, the biographer of Wesley, commissioned him as a local preacher in 1794. In 1796 he returned to America, and was received on trial in the Philadelphia Conference the same year, and appointed to Salem Circuit, in New Jersey, but did not travel it. The next year (1797) he was again received, and sent to Middletown Circuit, Conn. His subsequent appointments were as follows: in 1798, to Croton Circuit, where he spent three months, and was then sent to Middletown again; in 1799, to Whitingham, to form a new circuit; in 1800, to Fletcher (formerly Essex); in 1801, to New London; in 1802, to Bay Quinta, Upper Canada; in 1803, to Niagara; in 1804, to Burlington, N. J.; in 1805, to Elizabethtown Circuit; in 1806, to Somerset, Md.; in 1807, to Holland Purchase as missionary; from 1808 to 1809, to Cayuga District; in 1810, to Gloucester Circuit, N. J.; from 1810 to 1814, to East Jersey District; in 1815, to Salem Circuit; in 1816, to Freehold; in 1817, to Bergen; in 1818, to Gloucester; from 1819 to 1820, as supernumerary; and in 1821, taking a superannuated relation, he resided in Pemberton, N. J., until his death, Oct. 17, 1850. Mr. Van Nest was revered as a veteran throughout the Church. In all his appointments he did brave service, and his labors in New England, Canada, Western New York, and New Jersey were instrumental in the rescue of hundreds of souls. From the time that he ceased to be effective until his death—a period of about thirty-one years—he had his home at Pemberton, N. J., where he was eminently useful and highly respected and venerated. He watched over the Church in that place with exemplary fidelity to the last. When he was in his ninety-second year, he was often seen, with staff in hand, going about from house to house, and inquiring with great interest in respect to both the temporal and spiritual welfare of the inmates. His death was not only peaceful, but triumphant. See *Minutes of Annual Conferences*, iv, 568; Sprague, *Annals of the American Pulpit*, vii, 276; Stevens, *Hist. of the M. E. Church*, iii, 433; iv, 17, 63, 267. (J. L. S.)

Van Nest, Rynier, a Reformed (Dutch) minister, was born near North Branch, N. J., Feb. 8, 1739. He studied privately, and was licensed in 1773. He was pastor at Shawangunk and New Paltz, N. Y., from 1774 to 1778; married Catharine (Hagar), widow of Rev. J. M. Goetschius, of Schoharie, Feb. 24, 1776; was pastor at Shawangunk and Montgomery from 1778 to 1785; supplied Middleburgh from 1774 to 1780; Schoharie from 1780 to 1785; was pastor at Jamaica, Newtown, Oyster Bay, and Success, L. I., from 1785 to 1797, and at Schoharie from 1797 to 1803. He died at Readington, N. J., July 9, 1813. See Corwin, *Manual of the Ref. Church in America*, s. v.

Vanni, Cavalier Francesco, an eminent Italian painter, was born at Sienna probably in 1565. He received some instruction from his father and afterwards from his stepfather, when, at the age of twelve, he went to Bologna and studied under Passarotti. When about sixteen he went to Rome, and became the pupil of Giovanni de' Vecchi, where he chose for his model the works of Federigo Boroccio. On leaving Rome, he travelled through Lombardy, and on returning to Sienna executed several works for the churches and con-

vents. He was then invited to return to Rome, where he was commissioned by Clement VIII. to paint the picture of *St. Peter Rebuking Simon Magus*. This work still remains on a marble slab in St. Peter's, Rome, and is an object of admiration. His labors so pleased the pope that he made him a knight of the Order of Christ. His principal works at Rome are, *St. Michael Vanquishing the Rebel Angels*, in the Church of San Gregorio;—a *Pietà*, in the Church of Santa Maria in Valicella;—and *The Assumption*, in the Church of San Lorenzo in Miranda. But his best works are to be found at Sienna, among which are the *Marriage of St. Catherine*;—the *Madonna*;—and *St. Raymond Walking on the Sea*. He also executed a few correct and spirited etchings from his own designs, which are highly esteemed. He died at Sienna in 1610. See Spooner, *Biog. Hist. of the Fine Arts*, s. v.

Vanni, Cavalier Michael Angelo, an Italian painter of the 17th century, was the eldest son of the cavalier Francesco Vanni, by whom he was instructed in the art. His fame rests chiefly, however, upon his invention of a new process of staining marble in imitation of mosaic. There are some of his paintings in the churches and convents of Sienna, but they are much inferior to the best productions of his father. See Spooner, *Biog. Hist. of the Fine Arts*, s. v.

Vanni, Cavalier Raffaele, an Italian painter, second son of Francesco Vanni, was born at Sienna in 1596. He studied with his father, who died when Raffaele was fourteen years of age. He afterwards studied at Rome, where he made such progress as to rival his father. Among his finest works are the *Birth of the Virgin*, at Rome;—the *Martyrdom of St. Catherine*, at Pisa;—and the *Procession of our Saviour to Calvary*, at Sienna. He was elected a member of the Academy of St. Luke in 1655, and was honored with knighthood. See Spooner, *Biog. Hist. of the Fine Arts*, s. v.

Van Niewenhuysen, WILHELMUS, a minister of the Reformed (Dutch) Church, was born and educated in Holland, and called thence, in 1671, to the Collegiate Church in New York. He removed to Breuckelen (Brooklyn) in 1676, but continued to officiate frequently in New York. He was a relative and predecessor of the celebrated Rev. Henry Selyns. When governor Andros forced Nicholas Van Ranslaer upon the Church at Albany as colleague to Gideon Schaats, in 1675, Van Niewenhuysen was sent from New York to assist the aged pastor in resisting the usurpation of the civil power. His ministry in New York was peaceful and prosperous; and there is good evidence in his correspondence with the Classis of Amsterdam, and in his controversy with Andros for the prerogatives of the Church, that he was a learned, able, faithful, and judicious minister of the Gospel. Little more is known of him. He died in 1682. He was of the Coccian school in exegesis. See Murphy, *Anthology of New Netherlands*, p. 179; *Documentary History of New York*, iii, 872-875; Corwin, *Manual of the Ref. Church in America*, s. v. (W. J. R. T.)

Van Nostrand, Aaron, a Protestant Episcopal clergyman, died at Painesville, O., of camp fever, Feb. 27, 1863, aged thirty-two years. He was chaplain of the 105th Regiment of Ohio Volunteers, and at the time of his death was rector of St. James's Church in Painesville, which position he had held for nearly three years. Previous to this he had been rector of St. John's Church, Clyde, N. Y., for a period of five years. See *American Quar. Church Rev.* April, 1863, p. 152.

Van Nostrand, Albert, a Methodist Episcopal minister, was born on Long Island, N. Y., about 1758. He joined the Methodist society in 1785, at Serington, and soon afterwards began preaching, which he continued, with the approval of the Church, until his death, at White Plains, N. Y., in the latter part of September, 1796. See *Minutes of Annual Conferences*, 1797, p. 73; Bangs, *Hist. of the M. E. Church*, ii, 62.

Vannuys, James Harvey, a Presbyterian minister, was born in Franklin, Ind., Dec. 18, 1831. He was educated in Hanover College; graduated at the Theological Seminary, Princeton, N. J., in 1861; was licensed by the Donegal Presbytery, and went West; and was ordained by the Rock River Presbytery in 1863 as pastor of the Church at Andover, Ill. He subsequently preached at Wilton Station and Sugar Creek, Ia. He died Nov. 25, 1866. He was a warm-hearted Christian, and an earnest and very acceptable preacher. See Wilson, *Presb. Hist. Almanac*, 1867, p. 213.

Van Olinda, Douw, a Reformed (Dutch) minister, was born at Charleston, N. Y., in 1800. He graduated at the New Brunswick Theological Seminary in 1824, and was licensed to preach. He was missionary to Johnstown, Mayfield, and Union, N. Y., in 1825; Palatine from 1825 to 1827; Mapletown, Spraker's Basin, and Canajoharie from 1827 to 1831; New Paltz from 1832 to 1844; and Caughnawaga from 1844 to 1858. He died in 1858. He was large of stature, commanding in appearance, an edifying and instructive preacher, and of great executive ability. See Corwin, *Manual of the Ref. Church in America*, s. v.; Wilson, *Presb. Hist. Almanac*, 1860, p. 204.

Van Pelt, Peter L., D.D., a Reformed (Dutch) minister, was born at Bushwick, L. I., May 27, 1778. He graduated at Columbia College in 1799, and studied theology under Dr. J. H. Livingston. He received license to preach in 1801, and began his ministry on Staten Island in 1802, where he continued until 1835; was pastor at Fordham, N. Y., from 1836 to 1847; also chaplain in the war from 1812 to 1814. He died in New York, Jan. 20, 1861. He published a few sermons and orations delivered on important public occasions. See Corwin, *Manual of the Ref. Church in America*, s. v.

Van Raalte, Albertus C., D.D., a Reformed (Dutch) minister, was born at Waarneperveen, Overysseel, Holland, Oct. 17, 1811. He graduated at the University of Leyden in 1831, and at the Leyden Theological Seminary in 1834; was examined in the Provincial Synod of the Hague in May, 1835; ordained for general service in Amsterdam in the General Synod of the Separated or Free Reformed Church of the Netherlands, March 4, 1836; was missionary to Genemuiden, then to Ommer (Overysseel), from 1836 to 1844; to Arnheim (Guelderland) from 1844 to 1846, when he came to America; pastor at Holland, Mich., from 1851 to 1867; missionary for the emigration field, Amelia Court-house, Va., from 1869 to 1870; and president of the council of Hope College from 1870 to 1874. He died Nov. 7, 1876. See Corwin, *Manual of the Ref. Church in America*, s. v.

Van Ranslaer (or Renslaer), Nicholas, was ordained as a deacon by Dr. Earle, bishop of Sarum, and as a presbyter by the bishop of Salisbury; was chaplain to the ambassador of the States-General at London; minister of the Dutch Church at Westminster; and lecturer at St. Margaret's, Loathbury, London. He came to America in 1675, with letters of recommendation from the duke of York to governor Andros, with a view to a living in one of the Dutch churches of the colony; and also laid claim to the manor of Rensselaerwyck. The governor assigned him to the Dutch Church in Albany, against the protests of their minister, Gideon Schaats, and the people. They denied both the validity of his ordination, which was not a tenable objection, and the right of the English governor to intrude him upon an unwilling Church and congregation. A bitter contest and trial at law followed. Dominie Van Nieuwenhuysen, of New York, was sent to aid in the controversy. Van Ranslaer, however, continued to officiate for about one year. For a short time he was imprisoned for utterances in his pulpit, for which Jacob Leisler (afterwards governor) and Jacob Milborne brought charges against him. This litigation ended in the defeat of his opposers, and in the reconciliation of Schaats and Van Ranslaer. The latter died soon after, and thus

ended the disturbances of Church and State produced by his coming. He was suspected as a papist in disguise. His widow, *née* Alida Schuyler, afterwards became the wife of Robert Livingston. See *Documentary Hist. N. Y.*, p. 872-879. Corwin, *Manual of the Ref. Church in America*, s. v. (W. J. R. T.)

Van Rensselaer, Cortlandt, D.D., an eminent Presbyterian divine, son of general Stephen Van Rensselaer, was born in Albany, N. Y., May 25, 1808. He graduated at Yale College in 1827, and was admitted to the bar in 1830; but studied theology in the Princeton Theological Seminary, N. J., and was licensed to preach in 1831, and ordained in 1835 by West Hanover Presbytery, Va. He organized the First Presbyterian Church in Burlington, N. J., and was installed its pastor by Philadelphia Second Presbytery in 1837. He became corresponding secretary of the Board of Education of the Presbyterian Church from 1846 until his death, July 24, 1860. Dr. Van Rensselaer established in 1818 *The Presbyterian Treasury*, a quarto publication, issued monthly. This journal was quite popular, but owing to the earnest solicitation of other parties, at the end of two years it gave place to the *Home and Foreign Record*, edited by all the secretaries of the Boards of the Church. He, however, issued, in January, 1851, the first annual volume, entitled *The Home, School, and Church*, a thick octavo pamphlet. In 1851 he also issued the first number of *The Presbyterian Magazine*; and it was thus that, by means of all these, the mind of the Church became enlightened upon the subject of education. After his death appeared a selection from his published writings, under the title of *Miscellaneous Sermons, Essays, and Addresses*, edited by his son, C. Van Rensselaer (Phila. 1861, 8vo). "They bear the impress of his vigorous intellect, and illustrate his various reading, his manly independence, his genuine patriotism, and his unswerving devotion to the cause and kingdom of the Redeemer." His critical reviews were discriminating, searching, and free from partiality, eminently readable, and wholly trustworthy. See Wilson, *Presb. Hist. Almanac*, 1861, p. 107; Allibone, *Dict. of Brit. and Amer. Authors*, s. v.; *North Amer. Rev.* July, 1861, p. 286; *Memoirs of S. Grellet* (Phila. 1860), ii, 486, note; *Elect. Mag. of For. Lit.* Dec. 1860. (J. L. S.)

Van Rensselaer, Hon. Stephen, a distinguished statesman and general in the War of 1812-15, patroon of the manor of Rensselaerwyck, and an eminent Christian, was born in New York city Nov. 1, 1764, and graduated at Harvard University in 1782. In 1789 he was elected a member of the Legislature, and in 1795, at the age of thirty-one, was lieutenant-governor and president of the Senate of his native state. He held this office six years. From 1800 to 1820 he was often a member of the Assembly, and also sat in two Constitutional conventions. He was elected to Congress in 1822; was president of the Board of Canal Commissioners fourteen years before his death; and was chancellor of the Board of Regents of the University of New York at his decease. In 1787 he began his military career, and was a major-general of Volunteers, commanding on the Niagara frontier, during the War of 1812-15 with Great Britain. He was honorably engaged in the battle of Queenstown. Yale College conferred on him the degree of doctor of laws in 1825. He was one of the first Board of Managers of the American Bible Society in 1816, and was always foremost with its illustrious founders and friends. In the affairs of the Reformed Church, of which he was "a burning and a shining light," he held many positions of great prominence and usefulness. With perhaps one exception, he was the most wealthy man in the United States, and he dispensed his money with a munificence that was worthy of his ancient patrimony, which embraced a territory of twenty-four miles square, having Albany as its centre. From this inheritance he was called the *patroon*, a title now extinct by law with "the death of his eldest son, and for gener-

ations past the only hereditary title known among us." His private influence was immense. He so administered his vast estates as to win the confidence of the tenants and of the whole community in his guileless wisdom and unsullied and unselfish integrity. His charities were continually flowing out with discriminating kindness and bountiful benevolence, yet silent and unostentatious. As an elder in the Church at Albany, and a member of the ecclesiastical courts of his denomination, he bore his full share of labors, responsibility, and liberality. But he was not a sectarian; he belonged to the city of God. The manor-house at Albany was noted for his princely hospitality and Christian influences. "The guest who crossed that threshold forgot that he was a stranger; and, though poor, amid all the appliances of uncounted wealth, felt only that he was at home." His piety was radiant with goodness and with the beauty of a holy life. He died suddenly, at home, Jan. 26, 1839. "In the midst of his affectionate children and near his devoted wife, within the hall where the servant of God and the friend of man ever found an unfeigned welcome, his venerable head fell upon his bosom. He was asleep in Jesus." His portrait, admirably taken in old age, adorns the hall of the Board of Managers of the American Bible Society. His memory is an inspiration for the lovers of the country and the Church of God. See Bethune, *Commemorative Sermon*; Rogers, *Historical Discourse*. (W. J. R. T.)

Van Santvoord, CORNELIUS, a Reformed (Dutch) minister, was born in Holland in 1697, and studied in the University of Leyden under the celebrated Prof. John Marek, author of the *Medulla Theologicæ*. He emigrated to America in 1718. He was first settled on Staten Island, over the Dutch and French Huguenot churches, to which he preached in both languages from 1718 to 1742; also for two years (1730 to 1732) at Belleville, N. J. In 1742 he removed to Schenectady, N. Y.; and, after a ministry of ten years, died in 1752. His descendants in the fourth and fifth generations are still represented in the ministerial ranks of their ancient denomination. He was the intimate friend of Mr. Frelinghuysen of Raritan, and was his advocate and defender in all his trials. In his behalf he published a small volume, *A Dialogue between Considerans and Candidus*. He was a favorite pupil of his revered preceptor John Marek, and translated his *Commentary on the Book of Revelation*, accompanied by a learned dissertation of his own, advocating a literal interpretation of the Epistles to the Seven Churches of Asia. It was published in Holland, with the high commendation of Prof. Wesselius. He was paralyzed some time before his decease, but continued to preach until he was called to his everlasting rest. See Brownlee, *Hist. Disc. on Staten Island*; Taylor, *Annals of Classis of Bergen*; Sprague, *Annals of the Amer. Pulpit*, vol. ix.; Corwin, *Manual of the Ref. Church in America*, s. v. (W. J. R. T.)

Van Schie, CORNELIUS, a Reformed (Dutch) minister, was born in 1703; preached at Poughkeepsie and Fishkill, N. Y., 1731 to 1738; Albany, 1738 to 1744; suppld Claverack, 1732 to 1743; and died Aug. 15, 1744. See Corwin, *Manual of the Ref. Church in America*, s. v.

Van Schoick, JONAS, a Methodist Episcopal minister, was born in Monmouth County, N. J., in 1787. He was converted in November, 1808; admitted on trial at the Philadelphia Conference in 1810; and served at the following appointments: Ashbury Circuit, 1810; Dauphin, 1811; Morris, 1812; Trenton, 1813 and 1814; and Burlington in 1815, where he died in 1816. Mr. Van Schoick was exemplary in life and conversation, and was an acceptable and a successful preacher. See *Minutes of Annual Conferences*, 1817, p. 293.

Van Sinderin, ULPANUS, a Reformed (Dutch) minister, was born in Holland, and emigrated to America, being called in the place of Vincentius Antouides, in

1746, to preach at Brooklyn, Flatlands, Bushwick, New Utrecht, Flatbush, and Gravesend, where he ministered until 1784, and then resigned. In the beginning of this pastorate he incurred the displeasure of Johannes Arondeus, a former pastor and troublesome spirit, by officiating at a marriage shortly after his arrival. The quarrel occasioned considerable trouble, but was afterwards forgotten. He died Oct. 1, 1803. See Corwin, *Manual of the Ref. Church in America*, s. v.

Van Stavoren, ABRAHAM, a Presbyterian minister, was born in Delaware in 1828; graduated at Illinois College, Jacksonville, Ill., in 1851; studied theology in Lane Seminary, near Cincinnati, O.; was licensed by Cincinnati Presbytery in 1855; and ordained by Schuyler Presbytery as pastor of the Presbyterian Church in Warsaw, Ill., in 1857. Here he labored about a year, when he accepted a call to the Church at Montrose, Ia., where he labored earnestly and faithfully until his death, April 22, 1860. "A good writer, and an earnest and useful preacher." See Wilson, *Presb. Hist. Almanac*, 1862, p. 198.

Vansyckle, REUBEN, a Methodist Episcopal minister, was born in November, 1822. He was converted in his seventeenth year, began exhorting immediately, and in 1843 united with the New Jersey Conference and was appointed to Newton Circuit. He was sent in 1841 to New Prospect; in 1845, to Stanhope; in 1846, to Barryville; and in 1847 and 1848, to Sandyston. Mr. Vansyckle superannuated in 1849; in 1862 was made chaplain of the United States Hospital at Fortress Monroe, Va.; in 1863 was again put on the effective list, and thus continued until his retirement, in 1865, to Sparta, where he died, March 4, 1867. Mr. Vansyckle was sincere, original, interesting, zealous, and successful. See *Minutes of Annual Conferences*, 1867, p. 39.

Van Til, SOLOMON, a learned Dutch theologian, was born Dec. 26, 1644, at Weesp, near Amsterdam, of a family originally from the duchy of Cleves. He studied at Alkmaar and the University of Utrecht; but an impediment in his speech induced him to change from theology to medicine. Under the advice of Burman, however, he resumed the study of theology at Leyden (1664), where he made the acquaintance of Cocceius, and adopted the views of that theologian. In 1666 he became pastor of a village in North Holland, and for ten years devoted himself to Oriental languages, metaphysics, and theology. In 1682 he was called to Dort as pastor, and in 1684 he added to his duties those of the chair of history and sacred philology. In August, 1702, he exchanged this position for that of professor of theology at Leyden. He was long afflicted with gout, and died at Leyden, Oct. 31, 1713. Van Til was of an affable disposition, and formed a large literary and social circle of acquaintances. He wrote much in a peculiar and somewhat harsh style, chiefly on scriptural interpretation, including comments on the Psalms, Malachi, and St. Paul's Epistles. See Hoefer, *Nour. Biog. Générale*, s. v. "Til."

Van Valkenburgh, DANIEL, a Presbyterian minister, was born at Manheim, Herkimer Co., N. Y., Jan. 8, 1805; went to school at Hartwick Academy, Otsego Co., N. Y.; graduated at Union College, N. Y.; studied theology in Auburn Theological Seminary; was licensed by the Cayuga Presbytery, Jan. 21, 1827, and ordained by the Oneida Presbytery, July 13, 1831. His ministry of thirty-six years was devoted to labors in the churches at Evans's Mills, Richfield Springs, Mexico, Taberg, Exeter, and Springfield—all in New York. He died Nov. 24, 1864. As a theologian he was thoroughly read, systematic, and able; as a preacher he was faithful, direct, and clear. See Wilson, *Presb. Hist. Almanac*, 1866, p. 230.

Van Vechten, JACOB, D.D., a distinguished minister of the Reformed (Dutch) Church, was born at Catskill, N. Y., in 1788. He graduated at Union College in 1809; at the Associate Reformed Theological Seminary

in 1813, and at New Brunswick Theological Seminary in 1814, when he was licensed by the Classis of New Brunswick. He was pastor at Schenectady, N. Y., from 1815 to 1849, when he removed to Albany, and employed his time in preaching in the city and surrounding country, and in literary work. In 1868 he removed to Auburn, where he spent the remainder of his days among his children. He died Sept. 15, 1871. He published *Memoirs of John M. Mason, D.D., S.T.P., with Portions of his Correspondence* (1856). See Corwin, *Manual of the Ref. Church in America*, s. v.

Van Veen. See VENIUS.

Van Viane (or Vian), Francis, a Flemish theologian, was born at Brussels, Oct. 3, 1615. He studied at the papal college of Louvain; was made director of the seminary at Mechlin, minister at Brussels, and president of his alma mater at Louvain; but at length resigned the last-named office. In 1677 he went to Rome on a theological errand. He died at Louvain, Sept. 5, 1693. See *Biographie Universelle*, s. v.

Van Viane, Matthew, brother of the preceding, also a theologian, a laborious private student, died at Louvain in the papal college, Nov. 16, 1663, aged forty years.

Vanvitelli, Luigi, an Italian architect, was born at Naples in 1700. He first studied painting, but afterwards gave himself to architecture. He designed several churches in Urbino, and many other religious edifices in Rome and Naples. His principal buildings are the Augustinian convent at Rome, and the palace of Caserta, near Naples. He died in Naples, March 1, 1773. See Vanvitelli, *Vita di Luigi Vanvitelli* (Naples, 1823).

Van Vleck, John, a Reformed (Dutch) minister, was born at Shawangunk, N. Y., in 1828; graduated at Rutgers College in 1852, and at the Theological Seminary in New Brunswick, N. J., in 1855. Immediately he became principal of Holland Academy, which in 1866 was incorporated as "Hope College." It is located at Holland, Mich., and was begun as a parochial and civil school at a very early period in the large colony of Hollanders which settled on Black Lake in 1847-48, under the leadership of the Rev. A. C. Van Raalte, D.D. As a missionary of the Reformed Church, Mr. Van Vleck was the first to preach in English in the colony, and thus laid the foundation of the flourishing Second Reformed Church in that city. In 1859 he became principal of the Academy at Kingston, N. Y.; and in 1862 assumed the pastoral charge of the churches of Middleport and Wawarsing, in Orange Co. He died March 15, 1865, of consumption, which had been long preying upon his constitution. He was amiable, greatly beloved, thoroughly trusted, conscientious, spiritually minded, a true scholar, and a Christian of exemplary character and high attainments in the divine life. He was a superior classical scholar and teacher. In the sacred languages, especially in Hebrew, he was not only a hard student, but an accomplished exegetical writer and instructor. He prepared a valuable critical work on *Gethsemane*, and another was far advanced upon the *Song of Solomon* at the time of his death. But he did not live to complete them for publication. See Corwin, *Manual of the Ref. Church in America*, s. v. (W. J. R. T.)

Van Vleck, Paulus, a Reformed (Dutch) minister, whose relation to that body was somewhat irregular. The first account we have of him, he was a schoolmaster and preceptor at Kinderhook, N. Y., in 1792, and preaching occasionally, from which, on complaint, he was made to desist. He was ordained by Bernardus Freeman in 1799 as chaplain of the Dutch troops then proceeding to Canada. He was pastor of the Low Dutch Church at Neshaminy, Bucks Co., Pa., 1710-12. He was accused of bigamy in 1712, and left the country in 1715. See Corwin, *Manual of the Ref. Church in America*, s. v.

Van Vlierden, Peter, a Dutch minister of the

Reformed Church, was born about 1737, and educated at the University of Leyden. He was the last minister who came from Holland to America until the immigration in 1818. He came, however, by way of the West Indies, where he had been settled for a time at St. Croix, leaving there in 1792. He preached at Caatsban, N. Y., 1794-1804, when he was suspended, but restored again in July of the same year. He died Feb. 21, 1821. See Corwin, *Manual of the Ref. Church in America*, s. v.; Sprague, *Annals of the Amer. Pulpit*, ii, 20.

Van Voorhis, Stephen, an American minister of the Reformed (Dutch) Church. He was graduated from the College of New Jersey in 1765, and licensed by the General Meeting of ministers and elders in 1772; was pastor at Poughkeepsie, N. Y., 1773-76; supply at Dover, N. J., 1774; pastor at Rhinebeck Flats, N. Y., 1776-81; Philipsburgh, Tarrytown, and Cortlandville, 1785-88; Kingston and Assumpink, N. J. (Presbyterian), 1788-96. He died Nov. 23, 1796. See Corwin, *Manual of the Ref. Church in America*, s. v.

Van Vranken, Nicholas, a distinguished clergyman of the Reformed (Dutch) Church, was born in 1762 at Schenectady; pursued his studies for the ministry with Dr. Theodorice Romeyn and Dr. John H. Livingston; and was licensed to preach in 1790 by the Synod of the Reformed Dutch Churches. Before entering upon pastoral work, he was principal of the Academy in Schenectady, which was the germ of Union College. After six years of successful teaching in this flourishing institution, he became the pastor of the Dutch churches of Fishkill, Hopewell, and New Hackensack, in Dutchess Co., N. Y. Here he spent his whole ministry (1791-1804), refusing all invitations to settle elsewhere, and "serving his generation by the will of God" until he was suddenly called from his labors to his reward, May 20, 1804. His people were waiting his appearance in church as usual on a Sabbath morning when tidings came of his death, of a rapid and violent inflammatory disease. His reputation is that of a learned, eloquent, fervid, evangelical preacher, whose labors were blessed with large additions to his churches, and with the constantly growing affection of his devoted people. His literary and theological attainments were of a high order. As a pastor he knew his people thoroughly, and adapted himself to their spiritual wants with native tact and spiritual advantage. On communion occasions, after the old Dutch custom, he gave the bread personally to each communicant, and addressed them one by one, in Dutch or English, as he chose, with comforting words of Holy Scripture, or some pointed sentence fitted to each case. He was full of genuine humor, but maintained his dignity, while giving gentle play to his fund of anecdote and mirthful wit. He excelled in conversational talent. His manners were engaging, his personal appearance very fine and prepossessing, and his social qualities endeared him to all who knew him well. See Kip, *Historical Discourse*; Corwin, *Manual of the Ref. Church in America*, s. v. (W. J. R. T.)

Van Vranken, Samuel A., D.D., an eminent Reformed (Dutch) minister, son of the foregoing, was born at Fishkill, N. Y., Feb. 20, 1792. At the age of twelve he was sent to New York as a merchant's clerk, but, having become pious, he decided to prepare for the ministry. Graduating from Union College in 1815, he then studied theology at the Seminary in New Brunswick under Dr. Livingston, and was licensed to preach in 1817. He first settled in Monmouth County, N. J., at Middletown and Freehold, 1818-26; and in Freehold alone from 1826 to 1834. His ministry of seventeen years in that county was eminently successful, and resulted in friendships and blessings that have long survived his pastorate. In 1834 he accepted a call to the Reformed Church in Poughkeepsie, and labored with great usefulness until 1837, when he succeeded Dr. Jacob Brodhead as pastor of the Church in Broome Street, New York. After four years of service in that important

metropolitan charge, he was elected in 1841, by the General Synod, to the chair of didactic and polemic theology in the Theological Seminary at New Brunswick. He was also chosen by the trustees of Rutgers College professor of the evidences of the Christian religion and of logic in that institution. Both of these offices he held until his decease, in 1861—a period of nearly twenty years. He published, during his ministry in New York, two valuable discussions. One is a sermon entitled *Socialism Subversive of Christianity*; a compact, learned, eloquent, and popular presentation of the scriptural argument for the deity of Jesus Christ (1841). The other is entitled *Whose Children are Entitled to Baptism?* In it he gives an exhaustive view of the different sides of this vexed question, and advocates with great ingenuity and power his own doctrine that all the children of parents who are themselves baptized are born in covenant relations, and are therefore, *ipso facto*, entitled to baptism. This work occasioned a prolonged and able discussion between the Rev. Dr. Jacob Van Vechten and the author, which was published in the *Christian Intelligencer*. He was not fond of appearing in print, although his occasional newspaper articles, and the little works above referred to, gave good proofs of an ability which might have been profitably cultivated. His general scholarship was good. He possessed a great fund of information upon almost all subjects of the day, and especially in their religious and theological aspects. Of the classics he knew less than of other branches of learning. He was familiar with the philosophical works of the best metaphysicians. In theology he was “a master in Israel.” His lectures for the seminary classes were written and rewritten three times with the utmost care. Of these he read two each week, the students taking copious notes and reciting from them at a third lecture. Definitions and proof-texts from Scripture and the *classis argumentorum* were required to be given with rigid accuracy. Failure here was total failure. Some few pupils, not the most industrious and able, complained of this exacting demand; but the results were seen at the annual examinations before the board of superintendents, and for licensure and ordination, in the clear, precise, systematic, analytical knowledge, and in the ready scriptural proofs and theological training of the twenty or more classes that were educated by him in this department. His drill was thorough in its processes and admirable in its results. As a preacher he was pre-eminent. His majestic body, his animated features, his deep and large bass voice, his solemnity of manner, his power of argument, his knowledge of the Bible and of human nature, his close dealings with conscience; his pathetic, fearful, and awe-inspiring appeals; his Christian experience, chastened and enlarged by heavy afflictions; and, above all, his manifest conviction of the truth that he spake with all the earnestness of his nature and the “unction of the Holy One”—all these, combined with fulness of matter, terseness of expression, richness of style, and an individuality that marked the whole man, made him a prince of preachers, and, in many respects, a model to his students. As a pastor, also, he was as truly a son of consolation as in the pulpit he was a Boanerges. His exuberant flow of spirits, his genuine native wit, his powers of amusement and of playful mirth, never lowered his dignity, but made his lecture-room a frequent scene of pleasure, and irradiated his home with uncommon attractions. There was no professor so accessible, so genial and at home with his students. Yet no one ever dared to step over the bounds of strict propriety in his presence. His rebukes were often tremendous, but uttered in few words and seldom needed. In private life he was full of sunshine, generous, unsuspicious, frank, never a croaker, always hopeful, a most entertaining talker, and an example of the Christian gentleman. His piety was unaffected, simple, childlike, trustful, sympathetic, and practical. He never boasted of his religion, but was modest and often reticent on the subject in private in-

tercourse. He was a good representative of Bunyan's Great-heart. Among the afflicted, in the prayer-meeting, at the sacramental table, and in his pulpit, his heart was ever full of Christ. He was no partisan in ecclesiastical affairs, yet necessarily took a leading part in most of the great questions of his public ministry in the Reformed Church. He was an effective advocate, a formidable antagonist, and yet so fair and free of mere diletish prejudices that his opinions carried great weight, and his action was generally approved by its consequences. He died, Jan. 1, 1861, after an illness of only one week, from congestion of the lungs. His faith triumphed in death. See Corwin, *Manual of the Ref. Church in America*, s. v.; Wilson, *Presb. Hist. Almanac*, 1862, p. 299; *Christian Intelligencer*, Jan. 24, 1861. (W. J. R. T.)

Van Wagenen, John Hardenbergh, a clergyman of the Reformed (Dutch) Church, was born at Rochester, Ulster Co., N. Y., in 1802, and graduated at Union College in 1823, and at New Brunswick Theological Seminary in 1826. After several settlements in Albany, Schenectady, and Columbia counties, he finally accepted the pastoral care of the First Reformed Church of Kingston in 1841, where he labored until his decease in 1844. He had the true spirit of an evangelist. His pulpit talents were fine, especially in extemporaneous address and on extraordinary occasions. His reading was extensive, his mind active, his zeal untiring. Powerful revivals attended his faithful ministry. During the last three years of his life at Kingston, he received one hundred and sixty-three into the fellowship of the Church. He published but one sermon, a powerful plea for the support of the ministry. See Corwin, *Manual of the Ref. Church in America*, s. v. (W. J. R. T.)

Van Wagenen, Jonathan, a preacher of the Baptist denomination, was born at New Paltz, Ulster Co., N. Y. On his father's side he was of Dutch descent, and on his mother's he was of Huguenot stock. His father was a highly respected citizen. Jonathan Dubois, his grandfather, was county judge and a member of the convention that framed for the state of New York the constitution of 1846. The subject of this sketch was fitted for college under the tuition of Eliphaz Fay, and when Mr. Fay came to Waterville to assume the presidency of the college, he came with him. During his college course, he developed decided literary tastes, and held a high rank as an accomplished writer. He was graduated in the class of 1845. For one year, 1845-46, he was assistant teacher in the Vermont Literary and Scientific Institute at Brandon. Subsequently he taught at Macon and Columbus, Miss., and for a time preached to a Baptist Church in Shiloh, Miss. He never received ordination. In consequence of ill-health he gave up preaching and teaching, and devoted himself to secular pursuits. His death occurred at Smithland, Ky., in March, 1852. See *Obituary Record of Colby University*, p. 43. (J. C. S.)

Van Wagenen, William A., a clergyman of the Protestant Episcopal Church, died in New York city, July 25, 1866. At the time of his death he was assistant minister of the Church of the Holy Trinity, New York city, having been ordained deacon in 1855. He was a graduate from Princeton Theological Seminary, and came from a Reformed (Dutch) family. See *Amer. Quar. Church Rev.*, Oct. 1866, p. 487.

Van Winkle, B. D., a Methodist Episcopal minister, was born in Shelby County, Ill., Feb. 1, 1832. He united with the Church in early life, joined the Southern Illinois Conference in 1858, and labored acceptably until 1861, when he took a local relation, and, entering the army, served four years as lieutenant in the Seventy-third Illinois Volunteers. In 1868 he was readmitted into his conference, labored in its active ranks until 1877, when he became supernumerary, and in this relation labored diligently until his death, Feb. 2, 1878. Mr. Van Winkle led a truly conscientious, earnest, un-

compromising Christian life. See *Minutes of Annual Conferences*, 1878, p. 53.

Van Zandt, PETER, a minister of the Reformed (Dutch) Church, graduated at New Brunswick Theological Seminary in 1817, and was licensed by the Classis of New Brunswick; was pastor at Schenectady, N. Y., 1818-22; and missionary to Oakhill, N. Y., 1823. He died in 1865. See Corwin, *Manual of the Ref. Church in America*, s. v.

Van Zuuren, CASPARUS, a Dutch minister of the Reformed Church who came to America; was pastor at Flatbush, New Utrecht, Brooklyn, and Flatlands, L. I., 1677-85; and preached occasionally at Bushwick, Gravesend, Bergen, and Staten Island. He returned to Holland May 17, 1685, and preached at Gonderach, 1685-1704, or longer. In 1695 his old congregations on Long Island recalled him, but he did not accept. See Corwin, *Manual of the Ref. Church in America*, s. v.

Vara, in Norse mythology, was the goddess of truth, who presided over witnesses and oaths.

Varaggio, GIACOMO DA (French, *Jacques de Varagine*), an Italian hagiographer, was born about 1230 at Varaggio or Varazze, near Savona. He became a Dominican in 1254, and taught in various schools with great reputation for piety and science. In 1267 he was chosen provincial of his order for Lombardy, and in 1268 definitor, in which capacity he raised the interdict from Genoa and reconciled the Sicilians to the king of Naples. In 1288 he assisted at the Council of Lucca, and in 1290 at that of Ferrara. In 1292 he was raised to the archbishopric of Genoa, an office which he administered with great moderation and yet discipline. He died there, July 14, 1298, leaving many historical and legendary works, for which see Hoefer, *Nouv. Biog. Générale*, s. v.

Vārāha, the third avatar, or incarnation of Vishnu, in which he appears as a boar. It is supposed to have taken place at the period of creation when the earth was immersed in water, and Vishnu, in order to raise it up, assumed the form of a gigantic boar. In the earlier recension of the *Rāmāyana* (q. v.) and the *Linga-Purāna*, the act of assuming the form of a boar in order to rescue the earth from its imperilled position is ascribed to Brahma, the creator of the universe; and in the *Black Yajurveda*, where this idea is first met with, it is likewise said that the lord of creation upheld the earth, assuming the form of a boar. At a later period, however, the incarnation is attributed to Vishnu. Between both conceptions there is the great difference, however, that in the former the transformation of the deity into a boar has apparently a purely cosmical character, while in the latter it allegorically represents the extrication of the world from a deluge of iniquity by the rites of religion. The boar as an incarnation of Vishnu is a type of the ritual of the Vedas. He is described as the sacrifice personified; his feet being the Vedas; his tusks, the sacrificial post to which the victim is tied; his teeth, the sacrificial offerings; his mouth, the altar; his tongue, the fire; his hairs, the sacrificial grass; his eyes, day and night; his head, the place of Brahma; his mane, the hymns of the Vedas; his nostrils, all the oblations; his snout, the ladle of oblation; his voice, the chanting of the *Sāmaveda*; his body, the hall of sacrifice; his joints, the different ceremonies; and his ears as having the properties of voluntary and obligatory rites. The above are from the *Vishnu-Purāna*, and similar descriptions occur in the *Harivansa* and elsewhere.

In the *Bhagavata-Purāna*, another legend is also connected with this avatar, which still more distinctly proves that it was viewed in a purely religious light at the Puranic period. According to this legend, Jayu and Vijayu, two doorkeepers of Vishnu, once offended some Munis who claimed admission to the paradise of Vishnu, and in consequence were doomed to lose their position in Vishnu's heaven, and to be reborn on earth.

They thus became the sons of Kasyapa and Diti, under the names of Hiranyakasipu and Hiranyaksha. The latter went straight to heaven to conquer the gods, while the former remained and conquered the three worlds. The gods, thus threatened in their existence as well as dominions, implored the assistance of Vishnu, who was at that time the mysterious boar, and he slew Hiranyaksha. A similar contest between Vishnu as boar and numerous demons, progeny of Diti, always ending in the defeat of the latter, is also described in one of the later portions of the *Mahabharata*; and it follows from this and similar descriptions that this avatar had lost its original character and assumed that common to the others—of representing the deity as become incarnate—for the purpose of remedying moral or religious wrong, or of destroying influences hostile to the Brahminic caste.

Another legend, doubtless a late one, which is chiefly believed by the Siva (q. v.) religionists of Southern India, is by no means so flattering to Vishnu. In that version of the legend Brahma tries to reach the head of Siva, while Vishnu assumes the form of a boar and digs down into the earth in order to arrive at the feet of the god. But Siva is illimitable, and Brahma descends and tries to make believe that he has accomplished the feat he attempted, but is exposed and cursed by Siva. Vishnu ascends from his fruitless effort with his tusks utterly worn out.

Varānēs was the name of six Persian kings of the dynasty of the Sassanidae. Varanes V, or Bahram Gour (the wild ass), reigned A.D. 420-440. The persecutions against the Christians were carried by him to such an extent that thousands of his subjects took refuge in the Roman dominions.

Vardeman, JEREMIAN, a Baptist minister, was born in Wythe County, Va., July 8, 1775. His early education was limited. He was ordained in 1801, and soon found himself called to the supply of four churches in Kentucky, where he had removed some years before. In 1810 he became pastor of David's Fork Church, Fayette Co., and in 1830 removed to Missouri, where he was the means of establishing several churches. He took an active part in bringing the Baptist denomination in Missouri into harmonious co-operation in benevolent efforts, and in August, 1834, he presided in a convention to organize a system of domestic missions in that State. In 1840 his health began to fail, but he still continued to preach, sitting when he could not stand, until his death, May 28, 1842. See Sprague, *Annals of the American Pulpit*, vi, 417.

Varen, AUGUST, a Protestant theologian of Germany, was born Sept. 20, 1620, at Uelzen, and died as doctor and professor of theology at Rostock, March 15, 1684. He wrote, *Lectio Academica de Targumim Onkelosi, Jonathanis, et eo quod Erstat in Hagiographis* (Rost. 1644):—*Disputatio de Targumim* (ibid. eod.):—*Exegesis Aug. Confess.* (ibid. eod.):—*Disputatio de Messia* (ibid. 1667):—*Examen Decem Characterum Messie contra Abarbanelum* (ibid. eod.). See First, *Bibl. Jud.*, iii, 468; Winer, *Handb. der theol. Lit.*, i, 339. (B. P.)

Vargas, ALFONSO, a Spanish Augustinian eremite, was a doctor of Paris, bishop of Badajoz, and archbishop of Seville, where he died, 1359. He published, *Commentary on the First Book of the Sentences* (Venice, 1490):—*Questiones in Aristotelis Libros Tres de Anima* (ibid. 1566). See Mosheim, *Hist. of the Church*, bk. iii, cent. xiv, pt. ii, ch. ii.

Vargas, Luis de, a Spanish painter, was born at Seville in 1502. He studied painting in Italy for nearly thirty years, after which he established himself in his native city and executed numerous large oil-paintings and frescos for the churches, only vestiges of which remain. Among his admired works are, *Adam and Eve*:—*Jesus Bearing his Cross*:—and *La Generacion*:—all of which remain at Seville. He hastened his death by his ascetic tortures, being accustomed.

among other similar practices, to sleep in a coffin. He died at Seville in 1568.

Variation, RIGHT OF (*Jus Variandi*), in canon law, is the right of a lay patron, during an established period, to suggest for confirmation by the proper ecclesiastical authority the diversion of a benefice already presented to a different candidate. Clerical patrons do not possess this right. Its exercise is entirely voluntary with the patron, though where the original presentation was made to a person afterwards found to be ineligible or unwilling or unable to receive it, a *new* presentation must take place of necessity. When a patron suggests a second person for presentation for reasons which do not affect the original receiver's eligibility, the question arises whether the spiritual superior is obliged to disregard the latter's claim for institution (*private variation*), or whether he may select the person who seems to himself the more available candidate (*cumulative variation*). Upon this question diverse views are given by the authorities; but the law of *cumulative variation* would seem to have the greatest support in law. Everything in connection with the dispute depends on the interpretation of cap. 24, x. *De Jure Patronatus*, the rescript of which, by pope Lucius III, is as follows: "Quum autem advocatus clericum idoneum episcopo presentaverit, et postulaverit postmodum, *eo non refutato*, alium, æque idoneum, in ecclesiam admitti, quis eorum alteri preferatur, iudicio episcopi credimus relinquendum, si laicus fuerit, cui jus competit presentandi. Verum si collegium vel ecclesiastica persona presentationem haberet, qui prior est tempore jure potior esse videtur." The disagreement occurs on the interpretation of the italicized words; some understanding them as having reference to the patron's action, and others applying them to the bishop's part in the matter. The right of a patron to recommend a second person for the presentation, when the person previously recommended was a *clericus idoneus*, is expressly conceded by the pope, though he gives the bishop the right to determine between them. The extent to which the right of variation may be exercised has also been discussed, but without result. See Lippert and Weiss, *Archiv d. Kirchenrechtswissenschaft*, i, 4; Richter, *Kirchenrecht* (5th ed.), § 193; Lippert, *Versuch einer hist.-dogmat. Entzicklung d. Lehre vom Patronate* (Giessen, 1829); Schilling, *Der Kirchh. Patronat* (Leips. 1854), and the literature there referred to; Gerlach, *Das Präsentationsrecht auf Pfarren* (Ratisbon, 1855); Moy de Sons, *Archiv für kath. Kirchenrecht*, 1857, ii, 412 sq.—Herzog, *Real-Encyklop.*, s. v.

Varick, RUDOLPHUS VOX, a clergyman of the Reformed (Dutch) Church, was settled upon Long Island, in what is now Kings County, over the churches of Brooklyn, Flatlands, Bushwick, Flatbush, New Utrecht, and Gravesend, 1685-94. With dominies Selyns, Delius, and Dailé, he stood firm against the high-handed proceedings of the usurping governor, Jacob Leisler, and was obliged to flee to New Castle, Del. Upon his return, in 1719, he was charged with treasonable designs to rescue the fort from Leisler, and was dragged by armed men from his house, and imprisoned in the fort six months. He was also fined eighty pounds by a pretended judge, Lanoy; sentenced to prison till the fine be paid, and to be deposed from the ministry. His friend Selyns was refused as his bail, and threatened with imprisonment. The fine was not paid, and he was released, but died of his ill-treatment in August, 1694, and the persecuting Leisler was deposed and executed. See *Documentary History of New York*, ii, 431, 432; *Letter of Gentlemen of New York* (1698); Corwin, *Manual of the Ref. Church in America*, s. v. (W. J. R. T.)

Varillas, ANTOINE, a French historiographer, who was born in 1624, and died in Paris, June 9, 1696, is the author of *Hist. des Révolutions Arrivées en Europe en Matière de Religion* (Paris, 1686-89, 6 vols.):—*Histoire*

du Wicklisme, ou de la Doctrine de Wiclef, J. Hus, et Jérôme de Prague, avec celle des Guerres de Bohême qui en ont été les Suites (Lyons, 1682):—*Nouvelles Accusations contre Varillas, ou Remarques Critiques contre une Partie de son Livre de l'Histoire de l'Hérésie* (Amsterd. 1687). See Winer, *Handbuch der theol. Literatur*, ii, 637, 734, 738. (B. P.)

Various Readings OF THE NEW TESTAMENT. By various readings (commonly abbreviated *v. r.* for the singular, and for the plural *vv. rr.*) are meant the differences observed in different manuscript copies of the Holy Scriptures. Those found in the Hebrew manuscripts of the Old Test. will be considered below.

The writings of the New Test. were copied by hand, from the age of the apostles to the date of the first printing of the New Test., a period of about thirteen centuries. During that time copies were greatly multiplied. With the utmost care, there would of necessity be occasional mistakes in copying. The errors of one manuscript might be repeated in the copy made from it, and others added, and thus the number be continually increasing.

The liability to mistake was greatly increased by the mode of writing in the oldest manuscripts. What is called "current hand," in which a long word may be written without taking the pen from the paper, was not used. Each letter, of the size and general shape of our capitals, was made separately by itself, many with more than one separate stroke of the pen. There was no division of words. All were written continuously in an unbroken line, as may be seen in the specimens given in vol. i, p. 155, and vol. ii, p. 389 of this *Cyclopædia*. As the eye could not readily distinguish words and clauses so run together, the scribe would naturally copy each letter by itself from its place in the line, often confounding letters similar in form. In these characters, termed uncial, all extant manuscripts dating prior to about the 10th century were written, and hence they are called uncial manuscripts. See MANUSCRIPTS OF THE GREEK TESTAMENT; also UNCIALS.

Far more numerous are the *cursive manuscripts*, so called, written in current hand from about the 10th century and onward (see vol. v, p. 727, and specimens 2, 3, and 4 on p. 728). Their value depends on the evidence that they are trustworthy copies of ancient manuscripts now lost, and contain readings of the true text of which these are now the only manuscript witnesses. On such evidence some of them are held in high estimation by all the leading authorities in textual criticism. That these are of great value in deciding where ancient manuscripts disagree, and also where their united testimony may for just reasons be discredited, is held by a highly influential class of critics, of whom Frederick H. Scrivener is the leading representative (see his *Plain Introduction to the Criticism of the New Test.* [2d ed. 1874]).

For the history of the text, and its variations in manuscripts prior to the oldest now extant, see the art. NEW TESTAMENT; for the theoretic classification of various readings in extant MSS., see the art. RECENSIONS. It is proper to add here that the earliest of those variations, however minute, are preserved in the primary documents that still remain, showing that the sacred text has suffered no important change that cannot now be detected (Westcott).

1. *Origin and Nature.*—Various readings have arisen from many different causes. These have been ascertained by careful comparison of manuscripts. They are mostly such as might be inferred from the nature of the case; and observation has shown that all variations in manuscripts may be referred to one or other of these causes, the knowledge of which often aids in determining what is the true reading. (The materials for the following summary are derived in part from Westcott's articles "New Testament," § 30-40, and "Language of the New Testament," p. 214, § 1-4, in Smith, *Dict. of the Bible* [Amer. ed.]; Scrivener, *Introd. to Text. Crit. of New Test.*; Tregelles, *Introd. to Text. Crit. of New Test.*, in vol. iv of Horne's *Introduction*.)

1. *Accidental* variations, or errata, from various causes. (1.) Merely clerical errors, or slips of the pen; words omitted or repeated, misspelled or partially written. This is a numerous class, rarely of any importance, to which copyists of long documents are always liable. The peculiar reading "how strait" (Matt. vii, 14) may have arisen, as Scrivener suggests, from the omission of the large initial O, reserved for subsequent revision.

(2.) Errors of sound, arising from different ways of representing the same sound. Such are the changes in the oldest MSS. between ϵ and $\epsilon\iota$, $\alpha\iota$ and ϵ ; and in the later between $\eta\iota$ and $\epsilon\iota$, $\omicron\iota$ and υ , $\omicron$ and ω , η and ϵ . The interchange of $\alpha\iota$ and ϵ (pronounced alike) is continual; $\epsilon\sigma\tau\alpha\iota$ and $\epsilon\sigma\tau\epsilon$, $\epsilon\chi\epsilon\tau\alpha\iota$ and $\epsilon\chi\epsilon\tau\epsilon$, and the like, being used indiscriminately. The vowels $\omicron$ and ω are thus interchanged Rom. v, 1, $\epsilon\chi\omicron\mu\epsilon\iota$, "we have," and $\epsilon\chi\omega\mu\epsilon\iota$, "let us have." The latter has the weight of MS. authority, and, with some constraint, yields a pertinent sense (see Tischendorf, *Nor. Test.* [8th ed.]), though the former seems required by the connection. More doubtful is Rom. vi, 15, where $\epsilon\mu\alpha\rho\tau\eta\sigma\omicron\mu\epsilon\iota$, "shall we sin?" is feebly supported; and $\epsilon\mu\alpha\rho\tau\eta\sigma\omicron\mu\epsilon\iota$, "may we sin?" has abundant support. $\alpha\iota$ and ϵ are interchanged in Matt. xi, 16, where $\epsilon\tau\alpha\rho\iota\varsigma$ is but slightly, and $\epsilon\tau\epsilon\rho\iota\varsigma$ (omitting $\alpha\nu\tau\omega$) strongly, supported by ancient authorities. So constant is this interchange that the difference in spelling has no weight in determining the true form of the word. The pronouns $\eta\mu\epsilon\iota\varsigma$, $\eta\mu\epsilon\iota$, and their cases are perpetually interchanged: 1 John i, 4, $\eta\mu\omega\nu$ for $\eta\mu\omega\nu$. Even the readings $\eta\mu\epsilon\tau\epsilon\rho\omega\nu$, Luke xvi, 12, and $\eta\mu\alpha\varsigma$, Acts xvii, 28, are found in the *Codex Vaticanus*.

(3.) *Errors of Sight*.—Of such errata a prolific source is furnished by the ancient mode of writing in an unbroken line, without division of words. In the confused sequence of letters thus strung together, the eye would not readily distinguish single words, or letters similar in form. Hence arose false division of words; similar letters interchanged, repeated, or omitted; repetition or omission of the same combination of letters; omission of the second repetition of the same letter or word, etc. In some of the following examples the MSS. are cited, by the usual notation (vol. v, p. 724, ¶ 3 of this *Cyclopaedia*), showing to some extent how they stand related to each other. The rough breathing is added in some cases to make the form more readily understood: Mark xv, 6, $\delta\nu\ \pi\alpha\rho\eta\tau\omicron\nu\tau\omicron$ (A, B, S), $\delta\nu\tau\epsilon\rho\ \eta\tau\omicron\nu\tau\omicron$ (B³, S^c, C, N, X); Rom. xiii, 9, $\acute{\omega}\varsigma\ \sigma\epsilon\alpha\tau\omega\nu$ (A, B, S, D, E), $\acute{\omega}\varsigma\ \epsilon\lambda\alpha\tau\omega\nu$ (F, G, L, P); Matt. xxi, 18, $\epsilon\pi\alpha\nu\alpha\gamma\omega\nu$ (B, S, L), $\epsilon\pi\alpha\nu\alpha\gamma\omega\nu$ (B³, S^c, C, E, F, G, H, etc.); Mark viii, 17, $\sigma\upsilon\nu\iota\epsilon\tau\epsilon$ (B, S, C, D, L, N), $\sigma\upsilon\nu\iota\epsilon\tau\epsilon\ \epsilon\tau\iota$ (A, X); Luke vii, 21, $\epsilon\chi\alpha\rho\iota\sigma\tau\omicron\ \tau\omicron\ \beta\lambda\epsilon\pi\epsilon\iota\nu$ (S^c, F, L, U); without $\tau\omicron$ repeated, A, B, S, D, E, G, H, etc.). From such accidental repetition arose the false reading in Rev. vi, 1, 3, 5, 7. The true reading is simply, "Come!" ($\epsilon\rho\chi\omicron\nu$), summoning forth each rider to the service assigned him. The uncial text would stand thus: ΚΑΙ Η ΔΕΚΑΙ Η ΔΟΥ . B of the Apoc. reads it in ver. 1, 5, 7, $\epsilon\rho\chi\omega\upsilon\ \kappa\alpha\iota\ \iota\delta\epsilon\ \kappa\alpha\iota\ \iota\delta\omega\nu$ ($\iota\pi\pi\omicron\varsigma$). There can be no doubt that $\kappa\alpha\iota\ \iota\delta\epsilon$ arose from accidental repetition; for in ver. 3, where $\kappa\alpha\iota\ \iota\delta\omega\nu$ does not follow, $\epsilon\rho\chi\omega\nu$ is not followed by $\kappa\alpha\iota\ \iota\delta\epsilon$. In the same way arose the $\kappa\alpha\iota\ \iota\delta\epsilon$ of S, which even its partial discoverer makes no account of here.

(4.) *Homoteleuton* is so common a cause of error in the uncial text as to procure for it a specific name. When two successive clauses or sentences begin or end similarly, the eye of the copyist may be misled by the similarity, and omit or repeat one of them: Luke vi, 1, $\delta\epsilon\upsilon\tau\epsilon\rho\omega\pi\rho\omega\tau\omega$ (A, C, D, E, H, K, M, R, S, U, V, X); omitted in B, S, L, probably from having the same termination as the preceding word. In 1 John ii, 23, two successive sentences both end with $\pi\alpha\tau\epsilon\rho\alpha\ \epsilon\chi\epsilon\iota$. The copyist, after transcribing the first, and seeing at the end of the second what he had just written, proceeded with the next following words. Hence the loss of that genuine

X—Z z

utterance of the apostle, in all the copies known when our current Greek text was formed; and hence its insertion in bracketed italics, as of doubtful authenticity, in the English New Test. The recovery of the old MSS. (A, B, S, C, etc.) has fully vindicated its title to its place there.

2. *Incidental* variations, peculiar to the age and country or mental habits of the copyist. These are due to several causes, chiefly the intermingling of dialects in the *κοινή διάλεκτος*, the influence of the Alexandrian version of the Sept., and the pedantry of the Atticists.

(1.) Differences in *orthography* and forms of words; dialectic usages of the copyist, or possibly of the original writer: Acts x, 30, $\epsilon\nu\alpha\tau\eta\nu$ (A, B, S, C, D), $\epsilon\nu\nu\alpha\tau\eta\nu$ (later form in the cursives); Acts vii, 28, $\epsilon\chi\theta\epsilon\varsigma$ (B, S, C, D), $\chi\theta\epsilon\varsigma$ (A, E, H, P); Mark i, 10, $\epsilon\nu\theta\upsilon\varsigma$ (B, S, L, Δ), $\epsilon\nu\theta\omega\varsigma$ (A, P, Γ, Π); Acts xi, 51, $\alpha\chi\rho\iota$ (A, B, S), $\alpha\chi\rho\iota\varsigma$ (B³, E, H, L, P); Rom. xv, 15, $\tau\omicron\lambda\eta\mu\omega\tau\epsilon\rho\omega\nu$ (S, C, D, E, F, G, L, P), $\tau\omicron\lambda\eta\mu\omega\tau\epsilon\rho\omega\varsigma$ (A, B); James ii, 1, $\pi\rho\omicron\sigma\omega\pi\omicron\lambda\eta\mu\phi\iota\alpha\varsigma$ (A, B, S, C), $\pi\rho\omicron\sigma\omega\tau\omicron\lambda\eta\phi\iota\alpha\varsigma$ (K, L, P); Mark i, 27, $\sigma\upsilon\nu\zeta\eta\tau\epsilon\nu$ (A, B, S, C, D, G, L, Δ), $\sigma\upsilon\zeta\eta\tau\epsilon\nu$ (E, F, H, K, M, S, U, V); 2 Cor. iii, 2, $\epsilon\nu\gamma\epsilon\gamma\rho\alpha\mu\mu\epsilon\nu\eta$ (A, B, S, D, F, G), $\epsilon\gamma\gamma\epsilon\gamma\rho\alpha\mu\mu\epsilon\nu\eta$ (K, L, P); John x, 22, $\epsilon\kappa\alpha\iota\nu\alpha$ (B, S, D, L), $\epsilon\kappa\alpha\iota\nu\alpha$ (A, B³, X); Acts xxiv, 4, $\epsilon\nu\kappa\omicron\pi\tau\omega$ (A, S, B, E, H), $\epsilon\gamma\kappa\omicron\pi\tau\omega$ (B³, H, P); Heb. ix, 18, $\epsilon\nu\kappa\epsilon\alpha\iota\nu\iota\sigma\tau\alpha\iota$ (A, S, D, E), $\epsilon\gamma\kappa\epsilon\alpha\iota\nu\iota\sigma\tau\alpha\iota$ (C, K, L, P). These examples betray the tendency to euphonic change in the usage of the later MSS. The doubling of ρ , usually neglected in the older MSS., is a grammatical correction in the later ones; as in Matt. ix, 36, $\epsilon\rho\mu\iota\mu\epsilon\nu\omicron\iota$ (B, S, C, D, L), $\epsilon\rho\rho\mu\iota\mu\epsilon\nu\omicron\iota$ (E, F, G, K, L, U, X).

(2.) *Tense-forms of Verbs*.—(a.) Of the same verb: Luke i, 31, $\sigma\upsilon\lambda\lambda\eta\mu\psi\eta$ (A, B, S, C, D); James iii, 1, $\lambda\eta\mu\phi\omicron\mu\epsilon\delta\alpha$ (A, B, S, C), $\lambda\eta\phi\omicron\mu\epsilon\delta\alpha$ (K, L, P); John ix, 10, $\eta\rho\epsilon\omega\chi\eta\sigma\alpha\nu$ (B, S, C, D, E, F, G, H, L, M, X), $\alpha\nu\epsilon\omega\chi\eta\sigma\alpha\nu$ (A, K, U, Π); Acts xii, 10, $\eta\rho\omega\gamma\eta$ (A, B, S, D), $\eta\rho\omega\chi\eta$ (E, H, P, L); Matt. v, 21, $\epsilon\rho\rho\eta\zeta\eta$ (B, D, E, K), $\epsilon\rho\rho\epsilon\zeta\eta$ (S, L, M, S, U, Δ, Π); Rev. xiv, 13, $\alpha\nu\alpha\pi\alpha\eta\sigma\omicron\nu\tau\alpha\iota$ (A, S, C, B), $\alpha\nu\alpha\pi\alpha\sigma\omega\nu\tau\alpha\iota$ (P); Acts x, 45, $\sigma\upsilon\nu\eta\lambda\theta\alpha\nu$ (B, S), $\sigma\upsilon\nu\eta\lambda\theta\omega\nu$ (A, D, E, H, L, P); ver. 39, $\alpha\nu\epsilon\iota\lambda\alpha\nu$ (A, B, S, C, D, E), $\alpha\nu\epsilon\iota\lambda\omega\nu$ (H, L, P); 1 John ii, 19, $\epsilon\zeta\eta\lambda\theta\alpha\nu$ (A, B, C), $\epsilon\zeta\eta\lambda\theta\omega\nu$ (K, L, P); Luke iii, 22, $\eta\nu\delta\omicron\kappa\eta\sigma\alpha$ (A, E, G, H, L, S, U, X, Γ, Δ), $\epsilon\nu\delta\omicron\kappa\eta\sigma\alpha$ (B, S, F, K, M, U, A, Π). (b.) Interchange of tenses or modes where either might seem apposite: John vi, 37, $\epsilon\kappa\rho\alpha\zeta\epsilon\nu$ (B, L, T, X), $\epsilon\kappa\rho\alpha\zeta\epsilon\iota$ (S, D); Luke xx, 19, $\epsilon\zeta\eta\tau\eta\sigma\alpha\nu$ (A, B, S, L, R), $\epsilon\zeta\eta\tau\eta\sigma\omicron\nu$ (C, D); John vii, 29, $\alpha\pi\epsilon\sigma\tau\epsilon\iota\lambda\epsilon\nu$ (B, L, T), $\alpha\pi\epsilon\sigma\tau\alpha\lambda\epsilon\nu$ (S, D); ver. 19, $\delta\epsilon\delta\omega\kappa\epsilon\nu$ (S, L, T, Γ, A, Π), $\epsilon\delta\omega\kappa\epsilon\nu$ (B, D, H, Π²); Matt. ix, 19, $\eta\kappa\omicron\lambda\omicron\upsilon\theta\epsilon\iota$ (S, C, D), $\eta\kappa\omicron\lambda\omicron\upsilon\theta\eta\sigma\alpha\nu$ (B, F, G, K, L, S, U, X, Δ, Π); John iv, 17, $\epsilon\iota\pi\epsilon\varsigma$ (B, S), $\epsilon\iota\pi\alpha\varsigma$ (A, C, D, L); viii, 39, $\epsilon\iota\pi\alpha\nu$ (B, S, C, D), $\epsilon\iota\pi\omicron\nu$ (L, T, X, Γ, Δ, A); ii, 28, $\sigma\chi\omega\mu\epsilon\nu$ (A, B, S^c, C, P), $\epsilon\chi\omega\mu\epsilon\nu$ (S, K, G); viii, 39, $\epsilon\sigma\tau\epsilon$ (B, S, D, L, T), $\eta\tau\epsilon$ (C, X, Γ, Δ, A, Π); (c.) Interchange of the same tense from different verbs of like signification: Acts ix, 26, $\epsilon\pi\iota\rho\alpha\zeta\epsilon\nu$ (A, B, S, C), $\epsilon\pi\iota\rho\alpha\tau\omicron$ (E, H, L, P); Mark i, 26 (part.), $\phi\omega\nu\eta\sigma\alpha\nu$ (B, S, L), $\kappa\rho\alpha\zeta\epsilon\nu$ (A, C, D, Γ, Δ, Π).

(3.) Of *case-forms* there are some variations; as Matt. xxvi, 52, $\mu\alpha\chi\alpha\rho\eta$ (A, B, S, C), $\mu\alpha\chi\alpha\rho\alpha$ (B³, D, Γ, Δ, Π); Luke xxiv, 1, $\beta\alpha\delta\epsilon\omega\varsigma$ (A, B, S, C, D, G, H, L), $\beta\alpha\delta\epsilon\omega\varsigma$ (E, K, P, S, U, V).

(4.) Exchange of terms so nearly equivalent as to be used indifferently in certain connections: Matt. xii, 48; xv, 12; xvii, 20, and xxi, 21, $\lambda\epsilon\gamma\epsilon\iota\nu$ (earlier), $\epsilon\iota\pi\epsilon\iota\nu$ (later); xxii, 37, $\phi\alpha\nu\alpha\iota$ (earlier), $\epsilon\iota\pi\epsilon\iota\nu$ (later); Mark xiv, 31, $\lambda\alpha\lambda\epsilon\iota\nu$ (earlier), $\lambda\epsilon\gamma\epsilon\iota\nu$ (later); John xiv, 10, $\lambda\epsilon\gamma\epsilon\iota\nu$ (earlier), $\lambda\alpha\lambda\epsilon\iota\nu$ (later). So interchanged are

εγερσεις and διεγερσεις, Matt. i, 24; εγερση and αναστη, xvii, 9; αναστηναι and εγερθηναι, Luke ix, 22; ηλθεν (ν attached) and απηλθε, Matt. xiv, 25; ηλθον and απηλθον, Luke xxiii, 33; απηλθεν and εξελθεν, Acts xvi, 39; λεγουσι and ειπον, Matt. xiii, 28. These words, so nearly equivalent in the connection, might readily be confounded in copying.

(5.) The same is true of forms nearly equivalent in sense; as ονδε and ουτε, ως and καθως, Acts x, 47; οσμι and ως, John xix, 14; Luke i, 56; ως and ωσπερ, 2 Cor. i, 7; μεχοι and εως, Luke xvi, 16; ιως ον and ιως οτου, xii, 50, the former only in the later uncials, the latter in the older and some of the later. It is true, also, of other equivalents in sense; as John xiv, 31, ενετειλατο (A, S, D), and εντολην εδωκεν (B, L): having the same meaning, they might easily be confounded in copying.

(6.) Familiar contractions (crasis) abounding in oral speech, and often passing into written language; common in the earlier MSS., and often resolved in the later: John viii, 55, καν (B, S, D), και ιαν (A, C, L); 1 Cor. ii, 3, καγω (A, B, S, C, P), και ιγω (D, E, F, G, L); John xiv, 16, καγω (B, S, D, Q), και ιγω (A, L, X); ver. 21, καγω (B, S, D, G, L), και ιγω (A, E, H, K).

(7.) Interchange of the minor connectives: Acts iv, 14, τον τε (A, B, S, D²), τον δε (P); x, 48, προσεταξεν δε (B, S, E), προσεταξεν τε (A, H, L, P); Mark i, 28, και εξηλθεν (B, S, C, D), εξηλθε δε (A, F, Π).

(8.) Pronominal forms inserted without affecting the sense: Matt. xx, 23, μου (after ενωνυμων); xix, 28, ημεις (after κατισσεσθε); Rev. xiv, 13, μοι (after λεγουσης). Specially frequent is the insertion of αυτος in an oblique case: Acts xi, 13, αυτω (after ειποντα), and xii, 9 (after ηκολουσει); Matt. xxv, 4, αυτων (after αγηριοις), and v, 6 (after απαντην); xxvi, 17, αυτω (after λεγοντις), and xxvii, 22 (after λεγουσιν). An instructive case of presumed addition, but more probably of unauthorized omission, occurs in the last clause but one of Luke xii, 53. The omission of the pronoun in the four preceding clauses, where the nearer relation of the parties makes it unnecessary, may have occasioned its omission here, where it is required by the more remote relation. Its accidental or misjudged omission being more probable than its unauthorized insertion, the testimony of A, B, S, D in its favor should outweigh that of S, Δ, which yet determined Tischendorf to omit it. Tregelles properly retains it here, and as properly omits it in the next clause (with B, D, L against A, T, X), the relation being already expressed. It is noteworthy that the whole passage, as thus read, is strikingly marked by Luke's characteristic conciseness and precision of expression.

(9.) Change in the order of words; a numerous class, as may be seen on almost any page of Scrivener's *Norman Testamentum* (in the Cambridge classics). Many of these variations differ from each other no more than the English phrases "Æneas by name" and "by name Æneas" (Acts ix, 33); "went up straightway" and "straightway went up" (Matt. iii, 16). Most of them, however, are not easily accounted for. Such cases as γενομενος εν αυτω and εν αυτω γενομενος (Acts xii, 11), and similar colloquial phrases, may have been due to local habit and usage. In the greater number, perhaps, the copyist himself, after reading a clause, may not have recalled, in writing it, the exact order of the words; or he may have been unconsciously misled by one occurring to him more correct or pointed in expression, or more pleasing to the ear. In the latter is ground for such preference; as in Acts ix, 13, οσα κακα εποιησε τοις αγιοις σου and οσα κακα τοις αγιοις σου εποιησε.

(10.) The article, in the use of which the MSS. are very fluctuating, is sometimes neglected or inserted without apparent ground. Significant is the reading

of some MSS. (among them D) in Luke xii, 54, "When ye see the cloud ('the rain-betokening cloud,' 1 Kings xviii, 44) rising from the west." But the omission of the article here is strongly attested by A, B, S, L, X, Δ.

(11.) In the use and disuse of the elision the MSS. fluctuate: 1 John ii, 16, αλλ εκ (A, S, K, L), αλλα εκ (B, C); 1 Cor. vii, 4, αλλα ο (A, B, S, C), αλλ ο (D, E, G, K, L, P). It is probable that the shorter elided form was that of oral speech, and passed into the earlier written language. More doubtful is the neglected aspiration of mutes before the rough breathing: Luke xii, 53, επι νιω (B, S, T, X, P, Δ, Δ); εφ νιω (A, D, K, L, Π).

(12.) Error from the similar construction of two successive clauses: James ii, 18, the first εκ (K, L) for χωρις (A, B, S, C, P), the copyist confounding the εκ των εργαων of the two clauses. His blunder is perpetuated in our current Greek text through the misjudgment of Mill, whose long and involved exposition of the meaning is its own refutation. The Η ΚΑΙΝΗ ΔΙΑΘΗΚΗ of Colinaeus (1534) has the true reading. The English version here follows the true reading. In 1 Pet. iii, 20, "once—waited," it follows a false reading (απαζε εξεδεχετο) without MS. authority, and received on conjecture by Erasmus. The true reading is απεξεδεχετο (A, B, S, C, D, P).

(13.) Synonyms, and also words that in certain connections may serve as such, are readily interchanged: Matt. xx, 34, ομματων (B, D, L, G), οφθαλμων (S, C, X). In xxv, 16 the reading "made" [five talents] is equivalent in meaning to "gained" [five talents]. For the former (εποιησε) are A, S, X, F, Δ, Θ; for the latter (εκερδησε) are A², S², B, C, D, L. So likewise ix, 29, ομματων (D), οφθαλμων (all others); vi, 1, δεκαιοσυνην (B, S, D), ελεημοσινην (E, K, L, M, S, U, Z). But it may well be doubted whether by the former the Saviour meant *almsgiving*, as implied in the alternative reading. He first states the general principle that good deeds are not to be done to be seen of men, and then illustrates it by the case of ostentatious almsgiving. The phrase was already a familiar one: Psa. cvi, 3, "he that doeth righteousness;" Isa. lviii, 2, "a nation that did righteousness;" 1 John ii, 29, "every one that doeth righteousness;" iii, 7, 10. So likewise Matt. xxvii, 4, αδων (A, B, S, C, X), δικαιον (B marg. L).

(14.) Of proper names the variations in spelling are very frequent: 1 Cor. xvi, 19, Πρισκα (B, S, M, P), Πρισκιλλα (A, C, D, E, F, G); John vii, 19, Μωσινε (B, S, D, K, L, S, T, X, Δ, Π), Μωσιν (P, A, Δ). Most significant is the variation in Acts xi, 20, Ελληνας (A, S², D), Ελληνιστας (B, D², E, H, L, P) (comp. vi, 1). Of places: Matt. iv, 13, Καφαρναουμ (B, S, D, G), Καπερναουμ (C, E, K, L, M, P, S, U, V); xv, 39, Μαγαλαν (B, S, D), Μαγδαλα (E, F, G, H, K, L, S, U, V); Luke x, 30, Ιεριχω (B, L, X), Ιεριχω (A, B, S, C, D, X).

3. *Intentional Variations.*—Of these the greater number affect only the form of the text.

(1.) *Grammatical Changes.*—(a.) In the oblique case after a preposition, to express what was understood to be the required relation: Acts ii, 30, καθισαι επι τον θρονον (A, B, S, C, D), καθισαι επι τον θρονον (E, P); Rev. iv, 2, επι τον θρονον καθήμενος (A, B, S), επι τον θρονον καθήμενος (P); ver. 9, καθήμενος επι τω θρονω (A, S), καθήμενος επι τον θρονον (B, P); xix, 5, απο του θρονου εξηλθε (A, B, C), εκ του θρονου εξηλθε (S, P); Mark vii, 30, βεβλημενην επι της κλινης (A, N, X, F, Π), βεβλημενην επι την κληνην (B, S, D, L, Δ). (b.) Rectifying a supposed solecism: Matt. v, 28, επιδυσμσαι αυτην (B, D, E, K, L, S, U, V), επι-

θυμῆσαι αὐτῆς (Σ³, M); xv, 32, ἡμεῖς τρεῖς (B, C, D, F, G, H, K, L, M, P, S, U, V), ἡμεῖς τρεῖς (Σ, E); Rev. iv, 1, λεγων (A, B, Σ), λεγουσα (Σ^c, P); ver. 8, λεγοντες (A, B, Σ, P), λεγοντα (in the cursives); xi, 4, εἰσῴτες (A, B, Σ, C), εἰσῴσαι (Σ^c, P).

(2.) *Changes Affecting the Substance of the Text.*—A careful examination and comparison of such changes will probably lead to the conclusion that the greater part of them at least have passed from the margin into the body of the text through the want of proper discrimination in the copyist. In the old MSS. frequent omissions in the text are found supplied in the margin, to be incorporated in the text of the next copy made from it. This being a standing rule, whatever was written in the margin might be thus incorporated by an incompetent or not sufficiently attentive copyist. If a sentence seemed incomplete or irregular in construction, or otherwise obscure, inelegant, or apparently inaccurate, a remedy was suggested in the margin. A conspicuous example occurs in John vii, 39. The whole verse in the true text reads thus: "And this he said concerning the Spirit which they that believe on him should receive; for the Spirit was not yet, because Jesus was not yet glorified." The brevity and partial obscurity of the form "was not yet" doubtless occasioned the marginal gloss "given," found in one uncial, B (δεδομενον), and the cursive 254 (δοθεν). This marginal gloss becoming incorporated with the text, we have "the Spirit was not yet given." The English version properly italicizes *given* as not authentic Scripture. It is not in the *Καὶνὴ Διαθήκη* of Colinaeus (1534). A similar case occurs in ver. 8, where αὖτω (B, L, T, X, P, Δ, A, not in Σ, D, K, M, Π) probably passed from the margin into the text. This reading, on which the testimony of MSS. is pretty evenly balanced, is proved by historical evidence to be a corruption of the text (see Tischendorf [8th ed.]; Scrivener, *Introd. to Text. Crit.* [2d ed.], p. 529). It should be observed, moreover, that there was no occasion for this qualification, for Jesus did not go up to the feast at all. John vii, 10 should read, according to the MSS., "But when his brethren were gone up to the feast, then went he up also, not openly," etc. He went to Jerusalem privately, taking no part there in the public festival (for he could not be found, ver. 11), and when it was half over, first made his appearance in the Temple as a teacher (ver. 14). In Mark i, 2, ἐν Ἡσαΐα τῷ προφῆτῳ (B, Σ, D, L, Δ), ἐν τοῖς προφήταις (A, E, F, G, H, K, M, P, S, U, V), the writer specially names Isaiah, because his language identifies the promised messenger in the person of John, "the voice of one crying in the wilderness." The whole prophecy was fulfilled in him, and the failure to see this, its central point, may have occasioned the marginal comment that passed into the text. In Gal. iii, 1 the explanatory gloss "that ye should not obey the truth" is found in C, D^c, E, K, L, P, but not in the older uncials A, B, Σ, D, F, G. In Rom. viii, 1, "who walk not after the flesh, but after the Spirit," is a gloss taken from ver. 4 as characterizing those who are "in Christ Jesus." In Acts xv, 34, "but it pleased Silas to abide there still" (not in A, B, Σ, E, H, L, P), is a marginal gloss accounting for his presence there, referred to in ver. 40. The doubtful passage in John v, 3, 4 is supposed by many to have been a marginal comment (see a full statement of the case, with the reasons for and against its genuineness, in Schaff's edition of Lange's *Commentary*). To a misunderstanding of the apostle's language in 2 Cor. viii, 4, we owe the perversion of his meaning in the current Greek text and in the English version. The words inserted from the margin, δεῦξάσαι ἡμᾶς, are not in the uncial text (B, Σ, C, D, E, F, G, K, L, P, etc.), and are found only in the cursives. In Mark vii, 2 the construction (interrupted by ver. 3, 4, and resumed at ver. 5) seemed in-

complete, and hence the marginal supplement, "they found fault." Only late uncials (F, K, M, N, S, U, H) have ἐμεψάντο, not found in A, B, Σ, E, G, H, L, V. In Matt. xxv, 6 the original form, "Behold, the bridegroom! go ye out to meet him," has the air of an excited, midnight cry. The supplemental ἐρχεται first appears in the later uncials C, X, P, H, and is not found in B, Σ, C, D, L, Z.

Marked diversities in Hebraistic and Greek phraseology are noted: Matt. xxi, 23, ἐλθόντι αὐτῷ, προσήλθον αὐτῷ ἐδάσκοντι, and ἐλθόντος αὐτοῦ, etc. Here the Hebraism is found in later uncials (E, F, G, H, K, M, S, U, V), and the other in B, Σ, C, D, L. More marked is the Hebraistic *Fav convers.* represented by καὶ (xv, 5; Mark vii, 12) in the same later uncials, and not in the earlier. The omission of κα makes the construction easy where its presence has caused much perplexity (see Meyer; also Lange [Amer. ed.], p. 275).

Assimilation, so called, of the gospels occurs, especially of the synoptic gospels. This arose from the habit of noting in the margin of one gospel the words of another for comparison, illustration, or a more full and satisfactory statement. In Matt. xxv, 13, at the close of the parable of the ten virgins, the Saviour adds, "Watch therefore, for ye know not the day nor the hour." A copyist added, most probably from the margin, the words of Luke xii, 40, "wherein the Son of man cometh." The words added are not in A, B, Σ, C, D, L, X, Δ, and are found only in C³, P, Π³. In Matt. ix, 13 the Saviour's assertion is, "I came not to call the righteous, but sinners." To this the copyist added the marginal gloss from Luke v, 32, εἰς μετανοίαν, found in later uncials, but not in B, Σ, D, etc. In Luke xx, 23, τὴν με πειραζετε (A, C, D, P), omitted B, Σ, L, was probably added from Matt. xxii, 18; Mark xii, 15. In Mark xiii, 14, "spoken of by Daniel the prophet," is transferred from Matt. xxiv, 15. Luke xvii, 36, omitted in all the uncials except D, U, was inserted from Matt. xxiv, 40. In Matt. xx, 22, "and to be baptized with the baptism that I am baptized with," in later uncials, but not in B, Σ, D, L, Z, is taken from Mark x, 38. In Matt. v, 44, "bless them that curse you, do good to them that hate you," and the words "them that despitefully use you," are transferred from Luke vi, 27, 28. In Luke v, 38, "and both are preserved," is from Matt. ix, 17. In xxvii, 35 the whole verse, after the words "casting lots," is from John xix, 24. The same tendency to supplement one account by another, or to harmonize two accounts of the same occurrence, is seen in Acts ix, 5, 6, where all from σκληρον in ver. 5 to πρὸς αὐτον in ver. 6 is from xxvi, 14, 15.

Supplementing of quotations from the Old Test. only partially cited by the sacred writer: Matt. xv, 8, where "This people honoreth me with their lips" (omitting "draweth nigh unto me with their mouth") is the true reading; and Mark i, 2, "shall prepare thy way" (omitting "before thee"). Scrivener (*Manual of Text. Crit.* p. 12) notes the following supplements: Luke iv, 18, "to heal the broken-hearted;" Acts vii, 37, "him shall ye hear;" Rom. xiii, 9, "thou shalt not bear false witness;" Heb. ii, 7, "and didst set him over the works of thy hands;" xii, 20, "or thrust through with a dart."

Other supplementary additions came into the text from the margins of MSS. fitted for reading the church lessons, and from lectionaries, church rituals, and liturgies. It was necessary to prefix to each lesson its proper title, or an introductory clause, or the name of the person or class addressed or speaking. In Acts iii, 11, the title of the lesson, τοῦ ἱερέως κωλοῦ, has come in place of the original αὐτον. The latter is the reading of A, B, Σ, C, D, E; the former is found in the later uncial P and in cursives. In Luke vii, 31 it was necessary to prefix to the lesson the introductory clause εἰπε δὲ ὁ κυριος; found in cursives and the later

uncial M, wanting in A, B, **Σ**, D, L, X, **Δ**. The name of the one addressed, or speaking, or acting, must often be inserted. Hence *ἡσού*, in place of *αὐτοῦ*. Matt. viii, 5; *ἡσούς* added, iv, 18; xiv, 22; transferred from the last clause to the first in John i, 44. In Acts viii, 37, without doubt a marginal note came in from the baptismal formula of a church ritual; wanting in the early MSS. A, B, **Σ**, C, II, L, P, and feebly accredited otherwise. In 1 John v, 7, 8, from *ἐν τῷ ὁρατῷ* to *ἐν τῇ γῇ* is now regarded as spurious by all textual critics. "They were originally brought into Latin copies in Africa from the margin, where they had been placed as a pious and orthodox gloss on ver. 8" (Scrivener, *Manual of Text. Criticism*, 2d ed. p. 556, who reviews the controversy respecting the passage, with a full statement of the evidence on both sides). In Matt. vi, 13, from *ὅτι σὺ* to the end, the doxology is wanting in the oldest uncials, l, **Σ**, D, Z (A, C, P are defective here), and on other diplomatic grounds is discredited by most textual critics. It probably originated in the early liturgies of the Church. The passage in John vii, 53-viii, 11, bracketed as doubtful in some critical editions and omitted in others, is regarded as authentic history, the record of an actual occurrence in the life of Jesus. The question of its genuineness is fully discussed by Lange (*Commentary*, Amer. ed. p. 268-271, and the chief authorities on both sides are stated by Dr. Schaff, p. 267). The passage in Mark xvi, 9-20, omitted in B (though a column is significantly left vacant) and in **Σ**, is found in A, C, D, E, F, G, H, M, S, U, V, X, P, **Δ**, II (see the full statement of the question of its genuineness in Scrivener, *Introd. to Text. Crit.*, p. 507-513).

Of variations on doctrinal grounds, or in favor of current opinions, no decisive case has been adduced; yet subjective considerations might influence the choice among different extant readings. In Acts xx, 28 is the reading *ἐκκλησίαν τοῦ Θεοῦ* (B, **Σ**) for *ἐκκλησίαν τοῦ κυρίου* of A, C, D, E. The former being, as Meyer suggests, Paul's invariable usage (once *Χριστοῦ*, never *κυρίου*), it was written parallel with the latter in the margin, and thence passed into the text. For the substitution of *Θεός* in place of *υἱός*, John i, 18, other causes may be assigned more probable than a supposed change of the text from doctrinal preference (see Schaff's exhaustive note on the passage in his edition of Lange's *Commentary*, and Tischendorf's 8th ed.). Tregelles edits the reading *Θεός*; Tischendorf, with a truer critical sense and appreciation of evidence, retains the correct reading *υἱός*. To a reverent feeling are probably due such variations as *ἰωσήφ* and *ὁ πατήρ αὐτοῦ*, Luke ii, 33; *ἰωσήφ καὶ ἡ μητὴρ* and *οἱ γοῖναι*, ver. 44.

A case of special historical interest, not falling under any of the above classifications, occurs in Rev. xv, 3 (Engl. version), "just and true are thy ways, thou King of saints." But the MS. from which the book was first printed (professedly) reads, "thou King of the nations" (*τῶν ἐθνῶν*); appropriately here (comp. the next verse). This is also the reading of A, B of the Apoc. and P (Porphyrian palimpsest). But **Σ** and C read "King eternal" (*αἰωνῶν*, as in 1 Tim. i, 17), Lat. Vulg. *saeculorum* (Cod. Am. *calorum*). It is probable, as suggested by Tregelles (*The Revelation in Greek, Edited from Ancient Authorities*, p. 95), that the true reading, ΕΘΝΩΝ, was in some MSS. written ΑΙΘΝΩΝ (see above, 1, 2), then ΑΙΘΝΩΝ = ΑΙΩΝΩΝ. Instead of the true reading in his MS., Erasmus followed a corruption of the Vulg. reading *saeculorum*, its MS. abbreviation *scolorum* being easily mistaken for *scorum*, the abbreviation of *sanctorum*. Thus the reading of the current Greek text, and of the English version of it, rests solely on a mistaken abbreviation in the Latin Vulg.

To an error of sight and of *italicism* we owe that wonderful beast of the Apocalypse (xvii, 8) "that was, and is not, and yet is." The above-named MS. reads *καὶ*

παρεστί (*ἔστι* slightly removed from the preceding syllable, as often in MS.), with a distinctly written *a* in that syllable, and the accentuation of *καὶ πάρεστι*. The reading is undoubtedly that of the ancient MSS.: **Σ** *παρεστέ* (= *παρεσται*), A (C is defective here), B of the Apoc., and P, which have *παρεσται*. Erasmus's copyist, mistaking a for *ε* in *παρ*, and making a false division of syllables, wrote *καίπαρ ἔστι*; hence that beast, so long the *crux interpretum*.

II. *Value*.—Only readings attested by uncial MSS. are now recognised by most critics; while others, well attested by the best cursives, are not taken into account, these later MSS., dating from about the 10th century and onward, being appealed to only as corroborative of earlier authorities, or in cases where these disagree. But as the character of a MS., tested by comparative criticism, is often entitled to as much consideration as its age, it is not improbable that the most approved will yet be allowed their due weight claimed for them by Scrivener, their strenuous and able advocate (see his *Manual of Text. Crit.* [2d ed.], p. 465, and ch. ix).

Comparative criticism is "that delicate and important process whereby we seek to determine the comparative value and trace the mutual relation of authorities of every kind upon which the original text of the New Test. is based" (Scrivener, *ut sup.* p. 462). It has already been employed to a certain extent with highly satisfactory results; but its laws, and their proper application, are yet to be fully developed. See CRITICISM, BIBLICAL.

III. *Number*.—The number of various readings is not easily ascertained. Since the time of Mill, when they are estimated to have been about thirty thousand, it has been greatly increased by the numerous MSS. since discovered and the more thorough collation of those then known. As it often happens that of several readings one gives the clue to the origin of them all, reducing all to one (*Canons of Criticism*, ii, 2), so a new reading may be welcomed as supplying that which is sought. For a long time the utmost diligence has been used in searching through MSS. and recording every deviation from a common printed text, even to the slightest peculiarity in spelling, till the number is increased fourfold. Of these at least a fifth part respect only clerical errors, differences in spelling, in the form of a tense or a case, in the order of words, and the like; while of doubtful readings that affect the sense the number is far less, and those that affect a doctrine or a duty are few, if any.

Attention was directed to discrepancies in the MSS. of the New Test. by the controversies between Erasmus and Stunica on the respective merits of the Complutensian and Erasmus texts. (For the earliest allusions to them in patristic writings, see NEW TESTAMENT, II, 3, 4, ¶ 3). A formal comparison of different readings and their value was first made, though unsatisfactorily, in Stephens's third or royal edition (1550). His text, very negligently and often capriciously formed, became the current Greek text in England and America. The Elzevir editions (1624, fol.), formed chiefly from Beza's and the third of Stephens, adding nothing of critical value, became the current Greek text on the continent of Europe. Various readings of the *Codex Alexandrinus*, and a digest of numerous others in Walton's Polyglot Bible (1654-57), are the first collection of any value. Of subsequent contributions to textual criticism the following may be named as having made epochs in the progress of the science [for a full account of the printed editions of the New Test., see CRITICISM B]: Mill's *Greek Test.* (1707; 2d ed. by Kuster, 1710), with various readings from all sources then accessible, was the first attempt for a complete critical apparatus. Bengel (1725-34) led the way in the classification of MSS. and versions, relying on the oldest authorities. Wettstein's *New Test.* (1751-52) added much to the materials for textual criticism, in-

creasing the collection of various readings from MSS. not before or imperfectly collated. With the labors of Griesbach (*Symbolæ Criticæ* [1785-93]; *New Test.* [2d ed. 1796-1806]) began the strictly critical treatment of the text itself, then for the first time corrected throughout from MSS. and other ancient authorities. The labors of Tischendorf (1841-73) have made a new era in the science. By his numerous collations and printed texts of MSS., with elaborate prolegomena, notes, and fac-similes—his discovery of the *Codex Sinaiticus* and imperial edition of it, with specimens in fac-simile, prolegomena, and full notes, in 1862, preceded by its best representative in lithographed fac-simile, the *Codex Friderico-Augustanus*, with prolegomena and illustrative comments, in 1846; his eight critical editions of the *New Test.*—he has far exceeded all who have labored in this field before him, and won for himself the first place among Biblical critics.

On the subject of various readings, see Griesbach, *Symbolæ Criticæ* (1785-93) and *Prolegomena ad Nov. Test.* (2d ed. 1786); Lachmann, *Prolegomena ad Nov. Test.* (1842); Tregelles, *Account of the Printed Text of the New Test.* (1854) and *Introduct. to the Text. Crit. of the New Test.* (1856); Tischendorf, *Prolegomena ad Nov. Test.* (7th ed. 1859); Scrivener, *Plain Introduct. to the Criticism of the New Test.* (2d ed. 1874); Delitzsch, *Handschriftliche Funde* (1861-62); Conant, *Greek Text of the Apocalypse*, in the *Baptist Quarterly*, 1871; Smith, *Bible Dictionary* (Eng. ed. 1860; Amer. ed. 1870), p. 2125-2128. (T. J. C.)

VARIOUS READINGS OF THE OLD TEST. It is now universally admitted that the text of the Old Test. has not come down to us without mistakes. Like all other ancient books, the Bible has suffered from the errors of transcribers; and thus, in the course of repeated copying, many small variations crept into the text, and various readings came into existence. These *variae lectiones* may be assigned to two sources. They were made unintentionally or purposely.

I. Accidental Mistakes.—By far the greater number of existing various readings owe their origin to accident, and may be traced back to the following sources:

1. Transcribers *saw* amiss, and therefore they *confounded* letters similar in shape. Beth and Kaph, Gimel and Nun, Daleth and Resh, He and Cheth, are so like that they were exchanged. Thus, in Neh. xii. 3 we read **שכניה**, but in ver. 14 **שכניה**; 1 Chron. ix. 15, **זכרי**, but Neh. xi. 17, **זכרי**; Gen. x. 3, **ריפת**, but 1 Chron. i. 6, **רידנים**; Gen. x. 4, **דרינים**, but 1 Chron. i. 7, **רידנים**; xviii. 12, **בארם**, but 2 Sam. viii. 12, **בארם**, etc. From the same cause the copyists *transposed* letters, words, and sentences. Thus we read,

Josh. xxi. 27, **גולן**, but in 1 Chron. vi. 56, **גולן**.

1 Sam. i. 1, **בן-יהוח**, but in 1 Chron. vi. 19, **בן-יהוח**.

2 Sam. xxiii. 31, **הכרחהמי**, but in 1 Chron. xi. 33, **הכרחהמי**.

1 Kings x. 11, **אלכנים**, but in 2 Chron. ix. 10, **אלכנים**.

Psa. lviii. 46, **יורחרי**, but in 2 Sam. xxii. 46, **יורחרי**.

“ xviii. 50, **בגוים יהוה**, but in 2 Sam. xxii. 50, **בגוים יהוה**.

“ “ 45, **לשמו לי בני נכר**, but in 2 Sam. xxii. 45, **לשמו לי בני נכר**.

“ “ 45, **לשמו לי בני נכר**, but in 2 Sam. xxii. 45, **לשמו לי בני נכר**.

Comp. also Psa. xvi. 9-11 with 1 Chron. xvi. 30-32.

From the same cause they *omitted* letters, words, and sentences, especially when two periods or clauses terminated in the same way. Thus Neh. xi. 5, **משפחה**, but 1 Chron. iv. 36; vi. 15, **שפחה**; Psa. xviii. 42, **ישש**, but 2 Sam. xxii. 42, **ישש**. Words were omitted: as in 1 Sam. i. 3, where, after **מערר**, probably **מקריבמים** (Sept. *ἐκ*

πώλεως αὐτοῦ ἐξ *Ἀραζαίμ*) was left out. The omission of clauses or sentences we notice, e. g. 1 Sam. v. 3, where, after **במהרה וירא**, the words **וירא ויגין** were omitted, for the Sept. reads *καὶ εἰσῆλθον εἰς οἶκον Δαγών καὶ εἶδον*. The last two examples of omission bear the technical name of *ὁμοιοτέλετον*.

2. Transcribers *heard* amiss, and fell into mistakes. Here the same observations can be made as above. Thus—

1 Sam. xvii. 34, we find **זה**, as in several codd., instead of **שה**.

“ xxii. 18, **דיג**, but the Keri, **ראג**.

2 Kings xx. 4, **הער**, “ “ “ “ **הער**.

Psa. xxi. 12, **יכלו**, but 1 Chron. xvi. 32, **יכלין**.

Isa. lxxv. 4, **פרק**, but Keri, **מרק**.

To this cause must be ascribed the seventeen identifications of **לא** with **לו** noted in the margin of the Bible.

3. Transcribers made mistakes from *memory*. Where the copyist trusted too much to his memory, he confounded synonymous terms, as in Lev. xxv. 36, **אל** with **כל**; in 2 Kings i. 10, **וירמר** with **וירמר**, and **יהוה** with **אדוני**; or he altered the word, after the more frequent forms, in parallel passages. Thus, in Isa. lxiii. 16, some have **מלכות שמך** instead of **למנן שמך**, because the former is the more common.

4. Transcribers made mistakes in *judgment*. They misapprehended the text before them, and therefore divided words badly, misunderstood abbreviations, and blundered with regard to the letters called *custodes linearum*, as well as marginal notes. One word was improperly separated into two, or two combined into one. An example occurs in Psa. xlviii. 15, where the text has **על מיה** instead of **על מיה**, *unto death* instead of *forever*. The latter reading is found in many MSS. and editions; Sept. *εἰς τοὺς αἰῶνας*; Vulg. *in sæcula*. On the contrary, lv. 16, **ישימיה**, the textual reading, denoting *desolations*, is directed by the Keri to be divided into **ישי מיה**, *let death seize*. This is adopted by many MSS., editions, and old translators, as Sept., Vulg., Aquila, Symmachus, Syriac, Arabic, Jerome.

Abbreviations were usually made by writing the first letter of a word and appending a small stroke or two to indicate the omission of some letters. Hence the omission was sometimes erroneously supplied, or the abbreviated word was considered complete in itself. Thus, **יהוה** was shortened into **י** or **י**. In Isa. xlii. 19, the Sept. has translated **יהוה** **כעבר** by *ὁ δοῦλος μου*, showing that they mistook **י** **כעבר** for **כעבר**. So also in Jer. vi. 11, **חמתי יהוה**, *the fury of Jehorah*, is translated by the Sept. *θυμὸν μου*, showing that they mistook **י** **חמתי** for **חמתי**; Psa. xxxi. 7, **שנאתי**, *I hate*, all ancient translators understood for **יהוה** **שנאתי**, *thou, Lord, hatest*; and this reading is found in Cod. 170. It is well known that the Jews did not divide a word between two lines. When there was a vacant space at the end of a line too small to contain the next word, they added letters to fill it up and preserve the uniform appearance of the copy. These supernumerary letters were generally the initials of the following word, though it was written entire in the next line. Ignorant transcribers may have taken these superfluities letters, called *custodes linearum*, “keepers of the lines,” into the text. Thus it is thought by some that in Isa. xxxv. 1, the common reading **ישש** **מ מרבר** arose from **ישש** **מ מרבר**, by joining the superfluous **מ** to the end of the verb. On the other hand, transcribers suspected the existence of these *custodes linearum* in places where they did not occur, and omitted part of the text. So in Exod. xxxi. 8 the word **כל**, “all,” appears to have been omitted be-

cause of the following בללי. The omitted word is found in the oldest versions. Errors also arose from taking marginal annotations into the text. Probably Isa. vii, 17 furnishes an example, for the clause אֶת בִּלְלֵךְ אֲחִירֵי is unsuitable. To such marginal annotations must be ascribed those passages in which to one word a second or even a third translation is added. Thus in 1 Sam. xii, 14 the Sept. reads, for רָצִיחֵנִי וְיָלֵא, καὶ οὐ κατέδυσαν σπινθας ἡμᾶς (καὶ οὐ ἔδασας ἡμᾶς).

In some cases the MS. itself may have been the cause of errors, be it that it was illegible or that some letters were obliterated. After all, it must be obvious that no intentional errors were made, and the existence of various readings is purely accidental.

II. *Intentional Errors.*—After what has been said, it would be useless to speak of *intentional errors* were it not for the very fact that Church fathers, Mohammed, and scholars of renown have brought such a charge against the Jews. But the charge has not been substantiated. Their veneration for the sacred books was too great to allow them to make alterations, knowing them to be wrong. Josephus (*Cont. Apion.* i, 8) says, Τοιοῦτον γὰρ αἰῶνος ἦν παραρχήσας, οὔτε προσεῖναι τις οὐδέν, οὔτε ἀφελῆναι αὐτῶν, οὔτε μεταξείναι τετάρθυκεν; and Eusebius (*Præp. Evang.* viii, 6) cites from Philo: Μὴ ῥημὰ γε αὐτοῦς μόνον τῶν ὑπ' αὐτοῦ (Moses) γεγραμμένων κινήσαι, ἀλλὰ καὶ μυριάκις αὐτοῖς ἀποστρεῖν ὑπομένειν θάπτον, ἢ τοῖς ἐκείνου νόμοις καὶ ἔξωθεν ἐναντία πεισθῆναι. Like the Samaritans, the early Christians brought the accusation of corrupting the text against the Jews. But these were not competent witnesses or righteous accusers. For when the Jews quoted from the Hebrew Bible passages differing from the Sept., which some of the fathers regarded as inspired, it was very easy to say that the Jews had corrupted Scripture in such places. This was all the reply they could make, being themselves ignorant of the Hebrew original. It was different with Mohammed (see the Koran, sura ii, 73, 176–178; iii, 188; v, 17). His charge is equally directed against Christians as against Jews, because of his inability to find any support in the Scriptures for his prophetic pretensions.

The earliest among Christians who made the charge against the Jews of corrupting the text was Justin Martyr (comp. *Trypho.* c. 71, 72, 73), who was followed by Irenæus, Tertullian, and others. All these fathers knew nothing of Hebrew; they had to avail themselves of the Sept. Of more importance is the testimony of Origen and Jerome, because they knew Hebrew. It is true that Jerome, in his *Commentary on Galatians* iii, appears, indeed, to charge the Jews with erasing the word בל in Dent. xxvii, 26; for he says, "Incertum habemus utrum LXX interpretes addiderint Dent. xxvii, 26 *omnis* homo et in omnibus, an in veteri Hebræo ita fuerit et postea a Judeis deletum sit. . . . Quam ob causam Samaritanorum Hebræa volumina relegens inveni בל scriptum esse et cum LXX interpretibus concordare. Frustra igitur illud tulerunt Judæi, ut viderentur esse sub maledicto, si non possent omnia complere quæ scripta sunt: cum antiquiores alterius quoque gentis literæ id positum fuisset testentur." But this charge does not appear to have been his deliberate opinion, as can be seen from his *Commentary on Isaiah*, ch. vi, where he says, "Quodsi aliquis dixerit, Hebræos libros postea a Judeis esse falsatos, audiat Origenem, quid in octavo volumine explanationum Esaie huic respondeat quæstionculæ: quod nunquam Dominus et Apostoli, qui cætera crimina argunt in scribis et Phariseis, de hoc crimine, quod erat maximum, retinissent, sin autem dixerint post adventum Domini Salvatoris et predicationem Apostolorum libros Hebræos fuisse falsatos, eademinum tenere non potero, ut Salvator et Evangelistæ et Apostoli ita testimonia protulerint, ut Judæi postea falsaturi erant." In spite of this important testimony, there were not wanting some who renewed the old charge. Foremost

among them were Isaac Vossius, W. Whiston, J. Morinus, etc., who again were refuted by Carpzov, De Muis, Teggler, Boote, Cocceius, Grabe, Frigland, Bellarmine, R. Simon, Glassius, Capellus, and a host of others, who, examining the question *sine studio et ira*, were not apt to let their sober reason run astray.

There are two or three places in which the charge of intentional corruption has a plausible appearance, viz. Psa. xvi, 10; xxii, 17; and Zech. xii, 10; but, without entering upon an examination of these passages, as beyond the province of this article, we may state that a close examination proves the folly of the charge.

With regard to the other classes of alterations arising from a well-meaning desire on behalf of the text, we see no good reason to doubt that readings apparently easier or less objectionable were occasionally substituted for others; that supposed mistakes were rectified; places, where something appeared to be wanting, filled up; and passages made conformable to parallel ones. Examples of this kind are found in Gen. ii, 2, where, for השביעי, the Samaritan, Sept., and Syriac have הששי; Numb. xxvii, 7, where, instead of אביהם, various MSS. with the Samaritan read אביה with the feminine suffix; Judg. xviii, 30, where, for בשה, was put מנשה; 1 Chron. ii, 48, where, for יכלר, several MSS. read יכלה in the feminine; Psa. xxxvi, 2, where, for לבב, many MSS. and versions read לבב. In like manner במוזר, in Dent. xxiii, 2, was separated into בים; and לבו, in Psa. xxviii, 8, was changed in some MSS. into לבב, the latter taken, perhaps, from xxix, 11.

After all, it must appear that all readings must be ascribed to purely accidental causes, such as have been enumerated above. See KERI AND KETHIB. (B. P.)

Varisus is the name of a supposed early heretic, mentioned by Ittigius (*De Hæresiarchis*, iii, 1, Appendix xii) as being named in an anonymous commentary on St. Matthew. It is thought the true reading is *Burjesu*, and that the person intended is Elymas the sorcerer, who is so called in Acts xiii, 6. See Burton, *Bampton Lectures*, p. 495.

Varlet, DOMINIQUE MARIE, a French prelate, was born in Paris, March 15, 1678. His father, who eventually became a hermit of Mount Valerian, had early destined him for the Church, and he entered the seminary of St. Magloire, where in 1706 he received ordination and the diploma of doctor. He served soon after as curate of Conflans-Charenton; but, becoming attached to the doctrines of the Port-Royalists, he opposed the bull *Unigenitus*, and in consequence left for America in 1711, where he instructed the inhabitants of Louisiana. He was recalled to Europe, and appointed bishop of Ascalon and coadjutor of the bishop of Babylon (Sept. 17, 1718); and after consecration (Feb. 19, 1719) he sailed from Amsterdam, crossed Russia, and took up his residence at the court of Persia, in Hamadan. He was soon deposed by the pope, however; and after settling in Amsterdam (1720) he finally appealed from the bull of the pope (Feb. 15, 1723), but, nevertheless, gave ordination to four recusant ecclesiastics at Utrecht, publishing in his defence his *Apologies* (Amst. 1724–27). He died at Rhyndael, near Utrecht, May 14, 1742. See Hoefler, *Nouv. Biog. Générale*, s. v.

Varnell, JONAS M., a minister in the Methodist Episcopal Church, South. No record of his birth or early life is preserved. He was converted in 1847, received into the Holston (East Tenn.) Conference in 1849, and labored with zeal and fidelity until his death, in 1857. Mr. Varnell was a devout, energetic young man. See *Minutes of Annual Conferences*, M. E. Church, South, 1857, p. 753.

Varotari, ALESSANDRO (*Il Padovano*), an eminent Italian painter, was born at Padua in 1590. He received instruction in painting, and began in childhood

to study and imitate the works of Titian, which were at Padua. He was sent, while young, to Venice, where he continued the study of Titian so assiduously as to be considered among the foremost of his disciples. His pictures abound in Venice and Padua, but are rarely met with elsewhere. The principal are, *The Dead Christ* (now at Florence):—*The Supper at Cana*, in the chapter of La Carità at Venice;—four histories of the life of *S. Domenico*. He died in 1650. See Spooner, *Biog. Hist. of the Fine Arts*, s. v.

Varro, MARCUS TERENCE, a learned Roman antiquarian, was born in the Sabine town of Reate, B.C. 116. He was descended from an ancient family of senatorial rank, and was first instructed by L. Ælius, afterwards by Antiochus, an Academic philosopher. Varro was very prominent in the political history of his time, adhering to the cause of Pompey, and performing the duties of general in Spain. He withdrew from public life after the defeat of Pompey, and was reconciled to Caesar. He was one of the most extraordinary men that ever lived; said to be the most learned of the Romans. His learning extended to almost every department of knowledge. His writings embraced grammar, rhetoric, poetry, geography, history, philosophy, jurisprudence, and husbandry, amounting in all to 74 different works, containing 620 books, 170 of which were in metrical form. Only two of his works remain, *De Lingua Latina* and *Rerum Rusticarum Libri III.* Augustine (*De Civitate Dei*, lib. vii) gives an account of his book on *Antiquities*, with copious extracts. Varro distinguished three kinds of religion—*mythical*, which the poets chiefly use; *physical*, which the philosophers use; and *civil*, which peoples use. He spoke in positive disapproval of the myths and legends of the popular faith. Augustine says he went as far as he dared in that direction. The natural philosophy in the various schools he describes without censure. Civil theology, or that ordained by the State, is minutely described and commended. Varro died B.C. 27. See Ueberweg, *Hist. of Philos.* i, 189; Fisher, *Beginnings of Christianity* (N. Y. 1877), p. 128; Smith, *Diet. of Class. Biog.* s. v.

Vartabeds, an order of celibate priests in the Armenian Church (q. v.), who are attached to the churches as preachers (the married priests do not usually preach), and from among whom the bishops and higher clergy are taken. It is a degree of honor corresponding very nearly to our doctor of divinity, and is given with the same solemnity as holy orders.

Varty, JOHN, an English Congregational minister, was born in London, Nov. 29, 1798. He was educated at Hoxton Academy, and ordained at Mitcham, Surrey, in 1823. In 1839 he accepted an invitation to the Church at Fareham, and for twenty-three years faithfully labored with that people. Mr. Varty was a decided and earnest Christian, and a man of strong piety and large Christian influence. He died April 16, 1873. See (Lond.) *Cong. Year-book*, 1874, p. 358.

Varuna, in Hindû mythology, is one of the highest and most powerful of the gods, yet one of the most vague and least known of all deities. In the Vedas this divinity is often confounded with Indra and Agni. See Lenormant, *Chaldean Magic*, p. 131; Müller, *Chips from a German Workshop* (see Index).

Varus, P. QUINTILIUS, proconsul of Syria for several years (between B.C. 13 and A.D. 7), after Sentius Saturninus, an office which he administered with such rapacity that Velleius Paterculus says of him (ii, 117), "As a poor man he entered the rich country, and as a rich man he left the country poor." Some of his governmental acts are rehearsed by Josephus (*Life*, 11; *Ant.* xvii, 5 sq.; *War*, i, 21, 5; ii, 3, 1; 5, 2). He subsequently sustained a notable defeat in Germany. See Smith, *Diet. of Class. Biog.* s. v. See GÖRNER.

Vas (or De Vas), PÉTRUS, a Dutch minister of the Reformed Church, born about 1658. He is mentioned

as a candidate at Gravelant, Holland, in 1699; pastor at Kingston, N. Y., from 1710 to 1756; and often officiated at Rhinebeck, having organized that Church. See Corwin, *Manual of the Reformed Church in America*, s. v.

Vasa, GUSTAVUS. See GUSTAVUS I (VASA).

Vasari, GIORGIO, an Italian author and painter, was born at Arezzo, in Tuscany, in 1512. He studied art, architecture, and painting practically; became the pupil and friend of Michael Angelo; and obtained the patronage of such distinguished persons as cardinal Ippolito de' Medici, pope Clement VII, and the dukes Alessandro and Cosmo de' Medici. He painted numerous works in various parts of Italy, among them several noted pictures in the Palazzo Vecchio in Florence, and in the Sala Regia in the Vatican. As an architect Vasari attained greater excellence than as a painter. He built the church of Abbadia in Arezzo; a great part of the palace of Julius III at Rome; and the Palazzo Uffizi in Florence, commenced in 1561 and completed, after his death, by Alfonso Parigi. This last is considered by critics to be his best architectural work. Many other buildings and parts of structures are ascribed to him; and he was chiefly instrumental in re-establishing the Florentine Academy of Design. He died in Florence, Jan. 27, 1574. As a writer on art Vasari attained considerable celebrity. He entered upon his work at the suggestion of cardinal Farnese, and subsequently enlarged the scope and plan of his book. It is entitled *Vite de' più Eccellenti Pittori, Scultori, e Architetti*, and was first published in Florence in two volumes (1550). In 1556 he undertook a new tour to prepare materials for a second edition, which appeared in 1568. Several subsequent editions appeared from time to time, a recent one in Florence, in thirteen volumes (1846-57). It has been translated into English and published in Bohn's Standard Library. See Spooner, *Biog. Hist. of the Fine Arts*, s. v.

Vase. See BASIN; BOTTLE; BOWL; CHALICE; CUP; URN, etc.

Vasey, THOMAS (1), was an orphan ward of a wealthy and childless uncle, who disowned him on Vasey's becoming a Methodist. He began his ministry in 1776; travelled in the Dales in 1782, Liverpool in 1783; and in 1784 he was ordained a presbyter of the Church of England by Wesley, and sailed with Dr. Coke to America, where he shared the toils and perils of Francis Asbury. He was here ordained by bishop White, and afterwards returned to England, and, with Wesley's consent, accepted a curacy. In 1789 he resumed the itinerant work, and continued therein until 1811, when he was appointed to perform the liturgical services in the City Road Chapel. In 1826, with a pension from the trustees, he retired to Leeds, where he died very suddenly, Dec. 27, 1826, in his eighty-first year. See Stevenson, *Hist. of City Road Chapel* (Lond. 1872, 8vo), p. 152; *City Road Magazine*, 1871; *Wesl. Meth. Mag.* 1827, p. 142; May, 1830 (portrait); Stevens, *Hist. of Methodism*, iii, 467; *Hist. of Meth. Episc. Church*, ii, 155, 166; Smith, *Hist. of Wesl. Methodism* (see Index, vol. iii).

Vasey, THOMAS (2), an English Wesleyan minister, was born in 1779. He was converted in 1794; commenced to preach in 1801 at Barrow and Epworth; was ordained in 1804; labored, among others, on the Sunderland, Whitby, Darlington, and Colne (1815) circuits. He died of inflammatory fever, May 5, 1818. Many were converted through his earnest and godly ministry. See *Wesl. Meth. Mag.* 1820, p. 401, 481.

Vash'ni (Heb. *Vashni'*, וַשְׁנִי, *my strength, or strong*; Sept. *Savi*; Vulg. *Vasseni*), the first-born of Samuel according to 1 Chron. vi, 28 [Heb. 13]; but 1 Sam. viii, 2 shows that the true reading should be וַשְׁנִי, "the second," and that the name of Joel, the eldest son, has dropped out. See SAMUEL.

Vash'ti (Heb. *Vash'ti'*, וַשְׁתִּי, Pers. *beautiful woman*).

an; Sept. Ἀστίρ; Josephus Οὐάσση; Vulg. *Vasthā*), the "queen" (הַמַּלְכָּה) of Abasuerus (Xerxes), who, for refusing to show herself to the king's guests at the royal banquet, when sent for by the king, incurred his wrath, and was repudiated and deposed (Esth. i), when Esther was substituted in her place. B.C. 483. Many attempts have been made to identify her with historical personages; as by Usher with *Atossa*, the wife of Darius Hystaspis, and by J. Capellus with *Parysatis*, the mother of Ochus; but, as was said of Esther (like the "three-score queens" in Cant. vi, 8, 9; comp. Herod. i, 135), it is far more probable that she was only one of the inferior wives, dignified with the title of queen, whose name has utterly disappeared from history. See ESTHER. This view of Vasthi's position seems further to tally exactly with the narrative of Abasuerus's order, and Vasthi's refusal, considered with reference to the national manners of the Persians. For Plutarch (*Conjug. Precept.* c. 16) tells us, in agreement with Herod. v, 18, that the kings of Persia have their legitimate wives to sit at table with them at their banquets; but that, when they choose to riot and drink, they send their wives away and call in the concubines and singing-girls. Hence, when the heart of Abasuerus "was merry with wine," he sent for Vasthi, looking upon her only as a concubine; she, on the other hand, considering herself as one of the *κουρῆαι γυναῖκες*, or legitimate wives, refused to come. Josephus's statement (*Ant.* xi, 6, 1) that it is contrary to the customs of the Persians for their wives to be seen by any men but their own husbands is evidently inaccurate, being equally contradicted by Herodotus (v, 18) and by the book of Esther itself (v, 4, 8, 12, etc.).—Smith.

Vasishtha (superlative of Sanscrit *vasumat*, "wealthy") is the name of one of the most celebrated Vedic Rishis, the author of several hymns of the Rig-veda, and a personage important in the early history of the Brahmanic or priestly caste of the Hindūs. All that is certainly known of him is that he was a sage of high reputation, and a priest jealous of the privileges and the position of his caste, and ever ready to assert its superiority over the second, or military and royal, caste. See Muir, *Original Sanscrit Texts* (Lond. 1858); Müller, *Chips from a German Workshop*.

Vasquez, Alonso, a Spanish painter, was born at Ronda about 1589. He studied at Seville under Antonio Arrian, and acquired considerable reputation as a historical painter. His principal works are in the monastery of the Barefooted Carmelites at Seville. He died about 1645. See Spooner, *Biog. Hist. of the Fine Arts*, s. v.

Vasquez, Dionysius, a Spanish monk, was born June 5, 1500, at Toledo. He was a very learned man, and one of the who undertook the edition of the *Biblia Complutensis*, which cardinal Ximenes proposed. He died June 1, 1539. His writings, in Latin and Spanish, are mostly in MS. See Antonii *Biblioth. Hispanica*; Gandolphus, *De 200 Scriptoribus Augustinianis*; Jöcher, *Allgemeines Gelehrten-Lexikon*, s. v. (B. P.)

Vasquez, Gabriel, a Spanish Jesuit, was born in 1551 at Belmonte. For twenty-nine years he was professor at Alcalá, where he died, Sept. 23, 1604. He wrote, *Commentt. in Epp. Pauli*:—*Comment. in Th. Aquinatis Theologiam*:—*Metaphys. Disquisitionum de Cultu Adorationis Libri Tres* (Mayence, 1600). His works were published in 10 vols. fol. (Lyons, 1620). See Antonii *Biblioth. Hispanica*; Allegambe, *Bibliotheca Scriptorum Societatis Jesu*; Jöcher, *Allgemeines Gelehrten-Lexikon*, s. v. (B. P.)

Vasquez, Juan Bautista, a Spanish painter and sculptor, was born at Seville in the 16th century. His best painting is a picture of the *Virgin and Infant*, at the altar of the Church of Our Lady of Granada. See Spooner, *Biog. Hist. of the Fine Arts*, s. v.

Vassar, John E., a missionary colporteur of the

American Tract Society, commonly called "Uncle John Vassar." For many years he was foreman in the great brewery of his cousin Matthew Vassar, the founder of the college at Poughkeepsie which bears the family name. John was converted about the year 1813, when he rejected an offer of large wealth from his cousin and entered vigorously into the temperance reform movement. He was among the first colporteurs the Tract Society sent to the then Far West. He began his labors about 1848 in the wilderness of Illinois, and he continued in that capacity, with slight interruption, until his death. He had a peculiar fitness for his work. Thoroughly armed with Gospel texts, and full of earnestness and unselfish love, he pressed the truth upon all; and he was almost invariably received with kindness by all. He was equally at home among cultured families, from Boston to San Francisco, as among other classes—farmers, mechanics, lumbermen, miners, soldiers, and freedmen. He was specially useful in the late war; among whole brigades of soldiers in the army he was "Uncle John," loved and honored by all. He not only held religious meetings, but he did hospital duty, dug graves for the dead, and then performed religious services and communicated with the relatives of the deceased. Once he was taken a prisoner of war; but, to escape his ceaseless religious importunity, he was soon set at liberty. His labors were instrumental in the conversion of multitudes. Vassar College is a monument worthy of the memory of its founder; but more enduring is the monument of the noble Christian deeds that marked the life of this honored and successful missionary. He died at his home in Poughkeepsie, Dec. 6, 1878. (W. P. S.)

Vassar, Matthew, a well-known layman of the Baptist denomination, and founder of the college for females which bears his name, was born in East Dereham, Tuddenharn Parish, County of Norfolk, England, April 29, 1792. In 1796 his father came to America, and took up his residence at Wappinger's Creek, near Poughkeepsie, N. Y., where he established a brewery. The enterprise did not prove successful, and, after various reverses of fortune, he became a farmer, in a small way, in the vicinity of Poughkeepsie. The subject of this sketch, then quite young, commenced the manufacture of ale on a small scale. The business grew on his hands, until at last it reached such proportions as surpassed the most sanguine expectations of Mr. Vassar. For fifty years, until 1866, he continued in this business and accumulated a large fortune. His mind was now much occupied with the question as to the best disposition he should make of his great gains. He concluded to establish a college for females where the opportunities for obtaining an education should be equal to those furnished for males. In 1861 he procured from the New York Assembly a charter for Vassar College, and in February of that year he conveyed to the board of trustees bonds and securities to the amount in cash value of four hundred and eight thousand dollars to be used for the purposes of the college. He also gave the grounds on which the college was built. The college was opened in 1865, and from the beginning has been largely patronized. The gifts of its founder continued to be bestowed as the necessities of the new institution demanded until they reached the munificent sum of over eight hundred thousand dollars. While addressing the trustees at the anniversary of the opening of the college, Mr. Vassar died, June 23, 1868. See Appletons' *Annual Cyclop.* viii, 755. (J. C. S.)

Vassilacchi, ANTONIO (*L'Aliense*, or *Aliense da Milo*), a painter, was born in the island of Milo, in the Grecian Archipelago, in 1556. He was sent to Venice when quite young, and placed under the instruction of Paul Veronese, with whom he made such progress and revealed such genius as to excite the jealousy of his master, who dismissed him from the studio with the advice that he should confine himself to small paint-

ings. Suspecting the cause of his dismissal, and confident in his own powers, the young artist redoubled his efforts to attain excellence. He acquired great distinction, was patronized by the doge and principal nobility of Venice, was invited to the court of Spain by Philip II, and Sigismund, king of Poland, earnestly solicited him to enter his service; but he declined these honors and remained in Venice. He executed many works for the churches and other public buildings of Venice and in other Italian cities. Among his best productions are, *Abraham Sacrificing Isaac*:—*Cain Slaying Abel*:—the *Brazen Serpent*, in the Church of the Holy Apostles:—and the *Destruction of Troy*, in the Sala della Scrutino. He died at Venice in 1629. See Spooner, *Biog. Hist. of the Fine Arts*, s. v.

Vassor, MICHEL LE, a French theologian and historian, for a number of years a member of the Priests of the Oratory, went to England in 1695, where he died in 1718, after having joined the Protestant Church. He is the author of *Traité de la Manière d'Examiner les Différences de la Religion* (Amst. 1697). See Winer, *Handbuch der theol. Literatur*, i, 341, 668; Fürst, *Bibl. Jud.* iii, 469. (B. P.)

Vassy, MASSACRE OF. Vassy is a town of France in Haute-Marne, on the Blaise, twenty-eight miles north-northwest of Chaumont, and is celebrated for the massacre of the Protestants by order of Guise. On Sunday morning, March 1, 1562, the Duke of Guise, with a retinue of nobles and soldiers, arrived at Vassy, on his way to Paris. The Protestants were holding their meeting in a large barn, to which the duke sent some of his soldiers, who provoked a conflict. The rest of the soldiers came to their aid, broke open the door, slaughtered a large number of the defenceless congregation, and plundered their houses. After this bloody deed, the duke was received at Paris with acclamations, while the Protestants throughout France considered it a wanton and atrocious violation of the Religious Peace, and flew to arms, inaugurating a series of wars which only terminated with the accession of Henry IV to the throne. See Fisher, *Hist. of the Reformation* (N. Y. 1873), p. 267 sq.

Vat. See WINE-FAT.

VAT, a cistern or vessel; a term frequently found in the inventories of religious houses.

VAT FOR HOLY WATER, a vessel for holding holy water (q. v.).

Vatable (*Vatblé*, *Vastebled*, *Guastebled*), FRANÇOIS, a learned Frenchman, was a native of Gamache, in Picardy, and served as pastor of Bramet, in Valois, until Francis I made him professor of Hebrew in the newly founded Collège Royal at Paris. He was abbé of Bellozane when he died, March 16, 1547. His learning was comprehensive and his delivery attractive. He may be considered the restorer of the study of Hebrew in France. He wrote nothing for publication. A Latin version of the *Parva Naturalia* made by him is appended to Duval's edition of Aristotle; and Robert Stephens printed notes on the Old Test. said to be by Vatable, which obtained considerable fame. The notes, however, correspond in part with those of Calvin and other Protestant writers, and were condemned as heretical by the doctors of the Sorbonne, thus involving both Stephens and Vatable in trouble. Stephens's Bible, alleged to be by Vatable, contained the Vulgate, Leo Juda's translation, and the notes already mentioned, and appeared in a first edition in 1545, 8vo, and in a second edition in 1547, folio. The latest edition is that of Nicholas Henry (Paris, 1729-45, 2 vols. fol.). Stephens published a separate edition of the book of Psalms with yet more extended notes (Geneva, 1556 sq.), from which G. J. B. Vogel republished them, together with those of Grotius (Hal. Magd. 1767, 8vo), and they were again reprinted in the *Critici Sacri*. They are characterized by special regard for the grammar and

idioms of the Hebrew language. See the *Biographie Universelle*, lxxvii, 569 sq.; Jöcher, *Gelehrten-Lexikon* (Col. 1466), vol. iv. The latter refers to Adam, *Vite Eruditiorum*; Samarthan, *Elogia Gallorum*; Teissier, *Eloges des Savans*; and Blount, *Censura Celeberrimorum Auctorum*, as his sources. — Herzog, *Real-Encyclop.* s. v.

Vater, JOHANN SEVERIN, a German doctor and professor of theology, was born May 27, 1771, at Altenburg. He studied theology at Jena, but more especially Oriental languages. From 1792 to 1794 he studied classical philology under Wolf at Halle, and was promoted in 1794 as doctor of philosophy. In 1796 he commenced lecturing as privat-docent at Jena, was made professor of Oriental languages in 1798, and was called to Halle in 1800 as professor of theology and Oriental languages. When this university was abandoned in 1810, he went to Königsberg, to return again to Halle in 1820, where he died, March 15, 1826. Vater belonged to the rationalistic school, and his work on the Pentateuch is deeply tainted by rationalistic influences; but his works deserve notice for their learning. He published, *Hebr. Sprachlehre* (Leips. 1797; 2d ed. 1812): — *Kleinere Hebr. Sprachlehre* (ibid. 1798; 3d ed. 1816): — *Hebr. Lesebuch* (ibid. 1799; 2d ed. 1809): — *Handbuch der hebr., syr., chald., und arab. Grammatik* (ibid. 1802; 2d ed. 1817): — *Arab., syr., und chald. Lesebuch* (ibid. 1802): — *Commentar über den Pentateuch* (Halle, 1802-5, 3 pts.): — *Amosi Oracula* (ibid. 1810): — *Lectio-num Versionis Alexandrinæ Jobi nondum satis Examinatarum Specimen* (Königsberg, 1810): — *Synchronistische Tafeln der Kirchengeschichte* (Halle, 1803; 6th ed. by Thilo, 1833): — *Kirchengeschichte des 18. und 19. Jahrhunderts* (Brunswick, 1823 sq., forming pts. v-viii of Henke's *Kirchengeschichte*): — *Anbau der neuesten Kirchengeschichte* (Berl. 1820-22, 2 vols.). See *Theolog. Universal-Lexicon*, s. v.; Niemeyer's biography of Vater appended to the 5th ed. of the *Synchronist. Tafeln* (1828); Fürst, *Bibl. Jud.* iii, 469; Steinschneider, *Bibl.ogr. Handbuch*, s. v.; Winer, *Handbuch der theol. Literatur*, i, 45, 100, 115, 197, 218, 223, 226, 370, 388, 406, 537, 544, 581; ii, 23, 326, 814. (B. P.)

Vatès is a term used among the ancient Romans with the double signification of *poet* and *prophet*, the two being regarded as identical. By a law of Constantius in the *Theodosian Code*, they were reckoned among those who practice forbidden arts, such as soothsayers, astrologers, augurs, and magicians, and were condemned to die as guilty of a capital crime and offence against religion. See Bingham, *Christ. Antiq.* bk. xvi, ch. v.

Vatican, the papal palace at Rome, so called from its situation on the Mons Vaticanus, at the extreme north-western part of the city. It is an immense pile of buildings, composed of parts constructed at different times, and often without due regard to the harmony of the entire structure. There existed a palace adjoining the basilica of St. Peter's probably as early as the time of Constantine, but certainly in the 8th century. In the 12th century this palace was rebuilt by Innocent III, and in the following century it was enlarged by Nicholas III. It became the papal residence on the removal of the see from Avignon to Rome in 1377, when Gregory XI adopted it as the pontifical palace on account of its greater security over the Lateran (which had been the residence of the popes for one thousand years) by the nearness of the Castle of St. Angelo. John XXIII increased this security by building a covered gallery connecting the palace with the castle. Nicholas V, in 1450, began to improve it on a magnificent scale, but died before completing his design. Alexander VI finished the older portion of the edifice nearly as we now see it. No part of the palace except the private chapel of Nicholas V, called the Chapel of San Lorenzo, is older than the time of Alexander VI (1492-1503). The part constructed by Alex-

under VI is known as the Old Palace, in distinction from the later works. To this structure Sixtus IV, in 1474, added the Sixtine Chapel. Innocent VIII, about 1490, erected the villa Belvedere, and Julius II (1503-13) connected it with the palace by the celebrated *Loggia* and a terraced court. In the gardens of the Belvedere, Julius laid the foundations of the Vatican museum. After the death of Julius, Leo X completed the *Loggia* under the direction of Raphael. Paul III built the *Sala Regia* and the Pauline Chapel (1534). Sixtus V, near the close of the 16th century, began, and Clement VIII carried to completion, a new and more imposing palace on the eastern side of the court of the *Loggia*, which is now the ordinary residence of the pope and is by far the most conspicuous of all the Vatican buildings. Numerous alterations and improvements were made by succeeding pontiffs. Urban VIII (1623-41) had the celebrated staircase, *Scala Regia*, constructed from designs by Bernini. Clement XIV (1769-74) and Pius VI (1775-99) built a new range of apartments for the Museo Pio-Clementino. Pius VII (1800-23) added the Braccio Nuovo, running parallel with the library. Leo XII (1823-29) began a series of chambers for the gallery of pictures. Gregory XVI (1831-46) completed these and placed the Etruscan Museum in its present position. Pius IX (1846-77) enclosed the *Loggia* in glass, removed the gallery of pictures to the upper part of the palace, erected the magnificent stairs leading to the state apartments, and decorated the apartments formerly occupied by the pictures with frescoes to serve as reception-rooms for ladies. It will be seen from this account that the Vatican is rather a collection of separate buildings than one regular structure. It occupies a space 1151 by 767 feet, and has 8 grand staircases, 200 smaller ones, 20 courts, and 4422 rooms.

The *Scala Regia*, the great staircase by Bernini, consists of two flights; the lower decorated with Ionic columns, and the upper with pilasters. It leads from the extremity of the right-hand portico of Bernini to the *Sala Regia* built during the pontificate of Paul III, as a hall of audience for the ambassadors, and covered with frescos illustrating various events in the history of the

popes. It also serves as an ante-hall to the Sixtine and Pauline chapels.

The *Capella Sistina*, or *Sixtine Chapel*, is a lofty oblong hall, 146½ feet long by 50½ wide, and decorated with a series of frescos representing the principal events in Scripture history. It also contains, on the end wall opposite the entrance, the great fresco *The Last Judgment*. Near the Sixtine Chapel is the *Capella Paolina*, which is only used in great ceremonies, chiefly during Holy Week. It is noted for two frescos by Michael Angelo, *The Conversion of St. Paul* and the *Crucifixion of St. Peter*. The great hall leading from the *Sala Regia* to the *Loggia di Bramante* is called the *Sala Ducale*, formerly used by the popes for giving audience to princes, now used for holding the public consistories when the newly created cardinals are admitted into the sacred college.

The *Museum* is entered at the extremity of the lower *Loggia*, to the left on leaving the *Sala Ducale*. It contains numerous apartments. The *Gallery of Inscriptions* is a corridor 690 feet in length, containing upwards of 3000 specimens of ancient sepulchral inscriptions and monuments. At the extremity of this gallery is the *Museo Chiaramonti*, which constitutes the second division of the gallery, and, exclusive of the *Braccio Nuovo*, or new wing, contains more than 700 specimens of ancient sculpture, arranged in thirty compartments. The *Braccio Nuovo* was erected by Pius VII in 1817, and is a fine hall 260 feet in length, and well lighted from the roof. In this hall are to be seen the famous statue of *Augustus the Athlete* and many others. The *Museo Pio-Clementino*, so called from Clement XIV and Pius VI, from whom it received its most important accessions, is the most magnificent museum of ancient sculpture in the world. It contains the collections formed by Julius II, Leo X, Clement VII, and Paul III. In this museum may be named, among others, the following apartments: *Round Vestibule*, *Hall of Melager*, *Cortile di Belvedere*, *Hall of the Animals*, *Gallery of Statues*, *Hall of the Muses*. The *Gallery of the Candelabra* is a fine hall about 300 feet long, erected by Pius VI, and derives its name from several ancient candelabra placed in it. It is situated on the upper floor. The *Etruscan Museum*, or *Museo Gregoriano*, so called from its found-

er, Gregory XVI, is devoted to the preservation of the Etruscan antiquities accumulated by his predecessors, and is very rich in specimens belonging to this department. The *Egyptian Museum* is entered from the Museo Chiaramonti, and contains Egyptian antiquities of great interest. From the Gallery of the Candelabra we reach the *Arazzi*, or *Tapestries of Raphael*. Then comes the *Gallery of the Maps*, a fine hall 500 feet long, and celebrated for its series of maps of Italy and its islands, painted for Gregory XIII (1572-85). The *Stanza of Raphael* are a series of four chambers opening out of the second range of Loggie, so called from the fact that the great life-work of Raphael was the decoration of their walls. The chambers are called respectively, *Stanza of the Incendio del Borgo*, *Camera della Segnatura*, *Stanza of Heliodorus*, *Sala of Constantine*.

The *Capella di San Lorenzo*, built by Nicholas V as his private chapel, is interesting for its frescos by Fra Angelico da Fiesole; it is also interesting as being the only decorated portion of the Vatican older than the time of Alexander VI. The *Pinacoteca*, or *Gallery of Pictures*, contains a small number (less than fifty) of pictures; but they are among the rarest treasures of art to be found in the world. The *Transfiguration*, the *Madonna da Foligno*, and the *Communion of St. Jerome* may be mentioned as examples of these rare works.

The *Library* was founded by Nicholas V (1447), by transferring to his new palace the MSS. which had been collected in the Lateran; and, at his death, it is said to have contained 9000 MSS. In 1600 there were 10,660 MSS., of which 8500 were Latin and 2160 Greek. It received important accessions in 1621, presented by duke Maximilian of Bavaria; in 1658, the library of Urbino; in 1690, the collection of Christina, queen of Sweden; in 1746, the library of the Ottobuoni family. The Vatican Library is one of the most valuable in the world, though not very large as compared with many others. There are 23,580 MSS. and 30,000 volumes.

Vatican Council, the nineteenth and last œcumenical council of the Roman Catholic Church, assembled in the Vatican at Rome Dec. 8, 1869, and continued nearly a year. It was called by pope Pius IX., in the twenty-third year of his pontificate, by an encyclical dated June 29, 1868. The attendance was larger than on any previous council. At the opening there were 719 prelates from all parts of the globe, including 49 cardinals, 9 patriarchs, 4 primates, 121 archbishops, 479 bishops, 57 abbots and generals of monastic orders. This number afterwards increased to 764; but after the outbreak of the Franco-Prussian war it dwindled down to less than 200. The whole number of prelates invited and entitled to a seat in the council was 1037. Of those present a large majority were Italian, while the French and German were least in number, although strongest in learning and importance of the dioceses they represented. The deliberations of the council were conducted in strict secrecy, and the results solemnly proclaimed in *four* public sessions. The proceedings were made public only through information obtained from members of the council by their friends.

The management of the council was entirely in the hands of the pope and his cardinals and advisers. The proceedings were entirely in Latin, the official language of the Roman Catholic Church. The subjects for consideration were classified under four heads, or divisions, and each division assigned to a *congregatio*, or commission, of twenty-six prelates, presided over by a cardinal appointed by the pope. The divisions were *faith, discipline, religious orders, and rites*. The decrees were prepared by a commission of the most eminent prelates and theologians of the Catholic world, previous to the assembling of the council, in the form of *schemata*, or programmes; and on the basis of these the different commissions presented decrees for the adoption of the council. These were discussed and adopted in secret session and the results proclaimed publicly.

The chief object of the council was to protest against

modern infidelity and settle the question of papal infallibility (q. v.). The first two public sessions were held Dec. 8, 1869, and Jan. 6, 1870. The third was held April 24, 1870, and it was here that the "decrees on the dogmatic constitution of the Catholic faith" were unanimously adopted. These decrees are directed against modern rationalism, pantheism, materialism, and atheism, and proclaim the orthodox doctrine of God, the creation, and the relations of faith and reason. At the fourth "solemn session," which was held July 18, 1870, the "decrees on the dogmatic constitution of the Church of Christ" were adopted with two dissenting voices. These decrees set forth the doctrine of papal absolutism and infallibility, and caused much discussion and the departure of a number of bishops before the public vote. The council was adjourned and indefinitely postponed Oct. 20, 1870, on account of the Franco-Prussian war, and the occupation of Rome by Italian troops.

Vatican Hill. See ROME.

Vatican Manuscript (1) (CODEX VATICANUS, designated as B) is one of the oldest and most valuable MSS. of the Greek Testament, numbered 1209 in the library of the Vatican at Rome, where it seems to have been brought shortly after the establishment of the library by pope Nicholas V (who died in 1455); but nothing is known of its previous history. It is a quarto volume of 146 leaves, bound in red morocco, ten and a half inches high, ten broad, and half an inch thick. It once contained the whole Bible in Greek, i. e. the Old Test. of the Sept. version, excepting Gen. i-xlvi (the MS. begins at πᾶν, Gen. xlvii, 8), and Psa. cv-ccxxvii, together with the New Test., complete down to Heb. ix, 14, καὶ α; the rest of the Epistle to the Hebrews, the four Pastoral Epistles (the Catholic Epistles had followed the Acts), and the Apocalypse being written in a later hand. The MS. is on very thin vellum; the letters are comparatively small and regularly formed; three columns are on each page (except in some of the poetical parts of the Old Test., which are written stichometrically, and with but two columns); each column contains about forty-two lines, and each line from sixteen to eighteen letters, with no intervals between the words, a space of half a letter being left at the end of a sentence, and a little more at the conclusion of a paragraph. It has been doubted whether any of the stops are by the first hand; and the breathings and accents are now generally allowed to have been added by a second hand. This hand, apparently about the 8th century, retraced, with as much care as such an operation would admit, the faint lines of the original writing (the ink whereof was, perhaps, never quite black), the remains of which can even now be seen; and, at the same time, the reviser left untouched such words or letters as he wished, for critical purposes, to reject, and these still express the original condition of the MS., being unaccented. The initial capitals are also due to the later hand, being in blue or red, as also the broad green bar surmounted with three red crosses at the head of each book. Fewer abridgments than usual occur. The form of the letters points to the 4th century as the date of the MS.

The Gospels contain neither the Ammonian sections nor the Eusebian canons, nor yet the larger chapters; but they are divided into numbered *sections*; Matthew having 170, Mark 61, Luke 152, and John 80. Those in the Acts and Catholic Epistles differ from the Euthalian, and amount to 79. Paul's Epistles are treated as one book, the sections running on continuously. Thus, the last section in Galatians is numbered 58, and Ephesians begins with 70 (showing an omission of 11 sections); but after 2 Thessalonians (the last division of which is marked 93), Hebrews begins with section 59, showing that it once occupied the above gap between

Specimen of the *Codex Vaticanus* (containing *Psa. i, 1-3*: μακάριος ἀνὴρ ὃς οὐκ ἐπορεύθη ἐν βουλῇ ἀσεβῶν | καὶ ἐν ὁδῷ ἀμαρτωλῶν οὐκ ἔστη | καὶ ἐπὶ καθεδρᾶν λοιμῶν οὐκ ἔκεισε | ἄλλ' ἢ ἐν τῷ νόμῳ καὶ τῷ ἐγγύματι αὐτοῦ | καὶ ἐν τῷ νόμῳ αὐτοῦ μελέτησε | ἡμέρας καὶ νυκτὸς | καὶ ἔσται ὡς τὸ ἔξυλον τὸ πεφύτευ), taken from Sylvestre's fac-simile, No. 60, to the imperfection of which some of the errors in spelling and punctuation are probably due.

Galatians and Ephesians (it now ends with section 64, the last four and a half chapters, which are lost, having made up the rest).

The jealousy and illiberality of the papal authorities have greatly obstructed the public knowledge of this valuable MS. Imperfect collations were early made by Bartolucci, two for Bentley (by Mico and Rulotta), and again by Birch. Tischendorf, Tregelles, and other scholars were unable to secure the privilege of more than a brief inspection of the MS. At length cardinal Mai prepared the New Test. in several forms, which were published after his death (ed. Vercellone, 1857, 4 vols. 4to; 1859, 8vo); but so imperfectly and uncritically that no good representative existed until Tischendorf's revision (Leips. 1867, 8vo). In 1868, however, the Roman government itself undertook a splendid edition of the New Test. portion, with so-called fac-simile type (originally cast for Tischendorf's ed. of the *Cod. Sin.*), followed by a similar edition of the Old Test. portion in 4 vols. 4to. See Tregelles, in *Horne's Introd.* new ed. iv, 158 sq.; Scrivener, *Introd. to the New Test.* p. 84 sq.; Schulz, *De Cod. Vat.* (Lips. 1827); *Brit. Quar. Rev.* Oct. 1858; *Brit. and For. Evang. Rev.* Jan. 1859; *Christian Remembrancer*, April, 1859; *Stud. u. Krit.* 1860, iii. See MANUSCRIPTS, BIBLICAL.

VATICAN MANUSCRIPT (2) (*Codex Vaticanus*) is also the conventional designation of the Greek MS. 354 of the four gospels in the Vatican Library, usually denoted as S. The subscription says that it was written by Michael, a monk, in the year 949. It is a folio of two hundred and thirty-four leaves, written in large, oblong, or compressed uncials. The Epistle to Caspianus and the canons of Eusebius are prefixed, and it contains many later corrections and marginal notes. Birch collated it with considerable care, and Tischendorf and Tregelles cursorily inspected it. See Tregelles, in *Horne's Introd.* iv, 202; Scrivener, *Introd. to the N. T.* p. 115. See MANUSCRIPTS, BIBLICAL.

Vaticānus, also Vagitānus, in Roman mythology, was a deity who directed the first lisplings of little children.

Vaudois. See WALDENSES.

Vaughan, Henry, a clergyman of the Church of England, was born at Mitchelmers, Hampshire, Jan. 6, 1806. He was remarkable from childhood for his gentle manners and amiable disposition. At the age of sixteen he became a candidate for a scholarship at Corpus Christi College, Oxford; but, proving unsuccessful, he, after two years of private study, entered Wadham College. Subsequently he obtained a scholarship at Worcester College. An ardent ambition for scholastic

distinction was now the most prominent feature of his character, and by his overwork he made himself sick and brought himself to the verge of death, which resulted in his conversion. He returned to college with earnest devotion for a ministerial preparation. In 1829 he was ordained to the sacred office, and began his labors as reader of the English service at Llangenny, a romantic village in the vale of Usk, Wales. Here he also did great service, and greatly endeared himself to the people as pastor. In 1830 Mr. Vaughan was appointed to the curacy of Crickhowell, Brecknockshire, and in 1832 vicar, which office he held during life. He died Jan. 21, 1837. Mr. Vaughan was a great lover of children, a tender pastor, an able and promising young preacher. He published several *Sermons*, and a work on the *Fruits of the Spirit* (Lond. 1841, 8vo). See *Christian Guardian*, 1846, p. 181, 489, 513; Allibone, *Dict. of Brit. and Amer. Authors*, s. v.

Vaughan, Isaac, an English Congregational minister, was born at Gleadless, March 9, 1813. He was educated at Rotherham College, and in 1833 settled at Olney; in 1850 he became pastor of the New Tabernacle, London, and in 1858 removed to Masborough. He died July 24, 1866. Mr. Vaughan was a clear, practical preacher; his theology was sound and full, and his ecclesiastical principles settled and uncompromising. See (Lond.) *Cong. Year-book*, 1867, p. 323.

Vaughan, John A., D.D., a clergyman of the Protestant Episcopal Church, died at Philadelphia, Pa., June 5, 1864. For a long time he was professor in the Divinity School, Philadelphia. See *Amer. Quar. Church Rev.* July, 1865, p. 323.

Vaughan, Martin, an English Wesleyan minister, entered the work in 1796, and died Nov. 4, 1846, in the eighty-fifth year of his age. He was a faithful and affectionate minister, of a retiring disposition, and of few words. See *Minutes of Wesl. Conferences*, 1847.

Vaughan, Robert, D.D., an English Congregational minister, was born at London in 1795. He studied for the ministry with Rev. William Thorp. He always lamented his want of early educational advantages. The self-made student, the self-made historian, became the self-made and accomplished theologian. His first pastorate was at Worcester (1819), where he labored for six years. But it was after his removal to Kensington that he became more extensively known. He addressed himself chiefly to men of intelligence and culture, and by them his ministry was highly appreciated. During his ministration at Kensington, he was for six years professor of modern history at the London University. From 1843 to 1857 he held the principal

ship of Lancashire Independent College. Dr. Vaughan died at Torquay, June 15, 1868. The following are his published works: *The Life of Wycliffe*:—*Memorials of the Stuart Dynasty*:—*Religious Parties in England*:—*Congregationalism and Modern Society*:—*The Modern Pulpit*:—*Revolutions in English History*:—and *Memoir of English Nonconformity*. Dr. Vaughan originated and edited for twenty years the *British Quarterly Review*, a work which gave Congregational dissent a new position in the literary world. "His zeal in the cause of evangelical truth, in the support of the great doctrines of Christian divinity and atonement, was very great; and not only as a theologian, but as a Christian, he felt the need of believing those Gospel truths for the life and comfort of his own soul." See (Lond.) *Cong. Year-book*, 1869, p. 288.

Vaughan, Robert Alfred, an Independent minister, son of Dr. Robert Vaughan, was born at Worcester, England, March 18, 1823. He graduated at London University in 1842, and at the Lancashire Independent College in 1846, then studied theology at Halle. He was colleague of Rev. William Jay as pastor of Argyle Chapel, Bath, 1848–50, and pastor at Birmingham, 1850–55. He died in London, Oct. 26, 1857. He published, *The Witch of Endor and Other Poems* (1844):—*Hours with the Mystics, a Contribution to the History of Religious Opinions* (1856, 2 vols.):—*Essays and Remains* (posthumously, with a *Memoir* by his father, 1858, 2 vols.).

Vaughan, Thomas, a writer on magic and sometime minister of the Church of England, was born at Newton St. Bridget, Brecknockshire, in 1621. He was educated at Jesus College, Oxford, of which he subsequently became fellow. He officiated as rector of St. Bridget, Brecknockshire, afterwards retiring to Oxford, where he became famous as a disciple and teacher in the school of Cornelius Agrippa. He gave most of his time to alchemy and kindred subjects. He died at Oxford, Feb. 27, 1665. His principal works are, *Anthroposophia Theomagica*:—*Anima Magica Abscondita*:—*The Fame and Confession of the R. C., commonly of the Rosie Cross*.

Vaughan, William B., a Methodist Episcopal minister, was born in Sullivan County, Tenn., May 21, 1851. He was converted in 1872 while attending King's College, and joined the Virginia Conference in 1873. Subsequently he entered Drew Theological Seminary, where his application as a student brought on the malady which caused his death. He died in Carroll County, Va., Feb. 3, 1876. Few young ministers have given greater hopes for future usefulness than Mr. Vaughan. He was earnest, manly, efficient; ready for work on earth or for rest in heaven. See *Minutes of Annual Conferences*, 1876, p. 16.

Vault (Fr. *voûte*, Lat. *volutus*). The simplest and most ancient kind used over a rectangular area is the *cylindrical*, called also a *barrel*, and sometimes *wagon-vault*; this springs from the two opposite walls, and presents a uniform concave surface throughout its whole length. The term "cylindrical" properly implies the form of a segment of a cylinder, but it is applied to pointed vaults of the same description. Vaults of this character were used by the Romans, and also by the builders in England to the end of the Norman style. The Romans also first introduced groining, formed by the intersection of vaults crossing each other at right angles, and some of their constructions of this kind were of very large size. In groined vaults the arches which cross each other do not always correspond in width; in such cases they sometimes spring

from the same level, and consequently are of unequal heights; and sometimes the springing of the narrower vault is raised so that the tops are on the same level. Domical, or hemispherical,

Groined Vault.

vaulting over a circular area was likewise practiced by the Romans, of which the Pantheon at Rome exhibits a magnificent example of one hundred and forty-two feet in diameter. The decorations employed on Roman vaulting consist chiefly of panels, and flat bands of ornament following the curve of the arch: the application of ribs at that period was unknown.

In the Norman style cylindrical or barrel vaulting, as well as groined vaulting, is used; the former of these is either perfectly devoid of ornament, as in the chapel in the White Tower of London, or has plain and massive ribs at intervals following the direction of the curve of the arch. In groined vaulting the cross-vaults are not unfrequently surmounted, or stilted, when they are of narrower span than the main vault, though sometimes in such cases they are both made to spring from the same level; but in general the parts of the building are so arranged that both vaults are of nearly or quite the same breadth.

In the Early English style, when the use of the pointed arch was permanently established, the same form was also given to the vaulting; and groined vaults at this period were universally adopted. In buildings of this date ribs are invariably employed, especially on the groins. The simplest arrangement of them consists of the diagonal or groin ribs, cross-springers, and the longitudinal and transverse ribs at the apex of the main and cross vaults; but these two last in some examples are omitted. Additional ribs are sometimes introduced between the diagonals and cross-springers. In some buildings in England, and in many on the Continent, the vaulting is constructed with the main vault double the width of the cross-vaults, with the diagonal ribs embracing two bays or compartments of the cross-vaults, as in the choir of Canterbury Cathedral.

Decorated vaults, for the most part, differ but little from those of the preceding style. The longitudinal and transverse ribs are occasionally, but not often, omitted, and the number of those on the surface of the vaulting is sometimes increased; and in some examples ribs are

Westminister Abbey, cir. 1260.

Cylindrical Vault.

introduced crossing the vaults in directions opposite to their curves, so as to form in some degree an appearance of net-work upon them. The short ribs which connect the bosses and intersections of the principal rib and ridge-ribs, but which do not themselves either spring from an impost or occupy the ridge, are termed *liernes*, and the vaults in which they occur *lierne vaults*.

In the Perpendicular style the general construction is much the same as in the Decorated, but the ribs are often more numerous, and pendants are not uncommon.

Vaulting-shaft, Netley Abbey, cir. 1300.

Towards the latter part of this style fan-tracery vaulting was commonly introduced; this has no groins, but the pendentives are circular on the plan, and have the same curve in every direction, resembling inverted curvilinear conoids, and are generally covered with ribs and tracery branching out equally all round them. The middle of the upper part of the vault, between the pendentives, is usually domical in construction, and frequently has a pendant in the centre of each compartment.—Parker, *Gloss. of Architect.* s. v.

Vaulting-shaft, a term proposed by Prof. Willis for a shaft, small column, or pillar which supports the ribs of a vault. Shafts of this kind sometimes rise from the floor, and sometimes from the capital of a larger pillar, or from a corbel or other projection. The most usual arrangement is that shown in the example here given, where the shaft rises between the springings of the arches of the nave.—Parker, *Gloss. of Architect.* s. v.

Vavasseur, FRANÇOIS, a Jesuit of France, eminently distinguished for his accomplishments in belles-lettres, was born in 1605 at Paray. He entered the Society of Jesuits in 1621, and taught polite literature and rhetoric for seven years. In 1645 he was called to Paris to teach Holy Scripture, and died there Dec. 16, 1681. He understood the Latin tongue very exactly. He wrote, *Johns, sire de Patientia, Libri IV* (printed very often, last edition 1679):—*Theuripicon, sire de Miraculis Christi, Libri IV*:—*De Forma Christi Dissertatio*, etc. His works were published in 1709 at Amsterdam. See *Alegambe, Bibliotheca Scriptorum Societatis Jesu*; Blount, *Censura Celsibrium Auctorum*; *Acta Eruditum Latinorum*; Nicéron, *Mémoires*; Le Long, *Bibliothèque Historique de France*; Winer, *Handbuch der theol. Literatur*, i. 562. (B. P.)

Vayer, FRANÇOIS DE LA MOTHE LE. See MOTHE LE VAYER.

Vayu (Sanscrit *va*, "blow"), in Hindû mythology, a deity which originally held an equal rank with Indra, but which much more rarely occupies the imagination of the poets than Indra or Agni. See Muir, *Contributions to a Knowledge of the Vedic Theology and Mythology*, in the *Journal of the Royal Asiatic Society*, 1864.

Ve, in Norse mythology, was a brother of Vile and Odin, which three together created the first parents, Ask and Embla.

Veal, EDWARD, A.M., an English Dissenting minister and tutor, was born in 1631. He was educated at Christ Church, Oxford; went to Dublin and became senior fellow of Trinity College; returned to England for ordination; went again to Ireland and preached there for several years; but was afterwards stripped of his fellowship and returned to England. On the passage of the Uniformity Act he gathered a congregation of Dis-

senters at Wapping, and continued to preach to them until advanced age compelled him to resign. He was for a time professor of a Dissenting academy, and trained up several excellent ministers. He died in 1708. See Bogue and Bennett, *History of Dissenters*, i. 336.

Veasey, THOMAS, B.D., a clergyman of the Church of England, was born in 1753. No record remains of his early life. He was some time tutor, and for upwards of sixty years fellow, of St. Peter's College, Cambridge. At the time of his death, May 22, 1839, he was the oldest resident member of the university, and had proceeded to the degree of A.B. in 1778; A.M. in 1781; and B.D. in 1794. See *Christian Remembrancer*, 1839, p. 376.

Vecchi, GIOVANNI DE', an Italian painter, was born at Borgo San Sepolcro in 1536. He studied at Rome under Raffaellino della Colle, and afterwards with Taddeo Zuccaro, who was at that time engaged in embellishing the palace of the cardinal Alessandro Farnese at Caprarola. Here he was rather the competitor than the pupil of Zuccaro, and executed several important works. His best productions are in the palace at Caprarola, in the Church of San Lorenzo in Damaso, and in the Church of Santa Maria d'Ara Cœli. Among the latter are the *Four Doctors of the Church*, and several histories of *St. Jerome*. He also frescoed the cupola of the Chiesa del Gesù. He died at Rome in 1614. See Spooner, *Biog. Hist. of the Fine Arts*, s. v.

Vecchia, PIETRO, a Venetian painter, was born in 1605. He was educated in the school of Alessandro Varotari (q. v.), but did not follow the style of that master. He studied to imitate the works of Giorgione and Pordenone, and acquired such skill in this direction that his paintings have been mistaken for the productions of those masters, even by competent critics. He also imitated Titian and other masters with great accuracy, on account of which he was often employed in restoring old paintings. He copied in oil several of the historical mosaics in the Church of St. Mark, Venice, and painted, among others, two altar-pieces from his own designs in the same edifice, *The Crucifixion and Christ Driving the Money-changers from the Temple*. He died in 1678. See Spooner, *Biog. Hist. of the Fine Arts*, s. v.

Vecchiatta, LORENZO DI PIETRO (*da Siena*), an Italian painter and sculptor, was born at Sienna in 1424. His pictures are characterized by hardness of style, and but few of them remain. He probably studied sculpture under Donatello, and gained great distinction in this department. He obtained the commission to execute the bronze tabernacle of the grand altar in the Cathedral of Sienna, with the marble ornaments. The beauty of this work gained for him commissions for various works in sculpture in the buildings of Sienna, among which are two statues of *St. Peter* and *St. Paul*, in the Loggia del Banco, delicately executed:—a statue of *Christ*, in the hospital of the Scala:—and several works in bronze for the baptistry of San Giovanni. He died in 1482. See Spooner, *Biog. Hist. of the Fine Arts*, s. v.

Vecelli (or **Vecellio**), FRANCESCO, an Italian painter, brother of Titian, was born at Cadore, in the Friuli, in 1483. He was instructed by his brother, and showed such talents as to excite the jealousy of Titian, who is said to have persuaded him to engage in other pursuits. He then entered the army and led a military life until the restoration of peace in Italy, when he returned to Venice and resumed painting. He now executed some altar-pieces and portraits in the style of Titian, possessing so much merit as to excite the alarm of the master, who induced him to devote his attention to the decoration of cabinets with small paintings, for which there was a great demand at that time. In 1531 he relinquished painting entirely, and gave his attention to merchandising. The duplicity and illiberality of Titian towards his brother Francesco are denied by many, on the ground that they are incredible. Moreover, it is claimed that Francesco was an "erratic and wayward genius" who became dissatisfied with an occupation that

merely gained him his bread, and joined the army. When the army disbanded he returned to painting again for a time, then became a merchant, and finally threw away his time and money in the vain pursuit of alchemy. His best works are, *The Transfiguration*, in the Church of San Salvatore at Venice:—and *The Nativity*, in the Church of San Giuseppe at Belluno:—besides some of his cabinet pieces. The time of his death is not known. See Spooner, *Biog. Hist. of the Fine Arts*, s. v.

Vechner, David, a Protestant theologian of Germany, was born March 13, 1594, at Freystadt, in Silesia. He studied at various universities, and was appointed professor of logic at Beuthen. For five years he had to leave the country, and after his return he was appointed rector at Sprottau. In 1643 he was made deacon at Görlitz, and in 1662 *pastor primarius*, and died Feb. 15, 1669. He wrote, *Breviarium Germaniæ*:—*Spyridion seu Sportella Textuum evangel. Domin. etc.* See Funcke, *Lebensgeschichte der geistlichen Personen zu Görlitz*; Grosser, *Lausitzer Merkwürdigkeiten*; Witte, *Diarium Biographicum*; Jöcher, *Allgemeines Gelehrten-Lexikon*, s. v. (B. P.)

Vechner, Georg, brother of David, was born at Freystadt in 1590. In 1618 he was promoted as doctor of theology at Frankfurt, and acted for some time as professor at the gymnasium in Beuthen. In 1646 he was called to the pastorate at Brieg, and died Dec. 24, 1647. He wrote, *Pauli in 2 Cor. xii.*:—*Sinus Abruhe*:—*Regia Animæ Professio a Davide facta ex Psalm. 101*, etc. See Witte, *Diarium Biographicum*; *Allgemeines Historisches-Lexikon*; Jöcher, *Allgemeines Gelehrten-Lexikon*, s. v. (B. P.)

Veda (from the Sanscrit *vid*, "to know," literally meaning *knowledge*) is the general name applied to those ancient Sanscrit writings on which the early Hindû religion was based. The oldest of these works is the *Rig-veda*; next to it are the *Yajur-veda* and *Sama-veda*; and the latest is the *Atharva-veda*. The first three are called, collectively, *trayi*, or "the threefold," and all are thought to be divinely inspired. Each of the Vedas consists of two distinct parts—a *Samhita*, or collection of hymns or *mantras*, and a *Brahmana*. A *mantra* (Sanskrit *man*, "to think") is a prayer, or else a thanksgiving, adoration, or praise addressed to a deity. If such a mantra is metrical and intended for recitation aloud, it is called *Rich* (praise); whence the name *Rig-veda*, or the Veda containing such metrical mantras. If it is in prose, it must be muttered inaudibly, and is called *Yajus* (*yaj*, "sacrifice"); hence the name *Yajur-veda*. If it is metrical and intended for chanting, it is called *Saman*; hence the name *Sama-veda*. No special name is applied to the mantras of the *Atharva-veda*. The *Brahmana* (*Brahman* neuter) designates that portion in prose of the Vedas which contains either commandments or explanations, or which gives injunctions for the performance of sacrificial acts, explains their origin, and the occasions on which the mantras had to be used, by adding illustrations, legends, or philosophical speculations. The *Brahmana* portion of the Vedas constitutes the basis on which the Vedic ritual rests, and the source from whence the *Upanishads* (q. v.) and philosophical doctrines were developed.

Though *Brahmanas* and *mantras* were claimed at a later period of Hinduism to have existed from eternity, it is certain that the *Brahmana* portion of each Veda is later than some portion, at least, of its *Samhita*, for it refers to it; and, from the bulk and character of the works, they must have been the product of a considerable period of time. Tradition records that Vyasa (q. v.), after having compiled and arranged the Vedas, handed each of them to four disciples, and that these disciples taught them to their disciples, and so on down to distant ages. Thus the mantras and *Brahmanas* passed through a large number of schools, called *sakhas*, and, as a natural result, discrepancies gradually arose between these schools, both as regards the Vedic texts and the

manner of interpreting them, which in the lapse of time became very great. The differences between these *sakhas* did not consist in their various readings of the text alone, but in the arrangement as well. The number of these *sakhas* was very large, as may be inferred from a statement ascribed to the ancient writer Saunaka, in which mention is made of five *sakhas* of the *Rig-veda*, eighty-six of the *Yajur-veda*, one thousand of the *Sama-veda*, and nine of the *Atharva-veda*. But of all these schools the *Rig-veda* is now extant only in one, the *Yajur-veda* in three (and partially in four), the *Sama-veda* in two, and the *Atharva-veda* in one. The MSS. now in existence are of no great age or authority; and in cases of disputed authenticity appeal is made to the *pundits* of greatest repute.

For the religious ideas contained in the Vedas, see HINDUISM.

The social condition of the Hindûs, as reflected from the hymns of the *Rig-veda*, is not that of a pastoral or nomadic people, but of a people somewhat advanced in civilization. Frequent allusion is made to towns and cities, powerful kings and their enormous wealth. Besides agriculture, they mention various useful arts, such as weaving, melting precious metals, fabricating cars, golden and iron mail, and golden ornaments. The employment of the needle and the use of musical instruments were known to them. The Hindûs of that period were familiar with the ocean, and sometimes went on naval expeditions. They had some knowledge of medicine, had made some advance in astronomical calculation, and even employed the complicated law of inheritance. The institution of caste, however, seems at that time to have been unknown.

The only recension in which the *Samhita* of the *Rig-veda* has been preserved to us is that of the *Sakala* school; and the hymns are arranged according either to the material bulk or their authorship. According to the former arrangement, the whole *Samhita* consists of 8 *ashlaks*, or eights; these are divided into 64 *adhyayas*, or lessons; these into 2006 *vargas*, or sections; and these again into *richs*, or verses, numbering 10,417. According to the other method, the *Samhita* is divided into 10 *mandalas*, or circles; these into 85 *anuvaks*, or sections; these into 1028 *suktas*, or hymns; and the hymns into *richs*, of the same number, of course, as in the former arrangement. The number of words is said to be 153,826 in this *Samhita*.

The *Brahmana* portion of the *Rig-veda* is preserved in two works—the *Atareya Brahmana* and the *Saukhayana*, or *Khanishiki Brahmana*. The former consists of 8 *panchikas*, or pentades; each of these comprising 5 *adhyayas*, or lessons; and the 40 *adhyayas* 285 *khandas*, or portions. The latter contains 30 *adhyayas*, divided into a number of *khandas*.

The precise date of the composition of the *Rig-veda*, much the oldest of the Vedas, is not known. By the methods of modern criticism, an approximate date has been assigned. Internal evidence, based upon a comparison of the older with the later portions, and coupled with such facts as the dispersion of the Aryan race and the historical rise of Buddhism, leads to the conclusion that the mantras of the *Rig-veda* were composed by a succession of poets between the 15th and 12th centuries B.C.

The *Sama-veda* was compiled chiefly for the performance of those sacrifices of which the juice of the Soma plant is the chief ingredient; and of these sacrifices the *Syotishtoma* is the most important. At the performance of such Soma sacrifices the verses of the *Sama-veda* were chanted; and there are special books which teach the proper manner of chanting them. The *Samhita* of the *Sama-veda* is preserved in two recensions, and consists of two parts—the *Chhandograntha*, or *Archika*, or *Purvarchika*, and the *Stanbhika*, or *Uttaragrantha*, or *Uttararchika*. The first part consists of fifty-nine *dasatis*, or decades, which are divided into *prapathakas*, or chapters; and these again into *ardhaprapathakas*, or half-

chapters; the entire part containing 585 verses. The second portion is divided in a similar manner, and contains 1225 verses. The number of Brahmanas relating to this Veda is probably ten, including one of the *Upaniṣads* and a later Brahmana.

There are two *Yajur-vedas*, resulting from a dissension between its schools, known as the *Black* and the *White*. The *Black Yajur-veda* is the older of the two, and lacks that complete separation of the *Sanhita* and *Brahmana* portions which exists in all the others; but this defect is remedied in the *White Yajur-veda*. The contents of both are similar in many respects. The text of the *Sanhita* of the *Black Yajur-veda* is extant in two recensions, one of which consists of 7 *khaṇḍas*, or books, comprising 44 *prapathakas*, or chapters, subdivided into 651 *anuvākas*, or sections, and containing 2198 *khaṇḍikas*, or portions. The *Sanhita* of the *White Yajur-veda* exists also in two recensions, and contains 40 *adhyaṅgas*, divided into 303 *anuvākas*, and subdivided into 1975 *khaṇḍikas*.

The object of the *Atharva-veda* is to teach how to appease, to bless, to curse, etc. Prof. Whitney (*Journal of the Amer. Orient. Soc.* iii, 308) says, "The most prominent characteristic feature of this Veda is the multitude of incantations which it contains; these are pronounced either by the person who is himself to be benefited, or, more often, by the sorcerer for him, and are directed to the procuring of the greatest variety of desirable ends. Most frequently, perhaps, long life, or recovery from grievous sickness, is the object sought; then a talisman, such as a necklace, is sometimes given; or, in very numerous instances, some plant endowed with marvellous virtues is to be the immediate external means of the cure; further, the attainment of wealth or power is aimed at, the downfall of enemies, increase in love or in play, the removal of petty pests, and so on, even down to the growth of hair on a bald pate." The adherents of this Veda attach great importance to it. They claim that the other Vedas enable a man to fulfil the *dharma*, or religious law, but that the *Atharva-veda* helps him to attain *moksha*, or eternal bliss. The text of this Veda is preserved only in the *Saṃnaka* school. The *Sanhita* portion consists of twenty *khaṇḍas*, or books, some of which are divided into chapters, containing, in all, one hundred and ten sections.

Of all the Vedas the *Rig-veda* is by far the most important, and carries the greatest weight of authority.

The literature of the Vedas is quite extensive. The text of the *Rig-veda* has been edited in Roman characters by Prof. Aufrecht (Berlin, 1861); in Sanscrit, with the commentary of Sayana (A.D. 1400), by Max Müller (1849-62); the text of the *Sama-veda* by Dr. J. Stevenson (Lond. 1842-43) and Prof. Benfey (Leips. 1848); the text of the *Yajur-veda* by Prof. A. Weber (Berlin. 1852); the text of the *Atharva-veda* by Profs. R. Roth and W. D. Whitney (ibid. 1856). The first complete translation of the *Rig-veda* was made by Prof. H. H. Wilson (Lond. 1850-56, 4 vols.). See Roth, *Zur Literatur und Geschichte des Weda* (Stuttgart, 1846); Weber, *Akademische Vorlesungen über indische Literaturgesch.* (Berlin, 1852); Müller, *Hist. of Ancient Sanscrit Literature* (Lond. 1839); id. *Chips from a German Workshop* (N. Y. 1870); Whitney, *Oriental and Linguistic Studies* (ibid. 1872); Muir, *Original Sanscrit Texts* (1867-72, 5 vols.); Kaegi, *Der Rigveda* (Zurich, 1878). For additional references, see HINDUISM.

Ve'dan (वेद, *Vedān*; Sept. omits, but some copies have Δάρ, others Δεῶν; Vulg. *Dan et*; A. V. "Dan also"), an Arabian city, whence wrought iron, cassia, and calamus were brought to Tyre (Ezek. xxvii, 19). The Javan mentioned in the same connection apparently designates Javan, a town in Yemen, and Vedan probably refers to the city and mart *Aden*, on the southern shores of Arabia, in the province of Yemen. Edrisi not only mentions Aden with its port on the Red Sea, whence ships sailed to India and China, but also enu-

merates among its articles of merchandise the very wares mentioned by the prophet. This important place, situated on the west coast of the Strait of Babel-mandeb, commands the Red Sea and the Sea of Arabia, as Gibraltar does the Mediterranean and a portion of the Atlantic; hence Aden has been styled "the Gibraltar of the East." It lies at the base of a mountain which rises to the height of 1776 feet. It was called *Eden* (Paradise) by the Arabs because of its splendid climate and rich trade. The town is in a hollow formed by the vast crater of an extinct volcano, and has a capital harbor. It was a flourishing entrepôt in the ancient commercial world, being known to the Greeks and Romans under the name of *Adana* or *Athana*. The town played an important part under the Himyaritic, Abyssinian, and Sassanide dynasties, was long the capital of Yemen, and the greatest emporium of Arabia for the products of Southern Asia and Eastern Africa. It first began to decline under Turkish rule (1538-1630), and continued to do so under all changes until it passed into the hands of the English in 1839. It is now a strong garrison, a coal depot for the Indian steamers, and a station of the Indo-European telegraph line. It is rapidly increasing in trade and population. The opening of the Suez Canal in 1869 gave a strong impetus to its growth, so that it has now a population of about 36,000. An extensive range of rock-cisterns was lately discovered in it, capable, it is estimated, of containing 30,000,000 gallons. See ARABIA.

Vedāṅga (from *Veda* [q. v.] and *anga*, "limb"), the name of six Sanscrit works, the object of which is to teach how to read and understand correctly the Vedic texts, and how to apply them correctly to sacrificial purposes. Their titles are as follows: (1.) *Sikṣha*, or the science of proper pronunciation. It explains the nature of letters, accent, and pronunciation, and is ascribed to Panini (q. v.). (2.) *Chhandas*, or a work on meter, which is ascribed to Piṅgala. (3.) *Vyakarana*, or grammar, by which native authorities understand the celebrated work of Panini. (4.) *Nirukta*, or explanation, which explains difficult Vedic words, and is the work of Yaska, who was a predecessor of Panini. (5.) *Jyotiṣa*, or astronomy, the chief object of which is to convey such a knowledge of astronomy as is necessary for fixing the days and hours of the Vedic sacrifices. (6.) *Kalpa*, or works on the Vedic ceremonial which systematize the ritual taught by the Brahmana portion of the Veda, but omitting all legendary or mystical detail. At a later period these works were supplemented by a similar class of works which merely describe the domestic ceremonies, such as the marriage rite, ceremonies at the birth of a child, naming the child, cutting his hair, etc. See Müller, *Ancient Sanscrit Literature*.

Vedānta (Sanskrit *Veda* [q. v.] and *anta*, "end:") literally the end or ultimate aim of the Vedas) is the second great division of the Mimāṃsa (q. v.) school of Hindū philosophy. It is chiefly concerned in the investigation of Brahman, or the supreme spirit, and the relation of the universe and the human soul to it; and in contradistinction from the *Purvāmi-māṃsa*, or the investigation of the former part of the Vedas, it is called *Uttara-māṃsa*, or the investigation of the latter part of the Vedas, i. e. the *Aranyakas* and *Upaniṣads* (q. v.), which treat of (the neuter) Brahman, or supreme spirit.

The Vedānta endeavors to prove that the universe emanates in a successive development from a supreme spirit or soul, which is called Brahman or Parmatman; that the human soul is therefore identical in origin with Brahman; that the worldly existence of the human soul is merely the result of this sameness between itself and the supreme spirit; and that its final liberation or freedom from transmigration (q. v.) is attained by a removal of this ignorance, that is, by a proper understanding of the Vedānta doctrine. See Ballantyne, *A Lecture on the Vedānta, embracing the Text of the Vedānta Sūtra* (Allahabad, 1850); *Bibliotheca Indica* (Calcutta, 1863).

Vedder, HERMANUS, a minister of the Reformed (Dutch) Church, was born at Rotterdam, N. Y., Nov. 17, 1777. He graduated at Union College in 1799, and having studied theology privately, was licensed by the Classis of Albany, Sept. 29, 1801. He was pastor at Greenbush and Taghanic, N. Y., 1803-50; supplied Lincithgo, 1806-14; and was pastor at Greenbush (Gallatin), 1850-64. He died June 29, 1873. See Corwin, *Manual of the Ref. Church in America*, s. v.

Vedel, NICOLAUS, a Protestant divine of Germany, who died in 1642, at Franeker, as doctor and professor of theology, is the author of *Arcana Arminianismi* (Leyden, 1632-34, 4 pts.):—*Rationale Theologicum* (Geneva, 1628):—*Comment. de Tempore utriusque Episcopatus Petri, seu Historia Episcopatus Antiocheni et Romani Petri Refutata* (ibid. 1624, lib. ii; Franeker, 1640). See Winer, *Handbuch der theol. Literatur*, i, 353, 373, 365. (B. P.)

Vedius, or Vejovis, in Roman mythology, was an adopted god of the Tuscans, of dangerous activity. His frightful thunderbolts were preceded by deafness to those whom they would strike. His temple was at Rome, between the Capitolium and the Tarpeian castle. His statue represented a youthful god armed with arrows. His festival was celebrated before March 7. Goats were sacrificed to him.

Vega, Andreas, a Franciscan of Segovia, who was present at the Council of Trent, and died in 1557, is the author of a large work *De Justificatione*, printed at Cologne in 1572. He also wrote, *Comment. in aliquot Concilia Tridentina Decreta*:—*Expositio in Regulam S. Francisci*:—*Comment. in Psalmos*, etc. See Antonii *Bibliotheca Hispanica*; Wadding, *Bibliotheca Scriptorum Minorum*; Jöcher, *Allgemeines Gelehrten-Lexikon*, s. v.; Winer, *Handbuch der theol. Literatur*, i, 446. (B. P.)

Vega, Christopher de la, a Spanish Jesuit, was born in 1595 at Tafalla, in Navarre; joined the Jesuits in 1612, and acted for a number of years as professor of philosophy and moral theology at the college in Taranzona; then at Valencia, where he died, June 18, 1672. He wrote, *Theologia Mariana*:—*Comment. in Lib. Judicum*:—*De Maximo Malorum Malo*:—*Causa Varii Confessionis*, etc. See Winer, *Handbuch der theol. Literatur*, i, 479; Antonii *Bibliotheca Hispanica*; Alegambe, *Bibliotheca Scriptorum Societatis Jesu*; Jöcher, *Allgemeines Gelehrten-Lexikon*, s. v. (B. P.)

Vega, Emanuel de, a Spanish Jesuit, who acted as professor of theology at Vilna, in Lithuania, and died at Rome, Jan. 27, 1649 or 1648, wrote, *De Eucharistia*:—*De Missa*:—*De Cultu Imaginum et Invocatione Sanctorum*:—*De Vita et Miraculis Lutheri, Calvini et Beze*:—*De Principiis Fidei*:—*De Distributione Eucharistie sub Una Specie*:—*Defensio Eternæ Christi Generationis Veræque Deitatis*:—*Quæstiones Selectæ de Libertate Dei et Hominis, de Prædestinatione, de Concordia Summorum nostri Temporis Theologorum* (Rome, 1649). See Alegambe, *Bibliotheca Scriptorum Societatis Jesu*; Antonii *Bibliotheca Hispanica*; Jöcher, *Allgemeines Gelehrten-Lexikon*, s. v. (B. P.)

Veiel, ELIAS, a Protestant theologian of Germany, who died as superintendent and librarian at Ulm, Feb. 23, 1706, where he was born, July 20, 1635, is the author of *Historia et Necessitas Reformationis Evangel. per Luther. Institutæ, ex Scriptis Georgii Princip. Anhalt. Exposita cum Narratione de Conversione ad Salutarem Aug. Confess. Doctrinam*, etc. (Ulm, 1692). See Winer, *Handb. der theol. Literatur*, i, 741. (B. P.)

Veil (or **Vail** [q. v.]) is an essential article of female apparel in the East. See **DRESS**.

1. *Original Terms*.—These may be divided, for the sake of convenient and clear treatment, into several classes.

(L.) *General*.—The following words (which, however, are the only ones rendered "vail" or "veil" in the A. V. as an article of dress) may be explained to be rather shawls, or mantles, which might at pleasure be drawn

over the face, but not designed for the special purpose of veils, or for concealment of the features alone.

1. *Mitpáchath* (מִטְפָּחָת, from פָּחַץ, to expand) denotes the wide outer and upper garment of a female (see Schröder, *De Vestit. Mulier. Heb.* c. 16), and is rendered "vail" in Ruth iii, 15; "wimple" in Isa. iii, 22. It evidently was one of the wrappers of different kinds in which the Eastern women envelop themselves when they quit their houses. These are of great amplitude, and, among the common people, of strong and coarse texture, like that in which Ruth carried home her corn (Ruth iii, 15). The illustration will show how sufficient the out-door veils of the Eastern women are for such a use. See **WIMPLE**.

Oriental Out-door Veils.

2. *Radil* (רָדִיל, from רָדַד, to stamp out), rendered "veil" in Cant. v, 7; "vail" in Isa. iii, 23, apparently was another large and loose upper covering, probably of finer materials, from the manner in which it is mentioned in these texts. The former passage shows that it was an out-door veil, which the lady had cast around her when she went forth to seek her beloved. See **APPAREL**.

3. *Tsá'yiph* (צִיפָּה, from צָפַה, thought by Gesenius to be = צָפַה, to cover up), invariably rendered "vail," is mentioned in Gen. xxiv, 65; xxxviii, 14, 19, under circumstances which show that it was one of those ample wrappers which women wore out of doors. The etymology, referred by some to the Arabic, *subdupplicat*, suggests that it was "doubled" over the shoulders, or folded about the body, in some peculiar manner which distinguished it from other veils. It is clear that it concealed the face, as Judah could not recognise Tamar when she had wrapped herself in a *tsá'yiph*. See **ROBE**.

4. *Masréh* (מָסַח, from סָחַה, to hide), invariably rendered "vail," is only used of the veil which Moses assumed when he came down from the mount (Exod. xxxiv, 33-35). In 2 Cor. iii, 13-16 Paul designates it by the corresponding Greek word κάλυμμα, a covering. A cognate word, *súth* (סֹת, A. V. "clothes"), occurs in Gen. xlix, 11 as a general term for a man's raiment, leading to the inference that the *masréh* also was an ample outer robe which might be drawn over the face when required. The context, however, in Exod. xxxiv is conclusive as to the object for which the robe was assumed, and, whatever may have been its size or form, it must have been used as a veil. See **MOSES**.

5. *Massekáh* (מַסְכָּה, from סָכַח, to screen) is a general term for a covering of any kind ("vail," Isa. xxv, 7; "covering," xxxviii, 20).

6. The words מַסְכֵּי עֵינַיִם, *kesúthi éynáyim*, literally rendered "a covering of the eyes" (Gen. xx, 16), are rendered by some interpreters "a veil for the eyes," i. e. a complete veil, to conceal Sarah's beauty, and that she might in future be known to all as a married woman.

Oriental In-door Veils.

an. But the phrase "a covering of, or for, the eyes" is used in the sense of a present offered as an expiation for some fault, in order that one may *shut his eyes* upon it, connive at it, or take no more notice of it: "Behold, this (the thousand pieces of silver) is to thee a penalty for all which has happened with thee and before all men" —a *compensation* for the wrong Abimelech did to Sarah by forcibly depriving her of her liberty, and a public declaration of his honor and her innocence. There can be no doubt that the veil for concealing the face is of very remote antiquity; but we have no evidence that it was a general article of female attire in the time of Sarah, either in Egypt or Palestine. From the monuments of Egypt, it seems not to have been worn by the females of that nation, as the women in the reign of the Pharaohs exposed their faces and were permitted as much liberty as the ladies of modern Europe. This custom was not changed till the conquest of Egypt by the Persians. See COVERING OF THE EYES.

7. The Greek word *ἐξουσία*, literally translated "power" in 1 Cor. xi, 10, seems to denote metaphorically a kind of head-gear, a veil, or the ancient *couvrechef* (kerchief); hence the emblem of subjection to the power of a husband. But the apostle, in pointing out certain irregularities in the Christian assemblies, observes that "every woman that prayeth or prophesieth with her head uncovered dishonoreth her head," i. e. her husband. Hence, as the woman is to be in subjection to her husband, the apostle enjoins, "For this cause ought the woman to bring *honor* upon her head (i. e. upon her husband) for the sake of the angels," i. e. the ministers, that they may not be put to the trouble of adverting to any such irregularities in the assemblies of the faithful (ver. 3-16). See WOMAN.

(II.) *Special*.—Another class of coverings which alone offer any resemblance to the veils used among us are those which the Eastern women wear indoors, and which are usually of muslin or other light texture, attached to the head-dress and falling down over the back. They are of different kinds and names, some descending only to the waist, while others reach nearly to the ground. The Heb. terms that follow appear to designate some of these, but they are never rendered "veil" or "veil" in the A. V.

1. *Mispechûh* (מִסְפַּחָה, from מָצַח, to pour out) is used of the veils which the false prophets placed upon their heads (Ezek. xiii, 18, 21; A. V. "kerchiefs"). The word is understood by Gesenius (*Thesaur.* p. 965) of cushions or mattresses, but the etymology of it is equally, if not more, favorable to the sense of a *flowing* veil, and this accords better with the notice that they were to be placed "upon the head of every stature," implying that the length of the veil was proportioned to the height of the wearer (Fürst, *l.c.* s. v.; Hitzig in *Ezek.* loc. cit.). See KERCHIEF.

2. *Ráal* (plur. *realôth*. רֵעָלֹת, from רָעַל, to flutter) is used of the light veils worn by females (Isa. iii, 19; A. V. "mufflers"), which were so called from their rustling motion. The same term is applied in the Mishna (*Sab.* vi, 6) to the veils worn by Arabian women, meaning a slender piece of dress fastened above the eyes in such a manner that one part was thrown over the head and fell down upon the back, while the other shaded the face and dropped on the breast; which perhaps approached as near as any other article of antiquity to the modern veil. See MUFFLER.

3. *Tsummâh* (צֻמָּה, from צָמַץ, to cover) is understood by the A. V. of "locks" of hair (Cant. iv, 1, 3; vi, 7; Isa. xlvii, 2); but the contents of the passages in which it is used favor the sense of veil, the wearers of the article being in each case highly born and handsomely dressed. As these passages refer to the effect of the veil as connected with the head-dress, it may perhaps have been one of those veils which have been already described as a part of in-door dress, although it must be admitted that the expressions are almost equally applicable to some kind of street-veil. See HEAD-DRESS.

II. *Use*.—In ancient times the veil was adopted only in exceptional cases, either as an article of ornamental dress (Cant. iv, 1, 3; vi, 7), or by betrothed maidens in the presence of their future husbands, especially at the time of the wedding (Gen. xxiv, 65; xxix, 25) [see MARRIAGE], or, lastly, by women of loose character for purposes of concealment (xxxviii, 14). But, generally speaking, women both married and unmarried appeared in public with their faces exposed among the Jews (xii, 14, xxiv, 16; xxix, 10; 1 Sam. i, 12). At present females are rarely seen without a veil in Oriental countries, so much so that in Egypt it is deemed more requisite to conceal the face, including the top and back of the head, than other parts of the person (Lane, *Mod. Egypt.* i, 72). Women are even delicate about exposing their heads to a physician for medical treatment (Russell, *Aleppo*, i, 246). In remote districts and among the lower classes the practice is not so rigidly enforced (Lane, i, 72). Much of the scrupulousness in respect to the use of the veil dates from the promulgation of the Koran, which forbade women appearing unveiled except in the presence of their nearest relatives (Koran, xxxiii, 55, 59). Mohammedanism has introduced a very marked change in this respect wherever its influence has extended. The change, as Mr. Lane has remarked (*loc. cit.*), is peculiarly observable in Egypt. The *burka*, or face-veil, a long strip of muslin, concealing the whole of the face except the eyes, and reaching nearly to the feet, which is now a regular part of an Egyptian lady's walking attire, is never represented in the ancient

An Egyptian Woman Veiled with the *Milayah*.

paintings and sculptures of Egypt, and may certainly be inferred not to have been worn. And if not in Egypt, still less likely in Canaan. It is probable that in both countries alike the chief head-covering of the women, besides the loose mantle or kerchief occasionally thrown over it and drawn to some extent upon the face, was the long plaited hair, which appears from the Egyptian remains to have often consisted of a number of strings of hair

reaching to the bottom of the shoulder-blades, the ends being left loose, or with two or three plaits fastened together at the extremity by woollen strings of corresponding color (Wilkinson, *Anc. Egypt.* ii, 369). Long hair, perhaps similarly done up, certainly often plaited, was used by the Greek females; thus very commonly they appeared in public. Hence, also, Paul contends, in Church meetings they should have a head-covering, formed either of a mantle or shawl (*peplum*) drawn somewhat over the countenance, or a veil in the stricter sense (*κατακαλύπτω*, 1 Cor. xi, 5, 6). Such a partial covering seemed to become females in public assemblies; and for Christian women to have departed in such a manner from the general practice of the countries where they resided would inevitably have brought reproach upon the Christian name. The attempt of some, therefore, at Corinth to do so was wisely discountenanced by the apostle as implying an assumption of equality with the other sex; and he enforces the covering of the head as a sign of subordination to the authority of the men (ver. 5-15). The same passage leads to the conclusion that the use of the *talith* [see FRINGE], with which the Jewish males cover their heads in prayer, is a comparatively modern practice,

A Syrian Veiled Woman.

inasmuch as the apostle, putting a hypothetical case, states that every man having anything on his head dishonours his head, i. e. Christ, inasmuch as the use of the veil would imply subjection to his fellow-men rather than to the Lord (ver. 4). In modern times, as already observed, Oriental females are veiled with great strictness. Their ideas of decency forbid a virtuous woman to lay aside, or even to lift up, the veil in the presence of men. The female who ventures to disregard this prohibition inevitably ruins her character, and is regarded as a woman of easy virtue. To lift up the veil is reckoned a gross insult: and when females are out of doors propriety requires a man to let them pass without seeming at all to observe them. Some of the face-veils worn by modern Syrian, Arab, and Egyptian ladies are made of white muslin richly embroidered with colored silks and gold, and hanging down behind nearly to the ground. Sometimes they are made of black crape, and often ornamented with spangles, gold coins, false pearls, etc. The mere size and shape of the veils differ in different parts of the East. The outer garment, when out of doors, is a large piece of black silk for a married lady, of white silk for the unmarried; for the poorer females white calico,

which completely conceals every part of the dress excepting a small portion of a very loose gown and the face-veil. The ladies of Syria often have the veil gracefully thrown over the *tantir*, or horn (q. v.). See Hartmann, *Hebräerin*, ii, 316 sq., 334 sq., 428 sq.; Jahn, *Archäol.* I, ii, 130 sq.; Thomson, *Land and Book*, i, 33 sq.; Van Lennep, *Bible Lands*, p. 537. See ATTIRE.

VEIL, ECCLESIASTICAL. Coverings of this kind have been used in various ages of the Church and for various purposes.

1. In the Greek Church the nave was separated from the chancel by a partition of lattice-work with a curtain, and the entrance to the choir was by folding-doors in this partition. The doors were provided with a curtain called *καταπέτασμα*, which was drawn aside during the celebration of the eucharist, and, in the earlier times, during the delivery of a sermon. Generally, however, these veils were drawn, and concealed this part of the Church from catechumens and unbelievers, and covered the eucharist during consecration.

2. A veil or curtain was hung in front of the church-door in early times. Jerome tells us that Nepotian was very careful to see it in its place.

3. Bankers were placed at the sides of the altars, let down when the priest entered the sanctuary, and raised every Saturday during Lent when the Sunday office began. Dorsals and frontal veils were also used at the high altars of large churches until the end of the 16th century.

4. Curtains of great richness were used only in Lent, one to veil the altar, a second the sanctuary, and a third the choir. They were succeeded by permanent screens; hence in Spain, as marriages were permitted or forbidden, such seasons were called "veillings open or shut."

5. A white veil or coif, called *velamen dominicale*, was worn by females at the time of receiving the eucharist during the 5th and 6th centuries. These veils were ordered by the councils of Autun (578) and Angers.

6. The *velamen nuptiale* was always used at the marriage ceremony, and during one part of the service was spread over both bridegroom and bride. It was worn by the bride as a symbol of maiden modesty and obedience to her husband.

7. A nun's veil was an ornament used in the time of St. Gregory (740), given only to a woman twenty-five years of age, and, except in cases of extreme sickness, at no time but Epiphany, an apostle's day, or Low Sunday. The color was sometimes purple or flame-color.

8. A cloth called the white *birrus*, shot with red thread in memory of Christ's Passion, was worn like a crown, to preserve the chrism, by the baptized, and was laid aside with the alb. It fell into disuse in 1090, when the chrism was wiped off with some light material like silk.

9. At a solemn high-mass the subdeacon muffles his arms and shoulders in a scarf or veil in token of humility and reverence when he elevates the paten to announce the time of communion. The priest also used it to envelop his hands at the time of the benediction.

10. Female penitents wore veils (the *velamen penitentia*) and cut their hair short or let it hang loosely about their shoulders. The third Council of Toledo (531) expressly enjoined the use of these veils.

11. Veils were also worn by females at confirmation.

12. A black veil for the head was used by Greek priests in reading the prophecies, in allusion to 2 Cor. iii, 13-16.

13. A white damask with fringe, called the *churching-cloth*, was used in the latter half of the 17th century at the churching of women in England.

14. At Christmas and Easter, formerly, in France, three veils were laid upon the altar and then removed—the first, black, to represent the time before the law; the second, pale, to signify the time of the law; and the third, red, to show the time of grace. One was removed at each nocturn of Christmas.

15. The covering for the cross and images used in

England during Lent is called a veil. It signified variously, according to the different authorities, "the darkness of infidelity which covered the face of the Jews in the Old Test.," "the mourning and lamentation of sinners for their ungodly manners."

16. A covering of silk, embroidered and of the color of the season, was used for placing over the chalice and paten when prepared for the Christian sacrifice, and for the same purpose when the sacrifice was completed. This is called the veil for the chalice. The "white linen cloth" of the Church of England communion-service is also called the veil for the chalice.

17. At Winchester College a canopy of linsey-woolsey powdered with stars of gold was used to fall over the pyx on Palm-Sunday and Corpus Christi. This was called Sindon, pyx, or Corpus Christi cloth.

18. A veil or curtain of silk, satin, velvet, or cloth of gold or silver is used to enclose the tabernacle for the Blessed Sacrament when reserved in the Roman Catholic Church. It is called the *veil for the tabernacle*, and came into use most probably when the setting-up of tabernacles became general.

Taking the veil is a term used to designate the act of consecration to the Church, when a female takes upon herself vows, after which she never appears in public unveiled. See NUX.

VEIL OF THE TABERNACLE, TEMPLE. See VAIL.

Veil, *De* (also *Duveil*), is the name of two Jewish converts, who have become known by their writings in the republic of learning.

1. CHARLES MARIA was born at Metz about 1625. He received an excellent Hebrew education, and embraced the Roman Catholic faith about 1655 (?). His learning and great abilities soon secured for him a high position in his Church, of which he was a distinguished preacher. He became canon in the Order of St. Genevieve, was made doctor of theology by the University of Anjou, and was also prior of the monastery in Metun. He devoted his time to the exposition of the Scriptures in the different positions which he occupied. He published in Latin a *Commentary on the Gospels of Matthew and Mark* (Angers, 1672):—a *Commentary on the Song of Songs* (Paris, 1673):—and a *Commentary on Joel* (ibid. 1676). In these writings *De Veil* proved himself such a staunch champion of Romanism that he was requested to hold a controversy with the Huguenots, at that time the great opponents of the Roman Church in France. But his diligent inquiry into the points of difference between Romanism and Protestantism brought about a very favorable impression of the latter, and the former foe became now a friend of the Huguenots. He was obliged to escape from France. In Holland he openly abjured Romanism in 1678, and soon after he went to England, where he not only formed a friendship with men like Stillington, Sharp, Tillotson, Patrick, etc., but also received the appointment of chaplain and tutor to a noble family. He now published new editions of his commentaries, discarding therefrom and refuting therein the doctrines of Rome. He also published a *Commentary on the Minor Prophets* (Lond. 1680). These commentaries soon became the text-books of the clergy at home and the Reformed churches abroad. Dr. Compton, bishop of London, encouraged him to prosecute his Biblical labors, and gave him free access to his library at all times. Discovering in this library some works of the English Baptists, *De Veil* inquired into the controversy, which resulted in his joining this denomination, to the loss of all his friends, with the honorable exception of Tillotson. *De Veil* gave to the public, as the result of his researches, a *Commentary on the Acts* (ibid. 1684), in which he defended the Baptists' principle. This commentary he translated himself from the Latin into English, and published it in 1685 (new edition, 1851). *De Veil's* commentaries are still very valuable. See FÜRST, *Bibl. Jud.* iii, 470; Kitto, *Cyclop.* s. v.; Kalkar, *Israel u. die*

Kirche, p. 53; Wolf, *Bibl. Hebr.* i, 1007; iii, 973; iv, 964. See DUVEIL.

2. LOUIS DE COMPIÈGNE, brother of the former, was called under Louis XIII as rabbi to Compiègne, where he embraced Christianity, in 1655. He studied theology at the Sorbonne, and afterwards went to England, where he became librarian to the king. He translated into Latin many sections of Maimonides' *Jed Hachezaka*; the catechism of Abr. Jagel, לִקְחָ נֵרִים (Lond. 1679); the *Introduction of Abraham to Leviticus* (ibid. 1683). He published, *Oratio de Origine et Præstantia Ling. Hebr.* (Heidelb. 1671). See FÜRST, *Bibl. Jud.* i, 184 sq.; iii, 470; Steinschneider, *Catalogus Libr. Hebr. in Bibl. Bodl.* p. 2699; id. *Bibliogr. Handbuch*, p. 143; Bartolucci, *Bibl. Jud.* iii, 843; Kalkar, *Israel u. die Kirche*, p. 52. (B. P.)

Veillodter, VALENTIN KARL, a Protestant theologian of Germany, was born March 10, 1769, at Nuremberg. He studied at Altdorf and Jena, and was appointed, in 1793, preacher in his native city. He now rapidly advanced, and in 1817 the Erlangen University honored him with the doctorate. He died April 9, 1828, in his native city. Veillodter was one of the most prominent pulpit orators. His printed sermons occupy several volumes. Besides sermons, he published, *Kommunionbuch für gebildete Christen* (13th ed. Nuremberg, 1852):—*Ideen über Tod und Unsterblichkeit* (4th ed. ibid. 1852):—*Gebete am Morgen und Abend* (4th ed. ibid. 1837). See ZUCHOLD, *Bibl. Theolog.* ii, 1376 sq.; Döring, *Die deutschen Kanzelredner des 18ten und 19ten Jahrhunderts*, p. 556 sq.; Winer, *Handbuch der theol. Literatur* (Index). (B. P.)

Vein (נֶזֶם, *mośā*, a source, as often), a mine (q. v.), as of silver (Job xxviii, 1).

Veitch, ELDRIDGE R., a minister in the Methodist Episcopal Church, South, was born in Alexandria, Va., in 1810. Nothing definite remains concerning his education, conversion, or call to the ministry. In 1831 he entered the travelling connection in the Baltimore Conference, and for thirty-seven years led a devoted, arduous life, dying Feb. 10, 1867. Mr. Veitch was sound and forcible in doctrine as a preacher, original in thought and expression. As a counsellor he was wise, able, and safe. See *Minutes of Annual Conferences, M. E. Church, South*, 1867, p. 97.

Veith, JOHANN EMMANUEL, a Roman Catholic divine, was born of Jewish parentage, July 10, 1787, at Kuttenplan, in Bohemia. He studied medicine at Prague, and continued the same at Vienna, where, in 1810, he embraced Christianity. As a physician he occupied the highest civic and military positions, which he soon exchanged for the study of theology. The learned professor of medicine became a student of theology, and in 1820 he joined the Order of the Redemptorists, and in 1821 received holy orders. He now commenced preaching, and his church was thronged with eager listeners. But the liberal man, with his great independent spirit and witty humor, did not exactly agree with the strict order, and in 1831 he was appointed preacher of St. Stephen's. Here he attracted all ranks of society, and exerted a great power. It was remarkable how Veith, whose outward appearance was the least attractive, influenced all classes of Vienna society, from the highest to the lowest. In 1845 bodily infirmities obliged him to retire from his high position, and in 1847 cardinal-prince Schwarzenberg made him honorary dean of his cathedral at Prague. In 1848 the University of Vienna honored him with the doctorate of theology. He died Nov. 5, 1876. Besides some medical works, Veith published a great many homiletical and ascetical works, as *Die heiligen Ererbe* (Vienna, 1833-35, 2 vols.):—*Die Erweckung des Lazarus* (ibid. 1842):—*Lebensbilder aus der Passionsgeschichte* (ibid. 1830):—*Der verlorene Sohn* (ibid. 1838):—*Das Vater Unser* (3d ed. ibid. 1842):—*Homiletische Vorträge für*

Sonn- u. Festtage (2d ed. 1835-37, 3 vols.) :—*Weltleben u. Christenthum* (ibid. 1851) :—*Die Worte der Feinde Christi* (ibid. 1829, etc.). See Rosenthal, *Concerttitenbilder*, i, 217 sq. (Schaffhausen, 1871) ; Brühl, *Gesch. d. kathol. Literatur Deutschlands*, p. 410 ; *Literarischer Handwörter für das kathol. Deutschland*, 1876, p. 532 sq. ; Delitzsch, *Saat auf Hoffnung*, 1877, p. 25 sq. (B. P.)

Vela, CRISTOBAL, a Spanish painter, was born at Jaen in 1598. He studied under Pablo de Cespedes and Vincenzio Carducci, and afterwards settled at Cordova, where he was occupied in painting for the churches and convents. Most of his works have perished, or been injured by unskillful restoration. There remain, however, in the convent of St. Augustine at Cordova a series of the prophets by him, well designed. In 1658 he fell into the well of his own house at Cordova and was drowned. See Spooner, *Biog. Hist. of the Fine Arts*, s. v.

Velasco, DON ACISLO ANTONIO PALOMINO DE CASTRO Y, an eminent Spanish painter, was born at Bujalance, in Valencia, in 1653. His parents removed to Cordova, where he was educated for the Church; but, having a passion for painting and some knowledge of the art, he placed himself under the instruction of Juan de Valdes in 1672. He became intimate with Juan de Alfaro in 1673, and went with him to Madrid, in 1678, to assist him in some of his works. He was next employed in painting the ceiling of the Queen's Gallery at the Alcázar, which he did with so much satisfaction that he was appointed one of the king's painters. In 1690, on the marriage of Charles II. he designed the arches and other decorations for the bridal entry into the city. This confirmed him in his office of painter to the king. In 1692 he gave assistance to Luca Giordano in the great works he was about to execute. In 1697 he went to Valencia, where he executed some important works, principally the frescos in the Church of San Juan del Mercado. In 1705 he decorated the Convent of San Esteban at Salamanca, with some frescos representing the *Church Militant* and *Church Triumphant*. In 1715 he published the first volume of his *Museo Pictorico*, and in 1724 the second volume. It is by this work that he is chiefly known abroad. Among the paintings not already mentioned are the works in the Carthusian Convent of Granada, five pictures for the grand altar at Cordova, and the hieroglyphics which adorned the funeral of Doña María Luisa de Saboya. Velasco died at Madrid in 1726. He is known among foreign writers chiefly by the name of *Palomino*. See Spooner, *Biog. Hist. of the Fine Arts*, s. v.

Velasco, CRISTOBAL DE, a Spanish painter, was a native of Toledo. He received instruction from his father, whose precepts he followed. In 1598 and following years he did some painting for the archduke Albert and Philip III. See Spooner, *Biog. Hist. of the Fine Arts*, s. v.

Velasco, MATIAS DE, a Spanish painter, son of Cristobal de Velasco, was born at Toledo about the beginning of the 17th century. He was instructed by his father, and accompanied the court of Philip III to Valladolid, where he was employed to paint several histories of the Virgin for the Royal Nunnery of the Carmelites. See Spooner, *Biog. Hist. of the Fine Arts*, s. v.

Velasquez, ALEXANDRO GONZALES, a Spanish painter and architect, was born at Madrid in 1719. He studied in the Academy of his native city, and made such rapid progress that at the age of nineteen, in connection with his brother Luis, he was employed to paint the decorations of the theatre of the Retiro. In 1744 he superintended the painting and sculpture at San Ildefonso, and afterwards was employed for three years in making the plans and elevations of the palace at Aranjuez. In 1752 he was elected subdirector of the Academy in the department of architecture, and in 1762 he was chosen for the same office in that of painting. Among his architectural works at Madrid is the modernizing of the church *Las Ballecas*. He instructed

many pupils, and died in 1772. See Michaud, *Biographie Universelle* ; Spooner, *Biog. Hist. of the Fine Arts*, s. v.

Velde, ADRIAAN VAN DER, an eminent Dutch painter, was born at Amsterdam in 1639. He early discovered a talent for drawing pictures, and was placed under the instruction of John Wynants. He learned from this master to sketch from nature, and practiced it all his life. He executed several works for the Roman church at Amsterdam, the subjects of which were taken from the life and passion of Christ. The chief of these is the *Descent from the Cross*. His pictures are held in high estimation, and are to be found only in the finest collections. One, a *Mountainous Landscape*, in which Jacob, his family, and his servants appear conducting their flocks and herds, was sold in 1765 for \$630, and in 1811 for \$4600. Van der Velde died at Amsterdam in 1672. See Spooner, *Biog. Hist. of the Fine Arts*, s. v.

Veli, BENEDETTO, a Florentine painter, flourished about 1650. Little is known of him except that he painted the *Ascension of Christ*, which is placed at the entrance of the presbytery in the Cathedral of Pistoja, as the companion to the *Pentecost*, by Gregorio Pagani. See Spooner, *Biog. Hist. of the Fine Arts*, s. v.

Velthem (or **Veltheim**), VALENTIN, a Protestant theologian of Germany, was born March 11, 1645, at Halle, in Saxony. He studied at Jena, where he was made professor of moral philosophy in 1672, and professor of theology in 1683. He died April 24, 1700. He was a voluminous writer, and a catalogue of his writings is given by Jöcher, *Allgemeines Gelehrten-Lexikon*, s. v. See also Zeumer, *Vite Professorum Jenensium* ; Pipping, *Memorie Theologorum*. (B. P.)

Velthusen, JOHANN CASPAR, a Protestant theologian of Germany, was born Aug. 7, 1740, at Weimar. He studied at Göttingen under Walch, Michaelis, and Heyne. From Göttingen he went as private tutor to Bremervorde, and from thence, in 1767, as deacon to Hameln. In 1770 he was called as chaplain to London. In 1775 he went as professor of theology to Kiel, having shortly before received the doctorate from Göttingen on account of his *De Legibus Divinis hanc quam Arbitrariis*. In 1778 he was called to Helmstädt as professor of theology, general superintendent, and pastor of St. Stephen's. At the same time he was appointed abbot of Marienthal. In 1789 he was called to Rostock as first professor of theology and rector of the university. In 1791 he went to Stade as general superintendent of the duchies of Bremen and Verden, where he died April 13, 1814. Velthusen was a voluminous writer, and his writings comprise almost all theological branches. They are given by Döring, *Die Gelehrten Theologen Deutschlands*, iv, 577-582 ; Winer, *Handb. der theol. Literatur*, i, 13, 15, 138, 214, 847 ; ii, 203, 221, 227, 245, 280, 354, 382 ; Fürst, *Bibl. Jud.* iii, 471. (B. P.)

Venable, HENRY ISAAC, a Presbyterian minister, was born June 28, 1811, in Shelby County, Ky. He was prepared for college at Shelbyville under the tuition of the Rev. Andrew Shannon ; graduated from Centre College in 1830 ; and, while a student in college, united by profession with the Church in Danville at about eighteen years of age. He then taught school one year in Clark County, and entered Princeton Seminary, N. J., in 1831. After remaining there one year, he went to the Union Theological Seminary, in Virginia, where he remained two years, and graduated. He was licensed by West Hanover Presbytery April 19, 1834, and was ordained Oct. 10, 1834, by the Transylvania Presbytery, Ky., as an evangelist. Having devoted himself to the work of foreign missions, he embarked at Boston, Dec. 3, 1834, for Zululand, in South Africa, where he labored with great earnestness and self-denial until he was driven from his field by war, when he returned to the United States in March, 1839.

He then supplied the Church at Paris, Ill., from Oct. 1, 1839, until Dec. 1, 1841. At the latter date, he founded the Edgar Female Academy at Paris, and devoted his time and labors wholly thereto until 1850. This academy grew and flourished, expanding into the Edgar Collegiate Institute. From 1853 to 1856 he supplied the Church at Charleston, Ill.; then Oakland (otherwise called Bethel) Church from April 1, 1856, to May 1, 1860. At the latter date, having accepted a call, he was installed pastor of Oakland Church. This relation was dissolved, because of inadequate support, April 18, 1865, after which he supplied the Church at Newton from 1865 to 1867, then Carlisle and Claiborne churches thirteen months, and York Church (all in Illinois) for one year. In September, 1870, by earnest request of the parties interested, he became principal of the Edgar Collegiate Institute, which he had founded nearly thirty years before, and continued in charge of it until not long before his death, he was compelled to desist from all labor. He died at Paris, Edgar Co., Ill., May 22, 1878. His death was peaceful, trustful, and without fear. He was a truly godly man, an earnest and faithful minister of the Gospel, a true and sincere friend, and universally esteemed and loved by his brethren. (W. P. S.)

Venantius, HONORIUS CLEMENTIANUS FORTUNATUS. See FORTUNATUS.

Venanzi, ANTONIO (also called *Giorganni*, *Giorganni Battista*, and *Francesco*), an Italian painter, was born about 1627. He was first instructed by Guido, and then entered the school of Simone Cantarini. He painted two histories of *St. Anthony* in the church of that saint at Pesaro, and the *Descent of the Holy Ghost* in one of the churches of Bologna. It is said that he was employed at the court of Parma. He died Oct. 2, 1705. See Spooner, *Biog. Hist. of the Fine Arts*, s. v.

Venatorius, THOMAS, whose real name was *Gehauuff*, takes rank as the earliest Protestant writer in the department of ethics. He was born about 1488 at Nuremberg, and received a liberal education at several universities. His earliest essay in literature was the publication, in 1514, of the works of Archimedes, and this was followed in 1531 by a metrical translation of the *Plutus* of Aristophanes and by an issue of Pirckheimer's *Anabasis*. After completing his university course, he entered the Order of Dominican monks, and in 1520 took up his abode at Nuremberg, where he gave himself zealously to the work of promoting the reformatory movements then rife. He became preacher in the Hospital and the Dominican churches in 1523, and ten years later pastor of the Church of St. James. In 1524 he helped to introduce Osiander's *Guten Unterricht . . . aus göttlicher Schrift*; in 1525 he participated in the religious colloquy which determined the case of the Gospel in Nuremberg; and in 1526 he began the issue of that series of theological works for which he is chiefly noted with the book *Axiomata Rerum Christianarum*. His next work was a *Defensio pro Baptismo et Fide Parentum*, directed against the Anabaptist theories (1527). The most important work of Venatorius is the *De Virtute Christiana* (1529), in three books. Its starting-point is the Osiandrian idea of faith [see OSIANDER], and the line of its argument is to show that faith is the centre and sum of Christian virtue and the principle from which springs the performance of all good works. The success of the work was hindered by the dogmatic opposition of Lutheran theology and the author's Osiandrian leanings; but it deserved notice for its real value as well as for the reason that it was unquestionably the earliest independent Protestant essay in the field of ethics. In 1534 Venatorius wrote an *Epistola Apologetica de Sola Fide Justificante*, etc., which shows that he had come over to the orthodox Lutheran view of justification, though he still continued his relations of friendship with Osiander. After a temporary sojourn at Rottenburg in the interest of the Reformation, in 1544, he

returned to his Nuremberg parish, and remained in the exercise of his pastoral functions and literary labors until he died, Feb. 4, 1551. See Will, *Nürnberg. Gelehrten-Lexikon*, iv, 83 sq.; and an art. in the *Stud. u. Krit.*, 1850, No. 4; also Herzog, *Real-Encyclop.*, s. v.

Vence, HENRI FRANÇOIS DE, a French Hebraist, was born about 1675 at Parcé, in Voivre (Barois). Having entered the monastic ranks, he graduated at the Sorbonne; and after being preceptor to the children of Leopold, duke of Lorraine, he was rewarded by being appointed provost of the Church of Nancy. He superintended the printing of the *Bible* of De Carrières (Nancy, 1738-43, 22 vols. 12mo), and added numerous dissertations, which were afterwards inserted in Calmet's *Bible* (1748-50, and later). He died at Nancy, Nov. 1, 1749. See Hoefler, *Nour. Biog. Générale*, s. v.

Vendidad, in the Parsee philosophy, is the twentieth *nosh*, or division, of the *Zendavesta* (q. v.). It is in the form of a dialogue between Ormuzd (q. v.) and Zoroaster (q. v.).

Venefici (*poisoners*, *sorcerers*) were magicians who practice their arts against the lives of men. In the laws of the early Christian emperors of Rome, which granted indulgence to criminals at the Easter festival, the *Venefici* were always excepted as guilty of too heinous a crime to be comprised within the general pardon granted to other offenders. See Bingham, *Christ. Antiq.*, bk. xvi, ch. v, § 5.

Venema, HERMAN, D.D., a learned Dutch divine, was born at Wildervank in 1697. He was successively pastor at Dronryp, and professor of theology and university preacher at Franeker. He died in 1787. He was a voluminous writer in all departments of sacred science. He published, *Institutiones Historiæ Ecclesiæ Veteris et Novi Testamenti* (1777);—*Dissertationum Sacrarum Libri Tres* (1731);—*Commentarius ad Librum Eleticum-propheticum Malachie* (1759);—*Dissertationes ad Librum Genesios* (1747);—*Commentarius ad Psalmos* (1762-67);—*Commentarius ad Librum Prophetiarum Jeremiæ* (1765);—*Lectiones Academicæ ad Ezechielem* (1790);—*Dissertationes ad Vaticinia Danielis Emblematica* (1745);—*Commentarius ad Daniel*, (1768);—*Sermones Academici vice Commentarii ad Librum Prophetiarum Zachariæ* (1787);—*Opuscula Inedita* (1781);—*Prelectiones de Methodo Prophetica*.

Venerable is the title given to archdeacons in the English Church.

VENERABLE BEDE. See BEDE.

Venēta Versio. The Library of St. Mark's, at Venice, is in possession of a MS. containing a Greek version, by some unknown author in the Middle Ages, of various books of the Old Test.—namely, the Pentateuch, Proverbs, Ruth, Canticles, Ecclesiastes, Lamentations, and Daniel. The Pentateuch was edited by Ammon (Erlang. 1790-91, 3 vols.); the other parts by John Casp. d'Ansse de Villoison (Strasb. 1784, 1 vol. 8vo). There is no evidence that Holmes even used it in his edition of the Sept. De Rossi, in his *Varie Lectiones*, has given some readings of it; but so long as the whole was not published, no certainty as to its merits or demerits could be given. Since 1875 the entire version has been given to the public in the edition published by Gebhardt. From the introduction of the editor, and the preface by Delitzsch, we see that the translation was made in the 14th century by a certain Elissæus who lived at the court of Murad I at Brusa and Adrianople. The translator was a Jew, perhaps a Jewish convert, as Gebhardt thinks. See GREEK VERSIONS.

The internal character of the version shows that it was made directly from the Hebrew. It is slavishly literal, word for word of the original being rendered into Attic Greek. In the Chaldee sections of Daniel the Doric is used. As it is impossible to adhere with rigid exactness to the words of the original, and at the same time present the elegancies of the Attic Greek, it is ob-

DAN. V.

1. Βελτεσαζρό βασιλεὺς ἐποίησεν ἑστίασαν μεγάλην τοῖσι μεριστάσιν ἐν χιλίοις, ἐνώπιον τε τῶν χιλίων ἀκρατῶν ἐπιτε.

2. Βελτεσαζρόσ ἐφα ἐν γείσει τῷ ἀκράτῳ ἐνεγκίαν ἀγγεα τὰ χρυσεὰ τὰ τ' ἀργύρεα, τὰ περ ἐξήνεγκε· νεβοχιζαδρόσος ὁ τήνω πατήρ ποτι τῷ ἱερῷ τῶν ἐν ἱερουσαλήμ, καὶ πίνουεν ἐν αὐτοῖς ὁ βασιλεὺς οἱ τ' αὐτῷ μεριστᾶτες, οἱ ἀκούσις οἱ χα παλλακαὶ οἱ.

Βαλτίσαρ ὁ βασιλεὺς ἐποίησεν δεῖπνον μέγα τοῖς μεριστάσι αὐτῶν ἀνδρίσιν χιλίοις, καὶ κατήναι τῶν χιλίων ὁ οἶνος, καὶ πίνων.

Βαλτίσαρ εἶπεν ἐν τῇ γείσει τοῦ οἴνου, τοῦ ἐνεγκεν τὰ σκευὴ τὰ χρυσεὰ καὶ τὰ ἀργυρὰ, ἃ ἐξήνεγκε· Ναβοχοδονόσορ ὁ πατήρ αὐτοῦ ἐκ τοῦ ναοῦ τοῦ ἐν ἱερουσαλήμ, καὶ πῖετσαν ἐν αὐτοῖς ὁ βασιλεὺς καὶ οἱ μεριστᾶτες αὐτοῦ καὶ αἱ παλλακαὶ αὐτοῦ καὶ αἱ παῖδοι αὐτοῦ.

(B. P.)

Veneto-Greek Version. See VENETA VERSIO.

Venetus, GEORG, a Lutheran theologian of Germany, was born at Venedig, in Prussia, whence he is also called *Venediger*. He studied at Königsberg and Wittenberg; was promoted in 1550 as doctor of theology; and appointed in 1552 professor of theology at Königsberg. Being opposed to the doctrines of Osiander, he had to leave his professorship, and went to Rostock as professor of theology and pastor of St. Nicolaus. In 1558 he was made superintendent at Colberg, in Pomerania; returned again, in 1567, to Prussia; was appointed bishop of Pomezan; and died at his episcopal see in Liebenmühl, Nov. 3, 1574. He wrote an exposition on the Epistle to the Romans in sermons, and a paraphrase on the Lord's Prayer. See Arnold, *Historie der Königsbergischen Universität*; Freher, *Theatrum Eruditorum*; Rollins, *Bibliotheca Nobilium Theologorum*; Jöcher, *Allgemeines Gelehrten-Lexikon*, s. v. (B. P.)

Venezia, LORENZO DA, a Venetian painter of the 14th century, is commended by Zanetti for his altarpiece in the Church of St. Anthony of Castello, for which he was paid three hundred gold ducats. Lanzi attributes to him a fresco, representing *Daniel in the Lion's Den*, in the Church of Mezzaratta, near Bologna, which appears to have been completed about 1370. See Spooner, *Biog. Hist. of the Fine Arts*, s. v.

Veneziano, AGOSTINO, a celebrated Italian engraver, was born in Venice near the close of the 15th century. He studied with Marcantonio Raimondi until the death of Raphael, in 1520, when he worked for himself. The large print of the *Skeletons*, or *Burying-place*, after Baccio Bandinelli, is his masterpiece. Among his other works are, *The Israelites Gathering the Manna* (Raphael);—*The Four Evangelists*, and a *Nativity* (after Julio Romano);—*Massacre of the Innocents* (Bandinelli);—*The Last Supper* (copied from a wood-cut of Albrecht Dürer. Nothing is known of him after 1536.

Vengeance (Gr. *Δίκη*), the heathen goddess of retribution (Lat. *Iustitia*), described as the daughter of Zeus (Hesiod, *Op.* 266) and Themis (*Theog.* 902) and the coadjutor (παῖς) of the former (Sophoc. *Ed. Col.* 1384; Arrian, *Alex.* iv, 9; see Montfaucon, *Antiq.* I, ii, 8). The punishment of murderers is particularly ascribed to her; and, therefore, besides being the goddess of punishment in a general sense, she is often to be considered the same as Nemesis or Vengeance (Eurip. *Med.* 1390; Dion Halic. xi, 37; see Mitscherlich, *ad* Horace, *Od.* iii, 2, 32; Palaist, *Obscr.* p. 347). The word occurs in Acts xxviii, 4, but its significance is there disguised in the A. V., which renders it "justice." See REVENGE.

Veni, Creātor Spiritus (*Come, Creator Spirit*), is the beginning of a grand Pentecostal hymn, generally ascribed to Charlemagne. The original runs thus:

"Veni, Creator Spiritus,
Mentes tuorum visita,
Imple superna gratia
Quæ tu creasti pectora.

"Qui Paracletus diceris
Deique donum altissimi,
Fons vivus, ignis, caritas
Et spiritalis unctio.

"Tu septiformis munere,
Dextre Dei tu digitus,
Tu rite promissum Patris
Sermonem ditans guttura.

"Accende lumen sensibus,
Infunde amorem cordibus,
Infirma nostri corporis
Virtute firmas perpeti.

"Hostem repellas longius
Pacemque dones protinus,
Ductore sic te prævio
Vitemus omne noxium.

"Per te sciamus, da, Patrem,
Noscamus atque Filium,
Te utrumque Spiritum
Credamus omni tempore.

"[Sit laus Patri cum Filio,
Sancto simul Paraclete,
Nobisque mittat Filius
Charisma Sancti Spiritus.]"

This hymn holds a peculiar place among the treasures which the ancient Church has transmitted to our service of song. It is not only a precious heirloom, but marks a period in the history of the Church, when, a great contest decided, the truth vindicated entered into the very life of the Church, and rang forth in gladsome accents of praise. Therefore it is, and ever will continue, the grand Pentecostal hymn—not merely from its contents, sublime as these are, but as the earliest full expression, in the language of praise, of the scriptural doctrine concerning the work and the person of the Holy Ghost, attained after long and bitter fight. But that battle has rolled away; not even its most distant echoes are heard in the hymn; and the *Veni Creator* is not a battle-song, not even one of victory, but of triumph and praise in the enjoyment of the fruits of victory. Occupying the most advanced position, and, indeed, the key to the whole, in the doctrine of the procession of the Holy Ghost from the Father and Son, holding it securely against all adversaries, the Church bursts forth in prayer for his coming and for his working, and in praise to his person, in that grand, full-toned Pentecostal hymn of the *Veni Creator*.

As already stated, popular tradition has ascribed the *Veni Creator* to Charlemagne, but this view is wholly untenable. The learned Mone (*Hymni Lat. Med. Ævi.* i, 241) states that this hymn existed in MSS. prior to the date of Charlemagne. Besides, that emperor was by no means sufficiently master of Latin—not to speak of Greek—to compose such a hymn in classical metre, so strictly observed as in this case. On the other hand, the evidence in favor of its composition by Gregory the Great is quite preponderating. Its contents and its form alike remind us of this author. To at least seven out of its twenty-four lines we can append strictly parallel passages and expressions from the undoubted writings of Gregory. Besides, it resembles not only in character, but in the use of certain peculiar words and terms, the other hymns of Gregory, of which eight are contained in the Benedictine edition of his works, while the learned Mone traces no fewer than twelve to his pen. Again, the character of prayer mingled with praise, and the classical metre with partial rhymes, are also peculiar to Gregory. The writer evidently knew Greek, as appears from the correct quantity in the word *Paracletus*, in line 5, whereas it is incorrectly given in line 26. Hence the whole of this concluding stanza, which we have put in brackets, is evidently a spurious addition. It is needless in itself, since the doxology is already contained in the four previous lines; and it differs from the rest of the hymn in its wrong metrification, and by its regular rhyme. Lastly, Gregory, in his hymns, not unfrequently borrows from Ambrose, and this is also notably the case in the *Veni Creator*. Not to speak of several imitations, lines 15 and 16 are taken word for word from a hymn of Ambrose, the *Veni Redemptor Gentium* (q. v.).

The historical position of *Veni Creator* in regard to the great doctrine of the procession of the Holy Ghost

may in some measure account both for the place which it occupied in the services of the Church and for the extravagant language in which mediæval writers refer to it. Anciently it was sung not only at Whitsuntide, but, as still in the Roman Catholic Church, on the most solemn occasions—at the election of a pope and of bishops, at the coronation of kings, at synods, and at the elevation and translation of the relics of saints. Its “more than ordinary worth and dignity” have been recognised by the Church of England, “when, dismissing every other hymn, she has yet retained this in the offices for the ordaining of priests and the consecrating of bishops.” It is certainly one of the most magnificent compositions, mingling prayer with praise—grand, full-chorded, rich in tone and melody, and at the same time soft, sweet, and touching. In a singular manner it unites the doctrinal with the practical—the full-rounded statement of scriptural truth with conscious need and joyous assurance.

This hymn has been translated repeatedly into English and German. The following in English is a free rendering by an unknown hand, first introduced into the office for the ordination of priests upon the revision of the liturgy of the Church of England in 1662, and runs thus:

“Come, Holy Ghost, our souls inspire
And lighten with celestial fire.
Thou the Anointing Spirit art,
Who dost thy sevenfold gifts impart.

“Thy blessed unction from above
Is comfort, life, and fire of love.
Enable with perpetual light
The dullness of our blinded sight.

“Anoint and cheer our soiled face
With the abundance of thy grace.
Keep far our foes; give peace at home.
Where thou art guide, no ill can come.

“Teach us to know the Father, Son,
And thee of both, to be but One.

“That through the ages all along
This may be our endless song:
‘Praise to thy eternal merit,
Father, Son, and Holy Spirit.’”

In German it is found in the collections of Büssler, Simrock, Königsfeld, Rambach, etc. (B. P.)

Veni, Redemptor Gentium (*Come, Redeemer of the nations*), is the beginning of the famous Advent hymn written by St. Ambrose. It is “the best of the Ambrosian hymns, full of faith, rugged vigor, austere simplicity, and bold contrasts.” The German hymn-book is indebted to this immortal hymn of St. Ambrose for one of its choicest treasures: namely, John Frank’s Advent hymn, commencing—

“Komm, Heidenheiland Lüssgeld,
Komm, schönste Sonne dieser Welt,
Lass abwärts flammen deinen Schein,
Denn so will Gott geboren sein.”

“It is not a translation,” says Trench, but “a free recomposition of the original, beside which it is well-nigh worthy to stand.” The first lines of the original run thus:

“Veni, Redemptor gentium,
Ostende partum Virginis;
Miretur omne sæculum:
Talis decet partus Dæm.
Non ex virili semine,
Sed mystico spiramine,
Verbum Dei factum est caro,
Fructusque ventris floruit,” etc.

It has been translated into English by Mrs. Charles Neale and others. The latest is that of Dr. R. Palmer, and given in Schaff’s *Christ in Song*:

“O thou Redeemer of our race!
Come, show the Virgin’s Son to earth;
Let every age admire the grace;
Worthy a God thy human birth!
‘Twas by no mortal will or aid,
But by the Holy Spirit’s might,
That flesh the Word of God was made,
A babe yet waiting for the light,” etc.

It was also translated into German as early as the 15th century. It became better known through Luther’s translation, *Nun komm der Heiden Heiland* (Eng. transl. in Pick, *Luther as a Hymnist*). It is also found in the collections of Latin and German hymns of Büssler, Simrock, Königsfeld, and others. (B. P.)

Veni, Sancte Spiritus (*Come, Holy Spirit*). This hymn, which Trench declares to be the loveliest of all the hymns in the whole circle of Latin sacred poetry, and which dean Stanley calls “the most beautiful of all Latin hymns,” is generally ascribed to Robert II, king of France. Whether he really was its author or not cannot now be ascertained. Trench does not hesitate to ascribe it to him. But whoever was its author, the Church has reason to be thankful for this precious jewel of sacred poetry. This hymn, which is appointed in the Roman Church for Whitsuntide, and is contained in Luther’s *Form of Ordination*, runs thus in the original:

“Veni, Sancte Spiritus,
Et emitte celitus
Lucis tue radium.
Veni, Pater pauperum,
Veni, Dator numerum,
Veni, Lumen cordium:

“Consolator optime,
Dulcis hospes animæ,
Dulce refrigerium:
In labore requies,
In æstu temperies,
In fletu solatium.

“O lux beatissima,
Reple cordis intima
Tutorum fidelium.
Sine tuo numine
Nihil est in homine,
Nihil est innoxium.

“Lava quod est sordidum,
Ligra quod est aridum.
Sana quod est sanctum:
Flecte quod est rigidum,
Fove quod est languidum,
Rege quod est devium.

“Da tuis fidelibus
In te confidentibus
Sacrum septenarium;
Da virtutis meritum,
Da salutis exitum,
Da perenne gaudium.”

It has very often been translated into English, and one of the latest is the translation made by dean Stanley, running thus:

“Come, Holy Spirit, from above,
And from the realms of light and love
Thine own bright rays impart.
Come, Father of the fatherless,
Come, Giver of all happiness,
Come, Lamp of every heart;

“O thou, of comforters the best,
O thou, the soul’s most welcome guest,
O thou, our sweet repose,
Our resting-place from life’s long care,
Our shadow from the world’s fierce glare,
Our solace in all woes.

“O Light divine, all light excelling,
Fill with thyself the inmost dwelling
Of souls sincere and lowly;
Without thy pure divinity,
Nothing in all humanity,
Nothing is strong or holy.

“Wash out each dark and sordid stain,
Water each dry and arid plain,
Raise up the bruised reed,
Enkindle what is cold and chill,
Relax the stiff and stubborn will,
Guide those that guidance need.

“Give to the good, who find in thee
The Spirit’s perfect liberty,
Thy sevenfold power and love.
Give virtue strength its crown to win,
Give struggling souls their rest from sin,
Give endless peace above.”

As this hymn has held a place with the most esteemed in both the Romish and the Protestant Church, it could not fail that Germany should also contribute her

share in its translation; and thus, as early as 1511, it was translated by Witzel: *Komm, heiliger Geist, wahrer Gott*, and has ever since found its admirers. (B. 1.)

Venia (*favor*) is an ancient term, signifying a monastic token of reverence, respect, or greeting, with which strangers and dignitaries were received on visiting the monastery.

Venial Sin is a sin which, according to the theology invented by the schoolmen and adopted by the Church of Rome, does not bring spiritual death, or does not turn it away from its ultimate end. As a violation of the law of God, such a sin is somewhat subversive of its true end; nevertheless, it is too small and insignificant to wholly subvert it, and therefore pardonable. These sins are divided into *objective* venial sins, where the matter of the sin is very small, and *subjective* venial sins, where the sinner commits the transgression without full advertence or consent. It is certain that, as the smallest sins contain in them rebellion against the supreme authority of God, they must be in their own nature mortal, or deserving of death; and, on the other hand, there is no sin so great that it will not be forgiven on repentance and faith in the atonement. Hence the distinction between *venial* sins and *mortal* sins will not hold. See MORTAL SIN.

Venice, COUNCIL OF (*Concilium Venetum*). Venice is a fortified city of Italy, capital of the province of the same name, situated in the lagoons of Venice, on eighty islands, at the head of the Adriatic. An ecclesiastical council was held here in 1177 by pope Alexander III, assisted by his cardinals and several bishops from Italy, Germany, Lombardy, and Tuscany. The emperor Frederick, who had previously renounced the schism and made peace with Alexander, was present. The pope pronounced sentence of excommunication against all troublers of the peace. See Mansi, *Concil. x*, 1481.—London, *Manual of Councils*, p. 674.

Venier, PIETRO, an Italian painter, was born in Udine in the latter part of the 17th century. He studied at Venice and executed many works, both in oil and fresco. His best works are said to be some frescos in the ceiling of the Church of San Jacopo at Udine. He died in 1737. See Spooner, *Biog. Hist. of the Fine Arts*, s. v.

Venilia, in ancient Italian mythology, was a sister of Amata (queen of the Latins and mother of Lavinia), mother of Turnus. She is thought to have been the wife of Faunus.

Venison (וֶנִיז or וְנִיז, *hunting* [as often], hence the product of the chase, i. e. food), the flesh of any wild animal (Gen. xxv, 28; xxvii, 3-31). See HUNTING.

Venite Adorémus (*Oh come, let us worship*) is the refrain of the hymn *Adeste Fideles*, sung at Christmas-tide.

Venite Exultemus Domino (or *Venite*, "O, come ye"), a psalm (the 95th) or canticle appointed to be sung in the matins service of the Church of England immediately before the psalms of the day, except on Easter-Sunday and on the 19th day of the month, when it is sung in the ordinary course of the psalms. In the English Prayer-book the *Venite* comprehends the whole of the 95th Psalm. But the latter part, being considered as referring chiefly to the Jews, has been omitted in the American revision, and its place supplied by two verses from the following psalm. In the form of prayer for the visitation of prisoners, and in that for Thanksgiving-day, a substitute is provided to be used instead of the *Venite*. See Staunton, *Dict. of the Church*, s. v.

Venius (or **Van Veen**). OTTO, an eminent Dutch painter, was born at Leyden in 1556. He received a classical education, and was instructed in design by Isaac Nicholas, and in painting by Jodocus Van Wijn-

ghen. On account of the civil wars, he retired to Liege, and, through the influence of cardinal Grosbeck, he went to Rome, where he entered the school of Federico Zuccaro, at the same time studying diligently the works of the masters. He remained several years in Italy, and then set out for home. He stopped on the way at Vienna in the service of the emperor, and at Munich and Cologne, where he executed several works for the duke of Bavaria. On his arrival at Brussels, he entered into the service of Alessandro Farnese, prince of Parma, at that time governor of the Netherlands. He painted the portrait of the prince and several historical works, which established his reputation as one of the foremost artists of his time. After the death of Farnese, he went to Antwerp, where he was employed to execute some works for the churches and public edifices, and opened an academy in which he had the honor of instructing Rubens. He afterwards went to Brussels in the service of the archduke Albert, where he remained until his death, in 1634. Among his most important paintings are the *Last Supper*, in the Cathedral of Antwerp;—the *Marriage of St. Catherine*, in the Church of the Capuchins at Brussels;—the *Resurrection of Lazarus*, at Ghent;—and the *Adoration of the Magi*, at Bruges. He was also distinguished in literature. He published, among others, the *War of the Batarians*, from Tacitus;—*Horace's Emblems, with Observations*;—*Life of Thomas Aquinas*;—and *Emblems of Love, Divine and Profane*. See Spooner, *Biog. Hist. of the Fine Arts*, s. v.

Venn, Henry, a pious clergyman of the Church of England, was born at Barnes, Surrey, March 2, 1724. He was descended from a long line of ancestry who had been clergymen in the English Church, and was early destined by his parents to perpetuate the succession. Accordingly, he was educated at Bristol and at Jesus College, Cambridge, where he graduated in 1745; he also obtained a Reestat fellowship in Jesus College, where he remained until 1749. He took holy orders in 1747, but was not yet converted. Upon due meditation, however, he was led to see his true condition, and sought and obtained rest for his soul. He was ever after a pious and devoted Christian. In 1750 he accepted the curacies of Friday Street, London, and West Horsley, Surrey; and in 1754 he was appointed curate of Clapham, which he served five years, preaching the doctrines of grace for which his labors were so famous. He became vicar of Huddersfield in 1759, and rector of Yelling, Huntingdonshire, in 1770. He died at Clapham, June 24, 1797. His last rectory was in an obscure country parish; but Mr. Venn had access to the students of Cambridge, and exercised a highly beneficial influence in infusing into their minds evangelical principle and holy aspirations. Such were Robinson of Leicester, Simeon of Cambridge, Prof. Farrish, and others. Among other works, he published *The Complete Duty of Man, or a System of Doctrinal and Practical Christianity* (1763), a work which has obtained great popularity. His *Life and Letters* were published in 1834, edited by his grandson, Rev. Henry Venn. See *Church of England Magazine*, i. 390; *Christian Guardian*, p. 401, 441; Allibone, *Dict. of Brit. and Amer. Authors*, s. v.

Venn, John, a clergyman of the Church of England, son of Henry Venn of Barnes (q. v.), was born at Clapham in 1759. He was educated at Sidney Sussex College, Cambridge; instituted to the living of Little Dunham, Norfolk, in 1783; became rector of Clapham in 1792. He died at Clapham, July 1, 1815. His *Sermons*, with *Memoir*, were published in three volumes (1814-16). He also contributed many valuable articles to the *Christian Observer*, and wrote some minor works. See *Christian Observer*, 1813, p. 479; Allibone, *Dict. of Brit. and Amer. Authors*, s. v.

Venning, RALPH, a Nonconformist divine, was born about 1620, and educated in Emmanuel College, Cambridge. He does not seem to have had any preferment

in the Church, except the lectureship of St. Olave's, Southwark, from which he was ejected for Nonconformity. Much of his time was given to literary pursuits. He died March 10, 1673.

Ventidius (fully P. VENTIDIUS BASSUS), a Picenian who had been taken captive by the Romans, and afterwards rose through many low employments to the rank of consul in consequence of his military aid during the wars of the triumvirate. He was sent by Marc Antony as his legate into Asia (B.C. 39), and in the end took possession of nearly the entire country, defeating the Parthians, and finally gaining a triumph at Rome, B.C. 36. These exploits are recited by Josephus (*Ant.* xiv, 15 sq.) and the Roman historians. See Smith, *Dict. of Class. Biog.* s. v.

Ventura, GIOACCHINO, an Italian philosopher of the scholastic type, was born at Palermo, Dec. 8, 1792. He early became a member of the Order of Theatines, of which he was soon elected superior-general, and held a high position in the Church. He was a prominent supporter of the reforms inaugurated by Pius IX., and a warm champion of popular rights. But in philosophy he maintained the fundamental idea of scholasticism, placing the authority of the Church above reason, human conscience, or any other sovereignty. He died at Versailles, Aug. 3, 1861. The following are his chief works: *De Methodo Philosophandi* (1828):—*De la Vraie et de la Fausse Philosophie* (1852):—*La Tradition et les Semipélagiens de la Philosophie* (1854):—*La Raison Philosophique et Catholique* (1854):—*La Philosophie Chrétienne* (1861). See Ueberweg, *History of Philosophy*, ii, 511.

Venturini, Gasparo, a painter of Ferrara, flourished about 1594. He first studied under Domenico Mona, and then went to Genoa, where he became the disciple of Bernardo Castelli. He executed some works for the churches, but wrought mostly for individuals. See Spooner, *Biog. Hist. of the Fine Arts*, s. v.

Venturini, Karl, a Protestant theologian of Germany and doctor of philosophy, was born at Brunswick, Jan. 30, 1771, and died in 1849. He is the author of, *Geist der kritischen Philosophie in Beziehung auf Moral u. Religion* (Altona, 1796-97):—*Natürliche Geschichte des grossen Propheten von Nazareth* (1800-2, 3 pts.):—*Nachtrag dazu* (Copenhagen, 1802):—*Geschichte des Urchristenthums im Zusammenhang mit der natürlichen Geschichte des grossen Propheten* (ibid. 1807-9, 2 vols.). Under the name of Phosphor he published *Om religiösen Scheindel, eller somtelser sig nærerlich i dem Streite der preussischen Regierung mit der römischen Curie zur Schau gestellt hat* (Brunswick, 1839). See Winer, *Handbuch der theol. Literatur*, i, 284, 379; ii, 203; Zuchold, *Bibl. Theolog.* ii, 995; *Theologisches Universal-Lexikon*, s. v. (B. P.)

Venulus, in ancient Italian mythology, was a Latinian whom Latinus fruitlessly sent to Diomedes, in Arpi, to secure help against Æneas.

Venus, the goddess of (sexual) love among the Romans, corresponding to *Aphrodite* among the Greeks, and in later times confounded with the Oriental deities represented by Mylitta, Ashtoreth (q. v.), etc. The popular myths concerning her origin are various. By some she is represented as the daughter of Jupiter and Dione, but she was poetically said to have sprung from the foam of the sea. She became the wife of Vulcan, but her amours with nearly all the gods and with many mortals were the scandal of heaven and earth. She is depicted under various aspects, but mostly those of unchastity.

As the creatress of the world, called *genetrix*, the Venus Urania of the Romans and Greeks was sometimes depicted as Androgyne, and even in a manner still more offensive; and this symbolism seems to typify the fact that Venus was feminine, but powerless if alone. When she was delineated with a mural crown, the idea embodied was that she became a mother by her own in-

herent power. Her frequent symbol was the crescent moon. See *QUEEN OF HEAVEN*. Layard (*Ninereh*, ii, 345) identifies her with the Hera of classical antiquity, and states that among the Assyrians she sometimes held a serpent in one hand, as in an Egyptian tablet. As a female winged figure, partly naked, and presiding over generation, she is introduced into embroideries of robes in the most ancient palace of Minerva. But the absence of her obscene symbols in the Assyrian monuments in general is in remarkable contrast with representations in other Asiatic religions. Rude images of this goddess in baked clay have been disinterred among the ruins of Bagdad (Layard, *Babylon*, p. 407).

Figures of the Assyrian Venus.

Her worship was of general prevalence among the pagan nations of antiquity, and meets us at two or three points of special Biblical interest. It was an impure form of the same worship which presented its more scientific aspect in that of the temple at Ephesus (q. v.)—the personification of the productive powers of nature; and there seems to have been the same relation between the rites at Ephesus and Sardis and those at Paphos that exists even at this time between what is called the right-handed and the left-handed worship of the goddess Parvati in India. Among many proofs of this, the image of the idol itself may be adduced. It was not a human figure. Tacitus (*Hist.* ii, 3) describes it as conical, and states that the reason why Venus should be worshipped under such a form was not clear. Maximus Tyrius (*Diss.* viii, 8) speaks of it as a white pyramid; and there can be no doubt that it was intended to represent the same idea as the conical stone of which, in later times, Heliogabalus announced himself to be the priest. Artemis at Ephesus, the sun at Emesa, and Aphrodite at Paphos were symbols or personifications of the same attribute—the universal mother; the plastic or all-forming deity, and the productive impulse of nature, were all middle terms for the divine creating energy. Unhappily the impurities of the East were transferred to Paphos (q. v.), and the worship of Venus became a scandal even to the pagan world. The temple at this city was like that of Astarte at Carthage, and the episode of Thamuz was introduced into the myth with a change of name to Adonis. It appears, too, that models of the sacred image were sold at Paphos, just as silver shrines were at Ephesus; and Athenæus (xv, 18) tells a story of one Erostratus who was saved from shipwreck through the possession of such an image.

VENUS (*Frau*), in Northern fable. In Thuringia there is said to have lived a fecund-queen named Frau Venus, who chose the Hørselberg as her province. About her she collected a ravishing court of joy and bliss, and they who became her subjects were overloaded with all the happiness and enjoyment which the most licentious passions might desire; but they, however, lost their soul's salvation thereby. Among the thus living persons, the fabulous stories make mention

Temple of the Paphian Venus Restored.

especially of one Tannhäuser, a warrior, who, after having lived a number of years in Venusberg, was suddenly seized with a feeling of repentance, and accordingly went to the pope of Rome to do penance and ask for mercy. The pope called his attention to his staff, and said that when that staff should again begin to bear leaves and blossom, then should he receive forgiveness. Tannhäuser left the presence of the pope discouraged, but in the course of a few days the staff began to grow green and bear blossoms. Then the pope sought for Tannhäuser everywhere; but he was not to be found, for he had returned again to Venusberg, where he will remain in all the ages of eternity (comp. Eckhardt). It is only since the 14th century that the first stories of the Venusberg appear. At about this time, therefore, it seems that the German *Holda-Frigga* was changed into Venus.—Vollmer, *Wörterb. d. Mythol.* s. v.

Venusti, MARCELLO, an Italian painter, was born at Mantua in 1515. He studied under Pierino del Vaga in his native city, and afterwards went to Rome, where he entered into the service of Michael Angelo, from whom he received instruction. He imitated the style of that great master with excellent success, and executed many of his designs. Besides these, he planned and executed many works for the churches of Rome, both in oil and fresco, which are admired for the grandeur of their composition, elegance of design, beauty of coloring, and neatness of finish. He died in 1576. See Spooner, *Biog. Hist. of the Fine Arts*, s. v.

Veracini, AGOSTINO, a Florentine painter of the 18th century, studied under Sebastiano Ricci. He executed some works for the churches of Florence, which gained him considerable reputation. He died in 1762. See Spooner, *Biog. Hist. of the Fine Arts*, s. v.

Veracity of God is his truth, or an exact corre-

spondence and conformity between his Word and his mind. Moses says, "He is a God of truth." He is true in and of himself; he truly and really exists; he is the true and living God; all his perfections are true and real; truth is essential to him; it is pure and perfect in him; it is the first and original in him; he is the fountain of truth; all his works in creation, providence, and grace are according to truth.—Buck, *Theol. Dict.* s. v. See TRUTH.

Verbal Inspiration. See INSPIRATION.

Verberic, COUNCILS OF (*Concilium Verbericense*). Verberic is in the diocese of Soissons, a fortified town of France, department of Aisne, twenty miles south-west of Laon, on the left bank of the Aisne. Two ecclesiastical councils were held here, as follows:

I. Was held in 753, by order of king Pepin. This council was, properly speaking, a national assembly. Twenty-one canons were published, chiefly relating to the subject of marriages.

1. Declares that the marriages of relatives to the third degree of consanguinity are utterly null, so that the parties so married are at liberty, after penance, to marry others. That those who are related only in the fourth degree shall not be separated if married, but be put to penance.

3. Forbids a priest to marry, under pain of losing his rank. Forbids any one to marry the wife of a man who has been made priest.

5. Permits a man whose wife has conspired to murder him to put her away, and to marry another.

6. Permits those persons who have married slaves, under the idea of their being free, to marry again.

9. Declares that in cases in which men are absolutely obliged to leave their place of abode to go to live elsewhere, if their wives refuse to go with them for no other reason than their affection for their country, or relations, or property, it shall be lawful for the husband to marry another, but not for the wife who remains behind.

14. Forbids bishops, when travelling out of their own

diocese, to ordain priests, and orders that persons so ordained, if they be really worthy of the priesthood, shall be ordained again.

15. Allows a degraded priest to baptize a sick person in case of necessity.

16. Forbids clerks to wear arms.

19. Forbids married slaves who are sold separately to different masters to marry others, although they have no hope of ever being united again.

21. Enacts that a husband who has permitted his wife to take the veil shall not marry another.

See Mansi, *Côncil.* vi. 1656.

11. Was held in 869, twenty bishops being present, with Charles the Bald. Hincmar of Laon was accused, and appealed to the pope. He, at the same time, demanded leave to go to Rome, which, at the instigation of his uncle, was refused, but the proceedings against him were suspended. See Mansi, *Côncil.* viii. 1527.—Landon, *Manual of Councils*, p. 675.

Verbiest, FERDINAND, a Belgian missionary and astronomer, was born at Pitthem, West Flanders, Oct. 9, 1623. He studied at Contrai and Louvain, and graduated at Seville in 1655. Having entered the Order of the Jesuits, he studied astronomy under Tarquet and Schall, and then set out to preach in China in 1657. There he underwent various fortunes, travelling and writing astronomical and other works, chiefly employed by the Chinese emperor, until his death, at Peking, Jan. 23, 1688. See Hoefer, *Nour.* *Biog. Générale*, s. v.

Verbrugge, OTTO, a German doctor and professor of theology and Oriental languages, who flourished towards the middle of the 18th century at Gröningen, is the author of *Dissertatio de Trichotomia in Libros Mosaiscos*, etc. (Lingen, 1713):—*Observationes Philologicæ de Nominum Hebræorum Plurali Numero* (Gröningen, 1730; 2d ed. Erlangen, 1752):—*Oratio de Statu Indæorum Tempore Exilii Babylonici* (Gröningen, 1730). See Fürst, *Bibl. Jud.* iii. 472; Winer, *Handb. der theol. Lit.* i. 119; Steinschneider, *Bibl. Handb.* s. v. (B. P.).

Verbruggen (or **Terbruggen**), **Henry**, a Dutch painter, was born at Utrecht in 1588. He first studied under Abraham Bloemaert, and then went to Italy, where he studied ten years at Rome and Naples. He acquired considerable reputation there, and executed several works for the churches, one of the best of which was a *Deposition from the Cross*, in one of the churches of Naples. He afterwards went to Holland and settled at Middelburg. He was admired by Rubens. He died at Utrecht in 1629. See Spooner, *Biog. Hist. of the Fine Arts*, s. v.

Verbruggen, **Henry Francis** and **Peter**, two sculptors and wood-carvers of Antwerp, whose date and history are not known, are said to have executed various excellent works in the cathedral and churches of Antwerp, such as pulpits and confessionals, besides many carved decorations in noble mansions of Belgium. During the civil commotions, some of their works were sold and sent to England. See Spooner, *Biog. Hist. of the Fine Arts*, s. v.

Verbruyck, SAMUEL, one of the progressive clergymen of the Reformed (Dutch) Church in America, who established its independence of the Church in Holland, studied under dominies Leydt, Goetschius, and Vanderlinde. He was licensed by the Cetus, or American Classis, in 1749, and was settled at Tappan and New Hempstead (now Clarkstown), N. Y., from 1750 to 1784. He was an ardent friend of ministerial education in this country. His efforts to get a charter from the governor of New Jersey in 1761 for an academy so offended many of his people that they refused to pay his salary. The Conferentie party presented him to the Classis of Amsterdam for ecclesiastical censure, complaining that if he procured the charter for an academy, it would only multiply just such ministers as himself. But he outlived all this, and saw the full fruit of his labors and those of his noble coadjutors in the establishment of Queen's College in 1770, of which he was one of the first trustees appointed by the charter itself. Such names

and services deserve remembrance. Mr. Verbruyck was a godly minister, and of good repute among all but his adversaries in these ecclesiastical and educational conflicts. He died in 1784. See Corwin, *Manual of the Ref. Church*, s. v. (W. J. K. T.).

Vercellesi, SEBASTIANO, an Italian painter who lived about the middle of the 17th century, was born at Reggio. He was a disciple of Lionello Spada, and executed some works for the churches of his native city, but was mostly employed by private individuals. See Spooner, *Biog. Hist. of the Fine Arts*, s. v.

Vercelli, COUNCIL OF (*Concilium Vercellense*). Vercelli is a city of Italy, in Piedmont, province of Novara. An ecclesiastical council was held here in September, 1050, by pope Leo IX. Bishops attended from various nations. Berenger was cited to appear, but refused to attend. His errors were condemned, and the book of John Scotus upon the eucharist was burned. See Lanfranc, *De Corp. Dom.* lib. 4: Mansi, *Côncil.* ix. 1055.—Landon, *Manual of Councils*, p. 675.

Vercellone, CARLO, a Roman Catholic divine of Italy, was born Jan. 14, 1814, at Sordevolo, in Piedmont. In 1829 he joined the Barnabites at Turin, studied philosophy there, and afterwards theology at Rome. He was appointed president of the College of the Barnabites, and died Jan. 19, 1869. He is well known for his critical labors on the Vulgate, and published, *Varie Lectiones Vulgate Latine Editionis Bibliorum* (Rome, 1860-64, 2 vols.):—*Dissertationi Accademiche di Vario Argomento* (ibid. 1864), with the following contents:

- i. Di un Biblico Codice Palimpsesto della Biblioteca Vaticana proveniente dal Monasterio di Bobbio, p. 1.

Verdour is an old English word signifying *hangings* for a room or bed, on which are represented trees, flowers, and grasses; also an altar-hanging, powdered with green leaves and flowers.

Verdun, COUNCIL OF (*Concilium Virdunense*). Verdun is a town of France, twenty-eight miles north of Bar-le-Duc, on the Meuse, at the head of navigation. An ecclesiastical council was held there in November, 947, by seven bishops, who confirmed Artaldus in the possession of the see of Rheims, which Hugo disputed with him. See Mansi, *Côncil.* ix. 622.—Landon, *Manual of Councils*, p. 675.

Verēna, a virgin who is said to have accompanied the Thebaic legion of Mauritius, in the 3d century, from

Upper Egypt to the West, either as the kinswoman of Mauritius or as the bride of Victor, who was one of the soldiers. She tarried at Milan in the house of a certain Maximus, and there learned the fate of the legion, but, nevertheless, followed it to Helvetia. She settled in the vicinity of Solothurn, obtaining a livelihood by personal labor, and aiding, not without the performing of many wonders, in the work of converting the Alemanni. Her zeal in this latter work led to her imprisonment by a Roman prætor; but her confinement was cheered by a visit from the sainted Mauritius, and the prætor himself was soon compelled to seek relief from a severe illness at her hands. After liberation she removed to the junction of the Aar and the Rhine, and by her miraculous power expelled every snake from an island which these reptiles had overrun. She died at Zurzach, near Costnitz, where her remains yet repose. The legend is wholly dependent on the thoroughly mythical tradition of Mauritius and the Thebaic legion (q. v.). See Rettberg, *Kirchengesch. Deutschlands*, i, 108 sq.; also *Martyrol. Notkeri* in Canisius, *Leet. Antiq.* ii, 3, p. 170, and the Bolland. *Acta SS.* i, in each case under Sept. 1.—Herzog, *Real-Encyclop.* s. v.

Verga, Solomon ben-, a Jewish historian, was born in Spain in 1450, where he practiced medicine. He is the author of סֵפֶר דְּהִיּוֹת, *the Sceptre of Judah*, a Jewish history, composed in part from notes left by his father, and afterwards continued by his son, rabbi Joseph ben-Solomon, of Adrianople. The book itself tells us that its author was employed by the Spanish synagogues in several difficult negotiations during the later years of his residence in the Peninsula. We have but few particulars of his life, after he shared in the banishment of his brethren; even the year of his death is unknown. The *Sceptre of Judah*, which was published first in Adrianople in 1544, and often since, was translated into Jewish-German in 1591, and often; into Spanish by Meir de Leon (Amsterdam, 1640); into Latin by Gentius (*ibid.* 1651); but the best translation is the German of M. Wiener (Hanover, 1855, 1856, 2 vols.). Extracts in German are also given by Eisenmenger in *Neu entdecktes Judenthum*, vol. i; by Schudt, *Jüdische Denkwürdigkeiten*, vol. i; and by Zedner, *Auswahl historischer Stücke aus hebr. Schriftstellern* (Berlin, 1840), p. 96 sq. See Fürst, *Bibl. Jud.* iii, 473 sq.; De' Rossi, *Dizionario Storico* (Germ. transl.), s. 326; Fenn, *Sepphardim*, p. 456; Steinsehneider, *Jewish Literature*, p. 251; Da Costa, *Israel and the Gentiles*, p. 398 sq.; Grätz, *Gesch. d. Juden*, ix, 343 sq. (B. P.)

Vergara, Jose, a Spanish painter, was born at Valencia in 1726. He displayed fine artistic powers at an early age. He adopted the style of the prints of Spagnoletto, and studied the works of Coppel and Paolo de Matteis. He painted many portraits and numerous pictures for the churches of Valencia and neighboring cities, in oil, fresco, and distemper. The most noted of his paintings are the *Conception of the Virgin*, in the Convent of San Francisco, at Valencia; and *Telemachus and Mentor*, in the Academy of San Ferdinando. He was chosen director of the Academy of San Carlos, at Valencia, and held the office until his death, in 1799. See Spooner, *Biog. Hist. of the Fine Arts*, s. v.

Vergara, Juan de, a Spanish artist, son and pupil of Nicolas, was born at Toledo about 1540. He was distinguished as a painter, sculptor, and architect, and assisted his father and brother in the execution of the glass paintings in the cathedral, which occupied about forty years. After his father's death he directed the works in painting and sculpture in the cathedral. He was very intimate with El Mudo. He died in 1606. See Spooner, *Biog. Hist. of the Fine Arts*, s. v.

Vergara, Nicolas de (the Elder), a Spanish painter and sculptor, was born at Toledo about 1510. His works are to be found chiefly in the Cathedral of Toledo, where he directed the painting and sculpture from

1542, for a period of thirty-two years. He also executed a part of the paintings on glass in the same edifice, which were continued and completed by his sons, Nicolas and Juan. He died in 1574. See Spooner, *Biog. Hist. of the Fine Arts*, s. v.

Verge (Lat. *virga*) is a staff of wood or metal, surmounted with a figure, emblem, or device, borne before a bishop, dean, rector, or vicar, in entering or leaving church, and on other public occasions. Several specimens of verges of the period of the Restoration, made of precious metals, exist in some of the churches of London. The term is also used for a rod or staff carried as an emblem of authority; also a stick or wand with which people are admitted tenants, by holding it in the hand and swearing fealty to the owner.—Lee, *Glossary of Liturg. Terms*, s. v.

Verge (*viagifer, bastiarius*) is an officer of the Church of England and Continental churches, who carries the verge (q. v.) before the bishop, dean, or other dignitary. On the Continent they are sometimes fantastically dressed.

Verge (or **Vergier**), DE HAURENE. See DUVERGER.

Vergerius, Peter Paul (the Younger), an Italian jurist, priest, and Reformer, ranks as one of the most noteworthy personages produced by the 16th century. He was born of noble parents in 1498, at Capo d'Istria, and was educated for the law at Padua. After graduation and the subsequent practice of his profession in different Italian cities, he went to Rome, and was appointed, under pope Clement VII., papal nuncio to Germany, for the purpose of preventing the convoking of a national council. A similar mission was intrusted to him by Paul III., in connection with which he had interviews with Luther and the elector John Frederick. His services were rewarded with the dignity of titular bishop of Madrusium, in Croatia, and afterwards, in 1536, with the bishopric of his native town. The curious feature is mentioned in this connection that Vergerius spent ten years in Capo d'Istria before he obtained consecration to the priesthood and the episcopacy; and no light is thrown upon his occupations or the mode of administering his diocese during that period. In 1540 he visited Worms and took part in the colloquy there held, delivering, during its progress (Jan. 1, 1541), a pacific address in the interests of a general, and against the holding of a national council, which was censured at Rome as being too conciliatory. He at once returned home, and entered on the study of the writings of the Lutherans, in order that by refuting them he might demonstrate the soundness of his own orthodoxy; but he was himself converted by their arguments, and his brother Giovanni Battista, bishop of Pola, came to share his views. Both prelates now began to labor zealously for Christ, instructing the people publicly and in private, and urging them to lead godly lives. In Capo d'Istria, particularly, reforms in the monastic institution were energetically prosecuted; superstitions like the invoking of the aid of St. Rochus against pestilence, and of St. Anthony against erysipelas, were condemned; and traditional beliefs like the legends of St. George and St. Christopher were declared to be mythical. The consequence was that an investigation of the diocese was undertaken by a papal commission in 1545, and that the brothers Vergerius were cited before the legate Della Casa, patriarch of Aquileia. They protested and appealed to the Council of Trent, then just opened, and Peter Paul placed himself under the protection of cardinal Gonzaga of Mantua; but afterwards visited Trent, where his request to be permitted to speak in his defence was not allowed. A commission found him guilty of heresy. Soon afterwards he went to Padua, and visited the unhappy apostate Francis Spiera (q. v.) repeatedly, with the result to himself that he was confirmed in his devotion to the Gospel. He handed an apology to the suffragan of Padua, Dec. 13, 1548, in which, while not explicitly con-

ceding his adherence to the Reformation, he yet declares that the truth must be defended despite every inquisition. He then went to Basle. His brother had previously died, probably of poison.

The earliest field of Protestant labor for Vergerius was the villages in the Veltlin, in the Grisons, and he became pastor of the little village of Vicosoprano. His powerful sermons, in some instances, led the people to instantaneously abolish the mass and destroy their images. The field was not, however, commensurate with his desires, and his situation became unpleasant. He was obliged to take part in negotiations with the adherents of Servetus and Socinus among the immigrants from Italy; the region where he labored was predominantly and immovably on the side of Rome; he was dissatisfied with the established form of government in the Zwinglian churches, and incurred the charge of ambitious meddling, and also excited strong feeling by his advocacy of the Calvinian doctrine of the Lord's supper. In 1553 a synod framed a confession for the Grisons, and directed that all who would not subscribe to its tenets should be excluded from fellowship in the Church; and, though Vergerius had been the successful means of winning eight congregations from Rome to the Gospel, he was obliged to leave the country. He found a refuge with duke Christopher at Tübingen, and in a few months returned to his late home with the title of counsellor to that patron, after which he definitely established himself at Tübingen in September, 1553. Thenceforward he lived in privacy, except when employed in some bold missionary enterprise to unreclaimed countries. Poland was his favorite field, and was much indebted to him on account of his earnest evangelical labors. He also visited king Maximilian at Vienna in 1558, and presented him with practical evangelical writings, and was successful in inclining him to favor the Reformation. He revisited the Grisons on both evangelical and diplomatic missions, being especially influential in preparing for a renewal of the treaty between that canton and France. In addition to such labors, he occupied himself with the writing of numerous works—polemical, didactic, and exegetical. Among other works, he published the Bohemian confession of 1535; and, at about the same time, he showed inclination to connect himself with the Bohemian Church, having written in 1561 to its senior, in Little Poland, for admission to its fellowship. He was, however, deterred from consummating the arrangement by an unwillingness to make so important a change at the advanced age he had now reached. His motive had been the growing intolerance of the Lutheran Church, which denied peace and comfort to all who held the milder Melancthonian views. His request to be sent to the colloquy of Poissy in 1561, as the delegate of the German churches, was denied by the duke, because the Council of Trent would not grant no safe-conduct unless Vergerius should recognise the Romish Church. The greatest fault of Vergerius was a disposition to participate in every undertaking and to assert his own authority. He thus excited much opposition against himself. Many of his coreligionists of early times, as Della Casa and others, were guilty of unworthy assaults upon him; but many of the most prominent personages of the Papal Church gave him an excellent reputation. He died at Tübingen Oct. 4, 1565, and Andréa delivered a panegyric over his remains. See SIXT, P. P. *Vergerius*, etc. (Brunswick, 1855); and Herzog, *Real-Encyklop.* s. v.

Vergil, POLYDORÉ, a priest of the Roman Church and an ecclesiastical historian, was born at Urbino, Italy, about 1470. He acquired a considerable literary reputation by his *Proverbiorum Libellus* (1498) and *De Rerum Inventoribus* (1499). In 1501 he was sent to England by pope Alexander VI. to collect the papal tribute called Peter's pence, and was the last to hold that office. He remained in England the greater part of his life; became rector of Church-Langton, in Leicestershire; archdeacon of Wells in 1507; and a prebendary of Here-

ford and Lincoln the same year; then prebendary in St. Paul's, London, in 1513. When he had been in England nearly fifty years, he returned to Italy, having received a present of three hundred crowns and leave to hold his archdeaconry of Wells and his prebend at Hereford during life. He died in Italy about 1555. He was the friend of Erasmus, and wrote several works of value. His principal work is a voluminous Latin History of England, *Historiæ Angliæ Libri XXXVII* (Basle, 1533, fol.). Two volumes of an old English edition of this work were edited by Sir Henry Ellis for the Camden Society (1844-46). The Agathynian Club published (N. Y. 1868) a translation of his *De Rerum Inventoribus*, by John Langley, with an *Account of the Author and his Works*, by Dr. W. A. Hammond.

Verhaghen, PIETER JOZER, a Flemish painter, was born at Aerschot, South Brabant, about 1728. He studied with great diligence, and soon gained the patronage of prince Charles of Lorraine. He visited France, Sardinia, and Italy at the expense of the government; and while at Rome he painted two pictures which gained him considerable notoriety, one representing *Christ Crowned with Thorns*, and the other *Christ with the Disciples at Emmaus*. Through the fame of the latter he gained an audience with pope Clement XIV, who presented him with two gold medals. He afterwards visited Vienna, where he was patronized by the empress Maria Theresa, to whom he gave the picture of *Christ at Emmaus*. He returned to Louvain in 1773, where he was honored by the citizens with a public reception. He executed many works for the churches and convents of his country, and died in 1811. See Spooner, *Biog. Hist. of the Fine Arts*, s. v.

Veri, ANTHONY. See VERJUS, ANTOINE.

Veringer, ANDREAS, a Protestant theologian of Germany, was born at Herrenberg, Württemberg, in the year 1553. In 1588 he was appointed deacon at his native place; was called in 1590 as pastor to Chemnitz, in Hungary, and in 1595 to Feldsperg, in Austria. When the Lutherans had to leave the country, he returned to his native land; was in 1601 pastor at Rosenfeld; advanced in 1603 as superintendent at Freudenstadt; was called in 1608 to Stuttgart; advanced there in 1609 as member of consistory and court-preacher; and died as abbot of Alpirspach Nov. 15, 1609. See Firchlín, *Memoria Theologorum Württembergensium*; Jöcher, *Allgemeines Gelehrten-Lexikon*, s. v. (B. P.)

Veritas, in Roman mythology, was the goddess of truth, whom the Greeks called *Αληθεια*, a daughter of Jupiter or Saturn. She is also the mother of Virtue and Justice. She is represented as dressed in white.

Verjus, Antoine, a French Jesuit, brother of the diplomat Louis, was born in Paris, Jan. 22, 1632. Being admitted into that order at the age of nineteen, he taught the humanities for some time in Brittany, and then, by the royal order, joined the count of Crécy (his brother) in Germany (1672), where he was useful in diplomatic services. The remainder of his life was spent in laborious missionary work in India. He finally died in Paris, May 16, 1706, leaving a number of historical and other works, for which see Hoefer, *Nouv. Biog. Générale*, s. v.

Verjus, François, a French ecclesiastic, nephew of the preceding, was a priest of the Oratory, and was nominated bishop of Grasse. He died Dec. 7, 1710.

Verjus, Jean, a French preacher, brother of Antoine, was early educated for the Church, and, under the direction of the Jesuits, made such rapid progress in his studies that he was made doctor by the Sorbonne and sent to Rome, where he was engaged in literary labors under the protection of cardinal Retz. He died in Paris in 1663, at the age of thirty-three.

Vermeule, CORNELIUS C., D.D., a minister of the Reformed (Dutch) Church, was born in 1786. He graduated at Queen's College in 1812, and at New Bruns-

wiek Theological Seminary in 1814; was licensed by the Classis of New Brunswick in 1814; and was tutor in Rutgers College, 1812-14; professor of languages in Queen's College, 1814-15; and pastor at Harlem, N. Y., 1816-36. He died Jan. 15, 1859. See Corwin, *Manual of the Ref. Church in America*, s. v.

Vermeyen, JAN KORNELIS, a Dutch painter, was born at Beverwyk, near Haarlem, in 1500. He was probably instructed by his father, Cornelius, an obscure painter. The emperor Charles V appointed him his principal painter, and he attended the monarch in all his expeditions, battles, sieges, and designed on the spot all the memorable events of the war by sea and land. In 1535 he was present at the siege and capture of Tunis, and made designs of the principal events, from which he afterwards executed cartoons for the tapestry of the Escorial. But most of the works which he executed for the emperor are supposed to have perished in the conflagration of the Prado. The latter part of his life he spent at Brussels, where he executed many works for the churches and public edifices. These are highly commended by Vau Mander. In the Church of St. Gery are two of his pictures, the *Nativity* and the *Resurrection*. He was also an engraver, but did not achieve great distinction in this department. He often received the names *Johannes Barbatus*, *Barbalongu*, *Barbato*, and similar titles, from the fact that he had a very long beard, which he is said to have cultivated with such care that it grew to his feet; and the emperor, in his merry moods, would tread upon it. He died in 1599. See Spooner, *Biog. Hist. of the Fine Arts*, s. v.

Vermigli (Lat. *Vernulius*), ordinarily known as *Peter Martyr* from his baptismal names, was the most learned and celebrated of Italian Protestants in the 16th century. He belonged to a patrician family of Florence, where he was born Sept. 8, 1500. He entered the Augustine convent at Fiesole in 1516. His father had destined him for the service of the State, and disinherited him when he entered the monastery. In 1519 he went to Padua to complete his studies. He studied Greek without a teacher, made himself acquainted with the Aristotelian philosophy, and developed considerable dialectical ability. In theology he passed beyond the narrow limits of the scholastic curriculum, and read several of the Church fathers. When twenty-six years of age, he was sent out to preach in different towns of Italy. He also lectured on literature and philosophy in various convents of his order. He read the New Test. in the original, and employed a Jewish physician at Bologna to teach him the Hebrew language. He became abbot of Spoleto and prior of St. Peter's ad Aram in Naples. Here he was introduced into the circle which Juan Valdes (q. v.) had gathered about him; and the evangelical influence of that association and of the eloquent Ochino (q. v.), whom he met in 1539, decided his future course. He attained to faith in the justification of man through Christ, and taught this and other doctrines of the Reformers in the school and the convent. In 1541 he was elected visitor of his order. His strictness in the performance of the duties of that office drew upon him the dislike of the monks, and led to his being transferred to Lucca as prior of San Frediano. He now invited a number of scholars who were inclined to accept the Gospel to aid in training the novices joined with them in the study of the writings of the Reformers in Germany and Switzerland, preached and taught in the same spirit—as did also his vicar and Don Constantine, the prior of Fregionara—and organized a congregation of evangelical Christians. At this juncture the Inquisition interfered; several of Martyr's friends were apprehended, and he fled to Switzerland, pausing at Pisa to write a letter of separation from the papacy, which he couched in the form of an exposition of the Apostles' Creed. After a brief delay he obtained the situation of professor of the Old-Test. Scriptures, and speedily obtained a high reputation as a teacher. He

was learned, acute, clear, and precise in expression, mild and amiable in his manners; he possessed a pure and classical Latin style and a vivid eloquence. In theology he became a pronounced predestinarian; with respect to the sacraments, he adopted the prevailing (Swiss) view.

In 1547 Vermigli went to England with a view to assist Cranmer in establishing the Reformation. He was given a professorship at Oxford, and began his work with a course of lectures on 1 Corinthians, which he published in 1551. In this work he discussed controverted questions, like the right of priests to marry and the nature of the sacrament of the Lord's supper; on the latter question assuming a mystical union with the substance of Christ, effected by faith and involving no physical contact, and yet so complete that even the flesh, man's physical nature, is strengthened, and the whole man brought into fellowship with the Lord. In the advocacy of this view he carried on an extensive correspondence with Calvin, and engaged in repeated discussions with the other Oxford professors, particularly Richard Smith. In 1550 he lectured on the Epistle to the Romans, laying out his strength on the demonstration of the doctrine of predestination, particularly as against the objections of Albert Pighlius. These lectures were published in 1558 at Basle, and afterwards repeatedly. The confession formulated by the Synod of London in 1552 stated the doctrines of original sin, election by grace, and justification, substantially in harmony with his presentation of them. Bucer having in the meantime been appointed to Cambridge, both he and Peter Martyr participated in the discussions of the time respecting the liturgy of the English Church. Vermigli lost his wife by death in 1553, and he was only restrained from returning to Strasburg after that event by being charged with a participation in the revision of the laws of the Church. On the accession of Mary to the throne, he escaped to the Continent with difficulty, and was restored to his former position at Strasburg, though the growing Lutheran narrowness obliged him to declare his readiness to receive the Augsburg Confession, rightly interpreted, and his determination to avoid controversy respecting the Lord's supper. In 1555 he wrote to the Church at Lucca to encourage it to firmness under the tyranny of the Inquisition, and to the Church in Poland an opinion respecting the conflicting teachings of Osiander and Stancarus (q. v.).

The Lord's-supper controversy eventually compelled him to seek a new home in Zurich. He preached there occasionally in the Italian Church, and corresponded with the leaders of the Anglican Church on matters of worship and church government. In 1559 he published against bishop Gardiner a large work entitled *Defensio Doctrinæ Veteris et Apostolicæ de S. Eucharistiæ Sacramento*; and also against Richard Smith a *Defensio . . . de Calibatu Sacerdotum et Votis Monasticis*. In 1560 and 1561 he sent two circular letters, on the Trinity and the two natures in Christ, to Poland. He defended predestination against Bibliander at Zurich; wrote a *Dialogus de Utraque Christi Naturæ* against Brentius and the doctrine of Christ's ubiquity in the body; and was successful in each essay. In 1561 he received, for the second time, an invitation to Heidelberg, which he declined; but he attended the Colloquy of Poissy, and spoke in defence of the evangelical doctrines and attitude. After his return to Zurich he gave an opinion sustaining Zanchi (q. v.) at Strasburg, in a dispute on predestination and the Lord's supper, which has been justly regarded as the confession of Zurich respecting these doctrines. He was engaged on a new refutation of Brentius when he died, Nov. 12, 1562. After his death his friends published his commentaries on Samuel, Kings, part of Genesis, and Lamentations, and on Aristotle's *Ethics*; also a collection of prayers taken from the book of Psalms. In 1575 Robert Massov, French preacher in London, collected four books of *Loci Communes* from Vermigli's published works,

i. e. passages having a bearing upon dogmatics, ethics, and polemics (Lond. fol.). In a revised and enlarged form, this work became one of the most important sources for the Reformed theology of the 16th century. See Simler, *Oratio de Vita et Obitu D. Petri Martyris* (Zurich, 1562, 4to); Schlosser, *Leben des Theodor Beza u. P. M. Vermigli* (Heidelberg, 1807); *Leben d. Väter u. Begründer d. reformirten Kirche* (Elberfeld, 1858), vol. vii; Herzog, *Real-Encyklop.* s. v.

Vermiglio, GIUSEPPE, an Italian painter, was born at Turin in the 17th century. Little is known of him except by his works. Lanzi says of his picture of *Daniel in the Lions' Den*, in the Library della Passione at Milan, that "for correctness of design, beautiful forms, expression highly studied, and colors warm, varied, and lucid, it is one of the most valuable pictures painted at Milan since the time of Gandenzio Ferrari." He executed with eminent success several other works for the churches at Milan, Mantua, Alessandria, and Novara. He enriched the background of his pictures with fine architecture and beautiful landscapes. The latest date known of him is 1675. See Spooner, *Biog. Hist. of the Fine Arts*, s. v.

Vermilion (שֶׁשֶׁת [in pause שֶׁשֶׁת], *shushér*, accord. to Gesen. from its *versicolor*, but *red* accord. to Fürst, who compares the Sanser. *hur*), prob. *red ochre* (Vulg. *sinopis*, i. e. *rubrica Sinopensis*, which was the best [Pliny, *Hist. Nat.* xxxv, 5, 13]; Sept. *μύλτος*, which in Homer is i. q. *rubrica*), or (according to the Heb. interp.) *cinnabar*. This well-known metallic paint was first brought into use by the Phœnicians, who imported large quantities of it in the form of a reddish sand from their colonies in Northern Africa. Its bright-red color recommended vermilion to those who were engaged in decorating temples (Jer. xxii, 14); hence, whenever it was mentioned in Scripture, it was usually associated with idolatry. Thus Ezekiel, reproving the apostasy of his times, declares that Aholibah "added to her idolatries, for she saw men portrayed upon the wall, images of Chaldeans portrayed with vermilion, girded with girdles upon their loins, exceeding in dyed attire upon their heads, after the manner of the Babylonians, even of Chaldaea" (Ezek. xxiii, 14). He adds, "and she doted upon them as soon as she cast her eyes on them." These were, in fact, the representations of the Chaldean idols, which many of the Jews were seduced into worshipping. The author of the apocryphal Book of Wisdom also alludes to this custom: "The carpenter taketh the very refuse of his timber, being a crooked piece of wood, and full of knots, and carving it diligently when he had nothing else to do, and fashioning it into the image of a man, or like some wild beast, laying it over with vermilion and with paint, coloring it red, and covering every spot therein" (xiii, 14). The accuracy of the prophet is corroborated by the recently exhumed Assyrian monuments. M. Botta noticed several figures on the walls of Khorsabad yet retaining a portion of the vermilion (Bonomi, *Nineveh*, p. 206). There is in the British Museum, among the marbles sent from Nimrūd by Mr. Layard, a large slab with a figure of the king standing, holding in his right hand a staff, and resting his left on the pommel of his sword, still having the soles of his sandals colored red. See COLOR.

Vermilye, Isaac D., a clergyman of the Protestant Episcopal Church, died at Armonk, N. Y., Aug. 24, 1864, aged forty-five years. At the time of his death he was rector of St. Stephen's Church, North Castle, N. Y. See *Amer. Quar. Ch. Rev.* Oct. 1864, p. 484.

Vermilye, Robert George, D.D., a Congregational minister, was born in New York city, March 2, 1813. He graduated from Columbia College in 1831; was teacher in the college grammar-school until 1835; classical instructor during the two years following; and from 1837 to 1843 was adjunct professor, with Dr. Charles Anthon, of Greek and Latin. July 25, 1843, he was or-

dained pastor of the Presbyterian Church, German Valley, N. Y., and was dismissed in 1846. In June of the latter year he was installed over the Congregational Church in Clinton, N. Y., and remained in charge until 1857, in which year he became professor of theology in East Windsor Theological Seminary. He died in East Lyme, Conn., July 4, 1875. See *Cong. Quar.* 1876, p. 436.

Vermond, MATTHIEU JACQUES DE, a French ecclesiastic, was born about 1735, and was at first a surgeon in a country village, but devoted himself to the study of theology, and in 1757 was made doctor by the Sorbonne. He thereupon became librarian of the college of Mozain; but in 1769 went to Vienna to superintend the education of Marie Antoinette, and after her marriage with the dauphin he remained her reader. He became involved in the dismal Revolutionary times that followed; and after various reverses died in obscurity at Vienna at the close of that century. See Hoefer, *Nouv. Biog. Générale*, s. v.

Vernule, C. C., a Presbyterian minister, was licensed in 1814 by the Classis of New York, and became pastor of the Church at Harlem, N. Y., where he labored until 1837. He died in 1858. See Wilson, *Presb. Hist. Almanac*, 1860, p. 204.

Vernacle is an old English term for the *Vera Icon*, or true image of our Lord's face and features, as miraculously delineated on the napkin of St. Veronica (q. v.).

Vernacular, the dialect or language of a country, especially of the common people as distinguished from any tongue of the learned. The evidence of Scripture is entirely in favor of a service in the vernacular. The "tongues of fire" (q. v.) (Acts ii, 5), Paul's injunction in regard to public service (1 Cor. xiv, 16), and other passages clearly point to the same result. The Jewish Church was careful to make the law and the prophets familiar by vernacular translations (Neh. viii, 8), and the practice of making translations of the Scriptures into the vernacular of all nations has been practiced from the earliest ages of the Christian Church. There seems to be no good reason why a Church should employ a ritual in a dead language; but the Roman Catholic Church in all countries uses the Latin tongue in its liturgies to the exclusion of all others. The Council of Trent (in 1562) ordained as follows: "Although the mass contains much to edify the people, the fathers did not judge it right that it should be celebrated in the vulgar tongue, and the Roman Church has preserved the use; nevertheless, the clergy should at times, and especially on festivals, explain to the people some part of what they have read to them." It is worthy of remark that all the original liturgies were composed in the language of the country in which they were first used; e. g. the Greek, Roman, Syriac, etc. Therefore the allusion, in the above canon, to the practice of the fathers is rather unfortunate for the doctrine of an exclusively Latin ritual. See LATIN, USE OF.

Vernet, JACOB, a Swiss theologian, was born at Geneva, Aug. 29, 1698, of a family originally from Seyne, in Provence, who had fled, on account of their religion, to Geneva about 1680. He was early left an orphan, being the sixth of nine children; but under the care of his maternal uncle, Daniel Leclerc, he made rapid progress in study. He spent eight years at Paris, and then travelled in Italy. He began his ministerial career in 1722, and served successively the parishes of Jussey (1730), and Sacconex (1731), and finally at Geneva (1734). In 1737 he was chosen rector of the Academy in his native city, and taught, at first, belles-lettres and history, and from 1756 theology. He died there March 26, 1789. He wrote numerous works of a practical religious character, for which see Hoefer, *Nouv. Biog. Générale*, s. v.

Verneuil, COUNCIL OF (*Concilium Vernense*). Verneuil is a town of France, in Eure, on the Avre, twenty-four miles south-southwest of Evreux. An ecclesiastical council was held here in December, 844. Ebrunin,

archchaplain of Charles the Bald and bishop of Poitiers, presided, with Venilon, archbishop of Sens. Twelve canons were published, addressed to Charles the Bald.

1. Contains an exhortation to the king.
- 2, 3. Contain an entreaty that he would send forth a commissioner to set in order what was irregular, and to repress crime, etc.
7. Renews the canon of Gangra against certain female religious who, under pretext of higher perfection, had taken to wearing male attire.
8. Directs that when bishops are excused from going to the wars, either by infirmity or by the kindness of the prince, they shall appoint fit men to lead their people.

See Mansi, *Concil.* vii, 1805.—Landon, *Manual of Councils*, p. 676. See VERNUM, COUNCIL OF.

Vernon, J. W. M., a Methodist Episcopal minister, was born in Indiana, Dec. 7, 1819. He was left to the care of his widowed mother at the age of six; embraced religion when very young; received license to preach in 1851; and was admitted to the Illinois Conference and appointed to Carmi Circuit. In 1856 he was transferred to the West Wisconsin Conference, and appointed to Portage City Mission. After serving this Conference in several localities, he, in 1861, was transferred back to the Illinois Conference. His last charge was Augusta Circuit, where he died, Feb. 13, 1863. Mr. Vernon was a superior preacher; manly, agreeable, diligent, devout. See *Minutes of Annual Conferences*, 1863, p. 230.

Vernon, Thomas, Rev., M.D., a Congregational minister, was born in Newport, R. I., Dec. 20, 1797. For five generations his ancestors had been represented in that city. He graduated at Brown University, with high rank as a scholar, in the class of 1816. He commenced and prosecuted the study of law for about one year in the city of New York, when he decided to enter the Christian ministry. He became a pupil of the celebrated Dr. John M. Mason, with whom he remained not far from two years, and was then ordained pastor of the Church in Rehoboth, Mass., where he remained for about sixteen years (1819-35). Loss of voice obliged him to retire from the pulpit. He removed to Kingston, R. I., and for several years was engaged as a teacher of young men, supplying, as he was able, the pulpit of the Congregational Church in that village. Abandoning all hope of ever being able to preach, he decided to study medicine; and, having fitted himself for his new profession, he received the degree of M.D. from the University of Pennsylvania in 1852, and settled in Perth Amboy, N. J., where he resided for sixteen years (1852-68). After a year spent at the South for his health, he took up his residence in Providence, R. I., where he resided for the remaining five or six years of his life, rendering such service as he was able, both as minister and physician, especially to the poor with whom he was brought in contact. He died in Providence, May 9, 1876. The acquirements of Dr. Vernon "were varied and thorough, and his spirit and manners were always genial and attractive." He was a trustee of Brown University sixteen years (1844-60). See *Cong. Quar.* 1877, p. 427. (J. C. S.)

Vernuil, Joux, a French refugee, was born at Bordeaux in 1583, and educated in the University of Montauban. He fled the country for the sake of his religion; entered Magdalen College, Oxford, in 1608; and in 1625 was incorporated master of arts, being then second keeper of the Bodleian Library, in which, Wood says, his services were valuable. He died at Oxford in September, 1647.

Vernum, COUNCIL OF (*Concilium Vernense*). A council was held in 754 at a place in France named in Latin *Vernum*. Some doubt exists as to its locality. Fleury and Le Cointe say that it is *Vernon-sur-Seine*; Pagi, following Mabillon, says *Vernuil-sur-Oise*; Lebeuf and Bouquet maintain that it is a place called *Ver*, or *Vern*, a royal seat, situated between Paris and Compiègne. See VERNICHI, COUNCIL OF.

The council was assembled by order of king Pepin, and the bishops of all the Gallican provinces attended. The object was to re-establish discipline, and they agreed to remedy at once the most grievous abuses, and to leave lesser matters till a more favorable opportunity. Twenty-five canons were published.

1. Enacts that no bishop shall hold more than one see.
3. Gives to the bishop authority to correct both the regulars and seculars within his diocese.
4. Orders that two synods be held annually in France.
5. Leaves to the bishop the reform of the religious houses in his diocese. If he cannot effect it, he is directed to apply to the metropolitan, and lastly to the synod.
7. Forbids to erect baptisteries without the bishop's permission.
8. Orders priests to attend the synod of bishops, and forbids them to baptize or to celebrate the holy office without their permission.
13. Forbids itinerant bishops (who have no diocese) to perform any function.
14. Forbids all work on Sundays save such as is absolutely necessary (3 *Council of Orange*, can. 28).
17. Forbids to leave a bishopric vacant for more than three months.
18. Forbids clerks to carry their causes before lay tribunals.
24. Forbids simony.

See Mansi, *Concil.* vi, 1664.—Landon, *Manual of Councils*, p. 676.

Verocchio, ANDREA, a celebrated Italian painter, sculptor, and goldsmith, was born at Florence in 1432. He first distinguished himself as a goldsmith at Florence and Rome, and then devoted himself to sculpture in bronze and marble. His first work in marble was a monument in the Minerva at Rome to the wife of Francesco Tornabuoni, which is now in the Florentine Gallery. His next effort was a colossal bronze figure of David, also in the Florentine Gallery. Among his other works in this department was the *Incredulity of St. Thomas*, in the Church of Or San Michele at Florence, which was finished in 1483. Vasari tells us that he felt nothing to be wished for in this work. After this Verocchio began to turn his attention to painting. His work in sculpture had made him a good designer, and many pupils visited his academy, among whom were Pietro Perugino and Leonardo da Vinci. But the work of Da Vinci so far surpassed that of Verocchio that the latter relinquished painting entirely and devoted himself to sculpture. He was engaged to cast an equestrian statue of the celebrated general Bartolomeo Colleoni for the city of Venice. He completed the model, but, in casting the statue, caught cold, and died in a few weeks (1488), before the statue was finished. The work was completed by Alessandro Leopardi in 1490. Verocchio's remains were taken by his disciple, Lorenzo di Credli, to Florence and deposited in the Church of St. Ambrogio. See Spooner, *Biog. Hist. of the Fine Arts*, s. v.; Hoefer, *Nour. Biog. Générale*, s. v.

Véron, FRANÇOIS, a French controversialist, was born in Paris about 1575, of an honorable family. In 1595 he was admitted to the Order of the Jesuits, and applied himself to studies in opposition to the Reformation, and he spent his life in public debates and writings on that side. He died at Charenton, near Paris, Dec. 6, 1649. For his works, see Hoefer, *Nour. Biog. Générale*, s. v.

Verona, COUNCIL OF (*Concilium Veronese*). Verona is a fortified city of Italy, capital of the province of the same name, on the Adige, twenty-two miles N.N.E. of Mantua. An ecclesiastical council was held here on Aug. 1, 1184, for the purpose of reconciling those who had been ordained by the antipopes. Pope Lucius III published a constitution against the heretics in the presence of the emperor Frederick. The object was to repress the fury of the Cathari, Patricini, and the other heretics of that period. In this council, we perceive the commencement of the system of inquisition, since the bishops are ordered, by means of commissaries, to inform themselves of persons suspected of heresy, whether by common report or private information. A

distinction is drawn between the suspected and convicted, the penitent and relapsed, and different degrees of punishment are accordingly awarded. After all the spiritual penalties of the Church have been employed in vain, it is ordered that the offenders be given up to the secular arm, in order that temporal punishments may be inflicted. See Mansi, *Concil. x*, 1737, 1741.—Landon, *Manual of Councils*, p. 677.

Verona, Fra Giovanni da, an Italian monk, was born at Oliveto in 1496. He became celebrated for his decorations of the choirs and sacristies with inlaid work of wood. He practiced the art in various cities of Italy, including Rome, where he was employed by pope Julius II. At first woods of different colors were used, and large edifices, colonnades, and architectural views were represented. The art was afterwards improved by employing artificially stained as well as natural wood, and by adding figures. Verona died in 1537. See Spooner, *Biog. Hist. of the Fine Arts*, s. v.

Verona, Jacopo da, an Italian painter of the 14th century, was born at Verona. He is only known by his numerous frescos in the Church of San Michele, at Padua, some of which still remain entire. See Spooner, *Biog. Hist. of the Fine Arts*, s. v.

Verona, Maffeo da, an Italian painter, was born at Verona in 1576. He studied under Luigi Benfatto, but copied the works and adopted the style of Paul Veronese. Besides painting several works for the churches of his native city and for the Cathedral of Udine, he executed many works for the churches of Venice, among which may be named two altar-pieces, representing the *Descent from the Cross* and the *Resurrection*, in the Church of San Marco, and *Christ Bearing the Cross* and the *Crucifixion*, in the Chapel of St. Isidore in the same church. He died in 1618. See Spooner, *Biog. Hist. of the Fine Arts*, s. v.

Veronese, Agostino. See **TERCHI**.

Veronese, Paul. See **PAOLO VERONESE**.

Veronica, *St.* (also *Berenice*, *Beronice*, and *Vere-nice*), is described by tradition to have been a pious woman of Jerusalem, who was moved with pity on beholding the bloody and perspiring face of our Lord when on the way to crucifixion, and manifested her sympathy by giving him her head-cloth to wipe off the perspiration. In response to her kindness, the Saviour imprinted his features, all distorted as they were with pain and suffering, on the cloth, and gave it back to her for a memorial and token of his love. This is declared to be the origin of one of the oldest of those representations of Christ's features which are said to have not been made with hands (*εἰκὼν ἀνυποποίητος Θεοῦ κειν*), and which have given rise to the Christs of Correggio and other famous painters of the Middle Ages, and also to the class of hymns which are addressed to the head of Jesus, e. g. the very ancient sequence *Salve Sacra Facies*, St. Bernard's *Salve Caput Cruentatum*, Paul Gerhardt's *O Haupt voll Blut und Wunden*, etc.

Various modifications of the legend are: 1. Veronica (or rather *Beporikn*) was the woman who had the issue of blood and was healed by touching the hem of Christ's garment (Matt. ix, 20 sq.). She is said by Eusebius (*H. E.* vii, 17 sq.) to have subsequently erected a statue to Jesus in her native town of Paneas, in Syro-Phœnicia. This is the statement of John Malala, about A.D. 600, in his *Chronographia*, p. 305. 2. Veronica was a niece of Herod the Great by Salome—an evident confounding of Berenice, the mother of Herodius and grandmother of Salome, with Veronica. 3. Veronica died as a martyr at Antioch, in company with fifty other virgins (Bede and others). 4. Veronica was beloved of Amatus, who was described as "famulus S. Virginis Mariæ et Josephi, et Dominus bajulus ac nutritius." Amatus accompanied her in later years to Rome, and thence in the train of St. Martial to Gaul, where he led a holy life in imitation of the hermits of Mount Carmel,

St. Veronica. (From a sculpture by Andrea Sacchi in the chapel of the saint in St. Peter's at Rome.)

and died in A.D. 75. 5. The tradition usually received in the West states that the emperor Tiberius ordered Veronica to Rome that the touch of her sweat-cloth might cure his leprosy, and that when the cure was effected she persuaded Tiberius to exile Pilate in punishment for having sentenced Jesus to death. Veronica afterwards remained in Rome with her wonderful *sudarium*, and in her will gave the cloth to Clement, the successor of Peter, by whom it was transmitted to succeeding popes. The Church of Santa Maria Maggiore boasted its possession since pope John VII (705), but it is now claimed by St. Peter's at Rome. Only persons of princely degree who have been admitted to the rank of titular canons of St. Peter's are permitted to look upon it. Milan, and Jaen, in Spain, however, both assert that the cloth is in their possession (see Benedict XIV [Lambertini], *De Servorum Dei Beatificat.* etc. iv, 2, 51). Down to the 13th century the cloth itself, and not the woman, was called Veronica, a fact which throws doubt upon the authenticity of the legend as a whole. Papebroch, Mabillon, and others reached the conclusion that Veronica was originally a corruption of the words (part Latin, part Greek) *vera icon* (*εἰκών*), and signifies simply a *true, authentic likeness*, and many modern critics adopt that view. Grimm (*Sage vom Ursprung der Christusbilder*, p. 86) says that the legend of Veronica is simply the Occidental version of the Eastern tradition of Abgarus (q. v.) of Edessa, which narrates that Christ sent both an autograph letter and an authentic portrait of himself to that prince. The traditional dwelling of Veronica in Jerusalem was shown, situated by the way from the house of Pilate to Calvary, in very recent times.

See Bolland, *Acta SS.* Feb. 4, i, 449 sq.; Baronius, *Annal. ad An.* 34, No. 138; Gretser, *Synagoga de Imaginibus non Manu Factis* (Ingolst. 1622); Chifflet, *De Linteis Christi Sepulchr. Servatis Crisis Historica* (Antv. 1624); Beausobre, *Des Images de Main Divine*, in the *Biblioth. German.* xviii, 10; Tillemont, *Mémoires*, i, 471 sq.; Gieseler, *Kirchengesch.* i, 86; Herzog, *Real-Encyklop.* s. v.

VERONICA (Lat. *vera*, true; Gr. *icon*, image), a napkin or handkerchief with which a Jewish woman, named Pronice or Berenice (Lat. *Veronica*), who had been cured of the issue of blood (Matt. ix, 20-22, and parallels), is said to have wiped the face of our Lord when going to the crucifixion by the Way of Sorrows. Wet with blood and other fluids, his likeness was stamped upon its triple folds, and the napkin was brought in a wooden coffer from Palestine to Rome, and eventually placed by Urban VIII in an upper

chapel adjoining one of the great piers in St. Peter's Church, where it is still preserved under the charge of the canons. It is exhibited

Portrait of Christ on St. Veronica's Handkerchief.

in a silver case ten times in the year to the pope, cardinals, and faithful who are placed in the nave. As early as the 14th century, painters represented a woman holding a linen cloth, on which is a radiating face, surrounded by a halo, with the cross. Since that time the attribute has become the subject. The inanimate substance has taken life, and the woman is only known as Veronica. There were icons, or veils, preserved at Laon, Cologne, and Milan. See Walcott, *Sacred Archaeol.* s. v.; Barnum, *Romanticism As It Is*, p. 491.

Veronius (*François Véron*), a French Jesuit, was born about 1575, in Paris. At the age of twenty he joined the Jesuits, received holy orders, and labored as a missionary among the Protestants of France. In 1622 he received permission to preach and discuss in the streets and in market-places, as *prédicateur du Roi pour les controverses*, while the French clergy gave him the jurisdiction and an annual pension. He died as pastor in Charenton, Dec. 6, 1649. He is said to have been well qualified for missionary work, but, on the whole, he was very moderate. At the colloquy at Cadom, in 1628, he discussed with Bochart and published the acts thereof. Bochart also published the same (Saumur, 1630) because Véron had falsified them. He wrote, *Méthodes de Traiter des Controverses de Religion* (Paris, 1638, 2 vols.):—*Règle de la Foi Catholique* (ibid. 1645; Latin in Migne, *Cursus Theologicus*, i, 1035 sq.):—*Baillon des Jansénistes*, against the Jansenists:—he also published a revised edition of the Louvain French Bible (1647). See Schrickh, *Kirchengeschichte seit der Reformation*, iv, 251; *Biographie Universelle*, s. v.; Henke, *Cultus und seine Zeit*, II, i, 157 sq.; *Theolog. Universal-Lexikon*, s. v. (B. P.)

Verpoorten, Albrecht Meno, a Protestant theologian of Germany, was born at Gotha, Oct. 13, 1672. He belonged to a family which left the Netherlands under the persecutions of the duke of Alba. He studied at Giessen and Wittenberg. In 1699 he was appointed pastor at Sonnenberg, and in 1708 superintendent at Neustadt. In 1724 he was called as rector of the academic gymnasium at Coburg, having received the doctorate in the same year. In 1731 he went as rector and professor to Dantzic, at the same time acting as pastor of Trinity Church, where he died, June 3, 1752. Verpoorten was an excellent theologian. In numerous Latin treatises he wrote on exegesis and criticism of the New Test., on Church history, and patristics. The main results of his studies are found in *Fasciculus Dissertationum ad Theologiam maxime Exegeticam et Philologiam Sacram Pertinentium* (Gedani, 1739):—*Positiones Theologicæ ex Articulis Augustinæ Confessionis*, edited by his son (ibid. 1751). The number of his larger and smaller works amounts to seventy-six, for which see Döring, *Gelehrte Theologen Deutschlands im 18ten und 19ten Jahrhundert*, iv, 586-588; the works pertaining to the Old Test. are given by Fürst, *Bibl. Jud.* iii, 475. (B. P.)

Verpoorten, Wilhelm Paul, a German theologian, son of Albrecht Meno, was born Sept. 4, 1721, at Neustadt. Having graduated at Dantzic with the treatise *De Auctore Secundæ Tertieque Epistolæ Johannis* (1741), he went to Jena, where he publicly spoke (1743) on *Calor sub Nube Torrente Esu*, xxx, 5, in *Versione Hieronymi Vulgataque Obvius, ad Textum Hebræum Reique ipsius Naturam Expensus*. In the same year he went to Leipsic, where, on account of his disserta-

tion *De Concilio Œcumenico Secundo, Constantinopolitano Primo* (1745), he received the privilege of lecturing. But bodily infirmities of his father called him home, where he prepared himself for the ministry. In 1751 he was appointed pastor at Stübblau, near Dantzic; in 1762 he was called as second deacon to Dantzic; and in 1770 he was placed at the head of the gymnasium there, where he died, Jan. 17, 1794. Besides the dissertations already mentioned, he wrote, *Diss. Inaug. de Habitu Legis ad Penitentiam et Fidem* (presented to the Königsberg University for the degree of doctor of divinity, 1770):—*Progr. de Præsidio Theologo ex Historia Ecclesiæ Petendis* (Gedani, 1770):—*Diss. de Resurrectione Impiorum Merito Christi non Impetrata* (ibid. 1774):—*Diss. de Vindictis Doctrinæ de Supplicio Damnantium Æternis* (ibid. 1774). For his other writings see Döring, *Gelehrte Theologen Deutschlands im 18ten und 19ten Jahrhundert*, iv, 592 sq. (B. P.)

Verrio, ANTONIO, a Neapolitan painter, was born at Lecce about 1639. After making considerable progress in the art, he visited Venice to study the coloring of the Venetian school. After some time he returned to Naples, where he gained much notoriety through the execution of certain gay paintings. In 1660 he painted a large picture in fresco of *Christ Healing the Sick*, in the College of the Jesuits, which was marked for its fine coloring. He next went to France and painted the high-altar of the Carmelites at Toulouse. Shortly after this he went to England in the service of Charles II, who desired him to direct the manufacture of tapestry at Mortlake; but the king changed his mind, and Verrio was employed on the frescos of Windsor Castle. After the accession of James II he was again employed at Windsor in "Wolsey's Tomb-house," then to be converted into a Roman Catholic chapel. Refusing for a time to enter the service of William III, he painted for the nobility, but afterwards was induced to paint for the king. He was granted an annual pension of £200 by queen Anne, but died in 1707. He is described by Walpole as "an excellent painter for the sort of subjects on which he was employed, that is, without much invention, and with less taste; his exuberant pencil was ready at pouring out gods, goddesses, kings, emperors, and triumphs, over those public surfaces on which the eye never rests long enough to criticise, and where one should be sorry to place the works of a better master; I mean ceilings and staircases. The New Testament and the Roman history cost him nothing but ultramarine; that and marble columns and marble steps he never spared."

Verschorists, a sect that derived its denomination from Jacob Verschoor, a native of Flushing, in the Netherlands, who in the year 1680, out of a perverse and heterogeneous mixture of the tenets of Cocceius and Spinoza, produced a new form of religion, equally remarkable for its extravagance and impiety. His disciples and followers were called *Hebreus*, on account of the zeal and assiduity with which they all, without distinction of age or sex, applied themselves to the study of the Hebrew language. Their sentiments were nearly the same as those of the Hattemists (q. v.). See Mosheim, *Hist. of the Church*, bk. iv, cent. xvii, § ii, pt. ii, ch. ii.

Verschuir, JOHANN HEINRICH, a Protestant theologian of Germany, and professor of Oriental languages at Franeker, who died May 20, 1803, is the author of, *Dissertatio de Paronomasia Orientalibus multum Adumata, quæ est Octava in ejusdem Dissertationibus Philologico-exegeticis* (Franeker, 1773):—*Dissertatio Critica, qua Lectio Codicis Hebræi in Loco Celebris Deut. xxvii, 4 Defenditur, et Lectio Samaritani Textus tanquam Spuria Rejicitur* (ibid. 1767):—*Dissertationes Philologico-exegeticae* (ibid. 1773). See Fürst, *Bibl. Jud.* iii, 475; Steinschneider, *Bibliographisches Handb.* s. v.; Winer, *Handb. der theol. Literatur*, i, 221. (B. P.)

Verse, as a written or typographical division in the text of the Bible, has a historical and literary interest which justifies its full treatment here.

I. *In Manuscripts*.—Under this head we consider the members of rhythmical passages, the logical divisions in the prose books peculiar to the versions, and the logical divisions in the original texts.

1. The term *verse* (*versus*, from *verso*, "to turn"), like the Greek *στίχος*, was applied by the Romans to lines in general, whether in prose or verse, but more particularly to the rhythmical divisions, which generally commenced the line with a capital letter. The custom of writing poetical books in stanzas was common to the Greeks, Romans, Arabians, and Hebrews. The poetical books (*viz.* Job, Psalms, Proverbs, Ecclesiastes, and Canticles), in the oldest Hebrew MSS., as the Paris, Bodleian, Cassel, and Regiomontanus, are also thus divided; and some poetical passages in the historical books are still given in this form in our printed Hebrew Bibles. The Alexandrian MS., and those of the Italic version, are equally so written; and this division is found in the Psalterium Turicense, the Verona and St. Germain Psalters, and in Martianay's edition of Jerome. Athanasius applied the term *στίχος* to the passage in *Psa.* cxix, 62, "I arose at midnight to praise thee for the judgment of thy righteousness;" and Chrysostom observes, on *Psa.* xlii, that "each stich (*στίχος*) suffices to afford us much philosophy." He also uses the term *ῥῆσις* in the same sense. The poetical books are called by Epiphanius the five *στίχαστες*.

It is not improbable that this division may have come from the original authors, which the nature of the subject, and especially the parallelism of the sentences, seems to require (*Jebb, Sacred Literature*). In the Cod. Alex. are equally divided in this manner the songs of Moses and of Hannah; the prayers of Isaiah, of Jonah, of Habakkuk, Hezekiah, Manasses, and Azarias; the Benedicite; and the songs of Mary (*Θεοτόκος*), Simeon, and Zachariah in the New Test.; to which is added the Morning Hymn, or Gloria in Excelsis.

2. A similar metrical division is found in the Latin version. Jerome (*Ep. ad Sunn. et Fret.*) applies the term *versiculus* to the words "grando et carbones ignis" (*Psa.* xviii, 13), assigning as a reason why the Greeks had not this versicle after the interposition of two verses, that it had been inserted in the Sept. from the Hebrew and Theodotion's version (with an asterisk). He also observes that it was not easy to reply to the question why Paul, in citing *Psa.* xiii, added eight verses not found in the Hebrew. Martianay remarks that these eight verses, which form but three divisions in the Latin psalters, are thus found in an ancient psalter of the *κοινή* and the Italic, in the Abbey of St. Germain-des-Prés:

Sepulchrum patens est guttur eorum
Linguis suis dolose agebant [*Psa.* v, 9].
Venenum aspidum sub labris eorum [cx, 3].
Quorum os maledictione et amaritudine plenum est [x, 7].
Veloces pedes eorum ad effundendum sanguinem
Contritio et infelicitas in viis eorum
Et viam pacis non cognoverunt [*Isa.* lix, 7, 8].
Non est timor Dei ante oculos eorum [*Psa.* xxxvi, 1].

We need scarcely add that these eight stichs, although found in Justin Martyr, in the Vatican MS., and in the Vulgate, Arabic, and Ethiopic versions, are an early interpolation from *Rom.* iii, 15-18. They are wanting in the Cod. Alex.

Jerome observes (*Præf. ad Job*), that the book of Job commences with prose, glides into verse, and again ends with a short *comma* in prose from the verse "Idcirco reprehendo, et ago poenitentiam in cinere et favilla" (the form assumed also by the text of the oldest Hebrew MSS.). He adds that there were seven hundred or eight hundred verses wanting in the old Latin version of this book, and makes mention of "three short verses" in *Ezek.* xxi and *Isa.* lxiii. That a stichometrical arrangement pervaded the whole Latin Bible is further evident from the *Speculum Scripture*, attributed to Augustine, which contains extracts from Psalms, Canticles, Ecclesiastes, Job, Hosea, Amos, Micah, Zephaniah, Malachi, Isaiah, Jeremiah, Ezekiel, Wisdom, Ecclesias-

ticus, the four evangelists, 2 Corinthians, Philippians, Timothy, 1 John, and Hebrews. All these passages will be found extracted in the *Christian Remembrancer*, 1842, p. 676-683; and although the first editors of the *Speculum* seem to have misunderstood Augustine's meaning (*Simon, Hist. Critique*), it is beyond a doubt that the verses in the *Speculum* (one of which was "Populus ejus et oves pascue ejus") were of the character which we are now describing. Jerome has not followed any of the divisions of the present Hebrew text, except in those passages where he could not well have avoided it—*viz.*, the alphabetical division in the book of Lamentations, and the alphabetical Psalms; but even here he differs from the present divisions (*Morini Exerc. Bibl.* ii, 2).

Jerome introduced a similar division into the prophetic books and the books of Chronicles. To this division he, in the prophetic books, applies the terms *cola* and *commata* (or "stanzas" and "hemistichs"), while in the Chronicles he only employs the colon, or longer period. "No one," he observes, "when he sees the prophets divided into verses (*versibus*), must suppose that they are bound by metrical lines, or that in this respect they resemble the Psalms and the books of Solomon; but as the works of Demosthenes and Tully are divided into colons and commas, although written in prose and not verse, we have, for the convenience of the reader, also distinguished our new version by a new species of writing." The Chronicles, he says, he divided into members of verses (*per versuum cola*), in order to avoid an "inextricable forest of names."

The following specimens of Jerome's divisions are from Martianay:

[Job iii.]

"Pereat dies in qua natus sum
et nox in qua dictum est: Conceptus est homo.
Dies illa vertatur in tenebras
non requirat eum Deus desuper
et non illustretur lumine."

[Isaiah xl.]

"Consolamini, Consolamini, popule meus,
dicit Deus vester.
Loquimini ad cor Jerusalem, et advocate eam:
Omnis vallis exaltabitur,
et omnis mons et collis humiliabitur,
Et erunt prava in directa,
et aspera in vias planas.
Et revelabitur gloria Domini,
et videbit, etc.
Vox dicentis: Clama.
Et dixi:
Quid clamabo?
Omnis caro fœnum,
et omnis gloria ejus quasi flos agri."

[1 Chron. xiv.]

"Misit quoque Hiram rex Tyri munus ad David, et ligna cedrina, et artifices parietum, lignorumque, ut ædificarent ei domum.
Cognovitque David quod confirmasset eum Dominus in regem super Israel, et sublevatum esset regnum summa super populum ejus Israel.
Acceptit quoque David alias uxores in Jerusalem: genuitque filios et filias."

A division of the prophetic books into *cola*, or stichs, has been considered by some to have had its origin before the time of Jerome. Eusebius acquaints us (*Hist. Eccles.* vi, 16) that Origen, in his *Hexapla*, divided the Greek and other versions into *κῶλα*, which, however, bishop Christopherson (in *Euseb. Eccles. Hist.*) supposes to be the columns containing the different texts into which Origen's *Polygлот* was divided. Hesychius, who died in A.D. 433, also published his *στίχαστες* of the twelve prophets, which he calls an invention of the fathers, in imitation of David and Solomon, who had thus divided their rhythmical compositions. He observes that he had found a similar division in the apostolical books. In this case such division must have been anterior to the stichometrical edition of Euthalius, if the date assigned to his publication be correct, *viz.*, A.D. 450. It is not improbable that the work of Hesychius was but an adaptation of Jerome's *cola* and *commata* to the Greek text. This is also the opinion

of Martianay. Epiphanius (*De Orth. Fid.* iv) adds the two books of Wisdom to the poetical books thus arranged.

3. We have seen that Jerome imitates the mode of writing the works of Demosthenes and Cicero in his divisions of Chronicles. This custom of writing *κατὰ στίχους* appears to have been usual among profane writers. Josephus observes that his own *Antiquities* consisted of sixty thousand *στίχοι*, although in Ittig's edition there are only forty thousand broken lines. Diogenes Laertius, in his *Lives of the Philosophers*, recounts the number of stichs which their works contained. There have, however, existed doubts as to what the *στίχοι* really were; some supposing them to be simply lines, or lines consisting of a certain number of words or letters, as in our printed books, while others have maintained them to be lines of varied length regulated by the sense, like the *cola* and *commata* of Jerome. The fact is that there are MSS. written in both kinds of verses or stichs, with the number of the stichs placed at the end of each book; and this is what is called *stichometry*, or the enumeration of lines. The introduction of lines regulated by the sense into the New Test. is supposed to have been a rude substitute for punctuation. The second mode, resembling our printed books, is also common; it is that adopted in the Charlemagne Bible, at the close of each book of which will be found the number of verses—that is, lines of equal length—but without any regard to the number of words or letters.

We are not aware at what time or by whom stichometry was adapted to the Gospels, but not long after the time of Euthalius we find it in common use. The Cod. Bezae (C) and the Clermont MS. (D) are thus written. The following is from C (John i):

Εν αρχῇ ἢ ὁ λόγος καὶ ὁ λόγος ἦν πρὸς τὸν Θεόν
Καὶ Θεὸς ἦν ὁ λόγος, αὐτὸς ἦν ἐν ἀρχῇ πρὸς τὸν Θεόν
Πάντα δι' αὐτοῦ ἐγένετο καὶ χωρὶς αὐτοῦ
Ἐγένετο οὐδὲ ἓν ὃ γέγονεν· ἐν αὐτῷ
Ζῶη ἦν καὶ ἡ ζωὴ ἦν τὸ φῶς τῶν ἀνθρώπων
Καὶ τὸ φῶς ἐν τῇ σκοτίᾳ φαίνει
Καὶ ἡ σκοτία αὐτὸν οὐ κατέλαβεν
Ἐγένετο ἀνθρώπος ἀπεσταλμένος
Ἁρὰ Θεοῦ, ἀνομιὰ αὐτοῦ Ἰωάννης.

The following is from Acts xiii, 16, in Greek and Latin (Kipling, p. 747):

Ἀναστάς δὲ ὁ Παῦλος—Cum surrexisset Paulus
Καὶ καταίστασεν τῇ χειρὶ εἶπεν—Et silentium manu postu-
lasset, dixit,
Ἀδελφοὶ Ἰσραηλῆται, καὶ οἱ φοβούμενοι τὸν Θεόν—Viri Isra-
heliti, et qui timetis Deum
Ἄκουσατε—Audite.
Ὁ Θεὸς τὸν λαὸν τούτων, κ. τ. λ.—Dens populi hujus, etc.

Afterwards, in order to save parchment, it became usual to write the stichometrical books continuously, separating the stichs by a point, but still placing their numbers at the end of each book. The following is a specimen from the Cod. Cyrp.:

Ὁ δὲ ἐγερθεὶς, παρέλαβε τὸ παιδίον, καὶ τὴν μητέρα αὐτοῦ,
καὶ ἤλθεν εἰς τὴν Ἱερουσαλὴμ, ἀκούσας δὲ, ὅτι Ἀρχιεπίσκοπος βασιλεύσει
ἐπὶ τῆς Ἰουδαίας, ἀντιβῶν τὸν πατέρα αὐτοῦ, ἐφοβήθη ἐκεῖ
ἀπελθεῖν.

Sometimes, instead of the point, the stichs commenced with a capital, as in the Cod. Boerner., which, however, seems to have been written by an ignorant Irish scribe, unacquainted with the languages in which the MS. was written:

Ut non quasi ex necessitate tem bonum tuum sit.
Ἰνα, μὴ ὡς καταναγκῆν τὸ ἀγαθὸν σου ἦ.
Sed voluntarium forsitan enim ideo t propterea.
Ἀλλὰ καὶ κατακούσειον. Τὰχα γὰρ, Διὰ τούτου.
Ad horam t ad tempus ut æternum
Ἐχωρισθῇ, πρὸς ὧραν Ἰνα, αἰώνειον
illum t eum recipias non jam quasi servum
αὐτοῦ ἀπεχθῆς οὐκ ἐτεῖ ὡς δοῦλον.
fratrem dilectum maxime mihi quanto autem
ἀδελφόν, Ἀγαπῆτον, Μαλλιστα ἐμοὶ Πασῶ, ὅς
magis tibi et in carne et in dño si
μᾶλλον σοὶ καὶ, ἐν σάρκει καὶ ἐν κώ, εἰ
igitur t ergo me habes socium accipe illum
οὖν μέ, ἔχεις κοινωνίαν Προσλαβού, αὐτοῦ

sient me, 77. Si autem aliquid nocuit t læsit te
πισ εμαί. Εἰ δέ, τι, ἥσει- κησεν σε
aut debet hoc mihi imputa ego paulus
ἢ, ὀφείλεται. Τούτω μοι ἐλλογα ἐγὼ παῦλος.
scripsi mea manu ego reddam ut non
ἐγραψα τῇ ἐμῇ χειρὶ. ἐγὼ ἀποτεσω. Ἰνα μὴ
dicam tibi quod et te ipsum mihi debes
λέγω σοι, ὅτι καὶ σε αὐτόν, μοι, προσοφείλεις.
ita t utique frater ego te fruar in dño.
καὶ. Ἰνα ἀδελφε, ἐγὼ σου, οἰαίμην. ἐν, κώ.
[Philem. 14-20.]

The stichs were sometimes very short, as in Cod. Laud. (E), in which there is seldom above one word in each. The Clermont MS. (D) contains a list of the stichs in all the Greek books of the Old and New Test., and the *Stichometry* of Nicephorus contains a similar enumeration of the canonical books—the antilegomena of the Old and New Test.—and of the Apocryphal books, as Enoch, the Testaments of the Patriarchs, etc.

Hug (*Introd.*) observes that the Cod. Alex. might be easily mistaken for the copy of a stichometrical manuscript, from the resemblance of its divisions to the *στίχοι*, as, *ἡκουσα δὲ φωνῆς λεγούσης μοι, ἀνάστας Πέτρο, ὤσον καὶ φαγε*, but these occur only in occasional passages.

Instances occur in other MSS. in which the stanzas are numbered in the margin, as in the Song of Moses, in Greek and Latin in the Psalter of Sedulius of Ireland, who flourished in the 9th century. The song consists of forty-two commas or stichs, comprised in seven colons or stanzas, with a Roman numeral prefixed to each—all in the handwriting of Sedulius. The Latin is Ante-Hieronymian (Montfaucon, *Palæogr. Græc.*; also *Christian Remembrancer*, ut sup., p. 687).

There is a Greek stichometrical manuscript of Isaiah, probably of the 9th century, in the Bibliothèque du Roi (1892), in which the stichs do not commence with the line; but there is a Greek numeral letter attached in the margin opposite each stich, the enumeration recommencing at the end of every hundred lines, in this form:

1. The vision of Isaiah, the son of Amoz, which he saw concerning Judah and Jerusalem, in the days of Uzziah, Jotham, Ahaz, and Hezekiah, kings of Judah. Hear, O heavens, and
2. give ear, O earth: for the Lord hath spoken.
3. I have nourished and brought up children, and they
4. have rebelled against me. The ox knoweth
5. 6. his owner, and the ass his master's crib:
7. but Israel doth not know, my people
8. doth not consider. O sinful nation,
9. a people laden with iniquity, a seed
10. of evil-doers, children that are corrupters; they have forsaken
11. the Lord, they have provoked the holy one of Israel to anger; they are gone away backward. Ye will revolt more and more, etc.
12. Why should ye be stricken any more?

Hug is of opinion that the stichometrical system gave rise to the continuous and regular grammatical punctuation. Attempts at interpunction for the sake of the sense were, however, of much greater antiquity in profane authors than the era of stichometry. Grammatical points are said to have been first introduced by Aristophanes of Byzantium about two centuries before the Christian era. We have already seen that interpunction was in use in MSS. of the New Test. before Euthalius, as in the Cod. Alex. Isidore of Spain informs us that the only note of division in his time was a single point, which, to denote a *comma*, or short pause, was placed at the bottom; to denote a *colon*, or larger pause, in the middle; and to denote a full pause, or period, was placed at the top of the final letter of the sentence. Manuscripts of the New Test., as the Zurich Cod. Bas. E. have come down to us thus pointed. In others, as the Cod. Alex. and Cod. Ephrem., the point is placed indifferently at the top, bottom, or middle of the letter (Tischendorf, *Cod. Ephrem.*). Others, as L, use a cross for the purpose of marking a period, and Colb. 700 makes use of no other mark. Hupfeld, however (*Stud. u. Krit.*), doubts whether the points in Cod. Cy-

prius are notes of the stichs, and denies any distinction between grammatical and other interpunction.

Originally there were no spaces between the words, but in the 8th or 9th century they began to be separated either by spaces or by points. About the same period the present marks of punctuation began to be gradually and imperceptibly adopted, and had become universal in the 10th century. Michaelis (*Introd.* ch. xiii) says "that Jerome introduced the comma and colon;" but this was not for the purpose of dividing sentences. Cod. V, however, in Matthew, of the 8th century, has the comma and the point, and Cod. Vat. 351 the colon. The Greek note of interrogation came into use in the 9th century. After the invention of printing, the Aldine editions fixed the punctuation, which was, however, varied by Robert Stephens in his different editions of the Bible. It is scarcely necessary to observe that the punctuation of the Bible possesses no authority, and that no critic hesitates to dissent from it. The accents, or the writing *κατὰ προσῳδίαν*, which were already in use in the Old Test., were added by Euthalius to his edition, but were not in general use before the 10th century.

4. The Hebrew MSS. all contain a versicular division, marked with the accent called *silluk*, and the *soph pasuk* (end of the verse). The word *pasuk*, פסוק, is found in the Talmud, where it denotes some division of this kind; but whether the Talmudical *pesukim* are identical with those in the manuscripts has been strongly contested. It is said in tract *Kiddushin* (xxx, 1), "Our rabbins assert that the law contains 5888 [or, according to Morinus, 8888] *pesukim*," while, according to the division in our Bibles, there are 5845 verses. "The Psalms have eight more." There are at present 2527. "The Chronicles eight less." This division rather resembles the *στίχοι* in the Sept., of which the Psalms contain 5000. In the Mishna (*Megillah*, iv, 1) it is said, "He who reads the law must not read less than three *pesukim*. Let not more than one be read by the interpreter, or three in the prophets." The passage in Isa. lii, 3-5 is reckoned as three *pesukim*. In *Taen* (iv, 3) a precept is given for reading the history of the creation according to the parashes and the verses in the law; and in the Bab. Talmud (*Baba Bathra*, xiv, 2) the passage in Deut. xxxv, 5-12 is called "the last eight verses (*pesukim*) in the law." It is evident, therefore, that some at least of our present verses correspond with the Talmudical. The term פסוקים, *pesukim*, is also applied in the Gemara, as synonymous with פסוקים, to reading lessons in general, and sometimes to short passages or half-verses. But no marks appear to have existed in the text to distinguish these divisions, which were doubtless preserved by oral teaching. The first notice of such signs is found in *Sopherim* (iii, 7), in these words: "Liber legis, in quo incisum est, et in quo capita incisorum punctata sunt, ne legas in illo." No such marks occur in the synagogue rolls. The Sept. and Vulg. differ both from the Hebrew and from each other in divisions of this character (Psa. xliii, 11, 12; xc, 2; Lam. iii, 5; Jonah ii, 6; Obad. 9; *Vulg.* Cant. v, 5; Eccles. i, 5). The *pesukim* of the Talmud, which are there said to have descended from Moses, may have been possibly separated by spaces. From a Targum on Cant. v, 13, it appears that the decalogue was originally written in ten lines (*tummin*). All the pointed or Masoretic MSS. contain the present verses, divided by the *soph pasuk* (‏). We have already referred to the practice of the Masorites in numbering these verses, which was done at the end of each book. Thus at the end of Genesis, "Genesis has 1534 verses," etc.; and at the end of the Pentateuch, "The number of verses (*pesukim*) in the book of Deuteronomy is 955, its sign ה'קצ" [which represents the same number]; the middle verse is, 'And thou shalt do according to the sentence' (xvii, 10); the number of parashes is ten, and of *sidarim* twenty-seven;

and the number of verses in the entire Pentateuch is 5245 [5845?]. . . . The number of verses in the Psalms is 2527, the sign מנ"ך; the middle verse, 'Nevertheless they flattered thee with their mouth' (lxxviii, 36); the number of *sidarim* nineteen, and the number of psalms 150." The Venice edition of Ben-Chajim, from which these divisions are taken, omits them in Chronicles, but they are supplied by two MSS. In the Pentateuch the number of verses in the greater sections, or those marked by פ פ פ and ס ס ס, is also indicated at the end of each section, thus: "Bereshith has 146 verses, sign אבציה; Noah has 153 verses, etc. The entire number of verses is 23,206." Before the Concordance of rabbi Nathan, in the 15th century, the Jews made their references by citing in the Pentateuch the first two words of the Sabbath lessons, making no use of the shorter *sidarim*, or of the open or shut parashes. Of these, which are confined to the Pentateuch, there are 290 open and 379 shut. Of the larger parashes, or Sabbath lessons, Genesis contains twelve; Exodus eleven; Leviticus, Numbers, and Deuteronomy ten each. Of the lesser *sidarim* Genesis contains forty-two, etc. These always commence in the Pentateuch with an open or closed section. From the time of cardinal Hugo's Concordance citations began to be made by chapter and letter. All MSS. of the Vulg. after this period began to be thus marked, and we find Nicholas de Lyra in the 14th century frequently citing them in this manner. The citation of chapter and verse was a Jewish improvement of the succeeding century. See SCRIPTURES, HOLY.

The ancient Greek MSS. which have descended to our times also contain a division into short sentences, which have been sometimes called *στίχοι* and *verses*. They are regulated by the sense, and each constitutes a full period. They are frequently double or treble the length of the verses in our present New Test., although sometimes they are identical with them. The Alexandrian, Vatican, Cambridge, Dublin, and other ancient MSS., all contain similar divisions. The following is from the Cod. Ephremi (1 Tim. iii, 12-16):

Διακονοι εστωσαν μιας γυναικος ανδρες' τεκνας καλως προϊσταμενοι και των ιδιων οικων' οι γαρ καλως διακοινησονται' βαζμων εαυτοις καλον περιποιοντα' και πολλην παρησιν εν πιστει τη εν Χω. Ιθ'.

Ταυτα σοι γραφω επιλυνω ελθειν προς σε εν ταχει' εαν δε βραδυνη' ινα ειδης πως δει εν οικω σου αναστρεφεσθαι' εις εστιν εκκλησια σου ζωντος' στυλός και εδραιωμα της αληθειας.

Και ομολογουμενος μεγα εστιν το της ευσεβειας μυστηριον' ος [?] εφανερωθη εν σαρκι' εδικαιωσεν πνι' αφησιν αγγελους' εκηρυχθη εν εβριςιν' επιστευθη εν κοσμω' ανελημφθη εν δοξη'.

II. In the Printed Bibles.—1. In these the numerical notation is generally attributed to Robert Stephen, or Stephens (*Étienne*). The origin is, notwithstanding, involved in obscurity. Even those who attribute the invention to Stephens are not agreed as to the date. "We are assured," observes Calmet (*Pref. to the Bible*), "that it is Robert Stephens who, in his edition of 1543, divided the text by verses, numbered as at present." This division passed from the Latins to the Greeks and Hebrews. "Robert Stephens," says Du Pin (*Proleg.*), "was the first who followed the Masorites in his edition of the Vulgate in 1545." "Verses," says Simon (*Hist. Critique*), and after him Jahn (*Introd.*), "were first introduced into the Vulgate and marked with figures by Robert Stephens in 1548." Morinus (*Exercit. Bibl.*), who is followed by Prideaux (*Connection*), attributes the verses to Vatablus, without naming a date, while Chevallier (*Hist. de l'Imprimerie*) and Maittaire (*Historia Stephanorum*) assert that Stephens divided the chapters into verses, placing a figure at each verse, in the New Test. in 1551, and in the Old in 1557. Chevallier adds that James Faber of Estaples had introduced the practice in his edition of the Psalms printed in 1509 by Henry, father of Robert Stephens; and he is followed by Renouard (*Annales des Étienne* [Paris,

1843]), in supposing that Stephens took his idea from this very work. But, not to multiply instances, Horne (*Introd.* vol. ii. pt. i, ch. ii. s. iii, § 1) gives the following account of their introduction: "Rabbi Mordecai Nathan . . . undertook a similar concordance [to that of Hugo] for the Hebrew Scriptures; but, instead of adopting the marginal letters of Hugo, he marked every fifth verse with a Hebrew numeral, thus, **א** 1, **ב** 5, etc.; retaining, however, the cardinal's divisions into chapters. . . . The introduction of verses into the Hebrew Bible was made by Athias, a Jew of Amsterdam [1661]. . . . with the figures common in use, except those which had previously been marked by Nathan with Hebrew letters in the manner in which they at present appear in the Hebrew Bibles. By rejecting these Hebrew numerals, and substituting for them the corresponding figures, all the copies of the Bible in other languages have since been marked." "The verses into which the New Test. is now divided are much more modern [than the *στίχοι*], and are an imitation of those invented for the Old Testament by rabbi Nathan in the 15th century. Robert Stephens was the first inventor." In another place (§ 2), Horne has observed that the Masorites were the inventors of verses, but without intimating that they are the same with those now in use. Doubts were entertained on this subject so early as the 16th century. "Who first," observes Elias Levita, "divided the books of the Old and New Testaments into *στίχοι*? There are even some who entertain doubts respecting a matter but recently come into use, viz., who the person was who introduced the division of verses into the Greek and Latin Bibles." Serrarius (*Proleg.*) makes the following allusion to the circumstance: "I strongly suspect that it is far from certain who first restored the intermitted division into verses. Henry Stephens, indeed, having once come to Würzburg, would fain have persuaded me that his father, Robert, was the inventor of this distinction in the New Testament; and I afterwards observed this same statement in his preface to his *Greek Concordance*, with the addition that it was on his way from Paris to Lyons that he made the division, a great part of it while riding on horseback" (*inter equitandum*). "This may, after all, be an empty boast; but supposing it true, as Catholics have used the versions of Aquila, Symmachus, and Theodotion, who were apostates or heretics, so may we use this division of Robert Stephens;" and, not able to conceal his mortification that the honor should belong to a Protestant, he significantly observes that Seneca had found the best scribes (*notarii*) among the vilest slaves. Henry Stephens, in the preface to his *Concordance*, thus expatiates on his father's invention: "As the books of the New Testament had already been divided into the sections (*temmata*) which we call chapters, he himself subdivided them into those smaller sections, called by an appellation more approved of by others than by himself, *versicles*. He would have preferred calling them by the Greek *temmata*, or the Latin *sectiones*: for he perceived that the ancient name of these sections was now restricted to another use. He accomplished this division of each chapter on his journey from Paris to Lyons, and the greater part of it *inter equitandum*. A short time before, while he thought on the matter, every one pronounced him mad, for wasting his time and labor on an unprofitable affair which would gain him more derision than honor; but lo! in spite of all their predictions, the invention no sooner saw the light than it met with universal approbation, and obtained such authority that all other editions of the New Testament in Greek, Latin, German, and other vernacular tongues, which did not adopt it, were rejected as unauthorized." Henry Stephens had already stated the same fact, in the dedication to Sir Philip Sidney, prefixed to his second edition of the Greek Testament (1576). We now proceed to Stephens's own statements.

Upon leaving the Church of Rome, and embracing Calvinism in 1551, in which year he took refuge in Ge-

neva, he published his fourth edition of the Greek Testament, containing also the Vulgate and the Latin version of Erasmus, with the date in the title **MDLXI**, an evident error for **MDLI**. The x has been, in consequence, erased in nearly all the copies. In the preface he observes, "As to our having numbered this work with certain versicles, as they call them, we have herein followed the most ancient Greek and Latin manuscripts of the New Testament, and have imitated them the more willingly that each translation may be made the more readily to correspond with the opposite Greek." Bishop Marsh (notes to Michaelis), and after him Horne (*ut sup.*), asserts that "Beza split the Greek text into the verses invented by Robert Stephens;" but the bishop is evidently mistaken, as Stephens's fourth edition is divided into these breaks as well as Beza's (see facsimile in *Christian Remembrancer*, *ut sup.*). Each verse commences the line with a capital, the figures being placed between the columns.

The fourth edition of the Greek Testament was followed in 1555 by the seventh of the Latin Vulgate, in 8vo, containing the whole Bible, having the present verses marked throughout with numerals, and the following address to the reader: "Here is an edition of the Latin Vulgate in which each chapter is divided into verses, according to the Hebrew form of verses, with numerals prefixed, corresponding to the number of the verse which has been added in our new and complete Concordance, after the marginal letters A, B, C, D, E, F, G, that you may be relieved from the labor of searching for what these figures will point out to you as with the finger." The title-page bears Stephens's olive; and the name of the printer, Conrad Badius, the son-in-law of Stephens, with the date, 8 *idibus Aprilis*, 1555, shows where and when it was printed. It was the first edition of the entire Bible printed by Stephens since he left the Church of Rome. The text is continuous, the verses being separated by a ¶, with the figures in the body of the text. The next edition of the Bible by Stephens is that of 1556-57, in 3 vols. fol., containing the Vulgate, the version of Pagninus, and Beza's Latin version of the New Test., now first published. The notes are those commonly ascribed to Vatablus, with those of Claude Badwell in the Apocryphal books. The text is broken up into divisions, and there is a notice to the reader apprising him that this edition contains the text divided into verses, as in the Hebrew copies.

Again, in the preface to Stephens's Latin and French New Test., published at Geneva in 1552, which is also thus divided, but which we have never seen cited, he observes: "Et a fin de plus aisement pouvoir faire la dicte collation et confrontation, avons distingué tout iceuluy Nouveau Testament comme par vers, a la façon et manière que tout le Vieil a este escript et distingué, soit par Moysé et les prophetes compositeurs et auteurs, ou par seavans Hebreux succedans, pour la conservation des dictes Escriptions, suyans aussi en ce en partie la manière de ceux qui ont escript les premières exemplaires Grecs, et les vieulx escripts de la vielle translation Latine du dict Testament, qui de chaque sentence, ou chaque moitié de sentence, voire de toutes les parties d'une sentence en faisoient comme des versets. Et en la fin de chaque livre mettoyent le nombre d'iceulx versets: possible a fin que par ce moyen on n'en peust rien oster, car on l'eust appereu en retrouvant le contenu du nombre des dicts versets." Stephens adds that he has also given references to the verses in indexes and concordances, not omitting the letters (*letterines*) by which the chapters had been divided by his predecessors into four or seven parts, according to their length, for the purpose of a concordance. He makes reference to the chapters and verses in his *Harmonia Evangelica*, taken from the work of Leo Judah, and placed at the end of his edition of the New Test. (1551).

Henry Stephens, in his preface to his *Concordance*,

states that it was this division which first suggested to his father's fertile mind the idea of a Greek and Latin concordance to the New Test., in imitation of his Latin concordance, *Concordantie Bibl. utriusque Testamenti* (vii Cal. Feb. 1555, fol.); in the preface to which he says that he has followed the Hebrew mode of numbering the verses. In the title-page he makes an appeal to his brother printers not to "thrust their sickle into his harvest," not that he "feared such plagiary from well-educated printers, but from the common herd of illiterate publishers, whom he considered as no better than highway robbers, no more capable of Christian integrity than so many African pirates." "Whether his apprehensions were well founded," continues his son, "let the experience of others tell." Owing to Stephens's death, in 1559, his *Concordance* was published by Henry Stephens in 1594.

But it is far from being true that Stephens, as has commonly been believed, was the first who either followed the Masorites, or divided the chapters into verses, or attached figures to each verse. This had been done, not only, in regard to the Psalms, by James Le Fevre, in his *Psalterium Quincuplex* in 1509, but throughout the whole Bible by Sanctes Pagninus in 1528. The *Psalterium* was beautifully printed by Henry, father of Robert Stephens, each verse commencing the line with a red letter, and a number prefixed; and we may here observe that the book of Psalms was the first portion of the Scriptures to which numbers were attached by designating each separate psalm by its number. Some ascribe this numeration to the Septuagint; it is, we believe, first referred to by St. Hilary (*Pref.*), and is found in the manuscripts of the Sept. Whether they were so numbered at the Christian era is somewhat doubtful. In Acts xiii, 33, the second psalm is cited by its number, but in some of the best manuscripts the reading here is the first psalm. In ver. 35 "in another" is said without reference to its number; and Kuinöl is of opinion that the true reading in ver. 33 is simply ἐν ψαλμῷ, "in a psalm."

In the year 1528 the Dominican Sanctes Pagninus of Lucca published at Lyons, in quarto, his accurate translation of the Bible into the Latin from the Hebrew and Greek. This edition is divided throughout into verses marked with Arabic numerals in the margin, both in the Old and the New Test. The text runs on continuously, except in the Psalms, where each verse commences the line. There was a second edition, more beautifully executed, but without the figures and divisions, published at Cologne in 1541. The versicular divisions in the Old Test. are precisely the same with those now in use—viz. the Masoretic. Each verse is separated by a peculiar mark (¶).

Masch (*Biblioth. Soc.*), in reference to Stephens's statement that he had followed the oldest Greek manuscripts, says that this assertion was made by Stephens to conciliate those who were taking all methods of blackening him, whereas the ancient divisions were quite different. The reader will judge from Stephens's preface to his French translation above cited whether this assertion is borne out. Stephens there asserts that the authors of the ancient (stichometrical) division reckoned by whole books, and he only professes to imitate them *in part*, as well as the Hebrew copies; which he did by making a versicular division of each chapter, and prefixing a figure to each verse (as in Nathan's *Concordance*), instead of adding the amount at the end of each book. Hug observes that it is really true that ancient manuscripts of the New Test. are sometimes divided into smaller sections, which have some analogy to our verses, instancing the Alexandrine, Vatican, and others.

It is, however, only in the canonical books of the Old Test. that Stephens follows Pagninus. In Matthew's gospel, Pagninus has 577 verses and Stephens 1071. The number of verses in each chapter in Stephens is often double, frequently treble, that in Pagninus. In

John v, for instance, Pagninus has 7 and Stephens 22 verses. In the deuterio-canonical books, into which no Masoretic distinction had found its way, Stephens has also a different division; thus in Tobit he has 292 verses, while Pagninus has but 76; and the same proportion prevails throughout the other books, only Pagninus has not the third and fourth books of Esdras, the prayer of Manasses, nor the addenda to Daniel.

The next edition containing this division into verses is Stephens's eighth and last edition of the Vulgate, 1556-57, 3 vols. fol. This is one of the editions called Vatablus's Bibles, of which there are three, viz. Stephens's nonpareil (1545), his eighth edition of which we are now treating, and the triglot edition published at Heidelberg in 1599. It is the Bible which Morinus (*Exercit. Bibl.*), Prideaux (*Connec.* vol. i), and so many others conceived to have been the first containing the division of verses. Prideaux observes that Vatablus soon after published a Latin Bible after this pattern, viz. that of rabbi Nathan (1450), with the chapters divided into verses. "Soon" after, however, meant about a century; Vatablus died March 16, 1547. It is evident also, from Prideaux's note, that he was not aware that Vatablus's Bible was no other than Stephens's eighth edition.

There was a beautiful edition of the Psalter published in 1555 by Robert Stephens containing the Latin of Jerome, with that of Pagninus, the numerals attached to each verse being placed in the centre column between perpendicular rubricated lines. It is entitled *Liber Psalmorum Davidis, Tralatio Duplex, Vetus et Nova. Hæc Posterior Sanctis Pagnini, partim ab ipso Pagnino Recognita partim et Francisco Vatablo, in Prælectionibus Emendata et Exposita*. The title bears the date MDLV., but in the colophon is the subscription "Imprimebat Rob. Stephanus, in sua officina, Anno MDLVII, Cal. Jan."

The form of printing the Bible in verses, with numerals, now became established. It appeared in 1556 in Hamelin's French version. It found its way the next year into the Geneva New Test. (English), printed by Conrad Badius, of which a beautiful fac-simile has lately issued from the press of Mr. Bagster. It was adopted, by marking every fifth verse with a Hebrew numeral, into the Hebrew Pentateuch, printed that same year (1557) at Sabionetta. In 1559 Hentenius introduced Stephens's division and figures into his correct Antwerp edition of the Vulg., which was followed by that of Planfin in 1569-72, and passed into the Antwerp Polyglot (1569).

The Sixtine edition of the Vulgate (1590) having adopted this division, it was continued in the Clementine (1592), and has ever since been used in all editions and translations in the Roman Catholic Church. Hentenius, however, having printed the text continuously, with the figures in the margin, and a mark (thus, ¶) at the commencement of each verse, this plan was followed in the Clementine and Sixtine editions, in which the verses are marked with an asterisk, capitals being used only at the commencement of a period, while the Protestant Bibles of Basle and Geneva commence the verse with the line and with a capital letter. In the Roman editions the only exceptions are the metrical books of Psalms, Job, and Proverbs, from the tenth chapter.

This division appeared in the Geneva (English) Bible in 1560 and 1562, the Bishops' Bible in 1568, and passed into the Authorized Version in 1611. Some of the Protestant editions followed the Roman in adopting a continued text, of which it will be sufficient to name the beautiful Zurich edition of Osiander, in which each verse is distinguished by an obelus in the body of the text; and it is to be regretted that this practice has not been generally continued either in Protestant or Roman Catholic Bibles. We may add that Pagninus, Stephens, Frellon, and the Roman editions, all slightly vary among each other, both in the divisions and the

placing of the figures. Nor do the chapters, owing to a diversity in the manuscripts, invariably coincide, as the versicular divisions of the Psalms in the Sept. and Vulg. are not always the same with the Hebrew; Stephens's figures sometimes occur in the middle of a verse in the Roman editions.

The Roman edition of the Sept. (1587 and 1589) was printed without any division or figures; and the present notation first appeared in Plantin's edition of the deuterocanonical books (Antwerp, 1584), from Tobit iv, 24 (the commencement to iv, 23 being marked by decades). The Frankfort edition of the Sept. (1597) has the present numeration throughout, but without any notice of the fact by the editors. The numbers are placed in the margin, but each verse commences with a capital, while in Plantin they are separated by spaces only.

2. Having now succeeded in detecting the errors of former writers, we are arrived at the more difficult task of eliciting the truth out of so many contradictory statements. Our limits will not allow us, however, to do more than offer the following view as the result of our inquiries.

Rabbi Nathan having in his *Concordance* (in 1450) commenced the practice of referring to a versicular division of each of the Latin chapters by the number of each Masoretic verse in the chapter, Arabic figures were, after the example of Le Fèvre's edition of the Psalms, affixed to each verse by Pagninus in his Latin Bible in 1528. Pagninus introduced a somewhat similar division into the New Test. and Apocryphal books. His system was adopted by Robert Stephens in the New Test. in 1551, and in the whole Bible in 1555, with scarcely any alteration except in the deuterocanonical books and the New Test., wherein he introduced a different division. This division was partly founded on the practice of ancient manuscripts, and was partly his own. But, as his object was to adapt his division to his *Concordance* without any reference to the sense, he unfortunately introduced a much worse division than he found in any of his models. It is to be lamented that his "wild and indigested" system of breaking up the text into what appear to the eyes of the learned and to the minds of the unlearned as so many detached sentences (Michaelis, *Introd.*) has had a deleterious effect on the sense of Scripture, and perhaps given rise to some heresies (see *Pref. to Bishop Lloyd's Greek Test.*). Michaelis supposes that the phrase "inter equitandum" does not mean that Stephens accomplished his task while actually riding on horseback, but that during the intervals of his journey he amused himself by doing it at his inn. If his division was a mere modification of that of Pagninus (see "Bible" in Taylor's ed. of Calmet's *Diet.*), it might easily have been done "inter equitandum;" a phrase which, however we understand it, not inaptly represents the post-haste expedition with which his work was executed. Whether Pagninus himself adopted his division in the New Test. from manuscripts, or what his design was in introducing it, must be the result of an investigation which we cannot now enter upon. Stephens, it is true, never once refers to Pagninus's system; but we could hardly suppose that he was unacquainted with it, even had we no evidence to this effect. The evidence, however, does exist, for we find that Stephens in 1556 had in his possession two copies of Pagninus's Bible. The preface to his edition of 1557 contains the following words: "In exteriori autem parte interpretationem Sanctis Pagnini (quam potissimum, ut maxime fidam, omnes uno ore laudant), crassioribus litteris excusam damus: sed hanc quidem certe multis paribus ea quam in aliis editionibus habes, meliorem. *Nacti enim sumus duo ex prima illius editione exemplaria, in quibus non solum typographica errata non pauca, nec levia, manu propria ipse author correxerat, sed multos etiam locos diligentius et accuratius quam antea examinatos, recognoverat.*"

Croisn (*Observat.*) states that he had seen very ancient Latin MSS. containing Stephens's division, with

the first letter of each verse rubricated, but he does not designate his MSS. We believe this was a biased assertion. There are Latin MSS. with periods so marked, but they are not the same with Stephens's verses. There is in the British Museum also a MS. of part of the Sept. (Harl. 5021), dated in 1647, which is versiculated throughout, and marked with figures, but the verses are much longer than those of Stephens's. Latin MSS. are found divided in the same manner as the Greek, one of which is the *Cod. Beza*, which was collated by Stephens for his edition of 1550. Dr. Laurence's book of Enoch is divided into verses, with numbers attached, as well as into chapters called *kefel*. Dr. Laurence says that these divisions into verses are arbitrary, and vary in the different Ethiopic MSS. of Enoch. The numbers, we presume, were added by the translator. By a letter from Dr. Bandinel, keeper of the Bodleian Library, we learn that that library possesses an Ethiopic MS. of the New Test. divided into sections and paragraphs entirely different from ours, not numbered, but separated by a peculiar mark. The verses in the Gospel of the Templars [see GOSPELS, SCRIPTORES], instead of spaces or figures, are separated by a horizontal line [—] (*Philo. Cod. Apoc.*).

The MS. of the Syriac New Test. in the British Museum (No. 7157), written at Bethkuko, A.D. 768 (see Wright, *Seider*, p. 651, note), contains a numerical division in the Gospels, with the numbers in rubric inserted by a coeval hand into the body of the text. Attached to each number is another in green, referring to a canon of parallel passages on the plan of that of Eusebius, but placed at the foot of each page. The sections, which are called *versiculi* in the *Catalogue*, and have been mistaken for verses, are more numerous than the Ammonian, Matthew containing 426, Mark 290, Luke 402, and John 271. There is a complete capitulation also throughout all the books, the chapters being separated in the text by a peculiar ornament, with the number in the margin: of these chapters Matthew has 22, Mark 13, Luke 22, John 20, Acts 25; of the Catholic epistles, James 1 and [1] John 6, and the Pauline have 54. After the first Gospel there is a double number, by which the former are recapitulated, and a treble number from the Acts to the end.

The numerical divisions into chapters and verses were first adapted to liturgical use in the Anglican Church—the chapters in Edward VI's first Book of Common Prayer (1549), and the verses in the Scotch Liturgy (1637), whence they were adopted into the last revision (1662).—KITTO. See BIBLE.

VERSE, in *poetry*, is a line consisting of a certain number of metrical syllables; also a separate division of a hymn or anthem, sung in divine service. See VERSICLE.

Versé, NOËL AUBERT, *Sieur de*, a French controversialist, was born at Mans about 1650. He studied medicine at Paris, but afterwards turned his attention to theology. Having entertained doubts as to the Trinity, he abjured Roman Catholicism, on which account he was persecuted, and escaped to Holland, where he was enrolled among the citizens of Amsterdam, and began the practice of medicine; but this proving an insufficient support, he engaged in literary labors. He died in Paris in 1714. For a list of his numerous writings, which are chiefly of a doctrinal and historical and personal character, see Hoefer, *Nour. Biog. Générale*, s. v.

Versicle is a brief and terse exclamation, commonly consisting of a single sentence, with a corresponding response, which is used in various services of the Church, especially in the Church of England; also a short antiphon sung towards the altar; also the prayer or acclamation at the beginning of the Hours.

Versions OF THE BIBLE, a general name for translations of the Holy Scriptures into other languages than the original.

I. *Origin*.—After the Hebrew had ceased to be spoken, and had become a dead language in the 2d century before Christ, and still more after the spread of Christianity, translations of the Hebrew Scriptures into the prevailing languages of the age became a thing of necessity, both to Jews and Christians, in Palestine and in other countries. Accordingly, almost every language then current received at least one version, which became of ecclesiastical authority, and was used instead of the original Hebrew text. In this way there arose, almost contemporaneously, the Alexandrine version for the Grecian and Egyptian Jews, and the earliest Chaldee versions for those who dwelt in Palestine and Babylonia. After the introduction of Christianity, the Christians adopted at first the Sept.; but in the 2d century there appeared three or four other Greek versions from the hands of Jewish and Christian translators, the object of which was to supersede the Sept. In this, however, they did not succeed, and these works are now mostly lost. About the same time, the Syrian Christians made the Syriac version, and the Latin Christians procured a Latin version of the Sept., which at the close of the 4th century gave place to the version of Jerome, the present Vulgate. After the wide extension of the Arabic language in the 7th century, both Jews and Christians began to translate the Scriptures into Arabic also—the Jews out of the original Hebrew, and the Christians from the Sept. Indeed, this latter is the case with all translations of the Old Test. made by the Christians into the Oriental languages.

In the case of the New Test., there did not for a long time exist any occasion for a translation, as the Greek language, in which it was written, was universally prevalent in the civilized world at the time of the promulgation of the Gospel. In certain provinces of the Roman empire, however, the Latin soon came into common use, especially in North Africa, and hence the old Italic and afterwards the Vulg. arose. Still earlier a Syriac version was made for the use of the Oriental Christians, to whom that language was vernacular. See **PESHITO**.

II. *Literary Character*.—The versions of the Scriptures are usually divided into the *immediate*, or those made directly from the original text, and the *mediate*, or those made from other versions. The latter are also sometimes called *daughters* of the former. It is only those of the first species which have any hermeneutical value; those of the latter kind can only serve for aid in the verbal criticism of the versions from which they have flowed, and are indeed of no special importance even here, except in the case of the Sept., the text of which has been so much corrupted.

The ancient translators possessed neither grammatical nor lexicographical helps, and followed, therefore, everywhere exegetical tradition. As their object, too, was always a practical, rather than a learned or scientific one, they are often apt to fail in the requisite degree of exactness, and sometimes also they interweave their own views and impressions in their versions. This last circumstance renders these versions less available as respects exegesis, but makes them so much the more important as historical documents in regard to the views of the age and of the sect to which they belong. See **CRITICISM**.

III. *Classification*.—In this *Cyclopedia* (including the Supplement) the reader will find a concise account of all the versions of the Holy Scriptures made in ancient and modern times, under the alphabetical order of the various languages. In general all the tongues of this “babbling earth” may be arranged as follows:

A. *Monosyllabic Languages*.—These are referable, geographically and philologically, to three grand divisions, viz.: 1. Languages of China; 2. Languages of the Transgangeitic peninsula or of the Indo-Chinese; 3. Languages of Tibet and the Himalayas.

B. *Semitic Languages*, comprising: 1. Samaritan, originally identical with Hebrew; 2. Ancient Syriac and Chaldee, which, however, have their representative in modern

Syriac; 3. Pehlvi, the ancient tongue of Media, a compound probably of Chaldee and Syriac with Zend; 4. Various Arabic dialects; Hinyaritic, the parent of Ekkhili; 5. Gheez, or Ethiopic, now superseded by its modern dialects, Tigre and Amharic.

C. *Indo-European*, with different branches: 1. Medo-Persian, including the Persian, Pushtoo, Beloochee, Kurdish, Ossitinan, and Armenian; 2. Sanscrit, subdivided into (a) languages of Sanscrit origin, as Hinduwee, Bengalee, Assamese, Uriya, Nepalese, Palpa, Kunmaon and Gurishal, Cashmerian, Dogra or Jumboo, Panjabee, Moulton or Ooch, Sindhee, Cutchee and Gujerattee, Kunkuna, and Mabratta; (b) languages of India of non-Sanscrit origin, as Tamul, Telinga, Canarese, Cingalese, and Maldivian; (c) rude and unwritten languages of non-Sanscrit origin, as Gondee or Goandee; 3. Indo-European languages of Europe, subdivided into the different families, as Celtic, Teutonic, Græco-Latin, Traco-Illyrian, and Slavonic.

D. *Ugro-Tartarian*.—To this class belong all the languages of Europe and Asia which are not either Semitic or Indo-European, including the Finnish and Samojede languages in the North; the Georgian and other languages of the Caucasus region; the Turkish, Mongolian, and Tungusian families of Central Asia; the Japanese, Loochoan, and Corean in Western Asia; and the Euskarian, or Basque, in Western Europe.

E. *Polynesian Languages*, including two varieties, the Polynesian and Negritian.

F. *African Languages*, with four varieties: Coptic, Berber, Nigro-Hamitic, and Nilo-Hamitic languages, with their various dialects.

G. *American Languages*, with numerous groups or families.

A different classification is adopted by A. H. Sayce, in his *Introduction to the Science of Languages* (Lond. 1880), ii, 33 sq., following the results of Friedrich Müller, in his *Grundriss der Sprachwissenschaft* (Vienna, 1876). The following passage from Sayce's work (*loc. cit.* p. 32) will be of interest: “The test of linguistic kinship is agreement in structure, grammar, and roots. Judged by this test, the languages at present spoken in the world probably fall, as Prof. Friedrich Müller observes, into ‘about one hundred different families,’ between which science can discover no connection or relationship. When we consider how many languages have perished since man first appeared on the globe, we may gain some idea of the numberless essays and types of speech which have gone to form the language-world of the present day. Language is the reflection of society, and the primitive languages of the earth were as infinitely numerous as the communities that produced them. . . . So far as the available data allow, the existing languages of the world may be classified as follows” (referring to the seventy-six heads adopted), “though it must be remembered that in many cases our information is scanty and doubtful, and languages here grouped under a single head may hereafter turn out to be distinct and unrelated.” See **TONGUES, CONFUSION OF**.

IV. *History of Modern Efforts*.—At the beginning of the present century there existed a number of versions, which formed a stock for the newly established Bible societies to commence upon. There were translations into nearly all the languages of Europe, into a few spoken in the adjacent parts of Asia and Africa, and into four only of countries lying beyond. Some of these old versions were not adopted; others were printed for use until something better could be provided—for it is better to give a starving man stale bread than keep him waiting while you are baking; and others, again, have been employed without material change up to the present time. In some countries a single version has been accepted, as in England; elsewhere, as in France and Germany, use has been made of more than one; and in cases where important sections of the people have refused one version, it has been the practice of most Bible societies to permit them to purchase a version they would receive; provided, always, that it was substantially faithful and revealed clearly the way of salvation.

New translations have been made since 1804 in about two hundred and twenty-six languages. To state how many have been due to the labors of any particular body of missionaries would not be easy, inasmuch as,

in many cases, various missions have been engaged. The same difficulty applies, in a measure, to the work of the Bible societies, two or more having often published in the same language. Still the following may be taken as an approximate statement, though the correctness of the figures is not guaranteed:

The British and Foreign Bible Society has published or assisted to publish new versions in	187	languages.
The American Bible Society.....	41	"
The National Bible Society in Scotland....	5	"
The Bible Translation Society.....	14	"
The Society for Promoting Christian Knowledge.....	17	"
The Trinitarian Bible Society.....	3	"
The Netherlands Bible Society.....	11	"
The Bible societies of Germany (viz. the Prussian Bible Society, 4; the Württemberg Bible Society, 4; and the Bremen Bible Society, 1).....	9	"
The Bible societies of Switzerland.....	9	"
The Bible societies of Denmark, Sweden, and Norway.....	6	"

Many of the above translations extend only to a part of the Scriptures. The entire Bible has been rendered during the present century into about *fifty-five languages*, the New Test. into *eighty-four*, and parts only into *eighty-seven*. It may surprise the reader to learn that the work should, in so large a proportion of cases, be incomplete; but no one will wonder who realizes the prodigious labor involved in making a translation of the whole Bible. The Burmese version of Judson occupied nineteen years; the Bengali of Dr. Carey, at least fifteen years; the Tahitian, twenty years; the Arabic, sixteen years; the Turkish of Dr. Schauffler, fourteen years; the Mandarin Colloquial of the Old Test., by Dr. Schereschewsky, fifteen years; and, after nearly forty years of study and of missionary labor, Dr. Williamson and Dr. Riggs completed their Dakota version of the Bible, and one of them estimates that he has spent on an average fully thirty minutes on each verse he has translated. How could it be otherwise? We can imagine the labor it would cost simply to transcribe the book from Genesis to Revelation; but how much greater must have been the labor of men like Eliot or Moffat, who had to note down phonetically the words used by the natives, mould them by degrees into a written language, and then cast into that rough mould the elevated spiritual conceptions of the Bible! How difficult to find the equivalents for *sin*, *atonement*, *righteousness*, in languages possessing, perhaps, a dozen words for *murder*, according as mother, child, or other relative is despatched, but none for *gratitude* or *forgiveness*, because such affections are unknown!

Considering the varied difficulties of the work, the marvel is that so much has been translated, and translated so well. As language, especially the foreign, becomes better known in the course of time, the necessity of revision is felt, and by none perhaps so much as by the translator himself; and thus it happened that many versions were revised at different times, in order to produce one Bible for the converts and to avoid the evil of varying versions. (B. P.)

Versmann, ERNST FRIEDRICH, a Lutheran theologian of Germany, was born July 14, 1814, at Tönning, on the Eider. From 1833 to 1837 he studied theology at Kiel and Berlin; in 1840 he was made deacon at Itzehoe, in 1857 pastor primarius and provost, in 1868 member of the Lutheran consistory at Kiel, and died Aug. 2, 1873. Versmann belongs to the most prominent theologians of Sleswick-Holstein. Besides sermons and other ascetical writings, he published *Das Leben Jesu in 12 Vorträgen* (Itzehoe, 1865). See Zuchold, *Bibl. Theol.* ii, 1384. (B. P.)

Vert, CLAUDE DE, a French liturgist, was born in Paris, Oct. 4, 1645, educated by the canons of St. Geneviève at Nanterre, entered the Order of St. Benedict, and became bishop of Gap. After travelling in Italy, he was made treasurer to the Abbey of Clugny, visitor of the order, and vicar-general in 1694. In 1695 he obtained the priory of St. Peter at Abbeville, and died

there May 1, 1708. He made the ceremonies of the Church his particular study, and tried to explain them both literally and historically. For his works, see Hoefler, *Nouv. Biog. Générale*, s. v.

Vertabiets. See VARTABEDS.

Venticordia, in Roman mythology, is a surname of Venus, the *directrix of the heart*. There was a temple erected to her when three vestal virgins had fallen at the same time, so that she might turn the hearts of women from unchastity. To dedicate this temple and to erect the statue of the goddess, there were selected by lot, out of one hundred of the most virtuous women, ten, who then named one of their number (Sulpicia, wife of Fulvius Placcus) for the performance of that duty.

Vertot, RENÉ AUBERT DE, a French historiographer, was born in the Castle Bennetot, in Normandy, Nov. 25, 1655. In 1671 he joined the Capuchins, but, unable to carry out their austere regulations, he joined, in 1677, the Premonstratensians at Val-Serry, in the diocese of Soissons. In the same year he was called to Prémontre, in the diocese of Laons, as professor of philosophy, but in 1683 he went as prior to Joyenval, in 1687 to Croissy, and in 1693 as pastor to Freville, to leave it soon for Paris, where he intended to pursue his studies. In 1701 he was made member of the Académie des Inscriptions et Belles-lettres, and in 1715 historiographer of the Order of Malta, and died June 15, 1735. He wrote, *Histoire des Chevaliers Hospitaliers de S. Jean de Jérusalem, appelés depuis les Cheval. de Rhodes, et Aujourd'hui les Cheval. de Malte* (Paris, 1727, 5 vols.). Besides, there are a number of dissertations published in the *Mémoires de l'Académie des Inscriptions* and in the *Journal des Savaus*. See Wiener, *Handbuch der Literat.*, i, 728; Jöcher, *Allgemeine Gelehrten-Lexikon*, s. v.; Hoefler, *Nouv. Biog. Générale*, s. v. (B. P.)

Vertumnus, in Roman mythology, was a god of very doubtful significance, of whom nothing certain is known save that in Rome, where the Tuscan street leads to the Forum, his statue was erected; and that a feast, Vertumnalia, was held on Aug. 27 in honor of him; also that Pomona, the goddess of fruit, was thought to have been his wife. Some call him god of the seasons, others god of trade; some say he came from the Tuscans, others from the Sabines.

Verulam, COUNCILS OF (*Concilium Verulamense*). Verulam, or Verulamium, was an ancient town of England, County of Hertford, the site of which is now occupied by the city of St. Albans, which is twenty miles northwest of London. Two ecclesiastical councils were held here as follows:

I. (Called also *Council of St. Albans*) Was held A.D. 429 by SS. Germanus and Lupus against the Pelagian heresy. The authors of this detestable heresy, writes Constantius, came to the council glittering with pomp and fine dresses, and surrounded by their partisans. An immense concourse of people—men, women, and children—were assembled; leave was given to the Pelagians to speak first, which they did, and at much length; after which the venerable bishops poured forth, in answer, the torrent of their eloquence, supporting their own assertions by divine testimonies. Their opponents testified by their silence that they could not withstand them, and the assembled multitude with loud shouts proclaimed the victory of the Catholics. See Wilkins, *Council*, i, 3.

II. Was held A.D. 793, attended by king Offa, archbishop Humbert, and a large concourse, before whom the foundation of the Abbey of St. Alban was discussed, and the king recommended a journey to Rome. See Mansi, *Concil.* xiii, 861; Wilkins, by Haddan and Stubbs, iii, 470.

Vervactor, in Roman mythology, was a god of the fields, who was said to give the fallow ground its fruitfulness again.

Very Reverend is a title given by custom to certain clergymen in priests' orders who have attained to positions of dignity. In the Church of England it is usually reserved for deans and provosts of cathedrals and collegiate churches. In the Anglo-Roman communion it is applied to canons of cathedrals, to certain doctors of divinity, and others.

Vesalia, JONX DE, a celebrated preacher and doctor of theology at Erfurt and Worms, often confounded with John Wessel (q. v.), with whom he held nearly the same sentiments, was condemned for his theological opinions at Mentz in 1479, and cast into prison, where he soon died. A Catholic who witnessed the trial says he advanced nothing but what might be defended, except in regard to the procession of the Holy Spirit, in which he agreed with the Greeks. See Mosheim, *Hist. of the Church*, bk. iii, cent. xv, pt. ii, ch. ii.

Vesey, WILLIAM, an American Episcopal clergyman, was born at Braintree, Mass., in 1674. He graduated at Harvard College in 1693, and pursued his theological studies under the direction of the Rev. Samuel Myles, rector of King's Chapel, Boston. Under a call from the members of the Episcopal communion of the city of New York, he embarked for England in the spring of 1697 to receive holy orders, and was ordained by Dr. Henry Compton, bishop of London, Aug. 16 of the same year. He returned to New York, and was inducted, under command of the governor, into his office by Rev. Henricus Selyns of New York, Rev. Johannes Petrus of Kingston, Thomas Wenham and Robert Lurting, church-wardens, in the Dutch Church, on Christmas, 1697. Mr. Selyns and Mr. Vesey preached alternately in this church—the one in Dutch, the other in English—for about three months. Mr. Vesey was married to a Miss Reade early in March following. Meanwhile Trinity Church, the edifice under construction for the Episcopal society of New York, was approaching completion, and was formally opened for public worship on Sunday, March 13, 1698. Mr. Vesey was rector of this Church from that time until he was removed by death. In 1712, or about that time, he was appointed commissary to the bishop of London, which office he also held during the remainder of his days. His life, combining the two offices of rector and commissary, was a very active and laborious one, and it seems that the work of God prospered in his hands. He was largely aided in his labors by schoolmasters and catechists provided for his assistance, and by regularly appointed assistants at different periods, viz. Rev. Robert Jenny, Rev. James Wetmore, Rev. Thomas Colgan, and Rev. Robert Charlton. Mr. Vesey was a man of eminent piety as well as industry, and saw the fruits of his labors and example ripen in an abundant harvest. He died July 18, 1746, after a ministry of over forty-eight years in the same place. See Sprague, *Annals of the Amer. Pulpit*, v, 13 sq.

Vesica Piscis (*bladder of a fish*), a name applied by Albert Dürer to a pointed oval figure, formed by two equal circles cutting each other in their centres, which is a very common form given to the aureole, or glory, by which the representations of each of the three Persons of the Holy Trinity and the Blessed Virgin are surrounded in the paintings and sculptures of the Middle Ages. It has been conjectured that it was adopted

Vesica Piscis, Ely Cathedral.

from the idea that this figure is symbolical, and significant of the Greek word ἰχθυσ (a fish), which contains

the initial letters of the name and titles of the Saviour, Ἰησοῦς Χριστός, Θεοῦ Υἱός, Σωτήρ. This form, however, is by no means always given to the aureole, and the idea of any peculiar symbolical meaning being attached to it appears to have been adopted almost exclusively by English antiquaries. This form is sometimes found in panels and other architectural features, and is extremely common in mediæval seals, especially those of bishops and monastic establishments.—Parker, *Gloss. of Architect.* s. v.

Vespasian, TITUS FLAVIUS, a Roman emperor, was born A.D. 9, of humble parents, near Reate, a Sabine village, where his father was tax-gatherer. He became a successful soldier, and, after serving in Britain and elsewhere, was sent by Nero to Palestine in 66. He began the conquest of that country by the storming of Sepphoris and Jotapata in 67; and in 68, after hearing of the revolt of Vindex against the emperor, he hastened the operations of his army until he had taken and destroyed all the towns in his way before he reached the neighborhood of Jerusalem itself. At this juncture he was chosen emperor by the army in Mæsia, and subsequently by the entire East. In 71 he celebrated, in company with his son Titus, the triumph which marked the complete destruction of the Jewish polity and nation. He afterwards sent Bassus to put down the last remnant of the revolt, and to take measures that no towns of Palestine should be rebuilt; but he discountenanced cruelty and the abuse of power in dealing with the subjugated people. The restless agitations of the zealots compelled him, nevertheless, to put down their rebellious spirit by force in Egypt and Cyrene, and led to his order that the Temple of Onias, near Leontopolis, should be destroyed. He furthermore compelled the entire nation of the Jews to render into the Temple of Capitoline Jupiter a tribute equal to the tax they had been accustomed to pay to the Temple

Coin of Vespasian.

at Jerusalem. He is, however, to be credited with having displayed, from his point of view, a spirit of fairness and mildness towards that unhappy people of which numerous illustrations may be found.

Christianity was made to suffer persecution in the reign of Vespasian only because, and only so far as, it was identified with Judaism, and its troubles cannot be laid to the charge of the emperor, though Sulpicius Severus, in his *Chronicle* (beginning of the 5th century), decides otherwise. Vespasian died in the tenth year of his reign, A.D. 79, being the second emperor of Rome to die a natural death and the first to transmit the empire to his son. See the histories, and Herzog, *Real-Encyklop.* s. v.; also Smith, *Dict. of Gr. and Rom. Biog.* s. v.; and the monographs cited by Volbeding, *Index Programmatum*, p. 95.

Vesperal is a division of the antiphonarium containing the chants for vespers (q. v.).

Vespers (*even-song*; Lat. *vespera*, *officium vespertinum*, *lucernarium*; Gr. λυχνικόν) is the worship canonically assigned to the hour of sunset or of lamplighting, being the last but one of the seven canonical hours (q. v.). In significance the vesper service corresponds with the daily evening sacrifice of the Old-Test. cultus, but also with the descent of Christ from the cross, and it is supposed to coincide in time with the hour when the Lord's supper was instituted. From the fact that it is mentioned by the most ancient fathers, it is probable that the custom of holding an assembly for public worship at this time of the day is of very high antiquity.

ty. In the 4th century—perhaps in the 3d—there was public evening service in the Eastern churches, as we learn from the *Apostolical Constitutions*. Cassian, in the beginning of the 5th century, refers the evening and nocturnal assemblies of the Egyptians to the time of St. Mark the Evangelist. Vespers is the first addition to the original three hours of prayer known to Cyprian—*tertius, sextus, and nonus* (see Cyprian, *De Orat. Dominica*, s. fin.; Chrysostom, *Hom. 59 ad Pop. Antioch.*; and Jerome, *Ep. 22 ad Eustoch.* c. 37; comp. Dan. vi, 11; Acts ii, 15; iii, 1; x, 9). The monastic rules of the 6th and 7th centuries had already increased the number of canonical hours of prayer to eight. The original form of the vesper service consisted of the singing of twelve psalms. This number was afterwards reduced to seven, four of which were assigned to the vesper service proper, to be sung antiphonally, and three to the *Completorium*. Benedict of Nursia (q. v.) adds to these psalms the reading of a chapter of Scripture, a responsorium, the Ambrosian hymn and connected versicle, the *Magnificat*, and the Litany, the Lord's Prayer, and the closing prayer as constant elements of the vesper service. The non-monastic liturgy of the Western Church has a similar service, five psalms being prescribed instead of four—the number having reference to the five senses in man, and denoting also the inferior degree of perfection possessed by the secular clergy and the laity. The Roman *Breviary* makes vespers the exact counterpart of the *Lauds* (q. v.): five psalms with antiphones, a chapter from the Bible, a hymn, a versicle with responsorium, the *Magnificat* with antiphone, the daily prayers, with occasional commemorations, suffrages, and *proceses*. Vespers is the only portion of the canonically prescribed worship for each day which is constantly celebrated in the public services of the Romish Church. In the evangelical churches voices have been heard asking for a liturgical vesper service, particularly on great occasions, and especially in the Lutheran Church, and the demand has not been altogether unheeded in many quarters. See *Evangel. Kirchenzeitung*, 1861, p. 349 sq., 487 sq.; Hengstenberg, *Vespertgottesdienste* (Berlin, 1861); Die-drich, *Breviarium* (ibid. s. a.); Herzog, *Real-Encyclop.* s. v.

VESPERS, SICILIAN, a term applied to the massacre of the French residents in Sicily by the natives on Easter-day, 1282. The tyranny of the French had become intolerable to the Sicilians, and a plot was formed for their extermination. It was arranged that the massacre should begin at the tolling of the bell for evening vespers, and the work was so thoroughly done that very few of the French escaped. Neither rank, age, nor sex received any quarter. It is said that pope Nicholas III was made acquainted with this plot, but died before its execution.

Vespillōnēs were the undertakers or gravediggers who formed one class of subordinate servants of the early Church, and were so called probably from their carrying out the dead in the night. Some trace the word to *vesperus*, the evening.

Vessels, SACRED, of the *Altar*, is a general name for the vessels used in the sacramental and other rites of the Church. These are more numerous in the ritualistic churches than in others, and anciently were held very sacred. By the Council of Laodicea, subdeacons were forbidden to handle the plate or to enter the sacristy; by the second Council of Rome, a reader or ostiarius received a like restriction; and by the Council of Agde, all not in orders were so prohibited. The principal vessels and appertaining articles are the following: *ampulla*, or vessel for holding consecrated oil, or the large flagon used for a cruet in the holy sacrament; *censer*, or vessel for holding burning incense; *chalice*, the vessel for the sacramental wine; *ciborium*, either a canopy over the altar or a box or vessel to contain the bread in the celebration of the eucharist, *corporal*, a

square piece of cloth for holding the body of Christ at communion; *columba*, a dove-shaped vessel to contain the eucharist suspended over the altar by a chain from the roof; *cruets*, two small flagons for containing the wine and water at holy communion; *holy-water pot*, a vat or pot to hold the holy water; *monstrance*, a transparent vessel for showing the eucharist in the form of bread to the people; *paten*, the plate on which the bread is placed at holy communion; *pall*, a covering for the chalice in certain portions of the mass; *purificator*, a piece of lawn or fine linen for cleansing the chalice and paten; *pyx*, a box or vessel in which to preserve the eucharist, in the form of bread, for the sick and other communicants who cannot be present in the church; *pyx-cloth*, a cloth or veil for covering the pyx; *thurible*, a vessel in which incense is burned. See each word in its place. See also ORNAMENTS, ECCLESIASTICAL.

VESSELS FOR HOLY OIL. These, in mediæval churches, were arranged like three towers around a central crown-topped spire, with which they were connected. Each contained a small phial, which could be detached when wanted, and a spoon. One of these phials held the oil for baptism; a second, chrism for confirmation; and a third, oil for the sick. They were made of copper or silver gilt. The *ampulla*, for chrism, was sometimes made of ivory and crystal, to distinguish it from the vessels containing the oils. See OIL.

Vesta, an ancient Latin divinity, the fire-goddess, identical with the Greek *Hestia*. She was the embodiment

Figure of Vesta.

of the idea that the State was the great family, and occupied a prominent rank among the *Penates*, or household gods, on which account she was called *mater*, or mother. Each community had its public altar to Vesta, the central one for the whole Latin people being at Lanuvium, about twenty miles from Rome, on the Appian Way, where the Roman consuls and other officers offered sacrifices on entering upon their offices. The Vesta of Rome had her temple in the Forum, near that of the *Penates*, where she was served by her own priestesses—the *Vestals* (q. v.), and where was deposited the celebrated *Palladium*, or statue of Pallas, the pledge of the safety of the empire. The fire

continually burned upon the hearth in the Temple of Vesta, and was annually renewed on March 1, and at the same time was renewed the laurel-tree which shaded her hearth. The statues of Vesta before which the devout Romans daily sacrificed were placed in front of the doors of their houses, which, according to some, were hence called *vestibules*. An oath in her name was considered most sacred and inviolable. See VESTALIA; VESTALS.

Vestal Virgins. See VESTALS.

Vestalia, an annual festival, held on June 9 by the ancient Romans, in honor of Vesta (q. v.), on the occasion of which none but women walked to the temple of the goddess, and that with bare feet.

Vestals, in the Roman religion. These maiden priestesses of Vesta (q. v.) were held in high esteem and

enjoyed great privileges. They possessed, for instance, the right to make a testament as soon as they stepped into the service of the goddess (they were required to be ten years old upon entrance). They were further allowed a lictor, to announce their coming; and they had the right of pardoning a condemned criminal when they met him. They also sat in seats of honor at the theatre. But they were also subject to very strict observances, and incurred frightful punishments in case of any failure. The conditions of their acceptance were: they and their parents must be free-born; both parents were required to be living and residing in Italy, and carrying on an honorable business. When an election was necessary, twenty girls were selected, who cast lots in public meetings. But this was not necessary when a father lawfully offered, of his own free will and accord, his daughter free from all bodily imperfections. The number of Vestals was at first two, afterwards four, and from Servius Tullius's time six. Ten years long they were to learn the service, ten years they were obliged to serve, and ten years they were required to teach the probationers. After the expiration of this term of years they were permitted to marry, but this was not looked upon as honorable. Their duties were, the performance of the sacrifices, care of the sacred vestibles, preservation of the eternal fire, and the strictest virtues, especially chastity. If the fire became extinguished, the guilty one was beaten with switches; if one was found unchaste, she was buried alive. Such an occurrence was looked upon as a dreadful sign of the wrath of the gods, and the whole city went into mourning. The clothing of the Vestals was composed of a long white dress, a priestly fillet, and a veil; still it was not forbidden them to adorn themselves.

Vestibule, a hall or antechamber next to the entrance, from which doors open to the various rooms or passages of a house. This is the Vitruvian and the modern sense; but the latter includes any lobby, porch, or anteroom through which a larger apartment or a house, etc., is entered. *Vestibulum*, in mediæval Latin, is also used for the *vestiarium*, or *vestry*, and sometimes for the nave, the *ecclesia* being strictly the choir only. The origin of the word is disputed, but it is probable that it first signified the entrance-chamber to the baths, where the clothes of the bather were laid aside; and hence the entrance to a house or any public edifice.—Parker, *Gloss. of Architect.* s. v.

Vestment, **TUNE**, a term usually applied to the chasuble, which is the eucharistic vestment, and is used in the same manner as the expression *the sacrament* in reference to the Lord's supper. In mediæval times, however, it included a complete set of eucharistic vestments—viz., chasuble, amice, stole, and maniple. See **VESTMENTS**.

Vestment Board is a table sometimes placed in the sanctuaries of churches in ancient times, on which a bishop's vestments were placed before assuming them, and after taking them off.

Vestments, **CLERICAL**, are those official garments which are worn by the clergy in divine service. The following list comprises all the vestments in common use, and many that have been used occasionally in different ages and places:

1. The *alb* is a long linen garment with tight sleeves, and is confined at the waist by a girdle.
2. The *almuce*, or *almutium*, was a hood of fur worn anciently while reciting the offices by canons, and afterwards by other distinguished ecclesiastics, as a protection against cold.
3. The *amice*, or *amictus*, was an oblong piece of fine linen with strings, worn by all clergy above the minor orders over the cassock; and was placed first on the head, then being adjusted round the neck formed the collar.
4. *Dands*, two falling pieces of lawn, edged with a hem of the same material, worn in front of the neck.
5. The *biretta*, or *biretum*, is a cap worn by Western ecclesiastics of all grades.

6. The *cassock*, or *pellicia* (*pellis*, fur, the lining of the garment anciently), is a garment which fits the body closely, but is loose and flowing below.

7. The *chasuble* was a circular or elliptical piece of cloth with a hole in the centre to admit the head, and when worn completely covered the body.

8. The *chimera*, or *chinnere*, is a short sleeveless cloak worn over the rochet as the ordinary dress of prelates.

9. The *cincture* is a flat band, usually about three yards long and four inches wide, used to confine the cassock around the waist.

10. The *colobium* was like the tunic, except that it was without sleeves.

11. The *cope* is an exact semicircle, like a cloak, attached to which is a hood, now used merely for ornament.

12. The *cotta* is a short surplice either with or without sleeves.

13. The *corol* is a monastic head-dress in the form of a capacious hood attached to the back of the neck of the ordinary dress.

14. The *dalmatica* is a long robe with sleeves, open up the sides about two feet, and was for many centuries regarded as the peculiar garment for deacons at the Christian sacrifice.

15. The *girdle*, or *cingulum*, is a cord of linen, silk, or other material, with tassels at the extremities, by which the alb is bound about the waist. It is fastened on the left side.

16. The *gown* is a long loose upper garment.

17. The *hood* was a monastic covering for the head.

18. The *maniple* was anciently a mere strip of very fine linen attached to the left arm of the priest with which to wipe the chalice previous to the first oblation, but afterwards it came to be an ornament of great richness worn by the priest and his assistants at the Eucharist.

19. The *mitre* was a hierarchical head-covering originating with the Jews, and worn by Christians of certain sects from very early ages. It was of various shapes.

20. The *pallium* was an ancient ecclesiastical vestment made of white lamb's-wool, signifying metropolitan jurisdiction.

21. The *rochet* is a frock of fine lawn with tight sleeves.

22. The *scapular*, or *scapulary*, consisted of two bands of woollen stuff, one hanging down the breast and the other down the back.

23. The *scarf* is a band of silk about a foot wide and ten feet long, various sorts of which are in common use in the Church of England.

24. The *stole*, or *orarium*, is a narrow band of silk or other material, fringed at the ends, and sometimes adorned with jewels, worn on the left shoulder of deacons, and round the neck of priests and bishops, pendent on each side nearly to the ground.

25. The *surplice* is a loose flowing vestment of linen, reaching almost to the feet, having sleeves broad and full.

26. The *tiara* is the triple crown of the pope.

27. The *tympet* is a narrow garment or covering for the neck and shoulders.

28. The *tunic* and *tunicle* are only different names for the *dalmatica*.

Besides the above-named vestments, the following ornaments and appendages deserve mention, as belonging to the complete outfit of the officiating ecclesiastic on certain occasions:

1. The *crozier* was a badge of dignity or authority in the form of a shepherd's crook, curved at the upper end and pointed beneath.
2. The *pastoral staff* is the same as the *crozier*.
3. The *pectoral* is a square plate of gold or silver, either jewelled or enamelled, sometimes worn by English and other bishops on the breast, over the chasuble, at mass.
4. The *pectoral cross* is a cross suspended from the neck by a golden chain, worn by Roman Catholic bishops and others, indicating jurisdiction.
5. The *ring* was generally adopted about the 4th century by bishops, although sometimes used before that time. It was first worn on the middle finger of the right hand, but afterwards was placed on the fourth finger.

The foregoing objects are treated more fully under their appropriate titles in other parts of this work. Illustrations of many of them will be found under the article **ORNAMENTS**.

Vestments are worn in the ritualistic churches, such as the Roman Catholic, the Greek, the Episcopal of England and America, and others. They belong to bishops, priests, deacons, subdeacons, acolytes, servers, and, in the Church of England, to choristers. In the English cathedrals, and in many of the parish churches, the singers, men and boys, are vested in cassock and surplice, and sit in a part of the church called the choir, between the presbytery and the nave. The eucharistic

vestments are the amice, the alb, the maniple, the eucharistic stole, and the chasuble. The deacon wears over his alb a dalmatic, and the subdeacon a tunicle, but no chasuble, which is reserved exclusively to the celebrant. The deacon wears his stole over the left shoulder, with the ends brought together and fastened under the right arm. The stole is not worn by the subdeacon. In the Western churches acolytes at high mass wear albs and amices; at low mass when there are neither ministers nor choir, but only a single priest with a server, the server wears a cotta or rochet over a crimson cassock. In the Greek Church the priest is always attended by a deacon vested in alb and dalmatic. When a bishop is the celebrant, he wears a dalmatica in addition to the priestly vestments, to signify that all the offices of the ministry are united in his person.

In the Roman churches the color of the cassock is for choristers, servers, or acolytes, crimson; for the principal acolyte sometimes purple. Subdeacons, deacons, and priests wear black, bishops purple, and cardinals crimson. The pope alone wears white. The surplice, cotta, rochet, alb, and amice are properly made of white linen, though in the Western churches all except the amice are sometimes made of lace. The maniple, stole, tunicle, dalmatica, and chasuble vary in their colors, following the *sequence of the seasons*. The Roman sequence, which is now generally followed by the Western churches, gives *white* for Christmas, Easter, and saints' days; *purple* for Advent and Lent; *red* for Pentecost and feasts of martyrs; *black* for Good-Friday, and green for ordinary days. The color for *ferias*, or week-days, usually follows that of the preceding Sunday. The English or Salisbury sequence differs from the Roman in employing more colors, and in the order in which they are used. Brown or gray is allowed instead of purple, blue instead of green, and yellow instead of white on the feasts of confessors. According to this sequence, all Sundays at the festal seasons are white, and all other Sundays are red. White Sundays are followed by white *ferias*, but at seasons of Advent and Lent the *ferias* are purple; and at the seasons of Epiphany, after the octave, and Trinity, they are blue or green. The Eastern calendars are numerous and complicated, and they do not appear to recognise any uniform sequence of colors.

The origin of the vestments may be attributed to various sources. The linen ones, doubtless, were adopted by the early Christians from the Jews; while the others were adopted from garments worn in daily life, either as the ordinary dress, or as the vestments of kings and noblemen. In the early ages emperors and kings were allowed to wear the chasuble, and afterwards the tunicle and dalmatica, at their coronations and when assisting at high-mass. It is thought by Mr. Marriott (*Vestiarius Christianum*) that most of the vestments now in use were introduced into the Church during the period between the 9th and 12th centuries. The vestments used in the Greek Church are the same as those enumerated, but are known by the corresponding Greek names. The alb is called a *chitonion*; the maniple, an *epimanika*; the stole, an *oracion*; the chasuble, a *phelonion*; the dalmatica, a *stoicharion*; the pallium, an *omophorion*.

The natural effect of the religious changes of the 16th century was to put aside the costume at the same time and on the same grounds as the existing ceremonies. This was done by the different churches of the Reformation in various degrees. The Calvinistic worship dispensed with vestments altogether. The Lutherans generally retained with the cassock the alb, and in some countries the chasuble. In the English Church a variety of practice has existed. The disputes about the surplice were very bitter. The Puritans objected to its use on the ground of its being a relic of popery. As to the rest of the costume, the first Prayer-book retained the Roman vestments with little

change; and, since the rubric of this Prayer-book has not been formally repealed, a ritualistic movement in the English Church has reintroduced, in some places, almost every detail of the Roman costume in the communion and other services—an innovation which has given rise to vigorous resistance in many instances, and some very bitter controversies.

See Marriott, *Vestiarius Christianum*; Rock, *Hierurgia*; Neale, *Holy Eastern Church*; Blunt, *Annotated Book of Common Prayer*; also the monographs cited by Volbeding, *Index Programmatum*, p. 171.

Vestry (וֶסְטְרִי, *metachâh*, from an obscure root וֶסַר, *to spread out as clothing*; Sept. *oikos* v. r. *μεσάια*; Vulg. *vestes*), the wardrobe chamber of a temple, e. g. that of Baal (2 Kings x, 29); containing, doubtless, the fine official apparel of the priests.

VESTRY, in ecclesiastical phraseology, is a room attached to a church in which to keep the vestments and sacred vessels. The ordinary place of the vestry was at the north side of the chancel at the east end. There was not unfrequently an altar in the vestry; and sometimes it was arranged with an additional chapter so as to form a *domus inclusa* for the residence of an officiating minister.

From their meeting in this room certain assemblies of the parishioners, for the despatch of the official business of the parish, are called vestries or vestry meetings. Such meetings, however, may be held elsewhere in the parish as well as in the vestry, provided the proper notice of time, place, and purpose of the meeting be given. The officiating minister, whether he be curate or vicar, is *ex officio* chairman of the meeting. All persons rated to the relief of the poor, whether inhabitants of the parish or not, are entitled to attend the vestry and vote; and this right is also extended to all inhabitants coming into the parish since the last rate for the relief of the poor, if they consent to be rated. But no person is entitled to vote who shall have neglected or refused to pay any rate which may be due and shall have been demanded of him, nor is he entitled to be present at any vestry meeting.

In the year 1831 an act was passed by the British Parliament, which has been very generally adopted, entitled "An Act for the Better Regulation of Vestries, and for the Appointment of Auditors of Accounts, in Certain Parishes of England and Wales." This act does not alter the law in any parish by which it is not adopted by a majority of the rate-payers, nor does it interfere with parishes governed by select vestries. The most important provisions are that, in all parishes adopting the act, the vestry shall consist of twelve vestrymen for every parish in which the number of rated householders shall not exceed one thousand; twenty-four where they exceed one thousand, thirty-six where they exceed two thousand; and so on in the proportion of twelve more vestrymen for every thousand rated householders; but in no case is the number to exceed one hundred and twenty. The rector, district rector, vicar, perpetual curate, and church-wardens are to constitute part of the vestry, and vote in addition to the vestrymen so elected; but no more than one such minister is *ex officio* to be a part of, or vote at, any vestry meeting. One third of the vestrymen go out of office annually, and others are elected in their stead. Select vestries have arisen from a practice which obtained in large and populous parishes, especially in and about the metropolis, of choosing a select number of the chief and most respectable parishioners to represent and manage the concerns of the parish for one year. The practice has been held by the courts of law to be a good and reasonable custom.

In the Protestant Episcopal Church in America the vestry is a committee chosen annually by the parish, who, in conjunction with the church-wardens, manage its temporal concerns.

The term *vestry* is also applied, by accommodation,

in other churches, to the rooms provided for lectures, prayer-meetings, and other week-day services.

Vestryman, a member of the vestry (q. v.).

Vestry-press, a cupboard to hold the eucharistical and other vestments belonging to a church.

Vestry-trunk, a box, originally made out of the trunk of a tree, hollowed, in order to contain the ecclesiastical vestments belonging to a church.

Vesturer, a sacristan (q. v.), or sexton (q. v.), a keeper of the vestments; a sub-treasurer of a collegiate church or cathedral.

Vetch, JAMES EDWARDS, A.B., an English Congregational minister, was born at Zacatecas, Mexico, Aug. 17, 1836. Mr. Vetch graduated at New College, and commenced the work of the ministry in Australia in 1858—first at Melbourne, and latterly at Woolhara, near Sydney—and won the respect and affection of men of every denomination. He died June 17, 1870. "His character was that of an exemplary Christian gentleman, and ever preferred principle to prosperity." As a preacher he was thoughtful and instructive; as a pastor and friend he was respected and beloved as few men are. See (Lond.) *Comp. Year-book*, 1871, p. 358.

Vethym, an old form of the word *fathom*, a measure of six feet in length.

Veto Act is the popular designation of the celebrated act on calls passed by the General Assembly of the Church of Scotland, May 31, 1831, and which, being afterwards declared by the courts of law and the Supreme Legislature to be illegal and beyond the powers of the Church to enact, gave rise to a collision between the Church and State, and led to the formation, in 1843, as a separate denomination, of the Free Church of Scotland. The act originated in the motion of Dr. Chalmers, which was seconded by Lord Moncrieff. This motion is given in full under the article *NOX-INTRUSIONIS* (q. v.). The act runs as follows:

"The General Assembly declare that it is a fundamental law of this Church that no pastor shall be intruded on any congregation contrary to the will of the people; and, in order that this principle may be carried into full effect, the General Assembly, with the consent of a majority of the presbyteries of this Church, do declare, enact, and ordain, That it shall be an instruction to prebyteries that if in the moderating in a call to a vacant pastoral charge, the major part of the male heads of families, members of the vacant congregation and in full communion with the Church, shall disapprove of the person in whose favor the call is to be moderated in, such disapproval shall be deemed sufficient ground for the presbytery rejecting such person, and that he shall be rejected accordingly, and due notice thereof forthwith given to all concerned; but that if the major part of the said heads of families shall not disapprove of such person to be their pastor, the presbytery shall proceed with the settlement according to the rules of the Church. And they further declare that no person shall be held to be entitled to disapprove as aforesaid, who shall refuse, if required, solemnly to declare, in presence of the presbytery, that he is actuated by no factious or malicious motive, but solely by a conscientious regard to the spiritual interests of himself or the congregation."

See *PATRONAGE; RIDING COMMITTEES; SETTLEMENTS, VIOLENT*.

Vevers, WILLIAM, an English Wesleyan minister, commenced his itinerancy in 1813 on the Gateshead Circuit. He travelled some of the principal circuits, such as Glasgow (1821), Halifax (1824), York (1827), Deptford (1832), Leeds (1835), Liverpool (1840), Derby (1842), Hull (1845), etc. He had an active and vigorous mind, and often evinced great skill in circuit finance. He died at the Wesleyan Theological Institution (of which he was governor and chaplain) at Taunton, Sept. 8, 1850, in the fifty-ninth year of his age. He wrote, *An Appeal to the Wesleyan Societies on the Attempt now made to Subvert their Constitution* (referring to the Warren agitation) (Lond. 1834, 8vo):—*A Second Appeal, Containing a Reply to a Pamphlet entitled An Affectionate Address of the United Wesleyan Methodist Association* (1835, 8vo):—*A Letter to the Rev. Walter F. Hook*, X.—C c c

D.D., *Vicar of Leeds, on his Inaugural Discourse* (2d ed. 1836, 8vo):—*An Essay on the National Importance of Methodism* (1831, 8vo). See *Minutes of Wesleyan Conference*, 1851; Stevenson, *Wesleyan Hymn-book and its Associations*, p. 365.

Vex is used in the A. V. only in the old Lat. acceptation (from *veho*, to carry, hence to toss about), as a rendering of many Heb. and Greek words, in the sense of *agitate* or *disturb* greatly, especially to torment or afflict.

Vexilla Regis, a hymn which takes its name from the first words, *Vexilla Regis prodeunt* ("The kingly banners forward go"), sung in procession on Good-Friday before the Mass of the Presanctified. It was composed by Venantius Fortunatus (q. v.) on the occasion of the reception of certain relics of St. Gregory of Tours and St. Radekund, prior to the consecration of a new church at Tours. It is strictly a processional hymn, but was afterwards adapted for use in the Western Church during Passion-tide, and is now used, in an English version, very generally in the Church of England.

Vexillum (a banner) is the crucifix carried before the pope, with the figure towards him, to remind him that he should have Christ crucified ever before his eyes.

The word *vexillum* also denotes a flag or pennon of silk or linen attached to the upper part of a bishop's pastoral staff by a cord. This pennon is then folded round the staff, so as to avoid the inconvenience which might arise from the moisture of the hand staining the metal of which the staff is made. Many examples of the vexillum are represented in illuminated MSS., and some are to be found on memorial brasses and incised slabs.

Vezelay, COUNCIL OF (*Concilium Vezelincum*), was held in 1146, after the capture of Edessa by the Saracens. Louis VII., the archbishop, bishops, abbots, and many of the nobility of France, attended. St. Bernard, who was present, urged the king, with great eloquence, to succor the Christians against the Turks. The monarch was among the first to assume the cross, together with his wife, Eleanor. After them Alphonso, count of St. Gilles; Thierry, count of Flanders; count Guido, and many others of the nobility, took the vow. See Mansi, *Concil.* x, 1100.—Landon, *Manual of Councils*, p. 677.

Via, ALESSANDRO DELLA, an Italian engraver, flourished at Venice about 1730. He engraved some portraits and other subjects in an indifferent style, among which is one of the Virgin and Infant Christ, with St. Sebastian and other saints, after Paul Veronese. See Spooner, *Biog. Hist. of the Fine Arts*, s. v.

Via Dolorosa. See JERUSALEM.

Via Media (the middle path), a name which Anglican High-Churchmen claim for themselves, as holding a middle position between popery and ultra-Protestantism. See OXFORD TRACTS; TRACTARIAN.

Viaixnes, THIERRI FAGNIER DE, a French controversialist, was born at Chalons-sur-Marne, March 18, 1659. He was brought up by the Jesuits, and, having entered the Order of St. Benedict (1677) and completed his studies, he was ordained priest (1683), and divided his attention between preaching and study. In 1689 he fell into disgrace with his superiors for opposing their orders, and was exiled to the abbey of St. Michael

Vexillum.

in Thierache, but he was soon released through the influence of his father. After various adventures, he became (1696-1703) director of an academy at Hautvilliers (diocese of Rheims); but, continuing his opposition to papal authority, he was imprisoned (1704-14) at Vincennes and finally banished. He retired to Belgium, and thence to Holland, where he spent the rest of his checkered life in the preparation of a few ecclesiastical works, which are recited in Hoefer, *Nour. Biog. Générale*, s. v. He died at Rhynwick, near Utrecht, Oct. 31, 1735.

Vial is the rendering, in the A. V., of *בַּיִל*, *pak* (from *בָּיִל*, *to distil*), a bottle or *flask*, e. g. of oil (1 Sam. x, 1; "box," 2 Kings ix, 1, 3); and *φιάλη* (1 Esdr. ii, 13; Rev. v, 8, (q. v.)), a *bowl* (q. v.).

Vian. See VAN VIANE.

Vianagium is a term frequently found in Dugdale's *Monasticon* to designate the payment of a certain quantity of wine in lieu of rent to the chief lord of the vineyard.

Viani, Antonio Maria (called *Il Vainino*), an Italian painter, native of Cremona, flourished in the latter part of the 16th century. He acquired a knowledge of the art from the eminent painters of Cremona, the Campi, and was then invited by the duke Vincenzo Gonzaga to Mantua, where he executed several pictures for the churches, among which were *St. Michael*, in the Church of Sant' Agnese, and the representation of *Heaven*, at the Orsoline, both in the style of his instructors. Besides his work in the churches, he was employed in many other edifices; and after the death of the duke remained in the employ of his three successors. See Spooner, *Biog. Hist. of the Fine Arts*, s. v.

Viani, Domenico Maria, an Italian painter, son of Giovanni Maria, was born at Bologna in 1668. He received a thorough education in the art from his father, and then went to Venice, where he studied the old Venetian masters. Some prefer him to his father, but this preference is not entertained by most critics. He succeeded his father in the school which he had established at Bologna, and instructed several pupils. He executed many works for the churches of Bologna, Bergamo, Pistoia, and other neighboring cities. The principal at Bologna are a series representing the *Prophets* and *Evangelists*, in the Church of the Nativity, and *Christ Healing a Pilgrim*, in the Church of the Servi. He died at Pistoia in 1711. See Spooner, *Biog. Hist. of the Fine Arts*, s. v.

Viani, Giovanni Maria, an eminent Italian painter, was born at Bologna in 1637. He studied along with Pasinelli in the school of Flaminio Torre. He executed many works for the churches of Bologna, as well as for other public edifices. He opened a school opposite to that of Ciguani, in which he instructed several pupils. Besides his work as painter, he executed several spirited etchings from his own designs and after Caracci. He died in 1700. See Spooner, *Biog. Hist. of the Fine Arts*, s. v.

Viatium (literally, *preparation for a journey*) is a term corresponding to the Greek *ἐφοδιον*, and used to designate the sacraments of baptism and the Lord's supper, because they were deemed the necessary provision and armor of Christians to sustain and conduct them safely on their journey through this world to eternal life. More strictly, however, the term *viaticum* denoted the eucharist given to persons in immediate danger of death, in which sense it is still occasionally used. Death was a journey to the eternal world, and this sacrament was deemed the necessary provision for that journey. The clements were sometimes placed in the coffin of the deceased. The 13th canon of the Nicene Council provides that none "be deprived of his perfect and most necessary viaticum when he departs out of this life." Several other canons of various coun-

cils are to the same effect, providing also for the giving of the viaticum under peculiar circumstances, as to persons in extreme weakness, delirium, or subject to canonical discipline.

Vibert, Charles W., an English Wesleyan minister, was born at Penzance, Cornwall, April 3, 1803. He united with the Church in his fifteenth year, was received into the ministry in 1826, and, in the midst of preparations for removing to South Petherton Circuit, he was attacked with paralysis and died in four hours, at Bromsgrove, Aug. 26, 1854. He was a man of unobtrusive piety, unimpeachable integrity, and conscientiously devoted to his work. See *Minutes of Wesleyan Conferences*, 1855.

Vicar is one who supplies the place of another. Anciently, when a church was appropriated to any of the religious houses, the monks supplied the cure by one of their own brotherhood, and received the revenues of the Church to their own use. Afterwards, in almost all appropriate churches, it became customary that they should be supplied by a secular clerk, and not a member of their own house, from which fact and duty he received the name of *vicarius*; and for the maintenance of this vicar about a third part of the tithes was set apart, the rest of the tithes being reserved to the use of those houses. The tithes set apart for the maintenance of the vicar were called lesser or vicarial tithes, and the others were called great or rectorial tithes. After the religious houses were dissolved, the king became possessed of that share which belonged to the monasteries, who granted them to divers persons, now termed lay proprietors, to whom ordinarily belong the whole of the great tithes. In the Anglican Church the vicar is a clergyman who is the incumbent of a parish under a *rector*, the former receiving the great tithes, and the latter the lesser tithes. The vicar is superior in rank to the *curate*, but in France the opposite usage obtains.

VICAR APOSTOLIC is a bishop who possesses no diocese, but who exercises jurisdiction over a certain appointed district by direct authority of the pope. Such officers have been appointed from time to time in various parts of the Latin Church. There were vicars apostolic in France, Spain, and Italy in the 7th and 8th centuries, and officers possessing similar powers have been appointed from Rome in different countries ever since. In England, Dr. William Bishop was consecrated to this office by the title of bishop of Chalcedon, June 4, 1623. In 1688, four districts were created by pope Innocent XI; and to these four more were added by pope Gregory XVI, July 30, 1840. In place of this a new hierarchy was established in England by pope Pius IX in 1850.

VICAR APOSTOLIC of the North Pole is a priest of the Romish Church possessing certain episcopal jurisdiction in Orkney, Shetland, Iceland, and the adjacent islands.

VICAR CAPITULAR is the administrator of a diocese chosen by the chapter in case of vacancy. He can perform acts for the government of the diocese, but has no episcopal authority.

VICAR CHORAL is a minor canon attached to a cathedral or collegiate church; also a layman appointed to assist in chanting divine service in cathedral and collegiate churches.

VICAR OF CHRIST is a term by which Roman Catholics sometimes designate the pope.

VICAR EPISCOPAL is an officer of the Roman Church corresponding to the English *archdeacon* or the Greek *chorepiscopus*. In Africa the city priest was one of the cathedral body, who ministered in the adjoining villages. According to Sidonius, he was the bishop's chaplain, vidam, notary, treasurer, theologian, and steward.

VICAR FORANE (*vicarius foraneus*, lit. "vicar out of doors") is the delegate of a bishop who exercises certain episcopal rights in a part of the diocese only. Such officers are not provided for all dioceses.

VICAR GENERAL is a principal official, now called chancellor of the diocese; an ecclesiastical judge in the bishop's court, as the official belonging to the archdeacon.

VICAR OF THE HOLY SEE is an officer who has been from time to time appointed by the pope to exercise quasi-episcopal jurisdiction in certain dioceses. His functions and duties are almost precisely the same as those of the vicar apostolic (q. v.). Vicars of the Holy See were first appointed in Gaul by pope Zosimus in 417.

VICAR OF PETER is a term by which the pope of Rome is sometimes designated.

Vicarage (or **VICARAGE HOUSE**) is the official house of residence for the vicar of a parish.

Vicarial Tithes are the lesser tithes (q. v.) belonging to a benefice. See **VICAR**.

Vicariate, one having delegated power as a vicar.

Vicarii is a name given to certain officers ordered to be appointed by pope Innocent III in 1215, who were to have the care of souls in the larger dioceses neglected by the worldly-minded bishops. The name was employed to distinguish them from the *officiaries*, who had simply a coercive jurisdiction.

Vicarious Suffering of JESUS CHRIST. Under the head of **ATONEMENT** we have given a historical review of opinions on this subject, and in the article **MEDIATION** we have discussed the character and extent of the expiation effected; it remains to consider the ultimate ground or virtue of such a redemptive act. Why was it necessary that any victim should suffer in man's stead? The real need, as we conceive, lies not altogether in God's disposition, but quite as imperatively in that of the sinner himself. As the divine law—being a transcript of the moral attributes of Deity, and therefore of all moral intelligences—was but the product or creature (so to speak) of God himself, he may be conceived as having the sovereign right—so far as his own attitude or interests are concerned—to abrogate, waive, or suspend it or its penalty in any case upon his own terms or at his simple pleasure. But he could not do this arbitrarily, or in such a way as to contradict his own nature—that is, in such a manner as to countenance sin, to which he is essentially, absolutely, and forever opposed. Human sin, be it borne in mind, consists not so much in contravening God's express command as in violating the inherent prescriptions of the moral sense of the universe, including man himself. If, therefore, God should be so weak as to overlook or condone man's crimes, without the fulfilment of such conditions as should conserve that moral instinct, he would incur the contempt of the criminal himself. In other words, man, if pardoned at all, and if so as to feel himself really and justly forgiven, must be pardoned in accordance with the ordinance graven on his own moral constitution. That ordinance may be summed up, if we may interpret it by consciousness, by the analogies of parental conduct and social release, and by the explicit terms of Holy Writ, in the one essential requirement of such a state of mind, on the part of the culprit, as warrants the presumption of voluntary non-repetition for the future of a like offence; that is, in one word, *repentance*. Without this no one feels that he can properly for himself, or safely for others, either forgive or be forgiven any fault. The question now is, How can this state of mind most certainly, effectually, and permanently be produced? That God could infallibly bring it about by a direct influence upon man's mind no one can doubt, and some have gone so far as to assert that this is the actual and invariable fact; but this is to deny free agency, and to stultify the whole course of the divine procedure in permitting any sin whatever. We know of no means so

likely to reduce the natural rebellion and corruption of the human heart as that which God has actually adopted, namely, by the presentation, in the person of the Redeemer, of a specimen of perfect holiness suffering the penalty due to the sinful race from pure motives of philanthropy and piety. This spectacle at once enhances the majesty of law, puts sin to the blush, and enkindles the least spark of magnanimity remaining in man's bosom. There have been instances of similar devotion among friends on earth, and these have stirred the generous emotions of humanity wherever recounted; how much more the unprecedented self-immolation of a disinterested (or rather offended) one in behalf of guilty man (Rom. v, 7, 8)! So far, then, from the vicarious suffering of Christ being necessary to appease the wrath of God, it is really seen to be the highest exhibition of his love yearning for some consistent plan of salvation (John iii, 16). In point of fact, it is found that this act—as a divine and not merely human expression of sympathy—does melt and subdue the sinful soul, when it comes to be apprehended under the Spirit's light of conviction, as no denunciations of vengeance or view of dangerous consequences can do. Yet the penalty must still be held in reserve for recusant and hardened cases, else the effect of the contrast itself would be destroyed, and the conscience of the universe would be shocked. We conclude, then, in a last analysis, that the moral purpose and need of the death upon Calvary was for the condemnation of sin and for a crowning proof of divine intervention. In a forensic point of view, it was substitutional, if so accepted by the party for whose benefit it was volunteered; but as a remedial measure, its virtue lies in its power to impress and win and reform (John xii, 32). It is thus that the cross becomes the instrument of a glorious regeneration (Gal. vi, 14). In other words, the final cause of the sacrifice of Christ is to be sought, not so much in any prudential considerations of the divine government or human society as in the essential nature of God himself and in man's conscience, which is a copy of God's moral consciousness. Both these require a *penalty* for the violation of that law which is written in the constitution of the intelligent universe, not simply as a vindictive infliction for the past, nor merely as a safeguard against the future, nor yet purely as a spectacular exhibition of infinite and gratuitous compassion, but chiefly and imperatively as a satisfaction to the instinctive and irrepresible sense of ill-desert which the view of sin excites in all right-minded beings, and to stamp it with an emphatic rebuke. This is wholly irrespective of personal interests, whether of resentment, injury, or pride, on the part either of individuals or of communities; it is alike, if not equally, shared by the Creator and the creature, by the innocent and the guilty. To this grand sentiment all other ends are subordinate; and thus, as ever with great moral principles, the comparatively minor, although really immense, advantages of amnesty and protection and reformation are at the same time secured, not by a compromise, but by a full and inexorable adherence to the demands of everlasting right. The substitution of Jesus, the innocent victim, for the conscious culprit is indeed a device of that love which is always fertile in resources; but it is not an evasion of justice: it is an accomplishment of the law far more significant and effectual than the personal anguish of the sinner himself can be; and yet it leaves room for the latter also in the alternative of the refusal of the former. Just at this point, too, comes in appropriately the determinative weight of the human will, which God has left free to be cast into the scales of destiny. In the interval which divine forbearance has set between the sentence of the convict and his execution (Eccles. viii, 11; Rom. ix, 22; 1 Pet. iii, 20; 2 Pet. iii, 9) an ample pardon has been provided, not by "executive clemency," but as a "receipt in full" from a friendly hand, which needs but the grantee's endorsement to make it valid. That act on the subject's part is gen-

nine *penitence*, including the individual faith which alone prevents remorse from degenerating into despair (2 Cor. vii. 10); and this complex state of the soul—a hopeful contrition—could, so far as we can see, only be engendered by the proper apprehension, under the light of the Holy Spirit, of a just but relentless doom, vicariously but fully endured. In the Cross these demands all meet and harmonize.

Vicars' College is the house of residence of those members of a cathedral corporation who do not belong to the chapter. Anciently such a building was probably attached to most cathedrals. Until the civil wars the collegiate life was everywhere maintained in England, and at Hereford so late as 1828.

Vicars, Joux, an English Presbyterian minister and violent writer on religious and political subjects, was born in London in 1582. He was educated at Christ's Hospital, London, and Queen's College, Oxford; and was, during the greater part of his life, usher of Christ's Hospital. He died in 1652. He was the author of the following works, among others: *Prospective Glass to Look into Heaven* (Lond. 1618, 4to);—*England's Hallelujah* (1631, 4to);—*Jehovah Jireh, God in the Mount; or England's Remembrancer* (1641-44, 4to);—*God's Ark Overtopping the World's Waves* (1646);—*Prodigies and Apparitions:—England's Worthies* (1647).

Vicc (VICTUS), FRIEDRICH, a Lutheran theologian, was born Sept. 9, 1629, at Breslau, in Silesia. He studied at Wittenberg, and was permitted to lecture there. In 1658 he was appointed co-rector at St. Mary Magdalene's in his native place; in 1665 he was made deacon of St. Elisabeth's; in 1667 professor of the Elisabethanum; and died Jan. 27, 1697, as pastor of St. Elisabeth's and inspector of the evangelical churches and schools. He wrote, *Dissert. de Urin et Thumam*:—*De Præconio Josephi. Egyptinæ*:—*De Antiquitate Hebræicæ Lingue*:—*Dissert. aliquot ad Cap. xi Genesios*. See Pantke, *Pastores der Kirche zu St. Elisabeth in Bresslau*; id. *Pastores zu St. Maria Magdalene in gleichen Präpositi und Ecclesiast*; Jöcher, *Allgemeines Gelehrten-Lex.* s. v.; Fürst, *Bibl. Jud.* iii. 476; Steinschneider, *Bibliog. Handbuch*, s. v. (B. P.)

Vice is a chronic and habitual transgression of the moral law, as distinguished from those transgressions which result from momentary temptation. It is a phase of sin (q. v.), and the remarks there made are applicable here. Vice, like every other habit, is the product of repeated acts, and, as the vicious habit strengthens, the mind of its victim becomes less and less conscious of the evil of which it is the slave, until sin is committed almost without knowing it. The hatefulness of vice both to God and man is shown in the whole of God's moral government in the world. Even in this world vice is foredoomed by the unmistakable judgment of God, and the human agents of the sentence, although they be themselves under similar condemnation, allow the law to be just. Exalted virtue secures the admiration of even the worthless, and vice, when punished, is as universally acknowledged by both good and bad to have met with its deserts. Societies for the suppression of vice have been organized in different countries, and meet with universal approval. Their object is to co-operate with the properly constituted legal authorities in preventing and suppressing the various vices which are prevalent and most flagrant.

The greater hopelessness of vice than mere sin very clearly bespeaks the wrath of God. The evil consequences of youthful folly may be lightly thought of for a time, but they remain as a root of bitterness to mar the peacefulness of more mature years. Even an imprudent choice of vicious companions will often meet with the same severe retribution as a course of downright vicious action. It has been decreed that vice, and everything that directly or indirectly belongs to it, should not go unpunished; and its escape from condemnation, so far as its own nature is concerned, is utterly

hopeless. The Scriptures are very positive in their denunciations of vice (see Heb. ii. 1-3; iii. 7-19; iv. 1-13; vi. 4, 6; Rom. i. 29-32).

Vice-chancellor is the officer chief in authority in a university; usually one of the heads of colleges, who is selected from time to time to manage the government of the same in the absence of the chancellor.

Vice-dean is an officer appointed by the chapter of a cathedral, or in some cases by the dean alone, to act as the deputy of the latter. He is elected annually from the residentiaries, and sometimes by them. He acts as the *locum-tenens* of the dean, and is regarded as a *paterfamilias*. He usually sits in the north-west stall, although that is properly appropriated to the *hebdomadary* or canon in residence. In some Italian and Spanish foundations he is called *prefect of the choir*.

Vicè-domini (*in place of the master*) is a term applied to certain ecclesiastical officers, often called *beadles* or *bailliffs*, appointed about the 8th century from the order of laymen, to protect the churches and defend them against wrongs. Their work was of such a character that it could not properly be performed by ecclesiastics. See Neander, *Hist. of the Church*, iii. 101. See VIDAM.

Vice-legate is an officer of the court of Rome who acts as spiritual and temporal governor in certain cities where no legate or cardinal resides.

Vicelinus, Sr., the apostle of Holstein, was a native of Quernheim, on the Weser. His early education was directed by the clergy of that place; after the death of his parents and the loss of his inheritance he became the charge of the lady of Everstein; and ultimately, having been taunted by the priest of the castle on account of his illiteracy, he entered himself at the flourishing school of Paderborn, and rapidly became noted for the energy and success with which he pursued his studies. After a time he became principal of the school at Bremen, and administered its affairs with great credit and success; but his craving for knowledge was such that he soon resigned his place and went, accompanied by his favorite pupil Thetmar, to Paris, where they sat at the feet of Rudolph and Anselm (q. v.), and acquired a correct understanding of the Holy Scriptures and of practical Christianity. After his return to his home he declined the office of canon at Bremen, and went to Magdeburg to prepare himself for the work of a missionary to the heathen. He was consecrated priest by archbishop Nortbert of Magdeburg, and commissioned by archbishop Adalbert II of Bremen to labor among the Slavs, and at once petitioned Henry, the powerful king of the Obotrites, to allow the preaching of the Gospel among his subjects.

The *Obotrites* (frequently written *Abodrites*) were a branch of the stock of Wends or North German Slavs. They were coarse, cruel, false, and indolent, but given to hospitality towards strangers. Their priests held the first place in the public estimation, and exercised a leading influence over public affairs, besides having exclusive possession of what little scientific information was extant among them. Their numerous gods—of whom *Swantevit* or *Seatorvit*, the four-headed victor, *Prore*, the god of justice, and *Rudegast* were most prominent—stood under the direction and rule of one supreme god of heaven, and administered their offices in his name. The Obotrites first became acquainted with Christianity in the beginning of the 9th century, when they allied themselves with Charlemagne in his war against the Saxons. They were defeated in 931 at Lenzen, in a bloody battle, by Henry I, made tributary to the German realm, and pledged to receive Christianity. For a time encouraging progress was made in converting them to the new religion; but when the German emperors empowered the dukes of Saxony to govern the Wendish tribes, and imposts and taxes were consequently increased, a feeling of discontent arose which the heathen priests were able to intensify until

it became open rebellion, and a contest began between the opposing religions which continued during nearly a hundred and fifty years. In the last quarter of the 11th century the Christian part of the population was wholly subdued, and the country was altogether without Christian influences until Henry seized the throne in 1105, and with the aid of the Saxons overcame his opponents. This prince endeavored to accustom his subjects to the labor of cultivating the soil, and to reintroduce Christianity among them; and the application of Vicelinus and his companions for permission to preach the Gospel was accordingly received with favor, and a church at Lubeck turned over to them for use. Henry's death, in 1126, destroyed the prospect of successful missionary labor, however, by inaugurating a bitter internal war in the kingdom, and Vicelinus was obliged to return to Bremen. An opportunity to establish himself at Faldera (now Neumünster, in Holstein) soon afterwards occurred, which enabled Vicelinus to return to the borders of the Slavs; and from this place as a centre he was able to carry the Gospel in every direction during many years, and with a measure of success which induced other missionaries to come to his assistance. An association of celibate laymen and clergymen was also formed for pious purposes which contributed materially towards the extension of Christianity. In 1134 the emperor Lothaire established the fortress of Segeburg for the protection of the region in which Vicelinus labored, and in time a church and monastery grew up in its vicinity, which were placed under his care; and as the Church at Lubeck was also intrusted to his guidance, he naturally became the head of the entire missionary work among the Slavs. One of his first undertakings now was the planting of missionary training-schools in both Segeburg and Lubeck. The death of the emperor, in 1137, interrupted the progress of Christianity among the Slavs, and once more Vicelinus saw the devastations of war sweep away the results of the labors of many years. Count Adolphus of Holstein finally subdued the restless population, and restored the former condition of things. In 1149 Vicelinus was consecrated bishop of Aldenburg; but after a few years of toil in that office, rendered difficult by the exactions of his superior, the archbishop Hartwig of Bremen, on the one hand, and of duke Henry the Lion, the sovereign of the country, on the other, he suffered a stroke of paralysis in 1151 which deprived him of the ability to travel and of the power of speech. He died Dec. 12, 1154.

Vicentino, Andrea, an Italian painter, was born at Venice in 1539. He was a scholar of the elder Parma, and followed his style. He was a great plagiarist, but made his selections with good taste and judgment. He was one of the most popular artists of his day, and found abundant employment in painting for the churches and public edifices of Venice and other cities of that republic, and even beyond its bounds. His best pictures are preserved in the collections, among which is his *Solomon Anointed King of Israel*, in the Royal Gallery at Florence, a picture worthy of great commendation.

He died in 1614. See Spooner, *Biog. Hist. of the Fine Arts*, s. v.

Vicentino, Marco, a Venetian painter, son and pupil of Andrea, practiced his art at Venice with considerable reputation, and executed many works for the churches and for the collections. His fame, however, is derived more from his father's name than from his own works. See Spooner, *Biog. Hist. of the Fine Arts*, s. v.

Vice-rector is the second in authority to the rector, governor, master, or ruler of a college.

Vice-sacristan is a sacristan (q. v.) or sexton of inferior rank or position, who acts during the absence of the ordinary sacristan.

Vici, Andrea del, an Italian architect, was born at Arecevia, in the Marca d'Ancona, in 1744. He was educated at Perugia, and then sent to Rome to study painting under Stefano Pozzi, and architecture under Carlo Murena, but he decided to follow the latter as a profession. In 1780 the court of Tuscany appointed him hydraulic architect and engineer for the Val di Chiana, and in 1787 he was employed in a similar capacity by the papal government in the work of draining the Pontine marshes, and preventing the inundations of the Tappia. In 1810 he erected the embankment to support the left bank of the Teverone. His architectural works are considerable in number and importance. He was architect to the grand-duke of Tuscany, and built, among others, the Palazzo Lapri at Bevagna; the Church and Monastery delle Salesiane at Offagna; the seminary at Osimo; the Church of S. Francesco at Foligno; the Capella Gozzoli at Terni; the villa and casino at Monte Gallo; and the superb cathedral at Camarino. He died Sept. 10, 1817. See Spooner, *Biog. Hist. of the Fine Arts*, s. v.

Vick, J. O., an English Congregational minister, was born at Emsworth, Nov. 11, 1803, and died June 7, 1862. He was occupied in business nearly the whole of his life, but frequently was engaged in preaching, and for several years labored acceptably as pastor of the Church in Waterloo, Portsmouth. See (Lond.) *Cony. Year-book*, 1863, p. 270.

Vick, Newet, a Methodist Episcopal minister, was born in Southampton County, Va., March 17, 1766. He began preaching in 1788; entered the Virginia Conference in 1790; married in 1791; removed to North Carolina in 1799, and three years later to Mississippi, where he labored until his decease, near Vicksburg, Aug. 5, 1819. See Sprague, *Annals of Amer. Pulpit*, vii, 558.

Vico (Vighi, or Vicus), ENEA, an eminent Italian engraver and medallist, was born at Parma about 1520. He studied under Giulio Romano, and afterwards went to Rome, where he entered the school of Marc' Antonio Raimondi. He made such progress that he was invited to Florence by the grand-duke, Cosmo I, where he engraved several plates after Michael Angelo, and numerous portraits. From there he went to Venice and Ferrara. On returning to Parma in 1554, he engraved and published the medals of gold and silver of the twelve Caesars with explanations. In 1555 he published at Venice his *Discorsi sopra le Medaglie*, which was several times reprinted. He is considered to have been the first who wrote on numismatics. His last work, *Imagini delle Dome Auguste*, was published at Venice in 1557. He died about 1570. Among his plates may be mentioned the *Conversion of St. Paul*, after F. Salviati; the *Entombing of Christ*, after Raphael; and the *Annunciation*, after Titian. See Spooner, *Biog. Hist. of the Fine Arts*, s. v.

Victor (the conqueror), in Roman mythology, was a surname of *Jupiter*, often appearing upon tablets.

Victor (also CLAUDIUS MARCUS VICTOR and VICTORINUS) was a poet and orator of Marseilles, who lived in the former half of the 5th century, and wrote in hexameter verse a *Comment. in Genesin* and an *Epistola ad*

Solomon. Abbat, de *Perversis sue Etatis Moribus*. See *Mar. Bibl.* etc. viii, 118.

Victor, St. The lists of martyrs and saints in the Roman Catholic Church include an extended series of personages named VICTOR, concerning whom see *Ausführl. Heil.-Lexikon* and the accompanying *Kalender* (Cologne and Frankfurt, 1719), p. 2262-2271. See Herzog, *Real-Encyklop.* s. v.

Victor of ANTIOCH was a bishop contemporary with Chrysostom (about A.D. 400) who wrote a commentary on the Gospel of Mark, in which he defended the view entertained by the Church of his day that, with reference to fasting, Christians have entire liberty of action. The commentary is given in *Mar. Bibl. Vet. Patrum* (Lugd. 1677), iv, 370.

Victor of CAPUA was a bishop in the former half of the 6th century (died about 546). He ranks as the earliest Latin catechizer, and wrote *De Cyclo Paschali*, fragments of which work are contained in Bede, and a *Scholium Vet. Patrum*. He also prepared a Latin version of Ammon. Alexandrinus's *Harmony of the Gospels* (*Harm. Evangel. Ann. Alexandr.* etc. [Col. 1532]).

Victor of CARTENA was a bishop in the 5th century who wrote *Adversus Arianos ad Genserici, Vandal. Regem*:—*De Penitentia Publica*:—*Epistola Consolatoria ad Basil.*:—and several homilies. His writings are now extant only in part.

Victor of CARTHAGE, a bishop A.D. 646, is known only through a letter addressed to pope Theodore I, in which he announced his elevation to the episcopal chair and accepted the doctrine of two wills in Christ.

Victor of TUNXA was a bishop who died about A.D. 566. He was one of the defenders of the so-called *Three Chapters* (q. v.), and was imprisoned and banished because of his resistance in opposing Justinian's edict in condemnation of the chapters. He composed a *Chronicon ab Orbe Conditio*, of which the part extending from A.D. 444 to 465 is still extant. See *Theaur. Temp. Eusebii Pamphili*, opera et studio J. J. Scaligeri (Amst. 1658), ii, 1 sq.; *Theaur. Monum. Eccles. sire Henrici Canisii Lectiones Antiquæ*, ed. Basnage (Antv. 1725), i, 321 sq.

Victor of VITA (*Vitensis*, not bishop of Utica, as is often stated) was a bishop who lived in the latter half of the 5th century. In A.D. 487 he wrote a *Hist. Persecut. Afric. sub Genseric et Hunnerico Vandal. Regibus*, which is given in Ruinart, *Hist. Persecut. Vandal.* (Paris, 1694; Venice, 1732). See also Papenecordt, *Gesch. d. vandal. Herrschaft in Afrika* (Berl. 1837), p. 66 sq., 113 sq., 269 sq.

Victor I, pope from 185 to 197, or from 187 to about 200, was an African by birth and a hot-blooded character. He is noted for the part he took in the dispute with the Quartodecimarians of Asia Minor about the observance of Easter. He wrote a letter to Polycrates of Ephesus demanding that he should conform to the Occidental rule respecting Easter, on pain of excommunication in case of refusal; and when Polycrates declined, he severed ecclesiastical relations with that bishop and the churches of Asia Minor by which Polycrates was supported. The opposition of many Western ecclesiastics to such measures, however, compelled Victor to recede from his arbitrary position. The eventual result of the whole dispute was the prevalence of the Western theory of Easter. See *EASTER CONTROVERSIES*. Victor participated also in the beginnings of the Monarchian controversy by expelling from the Church the Dynamistic Monarchian Theodotus the Tanner (ὁ σκυριεύς), who denied the deity of Christ. This step gave rise to the sect of Theodotianists, which existed for a time in Rome. Certain expressions used by Tertullian (*Adv. Praxeas*, c. 1; *App. ad Libr. de Præscript.* c. 53) would seem to indicate that Victor was disposed to favor the views of Praxeas (q. v.) and the Patripassians (q. v.), which were the direct oppo-

sition of the notions entertained by the Ebionizing Dynamists. See Eusebius, *Hist. Eccles.* v, 22-28.

Victor II, pope from 1055 to 1057, was a relative of the emperor Henry III. His name was *Gebhard*, and he was previously bishop of Eichstätt. Leo of Ostia (*Chron. Casin.* ii, 89) states that the elevation of Gebhard to the pontificate was the work of the famous Hildebrand. The motive of that schemer's action in choosing so decided a friend of the emperor to fill the papal chair would seem to have been a desire to divide the imperial camp into two opposing factions. The experiment succeeded well, at least in so far as that Gebhard identified himself with the Cluniacensian party, whose head was Hildebrand. He attacked the practices of simony and marriage among the priests, issuing energetic prohibitions and holding several councils in France against them. In 1056 he was present at the death-bed of Henry III in Germany, and became the guardian of the infant heir of that prince and the counsellor of his widow. He died soon after his return to Italy in the summer of 1057. See Pagi, *Breriarum Paparum Rom.* i, 528 sq.; Höfler, *Gesch. d. deutschen Päpste*; Gfrörer, *Gregor. VII*, i, 560; and the Church histories.

Victor III, pope and successor to Gregory VII, was a son of Landolph V, prince of Benevento. His name was *Desiderius*, and he had been abbot of Monte Casino. Chosen by Gregory, he was elected by the cardinals to the papal chair in 1086, but refused to obey their call. He laid aside the papal insignia in solemn form at Terracina, and returned to his monastery, but in the spring of 1087 was nevertheless induced to enter on the high office for which he had been selected. He displayed much of the energetic spirit and tendency of his predecessor. At Benevento he excommunicated his rival, Clement III, and at the same time forbade all investiture of clergymen by the laity, called upon the Italians to undertake a sort of crusade against the Saracens of Africa, and instructed all bishops and ecclesiastics to avoid all association with the archbishop Hugo of Lyons, who, with the abbot Richard of Marseilles, had rebelled against his authority and grossly maligned his person. While engaged in the prosecution of far-reaching plans, he was suddenly cut down by death, in September, 1087, after having been the actual possessor of the papal chair during scarcely half a year. See Leo Ostiens. *Chron. Casin.* contin. a Petr. Diacon., bk. iii, c. 71, p. 480 sq.; Muratori, *Gesch. Ital. im Mittelalter* (Germ. transl.), vi, 464 sq.

Victor IV, popes. 1. The successor of Anacletus II (died 1138), who was previously cardinal Gregory Conti, but who, after a reign of two months, was induced by Bernard of Clairvaux to give place to the more powerful Innocent II (q. v.); and comp. Petr. Diacon., in the *Chron. Casin.* iv, 130.

2. Antipope against Alexander III. He was previously a cardinal, *Ottavianus*. Enthroned in 1159, he was recognised and protected by the emperor Frederick Barbarossa and endorsed by the synods of Pavia in 1160 and of Lodi in 1161, but never equalled his rival in ecclesiastical power or in moral influence. He died in 1164 at Luca, and was followed by Paschal III. See Von Raumer, *Hohenstaufen*, ii, 123 sq.; Reuter, *Gesch. Alexander's III u. d. Kirche s. Zeit*, i, 129, 401 sq.; Herzog, *Real-Encyklop.* s. v.

Victoria, a Christian martyr of the Dioclesian persecution (A.D. 284-312), was a native of an inland town in Numidia. She was one of a band of Christians who had met in the house of a church reader, and were seized and brought to Carthage to be arraigned before the tribunal of the proconsul. Her father and brother were still pagans; and her brother, upon her refusal to go with him, claimed that she was not in her right mind. "This is my mind," replied she, "and I have not altered it." She died in triumphant faith. See Neander, *Hist. of the Church*, i, 152.

Victorinus, bishop of PETTAU (*Petavionensis*), a town in ancient Pannonia—not of Poitiers, as Baronius states—lived about A.D. 290, and was an orator before he became a bishop. He was of Greek extraction, and was better acquainted with the Grecian than the Latin tongue. Of his works, a fragment, *De Fabrica Mundi*, was published by Cave (see below). Jerome says that Victorinus wrote commentaries on most of the books of the Old Test., and he is also credited with the authorship of a commentary on the Apocalypse. He died, according to the Roman martyrology, a martyr's death, under Diocletian, about 303. See Dupin, *Nouvelle Bibl. des Auteurs Ecclés.* (Paris, 1693), i, 194; Cave, *Scriptorum Eccles. Hist. Lit.* (Genev, 1693), p. 73 sq.; *Max. Bibl. Vet. Patr.* etc. (Lugd. 1677), vol. iii, where the commentary on the Apocalypse occurs, p. 414 sq.; Herzog, *Real-Encyklop.* s. v.

Victory, in Roman mythology, was the daughter of Pallas and Styx. Victory personified (called by the Greeks *Nikē*) was generally represented in connection with other deities, who carry her upon their hands; for instance, Jupiter, Minerva, Venus. She also appears with victors in races, whose horses she guides. She is pictured as a maiden similar to Minerva, with wings, a palm-branch, and a wreath. In the accompanying cut she appears bringing a sacrifice to Minerva.

Antique Figure of Victory.

Victricius, Sr. Tradition makes him to have been a soldier who became a Christian and wished to leave the army, for which reason he was condemned to undergo severe tortures, but escaped, because the lictor who had him in charge became blind, and the prisoner's fetters refused to hold him bound. After being liberated, Victricius became bishop of Rouen (A.D. 380-390), and an active missionary. He sustained intimate relations with Martin of Tours and Paulinus of Nola. About 393 he visited England for the purpose of restoring peace to the Church, into which the Pelagian faction had brought discord; but was himself suspected of heresy and compelled to visit Rome (403), in order to prove his orthodoxy. Pope Innocent I thereupon gave him a paper intended to be a guide in the administration of ecclesiastical discipline, and also for the deportment of believers generally. He died, probably, in 407 or 408, and left a work, entitled *De Laude Sanctorum*, which was published by Lebouf (Paris, 1739). His day is Aug. 7.—Herzog, *Real-Encyklop.* s. v.

Victrix (*the victress*) was a surname of VENUS.

Victuals (represented by several Heb. and Gr. words, which are variously rendered in the A. V.). The necessary act of taking food was, at a very early

period of the world's history, connected immediately with religion. Thus the paschal lamb and the unleavened bread spoke in pleasing tones and by striking emblems, to each successive generation, of the great historical fact of which they were designed to be the perpetual memento. In like manner the Lord's supper (1 Cor. xi. 20), the breaking of bread from house to house (Acts ii, 46), and the *agapæ*, or love-feasts—feasts of charity (Jude 12)—were all, especially the first, both wisely designed and admirably fitted to bring into play, in connection with religion, the better feelings of humanity, to maintain in everlasting remembrance the events which they symbolized, to make eating and drinking an act of religion, and to make religion a pleasure. See AGAPE; PASSOVER; SUPPER.

1. The productions of a country, at an early period of the world, necessarily determined its food. Palestine abounded with grain and various kinds of vegetables, as well as with animals of different species. Such, accordingly, in general, was the sustenance which its inhabitants took. See CEREALS.

The use of fire, and the state of the arts of life in a country, must also have important influence on its cookery; in other words, will go far to determine the state in which the natural productions of the earth will be eaten. If the grain is to become bread, a long, and by no means easy, process has to be gone through. Skill in preparing food is therefore held in high repute; so that, as in Homer, princes slay the cattle, and poetry details the process by which the carcass is made ready for being eaten (*Iliad*, i, 457). See COOK.

Bread formed "the staff of life" to the ancient Hebrews even more than to ourselves; but the modes of preparing it have been noticed under other heads. See BREAD; MILK.

On a remarkable occasion a calf, tender and good, was taken, slain, dressed (roasted, most probably [Gen. xxvii, 7; Exod. xii, 8, 9; Judg. vi, 19; 1 Sam. ii, 13]; boiling was not known till long afterwards), and set before the guests, while the entertainer (Abraham) respectfully stood at their side, doubtless to render any desirable service. The sauce or accompaniments on this occasion were butter and milk. From Gen. xix, 3 it may be inferred that the bread was unleavened. See BUTTER; MILK.

The cases, however, to which reference has been made were of a special nature; and from them, as well as from what is recorded touching Isaac and Esau and Jacob, it appears that flesh meat was reserved as food for guests or as a dainty for the sick; lentils, pulse, onions, grain, honey, and milk being the ordinary fare. See MEAT.

The agreeable, and perhaps in part the salubrious, qualities of salt were very early known and recognised. In Lev. ii, 13, it is expressly enjoined, "Every oblation of thy meat-offering shalt thou season with salt; with all thine offerings shalt thou offer salt." See SALT.

Locusts were a permitted (Lev. xi, 22) and a very common food. At the present day they are gathered by the Bedawin in the beginning of April, and, being roasted on plates of iron or dried in the sun, are kept in large bags, and, when needed, eaten, strewed with salt by handfuls. See LOCUST.

Of four-footed animals and birds, the favorite food were sheep, goats, oxen, and doves. There are few traces of the eating of fish, at least in Palestine (Lev. xi, 9-22; Numb. xi, 5). In the first passage a distinction is made between certain fish which might be eaten and others which were forbidden. "These shall ye eat of all that are in the waters: whatsoever hath fins and scales in the waters, in the seas, and in the rivers, them shall ye eat; and all that have not fins and scales, they shall be an abomination unto you." See CATTLE; FISH.

The distinction of clean and unclean animals, and of animals which might and those which might not be eaten, is found to have existed to a great extent in ancient Egypt. See Spencer, *Leg. Rit.* i, 5; Danz, in

Meuschen. *N. T. Talm.* p. 795; Maimonides, *De Cibus Vettis*, ed. Wölkicke (Lips. 1734); Reinhardt, *De Cibus Hebreor.* (Viteb. 1697). The Mosaic laws which regulated the use of animal food may be found in Lev. xi and Deut. xiv. The grounds of many of these regulations may be ascertained with a greater or less degree of probability, provided the student is well acquainted with the mind and spirit of Hebrew antiquity. Considerations drawn from idolatrous usages, regard to health, the furtherance of agriculture, and established customs and tastes, had in each case an influence in the promulgation of these laws. See CLEAN.

2. In the earliest times water was the common drink. That wine of an intoxicating tendency was drunk at a very early period appears from what happened to Noah (Gen. ix, 20), who seems to have made as well as drunk wine. Bread and wine are spoken of in xiv, 18, as offered for refreshment to Abraham by Melchizedek, king of Salem. Water was sometimes put to the wine; at others a strong drink was made by mixing with the wine aromatic herbs (Psa. lxxv, 9; Isa. v, 22), or a decoction derived from them; myrrh was used for this purpose. Date wine was in use, and probably the Egyptian or malt wine, *ζῆθος, οἶνος κρήνηος* (Herod. ii, 77). Jerome (*Opp.* iv, 364, ed. Bened.) says that "drink called *sicera* by the Hebrews (שִׁכְרָה) is every kind which can inebriate, or that which is made from grain, or of the juice of apples, or when the honey-comb is made (*decoquantur*) into a sweet and barbarous beverage, or the fruit of the palm expressed into a liquor, and when water receives a color and a consistency from prepared herbs."

The common people (Mark xii, 37) drank an acrid sort of wine, which is rendered vinegar in our English version (Ruth ii, 14; Matt. xxvii, 48). The Orientals frequently used wine in excess, so as to occasion intoxication, whence are drawn many striking figures in Holy Writ (Deut. xxxii, 42; Psa. lxxviii, 65; Isa. v, 11; xxviii, 1; xlix, 26; Jer. viii, 14; ix, 14; xvi, 48). That indulgence in wine was practiced in very ancient days is manifest from there being in the court of Pharaoh, at the time of Joseph, state-officers who had charge of the wine, and served the monarch with it when he drank (Gen. xl, 1, 11; comp. 1 Kings x, 5; 2 Chron. ix, 4; Neh. i, 11). See WINE.

For drinking-vessels there were used the cup and the bowl (Exod. xxv, 33; Numb. vii, 13, 84; Jer. xxxv, 5; Amos vi, 6). The cup was generally of brass covered with tin, in form resembling a lily, sometimes circular. It is still used by travellers, and may be seen in both shapes on the ruins of Persepolis (1 Kings vii, 26). The bowl (Exod. xxv, 33) assumed a variety of shapes, and bears many names. Some of these "chargers" appear, from the presents made by the princes of Israel (Numb. vii), to have been of large size and great splendor; some were silver, some gold (1 Kings x, 21). See CUP, etc.

3. In Eastern climes the chief meal, or what we term dinner, is, in consequence of the heat of the middle period of the day, deferred till towards evening, a slight

repast being taken before noon (Adam, *Rom. Antig.* p. 377, ed. Major; Potter, ii, 625; Chardin, iv; Jahn, i, 2). But from Gen. xliii, 16, 25, it appears to have been the custom to dine at noon in the days of the patriarchs. The same seems to have been the case in Palestine at a later period (1 Kings xx, 16; comp. Luke xi, 37; Acts x, 10). Convivialities, however, were postponed till evening, and sometimes protracted to the following morning (Isa. v, 11; Mark vi, 21; Luke xiv, 24). See BANQUET. The meal was preceded by washing of hands (Mark vii, 2; Luke xi, 38), which the mode of eating rendered necessary, and by an invocation of the divine blessing (1 Sam. ix, 13), termed in Samuel בֵּרַכָה, and in Greek εὐλογία εὐχαριστία, blessing, giving of thanks (Luke ix, 16; John vi, 11). Similar customs prevailed among the Greeks and Romans. Jahn (*Bibl. Antig.* p. 68) has given the short prayer, as preserved in the Talmud, which the Jews used, as follows: "Blessed be thou, O Lord our God, king of the world, who hast produced this food (or this drink) from the earth (or the vine)" (Matt. xiv, 19; xv, 36; xxvi, 27). See MEAL.

4. The Hebrews, like the Greeks and Romans in their earlier history, ate sitting (Gen. xxvii, 19; Judg. xix, 6; 1 Sam. xx, 25). A carpet was spread, on which the meal was partaken. At a later period, however, particularly when Palestine came under the influence of Roman manners, the Jews reclined on cushions or couches (Esth. i, 6; Amos vi, 4; Luke vii, 37; ἀνέκλιντο, not "sat," as in the common translation, but "reclined"). See ACCLINATION. The custom of giving preference in

Ancients Reclining at Table.

point of seat or position to guests of high consideration appears, from 1 Sam. ix, 22, to have been of ancient date (Exod. iii, 12). In the time of Christ (Luke xiv, 8) the Pharisees, always eager for distinction, coveted the place of honor at meals and feasts. Women were not admitted to eat with the men, but had their meals supplied in their own private apartment (Esth. i, 6-9). In Babylon and Persia, however, females mingled with males on festive occasions (Dan. v, 2). In general the manner of eating was similar to what it is in the East at the present day. Special care was taken of favored persons (Gen. xliii, 34; 1 Sam. i, 4; ix, 22; John xiii, 26). Neither knives, forks, nor spoons were employed for eating. The food was conveyed from the dish to the mouth by the right hand. The parties sat with their legs bent under them round a dish placed in the centre, and either took the flesh meat with their fingers from the dish, or dipped bits of their bread into the savory mess and conveyed them to their mouths. In Ruth ii, 14, Boaz says to Ruth, "Dip thy morsel in the vinegar," which explains the language of our Lord, in John xiii, 26, "He it is to whom I shall give a sop when I have dipped it." This presenting of food to a person is still customary, and was designed originally as a mark of distinction, the choice morsels being selected by the head of the family for the purpose. Drink was handed to each one of the guests in cups or goblets, and, at a

Wine-cups. (From Persepolis.)

very ancient period, in a separate cup to each person. Hence the word cup is used as equivalent to what we term a man's lot or destiny (Psa. xi, 6; lxxv, 8; Isa. li, 22; Matt. xxvi, 39).—KITO. See DIET; EATING; FOOD; SUP.

Vicus, HENRICUS, a Roman Catholic theologian and philosopher, was born in 1536 at Valenciennes, and died in 1596 at Armentiers, in Flanders. He wrote, *De Christianorum Sacramentorum Natura, Officiis, et Numero*:—*De Descensu Christi ad Inferos*:—*De Communionis Sacramentum*, etc. See Swertii *Athene Belgicæ*; Andreae *Bibliotheca Belgica*; Jöcher, *Allgemeines Gelehrten-Lexicon*, s. v. (B. P.)

Vida, MARCO GIROLAMO, an Italian poet and priest of the Roman Church, was born at Cremona about 1485. He studied at Padua and Bologna, and joined the Order of the Canons of St. Mark at Mantua. He afterwards became canon of St. John Lateran at Rome, and prior of San Silvestro at Frascati, and in 1532 bishop of Alba. He was a learned scholar, and one of the best Latin poets of his day. He wrote in Italian as well as in Latin. Among his works are, a metrical treatise *De Arte Poetica* (Rome, 1527):—*Christus*:—and *Seacchiæ Ludus*. All of these have been translated into English. Vida died at Alba, Sept. 27, 1566.

Vidal, Diego (called the *Elder*), a Spanish painter, was born at Valmaseda in 1583. He is said to have studied at Rome, and acquired some reputation as an artist. He was a prebendary of the Cathedral of Seville, and painted there a naked *Christ*, and the *Virgin with the Infant in her Arms*. His drawings are also spoken of in terms of commendation. He died at Seville in 1615. See Spooner, *Biog. Hist. of the Fine Arts*, s. v.

Vidal (DE LIENDO), Diego (called the *Younger*), a Spanish painter, nephew of Diego the elder, was born at Valmaseda in 1602. He studied theology and painting at Rome, and was canon of the Cathedral of Seville. There are some of his works in the sacristy of the Cathedral of Valencia, which evince considerable skill. He died at Seville in 1648. See Spooner, *Biog. Hist. of the Fine Arts*, s. v.

Vidal, Dionisio, a Spanish painter, was born at Valencia about 1670. He studied under Antonio Palomino, to whom he gave assistance in several cities. He returned to Valencia and was employed to paint the ceiling of the Church of St. Nicolas, from the designs of Palomino. He also executed some works of his own composition in fresco for various churches. He died at Tortosa, while painting the Chapel of the Virgin of the Girdle, but the time is not known. See Spooner, *Biog. Hist. of the Fine Arts*, s. v.

Vidam (Lat. *vice domini* [q. v.]), was, 1. The bishop's steward in the administration of the Church revenues, as the viscount represented the count. At Rheims and Chartres the vidams raised their office into a fief. 2. The provost or bailiff of the caputular rents, as at Lincoln, Cambrai, Rouen, etc. 3. The term is also applied to the heirs of founders of religious houses who had certain rights over their estates and attached churches.—Walcott, *Sac. Archæol.*, s. v.

Vidas, ELIAS DE, ben-Moses, a Jewish writer of the 16th century, a pupil of Moses of Cordova, or Cordovero (q. v.), is the author of the work on ethics entitled *התחילת החכמה*, *the beginning of wisdom*, in five parts, of which the first, called *הדרך* *שער*, treats of the fear of God, in fifteen chapters; the second, *השער* *האהבה*, of the love of God, in twelve chapters; the third, *ההשקפה*, with seven chapters, treats of repentance; the fourth, *הקדושה שער*, with seventeen chapters, of holiness; while the fifth, *הכנה שער*, treats of humility. Besides some excerpts from and compends of Vidas's work, the part which treats of repentance has

been translated into Latin by J. Morin, in his *Commentarius de Sacramento Pœnitentiæ* (Paris, s. a.), and by David de Lara into Spanish (Leyden, 1666), who also translated the first part, treating of the fear of God (Amst. 1633). See Fürst, *Bibl. Jud.* iii, 477 sq.; De' Rossi, *Dizionario Storico* (Germ. transl.), p. 328. (B. P.)

Vidua (the widow), a Latin surname of JUNO.

Viduæ (widows), a term applied to the deaconesses of the ancient Church, by Tertullian and others, because they were commonly chosen from among the widows, and the office was called *vibatus*. Even some of the ancient laws required them to be widows, prescribing minutely their qualifications in this regard. See Bingham, *Christ. Antiq.* bk. ii, ch. xxii. See WIDOWS.

Viduus, in Roman mythology, is the family name of the mother of the Fabians in Rome. She is said to have been a daughter of Evander, the most ancient king of Italy, loved by Hercules, through whom she became mother of Fabius, the progenitor of the family.

Vieil, PIERRE LE, an eminent French painter on glass, was born in Paris in 1708. In 1734 he executed several excellent works for the Church of St. Étienne du Mont, in Paris; and afterwards restored the glass-paintings in the Cathedral of Notre Dame. He also executed, among other works, the paintings in the Church of St. Victor. He spent fifteen years in preparing materials for a work on the art of glass-painting, entitled *Traité Historique et Pratique de la Peinture sur Verre*. He also wrote, *Essai sur la Peinture en Mosaïque*. He died in 1772. See Spooner, *Biog. Hist. of the Fine Arts*, s. v.

Vieira (Vieyra), Antonio, a Portuguese missionary, was born in Lisbon, Feb. 6, 1608, of a good family. He was brought up by the Jesuits at Bahia, in Brazil, and in 1625 entered their order. He prepared himself by diligent study for evangelical labor among the surrounding Indians and negroes, and in 1641 went to Portugal as companion to the viceroy's son; but on their arrival they were mistaken for Spanish emissaries, and Vieira was cast into prison. He was soon released, however, and preached at the court with such eloquence that Juan IV made him his preacher, and engaged him in diplomacy at Paris and the Hague. In 1647 he went also to London, and in 1650 to Rome. In 1652 he returned to Brazil in execution of his cherished schemes, but was unsuccessful in his efforts to rescue the natives of Brazil from slavery. He returned again to Portugal for further authority, but, after six more years of indefatigable labor in Brazil, he was finally sent home to Lisbon (1661) as a criminal. After various fortunes at home and abroad, still laboring for religious purposes, he died at Bahia, July 18, 1697, the acknowledged head of the Jesuitical order in Brazil. He left a number of historical and other works, for which see Hoefer, *Nour. Biog. Générale*, s. v.

Vieira, Sebastiano, a Portuguese missionary, was born at Castro Daire (diocese of Lamego) in 1570. At the age of sixteen he entered the Order of St. Ignatius, and prepared himself for evangelical labor in the East Indies. In 1602 he arrived in Japan, and spent several years there; thence he went to Manilla, and again to Japan, gathering converts continually. Being sent for by the home authorities to report at Rome, he was condemned as a traitor by the Japanese, and on his return was seized, commanded to renounce his faith, and on refusal was cruelly martyred, June 6, 1634. See *Biographie Universelle*, s. v.

Viel, DE. SEE DUVEIL.

Vienna, COUNCIL OF (*Concilium Vindobonense*), was held May 10, 1267, by Guy, cardinal-legate. A constitution in nineteen articles was published, very similar to that drawn up in the Council of Cologne in the year preceding.

By canon 3, clerks having wives or concubines were or-

dered to separate from them within a month, under pain of being deprived.

6. All pluralities were forbidden.
14. Forbids abbots to consecrate chalices, patens, or any ecclesiastical vessel or vestment.

The last five relate to the Jews.

See Mansi, *Concil.* xi, 858.

Vienna, COUNCILS OF (*Concilium apud Viennam Allobrogum, or Viennense*). Vienna is a city of Dauphiné, France, where numerous Church councils were held.

I. The first of which mention is made was held A.D. 474. Of its transactions nothing is known beyond the fact that it sanctioned the solemn observance of the three days preceding Ascension-day, which bishop Mamercus of Vienna had ordered.

II. Held A.D. 870, simply confirmed the privileges bestowed upon a monastery.

III. Held A.D. 892, by order of pope Formosus, whose two legates, Pascal and John, presided. Several bishops were present, and four canons were published.

1, 2. Excommunicate those who seize the property of the Church, or maltreat clerks.

4. Forbids laymen to present to churches without the consent of the bishop of the diocese; also forbids them to take any present from those whom they present.

See Mansi, *Concil.* ix, 433.

IV. Held A.D. 907; was convoked by archbishop Alexander of Vienna, and settled a dispute between abbots Aribert and Barnard respecting the income receipts of monasteries.

V. Held A.D. 1112 by archbishop Guido; excommunicated emperor Henry V because he claimed the right of episcopal investiture, and revoked the treaty of 1111 which conferred such right upon the crown.

VI. Held A.D. 1119; was called by pope Gelasius II, who had again excommunicated Henry V, on the occasion of his setting up an antipope in the person of Gregory VIII; but nothing whatever concerning the transactions of this synod is known.

VII. Held A.D. 1124; was incited by pope Calixtus II, and called by archbishop Peter of Vienna; legislated with reference to the securing of ecclesiastical privileges and possessions.

VIII. Held A.D. 1142; was chiefly concerned with the election of a new bishop.

IX. Held A.D. 1164, at which archbishop Reginald of Cologne vainly endeavored to secure a recognition of Paschal III, whom the emperor Frederick had endorsed.

X. Held A.D. 1199, by the cardinal-legate Peter of Capua, for the purpose of promulgating the decree of pope Innocent III, which punished the king, Philip Augustus, with excommunication on account of his renunciation of Inneburgis, his lawful count, and his subsequent marriage with Agnes of Meran. See Mansi, *Concil.* xi, 11.

XI. Held A.D. 1289; is barely mentioned in the records, and some authorities deny that it was held.

XII. Held A.D. 1311; known as the fifteenth œcumenical council, and the only one of the series to which attaches any considerable importance. It was originally ordered, by a papal bull of 1308, to meet Oct. 1, 1310, but was subsequently postponed for one year. The council finally convened, under the presidency of pope Clement V, on Oct. 16, 1311. The number of prelates present is fixed by some at 114, and by others at 300, including the patriarchs of the Latin Rite of Alexandria and Antioch. It discussed methods for preserving the purity of the faith, which was impaired by the heretical influence of John of Oliva, and of the Fratricelli, Dolcinists, Beghards, and Beguins; also the aid to be afforded the Holy Land; the reform of ecclesiastical discipline; and especially the disposition to be made of the Order of Knights Templars. The decisions abrogated the Order of Templars; declared the legitimacy of the late pope Boniface VIII, and his freedom from the crimes charged against him; conceded tithes for six years to the kings of France, England, and Navarre, in order that they

might organize a crusade; and regulated the government of the begging friars and similar matters. Most of the decrees which have to do with matters of doctrine and discipline are contained in the so-called *Clementines* (q. v.), and were first promulgated by pope John XXII. See also Landon, *Manual of Councils*, s. v.

XIII. Held A.D. 1557; determined several questions of Church discipline; discussed the use of sermons as a means of instructing the people; forbade the admission of strangers to the pulpits; demanded the rendition of heretics, and prohibited merry-makings on feast-days and association with suspected persons; gave directions respecting the tonsure and garb of priests; denied to monks and nuns the privilege of leaving their convents, etc. See Martene, *Thesaur. Novus Anecd.* (Lutet. Par. 1717), iv, 446 sq.

Jurisconsultorum* (ibid. 1584), XIII, i, 159 sq., where is given Durandus, *Tractatus de Modo Celebrandi Gen. Concilii*.—Herzog, *Real-Encyklop.* s. v.

Vieu, JOSEPH MARIE, an eminent French painter, and the regenerator of art in France, was born at Montpellier, June 18, 1716. His enthusiasm for art led him to study, against the wishes of his parents, under several masters, among whom were Rivalz of Toulouse, and C. Natoire at Paris, where he went in 1740. In 1743 he gained the prize of the Royal Academy by his picture of the *Plague of the Israelites in the Time of David*. In 1744 he went to Rome, where he spent some years in studying the masters and designing from the antique, and painted numerous pictures, including many altar-pieces of great merit, such as the *Slaughter of the Innocents*, and two pictures now in the Louvre: a *Sleeping Hermut*, and *St. Germain and St. Vincent Receiving the Crown of Glory from the Hands of an Angel*. He returned to Paris in 1750, and was chosen a member of the Academy in 1754. While at Paris he painted numerous pictures, and labored with excellent success to restore in French art the study of the antique and of nature as represented in the Italian masters. He completed his picture of *St. Denis Preaching to the Gauls* in 1775, when he was decorated with the Order of St. Michael, and appointed director of the French Academy at Rome, where he resided until 1781, and was also elected a member of the Academy of St. Luke. After returning to Paris he was chosen one of the rectors and director of the Royal Academy, and in 1789 principal painter to the king. At the time of the Revolution came a change in his relations to the government, but Napoleon made him a member of the Senate, a count of the empire, and a commander of the Legion of Honor. He died in Paris, March 27, 1809, and was buried in the Pantheon. Vieu's subjects are taken chiefly from the Scriptures, ancient and modern history, and Greek mythology. Among the most celebrated works of this artist the following deserve mention here: *St. Jerome*:—the *Embarkation of St. Martha*:—*Christ Breaking Bread*:—the *Resurrection of Lazarus*:—the *Virgin Attended by Angels*:—and *St. Gregory*. See Spooner, *Biog. Hist. of the Fine Arts*, s. v.

Vieux, RENAUD LE, a French historical painter, flourished in the latter part of the 17th century. He visited Rome for study, and when he returned to France produced many works of considerable merit. He painted several pictures for the Church of the Penitents at Avignon from subjects in the history of John the Baptist. Two of these were taken to Paris in 1793, two are in the Gallery of Nismes, and the rest are at Avignon. See Spooner, *Biog. Hist. of the Fine Arts*, s. v.

Viger, FRANCIS, a French Jesuit, was born in 1591 at Rouen, and was professor of elocution at Paris, where he died Dec. 13, 1647. He edited *Ensebi Evangel. Preparat.*, in Greek and Latin, accompanied with notes

(Paris, 1628). See Alegambe, *Bibliotheca Scriptorum Societatis Jesu*; Witte, *Diarium Biographicum*; Jöcher, *Allgemeines Gelehrten-Lexicon*, s. v.; Winer, *Handbuch der theol. Literatur*, i, 892. (B. P.)

Vigērus, MARCUS, a Ligurian Dominican, a professor of theology at Padua and Rome, and a cardinal, was born in 1446. He wrote various treatises respecting the death of Christ, which were printed in two volumes at Douay in 1607. He died in 1516. See Mosheim, *Hist. of the Church*, bk. iii, cent. xv, pt. ii, ch. ii.

Vigier, GÉRALD, a French hagiographer, who died in 1637. He wrote a *Histoire des Saints Protecteurs d'Auvergne* (Paris, 1535, 8vo);—and *La Monarchie de France* (ibid. 1670–72; Clermont, 1677, 2 vols. fol.).

Vigil of Lights, an old English term to designate Candlemas-eve (Feb. 1).

Vigilantius, a presbyter of the early part of the 5th century, belongs to the number of isolated *testes veritatis* who rose in opposition to the errors of the Church with respect to worship and morals, which were becoming increasingly notorious with the advancing years of the 4th century. He was a native of Calagurris, now Casère, in the county of Commenges (*Convenne*). His Gallic extraction is indisputably proven, despite the fact that some authorities have been misled into stating that he was of Spanish family. He was brought up to follow the business of inn-keeping; but in 395 (?) visited Paulinus of Nola (q. v.), and immediately afterwards was ordained presbyter. Recommended to Jerome by Paulinus, he travelled into the East and visited Jerusalem in 396, meeting with a friendly reception at the hands of Jerome, but making no favorable impression upon his heart. Jerome had two especially tender spots in his character—the one an inordinate vanity because of his learning, and the other an exalted opinion of his own orthodoxy; and Vigilantius managed to fret them both. He was not possessed of learned culture, though Gennadius credits him with being *lingua politus*; and yet he laid claim to the literary character; and, with the practical disposition of a Western mind, he objected to the speculative dogmatics of Origen, upon whose study Jerome was at that time employed, and even raised suspicions against the soundness of Jerome's personal views. Jerome at first attempted to prove the correctness of his creed; but Vigilantius, having refused to avail himself of the scholar's hospitality and departed from Jerusalem, felt himself bound by no restraints, and issued an epistle condemnatory of Jerome's Origenism (see Hieron. *Ep.* cix, 2, *inter Adriæ Fluctus Cottique Regis Alpes*), in response to which the irascible saint compared him to Judas and termed him an ass. Either just before, or immediately subsequent to, the sojourn at Jerusalem, Vigilantius went to Egypt, but the exact time is not determined; and a similar uncertainty surrounds the place of his residence on his return to the West. The letters of Jerome appear to compel the conclusion that his opponent was settled in Gaul, while Gennadius makes him to have charge of a parish in Barcelona. We incline to believe the former the only settlement of the question which can be successfully defended. Eight years after the departure of Vigilantius from Jerusalem, a presbyter named Riparius notified Jerome that his adversary was teaching very questionable doctrines and disturbing the entire (Gallic ?) Church with the promulgation of his views. He thereupon renewed his attacks upon Vigilantius (*Ep. contra Vig.* 18), but, much to the surprise of himself and other students of the situation, without giving wider dimensions to the quarrel; for Vigilantius was certainly supported by many of the lower clergy and of the laity, and was even protected by bishops. No answer was made to Jerome's abusive epistle, and Vigilantius thenceforward drops out of view, either because he soon afterwards died, or because the barbarian invasions of Gaul crowded the paper quarrels of incensed churchmen out of sight.

The views which stirred the soul of Jerome to wrath are not preserved to us in sufficient fulness to furnish a connected system. The primary object of attack by Vigilantius was the veneration of martyrs and of relics. He doubted the genuineness of the relics, and condemned the bearing about of dead men's bones enswathed in costly wrappings. He also considered the invocation of martyrs as a deifying of the creature and a step backward into heathenism, and insisted that it implies the doctrine of their omnipresence, and that their intercession cannot be safely relied upon, since their prayers in their own behalf were not always answered. He held that the miraculous power with which relics were supposed to be endowed had not extended further than to the close of the distinctively missionary period of the Church. The burning of daylight candles in the basilicas was rejected by him on the ground that the martyrs, in whose honor the basilicas were erected, were rejoicing in the light of the Lamb on the throne, and had no need of such illuminations. The celebration of vigils (q. v.) and martyrs' feasts was denounced as involving danger to public morals; but he violated consistency in consenting that vigils might be kept in connection with the Easter festival.

In the field of morals, Vigilantius draws still nearer to the evangelical position, particularly upon the question of the celibacy of the priesthood, which he condemned, as he did monasticism, with its voluntary vows of poverty and solitude. He reasoned that it is better to contribute regularly to the relief of the poor than to alienate possessions by a single act, and that to flee from the world is not to conquer it. He was especially outspoken in criticisms of the fanatical monks of the East, whose fantastic eccentricities he had himself observed. He furthermore opposed the donations of money which it was customary to send to Jerusalem—a measure which Jerome might almost regard as a direct attack upon himself. In all these arguments, Vigilantius evidently holds that there is no distinction of morality into higher and lower classes, but that the demands of virtue are equally binding upon all men. He was not the equal of Jovinian (q. v.) in speculative ability, but merely a clear-headed exponent of the instinct of an earnest piety which lived in his soul. He was pious rather than philosophical; and he was, moreover, not deeply learned in the Scriptures. His work was not of lasting consequence, probably because he lacked the reformatory spirit which alone is competent to resist the perverse tendencies of a degenerating age. See Jerome, *Epp.* and *De Viris Illustribus*, with the continuation of Gennadius (q. v.); Paulinus of Nola, *Ep. ad Severum*, v, 11 (*Aug. Epp.* 24, 4); Vogel, *De Vigilantiæ Hæretico Orthodoxo* (Erlurt, 1756), in Walch, *Ketzergesch.* iii, 673–704. The latter gives, in addition, citations from other and earlier writers. See also Baur, *Die christl. Kirche rom 4. bis zum 6. Jahrhundert*, p. 317 sq.; and Lindner, *De Joviniano et Vigilantiæ*, etc. (Lips. 1840); Herzog, *Real-Encyclop.* s. v.

Vigiliæ Mortuōrum (literally, *watches for the dead*) is a term for watching by turn, with prayers and intercessions, beside the body of a departed Christian after death and before burial.

Vigilius, pope, was bishop of Rome from 540 (536 ?) to 555, and is remarkable for his connection with the controversy of the *Three Chapters*. He was a native of Rome, and, in the capacity of deacon, accompanied Agapetus (q. v.) to Constantinople in 536, where he employed the opportunity afforded by his introduction to the imperial court for the realization of ambitious plans which neither his theological culture nor his character for intelligence and spirituality justified. The empress Theodora marked him as a suitable instrument for the accomplishment of her ends, and, on the death of Agapetus, caused him to be informed that the succession might be secured to him for the price of his support to the Monophysite party. This he promised to give. On

his return to Italy, however, he found the see of Rome already occupied by Silverius, the son of bishop Hormisdas, and he accordingly applied to Belisarius, the commander of the imperial armies, who was then at Ravenna, to bring about the fulfilment of the promise made by the empress; and with the influence of Antonina, the wife of Belisarius, and, it is charged, of added pecuniary inducements, his object was accomplished. Once in the chair, however, he was not very forward to perform his part of the agreement. He wrote, indeed, to the deposed Monophysite patriarchs of the East to declare his sympathy with their views, but he requested that the contents of his letter should not be made public, and thereby sought to deprive the cause of the empress of whatever aid his influence might afford.

The emperor Justinian entertained the hope of bringing about an agreement between the contending parties in the Church, and was induced to issue an edict in 551 condemning the so-called *Three Chapters* (q. v.), which, it was said, would remove all the Monophysite objections against the Chalcedonian decrees; but the edict encountered serious opposition every where. Even Menas, the patriarch of Constantinople, was unwilling to subscribe to it; the African Church protested against its enforcement; and Vigilius dared not oppose himself to the fierceness of the storm raised throughout the West by the imperial condemnation of its own peculiar tenets. He was accordingly summoned to Constantinople, and reached the court in 547, bearing with him the spoken protests of every community he had touched while on the way; but the atmosphere of the court wrought a speedy change in his attitude, and he returned to his old plan of conciliating the court, but concealing his treachery from the world. He was, however, compelled to take an open stand, and therefore tried to shelter himself behind the authority of a synod whose convocation he advised; and when the Africans, led by Facundus (q. v.), were found to possess a majority of votes, he practically dissolved the synod by requiring the bishops to submit written opinions within a limited period. It thus became possible to influence them separately and to bring a majority of them into accord with the wishes of the emperor; and their opinion, accompanied with his own decision (*Judicatum*), was immediately transmitted to the court to prevent any retraction. The orthodox opposition immediately broke out afresh. Facundus of Hermiane was again its leader, but it included also persons belonging to the immediate train of Vigilius, such as the deacons Rusticus and Sebastian, whom he was thus induced to depose and excommunicate. In his alarm at the storm his measures had excited, he thought only of averting its shock from his own person. He managed to recover possession of his *judicatum*. He vowed the condemnation of the *Three Chapters*, and thereby induced the emperor to convoke a council, of which he hoped that it would relieve him of the burden of responsibility under which he staggered. When the council came together, however, it refused to accede to the desires of the emperor; and when the latter sought to compel its obedience, Vigilius renounced all ecclesiastical connection with the East and took refuge in flight. He subsequently published an encyclical describing his troubles, and followed this with the excommunication of Theodore Ascidas, the Monophysite bishop of Caesarea, who had been a prime instigator of the emperor's action; and the emperor saw himself constrained to convoke a general council. It met in 553, and was wholly subservient to the emperor. Vigilius refused to participate in its proceedings, and sent, instead, a judgment, the so-called *Constitutum*, protesting against the condemnation of the *Three Chapters*. The opposition thereupon published all the documents in which Vigilius had previously compromised himself in order to obtain favor with the emperor, and ordered the erasure of his name from the *Dipltychs*. He was also, it is said, banished; and at any rate made to feel the anger of Justinian in a measure

which induced him to purchase its cessation at the cost of a retraction, in which he approved of the decisions of the late council and the condemnation of the *Three Chapters*. He died, however, in 555, before he could resume his throne. See Anastasius, *Lib. Pontifical.*, in Mansi, vol. ix; Liberatus, *Breviarium*; Victor of Tunnunum, *Chronicon*; Facundus of Hermiane, *Pro Defensione Trium Capit.*, and Ade. Mocianum, all to be found in Gallandi *Bibl.* vol. xi sq. See also Walch, *Ketzergesch.* vol. viii; Neander, *Kirchengesch.* vol. iii, etc.; Herzog, *Real-Encyclop.* s. v.

Vigilius THE DEACON, mentioned in Gemadius, *De Viris Illustribus*, No. 51, was doubtless resident in Gaul, and lived in the second or third decade of the 5th century. A monastic rule, based upon traditions and read in the conventual assemblages, is mentioned as his only literary production. Holsten has published such a rule, based substantially on Pachomius, in the *Codex Regularum*, i (Migne, *Patrol.* 50, p. 370-380). Vigilius must accordingly be regarded as one of the promoters of monasticism upon the basis of the experiences obtained by the Oriental Church, of which that age furnished so many. See Cave, *Script. Eccles. Hist. Lit.* ann. 402; Herzog, *Real-Encyclop.* s. v.

Vigilius of THAPSUS, in the African province of Byzacene. His name stands last on a list of bishops who attended a conference at Carthage called by the Vandal Hunneric, in A.D. 484, to bring to a conclusion the quarrel between the dominant Arian and the oppressed orthodox parties in the Church. A later report of his banishment to Constantinople, though not authenticated, is yet credible because a similar fate was experienced by his colleagues, and his works justify the conclusion that he sojourned in that city. He was an important character among the theological writers of his day, possessing a logical, simple, perspicuous style, and considerable dialectical skill, and producing a series of polemical works which were directed against the Arians and other heretics. His foremost work was *Five Books against Eutyches*, and it was also the only work he gave to the public over his own name—a circumstance which led tradition to ascribe it to bishop Vigilius of Trent, who was more generally known. Several pseudonymous works from the pen of Vigilius of Thapsus were also attributed to other authors in the meretricious period of the world; e.g. several controversial discussions between Athanasius, Photinus, Sabellius, and Arius were credited to Athanasius. The standpoint of Vigilius was that of Chalcedonian orthodoxy. He holds to a distinction of persons and a unity of essence in the Trinity, and to a unity of person and a diversity of natures in the person of Christ; but he does not even imagine that any difficulty is connected with the reception of such divergent doctrines, and seems utterly unable to discover any occasion whatever for the rise of heretical opinions. The importance of his work is consequently only relative, as it dealt with the particular heresies antagonized in a polemical or apologetical way. He was a dialectician rather than a theologian, and his works, if measured by the standards of a productive age, have no considerable value, while, if they be regarded as designed merely to combine and recapitulate the matter furnished by earlier thinkers, their value cannot be denied. Editions of the works of Vigilius are by Chiffletius (Dijon, 1664) and Churruerus (Tib., 1528). The books against Eutyches, and the disputations with Arius, and with Arius and Sabellius, together with twelve (doubtful) books *De Trinitate*, are given in the *Max. Bibl. Patrum*, vol. viii; and the controverted books against Marius, against Palladius, the *De Unitate Trinitatis* (which is generally ascribed to Augustine, but possibly belongs to Vigilius), are in vol. iv of the same collection. See Tillemont, *St. Eugène*, arts. li. lii; id. *Mémoires*, vol. xvi; Cave, *Script. Eccles. Hist. Lit.* i, 458; Herzog, *Real-Encyclop.* s. v.

Vigilius of TRENT, bishop, is mentioned by Gen-

nadius in *De Viris Illustribus*, No. 37, as the writer of an article "In Laudem Martyrum," addressed to a certain Simplicianus, who can only have been the successor of Ambrose in the see of Milan. This assigns him to the 4th or 5th century, and proves conclusively that he could not have written the books against Eutyches. See **VIGILIUS OF THAPSUS**. He lived probably not later than the reign of Honorius, for in his day the heathen party was still able to inflict gross indignities upon Christians. In Usuard, *Acta*, under June 26, it is stated that Vigilius studied at Athens and was compelled by the populace to become bishop of Trent. After a zealous administration of his office, he was stoned to death in a distant part of his diocese because he had caused a statue of Saturn to be destroyed. Stilicho was consul at the time, which fixes the date in A.D. 400 or 405. The letters of Vigilius to Simplician and Chrysostom are given in Runart, under May 29. Their superscription indicates that the missionary field of Vigilius was dependent on Milan as the Western metropolis of that day, and affords ground for the conclusion that he went out from Milan when he entered on that work; and the thought is not far to reach that a Church which could prosecute missionary labor on its own account was itself an independent Church. See Baronius, *Annales*, ann. 400, Nos. 2-18; Tillemont, *Mémoires*, xi; Herzog, *Real-Encyklop.*, s. v.

Vigils (*vigilæ*, *pernoctationes*, *παραυγίαι*) is the term by which are designated in the Romish Church the ceremonies of preparation for the observance of one of the great feasts. It originally designated merely the nocturnal religious services of the early Christians in times of persecution, but afterwards was applied to the services instituted to enforce the idea that the Christian ought to be watchful unto prayer even in the night-seasons, and assigned to the night preceding the recurrence of a notable feast of the Church. The vigils of Easter and Pentecost were regarded as especially holy in the 2d century, and with the former were connected the holding of the *agapæ*, or love-feasts, and the celebration of the Lord's supper, while with the latter was associated the sacrament of baptism. Only the faithful were allowed to participate in the vigils of those feasts. In the 4th and 5th centuries the Easter vigils were generally chosen for the administration of either sacrament and for the conferring of orders; and those of Pentecost and Christmas held a subordinate place, baptism not being administered in connection with the latter. In the 12th century vigils were first held in honor of the Virgin Mary.

The celebration of vigils became very splendid after the 4th century, but also corrupted with many improprieties, inasmuch that women were prohibited from engaging in it. Much opposition against their observance was aroused in consequence, their most prominent assailant being Vigilantius (q. v.). The convents were the principal agencies for perpetuating the institution of the vigils, but the churches gradually abolished it as a night service, and transformed the services into a fast. This gave rise to the Saturday fast. Vigils were afterwards observed in the forenoon of the day preceding a feast, and were generally adopted. At the present time an occasional midnight mass is celebrated at Christmas, and a vigil is observed on the evening before Easter, in addition to the forenoon vigil. Vigils precede the feasts of the Annunciation and Purifying of the Virgin, Christmas, Epiphany, Easter, Ascension Day, Pentecost, and the days of John the Baptist, All-saints', and the apostles Matthew, Peter, Jude, James, Simon, Thomas, and Andrew. Some vigils are privileged, i. e. have a special service. If connected with a second or third grade feast, the *officium* is celebrated and the vigil observed in the *laudes* and the mass. If two priests officiate, one reads the mass for the feast after the *tertia*, the other that for the vigils after the *nona*. Non-privileged vigils simply commemorate the vigil. An occasional vigil is observed in the Protestant

churches, e. g. the Moravians on Good Friday and Easter. See Augusti, *Archæologie*; Herzog, *Real-Encyklop.*, s. v.; and the monographs cited by Volbeding, *Index Programmatum*, p. 115, 121.

Vignali, JACOPO, an Italian painter, was born at Florence in 1592. He was a disciple of Matteo Rosselli. He is most conspicuous in his frescos, as seen in the Chapel of Buonarroti. He also painted good historical pictures in the palaces of many of the nobility, and even boasts of noble pupils. He died at Florence in 1664. See Spooner, *Biog. Hist. of the Fine Arts*, s. v.

Vignerio, JACOPO, a Sicilian painter who flourished at Messina about the middle of the 16th century. He studied under Polidoro da Caravaggio, and followed his style. An excellent picture by him of *Christ Bearing his Cross*, dated 1552, still exists in the Church of Santa Maria della Scala. See Spooner, *Biog. Hist. of the Fine Arts*, s. v.

Vignette (Fr.), in architecture, means a running ornament consisting of leaves and tendrils, such as is frequently carved in the hollow mouldings in Gothic architecture, especially in the Decorated and Perpen-

Vignette.

dicular styles; called also *Trail*.—Parker, *Gloss. of Architecture*, s. v.

Vignier, NICOLAS, a French Protestant theologian, son of Nicolas Vignier, Sen. (who himself wrote one or two religious works), was born in Germany about 1575. He studied theology at Leyden, and in 1601 became pastor at Blois. He was secretary to the national synods at Gap d'Alais, deputy (in 1609) to the Assembly of Grenoble, and presided over four provincial synods (the last two in 1638 and 1643). He died at Blois about 1645, leaving several religious works, for which see Hoefter, *Nour. Biog. Générale*, s. v.

His son Nicolas likewise served the Church at Blois, and died at the age of twenty-four.

Vignola, GIACOMO BAROZZIO DA, an Italian architect, was born at Vignola, in Modena, in 1507. He studied painting at Bologna, but afterwards went to Rome to study architecture, and made it his profession. He spent two years in France with Primaticcio, and then went to Bologna, where he constructed several fine palaces and other public buildings. He finally settled in Rome, and was appointed architect by Julius III in 1550. He designed the Church of the Jesuits at Rome, the Caparola palace, and the two lateral cupolas of St. Peter's, of which he succeeded Michael Angelo as the architect. He was the author of *The Five Orders of Architecture and Practical Perspective*, works which are still among the best authorities on those subjects. See Spooner, *Biog. Hist. of the Fine Arts*, s. v. "Barozzio."

Vignola, GIROLAMO DA, an Italian painter, flourished at Modena in the first half of the 16th century. He was a professed follower of Raphael, and some of his frescos still remain in the Church of St. Piero in his native city. See Spooner, *Biog. Hist. of the Fine Arts*, s. v.

Vignoles, ALPHONSE DES, a Reformed theologian of Germany, was born Oct. 9, 1649, at the Castle Aubais, in Lower Languedoc. He studied at Saumur, Paris, and Oxford, and after his return from the latter place he was, in 1675, appointed pastor at Cailar, where he commenced his chronological studies. After the Revocation of the Edict of Nantes, he was not only deposed from his office, but also deprived of all his books and papers. He went in 1685 to Geneva, thence to Lausanne, Berne, and finally to Berlin. In 1688 he

was appointed pastor at Halle, in 1689 was called to Brandenburg, and was received in 1701 as a member of the newly founded Academy of Sciences. In 1703 he moved to Berlin, and preached for some time in the French Church at Köpenick, near Berlin. In 1727 he was made director of the mathematical division of the Royal Academy. He died July 21, 1744. He is the author of *Chronologie de l'Histoire Sainte et des Histories Etrangères qui la Concernent, depuis la Sortie d'Égypte jusqu'à la Captivité de Babelone* (Berlin, 1738, 2 vols.). He also wrote annotations to Leufant's French edition of Spanheim's *Disquisitio Historica de Papa Felicio inter Leonem IV et Benedictum III* (La Haye, 1720). See *Histoire de l'Académie Royale de Berlin*; Jöcher, *Allgemeines Gelehrten-Lexikon*, s. v.; Winer, *Handbuch der theol. Literatur*, i, 157, 692; Fürst, *Bibl. Jud.* iii, 478. (B. P.)

Vignon, CLAUDE, a French painter and engraver, was born at Tours in 1590. He visited Italy and studied there several years. Dumesnil mentions twenty-seven spirited and masterly etchings by him, among which are *St. John in the Desert*:—thirteen plates from the *Life of Christ*:—*The Martyrdom of St. Andrew*:—*Philip Baptizing the Eunuch*:—and *The Coronation of the Virgin*. See Spooner, *Biog. Hist. of the Fine Arts*, s. v.

Vigor, Simon, a French prelate, was born at Évreux about 1515. He was educated by his father, Renaud, who was physician to Charles IX., Henry III., and Catharine de' Medici. In 1540 Simon joined the house of Navarre, and became rector of the university, and curate of St. Germain de Vieux. In 1545 he was made doctor of theology, and soon after, as pénitencier of the Church of Évreux, he accompanied his bishop to the Council of Trent; for his services there he was rewarded with the curacy of St. Paul's at Paris (1565). His zealous preaching against the doctrines of the Reformation finally led to his promotion to the bishopric of Narbonne (1570). He died at Carcassonne, Nov. 1, 1575, leaving several sermons and historical treatises, which are enumerated in Hoefer, *Nouv. Biog. Générale*, s. v.

Vigor, William, an abbot of Glastonbury, England. He was elected to the office and presented to the bishop of Bath, who consecrated him on the day after the Vigil of St. Benedict (1219). He is mentioned as having been very kind to the monks; and is immortalized in the *Chronicles* for having ceded half a load of grain to each brewing to make the beer better. He died Oct. 14, 1223—but five years after his elevation. See Hill, *English Monasticism*, p. 432.

Viguiér, PIERRE FRANÇOIS, a French Orientalist, was born at Besançon July 20, 1745. He entered the ecclesiastical ranks and taught rhetoric at the college of his native place; afterwards he passed into the Congregation of St. Lazarus, and taught theology in the Seminary of Sens. In 1772 he went to Algiers to redeem the Christian slaves; and in 1783 to Constantinople, as apostolical prefect of the Jesuit establishments in the Levant, where he acquired a knowledge of the Oriental languages. After his return to France (1802) he lived in retirement, and died there Feb. 7, 1821. He left several works on Eastern philology, history, etc., for which see Hoefer, *Nouv. Biog. Générale*, s. v.

Vihara (Sanskrit, *walking*, for pleasure or amusement), with the Buddhists (q. v.), is the name of their temples and convents. Originally it designated the hall or halls where the Buddha Sakyamuni, and the priests by whom he was accompanied, used to meet; but when these halls were converted into temples, the name *Vihara* was applied to them; and when the temples became the centre of a number of habitations in which the priests belonging to the temples resided, the whole monastic establishment was comprised under one name. Properly the Vihara merely designates the Buddhist temple, and it is generally used in this restricted sense. In Ceylon they are permanent structures, the walls being plastered and the roofs covered
